CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

155 Corey Avenue
St. Pete Beach, FL 33706

Tuesday, June 23, 2026
6:00 PM

Call to Order
Pledge of Allegiance
Roll Call

REGULAR MEETING

1. Approval of the Agenda -

Action Request: Motion to approve the June 23, 2026 agenda.

2. Audience Comments -

If you wish to speak, please complete and submit a speaker's card to the City Clerk. When called, approach the podium and state your name and address for the record. Comments are limited to 3 minutes for both general and agenda items. Public comment on agenda items will be taken when that item is called. Any presentation intended as part of public comment must be provided to the City Clerk at least 24 hours before the meeting.

3. Consent -

a. Approval of the June 9, 2026 City Commission Work Session Minutes and Regular Meeting Minutes

b. Authorize the ratification of the tentative collective bargaining agreement (CBA) Article 24: Pay Plan (Wage Reopener) reached between City Administration and the International Association of Firefighters (IAFF) Local 4966 for the period October 1, 2026 – September 30, 2028.

c. Adopt Resolution 2026-20: Modifying and reapproving rules of procedure for the Historic Preservation Board, primarily to reduce the number of members required for conduct and approval of most business from four to three.

d. Authorize the City Manager to execute a Services Agreement with Free Agent Marine LLC for Commercial Diving Services in the amount not to exceed $50,000 annually.

e. Authorize the City Manager to execute a Services Agreement with See Dive LLC for Commercial Diving Services in the amount not to exceed $50,000

annually.

f. Authorize the City Manager to execute a Services Agreement with Dive-Tech International, Inc. for Commercial Diving Services in the amount not to exceed $50,000 annually.

g. Authorize the City Manager to execute the Agreement with RCM Utilities, LLC for Wastewater System Rehabilitation Services on an as-needed basis in an amount not to exceed annually appropriated funding.

h. Authorize the City Manager to execute the Agreement with Rowland (DE), LLC for Wastewater System Rehabilitation Services on an as-needed basis in an amount not to exceed annually appropriated funding.

i. Authorize the City Manager to execute the Agreement with SAK Construction, LLC for Wastewater System Rehabilitation Services on an as-needed basis in an amount not to exceed annually appropriated funding.

j. Authorize the City Manager to execute the Agreement with Flotech Environmental, LLC for Wastewater System Rehabilitation Services on an as-needed basis in an amount not to exceed annually appropriated funding.

k. Authorize the City Manager to execute the Agreement with Hinterland Group, LLC for Wastewater System Rehabilitation Services on an as-needed basis in an amount not to exceed annually appropriated funding.

l. Authorize the City Manager to execute the Agreement with PCS Civil, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

m. Authorize the City Manager to execute the Agreement with Southern Road and Bridge, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

n. Authorize the City Manager to execute the Agreement with Ajax Paving Industries of Florida, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

o. Authorize the City Manager to execute the Agreement with BCS Construction Group for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

p. Authorize the City Manager to execute the Agreement with Cathcart Construction Company Florida, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

q. Authorize the City Manager to execute the Contract with Marolf Environmental for the Pump & Lift Station Rehabilitations capital improvement project in the amount not to exceed $2,950,000.00.

4. Ordinances -

a. Final Reading of Ordinance 2026-11: Adopting an amendment to the sign ordinance to prohibit stakes, poles, piers, and other sign structures within 50 feet of the mean high or visible water line along the Gulf, specifying exceptions and permit requirements, and detailing standards for type, number, dimensions, density, and illumination of signs, along with removal requirements.

AN ORDINANCE OF THE CITY OF ST. PETE BEACH, FLORIDA, AMENDING THE LAND DEVELOPMENT CODE RELATING TO SIGNS BY CREATING SUBSECTION 26.14.(w) TO PROHIBIT SIGNS, POSTS, AND POLES WITHIN FIFTY (50) FEET OF THE MEAN HIGH OR VISIBLE WATER LINE OF THE GULF; REQUIRING A PERMIT FOR INSTALLATION OF SIGNS ON THE BEACH; PROVIDING FOR RECITALS, CODIFICATION, CONFLICTS, SEVERABILITY, CORRECTION OF SCRIVENER'S ERRORS, CONSTRUCTION, PUBLICATION, AND AN EFFECTIVE DATE.

Action Options: Motion to [adopt/adopt with modification/deny/continue to [specify date certain]] Ordinance 2026-11.

5. Action Items -
    a. City Manager Annual Evaluation
6. Items for Discussion -
7. City Clerk, City Manager, City Attorney and City Commission Reports -
8. Adjournment -

APPEAL: In accordance with 286.0105, Florida Statute (Notices of meetings and hearings must advise that a record is required to appeal), if a person decides to appeal any decision made by this committee, board, agency, or commission with respect to any matter considered at this meeting or hearing, he or she will need a record of the proceedings, and that, for such purpose, he or she may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based.

AMERICANS WITH DISABILITIES ACT (ADA): In accordance with the Americans with Disabilities Act and Florida Statutes, if any person with a disability defined by the ADA needs special accommodation to participate in this proceeding, then not later than two business days prior to the proceeding, he or she should contact City Hall at (727) 367-2735.

PUBLIC COMMENT INSTRUCTIONS FOR THOSE NOT PHYSICALLY PRESENT:
The City has made accommodations for those who cannot be physically present or do not feel comfortable appearing in person. If a member of the public would like to provide comments for the meetings, they may do so in the following ways:

- Email the City Clerk by 12:00 p.m. on the day of the meeting at cityclerk@stpetebeach.org
- Leave a voicemail message by calling **727.363.9225** by 12:00 p.m. the day of the meeting

In your three (3) minute or less comment, please be sure to include your name and address for the record.

The public is cordially invited to attend this meeting.
All agenda material is available for review at City Hall or www.stpetebeach.org.

City Commission Work Session
June 9, 2026
3:00 p.m.

ELECTED OFFICIALS PRESENT:
Scott Tate, Mayor
Karen Marriott, Commissioner, District 1
Lisa Robinson, Vice Mayor, Commissioner, District 2
Al Causey, Commissioner, District 3
Jon Maldonado, Commissioner, District 4

STAFF PRESENT:
Frances Robustelli, City Manager
Ralf Brookes, City Attorney
Ginny Bodkin, Deputy City Clerk
Adam Poirrier, Assistant City Manager
Devon Schmidt, Finance Director
Candyce Galloway, Technology & Innovation Director

Mayor Tate called the meeting to order at 6:00 p.m., followed by the Pledge of Allegiance.

1. PRESENTATIONS

a. 2025-2026 Strategic Plan

Candyce Galloway, Director of Technology, explained that today's session would use the framework that has already been built and the priorities indicated in Commissioner surveys to discuss progress and measurement, benchmarking, organizational and culture shifts, and choose a path forward. Her presentation is part of the meeting record.

Ms. Galloway explained that staff has developed a simple framework based on Commission workshops and feedback, produced a two-year strategic roadmap, aligned strategic projects to the adopted strategic pillars, and begun developing KPIs and metrics to measure progress. The pillars identified were Community Prosperity, Operational Excellence, Resilience/Recovery/Sustainability, Economic Growth and Development, and Reliable Infrastructure. Survey results showed broad alignment among Commissioners, staff, and leadership around serving residents, fiscal responsibility, service excellence, infrastructure and recovery priorities, resident-first governance, and preservation of community character.

Ms. Galloway stated that the City is moving from broad themes and recovery-focused priorities toward long-term planning with clearer prioritization, measurable outcomes, and ongoing reporting. She described draft strategic dashboards, existing public transparency tools such as the CIP dashboard, and planned KPI-based reporting. Staff reported that approximately 73% of active projects remain concentrated in infrastructure and recovery-related pillars, reflecting continued recovery demands. She also summarized benchmarking of approximately 20 peer communities and stated that the City is already ahead of many peers in public project portfolio reporting, with the target being live dashboards, KPI tracking, and regular department-level reporting.

Ms. Galloway presented three potential paths for advancing the City's strategic planning efforts beyond the current two-year roadmap, asking for Commission guidance:

Option A – Full External Support
- Hire an outside consultant to lead the strategic planning process.
- Consultant would facilitate community engagement, surveys, focus groups, workshops, and development of a longer-term strategic vision.
- Provides dedicated expertise and a turnkey approach but comes with the highest cost.

Option B – Continue In-House
- City staff would continue refining and implementing the existing strategic plan using available resources and time.
- Maintains momentum and minimizes costs but may limit the pace of progress and lacks a defined plan for broader community engagement.

Option C – Hybrid Approach (Staff Recommendation)
- Continue managing the strategic planning process internally while using outside consultants for targeted

support.
- Consultants would assist with community surveys, focus groups, stakeholder engagement, workshops, and analysis.
- Intended to provide meaningful public input, third-party facilitation, and community-facing deliverables while maintaining staff ownership of the process.
- Staff recommended this option as a balanced approach that accelerates planning efforts and strengthens community involvement without fully outsourcing the process.

Following her presentation, Ms. Galloway asked for Commission guidance and direction. Commissioners generally agreed that strategic planning has value and that broader community input should be part of the process. However, there was significant discussion about the scope, cost, and necessity of hiring outside consultants. There was support for the hybrid approach (Option C) because it would provide an independent, unbiased process and help ensure the strategic plan reflects community priorities rather than solely the perspectives of staff or the current Commission. It was noted that community engagement is important if the plan is intended to guide the City beyond the tenure of current elected officials. At the same time, multiple questions were raised about the proposed $42,000 hybrid option and the larger costs associated with a fully outsourced approach. Concerns were raised about current budget constraints, ongoing hurricane recovery efforts, and whether staff could accomplish much of the work internally. Commissioner Robinson questioned whether the City should spend additional funds on strategic planning when infrastructure and recovery projects remain pressing priorities and suggested the City could develop and administer its own survey.

Discussion also focused on the value of community surveys. There was general support for obtaining input from residents who do not typically attend meetings or contact the City, but some questioned whether a survey of approximately 200 respondents would adequately represent the community. It was noted that professionally designed surveys can provide statistically valid results and may be the most cost-effective way to gather broad community feedback. By the conclusion of the discussion, there appeared to be little support for the full consultant-led approach or for the full $42,000 hybrid package. Instead, many favored a more limited version of the hybrid approach that focused primarily on a professionally administered community survey and related analysis while avoiding more costly workshops and facilitation services.

The Commission did not make a final decision on a strategic planning option. Instead, the consensus direction was for staff to:
- Reevaluate the proposed options.
- Consider a scaled-down version of the hybrid approach.
- Focus on cost-effective methods for obtaining community input, particularly through surveys.
- Return with revised recommendations and additional information for future consideration.

Staff indicated they would take the Commission’s feedback and develop refined options for future discussion.

b. <u>Budget Workshop #2: Overview of the landscape, Feedback on the Rankings of CIP, Revenue Strategy Direction, Strategy of Building the FY2027 Budget</u>

Devon Schmidt, Finance Director, opened the budget discussion by noting that staff is bringing the Commission into the budget development process early, seeking guidance on capital improvement priorities, revenue strategies, and overall fiscal year 2027 budget direction.

A major focus of her presentation was a “Save Our Homes from Excessive Property Taxes” legislation that passed both chambers on June 2, 2026 and will appear on the November ballot. If approved, it would significantly increase Florida's homestead exemption and reduce the growth cap on non-homestead property assessments. She explained that these changes could reduce the City's property tax revenue by approximately $1.1 million in FY 2027 and $1.6 million in FY 2028, while also making it more difficult to raise property tax revenues because any

millage rate above the rollback rate would require a supermajority vote of the Commission.

Ms. Schmidt reviewed how the City is tracking future redevelopment projects and their potential impact on taxable value and revenue generation. While redevelopment is expected to generate additional tax revenue over time, staff emphasized that these projections are long-term forecasts and should not be relied upon as immediate solutions to budget challenges. She further noted that the proposed legislation could restrict the use of property tax revenues to specific purposes such as public safety, infrastructure, debt service, and retirement obligations. As a result, administrative and quality-of-life services may need to rely more heavily on alternative funding sources, including fees, parking revenues, and cost allocation methods. Budget balancing strategies under consideration include expenditure reductions, fee adjustments, enterprise fund restructuring, millage rate changes, and potential reductions in capital project funding.

Commission discussion primarily focused on understanding the long-term financial implications of the proposed property tax changes. Commissioner Marriott asked how much future redevelopment revenue could offset the projected loss in property tax revenue and sought clarification on how the rollback rate would function if the homestead exemption increases. Ms. Schmidt explained that the rollback rate calculations will become clearer once official figures are received from the county. Mayor Tate asked for clarification regarding redevelopment revenue projections and the assumptions behind the estimated increase in taxable value from future hotel redevelopment projects. It was also pointed out that redevelopment revenue forecasts are highly uncertain because some major projects may take many years to complete and are still subject to legal and economic uncertainties. Rebuilding activity following the hurricanes may not generate substantial new taxable value for homesteaded properties because of existing tax protections. Commissioner Causey highlighted the larger fiscal picture, noting that while the City may lose approximately $1.6 million annually from the homestead exemption changes and gain roughly $2 million annually from redevelopment over time, those figures are small compared to the City's much larger infrastructure, stormwater, wastewater, and hurricane recovery needs, which are projected to require tens or even hundreds of millions of dollars in investment over the coming years. Major Commission concerns included the potential impacts of the state property tax proposal, the limits of redevelopment revenue as a funding solution, and the need to develop long-term strategies to address significant infrastructure and recovery costs.

City Manager Frances Robustelli introduced Public Services Director Camden Mills who would be reviewing Capital Improvement Projects and seeking Commission feedback on whether to continue funding projects or not.

Mr. Mills presented the City's capital project prioritization framework and preliminary project rankings developed to assist with FY 2027 budget planning. He explained that projects were evaluated using a scoring system of 100 points based on factors such as public safety, regulatory requirements, infrastructure condition, resiliency, operational impacts, and funding opportunities. He noted that the rankings are intended to provide a consistent decision-making framework and that lower-ranked projects may still represent important community needs. He reviewed the information included in the project ranking matrix, including project scores, funding sources, current budget allocations, projected FY 2026 expenditures, proposed FY 2027 appropriations, seven-year cost projections, grant funding opportunities, and whether projects represent one-time or recurring investments. Additional information was provided regarding estimated operating and maintenance costs, expected asset service lives, and total long-term project costs for major infrastructure initiatives. The presentation highlighted the City's highest-ranked projects, which are primarily associated with wastewater, stormwater, critical facility, and infrastructure improvement needs. There was a handout provided that was made part of the meeting record. Mr. Mills noted that the purpose of the workshop was to obtain feedback on the project rankings, identify Commission priorities, discuss potential project tradeoffs, and confirm projects that are considered essential due to safety, operational, or regulatory requirements. There was a question regarding the distinction between resiliency projects and traditional stormwater infrastructure projects. Mr. Mills explained that stormwater projects generally relate to rehabilitation and replacement of existing infrastructure, while resiliency projects typically involve new infrastructure or increased levels of service designed to address long-term flooding and climate adaptation needs. He also noted that several resiliency projects are based on prior planning studies and that the ongoing Watershed

Management Master Plan will provide updated recommendations and priorities for future capital investments.

Discussion centered the project ranking methodology and there was a request for additional detail regarding the distinction between stormwater infrastructure projects and broader resiliency initiatives. There was interest in understanding how resiliency project costs relate to stormwater, wastewater, shoreline protection, and other infrastructure improvements, particularly given the significant long-term costs associated with resiliency projects. Mr. Mills explained that stormwater projects generally focus on rehabilitation and replacement of existing infrastructure, while resiliency projects are intended to provide new infrastructure or enhanced levels of service to address future flooding and adaptation needs. Discussion also focused on the role of grants, FEMA reimbursements, insurance recoveries, and other external funding sources in project prioritization. Additional information was requested to show where projects may be offset by grant funding, insurance proceeds, or FEMA reimbursements to better evaluate the City's actual financial obligations. Mr. Mills clarified the status of various grants and noted that many hurricane-related facility repair projects are expected to be funded through insurance and FEMA reimbursement programs. Several of the highest-ranked projects, including Fire Station 22, wastewater collection system improvements, facility repairs, and elevator rehabilitation projects were discussed. Several items were addressed, such as project timelines, total project costs versus annual appropriations, recurring versus one-time expenditures, and the importance of considering long-term maintenance obligations when evaluating capital investments. Mr. Mills explained that some recurring infrastructure programs require larger investments in the near term to address deferred maintenance, with lower annual costs anticipated once systems reach a more sustainable condition. City Manager Robustelli explained that most grant, insurance, and FEMA funding is reimbursable, requiring the City to fund projects upfront and then seek reimbursement, which may take months or years to receive. It was noted that insurance and FEMA reimbursements associated with the 2024 storms will be incorporated into future budget presentations as revenue projections become more certain, and that the City is currently managing 86 FEMA-related projects. Discussion also focused on the relationship between project rankings and available funding. Staff confirmed that the highest-priority projects identified in the ranking system represent approximately $23.3 million in proposed FY 2027 expenditures.

Mr. Mills reviewed shoreline protection and seawall-related capital projects, including citywide seawall improvements, the Pass-a-Grille seawall replacement, and the Don CeSar neighborhood resiliency initiatives. He explained that seawall projects range from minor repairs to full replacements, with replacement projects generally requiring construction to current code elevation standards. Discussion focused on the costs and benefits of raising seawalls, the relationship between city-owned and private seawalls, long-term resiliency planning, and potential impacts on adjacent properties. There were differing perspectives regarding the timing and prioritization of seawall elevation projects, while highlighting the need to protect public infrastructure and maintain consistency with adopted City policies. Discussion included grant funding opportunities, noting that some projects are partially dependent on state or federal grant awards that have not yet been secured. Staff clarified funding assumptions, project scopes, and the distinction between existing infrastructure repairs and broader resiliency improvements. Additional discussion addressed the Don CeSar neighborhood adaptation project, including the use of planning studies, grant eligibility considerations, and the need for further refinement of project costs and recommendations. There was discussion regarding the subaqueous wastewater force main replacement project, questioning its ranking relative to other infrastructure priorities. Mr. Mills advised that the existing force main remains serviceable but is approaching the end of its projected useful life, and that current funding is primarily intended to continue procurement and project development activities. Commissioners discussed the potential impact of future regional wastewater system discussions on the project and expressed interest in maintaining flexibility while evaluating long-term wastewater service options. Discussion concluded with a review of the project prioritization methodology and the importance of appropriately ranking and evaluating critical infrastructure, wastewater, and resiliency projects as part of the City’s long-term capital improvement planning process.

Mayor Tate noted time constraints associated with completing the budget workshop before the regular meeting. There was consensus to adjourn the work session and continue the budget discussion following the regular Commission meeting.

Mayor Tate adjourned the meeting at 5:47 PM.

MINUTES APPROVED: JUNE 23, 2026

RENEE ROSE	SCOTT TATE
CITY CLERK	MAYOR

City Commission Meeting
June 9, 2026
6:00 p.m.

ELECTED OFFICIALS PRESENT:
Scott Tate, Mayor
Karen Marriott, Commissioner, District 1
Lisa Robinson, Vice Mayor, Commissioner, District 2
Al Causey, Commissioner, District 3
Jon Maldonado, Commissioner, District 4

STAFF PRESENT:
Frances Robustelli, City Manager
Ralf Brookes, City Attorney
Ginny Bodkin, Deputy City Clerk
Adam Poirrier, Assistant City Manager
Brandon Berry, Senior Planner
Devon Schmidt, Finance Director

Mayor Tate called the meeting to order at 6:00 p.m., followed by the Pledge of Allegiance.

1. APPROVAL OF THE AGENDA

City Manager Frances Robustelli requested to move item 5a, Authorization to Execute 8th Addendum, to after item 3a, as PSTA representatives were present. Member Causey requested to pull item 4a, Ordinance 2025-02, from the agenda to a future meeting.

Discussion followed regarding significant public feedback calling for greater community engagement before any action is taken on the beach ordinance. City Attorney Brookes noted that the City plans to hold a seminar on the Customary Historical Use Doctrine, which he will present on July 23, 2026. Commissioner Robinson highlighted the importance of not putting the cart before the horse when considering potential rules and regulations.

Motion: **Commissioner Causey moved, Vice Mayor Robinson seconded to move item 4a, First Reading Ordinance 2025-02, to a date to be determined or after a community engagement meeting. The motion carried 5-0.**

Motion: **Commissioner Marriott moved, Vice Mayor Robinson seconded, and the motion carried 5-0 to approve the June 9, 2026 City Commission Agenda, as amended.**

2. AUDIENCE COMMENTS

Kathy Garchow, Casablanca Ave., commented on the need for project-based accounting. She shared a presentation on the issues with the stormwater system in the DonCesar neighborhood due to its lower elevation. Proper slope and capacity are critical for flood prevention. Pump stations and force mains are an essential need.

John Kurzman, Bahia Honda Way, thanked the Commission for the decision to delay the first reading of the beach ordinance and spoke about customary use and a potential sign ordinance.

Kyle Fleming, Owner of Kyle Fleming Photography, spoke about potential restrictions on beach photography and requested that any regulations accommodate small-scale photographers who often receive short-notice bookings.

Deb Schechner, Boca Ciega Isle Dr., supported addressing customary use before further beach ordinance changes, raised concerns about a private property being used for parking and storage, and requested an update on the mothball investigation due to concerns about wildlife and public safety.

Dana Richardson Bahama Way S., thanked the Commission for its action and requested greater resident involvement in the beach ordinance development process, including opportunities for input comparable to those provided to other stakeholder groups.

3. CONSENT

a. Approval of the May 26, 2026 City Commission Meeting Minutes

Motion: **Commissioner Marriott moved, Vice Mayor Robinson seconded, and the motion carried 5-0 to approve the June 9, 2026 City Commission agenda.**

5. ACTION ITEMS (Moved)

a. Authorize the City Manager to execute the Eighth Addendum and Renewal with the Pinellas Suncoast Transit Authority for the Suncoast Beach Trolley Agreement for Fiscal Year 2026 transit service for $308,279.51.

Assistant City Manager Adam Poirrier introduced the eighth addendum to the City's agreement with PSTA for the Suncoast Beach Trolley program. He explained that the agreement funds the Suncoast Beach Trolley service, Route 90 commuter service connecting the beach via the Bayway, and paratransit services available to City residents. He introduced Darden Rice from PSTA.

Ms. Rice reaffirmed PSTA's commitment to its partnership with the City. She acknowledged communication and administrative issues related to the agreement renewal process and explained that PSTA has implemented new internal procedures and project management systems to improve oversight and coordination. To address the issue, PSTA agreed to honor the amount budgeted by the City for FY 2026 rather than the higher amount reflected in the draft agreement. PSTA also committed to working with City staff well in advance of the FY 2027 budget process to review service needs, discuss projected costs, and improve communication to avoid future discrepancies. The presentation concluded with PSTA expressing its desire to maintain a collaborative relationship with the City.

Commissioners thanked PSTA for reducing the FY 2026 contract amount to align with the City's budgeted funding. Discussion included transit ridership trends, funding sources, and service utilization. PSTA provided ridership data for the Suncoast Beach Trolley, Route 90, and SunRunner services, noting that beach trolley ridership has generally remained strong while Route 90 ridership has declined. PSTA also identified the City's highest-use transit stops, including the stop near City Hall, the St. Pete Beach Access/SunRunner terminal, the 75th Avenue transfer location, and the Tradewinds area. Discussion included an overview of PSTA's funding structure and the City's status as a non-member jurisdiction that contracts separately for transit services rather than contributing ad valorem taxes to PSTA. Discussion also included paratransit services available to St. Pete Beach residents, including annual usage levels and the relationship between fixed-route transit service and eligibility for PSTA Access transportation services. Additional questions focused on rider demographics, destinations, and the balance of resident and visitor use of transit services serving St. Pete Beach.

PUBLIC COMMENT

John Kurzman, Bahia Honda Way, supported continued trolley service but expressed concerns about the size of the SunRunner on Gulf Blvd, citing safety concerns and conflicts with bike lanes. He suggested limiting the SunRunner to areas north of St. Pete Beach and relying on the trolley for service along the southern beaches.

The question was raised whether the SunRunner vehicles are wider than the travel lanes on Gulf Blvd and concerns were expressed regarding buses remaining within their designated lanes. PSTA staff responded that SunRunner vehicles are standard transit width and stated that safety remains a top priority. PSTA representatives indicated they would further review the concerns raised regarding lane positioning and vehicle operations to ensure the continued safe movement of transit vehicles, motorists, bicyclists, and pedestrians. There were follow-up questions regarding SunRunner vehicle dimensions, mirror configurations, and safety concerns related to operating within the travel lanes on Gulf Boulevard. PSTA representatives stated that vehicle width measurements include mirrors and advised that they have reviewed concerns raised by operators regarding clearance around fixed objects and are evaluating potential adjustments while maintaining safety standards. PSTA also agreed to provide the City with additional ridership and performance data discussed during the presentation. Discussion included the value of public transit services, including beach trolley service and paratransit transportation for residents with disabilities, while acknowledging community concerns regarding costs. Discussion highlighted the importance of evaluating transit services and funding levels during the upcoming budget cycle. Commissioners

noted PSTA's willingness to reduce the FY 2026 contract amount to the level previously budgeted by the City and expressed support for approving the agreement while continuing broader discussions regarding future transit services and funding.

Motion: **Commissioner Marriott moved, Vice Mayor Robinson seconded, and the motion carried 5-0 to authorize the City Manager to execute the PSTA contract at the amended amount.**

4. ORDINANCES

a. ~~First Reading Ordinance 2025-02: Creating Chapter 95. Beaches of the City Code of Ordinances, and adopting and modifying standards pertaining primarily to behavior, conduct, development, permitting, and maintenance on and of the City's beaches~~

Removed for discussion at a future meeting.

b. First Reading Ordinance 2025-16: Amending Land Development Code Division 44; renaming the division "Marine Turtle and Coastal Wildlife Protections", updating technical standards, providing requirements for special events, specifying property modifications triggering compliance with lighting and screening standards, and setting penalties and enforcement entities.

AN ORDINANCE OF THE CITY OF ST. PETE BEACH, FLORIDA FOR THE PURPOSE OF RENAMING LAND DEVELOPMENT CODE DIVISION 44 – MARINE TURTLE PROTECTION TO DIVISION 44 - MARINE TURTLE AND COASTAL WILDLIFE PROTECTIONS; AMENDING SECTIONS 44.1. THROUGH 44.9., AND ADOPTING SECTIONS 44.10 THROUGH 44.14., TO UPDATE TECHNICAL STANDARDS, CLARIFY REQUIREMENTS FOR NEW AND EXISTING DEVELOPMENT AND SPECIAL EVENTS, MODIFY PENALTIES, COMPLIANCE AND ENFORCEMENT MEASURES, SPECIFY RESPONSIBLE PARTIES, AND UPDATE DEFINITIONS, TO BETTER SERVE THE PURPOSE AND INTENT OF THE DIVISION AND ALIGN WITH FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION AND FISH AND WILDLIFE COMMISSION BEST PRACTICES; PROVIDING FOR CODIFICATION; CONFLICTS; SEVERABILITY; CORRECTION OF SCRIVENER'S ERROR; CONSTRUCTION; PUBLICATION; AND AN EFFECTIVE DATE.

Attorney Brookes read Ordinance 2025-16 in title only.

Senior Planner Brandon Berry presented a proposed ordinance updating the City's marine turtle protection and beachfront lighting regulations. The ordinance updates the City's existing 2007 standards to align with the State of Florida's 2020 model lighting ordinance and was developed with input from the Beach Stewardship Committee, Planning Board, the Sea Turtle Conservancy, the National Wildlife Federation, the public, local hoteliers, and the Tampa Bay Beaches Chamber of Commerce. He explained that the ordinance was intentionally drafted to comply with Senate Bill 180 and focuses on lighting, maintenance, repair, and operational standards rather than imposing new development restrictions. The presentation outlined several proposed changes, including updated technical lighting standards, requirements for long-wavelength lighting, definitions for shielded and full-cutoff fixtures, standards for window tinting and visible light transmittance, regulations for lighting associated with pools and special events, and updated enforcement and penalty provisions. The ordinance would also require annual reporting, encourage the use of native vegetation for screening, and establish restrictions on transient lighting during marine turtle nesting season. He reviewed comments received from hoteliers and business representatives and explained modifications incorporated into the draft ordinance. Discussion included standards for turtle-friendly glass and window film, visible light transmittance requirements, fireworks restrictions during shorebird and turtle nesting seasons, enforcement responsibilities, and exemptions for beach weddings. Mr. Berry also noted that the ordinance had been intended to work in conjunction with a related ordinance that was continued and identified provisions that may require revision depending on future Commission action regarding the companion ordinance.

Commissioners discussed several provisions of the proposed ordinance, including lighting visibility standards, compliance triggers for redevelopment projects, transient and handheld lighting restrictions, enforcement procedures, screening vegetation requirements, window tinting standards, and fireworks regulations. Questions were raised regarding how visibility would be measured, applicability to condominiums and residential properties, and the need for additional clarity regarding enforcement and compliance requirements. There was interest in ensuring the ordinance does not create unintended consequences for residents and property owners, particularly regarding transient lighting, open doors and windows, and existing property conditions. Discussion also focused on whether future window tinting standards should automatically track state model ordinance updates or remain aligned with county requirements. Additional suggestions included clarifying grandfathering provisions for existing vegetation and specifying inspection expectations. It was noted that portions of the ordinance were closely connected to the companion ordinance that had been continued and suggested that both items be considered together. There was discussion that this needed additional outreach and input from beachfront condominium owners and residents before taking action.

Stacey Gallagher, Sea Turtle Conservancy, spoke in support of the proposed ordinance updates, noting that advances in research and lighting technology since 2007 justify revising the City's regulations. She commended provisions requiring long-wavelength lighting, updated lighting definitions, and protections against wildlife harassment from transient lighting. She also recommended reducing the allowable visible light transmittance standard for window treatments from 45% to 30% or less, citing research indicating improved effectiveness in reducing sea turtle disorientation. She thanked the City for its commitment to protecting sea turtles and coastal wildlife while updating its lighting standards.

PUBLIC COMMENT

Cindy Perry, Boca Ciega Isle Dr., representing St. Pete Audubon, provided information on black skimmers and their nesting behavior. She discussed protections for the species under state regulations and described how fireworks, drones, and other disturbances can disrupt nesting colonies, harm chicks, and reduce nesting success. She noted that St. Pete Beach hosts one of the state's largest black skimmer colonies and highlighted the importance of protecting nesting habitat during the breeding season.

Joe Widlansky, St. Petersburg, Sea Turtle Trackers, discussed sea turtle nesting challenges, highlighting the impacts of artificial lighting, beach activities, shark fishing, and other disturbances on nesting turtles and hatchlings. He supported continued enforcement of the City's lighting ordinance and encouraged greater public education regarding turtle-friendly lighting. Commissioners asked questions regarding false crawls, hatchling losses, shark fishing activity, and turtle-safe lighting options. Discussion included the need for continued outreach to visitors and beachfront properties regarding sea turtle protection measures.

Deb Schechner, Boca Ciega Isle Dr., spoke in support of turtle-safe red flashlights and suggested providing beach ordinance guidance to the Sheriff’s Office to improve enforcement awareness. She encouraged increased public and hotel guest education regarding sea turtle and shorebird nesting protections and noted the importance of minimizing disturbances to nesting wildlife.

Dana Richardson, Bahama Way S., Spoke in support of delaying consideration of the ordinance for further review. She encouraged expanded public education on sea turtle protection, questioned responsibility for beach maintenance during nesting season, and suggested additional measures to reduce obstacles for nesting turtles, including management of beach furniture and debris.

John Kurzman, Bahia Honda Way, spoke in support of additional public workshops on sea turtle protections and encouraged balancing wildlife protection with resident needs. He raised concerns regarding proposed lighting requirements, ordinance definitions, and potential impacts on homeowners, and suggested further review and clarification before adoption.

Kevin Reali, Tampa, worked with staff on the proposed beach ordinances and noted efforts to identify and correct legal inconsistencies in the current code. He recommended that related ordinance amendments be considered together to avoid conflicts and ensure consistency between provisions.

Commission discussion highlighted concerns raised during public comment regarding drone disturbances and the use of bright searchlights by fishermen near the beach, suggesting these issues may warrant future consideration. There were shared concerns expressed by residents, businesses, pedestrians, and motorists regarding the reduced visibility associated with amber street lighting along Gulf Boulevard. Discussion focused on potential safety impacts for drivers and pedestrians, particularly at crosswalks where the amber street lighting may reduce contrast with existing crossing signals. Discussion highlighted the importance of balancing wildlife protection measures with public safety needs and evaluating opportunities to improve visibility while maintaining compliance with turtle-friendly lighting standards.

Motion: **Vice Mayor Robinson moved, Commissioner Causey seconded, and the motion carried 5-0 to continue Ordinance 2025-16 to a date to be determined along with Ordinance 2025-02.**

5. ACTION ITEMS

~~a. Authorize the City Manager to execute the Eighth Addendum and Renewal with the Pinellas Suncoast Transit Authority for the Suncoast Beach Trolley Agreement for Fiscal Year 2026 transit service for $308,279.51.~~ Moved after 3. Consent Items.

6. ITEMS FOR DISCUSSION

1. **Continuation of budget workshop #2 Overview of the landscape, Feedback on the Rankings of CIP, Revenue Strategy Direction, Strategy of Building the FY2027 Budget** (Added)

At 7:57 PM Mayor Tate continued the discussion from the 3PM Commission Work Session as was moved during that meeting.

Public Service Director Camden Mills resumed his presentation with Moderate Ranked Projects.

- Projects 22-28 – There was discussion on pausing funding on #27 (Don CeSar & Boca Ciega Area Resiliency Adaptation) until the completion of the WSP Engineering Study. Finance Director Devon Schmidt confirmed that capital projects can be adjusted at mid-year or any time during the year. The final decision was to keep the funding allocated as is. Commissioner Causey requested more specificity on resiliency projects. Mr. Mills made note. No changes recommended in this section.

Road resurfacing was discussed including bringing patch back up to level on road. It would be beneficial to coordinate reclaimed water laterals with road resurfacing.

- Projects 31- 40 – No changes were recommended.
- Projects 40 - 49 - No changes were recommended.
- Projects 51 -57 - It is unknown if the $104,999 would cover repairs of the Merry Pier (#56). The City could explore leasing space. The City Manager noted that if the bait shack cannot be rebuilt, it will be $68-70K to demo. Project #59 (Fishing Piers Rehabilitation) can be reallocated mid-year if necessary. No changes were recommended.

Lowest Ranked Projects

- Projects 60 - 67 - Put off Project #60 (Wastewater Service Laterals Smoke Testing) one year at least.
- Projects 68 - 76 – Project #73 (Foot Shower and Drainage Improvements) move to 2031 and change the name.
- Project #76 to properly reflect city assets only. Project #71 (Horan Park Docks) is not proposed for 2027.
- Projects 78 – 81 - Move Project #80, Fire Station 23 Painting, to another year.

Following the project rank review, Ms. Schmidt reviewed the FEMA Public Assistance national workflow, explaining the reimbursement process from project submission through final closeout. She reported that the City currently has 86 FEMA-related projects associated with Hurricanes Helene and Milton and has received obligated funding for debris removal and debris monitoring projects. She noted that future budget presentations will include additional detail regarding project-specific FEMA reimbursements and funding status. She also reviewed recommendations received from the Finance and Budget Review Committee, including requests for a consolidated project ranking presentation and exploration of additional funding opportunities. Discussion then shifted to potential revenue strategies, including bed tax utilization for eligible capital projects, fire assessments, resiliency-related funding mechanisms, grants, and legislative appropriations. Discussion contemplated pausing further action on the proposed CRA pending the outcome of a statewide property tax ballot measure and requested additional information regarding the potential impacts of proposed assessments and fees on property owners before considering future action.

Assistant City Manager Adam Poirrier spoke on the potential use of a fire assessment fee as a funding mechanism to offset fire protection costs and free General Fund revenues for other capital needs. He explained that implementation would require a detailed nexus study to determine a fair allocation of costs between residential and commercial properties based on fire service demand and call volume. He noted that similar assessments in other Florida communities typically result in residential charges in the hundreds of dollars annually and require voter approval through a referendum. Discussion focused on the purpose of a fire assessment as a user-based funding model rather than a general tax increase, with commissioners noting that a study could identify whether certain property types generate a disproportionate demand for fire services. Mr. Poirrier advised that pursuing the assessment would require approximately $85,000 for a professional study and a multi-year public engagement and evaluation process. The Commission expressed support for budgeting funds to conduct the study and further evaluate the feasibility of a fire assessment fee.

City Manager Robustelli shared several potential revenue strategies identified by the Finance and Budget Review Committee. She explained that a resiliency fee would require a nexus study to determine an equitable funding model and could potentially be structured through utility billing or a similar assessment mechanism. Enterprise fund fee studies, grants, and resident services fees are already underway and will be presented to the Commission as part of the upcoming budget process. Discussion also included a potential parking-based street repair assessment, which would evaluate whether commercial properties could contribute toward roadway maintenance based on parking demand and usage. Additional discussion focused on public-private partnerships, philanthropic donations, naming opportunities, and the potential creation of a community foundation model similar to those used by other municipalities. Commissioners expressed general support for exploring partnership and philanthropic opportunities on a case-by-case basis as potential supplemental funding sources for community projects and amenities.

Finance Director Schmidt discussed the use of bonds, public-private partnerships, assessments, grants, and other revenue sources. She explained the differences between general obligation bonds, revenue-backed bonds, and public-private partnerships, noting that major infrastructure investments will likely require long-term financing tools. Discussion included the need to better define project costs through ongoing studies before pursuing bond financing and the importance of understanding associated timelines, legal requirements, and consulting costs. There was support for continuing to evaluate bonding options for future wastewater, stormwater, drainage, and resiliency projects, with recognition that additional project scoping and financial analysis are needed before proceeding. Staff were
directed to provide estimated costs and timelines associated with exploring bond financing options. Additional discussion addressed potential short-term rental registration fees, opportunities to increase tourism promotion through local and county partnerships, and the review of fees associated with commercial beach activities. Ms. Schmidt also provided an overview of budget development assumptions, including legislative uncertainty related to property taxes, inflationary pressures, insurance costs, rate studies, and maintaining current staffing levels.

Staff will incorporate Commission feedback into the preliminary FY 2027 budget and continue evaluating identified revenue strategies.

Motion: **Vice Mayor Robinson moved, Commissioner Maldonado moved to extend the meeting to 10:10 PM. The motion carried 4-1 with Commissioner Marriott voting no.**

7. CITY CLERK, CITY MANAGER, CITY ATTORNEY, AND CITY COMMISSION REPORTS

Ginny Bodkin, Deputy City Clerk – nothing to report.

Frances Robustelli, City Manager – nothing to report.

City Attorney Brookes – nothing to report.

Commissioner Maldonado – He thanked the outgoing Vina Del Mar Island Association board members and welcomed and congratulated the new board members.

Commissioner Causey – nothing to report.

Vice Mayor Robinson – She thanked Planning Manager Kristin Coman, Senior Planner Brandon Berry, and Community Development Director Laura Canary for their workshop on historic designation.

Commissioner Marriott – nothing to report.

Mayor Tate – He thanked staff for the hard work put into the budget presentations. He highlighted the July 4th celebration and announced that he will be in a dunk tank that evening.

Mayor Tate adjourned the meeting at 10:00 pm.

MINUTES APPROVED: JUNE 23, 2026

Agenda Report

Agenda Title Name: Authorize the ratification of the tentative collective bargaining agreement (CBA) Article 24: Pay Plan (Wage Reopener) reached between City Administration and the International Association of Firefighters (IAFF) Local 4966 for the period October 1, 2026 – September 30, 2028.

Action Request: Motion to authorize the ratification of the tentative collective bargaining agreement (CBA) Article 24: Pay Plan (Wage Reopener) reached between City Administration and the International Association of Firefighters (IAFF) Local 4966 for the period October 1, 2026 – September 30, 2028.

Strategic Objective: Operational Excellence

Date: June 23, 2026

Prepared By: Adam Poirrier, District Chief

Through: Frances Robustelli, City Manager

Summary of Issue:

Authorization is requested to ratify the tentative contract agreement Article 24: Pay Plan (Wage Reopener) reached between City administration and the IAFF for the period October 1, 2026 – September 30, 2028.

On September 22nd, 2025, the City Commission approved authorization to ratify the tentative agreement reached with the IAFF. Under the tentative agreement, members covered under the agreement shall be paid in accordance with the Pay Plan during the term of the CBA. Wages were set for FY26 with wage reopener discussions set for FY27 and FY28.

On February 23rd, 2026, and May 13th, 2026, wage reopener negotiations were conducted, leading to agreed-upon terms for FY27 (wages effective October 1, 2026) and FY28 (wages effective October 1, 2027):

- FY27 – All Positions would be brought to the 60th Percentile based on local departments utilized by the city in previous negotiations.
- FY28 – The Pay Plan will be increased based on the May 2027 U.S. Bureau of Labor Local CPI.

The agreed-upon terms were for members to progress to the next higher STEP on their anniversary date as illustrated in Appendix I Pay Plan, which was already approved in Article 24.

These changes are intended to maintain the City's competitiveness with nearby communities and ensure the ability to retain and attract top talent, leading to exceptional public safety.

IAFF Local 4966 members conducted a ratification vote on June 1st, 2026, and June 2nd, 2026, resulting in 17 votes to accept and 8 votes to reject (76% participation rate).

The cost of the pay plan changes and increases is approximately $196,185 and will be included in the proposed FY27 budget. Additionally, over 50% ($98,093) of the increase will be covered by the Advanced Life Support-First Responder contract with Pinellas County.

Funding: Expenditures will increase as stated in the Summary of Issue and will be included in the proposed FY27 budget. As mentioned, over 50% of anticipated cost increases will be covered by the Advanced Life Support-First Responder contract with Pinellas County.

ARTICLE 24: PAY PLAN

24.1 Annual Base Salary and Classifications.

A. Members covered by this Agreement shall be paid in accordance with the Pay Plan during the term of this Agreement. The Pay Plan for the period of this contract is set forth in Appendix I.

B. Firefighter/EMT status shall be considered to be the minimum requirement for employment with the City. Status in other classifications shall determine eligibility for manning in the other classifications.

Members assigned to other classifications shall be expected to retain their eligibility for their respective assignments. Should a member fail to retain eligibility in an assigned classification, the member shall be reassigned to another status for which the member is eligible in accordance with the provisions of Article 21, Seniority, Layoff and Recall, provided a position in another classification for which the member is eligible is available. Should a position not be available, the member shall be terminated or, at the discretion of the City, transferred to another department or division.

C. A firefighter is a member who meets the minimum standards established for a firefighter by the State of Florida.

D. A firefighter/EMT is a member who has successfully completed and passed an EMT training program recognized by the department and who has met such other qualifications as may be established by the State of Florida to be an EMT.

E. A firefighter/Paramedic is a member who has successfully completed and passed a paramedic training program recognized by the department and who has met such other qualifications as may be established by the State of Florida to be a paramedic.

F. A Lieutenant is a member who works in a supervisory position over shift personnel and will be classified as an EMT or Paramedic based on his current qualifications established by the department and the State of Florida for such certification.

24.2 Progression in the Pay Plan.

The City shall complete a performance evaluation on each employee annually on or before the employee's anniversary date. The annual performance evaluation shall determine the member's eligibility to progress in the Pay Plan. The City shall be entitled to change the method of the performance evaluation unilaterally. Progression of the Pay Plan during this contract period in a fiscal year (FY) will be as follows:

A. For FY 2026: Members will be placed in the new pay plan, illustrated in Appendix I Pay Plan, at the closest STEP that ensures a minimum of a 3% increase. Members will progress to the next higher STEP on their anniversary date.

~~B.~~ For FY 2027: ~~The contract will be reopened to address Article 24/Appendix I.~~Members will be placed in the new pay plan based on their current step as of 10/1/2026, illustrated in Appendix I Pay Plan. Members will progress to the next higher STEP on their anniversary date.

C. For FY 2028: ~~The contract will be reopened to address Article 24/Appendix I.~~The pay plan (max.

Version	L-4966 TA	City TA	Date
1			05/13/2026

Step) will be increased based on the May 2027 U.S. Bureau of Labor Local CPI. Members will be placed in the new pay plan based on their current step as of 10/1/2027. Members will progress to the next higher STEP on their anniversary date.

D. Employees have no expectation of any increase in their wages or benefits, including STEP increases, after the date of the termination of this Agreement absent a successor agreement or final action by the Legislative Body of the City pursuant to FS 447.403, providing for such increases or improvements.

E. Members shall only be awarded steps as outlined in the attached plan.

24.3 Extra Pay for Special Assignments or Certifications.

Employees shall be eligible for special pay based on State of Florida certification or special assignment by the Fire Chief as follows:

Certification	**Eligibility**	**Extra Pay**	**MAX/MIN Employees**
Engine and Truck Driver	When assigned	$1.00 per hour	N/A
Acting Lt.	When assigned	$2.00 per hour for hours worked in acting capacity	N/A
Acting Captain	When assigned	$2.50 per hour for hours worked in acting capacity	N/A
Acting District Chief	When assigned	$3.00 per hour for hours worked in acting capacity	N/A
Pump Operator (State of Florida Certification Required)	Must be a cleared department driver	$50.00 per month	Active driver for the department ONLY
Fire Officer I (State of Florida Certification Required)	Must be a cleared department acting officer	$50.00 per month	Active acting officers ONLY
Fire Officer II (State of Florida Certification Required)	Must be a cleared department acting captain and/or district chief	$50.00 per month	Active acting officers ONLY

A. Loss of Certification or removal from noted assignment will result in cessation of extra pay.

B. Employees are required to provide evidence satisfactory to the City of current certification and to notify the Chief immediately upon the loss of any certification.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Adopt Resolution 2026-20: Modifying and reapproving rules of procedure for the Historic Preservation Board, primarily to reduce the number of members required for conduct and approval of most business from four to three.

Action Request: Motion to adopt Resolution 2026-20.

Strategic Objective: Operational Excellence; Community Prosperity

Date: June 23, 2026

Prepared By: Brandon Berry, Senior Planner

Through: Frances Robustelli, City Manager

Summary of Issue: The Historic Preservation Board is the only appointed board or committee that requires a four of five member vote to conduct business. Under the span of Board responsibilities, only variances to the floodplain management regulations for historic structures require a four member vote, with other actions, such as local historic designation or certificates of appropriateness for demolition, requiring three.

Staff is requesting modification to the Board's rules of procedure to allow for three members to constitute a quorum for consideration of any application except for requests to the floodplain management regulations, which will require four members. At least three members will be required to authorize any request, including recommendations made by the Board as a body, except for floodplain management variance requests, which will require an affirmative vote from four members.

Funding: N/A

Attachments: 1. Resolution 2026-20

RESOLUTION NO. 2026-20

A RESOLUTION OF THE CITY OF ST. PETE BEACH MODIFYING AND REAPPROVING RULES OF PROCEDURE FOR THE ST. PETE BEACH HISTORIC PRESERVATION BOARD ORIGINALLY ADOPTED UNDER RESOLUTION 2004-24; RELAXING THE REQUIREMENTS FOR THE BOARD TO CONDUCT SPECIFIED BUSINESS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City Commission of the City of St. Pete Beach supports preservation of the City's historic resources.

WHEREAS, in 2004, when the Historic Preservation Board was known as the Aesthetic and Historic Review Board, the Board adopted rules of procedure that, in part, required four of five members to be present to meet requirements for a quorum and be able to transact business.

WHEREAS, per Ordinance 2006-08, the City Commission is now the authority to amend, modify, and make effective Board rules and regulations.

WHEREAS, the requirement to have four members present to conduct business is stricter than required for any other Board of the City, and is not required for any action taken by the Board under other regulations contained within the City's codes, except for variances to the floodplain management regulations.

WHEREAS, the National Parks Service advises that a simple majority is the preferred method for consent and approving items, per correspondence with the Florida Bureau of Historic Preservation.

WHEREAS, in order to allow for the conduct of business on a monthly basis outside of rare and unusual circumstances, Staff requests the City Commission authorize the Board to conduct business in the manner specified in the resolution.

NOW, THEREFORE, THE CITY COMMISSION OF THE CITY OF ST. PETE BEACH FLORIDA, HEREBY RESOLVES:

SECTION 1. Recitals. The above recitals ("Whereas" clauses) are hereby adopted as legislative findings, purpose and intent of the City Commission.

SECTION 2. The City Commission of the City of St. Pete Beach modifies the rules of procedure for the Historic Preservation as contained in EXHIBIT A to this resolution.

SECTION 3. This resolution shall take effect immediately upon adoption.

HISTORIC PRESERVATION BOARD

ST. PETE BEACH, FLORIDA

RULES OF PROCEDURE

ARTICLE I - General Governing Rules

The ~~Aesthetic and~~ Historic Preservation ~~Review~~ Board (hereinafter referred to as the Board) shall be governed by the provisions of all applicable federal, state and municipal statutes; inclusive of Division 28 (Historic Preservation) of the Land Development Code of the City of St. Pete Beach, Florida, as amended; and the rules of procedure~~s~~ set forth herein. ~~No rule herein shall be changed or waived without a vote of five (5) members of the Board.~~ The Board may request amendments or modification of these rules of procedure by the City Commission, who may approve or deny the request via a simple majority vote. These rules of procedure may also be amended by the City Commission via a simple majority vote without request by the Board.

ARTICLE II - General Governing Rules

1. The Board shall elect a Chair and a Vice-Chair annually in a month of the Board's choosing. The Vice-Chair shall be acting Chair in the absence of the Chair. The Chair and Vice-Chair shall serve for one year. The Chair and the Vice-Chair may serve only three consecutive terms.

2. The Chair shall preside at all meetings and hearings of the Board and decide all points of order and procedure. The Chair shall appoint any committees that may be found necessary.

3. The City Clerk's Office shall maintain the minutes of each meeting, including attendance, the vote of each member upon each question and the nature of comment and discussion upon each issue considered. The Planning Department shall provide to the Board such other assistance as may be reasonably necessary to properly address its responsibilities.

4. The procedure for elections for the office of Chair and Vice-Chair shall be as follows:

    a. Nominations for the office of Chair shall be made by any member of the Board. Board members may nominate themselves if they choose.

    b. A vote of the majority of the Board is required in order to conclude the election. If a majority is not attained on the first ballot, the candidate with the least number of votes shall be eliminated, and another ballot shall be held. Additional ballots shall be held if necessary, with candidates being eliminated, until one candidate has attained a majority of the votes, and is elected.

Content that is underlined, other than Articles and their numerals, is proposed for addition.
Content that is ~~stricken~~ is proposed for deletion.

c. The same procedure shall be followed for the election of the Vice-Chair.

ARTICLE III - Vacancies

If a member of the board fails to attend three consecutive meetings or four meetings in any one calendar year, such shall be considered resignation from the Board. Upon such resignation, resignation by other means or other vacancies occurring in office, the Chair shall inform the City Commission as promptly as possible, so that the City Commission may appoint a replacement to fill the unexpired term.

ARTICLE IV - Meetings

1. Meetings of the Board shall be held on the first Thursday of each month at 2:30 P.M., or otherwise as set by the Board and at such times as requested by City Commission. The Planning Department shall inform all members of the Board at least forty-eight (48) hours in advance of any meeting.

2. A quorum shall consist of four (4) members for the transaction of ~~all business~~any business that involves action on a variance from the floodplain management regulations requested pursuant to Section 28.16 of the Land Development Code. For all other business, a quorum shall consist of three (3) members.

3. The issuance of a variance from the floodplain management regulations shall be approved upon affirmative vote of no fewer than four members of the Board. Any other approval, recommendation, or action taken by the Board shall be issued upon affirmative vote of no fewer than three members of the Board.

~~3.~~ 4. No City staff person, nor any Board member, shall appear for or represent any person or firm in any matter pending before the Board. No Board member shall hear or vote upon any matter in which he is directly interested in a personal or financial way.

~~4.~~ 5. All meetings shall be open to the public. The order of business at meetings shall be at the discretion of the Chair.

~~5.~~ 6. During a public hearing, supporters of, and opposition to, any proposed action shall each be allowed a maximum of fifteen (15) minutes to present their argument. The Chair may request representatives of each side to speak for the entire group. If more than one speaker represents a group, the fifteen (15) minutes shall be divided among the various speakers. In no case, however, shall any group be allowed more than the allotted time, no matter how many speakers represent the group, except that time may be extended by unanimous vote of the members of the Board present. Written comments received before the meeting are encouraged.

~~6.~~ 7. At the public hearing, the applicant or any other party may appear on his own behalf or be represented by agent or attorney. No application shall be considered if the applicant or his agent does not appear; in such cases a new application must be filed in order for the Board to reconsider the request.

Content that is underlined, other than Articles and their numerals, is proposed for addition.
Content that is ~~stricken~~ is proposed for deletion.

~~7.~~ 8. An applicant may request his application be postponed until the next scheduled meeting of the Board upon written request received in the office of the Director of Planning no later than forty-eight (48) hours prior to the scheduled hearing. A majority of the Board members present at the scheduled meeting must subsequently vote to approve the request for postponement. In cases where action of the Board is required prior to consideration of an application by any other Board of Authority (as defined by Chapter 22 of the Code of Ordinances), the Board may grant postponement only of the hearing required before the ~~Aesthetic and~~ Historic Preservation ~~Review~~ Board. It shall remain the responsibility of the applicant to seek postponement of any other hearings scheduled by any other Board of Authority. Postponement of the required hearing at the applicant's request shall not constitute action by the Board as required by any provision of the Code of Ordinances.

ARTICLE V - Presentation of Evidence

1. Requests should be orally presented to the Board by Applicant, or his Representative, along with any documentation necessary.

2. The Board is permitted to ask any pertinent questions of the Applicant or his Representative to aid in their understanding of the case. The public shall not be permitted to ask questions of the Applicant or his Representative.

3. After such presentation by the Applicant, the Chair shall provide reasonable opportunity to address the Board for any person present who wishes to comment on the application.

4. Those appearing in opposition to the application should offer oral evidence and any documentation to show why granting the request would not be in the interest of the public.

5. The Board is permitted to ask any pertinent questions of anyone commenting on the application to aid in the Board's understanding of the case. The public shall not be permitted to ask questions of any person commenting upon an application.

6. All presentations and remarks by Applicant and other parties commenting on the application shall be directed to the Board.

ARTICLE VI - Certified Local Government Requirements

In order to establish and maintain Certified Local Government status, the ~~Aesthetic and~~ Historic Preservation ~~Review~~ Board shall undertake the following actions, as required:

1. Provide the State Historic Preservation Office with prior written notice of all meetings at least thirty (30) days in advance.

2. Provide the State Historic Preservation Office with meeting minutes within thirty (30) days of each meeting.

3. Provide the State Historic Preservation Office with meeting attendance reports within thirty (30) days of each meeting.

Content that is underlined, other than Articles and their numerals, is proposed for addition.
Content that is ~~stricken~~ is proposed for deletion.

4. Notify the State Historic Preservation Office of any change in board membership within thirty (30) days of action.

5. Immediately notify the State Historic Preservation Office of all new historic designations or alterations to existing designations.

6. Submit proposed amendments to the City's Historic Preservation Ordinance (Section 28 of the Land Development Code) to the State Historic Preservation Office for review and comment at least thirty (30) days prior to adoption.

7. Submit an annual report by November 1 to the State Historic Preservation Office covering the period October 1 through September 30, in accordance with specified requirements for format and contents.

Agenda Report

Agenda Title Name: Authorize the City Manager to execute a Services Agreement with Free Agent Marine LLC for Commercial Diving Services in the amount not to exceed $50,000 annually.

Action Request: Motion to authorize the City Manager to execute a Services Agreement with Free Agent Marine LLC for Commercial Diving Services in the amount not to exceed $50,000 annually.

Strategic Objective: Reliable Infrastructure

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Bid (RFB) for qualified full-service commercial diving Contractors with experience in a wide range of applications. Eleven (11) responsive sealed bids were received on April 8, 2026. Dive-Tech International Inc., Free Agent Marine LLC, and See Dive LLC, were determined to be the lowest responsive and responsible bidders meeting all City qualification requirements.

The contract provides not-to-exceed unit prices for a qualified dive team, and all related diving equipment required to assist the City of St. Pete Beach with the cleaning, inspection, repair and maintenance of tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads. Services include:

- Debris Removal from Valve, Pipe, Endwalls, and Pit
- Marine Growth Removal from Valve, Pipe, Endwalls, and Pit
- Maintenance of Manatee Grates
- Written and Video Reports of condition per cycle
- Repair and Replacement of in-line and outfall-end type Tidal Check Valves
- Hydraulic Dredging

Work will be issued by task order on an as-needed basis, in an amount not to exceed $50,000 per year, subject to budgeted funds.

The initial agreement term is three (3) years, with up to two (2) additional one (1) year renewal options upon mutual agreement and annual appropriation.

Funding: 403.5380.546000 – Stormwater R&M Equipment ($287,996.80 remaining balance)

401.5350.546000 – Wastewater R&M Equipment ($102,791.25 remaining balance)

Attachments: 1. Free Agent Marine LLC Agreement Signed

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Commercial Diving Services

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and (**FREE AGENT MARINE LLC**). (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Bids, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its June 23, 2026, public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

   a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed $50,000.

   b. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

   c. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

   d. Contractor must comply with any and all Federal, State, and local laws and regulations

now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

e. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.
   a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished

under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of (3) three years with (2) two, (1) one-year extensions from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement.

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured and providing coverage up through and including the final performance of any services provided

herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved, and any amount withheld is not subject to payment of interest by the City. The above provisions

will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:
    a. Standard Contract Addendum (Exhibit "A")
    b. Request for Bid/Proposal (Exhibit "B")
    c. Vendor Bid/Proposal (Exhibit "C")

d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:
Free Agent Marine LLC
4807 Londonderry Drive
Tampa, FL 34647

As to City:
City Manager
City of St. Pete Beach
155 Corey Avenue
St. Pete Beach, FL 33706

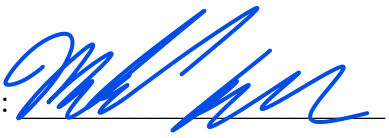
21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.



25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Form Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this _____ day of _____, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and _____, hereinafter referred to as "Contractor", concerning that certain agreement dated the ____ day of _____, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian
cityclerk@stpetebeach.org

Phone: 727-363-9220
155 Corey Avenue
St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

The meeting was called to order at 9:33 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:

- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 9:30AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills summarized that this project will be for a maintenance contract managed by the City's operations team, with a goal to have on-call service for commercial diving.

There being no questions, the meeting was adjourned at 9:38 AM.

Questions and Answers:

1. Does this project require that the bidder hold a FL State General Contractor License? NO

2. Please provide the direct link for bid submission.
https://stpetebeach.bonfirehub.com/portal/?tab=openOpportunities

3. Can you please provide exact locations of the areas where the scheduled work is to be completed. Please see attached maps.

4. Can you please provide engineered drawings and associated structures where the dive team will work on the grates, valves, pipelines, etc… Please see link below.

5. Can the City clarify whether a Florida Certified or Registered Contractor's License is required for this contract, specifically for repair or replacement of tidal check valves, or if this work is considered maintenance under this RFB? Not required. Work is considered maintenance.

6. Can the City confirm that hydraulic dredging under this contract is limited to maintenance removal of sediment and does not include excavation or alteration of original design grade requiring contractor licensure? Yes, dredging under this contract is limited to maintenance removal of sediment.

7. Can the City provide clarification on how many locations require access by boat or barge versus land-based access, and whether work will typically be grouped to minimize mobilizations? Please see maps linked below; Majority of locations are accessible by land. Work will be grouped to minimize mobilizations.

8. Can the City confirm whether remotely operated vehicles (ROV) or sonar-based inspection methods may be utilized as a supplement to diver inspections, where appropriate, to enhance safety, efficiency, and documentation quality? Yes, that's acceptable.

9. Can the City provide a detailed asset list or map identifying the locations, approximate depths, pipe diameters, and typical conditions of the tide check valves, manatee grates, and outfalls included in this contract? Additionally, are any prior inspection reports or videos available for reference? See attached.

I. CONTRACTOR'S BID SUBMITTAL

The company that is submitting a bid declares that it has extensive experience in **Commercial Diving Services.**

The undersigned, as Bidder, hereby declares that the only person or persons interested in the Bid as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Bid or in the Agreement to be entered into; that this Bid or Agreement is made without connection with any other person, company, or parties making a Bid; and that it is in all respects fair and in good faith without collusion or fraud.

The Bidder further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of bids; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Bidder proposes and agrees, if the Bid is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Commercial Diving Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful bidder shall be required to utilize the template Agreement in this Request for Bids (RFB) and any questions regarding the Agreement must be addressed during the RFB process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Bidder proposes to furnish all materials, equipment, labor, and perform the work submitted in their bid schedule for the City of St. Pete Beach **" Commercial Diving Services".**

III. GENERAL CONTRACT TERMS

REQUEST FOR BID

The City of St. Pete Beach is submitting this RFB for bids on the Commercial Diving Services.

LOCATIONS

The City of St. Pete Beach is soliciting bids from qualified Commercial Diving Services for the City.

BID SUBMITTALS

Bid documents must include a signed/notarized Contractor's Bid Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit one electronic bid via Bonfire.

BIDDER INFORMATION

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http:// www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

PRE-BID MEETING

An optional pre-bid meeting will be held on **03/18/2026 at 9:30 AM EST** via Microsoft Teams Video conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and Microsoft Teams Meeting instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS

No oral interpretations will be made to any firms as to the meaning of the scope of work or any other contract documents included in this **RFB.** All questions pertaining to the terms and conditions or scope of work of this Request for Bid **(RFB)** must be sent in writing only via email to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 EST on 03/25/2026**. Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFB**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFB** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so.

BID PACKAGES

Sealed bids will be accepted by the City until **04/08/2026** at **9:00 AM** EST (Deadline). No bids shall be accepted by the City after this deadline – NO EXCEPTIONS. Bid Packages must be electronically submitted via Bonfire Clearly marked as: "**Commercial Dive Services**." If a link is needed for either site, please contact the Procurement Manager (purchasing@stpetebeach.org.) All Bidders are invited to attend this bid opening.

CONTACT INFORMATION

Sara Spain – Procurement Manager
Mailing Address - 155 Corey Avenue, St. Pete Beach, Florida 33706
E-mail - purchasing@stpetebeach.org

SCOPE OF WORK

The City of St. Pete Beach is seeking a qualified full service commercial diving Contractor with experience in a wide range of applications. The Contractor shall provide a qualified dive team, and all related diving equipment required to assist the City of St. Pete Beach with the cleaning, inspection, repair and maintenance of tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads.

The City of St. Pete Beach has 35 tide check valves, and 25 manatee grates installed at stormwater outfalls throughout the City. Services shall include:

- Debris Removal from Valve, Pipe, Endwalls, and Pit
- Marine Growth Removal from Valve, Pipe, Endwalls, and Pit
- Maintenance of Manatee Grates, when present
- Written and Video Reports of condition per cycle
- Repair and Replacement of in-line and outfall-end type Tidal Check Valves
- Hydraulic Dredging

Services must comply with relevant standards and regulations, including OSHA diving regulations and any applicable environmental guidelines.

CONTRACTOR TO FURNISH

- A Qualified Dive Team
- All Related Diving Equipment
- Underwater Video with Digital Capture
- Shallow Water Dive Package
- Small Pneumatic Tool
- Work Boat / Barge
- Hydraulic Unit
- 4-inch Hydraulic Submersible Pump
- Jet Pump
- 4000 PSI Water Blaster
- Digital Camera

THE CITY OF ST. PETE BEACH TO FURNISH

- A Representative to Coordinate Activities
- A Representative to View Video Real Time and Direct the Crew
- Access to Work Site
- Permits (If required)
- Assist with Lock-Out Tag-Out procedures (training or supervision as needed)
- Procurement of Tidal Check Valves (as needed)

SCHEDULE

Maintenance, cleaning and inspection shall be scheduled per occurrence and may include the full asset inventory or a portion of that inventory for each cycle. Maintenance cycles are to be performed quarterly, or more frequently as-needed, based on City requirements.

Tidal check valve, manatee grate, and other miscellaneous outfall repairs shall be scheduled per occurrence, as-needed.

The Contractor must provide at least 72 hours' notice for scheduling changes. Emergency response for unscheduled maintenance requests must be available within 24 hours.

PERFORMANCE METRICS

The following performance metrics will be used to evaluate the Contractor's work:

- Timeliness of completing tasks as per the agreed schedule.
- Accuracy and thoroughness of written condition reports.
- Compliance with safety standards and regulations.
- Responsiveness to unscheduled maintenance requests.

All reports must be submitted in a digital format (PDF or Word) within ten (10) days of completing each maintenance cycle. Reports should include:

- Detailed descriptions of completed tasks.
- Photographic and video evidence.
- Identified issues and recommendations for future maintenance.

PENALTIES

Failure to adhere to the schedule or meet performance standards may result in penalties, including:

- 5% reduction in payment for delayed work (per day).
- Rework at Contractor's expense for substandard services.

EMERGENCY SERVICES

The Contractor must provide emergency maintenance services within 24 hours of the City's request. The bid form includes an emergency call-out fee to account for this service.

Once a contract is awarded, the selected vendor will be required to submit a detailed fee schedule outlining the main pay items for the project. This fee schedule will be reviewed at the pre-construction meeting and will be used to review pay applications and evaluate project progress.

DETAILED SPECIFICATIONS

LOCATIONS

The locations will cover all tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads Citywide that are City owned throughout the City of St. Pete Beach Florida.

Standard work hours shall be from 7:30 AM until 6:00 PM, Monday through Saturday. No work shall take place on Sundays or on official City holidays without prior approval by the City Manager or designee at least 1 week prior to the scheduled work. A list of current official City holidays can be found on the City's Human Resources website at http://www.stpetebeach.org/hr/holidays.html. Contractor will coordinate scheduling of work with the City's Project Manager and City's Inspector.

ADDITIONAL WORK DETAILS

Contractors or persons wishing to bid on this project are licensed, bondable and insured in accordance to the City's requirements. The Contractor will furnish all necessary labor, materials, tools, equipment and supplies to complete the scope of work. Bid must also include all costs for licenses, permits, and any material disposal fees.

Bidders shall bring questions, discrepancies, omissions, conflicts or doubt as to meaning of any part of Contract Documents to the attention of the City of St Pete Beach Procurement Manager at least ten (10) business days before bid submittal deadline. Clarification of intent of Contract Documents, if necessary, shall be made available to bidders in the form of an Addendum. Failure to request clarification of interpretation of Contract Documents shall not relieve bidders of their responsibilities to perform the work.

The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids, or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach.

STATEMENT OF WORK

The Contractor shall furnish and pay the cost, including sales tax and all other applicable taxes, licenses, permits and fees, of all the necessary materials not furnished by the City and shall furnish and pay for all the superintendence, labor, tools, equipment, transportation, and perform all the work required for the execution of all services listed in the Bidder's Proposal and Bid Form attached hereto and in strict accordance with the Plans, Specifications, and requirements of the City of St. Pete Beach which are attached hereto and made a part hereof, and any amendments thereto and such supplemental Plans and Specifications which may hereafter be approved.

BEGINNING DATE

The Contractor shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Contractor shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City. The Contractor must commence construction activities within thirty (30) business days of NTP to prepare and procure materials. Any change to the start date or the work schedule included with this bid must be submitted in writing to and approved by the City Manager or designee.

COMPLETION OF WORK

The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". The contract will be for (3) three years from time of execution (Date of last signature) of the contract with (2) additional (1) one year extensions if agreed upon by the City and vendor. .

EXAMINATION OF SITE

Bidders may visit specific areas with advanced notice.

ASSURANCES

The responding Contractor shall provide a statement of assurance that the Contractor is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

TRAFFIC CONTROL AND STAGING AREA

Contractor shall include all costs associated with vehicular and pedestrian traffic control and maintenance during the project. Contractor shall be responsible for providing a staging area. The location of this area must be approved by the City Manager or designee. The Contractor will be required to control the area including any additional fencing or barricades and Contractor will be responsible for the restoration of this and all other staging areas provided by the City.

ASSIGNMENT AND TRANSFER OF CONTRACT

The Contractor shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS

The Contractor shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PERFORMANCE PAYMENT BOND

Not required for this contract.

LIQUIDATED DAMAGES

If the work embraced by this Contract is not completed on or before the date set for completion or any extension thereof, the actual damages for the delay will be impossible to determine and in lieu thereof, the Contractor shall pay to the City fixed, agreed, and liquidated damages in the amount of either Five-Hundred Dollars ($500) per day for each calendar day of delay until the work is satisfactorily completed.

PAYMENT

Payment shall be made to the Contractor for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Contractor will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Contractor without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Contractor's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Contractor to make a change in the Work, and if the City and the Contractor do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the contractor shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Contractor believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, he shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Contractor first discovered the occurrence. The Contractor shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Contractor shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Contractor shall prepare bids detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Contractor's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Contractor's bids shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable bid will not justify an increase in Contract Amount or Contract Time. Contractor agrees that it shall give the City access to any and all of Contractor's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Contractor for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Contractor shall be at his expense without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Contractor or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Contractor bids or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to

be used shall be those used for the Contractor's costs, except that the term "Subcontractor" shall replace the term "Contractor," context permitting.

Changes in Contract Amount for extensions in Contract Time shall exclude costs that are unaffected or do not relate to the extension in Contract Time, such as: (a) operating costs of construction equipment assigned to the Work on a continuing basis, (b) operating costs and owned/rental costs of construction equipment (crane used for specific lifts, concrete pump used for specific pours, etc.), and (c) fully paid site facilities, tools, etc.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Contractor, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit. The out-of-pocket cost shall only include those direct costs which are needed to perform the work such as labor (including payroll taxes, fringe benefits, labor burden and workers' insurance), materials, equipment, and other incidental out-of-pocket construction costs directly involved in the work, including but not limited to small tools, expendables and material costs but shall not include project management or project supervisory costs unless the Change Order includes an increase in the Contract time.

In such case, the Contractor will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Contractor to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

To be eligible for consideration, the Contractor's written claim for a change in the Contract price, including claim(s) from sub-contractors, shall include an itemized cost breakdown with supporting data as described below:

A. <u>For labor</u>: Provide written documentation from the Contractor and Subcontractors or others as appropriate in the form of a detailed breakdown by each labor classification involved indicating the number of hours of Work involved and the hourly payroll rate applicable to each to substantiate the basis and amount of the direct labor cost. The direct labor cost may be increased to provide an allowance for indirect payroll costs (labor burden), such as payroll taxes, fringe benefits, and workers insurance after all premium discounts, rebates and other appropriate reductions have been taken.

B. <u>For material, supplies, equipment, furnishings, etc., to be installed or included in the Work</u>: Provide written documentation from the Contractor and Subcontractors, suppliers, etc., to substantiate the basis and amount of the various cost items involved. Material costs shall reflect the Contractor's reasonably anticipated net actual cost after consideration of trade discounts and volume rebates.

C. For construction equipment: Provide written documentation in the form of a detailed breakdown by each construction equipment category, indicating the applicable unit rates (i.e., dollar amount per hour, dollar amount per day etc.,) and the number of hours, days, etc. to substantiate the basis and amount of the construction equipment out-of-pocket costs.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Contractor (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Contractor employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

CITY'S RIGHT TO DIRECT PURCHASE

The City has reserved the right to purchase certain items and materials for this project directly in an effort to save applicable sales tax in compliance with Florida Law.

The City will issue purchase orders directly to the vendors supplying the equipment being directly purchased by the City for this project. Each Purchase Order will be accompanied by the City's Certificate of Exemption and a Certificate of Entitlement. All direct purchase vendor invoices will be issued to the City of St. Pete Beach, and the City will issue payment to each direct purchase vendor from City funds. The City will take title to the equipment at time of delivery from the vendor and will issue a separate Certificate of Entitlement for each purchase order.

The Contractor shall assist the City with receipt of materials furnished by the City in accordance with these Special Provisions including, but not limited to, verifying correct quantities, verifying documents of orders in a timely manner, providing and obtaining all warranties and guarantees required by the Contract Documents, assist with inspection of the goods at the time of delivery and notify the City immediately of any deficiencies noted. It is understood that the owner assumes the risk of damage or loss during the time that the building materials are physically stored at the job site prior to their installation or incorporation into the project. The Contractor shall coordinate with the City regarding the delivery schedules, sequence of delivery, loading orientation, and other arrangements normally required by the Contractor for the particular material furnished.

As City Furnished Materials are delivered to the job site and accepted by the City, the City shall notify the Contractor who will assist the City to visually inspect all shipments from the suppliers. The City will approve the vendor's invoice for material delivered upon adequate inspection and recommendation of the Contractor. The City shall assure that each delivery of City Furnished Materials is accompanied by documentation adequate to identify the Purchase Order against which the purchase is made and Contract Documents including but not limited to Contract, Plans, Specifications, and approved Shop Drawings. This documentation may consist of a delivery ticket, bill of lading and an invoice from the supplier conforming

to the Purchase Order together with such additional information as the City may deem necessary.

PAYMENTS FOR WORK COMPLETED

Partial payments will be made as the work progresses (if applicable) at the end of each calendar month, or as soon thereafter as practicable on estimates made by the City Manager or designee and as approved by the City, provided that the Contractor is performing the overall job in a diligent manner. In making partial payments, there shall be retained five percent (5%) on the amount of each estimate until final completion and acceptance of all work covered by the Contract. Upon completion and acceptance of the work, the City Manager or designee shall issue a certificate that the work has been completed and accepted by them under the conditions of the Contract and shall make and approve the final estimate of the work. The entire balance found to be due the Contractor, including that retained by the City, should be paid to the Contractor. Such payment shall be conditioned, however, upon the submission by the Contractor of evidence satisfactory to the City that all claims for labor, material, and any other outstanding indebtedness in connection with the Contract have been paid. Such payment shall also be conditioned upon approval and acceptance of the construction and improvements by the City.

If after the work has been substantially completed, full completion thereof is materially delayed through no fault of the Contractor and the City Manager or designee so certifies, the City shall upon the Certificate of the City Manager or designee, and without terminating the Contract make payment for the balance due for that portion of the work fully completed and accepted. Such payment shall be made under the terms and conditions governing final payment, except that it shall not constitute a waiver of claim. If such delay occurs and payment is made under this clause, the Contractor shall nevertheless be prepared to complete the work in a timely manner upon the remedy or removal of such delay, and shall be bound under this Contract for the completion of such work unless this Contract is otherwise terminated. All payments will be made in accordance with the Local Government Prompt Payment Act, Chapter 218, Florida Statutes.

PAYMENTS WITHHELD

The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Contractor to make payments properly to Subcontractors or for material or labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Contractor

f) Failure of the Contractor to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS

Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Contractor, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such

sums to the Contractor.

Before the approval of the final payment, the Contractor shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS

If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Contractor, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Contractor all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Contractor and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE

The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

INTENT OF PLANS AND SPECIFICATIONS

The Contractor shall keep on the job a copy of the Plans and Specifications and shall at any time give the City Manager or designee access thereto. Anything mentioned in the Specifications and not shown on the Plans or shown on the Plans and not mentioned in the Specifications, shall be of like effect as if shown or mentioned in both. The Contractor shall not take advantage of any errors, discrepancies or omissions that may exist in the Plans and Specifications but shall immediately call them to the attention of the City Manager or designee whose interpretation or correction thereof shall be conclusive. Should a conflict occur between the General Specifications and any Supplemental Specifications and/or Plans, the latter shall govern.

LICENSES AND PERMITS

The Contractor shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the contractor is responsible for non-compliance of all permit requirements, including all fines resulting from Contractor's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Contractor shall be

responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the contractor awarded the project, MUST also register their license with the City.

SUPERINTENDENCE

The Contractor shall constantly superintend all the work embraced in this Contract in person or by a responsible agent who shall have in writing, full authority to act for them and to carry out all the instructions given by the City Manager or designee.

LABOR PROVISIONS

The Contractor and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed.

INSURANCE

The Contractor shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Contractor's General Public Liability and Property Damage Insurance issued to the Contractor and protecting the Contractor from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Contractor or by any Subcontractor hired by the Contractor or anyone directly or indirectly employed by the Contractor or hired by the Contractor.

The successful Contractor shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Contractor or third party under the direction or control of the Contractor. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Contractor must furnish the City with Certificate of Insurance prior to commencement of work. An approved Certificate of Insurance furnished by the Contractor's carrier to guarantee the Contractor being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY

The Contractor shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Contractor shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Contractor shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Contractor will provide security on off days and holidays. The Contractor shall be responsible for all charges incurred with such action.

The Contractor shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Contractor, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Contractor shall also protect adjacent property as required by law.

PARKING

The Contractor shall arrange with City Manager or designee for temporary parking areas to accommodate construction personnel and construction equipment. Note that limited parking spaces are available in the City of St. Pete Beach. The Contractor will be asked to coordinate with the City's representative on site on a regular basis to minimize the impact on residents and visitors.

TRANSPORTATION, HANDLING AND STORAGE

The Contractor shall transport, handle, protect and store products in accordance with manufacturer's instructions and all environmental regulatory agencies.

VEHICLES

Business vehicles shall be identified on both sides with the name of the company.

ENVIRONMENTAL PROTECTION

It shall be the Contractor's responsibility to implement construction methods, best management practices, and erosion control methods that avoid water pollution as required by the State of Florida Department of Environmental Protection (FDEP), City of St. Pete Beach, and Pinellas County. Any Contractors in violation of the City of St. Pete Beach Regulations, Pinellas County Regulations, Florida Department of Environmental Protection Regulations, or any other regulatory agency regulations shall be the sole responsibility of the Contractor. The Contractor shall hold harmless the City of St. Pete Beach and the City Manager or designee from any fines and litigation resulting from the Contractor's actions. The Contractor shall pay all attorneys' fees, fines, penalties and any other such expenses resulting from the Contractor's actions. The Contractor shall provide all necessary measures to prevent any materials whatsoever from entering the waterway except for those materials, which are shown, on the plans as completed structures. The Contractor shall provide MSDS sheets to the City Manager or designee on all applicable materials before applying those materials. The Contractor shall secure the necessary education, certifications,

licenses and permits required by state and local agencies to operate and manage a construction site, including but not limited to, FDEP requirements related to Coastal Construction Control Line. The Contractor shall abide by all rules and regulations set forth and required by the City of St. Pete Beach's MS4 NPDES Permit.

TIMELY DEMAND FOR STAKES AND INSTRUCTIONS

The Contractor shall provide reasonable and necessary materials, opportunities, and assistance for setting stakes and making measurements, including the furnishing of a rodman, or a chainman at intermittent times during the construction period. They shall not proceed until they have received such stakes and instructions as may be necessary as the work progresses. The work shall be done in strict conformity with such stakes and instructions. The Contractor shall carefully preserve benchmarks, reference points and stakes, and in case of willful or careless destruction, they will be charged with the resulting expense and shall be responsible for any mistakes that may be caused by their unnecessary loss or disturbance.

WORKMANSHIP

The Contractor acknowledges that they have satisfied themselves as to the nature and location of the work; the general and local conditions including but not restricted to those bearing upon transportation, disposal, handling and storage of materials; availability of labor, water, electric power, roads; and uncertainties of weather, surface conditions, subsurface conditions, tides or similar physical conditions at the site, the character of equipment and facilities required to prosecute the work. Any failure by the Contractor to acquaint themselves with any aspect of the work or with any of the applicable conditions shall not relieve the Contractor from the responsibility to successfully perform the work under the Contract Documents, nor shall it be considered the basis for any claim for additional time or compensation.

UTILITIES

The Contractor shall anticipate all underground obstructions such as water lines, gas lines, sewer lines, utility lines, or any other public or private facilities and debris. In all cases where existing utility lines may be interfered with by the work, the Contractor shall give a minimum of thirty-six (36) hours' notice to the owners of such utilities, to permit them to relocate the lines prior to construction. No extra payment shall be allowed for the removal, replacement, repair or possible increased cost caused by underground obstructions. The location of existing structures and utilities provided in the plans are approximate only. Any damage to existing structures to remain or work of any kind shall be repaired or restored promptly by, and at the expense of the Contractor.

The Contractor shall at all times protect all desirable trees, plants, curbs, sidewalks, irrigation components, and structures not requiring removal to accomplish the work, whether or not they are shown on the plans. The Contractor must contact the City to obtain tree removal permits for the removal of any tree not identified for removal in the Project Plans.

In matters of restoration, all materials, construction, and workmanship shall be acceptable to, and approved by the City of St. Pete Beach and the City Manager or designee. No changes in size, shape, configuration, location, materials, or construction shall be made without prior written authorization from the City Manager or designee. Any demolition debris and other debris shall be hauled offsite and properly disposed of by the Contractor and shall be inclusive to the prices as stated in the BID SCHEDULE, unless otherwise stipulated as part of the project to remain.

No interruption of ingress and egress to private property shall be made unless the Contractor has made prior arrangements acceptable to the owner of the affected property. The City Manager or designee shall

notify affected residents/property owners of impending activity or inconvenience via door hanger.

The Contractor shall provide all traffic control devices utilized during construction and meet the requirements set forth in the Florida State Department of Transportation "Manual on Traffic Control and Safe Practices for Street and Highway Construction, Maintenance, and Utility Operations."

CLEANING UP

Upon completion or termination of the work the Contractor shall, as directed by the City Manager or designee, remove from the vicinity of the work all equipment and temporary structures, waste materials and rubbish resulting from his operations, leaving the premises in a neat and presentable condition. All debris generated by the Contractor will be removed before leaving the area. All areas will be raked to remove smaller debris. All surrounding sidewalks, parking lots and roadways will be cleared of any dust or debris generated by the Contractor. In the event of their failure to do so, the City at the expense of the Contractor may do the same, and their Surety shall be responsible.

DEFECTIVE WORK OR MATERIAL

The Contractor shall promptly remove from the premises all work and materials condemned by the City Manager or designee as failing to conform to the Contract, whether incorporated or not, and the Contractor shall promptly replace and re-execute his own work in accordance with the Contract and without expense to the City and shall bear the expense of making good all work of other Contractors destroyed or damaged by such removal or replacement.

If the Contractor does not remove such condemned work or materials within a reasonable time after notice, the City may remove them and store the materials at the expense of the Contractor. If the Contractor does not pay the expense of such removal within ten (10) business days' time thereafter, the City may, upon thirty (30) business days written notice sell such materials at auction or at private sale and shall account for the net proceeds thereof after deducting all the costs and expenses that should have been borne by the Contractor.

DISPUTE RESOLUTION

The Contract shall be construed under Florida law. The parties agree that all controversies, claims and other matters in question between the parties arising out of or relating to this Contract or its breach shall be resolved through mediation. Upon notice of any party to the Contract of a dispute, question or controversy, the parties shall agree to the appointment of a qualified mediator. A qualified mediator is a person who has received at least forty (40) hours of mediation training and has actual experience as a mediator in resolving contract disputes. If the dispute, question or controversy is not resolved through mediation within sixty (60) business days of a notice of the dispute between the parties, the City reserves the right to seek resolution through court action.

INDEMNIFICATION

In consideration of the payment of ten dollars ($10.00) as part of the above purchase price, Contractor shall indemnify, defend, and hold harmless the City, its officers and employees, from liabilities, damages, losses and costs, including but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the responding firm and any persons employed or utilized by the responding firm in the performance of the Contract.

GENERAL WARRANTY

Neither the final certificate nor any provision in the Contract Documents nor partial or entire occupancy of the premises by the City shall constitute an acceptance of work not done in accordance with the Contract Documents or relieve the Contractor of liability in respect to any express warranties or responsibility for faulty materials or workmanship. The Contractor shall remedy any defects in the work and pay for any damage to other work resulting therefrom that shall appear within a period of eighteen (18) months from the date of final acceptance of the work, unless a longer period is specified. The City shall give notice of observed defects with reasonable promptness.

LAND OF CITY, USE OF, BY CONTRACTOR

The City shall provide the land upon which the work under this Contract is to be done, and will, so far as is convenient, permit the Contractor to use as much of the land as is required for the erection of temporary construction facilities and storage of materials, together with the right of access to same, but beyond this, the Contractor shall provide, at his/her cost and expense, any additional land required. It will be the responsibility of the Contractor to repair or restore to the satisfaction of the City, at their own expense, any damage to land used for the above stated activities or any other activities approved by the City.

OTHER WORK

Wherever work being done by the City or by other Contractors is contiguous to work covered by this Contract, the respective rights of the various interests involved shall be established by the City Manager or designee to secure the completion of the various portions of the work in general harmony.

OTHER CONTRACTS

The City may award other Contracts. The Contractor shall fully cooperate with such other Contractors and carefully fit his/her own work to that provided under other Contracts, as may be with the performance of work by any other Contractor or City.

COOPERATIVE PURCHASING

Pursuant to their own governing laws and subject to the agreement of the Contractor, governmental entities may make purchases under the terms and conditions contained in the executed Contract, if agreed to by Contractor. Such purchases are independent of the Contract between the City and the Contractor, and the City is not a party to these transactions. Agencies seeking to make purchases under this Contract are required to follow the requirements of Rule 60A-1.045(5), F.A.C.

DELAYS AND EXTENSION OF TIME

If the Contractor should be delayed at any time in the progress of the work by an act or neglect of the City or the City Manager or designee, or of any employee of either, or by any separate Contractor employed by the City, or by changes ordered in the work, or by strike, lockouts, fire, unusual delay in transportation, unavoidable casualties, or any cases beyond the Contractor's control, or by delay authorized by the City Manager or designee, or by any cause which the City Manager or designee shall decide to justify the delay, then the time of completion shall be extended for such reasonable time as the City Manager or designee may decide. No such extension shall be made for a delay that occurs more than five (5) business days before a claim is made in writing to the City Manager or designee. In the case of a continued cause of delay, only

one (1) claim is necessary. This section does not exclude the recovery of damages for delay by either party under other provisions in the Contract Documents.

CITY'S RIGHT TO TAKE OVER THE WORK

If the Contractor shall be adjudged bankrupt, or if they should make a general assignment for the benefit of its creditors, or if a receiver should be appointed to take over their affairs, or if they should fail to prosecute their work with due diligence and carry the work forward in accordance with its' work schedule and the time limits set forth in the Contract Documents, or if they should fail to substantially perform one or more of the provisions of the Contact Documents to be performed by them, the City may serve written notice on the Contractor and the Surety on its' performance bond, stating the City's intention to exercise one of the remedies hereinafter set forth and the grounds upon which the City bases its right to exercise such remedy. In any event, unless the matter complained of is satisfactorily cleared within ten (10) business days after the service of such notice, the City may, without prejudice to any other right or remedy exercise one of such remedies at once; having first obtained a certificate from the City Manager or designee that such sufficient cause exists to justify such action.

The City may terminate the services of the Contractor, which termination shall take effect immediately upon service of notice thereof on the Contractor and their Surety, whereupon the Surety shall have the right to take over and perform the Contract. If the Surety does not commence performance of the Contract within ten (10) ten days after service of the notice of termination, the City may itself take over the work, take possession of and use all materials, tools, equipment, and appliances on the premises and prosecute the work to completion by such means as it shall deem best. In the event of such termination of their service, the Contractor shall not be entitled to any further payment under their Contract until the work is completed and accepted. If the City takes over the work and the unpaid Contract balance exceeds the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the excess unpaid Contract balance shall be paid to the Contractor. If the City takes over the work and the unpaid Contract balance does not exceed the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the Contractor and his Surety shall pay the difference to the City. The City Manager or designee shall certify such cost, expenses, and damages.

The City may take control of the work and either make good the deficiencies of the Contractor itself or direct the activities of the Contractor in doing so, employing such additional help as the City deems advisable. In such event, the City shall be entitled to collect from the Contractor and his Surety, or to deduct from any payment then or thereafter due the Contractor, the costs incurred by it through the default of the Contractor, provided the City Manager or designee approves the amount thus charged to the Contractor.

The City may require the Surety on the Contractor's bond to take control of the work at once and see to it that all deficiencies of the Contractor are made good with due diligence. As between the City and the Surety, the entire cost of making good such deficiencies shall be borne by the Surety. If the Surety takes over the work, either upon termination of the services of the Contractor or upon instructions from the City to do so, the provisions of the Contract Documents shall govern in respect to the work done by the Surety, the Surety being substituted for the Contractor as to such provisions, including provisions as to the payment for the work and provisions of this section as to the right of the City to do the work itself or to take control of the work.

RIGHT OF OCCUPANCY

The City shall have the right, if necessary, to take possession of and to use any completed or partially

completed portions of the work, if such use be approved by the City Manager or designee even if the time for completing the entire work or such portions of the work has not expired and even if the work has not been finally accepted. Such possession and use shall not constitute an acceptance of such possession and use if it materially interferes with the Contractor's operations. The City shall also have the right to enter the premises with the Contractor for the purpose of doing work not covered by its Contract.

ACCEPTANCE

Final inspection and acceptance of the work shall be made for the City by the City Manager or designee. Such inspection shall be made as soon as practical after the Contractor has notified the City in writing that the work is ready for such inspection.

WAIVER

It is expressly understood and agreed that any waiver granted by the City Manager or designee of any term, provision, or covenants of the Contract shall not constitute a precedent or breach of the same or any other terms, provisions, or covenants of the Contract. Neither the acceptance of the work by the City nor the payment of all or any part of the sum due the Contractor hereunder shall constitute a waiver by the City of any claim which the City may have against the Contractor or Surety under this Contract or otherwise.

INSPECTION

The City Manager or designee and his representative shall, at all times, have access to the work during its construction and shall be furnished with every reasonable facility for ascertaining that the stock and materials used and employed, and the workmanship, are in accordance with the requirements and intentions of the Plans. All work done and all materials furnished shall be subject to their inspection and approval by the City Manager or his designee. If any work should be covered up without approval or consent of City Manager or designee, it must, if required by the City Manager or designee, be uncovered for examination at the Contractor's expense.

The City Manager or designee may order re-examination of questioned work and if so ordered, the Contractor must uncover the work. If such work were found in accordance with the Contract Documents, the City shall pay the cost of re-examination and replacement. If such work be found not in accordance with the Contract Documents, the Contractor shall pay such costs unless they show that the defect in the work was caused by another Contractor, and in that event, the City shall pay such cost.

The inspection of the work shall not relieve the Contractor of any of their obligations to fulfill their Contract as prescribed, and defective work shall be made good and unsuitable materials shall be rejected, notwithstanding that such defective work and materials have been previously overlooked and accepted on estimates for payment. All work shall be tested to the satisfaction of the City Manager or designee before acceptance.

BID REVIEW AND CONTRACT AWARD

Failure to submit all documents requested at the time of bid may deem the Contractor's bid ineligible for award. The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach. The City shall be the sole final judge of qualifications of the bidder to perform service and reserves the exclusive right to accept or reject any bids as it deems to be in the best interests of the City. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS

The laws of the State of Florida do apply to any purchase made under this Request for Bid. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their bid and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Contractor agrees to comply with all applicable portions of Fla. Stat. 448.095. Contractor must use the U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Contractor shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Contractor with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Contractor shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Contractor must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Contractor's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Contractor may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and rebidding costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statue by the Contractor, the Contractor may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all bids, to waive irregularities and technicalities, and to request re-submission. If only one bid is received by the bid date and time listed, the bid may or may not be rejected by the City depending upon bid review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting bids. The City reserves the right to award the contract to a responsible proposer submitting a responsible bid, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, bidders, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFB during any phase of the bidding process. Failure to comply with the provision may result in disqualification of the bidder, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFB shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE

Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION

The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS

The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

IV. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization and telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the bidder's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of bidder to perform service and reserves the exclusive right to accept or reject any bid as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

V. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

   by: _____
   (Print individual's name and title)

   for: _____
   (Print name of entity submitting sworn statement)

   at: _____
   (Business address)

   and (if applicable), its Federal Employer Identification Number (FEIN):

   _____
   (FEIN)

   or, if the entity has no FEIN, include the Social Security Number:

   _____
   (SSN)

   by the individual signing this sworn statement:

   _____
   (Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any bid or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who

knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

EXECUTIVE SUMMARY

Free Agent Marine LLC is pleased to submit this proposal to provide on-call commercial diving services for the City of St. Pete Beach.

Our team specializes in municipal marine infrastructure support, including culvert inspection and cleaning, underwater inspection and documentation, dredging, and confined space diving operations. We bring direct, relevant experience from completed projects throughout the Tampa Bay area, including culvert inspection and cleaning operations along Bayshore and penetration dives within below-grade municipal systems extending several hundred feet.

Free Agent Marine operates with a fully equipped surface-supplied dive system and maintains the capability to rapidly mobilize via shore-based dive command center or vessel-based operations, depending on site conditions. Our approach prioritizes safety, efficiency, and clear coordination with City personnel to ensure reliable and consistent service delivery.

All operations are conducted in strict compliance with ADCI Commercial Diving Standards, OSHA regulations, and industry best practices.

Free Agent Marine LLC is fully prepared to support the City's ongoing and emergency diving needs with a responsive, experienced, and safety-focused team.

EXECUTION PLAN

Free Agent Marine LLC will provide on-call commercial diving services utilizing a fully equipped dive team operating from either a shore-based dive command center or a marine vessel, depending on site conditions and access requirements.

Asset Workflow and Cycle Reporting.
Free Agent Marine LLC will execute quarterly (or as-directed) maintenance cycles by mobilizing a three-person dive team to each outfall location, completing debris and marine growth removal, functional inspection of tide check valves and manatee grates, and documenting condition with timestamped video and stills. Where the City directs repair or replacement of in-line or outfall-end tidal check valves, our crew will support removal/installation activities, verify post-install function, and submit a per-asset written/video report identifying observed defects, corrective actions performed, and recommendations for follow-on maintenance.

All operations will be executed in accordance with:

- ADCI Commercial Diving Standards
- OSHA regulations (29 CFR Part 1910 Subpart T)
- Industry best practices for municipal marine infrastructure

Our operational approach is built to ensure safe execution, efficient production, and clear coordination with City personnel.

Dive System & Equipment Configuration

Free Agent Marine will deploy a complete surface-supplied shallow water dive spread, including:

Air Supply System

- Diesel-powered air compressor (325 CFM) and/or high-pressure air bank
- Gasoline-powered air compressor (255 CFM) and/or high-pressure air bank
- High-pressure air cylinders (backup supply)
- 30-gallon volume tank
- High-pressure micro-particle filtration system with backup filters

Dive Umbilical & Communication

- Dual dive umbilicals with integrated strength member, hardline communications, and pneumofathometer
- Air manifold control system with interconnects
- Surface-to-diver communication systems (radio/intercom)

Support Equipment

- Dive ladder for safe access
- Full shallow water spares package
- Free Agent Marine safety manual and decompression tables
- OSHA-compliant first aid kit

Inspection, Cleaning & Work Capabilities

Free Agent Marine is equipped to perform inspection, cleaning, and maintenance operations including:

- Underwater video inspection with live feed capability
- High-output lighting for low-visibility environments
- 4,000 PSI hydro blasting for marine growth removal
- Pressure washing systems with specialty nozzles
- Submersible dredge/pump for sediment and debris removal

Documentation & Deliverables

Free Agent Marine will provide structured reporting to support City operations and engineering review, including:

- Real-time video monitoring when required
- Post-operation video and audio reports
- USB-based deliverables
- Optional still photo documentation

Operational Flexibility

Free Agent Marine's crew and equipment allow rapid adaptation to:

- Confined culvert environments
- Open water structures
- Sediment-heavy conditions
- Restricted or limited-access locations

Mobilization method (shore or vessel-based) will be selected to maximize efficiency, safety, and production output.

Safety & Supervision

All diving operations will be performed under strict safety protocols, including:

- ADCI Commercial Diving Standards
- OSHA compliance requirements
- Continuous surface-supplied air with full communication
- Designated dive supervisor present at all times

QUALIFICATIONS & EXPERIENCE

Relevant Experience

Free Agent Marine LLC has successfully performed commercial diving operations directly aligned with the requirements of this contract, including:

- Inspection and cleaning of culvert systems along Bayshore in the Tampa Bay area
- Removal of marine growth, sediment, and debris from drainage and water conveyance systems
- Underwater inspections with video documentation to support engineering evaluation and maintenance planning

Free Agent Marine has also performed penetration diving operations in confined and below-grade environments throughout the City of Tampa, including subsurface culvert and tunnel systems extending several hundred feet. These operations were conducted in low-visibility and restricted-access conditions, requiring advanced planning, continuous communication, and strict safety control.

Additional relevant project experience includes:

- Diver-assisted dredging and sediment removal
- Clearing waterways and obstructions beneath bridge structures
- Underwater burning and structural debris removal
- Confined space dredging and cleaning within vessels and semi-submersibles

- Marine growth removal in restricted and hazardous environments

Company Capabilities

Free Agent Marine LLC is a Florida-based commercial diving contractor specializing in underwater inspection, maintenance, dredging support, and marine construction operations.

Core service capabilities include:

- Culvert inspection and cleaning
- Underwater video documentation and reporting
- Diver-assisted dredging and debris removal
- Underwater burning and structural demolition
- Confined space and penetration diving operations

Typical project values range from $2,500 to $10,000+ per day, depending on scope, complexity, and duration.

Personnel Experience

Free Agent Marine personnel are trained and experienced in:

- Surface-supplied air diving systems
- Confined space and penetration diving
- Underwater inspection, documentation, and reporting
- Dredging and debris removal operations

Personnel experience includes municipal infrastructure work, marine construction support, and operations in confined and limited-access environments.

Claims, Litigation & Standing

- No unresolved claims exceeding $500,000
- No material litigation impacting operations within the past five (5) years
- Company is in good standing and fully capable of contract performance

PROJECT REFERENCES

Free Agent Marine LLC provides the following professional references for similar commercial diving services performed within the past five (5) years:

Organization: Kimmins
Contact: Matt Gilbert
Phone: 813-248-3878
Email: Mgilbert@kimmins.com
Project Location: City of Tampa, FL (Bayshore Area)
Date: 04/06/2026

Scope:
Performed culvert inspection and cleaning operations along Bayshore in the Tampa Bay area. Work included penetration dives within below-grade municipal systems spanning several hundred feet, inspection of confined culverts and drainage structures under low-visibility conditions, underwater video documentation, and removal of marine growth for municipal maintenance.

Reference 2

Organization: Pro Shot Concrete
Contact: Joshua Morris
Phone: 256-762-0035
Email: jmorris@proshotconcrete.com
Project Location: Tampa, FL (Westshore Bridge)
Date: 03/01/2025

Scope:
Performed diver-assisted dredging to expose sheet pile wall, underwater burning, and debris removal operations beneath bridge structures.

Reference 3

Organization: Bosarge Diving
Contact: Brandon Bosarge
Phone: 228-762-6361
Email: Office@bosargediving.com
Project Location: Pascagoula, MS
Date: 03/02/2021

Scope:
Conducted confined space penetration diving inside semi-submersible vessels, utilizing high-pressure hydro blasting and dredging to clean and restore sea chest systems.

COMPLIANCE DOCUMENTS

Free Agent Marine LLC has reviewed all bid requirements and confirms that all required compliance documentation has been completed and included with this submission.

Included Documents

- Completed Bid Form
- Pricing Sheet
- Addenda Acknowledgment
- Certificate of Insurance
- W-9 Form
- References & Qualifications
- Execution Plan
- Required Affidavits
- E-Verify Compliance Documentation

Insurance Compliance

Free Agent Marine maintains insurance coverage meeting or exceeding all contract requirements, including:

- Commercial General Liability
- Automobile Liability
- Workers' Compensation
- USL&H Coverage
- Maritime Employers Liability

A Certificate of Insurance is included listing:

- City of St. Pete Beach as Certificate Holder
- City of St. Pete Beach as Additional Insured

Regulatory Compliance

Free Agent Marine LLC certifies:

- Compliance with all federal, state, and local regulations
- Adherence to OSHA and ADCI standards
- Proper licensing for all work performed

Submission Integrity

Free Agent Marine LLC affirms that all information provided is accurate and complete. The company understands that incomplete submissions may result in disqualification.

I. CONTRACTOR'S BID SUBMITTAL

The company that is submitting a bid declares that it has extensive experience in **Commercial Diving Services.**

The undersigned, as Bidder, hereby declares that the only person or persons interested in the Bid as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Bid or in the Agreement to be entered into; that this Bid or Agreement is made without connection with any other person, company, or parties making a Bid; and that it is in all respects fair and in good faith without collusion or fraud.

The Bidder further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of bids; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Bidder proposes and agrees, if the Bid is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Commercial Diving Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful bidder shall be required to utilize the template Agreement in this Request for Bids (RFB) and any questions regarding the Agreement must be addressed during the RFB process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Bidder proposes to furnish all materials, equipment, labor, and perform the work submitted in their bid schedule for the City of St. Pete Beach **" Commercial Diving Services".**

4 v020222

GENERAL CONTRACT TERMS

REQUEST FOR BID

The City of St. Pete Beach is submitting this RFB for bids on the Commercial Diving Services.

LOCATIONS

The City of St. Pete Beach is soliciting bids from qualified Commercial Diving Services for the City.

BID SUBMITTALS

Bid documents must include a signed/notarized Contractor's Bid Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit one electronic bid via Bonfire.

BIDDER INFORMATION

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http:// www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

PRE-BID MEETING

An optional pre-bid meeting will be held on **03/18/2026 at 9:30 AM EST** via Microsoft Teams Video conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and Microsoft Teams Meeting instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS

No oral interpretations will be made to any firms as to the meaning of the scope of work or any other contract documents included in this **RFB.** All questions pertaining to the terms and conditions or scope of work of this Request for Bid **(RFB)** must be sent in writing only via email to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 EST on 03/25/2026**. Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFB**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFB** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so.

BID PACKAGES

Sealed bids will be accepted by the City until **04/08/2026** at **9:00 AM** EST (Deadline). No bids shall be accepted by the City after this deadline – NO EXCEPTIONS. Bid Packages must be electronically submitted via Bonfire Clearly marked as: "**Commercial Dive Services**." If a link is needed for either site, please contact the Procurement Manager (purchasing@stpetebeach.org.) All Bidders are invited to attend this bid opening.

CONTACT INFORMATION

Sara Spain – Procurement Manager
Mailing Address - 155 Corey Avenue, St. Pete Beach, Florida 33706
E-mail - purchasing@stpetebeach.org

SCOPE OF WORK

The City of St. Pete Beach is seeking a qualified full service commercial diving Contractor with experience in a wide range of applications. The Contractor shall provide a qualified dive team, and all related diving equipment required to assist the City of St. Pete Beach with the cleaning, inspection, repair and maintenance of tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads.

The City of St. Pete Beach has 35 tide check valves, and 25 manatee grates installed at stormwater outfalls throughout the City. Services shall include:

- Debris Removal from Valve, Pipe, Endwalls, and Pit
- Marine Growth Removal from Valve, Pipe, Endwalls, and Pit
- Maintenance of Manatee Grates, when present
- Written and Video Reports of condition per cycle
- Repair and Replacement of in-line and outfall-end type Tidal Check Valves
- Hydraulic Dredging

Services must comply with relevant standards and regulations, including OSHA diving regulations and any applicable environmental guidelines.

CONTRACTOR TO FURNISH

- A Qualified Dive Team
- All Related Diving Equipment
- Underwater Video with Digital Capture
- Shallow Water Dive Package
- Small Pneumatic Tool
- Work Boat / Barge
- Hydraulic Unit
- 4-inch Hydraulic Submersible Pump
- Jet Pump
- 4000 PSI Water Blaster
- Digital Camera

THE CITY OF ST. PETE BEACH TO FURNISH

- A Representative to Coordinate Activities
- A Representative to View Video Real Time and Direct the Crew
- Access to Work Site
- Permits (If required)
- Assist with Lock-Out Tag-Out procedures (training or supervision as needed)
- Procurement of Tidal Check Valves (as needed)

SCHEDULE

Maintenance, cleaning and inspection shall be scheduled per occurrence and may include the full asset inventory or a portion of that inventory for each cycle. Maintenance cycles are to be performed quarterly, or more frequently as-needed, based on City requirements.

Tidal check valve, manatee grate, and other miscellaneous outfall repairs shall be scheduled per occurrence, as-needed.

The Contractor must provide at least 72 hours' notice for scheduling changes. Emergency response for unscheduled maintenance requests must be available within 24 hours.

PERFORMANCE METRICS

The following performance metrics will be used to evaluate the Contractor's work:

- Timeliness of completing tasks as per the agreed schedule.
- Accuracy and thoroughness of written condition reports.
- Compliance with safety standards and regulations.
- Responsiveness to unscheduled maintenance requests.

All reports must be submitted in a digital format (PDF or Word) within ten (10) days of completing each maintenance cycle. Reports should include:

- Detailed descriptions of completed tasks.
- Photographic and video evidence.
- Identified issues and recommendations for future maintenance.

PENALTIES

Failure to adhere to the schedule or meet performance standards may result in penalties, including:

- 5% reduction in payment for delayed work (per day).
- Rework at Contractor's expense for substandard services.

EMERGENCY SERVICES

The Contractor must provide emergency maintenance services within 24 hours of the City's request. The bid form includes an emergency call-out fee to account for this service.

Once a contract is awarded, the selected vendor will be required to submit a detailed fee schedule outlining the main pay items for the project. This fee schedule will be reviewed at the pre-construction meeting and will be used to review pay applications and evaluate project progress.

DETAILED SPECIFICATIONS

LOCATIONS

The locations will cover all tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads Citywide that are City owned throughout the City of St. Pete Beach Florida.

Standard work hours shall be from 7:30 AM until 6:00 PM, Monday through Saturday. No work shall take place on Sundays or on official City holidays without prior approval by the City Manager or designee at least 1 week prior to the scheduled work. A list of current official City holidays can be found on the City's Human Resources website at http://www.stpetebeach.org/hr/holidays.html.

Contractor will coordinate scheduling of work with the City's Project Manager and City's Inspector.

ADDITIONAL WORK DETAILS

Contractors or persons wishing to bid on this project are licensed, bondable and insured in accordance to the City's requirements. The Contractor will furnish all necessary labor, materials, tools, equipment and supplies to complete the scope of work. Bid must also include all costs for licenses, permits, and any material disposal fees.

Bidders shall bring questions, discrepancies, omissions, conflicts or doubt as to meaning of any part of Contract Documents to the attention of the City of St Pete Beach Procurement Manager at least ten (10) business days before bid submittal deadline. Clarification of intent of Contract Documents, if necessary, shall be made available to bidders in the form of an Addendum. Failure to request clarification of interpretation of Contract Documents shall not relieve bidders of their responsibilities to perform the work.

The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids, or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach.

STATEMENT OF WORK

The Contractor shall furnish and pay the cost, including sales tax and all other applicable taxes, licenses, permits and fees, of all the necessary materials not furnished by the City and shall furnish and pay for all the superintendence, labor, tools, equipment, transportation, and perform all the work required for the execution of all services listed in the Bidder's Proposal and Bid Form attached hereto and in strict accordance with the Plans, Specifications, and requirements of the City of St. Pete Beach which are attached hereto and made a part hereof, and any amendments thereto and such supplemental Plans and Specifications which may hereafter be approved.

BEGINNING DATE

The Contractor shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Contractor shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City. The Contractor must commence construction activities within thirty (30) business days of NTP to prepare and procure materials. Any change to the start date or the work schedule included with this bid must be submitted in writing to and approved by the City Manager or designee.

COMPLETION OF WORK

The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". The contract will be for (3) three years from time of execution (Date of last signature) of the contract with (2) additional (1) one year extensions if agreed upon by the City and vendor. .

EXAMINATION OF SITE

Bidders may visit specific areas with advanced notice.

ASSURANCES

The responding Contractor shall provide a statement of assurance that the Contractor is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

TRAFFIC CONTROL AND STAGING AREA

Contractor shall include all costs associated with vehicular and pedestrian traffic control and maintenance during the project. Contractor shall be responsible for providing a staging area. The location of this area must be approved by the City Manager or designee. The Contractor will be required to control the area including any additional fencing or barricades and Contractor will be responsible for the restoration of this and all other staging areas provided by the City.

ASSIGNMENT AND TRANSFER OF CONTRACT

The Contractor shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS

The Contractor shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PERFORMANCE PAYMENT BOND

Not required for this contract.

LIQUIDATED DAMAGES

If the work embraced by this Contract is not completed on or before the date set for completion or any extension thereof, the actual damages for the delay will be impossible to determine and in lieu thereof, the Contractor shall pay to the City fixed, agreed, and liquidated damages in the amount of either Five-Hundred Dollars ($500) per day for each calendar day of delay until the work is satisfactorily completed.

PAYMENT

Payment shall be made to the Contractor for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Contractor will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Contractor without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Contractor's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Contractor to make a change in the Work, and if the City and the Contractor do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the contractor shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Contractor believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, he shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Contractor first discovered the occurrence. The Contractor shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Contractor shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Contractor shall prepare bids detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Contractor's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Contractor's bids shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable bid will not justify an increase in Contract Amount or Contract Time. Contractor agrees that it shall give the City access to any and all of Contractor's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Contractor for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Contractor shall be at his expense without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Contractor or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict

submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Contractor bids or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to be used shall be those used for the Contractor's costs, except that the term "Subcontractor" shall replace the term "Contractor," context permitting.

Changes in Contract Amount for extensions in Contract Time shall exclude costs that are unaffected or do not relate to the extension in Contract Time, such as: (a) operating costs of construction equipment assigned to the Work on a continuing basis, (b) operating costs and owned/rental costs of construction equipment (crane used for specific lifts, concrete pump used for specific pours, etc.), and (c) fully paid site facilities, tools, etc.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Contractor, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit. The out-ofpocket cost shall only include those direct costs which are needed to perform the work such as labor (including payroll taxes, fringe benefits, labor burden and workers' insurance), materials, equipment, and other incidental out-of-pocket construction costs directly involved in the work, including but not limited to small tools, expendables and material costs but shall not include project management or project supervisory costs unless the Change Order includes an increase in the Contract time.

In such case, the Contractor will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Contractor to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

To be eligible for consideration, the Contractor's written claim for a change in the Contract price, including claim(s) from sub-contractors, shall include an itemized cost breakdown with supporting data as described below:

A. <u>For labor</u>: Provide written documentation from the Contractor and Subcontractors or others as appropriate in the form of a detailed breakdown by each labor classification involved indicating the number of hours of Work involved and the hourly payroll rate applicable to each to substantiate the basis and amount of the direct labor cost. The direct labor cost may be increased to provide an allowance for indirect payroll costs (labor burden), such as payroll taxes, fringe benefits, and workers insurance after all premium discounts, rebates and other appropriate reductions have been taken.

B. For material, supplies, equipment, furnishings, etc., to be installed or included in the Work: Provide written documentation from the Contractor and Subcontractors, suppliers, etc., to substantiate the basis and amount of the various cost items involved. Material costs shall reflect the Contractor's reasonably anticipated net actual cost after consideration of trade discounts and volume rebates.

C. For construction equipment: Provide written documentation in the form of a detailed breakdown by each construction equipment category, indicating the applicable unit rates (i.e., dollar amount per hour, dollar amount per day etc.,) and the number of hours, days, etc. to substantiate the basis and amount of the construction equipment out-of-pocket costs.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Contractor (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Contractor employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

CITY'S RIGHT TO DIRECT PURCHASE

The City has reserved the right to purchase certain items and materials for this project directly in an effort to save applicable sales tax in compliance with Florida Law.

The City will issue purchase orders directly to the vendors supplying the equipment being directly purchased by the City for this project. Each Purchase Order will be accompanied by the City's Certificate of Exemption and a Certificate of Entitlement. All direct purchase vendor invoices will be issued to the City of St. Pete Beach, and the City will issue payment to each direct purchase vendor from City funds. The City will take title to the equipment at time of delivery from the vendor and will issue a separate Certificate of Entitlement for each purchase order.

The Contractor shall assist the City with receipt of materials furnished by the City in accordance with these
Special Provisions including, but not limited to, verifying correct quantities, verifying documents of orders in a timely manner, providing and obtaining all warranties and guarantees required by the Contract Documents, assist with inspection of the goods at the time of delivery and notify the City immediately of any deficiencies noted. It is understood that the owner assumes the risk of damage or loss during the time that the building materials are physically stored at the job site prior to their installation or incorporation into the project. The Contractor shall coordinate with the City regarding the delivery schedules, sequence of delivery, loading orientation, and other arrangements normally required by the Contractor for the particular material furnished.

As City Furnished Materials are delivered to the job site and accepted by the City, the City shall notify the
Contractor who will assist the City to visually inspect all shipments from the suppliers. The City will approve the vendor's invoice for material delivered upon adequate inspection and recommendation of the Contractor. The City shall assure that each delivery of City Furnished Materials is accompanied by documentation adequate to identify the Purchase Order against which the purchase is made and Contract Documents including but not limited to Contract, Plans, Specifications, and approved Shop Drawings. This documentation may consist of a delivery ticket, bill of lading and an invoice from the supplier conforming to the Purchase Order together with such additional information as the City may deem necessary.

PAYMENTS FOR WORK COMPLETED

Partial payments will be made as the work progresses (if applicable) at the end of each calendar month, or as soon thereafter as practicable on estimates made by the City Manager or designee and as approved by the City, provided that the Contractor is performing the overall job in a diligent manner. In making partial payments, there shall be retained five percent (5%) on the amount of each estimate until final completion and acceptance of all work covered by the Contract. Upon completion and acceptance of the work, the City Manager or designee shall issue a certificate that the work has been completed and accepted by them under the conditions of the Contract and shall make and approve the final estimate of the work. The entire balance found to be due the Contractor, including that retained by the City, should be paid to the Contractor. Such payment shall be conditioned, however, upon the submission by the Contractor of evidence satisfactory to the City that all claims for labor, material, and any other outstanding indebtedness in connection with the Contract have been paid. Such payment shall also be conditioned upon approval and acceptance of the construction and improvements by the City.

If after the work has been substantially completed, full completion thereof is materially delayed through no fault of the Contractor and the City Manager or designee so certifies, the City shall upon the Certificate of the City Manager or designee, and without terminating the Contract make payment for the balance due for that portion of the work fully completed and accepted. Such payment shall be made under the terms and conditions governing final payment, except that it shall not constitute a waiver of claim. If such delay occurs and payment is made under this clause, the Contractor shall nevertheless be prepared to complete the work in a timely manner upon the remedy or removal of such delay, and shall be bound under this Contract for the completion of such work unless this Contract is otherwise terminated. All payments will be made in accordance with the Local Government Prompt Payment Act, Chapter 218, Florida Statutes.

PAYMENTS WITHHELD

The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Contractor to make payments properly to Subcontractors or for material or labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Contractor

f) Failure of the Contractor to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS

Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Contractor, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such sums to the Contractor.

Before the approval of the final payment, the Contractor shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS

If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Contractor, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Contractor all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Contractor and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE

The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City
Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

INTENT OF PLANS AND SPECIFICATIONS

The Contractor shall keep on the job a copy of the Plans and Specifications and shall at any time give the City Manager or designee access thereto. Anything mentioned in the Specifications and not shown on the Plans or shown on the Plans and not mentioned in the Specifications, shall be of like effect as if shown or mentioned in both. The Contractor shall not take advantage of any errors, discrepancies or omissions that may exist in the Plans and Specifications but shall immediately call them to the attention of the City Manager or designee whose interpretation or correction thereof shall be conclusive. Should a conflict occur between the General Specifications and any Supplemental Specifications and/or Plans, the latter shall govern.

LICENSES AND PERMITS

The Contractor shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the contractor is responsible for non-compliance of all permit requirements, including all fines resulting from Contractor's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Contractor shall be responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the contractor awarded the project, MUST also register their license with the City.

SUPERINTENDENCE

The Contractor shall constantly superintend all the work embraced in this Contract in person or by a responsible agent who shall have in writing, full authority to act for them and to carry out all the instructions given by the City Manager or designee.

LABOR PROVISIONS

The Contractor and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed.

INSURANCE

The Contractor shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Contractor's General Public Liability and Property Damage Insurance issued to the Contractor and protecting the Contractor from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Contractor or by any Subcontractor hired by the Contractor or anyone directly or indirectly employed by the Contractor or hired by the Contractor.

The successful Contractor shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Contractor or third party under the direction or control of the Contractor. Such general and excess liability coverage shall be primary to any other

coverage carried by the City of St Pete Beach. Contractor must furnish the City with Certificate of Insurance prior to commencement of work. An approved Certificate of Insurance furnished by the Contractor's carrier to guarantee the Contractor being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY

The Contractor shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Contractor shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Contractor shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Contractor will provide security on off days and holidays. The Contractor shall be responsible for all charges incurred with such action.

The Contractor shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Contractor, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Contractor shall also protect adjacent property as required by law.

PARKING

The Contractor shall arrange with City Manager or designee for temporary parking areas to accommodate construction personnel and construction equipment. Note that limited parking spaces are available in the City of St. Pete Beach. The Contractor will be asked to coordinate with the City's representative on site on a regular basis to minimize the impact on residents and visitors.

TRANSPORTATION, HANDLING AND STORAGE

The Contractor shall transport, handle, protect and store products in accordance with manufacturer's instructions and all environmental regulatory agencies.

VEHICLES

Business vehicles shall be identified on both sides with the name of the company.

ENVIRONMENTAL PROTECTION

It shall be the Contractor's responsibility to implement construction methods, best management practices, and erosion control methods that avoid water pollution as required by the State of Florida Department of Environmental Protection (FDEP), City of St. Pete Beach, and Pinellas County. Any Contractors in violation of the City of St. Pete Beach Regulations, Pinellas County Regulations, Florida Department of Environmental Protection Regulations, or any other regulatory agency regulations shall be the sole responsibility of the Contractor. The Contractor shall hold harmless the City of St. Pete Beach and the City Manager or designee from any fines and litigation resulting from the Contractor's actions. The Contractor shall pay all attorneys' fees, fines, penalties and any other such expenses resulting from the Contractor's actions. The Contractor shall provide all necessary measures to prevent any materials whatsoever from entering the waterway except for those materials, which are shown, on the plans as completed structures. The Contractor shall provide MSDS sheets to the City Manager or designee on all applicable materials before applying those materials. The Contractor shall secure the necessary education, certifications, licenses and permits required by state and local agencies to operate and manage a construction site, including but not limited to, FDEP requirements related to Coastal Construction Control Line. The Contractor shall abide by all rules and regulations set forth and required by the City of St. Pete Beach's MS4 NPDES Permit.

TIMELY DEMAND FOR STAKES AND INSTRUCTIONS

The Contractor shall provide reasonable and necessary materials, opportunities, and assistance for setting stakes and making measurements, including the furnishing of a rodman, or a chainman at intermittent times during the construction period. They shall not proceed until they have received such stakes and instructions as may be necessary as the work progresses. The work shall be done in strict conformity with such stakes and instructions. The Contractor shall carefully preserve benchmarks, reference points and stakes, and in case of willful or careless destruction, they will be charged with the resulting expense and shall be responsible for any mistakes that may be caused by their unnecessary loss or disturbance.

WORKMANSHIP

The Contractor acknowledges that they have satisfied themselves as to the nature and location of the work; the general and local conditions including but not restricted to those bearing upon transportation, disposal, handling and storage of materials; availability of labor, water, electric power, roads; and uncertainties of weather, surface conditions, subsurface conditions, tides or similar physical conditions at the site, the character of equipment and facilities required to prosecute the work. Any failure by the Contractor to acquaint themselves with any aspect of the work or with any of the applicable conditions shall not relieve the Contractor from the responsibility to successfully perform the work under the Contract Documents, nor shall it be considered the basis for any claim for additional time or compensation.

UTILITIES

The Contractor shall anticipate all underground obstructions such as water lines, gas lines, sewer lines, utility lines, or any other public or private facilities and debris. In all cases where existing utility lines may be interfered with by the work, the Contractor shall give a minimum of thirty-six (36) hours' notice to the owners of such utilities, to permit them to relocate the lines prior to

construction. No extra payment shall be allowed for the removal, replacement, repair or possible increased cost caused by underground obstructions. The location of existing structures and utilities provided in the plans are approximate only. Any damage to existing structures to remain or work of any kind shall be repaired or restored promptly by, and at the expense of the Contractor.

The Contractor shall at all times protect all desirable trees, plants, curbs, sidewalks, irrigation components, and structures not requiring removal to accomplish the work, whether or not they are shown on the plans. The Contractor must contact the City to obtain tree removal permits for the removal of any tree not identified for removal in the Project Plans.

In matters of restoration, all materials, construction, and workmanship shall be acceptable to, and approved by the City of St. Pete Beach and the City Manager or designee. No changes in size, shape, configuration, location, materials, or construction shall be made without prior written authorization from the City Manager or designee. Any demolition debris and other debris shall be hauled offsite and properly disposed of by the Contractor and shall be inclusive to the prices as stated in the BID SCHEDULE, unless otherwise stipulated as part of the project to remain.

No interruption of ingress and egress to private property shall be made unless the Contractor has made prior arrangements acceptable to the owner of the affected property. The City Manager or designee shall notify affected residents/property owners of impending activity or inconvenience via door hanger.

The Contractor shall provide all traffic control devices utilized during construction and meet the requirements set forth in the Florida State Department of Transportation "Manual on Traffic Control and Safe Practices for Street and Highway Construction, Maintenance, and Utility Operations."

CLEANING UP

Upon completion or termination of the work the Contractor shall, as directed by the City Manager or designee, remove from the vicinity of the work all equipment and temporary structures, waste materials and rubbish resulting from his operations, leaving the premises in a neat and presentable condition. All debris generated by the Contractor will be removed before leaving the area. All areas will be raked to remove smaller debris. All surrounding sidewalks, parking lots and roadways will be cleared of any dust or debris generated by the Contractor. In the event of their failure to do so, the City at the expense of the Contractor may do the same, and their Surety shall be responsible.

DEFECTIVE WORK OR MATERIAL

The Contractor shall promptly remove from the premises all work and materials condemned by the City
Manager or designee as failing to conform to the Contract, whether incorporated or not, and the Contractor shall promptly replace and re-execute his own work in accordance with the Contract and without expense to the City and shall bear the expense of making good all work of other Contractors destroyed or damaged by such removal or replacement.

If the Contractor does not remove such condemned work or materials within a reasonable time after notice, the City may remove them and store the materials at the expense of the Contractor. If the Contractor does not pay the expense of such removal within ten (10) business days' time thereafter, the City may, upon thirty (30) business days written notice sell such materials at auction or at private sale and shall account for the net proceeds thereof after deducting all the costs and expenses that should have been borne by the Contractor.

DISPUTE RESOLUTION

The Contract shall be construed under Florida law. The parties agree that all controversies, claims and other matters in question between the parties arising out of or relating to this Contract or its breach shall be resolved through mediation. Upon notice of any party to the Contract of a dispute, question or controversy, the parties shall agree to the appointment of a qualified mediator. A qualified mediator is a person who has received at least forty (40) hours of mediation training and has actual experience as a mediator in resolving contract disputes. If the dispute, question or controversy is not resolved through mediation within sixty (60) business days of a notice of the dispute between the parties, the City reserves the right to seek resolution through court action.

INDEMNIFICATION

In consideration of the payment of ten dollars ($10.00) as part of the above purchase price, Contractor shall indemnify, defend, and hold harmless the City, its officers and employees, from liabilities, damages, losses and costs, including but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the responding firm and any persons employed or utilized by the responding firm in the performance of the Contract.

GENERAL WARRANTY

Neither the final certificate nor any provision in the Contract Documents nor partial or entire occupancy of the premises by the City shall constitute an acceptance of work not done in accordance with the Contract Documents or relieve the Contractor of liability in respect to any express warranties or responsibility for faulty materials or workmanship. The Contractor shall remedy any defects in the work and pay for any damage to other work resulting therefrom that shall appear within a period of eighteen (18) months from the date of final acceptance of the work, unless a longer period is specified. The City shall give notice of observed defects with reasonable promptness.

LAND OF CITY, USE OF, BY CONTRACTOR

The City shall provide the land upon which the work under this Contract is to be done, and will, so far as is convenient, permit the Contractor to use as much of the land as is required for the erection of temporary construction facilities and storage of materials, together with the right of access to same, but beyond this, the Contractor shall provide, at his/her cost and expense, any additional land required. It will be the responsibility of the Contractor to repair or restore to the satisfaction of the City, at their own expense, any damage to land used for the above stated activities or any other activities approved by the City.

OTHER WORK

Wherever work being done by the City or by other Contractors is contiguous to work covered by this Contract, the respective rights of the various interests involved shall be established by the City Manager or designee to secure the completion of the various portions of the work in general harmony.

OTHER CONTRACTS

The City may award other Contracts. The Contractor shall fully cooperate with such other Contractors and carefully fit his/her own work to that provided under other Contracts, as may be with the performance of work by any other Contractor or City.

COOPERATIVE PURCHASING

Pursuant to their own governing laws and subject to the agreement of the Contractor, governmental entities may make purchases under the terms and conditions contained in the executed Contract, if agreed to by Contractor. Such purchases are independent of the Contract between the City and the Contractor, and the City is not a party to these transactions. Agencies seeking to make purchases under this Contract are required to follow the requirements of Rule 60A-1.045(5), F.A.C.

DELAYS AND EXTENSION OF TIME

If the Contractor should be delayed at any time in the progress of the work by an act or neglect of the City or the City Manager or designee, or of any employee of either, or by any separate Contractor employed by the City, or by changes ordered in the work, or by strike, lockouts, fire, unusual delay in transportation, unavoidable casualties, or any cases beyond the Contractor's control, or by delay authorized by the City Manager or designee, or by any cause which the City Manager or designee shall decide to justify the delay, then the time of completion shall be extended for such reasonable time as the City Manager or designee may decide. No such extension shall be made for a delay that occurs more than five (5) business days before a claim is made in writing to the City Manager or designee. In the case of a continued cause of delay, only one (1) claim is necessary. This section does not exclude the recovery of damages for delay by either party under other provisions in the Contract Documents.

CITY'S RIGHT TO TAKE OVER THE WORK

If the Contractor shall be adjudged bankrupt, or if they should make a general assignment for the benefit of its creditors, or if a receiver should be appointed to take over their affairs, or if they should fail to prosecute their work with due diligence and carry the work forward in accordance with its' work schedule and the time limits set forth in the Contract Documents, or if they should fail to substantially perform one or more of the provisions of the Contact Documents to be performed by them, the City may serve written notice on the Contractor and the Surety on its' performance bond, stating the City's intention to exercise one of the remedies hereinafter set forth and the grounds upon which the City bases its right to exercise such remedy. In any event, unless the matter complained of is satisfactorily cleared within ten (10) business days after the service of such notice, the City may, without prejudice to any other right or remedy exercise one of such remedies at once; having first obtained a certificate from the City Manager or designee that such sufficient cause exists to justify such action.

The City may terminate the services of the Contractor, which termination shall take effect immediately upon service of notice thereof on the Contractor and their Surety, whereupon the Surety shall have the right to take over and perform the Contract. If the Surety does not commence performance of the Contract within ten (10) ten days after service of the notice of termination, the City may itself take over the work, take possession of and use all materials, tools, equipment, and appliances on the premises and prosecute the work to completion by such means as it shall deem best. In the event of such termination of their service, the Contractor shall not be entitled to any further payment under their Contract until the work is completed and accepted. If the City takes over the work and the unpaid Contract balance exceeds the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor,

the excess unpaid Contract balance shall be paid to the Contractor. If the City takes over the work and the unpaid Contract balance does not exceed the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the Contractor and his Surety shall pay the difference to the City. The City Manager or designee shall certify such cost, expenses, and damages.

The City may take control of the work and either make good the deficiencies of the Contractor itself or direct the activities of the Contractor in doing so, employing such additional help as the City deems advisable. In such event, the City shall be entitled to collect from the Contractor and his Surety, or to deduct from any payment then or thereafter due the Contractor, the costs incurred by it through the default of the Contractor, provided the City Manager or designee approves the amount thus charged to the Contractor.

The City may require the Surety on the Contractor's bond to take control of the work at once and see to it that all deficiencies of the Contractor are made good with due diligence. As between the City and the Surety, the entire cost of making good such deficiencies shall be borne by the Surety. If the Surety takes over the work, either upon termination of the services of the Contractor or upon instructions from the City to do so, the provisions of the Contract Documents shall govern in respect to the work done by the Surety, the Surety being substituted for the Contractor as to such provisions, including provisions as to the payment for the work and provisions of this section as to the right of the City to do the work itself or to take control of the work.

RIGHT OF OCCUPANCY

The City shall have the right, if necessary, to take possession of and to use any completed or partially completed portions of the work, if such use be approved by the City Manager or designee even if the time for completing the entire work or such portions of the work has not expired and even if the work has not been finally accepted. Such possession and use shall not constitute an acceptance of such possession and use if it materially interferes with the Contractor's operations. The City shall also have the right to enter the premises with the Contractor for the purpose of doing work not covered by its Contract.

ACCEPTANCE

Final inspection and acceptance of the work shall be made for the City by the City Manager or designee. Such inspection shall be made as soon as practical after the Contractor has notified the City in writing that the work is ready for such inspection.

WAIVER

It is expressly understood and agreed that any waiver granted by the City Manager or designee of any term, provision, or covenants of the Contract shall not constitute a precedent or breach of the same or any other terms, provisions, or covenants of the Contract. Neither the acceptance of the work by the City nor the payment of all or any part of the sum due the Contractor hereunder shall constitute a waiver by the City of any claim which the City may have against the Contractor or Surety under this Contract or otherwise.

INSPECTION

The City Manager or designee and his representative shall, at all times, have access to the work during its construction and shall be furnished with every reasonable facility for ascertaining that the stock and materials used and employed, and the workmanship, are in accordance with the

requirements and intentions of the Plans. All work done and all materials furnished shall be subject to their inspection and approval by the City Manager or his designee. If any work should be covered up without approval or consent of City Manager or designee, it must, if required by the City Manager or designee, be uncovered for examination at the Contractor's expense.

The City Manager or designee may order re-examination of questioned work and if so ordered, the Contractor must uncover the work. If such work were found in accordance with the Contract Documents, the City shall pay the cost of re-examination and replacement. If such work be found not in accordance with the Contract Documents, the Contractor shall pay such costs unless they show that the defect in the work was caused by another Contractor, and in that event, the City shall pay such cost.

The inspection of the work shall not relieve the Contractor of any of their obligations to fulfill their Contract as prescribed, and defective work shall be made good and unsuitable materials shall be rejected, notwithstanding that such defective work and materials have been previously overlooked and accepted on estimates for payment. All work shall be tested to the satisfaction of the City Manager or designee before acceptance.

BID REVIEW AND CONTRACT AWARD

Failure to submit all documents requested at the time of bid may deem the Contractor's bid ineligible for award. The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach. The City shall be the sole final judge of qualifications of the bidder to perform service and reserves the exclusive right to accept or reject any bids as it deems to be in the best interests of the City. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS

The laws of the State of Florida do apply to any purchase made under this Request for Bid. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their bid and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Contractor agrees to comply with all applicable portions of Fla. Stat. 448.095. Contractor must use the U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Contractor shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Contractor with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Contractor shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Contractor must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Contractor's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Contractor may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and rebidding costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statue by the Contractor, the Contractor may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all bids, to waive irregularities and technicalities, and to request re-submission. If only one bid is received by the bid date and time listed, the bid may or may not be rejected by the City depending upon bid review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting bids. The City reserves the right to award the contract to a responsible proposer submitting a responsible bid, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, bidders, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFB during any phase of the bidding process. Failure to comply with the provision may result in disqualification of the bidder, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFB shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE

Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the

procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION

The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS

The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization and telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the bidder's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of bidder to perform service and reserves the exclusive right to accept or reject any bid as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

V. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

by: Michael Cardona Jr, Owner
(Print individual's name and title)

for: Free Agent Marine LLC
(Print name of entity submitting sworn statement)

at: 4807 Londonderry Drive Tampa FL, 33647
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

88-2598669
(FEIN)

or, if the entity has no FEIN, include the Social Security Number:

(SSN)

by the individual signing this sworn statement:

Michael Cardona
(Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any bid or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who

knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☑ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

STATE OF FLORIDA
COUNTY OF Pasco

VI. NON-COLLUSION AFFADAVIT

STATE OF Florida
COUNTY OF Hillsborough

I state that I Michael Cardona Jr, Owner of Free Agent Marine LLC
(Name and Title) (Name of Firm)
am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. Free Agent Marine LLC its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

Form **W-9**

(Rev. March 2024)

Department of the Treasury

Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give form to the requester. Do not send to the IRS.

Before you begin. For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See ***Specific Instructions*** on page 3

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

Free Agent Marine LLC

2 Business name/disregarded entity name, if different from above.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☐ C corporation ☒ S corporation ☐ Partnership ☐ Trust/estate

☒ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) S

Note: Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions)

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any)

(Applies to accounts maintained outside the United States.)

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions . . . . . ☐

5 Address (number, street, and apt. or suite no.). See instructions.

4807 Londonderry Drive

Requester's name and address (optional)

6 City, state, and ZIP code

Tampa, FL 33647

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Social security number

			-			-				

or

Employer identification number

8	8	-	2	5	9	8	6	6	9

Note: If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they must obtain your correct taxpayer identification number (TIN), which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid).
- Form 1099-DIV (dividends, including those from stocks or mutual funds).
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds).
- Form 1099-NEC (nonemployee compensation).
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers).
- Form 1099-S (proceeds from real estate transactions).
- Form 1099-K (merchant card and third-party network transactions).
- Form 1098 (home mortgage interest), 1098-E (student loan interest), and 1098-T (tuition).
- Form 1099-C (canceled debt).
- Form 1099-A (acquisition or abandonment of secured property).

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

Caution: If you don't return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See *What is backup withholding*, later.

By signing the filled-out form, you:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued);
2. Certify that you are not subject to backup withholding; or
3. Claim exemption from backup withholding if you are a U.S. exempt payee; and
4. Certify to your non-foreign status for purposes of withholding under chapter 3 or 4 of the Code (if applicable); and
5. Certify that FATCA code(s) entered on this form (if any) indicating that you are exempt from the FATCA reporting is correct. See *What Is FATCA Reporting*, later, for further information.

Note: If you are a U.S. person and a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien;
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States;
- An estate (other than a foreign estate); or
- A domestic trust (as defined in Regulations section 301.7701-7).

Establishing U.S. status for purposes of chapter 3 and chapter 4 withholding. Payments made to foreign persons, including certain distributions, allocations of income, or transfers of sales proceeds, may be subject to withholding under chapter 3 or chapter 4 of the Code (sections 1441–1474). Under those rules, if a Form W-9 or other certification of non-foreign status has not been received, a withholding agent, transferee, or partnership (payor) generally applies presumption rules that may require the payor to withhold applicable tax from the recipient, owner, transferor, or partner (payee). See Pub. 515, Withholding of Tax on Nonresident Aliens and Foreign Entities.

The following persons must provide Form W-9 to the payor for purposes of establishing its non-foreign status.

- In the case of a disregarded entity with a U.S. owner, the U.S. owner of the disregarded entity and not the disregarded entity.
- In the case of a grantor trust with a U.S. grantor or other U.S. owner, generally, the U.S. grantor or other U.S. owner of the grantor trust and not the grantor trust.
- In the case of a U.S. trust (other than a grantor trust), the U.S. trust and not the beneficiaries of the trust.

See Pub. 515 for more information on providing a Form W-9 or a certification of non-foreign status to avoid withholding.

Foreign person. If you are a foreign person or the U.S. branch of a foreign bank that has elected to be treated as a U.S. person (under Regulations section 1.1441-1(b)(2)(iv) or other applicable section for chapter 3 or 4 purposes), do not use Form W-9. Instead, use the appropriate Form W-8 or Form 8233 (see Pub. 515). If you are a qualified foreign pension fund under Regulations section 1.897(l)-1(d), or a partnership that is wholly owned by qualified foreign pension funds, that is treated as a non-foreign person for purposes of section 1445 withholding, do not use Form W-9. Instead, use Form W-8EXP (or other certification of non-foreign status).

Nonresident alien who becomes a resident alien. Generally, only a nonresident alien individual may use the terms of a tax treaty to reduce or eliminate U.S. tax on certain types of income. However, most tax treaties contain a provision known as a saving clause. Exceptions specified in the saving clause may permit an exemption from tax to continue for certain types of income even after the payee has otherwise become a U.S. resident alien for tax purposes.

If you are a U.S. resident alien who is relying on an exception contained in the saving clause of a tax treaty to claim an exemption from U.S. tax on certain types of income, you must attach a statement to Form W-9 that specifies the following five items.

1. The treaty country. Generally, this must be the same treaty under which you claimed exemption from tax as a nonresident alien.
2. The treaty article addressing the income.
3. The article number (or location) in the tax treaty that contains the saving clause and its exceptions.
4. The type and amount of income that qualifies for the exemption from tax.
5. Sufficient facts to justify the exemption from tax under the terms of the treaty article.

Example. Article 20 of the U.S.-China income tax treaty allows an exemption from tax for scholarship income received by a Chinese student temporarily present in the United States. Under U.S. law, this student will become a resident alien for tax purposes if their stay in the United States exceeds 5 calendar years. However, paragraph 2 of the first Protocol to the U.S.-China treaty (dated April 30, 1984) allows the provisions of Article 20 to continue to apply even after the Chinese student becomes a resident alien of the United States. A Chinese student who qualifies for this exception (under paragraph 2 of the first Protocol) and is relying on this exception to claim an exemption from tax on their scholarship or fellowship income would attach to Form W-9 a statement that includes the information described above to support that exemption.

If you are a nonresident alien or a foreign entity, give the requester the appropriate completed Form W-8 or Form 8233.

Backup Withholding

What is backup withholding? Persons making certain payments to you must under certain conditions withhold and pay to the IRS 24% of such payments. This is called "backup withholding." Payments that may be subject to backup withholding include, but are not limited to, interest, tax-exempt interest, dividends, broker and barter exchange transactions, rents, royalties, nonemployee pay, payments made in settlement of payment card and third-party network transactions, and certain payments from fishing boat operators. Real estate transactions are not subject to backup withholding.

You will not be subject to backup withholding on payments you receive if you give the requester your correct TIN, make the proper certifications, and report all your taxable interest and dividends on your tax return.

Payments you receive will be subject to backup withholding if:

1. You do not furnish your TIN to the requester;
2. You do not certify your TIN when required (see the instructions for Part II for details);
3. The IRS tells the requester that you furnished an incorrect TIN;
4. The IRS tells you that you are subject to backup withholding because you did not report all your interest and dividends on your tax return (for reportable interest and dividends only); or
5. You do not certify to the requester that you are not subject to backup withholding, as described in item 4 under "*By signing the filledout form*" above (for reportable interest and dividend accounts opened after 1983 only).

Certain payees and payments are exempt from backup withholding. See *Exempt payee code*, later, and the separate Instructions for the Requester of Form W-9 for more information.

See also *Establishing U.S. status for purposes of chapter 3 and chapter 4 withholding*, earlier.

What Is FATCA Reporting?

The Foreign Account Tax Compliance Act (FATCA) requires a participating foreign financial institution to report all U.S. account holders that are specified U.S. persons. Certain payees are exempt from FATCA reporting. See *Exemption from FATCA reporting code*, later, and the Instructions for the Requester of Form W-9 for more information.

Updating Your Information

You must provide updated information to any person to whom you claimed to be an exempt payee if you are no longer an exempt payee and anticipate receiving reportable payments in the future from this person. For example, you may need to provide updated information if you are a C corporation that elects to be an S corporation, or if you are no longer tax exempt. In addition, you must furnish a new Form W-9 if the name or TIN changes for the account, for example, if the grantor of a grantor trust dies.

Penalties

Failure to furnish TIN. If you fail to furnish your correct TIN to a requester, you are subject to a penalty of $50 for each such failure unless your failure is due to reasonable cause and not to willful neglect.

Civil penalty for false information with respect to withholding. If you make a false statement with no reasonable basis that results in no backup withholding, you are subject to a $500 penalty.

Criminal penalty for falsifying information. Willfully falsifying certifications or affirmations may subject you to criminal penalties including fines and/or imprisonment.

Misuse of TINs. If the requester discloses or uses TINs in violation of federal law, the requester may be subject to civil and criminal penalties.

Specific Instructions

Line 1

You must enter one of the following on this line; **do not** leave this line blank. The name should match the name on your tax return.

If this Form W-9 is for a joint account (other than an account maintained by a foreign financial institution (FFI)), list first, and then circle, the name of the person or entity whose number you entered in Part I of Form W-9. If you are providing Form W-9 to an FFI to document a joint account, each holder of the account that is a U.S. person must provide a Form W-9.

- **Individual.** Generally, enter the name shown on your tax return. If you have changed your last name without informing the Social Security Administration (SSA) of the name change, enter your first name, the last name as shown on your social security card, and your new last name. **Note for ITIN applicant:** Enter your individual name as it was entered on your Form W-7 application, line 1a. This should also be the same as the name you entered on the Form 1040 you filed with your application.
- **Sole proprietor.** Enter your individual name as shown on your Form 1040 on line 1. Enter your business, trade, or "doing business as" (DBA) name on line 2.
- **Partnership, C corporation, S corporation, or LLC, other than a disregarded entity.** Enter the entity's name as shown on the entity's tax return on line 1 and any business, trade, or DBA name on line 2.
- **Other entities.** Enter your name as shown on required U.S. federal tax documents on line 1. This name should match the name shown on the charter or other legal document creating the entity. Enter any business, trade, or DBA name on line 2.
- **Disregarded entity.** In general, a business entity that has a single owner, including an LLC, and is not a corporation, is disregarded as an entity separate from its owner (a disregarded entity). See Regulations section 301.7701-2(c)(2). A disregarded entity should check the appropriate box for the tax classification of its owner. Enter the owner's name on line 1. The name of the owner entered on line 1 should never be a disregarded entity. The name on line 1 should be the name shown on the income tax return on which the income should be reported. For example, if a foreign LLC that is treated as a disregarded entity for U.S. federal tax purposes has a single owner that is a U.S. person, the U.S. owner's name is required to be provided on line 1. If the direct owner of the entity is also a disregarded entity, enter the first owner that is not disregarded for federal tax purposes. Enter the disregarded entity's name on line 2. If the owner of the disregarded entity is a foreign person, the owner must complete an appropriate Form W-8 instead of a Form W-9. This is the case even if the foreign person has a U.S. TIN.

Line 2

If you have a business name, trade name, DBA name, or disregarded entity name, enter it on line 2.

Line 3a

Check the appropriate box on line 3a for the U.S. federal tax classification of the person whose name is entered on line 1. Check only one box on line 3a.

IF the entity/individual on line 1 is a(n) . . .	THEN check the box for . . .
• Corporation	Corporation.
• Individual or • Sole proprietorship	Individual/sole proprietor.

• LLC classified as a partnership for U.S. federal tax purposes or • LLC that has filed Form 8832 or 2553 electing to be taxed as a corporation	Limited liability company and enter the appropriate tax classification: P = Partnership, C = C corporation, or S = S corporation.
• Partnership	Partnership.
• Trust/estate	Trust/estate.

Line 3b

Check this box if you are a partnership (including an LLC classified as a partnership for U.S. federal tax purposes), trust, or estate that has any foreign partners, owners, or beneficiaries, and you are providing this form to a partnership, trust, or estate, in which you have an ownership interest. You must check the box on line 3b if you receive a Form W-8 (or documentary evidence) from any partner, owner, or beneficiary establishing foreign status or if you receive a Form W-9 from any partner, owner, or beneficiary that has checked the box on line 3b.

Note: A partnership that provides a Form W-9 and checks box 3b may be required to complete Schedules K-2 and K-3 (Form 1065). For more information, see the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

If you are required to complete line 3b but fail to do so, you may not receive the information necessary to file a correct information return with the IRS or furnish a correct payee statement to your partners or beneficiaries. See, for example, sections 6698, 6722, and 6724 for penalties that may apply.

Line 4 Exemptions

If you are exempt from backup withholding and/or FATCA reporting, enter in the appropriate space on line 4 any code(s) that may apply to you.

Exempt payee code.

- Generally, individuals (including sole proprietors) are not exempt from backup withholding.
- Except as provided below, corporations are exempt from backup withholding for certain payments, including interest and dividends.
- Corporations are not exempt from backup withholding for payments made in settlement of payment card or third-party network transactions.
- Corporations are not exempt from backup withholding with respect to attorneys' fees or gross proceeds paid to attorneys, and corporations that provide medical or health care services are not exempt with respect to payments reportable on Form 1099-MISC.

The following codes identify payees that are exempt from backup withholding. Enter the appropriate code in the space on line 4.

1—An organization exempt from tax under section 501(a), any IRA, or a custodial account under section 403(b)(7) if the account satisfies the requirements of section 401(f)(2).

2—The United States or any of its agencies or instrumentalities.

3—A state, the District of Columbia, a U.S. commonwealth or territory, or any of their political subdivisions or instrumentalities.

4—A foreign government or any of its political subdivisions, agencies, or instrumentalities.

5—A corporation.

6—A dealer in securities or commodities required to register in the United States, the District of Columbia, or a U.S. commonwealth or territory.

7—A futures commission merchant registered with the Commodity Futures Trading Commission.

8—A real estate investment trust.

9—An entity registered at all times during the tax year under the Investment Company Act of 1940.

10—A common trust fund operated by a bank under section 584(a).

11—A financial institution as defined under section 581. 12—A middleman known in the investment community as a nominee or custodian.

13—A trust exempt from tax under section 664 or described in section 4947.

The following chart shows types of payments that may be exempt from backup withholding. The chart applies to the exempt payees listed above, 1 through 13.

IF the payment is for . . .	THEN the payment is exempt for . . .
• Interest and dividend payments	All exempt payees except for 7.
• Broker transactions	Exempt payees 1 through 4 and 6 through 11 and all C corporations. S corporations must not enter an exempt payee code because they are exempt only for sales of noncovered securities acquired prior to 2012.
• Barter exchange transactions and patronage dividends	Exempt payees 1 through 4.
• Payments over $600 required to be reported and direct sales over $5,000[1]	Generally, exempt payees 1 through 5.[2]
• Payments made in settlement of payment card or third-party network transactions	Exempt payees 1 through 4.

[1] See Form 1099-MISC, Miscellaneous Information, and its instructions.

[2] However, the following payments made to a corporation and reportable on Form 1099-MISC are not exempt from backup withholding: medical and health care payments, attorneys' fees, gross proceeds paid to an attorney reportable under section 6045(f), and payments for services paid by a federal executive agency. **Exemption from FATCA reporting code.** The following codes identify payees that are exempt from reporting under FATCA. These codes apply to persons submitting this form for accounts maintained outside of the United States by certain foreign financial institutions. Therefore, if you are only submitting this form for an account you hold in the United States, you may leave this field blank. Consult with the person requesting this form if you are uncertain if the financial institution is subject to these requirements. A requester may indicate that a code is not required by providing you with a Form W-9 with "Not Applicable" (or any similar indication) entered on the line for a FATCA exemption code. A—An organization exempt from tax under section 501(a) or any individual retirement plan as defined in section 7701(a)(37).

B—The United States or any of its agencies or instrumentalities. C—A state, the District of Columbia, a U.S. commonwealth or territory, or any of their political subdivisions or instrumentalities.

D—A corporation the stock of which is regularly traded on one or more established securities markets, as described in Regulations section 1.1472-1(c)(1)(i).

E—A corporation that is a member of the same expanded affiliated group as a corporation described in Regulations section 1.1472-1(c)(1)(i).

F—A dealer in securities, commodities, or derivative financial instruments (including notional principal contracts, futures, forwards, and options) that is registered as such under the laws of the United States or any state.

G—A real estate investment trust.

H—A regulated investment company as defined in section 851 or an entity registered at all times during the tax year under the Investment Company Act of 1940.

I—A common trust fund as defined in section 584(a).

J—A bank as defined in section 581.

K—A broker.

L—A trust exempt from tax under section 664 or described in section 4947(a)(1).

M—A tax-exempt trust under a section 403(b) plan or section 457(g) plan.

Note: You may wish to consult with the financial institution requesting this form to determine whether the FATCA code and/or exempt payee code should be completed.

Line 5

Enter your address (number, street, and apartment or suite number). This is where the requester of this Form W-9 will mail your information returns. If this address differs from the one the requester already has on file, enter "NEW" at the top. If a new address is provided, there is still a chance the old address will be used until the payor changes your address in their records.

Line 6

Enter your city, state, and ZIP code.

Part I. Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. If you are a resident alien and you do not have, and are not eligible to get, an SSN, your TIN is your IRS ITIN. Enter it in the entry space for the Social security number. If you do not have an ITIN, see *How to get a TIN* below.

If you are a sole proprietor and you have an EIN, you may enter either your SSN or EIN.

If you are a single-member LLC that is disregarded as an entity separate from its owner, enter the owner's SSN (or EIN, if the owner has one). If the LLC is classified as a corporation or partnership, enter the entity's EIN.

Note: See *What Name and Number To Give the Requester*, later, for further clarification of name and TIN combinations.

How to get a TIN. If you do not have a TIN, apply for one immediately. To apply for an SSN, get Form SS-5, Application for a Social Security Card, from your local SSA office or get this form online at *www.SSA.gov*. You may also get this form by calling 800-772-1213. Use Form W-7, Application for IRS Individual Taxpayer Identification Number, to apply for an ITIN, or Form SS-4, Application for Employer Identification Number, to apply for an EIN. You can apply for an EIN online by accessing the IRS website at *www.irs.gov/EIN*. Go to *www.irs.gov/Forms* to view, download, or print Form W-7 and/or Form SS-4. Or, you can go to *www.irs.gov/OrderForms* to place an order and have Form W-7 and/or Form SS-4 mailed to you within 15 business days.

If you are asked to complete Form W-9 but do not have a TIN, apply for a TIN and enter "Applied For" in the space for the TIN, sign and date the form, and give it to the requester. For interest and dividend payments, and certain payments made with respect to readily tradable instruments, you will generally have 60 days to get a TIN and give it to the requester before you are subject to backup withholding on payments. The 60-day rule does not apply to other types of payments. You will be subject to backup withholding on all such payments until you provide your TIN to the requester.

Note: Entering "Applied For" means that you have already applied for a TIN or that you intend to apply for one soon. See also *Establishing U.S. status for purposes of chapter 3 and chapter 4 withholding*, earlier, for when you may instead be subject to withholding under chapter 3 or 4 of the Code.

Caution: A disregarded U.S. entity that has a foreign owner must use the appropriate Form W-8.

Part II. Certification

To establish to the withholding agent that you are a U.S. person, or resident alien, sign Form W-9. You may be requested to sign by the withholding agent even if item 1, 4, or 5 below indicates otherwise.

For a joint account, only the person whose TIN is shown in Part I should sign (when required). In the case of a disregarded entity, the person identified on line 1 must sign. Exempt payees, see *Exempt payee code*, earlier.

Signature requirements. Complete the certification as indicated in items 1 through 5 below.

1. Interest, dividend, and barter exchange accounts opened before 1984 and broker accounts considered active during 1983. You must give your correct TIN, but you do not have to sign the certification.

2. Interest, dividend, broker, and barter exchange accounts opened after 1983 and broker accounts considered inactive during 1983. You must sign the certification or backup withholding will apply. If you are subject to backup withholding and you are merely providing your correct TIN to the requester, you must cross out item 2 in the certification before signing the form.

3. Real estate transactions. You must sign the certification. You may cross out item 2 of the certification.

4. Other payments. You must give your correct TIN, but you do not have to sign the certification unless you have been notified that you have previously given an incorrect TIN. "Other payments" include payments made in the course of the requester's trade or business for rents, royalties, goods (other than bills for merchandise), medical and health care services (including payments to corporations), payments to a nonemployee for services, payments made in settlement of payment card and third-party network transactions, payments to certain fishing boat crew members and fishermen, and gross proceeds paid to attorneys (including payments to corporations).

5. Mortgage interest paid by you, acquisition or abandonment of secured property, cancellation of debt, qualified tuition program payments (under section 529), ABLE accounts (under section 529A), IRA, Coverdell ESA, Archer MSA or HSA contributions or distributions, and pension distributions. You must give your correct TIN, but you do not have to sign the certification.

What Name and Number To Give the Requester

For this type of account:	Give name and SSN of:
1. Individual	The individual
2. Two or more individuals (joint account) other than an account maintained by an FFI	The actual owner of the account or, if combined funds, the first individual on the account[1]
3. Two or more U.S. persons (joint account maintained by an FFI)	Each holder of the account
4. Custodial account of a minor (Uniform Gift to Minors Act)	The minor[2]
5. a. The usual revocable savings trust (grantor is also trustee)	The grantor-trustee[1]
b. So-called trust account that is not a legal or valid trust under state law	The actual owner[1]
6. Sole proprietorship or disregarded entity owned by an individual	The owner[3]
7. Grantor trust filing under Optional Filing Method 1 (see Regulations section 1.671-4(b)(2)(i)(A))**	The grantor*
For this type of account:	**Give name and EIN of:**
8. Disregarded entity not owned by an individual	The owner
9. A valid trust, estate, or pension trust	Legal entity[4]
10. Corporation or LLC electing corporate status on Form 8832 or Form 2553	The corporation
11. Association, club, religious, charitable, educational, or other tax-exempt organization	The organization
12. Partnership or multi-member LLC	The partnership
13. A broker or registered nominee	The broker or nominee
14. Account with the Department of Agriculture in the name of a public entity (such as a state or local government, school district, or prison) that receives agricultural program payments	The public entity
15. Grantor trust filing Form 1041 or under the Optional Filing Method 2, requiring Form 1099 (see Regulations section 1.671-4(b)(2)(i)(B))**	The trust

[1] List first and circle the name of the person whose number you furnish. If only one person on a joint account has an SSN, that person's number must be furnished.

[2] Circle the minor's name and furnish the minor's SSN.

[3] You must show your individual name on line 1, and enter your business or DBA name, if any, on line 2. You may use either your SSN or EIN (if you have one), but the IRS encourages you to use your SSN.

[4] List first and circle the name of the trust, estate, or pension trust. (Do not furnish the TIN of the personal representative or trustee unless the legal entity itself is not designated in the account title.) * **Note:** The grantor must also provide a Form W-9 to the trustee of the trust.

** For more information on optional filing methods for grantor trusts, see the Instructions for Form 1041.

Note: If no name is circled when more than one name is listed, the number will be considered to be that of the first name listed.

Secure Your Tax Records From Identity Theft

Identity theft occurs when someone uses your personal information, such as your name, SSN, or other identifying information, without your permission to commit fraud or other crimes. An identity thief may use your SSN to get a job or may file a tax return using your SSN to receive a refund.

To reduce your risk:

- Protect your SSN,
- Ensure your employer is protecting your SSN, and
- Be careful when choosing a tax return preparer.

If your tax records are affected by identity theft and you receive a notice from the IRS, respond right away to the name and phone number printed on the IRS notice or letter.

If your tax records are not currently affected by identity theft but you think you are at risk due to a lost or stolen purse or wallet, questionable credit card activity, or a questionable credit report, contact the IRS Identity Theft Hotline at 800-908-4490 or submit Form 14039.

For more information, see Pub. 5027, Identity Theft Information for Taxpayers.

Victims of identity theft who are experiencing economic harm or a systemic problem, or are seeking help in resolving tax problems that have not been resolved through normal channels, may be eligible for Taxpayer Advocate Service (TAS) assistance. You can reach TAS by calling the TAS toll-free case intake line at 877-777-4778 or TTY/TDD 800-829-4059.

Protect yourself from suspicious emails or phishing schemes. Phishing is the creation and use of email and websites designed to mimic legitimate business emails and websites. The most common act is sending an email to a user falsely claiming to be an established legitimate enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft.

The IRS does not initiate contacts with taxpayers via emails. Also, the IRS does not request personal detailed information through email or ask taxpayers for the PIN numbers, passwords, or similar secret access information for their credit card, bank, or other financial accounts. If you receive an unsolicited email claiming to be from the IRS, forward this message to *phishing@irs.gov*. You may also report misuse of the IRS name, logo, or other IRS property to the Treasury Inspector General for Tax Administration (TIGTA) at 800-366-4484. You can forward suspicious emails to the Federal Trade Commission at *spam@uce.gov* or report them at *www.ftc.gov/complaint*. You can contact the FTC at *www.ftc.gov/idtheft* or 877-IDTHEFT (877-438-4338). If you have been the victim of identity theft, see *www.IdentityTheft.gov* and Pub. 5027.

Go to *www.irs.gov/IdentityTheft* to learn more about identity theft and how to reduce your risk.

Privacy Act Notice

Section 6109 of the Internal Revenue Code requires you to provide your correct TIN to persons (including federal agencies) who are required to file information returns with the IRS to report interest, dividends, or certain other income paid to you; mortgage interest you paid; the acquisition or abandonment of secured property; the cancellation of debt; or contributions you made to an IRA, Archer MSA, or HSA. The person collecting this form uses the information on the form to file information returns with the IRS, reporting the above information. Routine uses of this information include giving it to the Department of Justice for civil and criminal litigation and to cities, states, the District of Columbia, and U.S. commonwealths and territories for use in administering their laws. The information may also be disclosed to other countries under a treaty, to federal and state agencies to enforce civil and criminal laws, or to federal law enforcement and intelligence agencies to combat terrorism. You must provide your TIN whether or not you are required to file a tax return. Under section 3406, payors must generally withhold a percentage of taxable interest, dividends, and certain other payments to a payee who does not give a TIN to the payor. Certain penalties may also apply for providing false or fraudulent information.

EXHIBIT "D"

Conditional Federal/Grant-Funded Contract Addendum

(Place Conditional Federal/Grant-Funded Contract Addendum behind this page)

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

Federal/Grant Program: [insert]
Federal Awarding Agency: [insert]
Pass-Through Entity: [insert, if applicable]
Assistance Listing Number: [insert, if applicable]
Federal Award Identification Number: [insert, if applicable]
Award or Disaster Declaration Date: [insert, if applicable]
Project Number: [insert]
Special Award Conditions: [insert or attach]

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Authorize the City Manager to execute a Services Agreement with See Dive LLC for Commercial Diving Services in the amount not to exceed $50,000 annually.

Action Request: Motion to authorize the City Manager to execute a Services Agreement with See Dive LLC for Commercial Diving Services in the amount not to exceed $50,000 annually.

Strategic Objective: Reliable Infrastructure

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Bid (RFB) for qualified full-service commercial diving Contractors with experience in a wide range of applications. Eleven (11) responsive sealed bids were received on April 8, 2026. Dive-Tech International Inc., Free Agent Marine LLC, and See Dive LLC, were determined to be the lowest responsive and responsible bidders meeting all City qualification requirements.

The contract provides not-to-exceed unit prices for a qualified dive team, and all related diving equipment required to assist the City of St. Pete Beach with the cleaning, inspection, repair and maintenance of tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads. Services include:

- Debris Removal from Valve, Pipe, Endwalls, and Pit
- Marine Growth Removal from Valve, Pipe, Endwalls, and Pit
- Maintenance of Manatee Grates
- Written and Video Reports of condition per cycle
- Repair and Replacement of in-line and outfall-end type Tidal Check Valves
- Hydraulic Dredging

Work will be issued by task order on an as-needed

basis, in an amount not to exceed $50,000 per year, subject to budgeted funds.

The initial agreement term is three (3) years, with up to two (2) additional one (1) year renewal options upon mutual agreement and annual appropriation.

Funding: 403.5380.546000 – Stormwater R&M Equipment ($287,996.80 remaining balance)

401.5350.546000 – Wastewater R&M Equipment ($102,791.25 remaining balance)

Attachments: 1. SEE DIVE LLC Agreement Signed

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Commercial Diving Services

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and (**SEE DIVE L.L.C. (D.B.A.) Underwater Asset Management**). (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Bids, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its June 23, 2026, public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed $50,000.

b. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

c. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

d. Contractor must comply with any and all Federal, State, and local laws and regulations now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

e. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.

a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of (3) three years with (2) two, (1) one-year extensions from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement..

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured

and providing coverage up through and including the final performance of any services provided herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved,

and any amount withheld is not subject to payment of interest by the City. The above provisions will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:

a. Standard Contract Addendum (Exhibit "A")
b. Request for Bid/Proposal (Exhibit "B")

c. Vendor Bid/Proposal (Exhibit "C")
d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:

21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on

behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Form Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this _____ day of _____, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and _____, hereinafter referred to as "Contractor", concerning that certain agreement dated the ____ day of _____, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian
cityclerk@stpetebeach.org

Phone: 727-363-9220
155 Corey Avenue
St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

Commercial Diving Services

Issued 3/27/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **9:30 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 2 includes:

Questions and Answers

Questions and Answers:

1. Can you advise company licensing requirements - specifically that a Licensed Specialty Marine Contractor registered through the Florida DBPR is required for Award of this contract? Not required.

2. ADCI Consensus Standards Edition 6.5 for commercial dive operations is the safe standard adopted by the USCG and many agencies for underwater work. Will this standard be enforced for the services outlined in this solicitation? All diving operations shall comply with OSHA Commercial Diving Operations (29 CFR 1910 Subpart T). Diving operations shall also conform to ADCI Consensus Standards (latest edition) or an equivalent nationally recognized commercial diving standard, such as USACE EM 385-1-1, where applicable.

The meeting was called to order at 9:33 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:

- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 9:30AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills summarized that this project will be for a maintenance contract managed by the City's operations team, with a goal to have on-call service for commercial diving.

There being no questions, the meeting was adjourned at 9:38 AM.

Questions and Answers:

1. Does this project require that the bidder hold a FL State General Contractor License? NO

2. Please provide the direct link for bid submission.
https://stpetebeach.bonfirehub.com/portal/?tab=openOpportunities

3. Can you please provide exact locations of the areas where the scheduled work is to be completed. Please see attached maps.

4. Can you please provide engineered drawings and associated structures where the dive team will work on the grates, valves, pipelines, etc… Please see link below.

5. Can the City clarify whether a Florida Certified or Registered Contractor's License is required for this contract, specifically for repair or replacement of tidal check valves, or if this work is considered maintenance under this RFB? Not required. Work is considered maintenance.

6. Can the City confirm that hydraulic dredging under this contract is limited to maintenance removal of sediment and does not include excavation or alteration of original design grade requiring contractor licensure? Yes, dredging under this contract is limited to maintenance removal of sediment.

7. Can the City provide clarification on how many locations require access by boat or barge versus land-based access, and whether work will typically be grouped to minimize mobilizations? Please see maps linked below; Majority of locations are accessible by land. Work will be grouped to minimize mobilizations.

8. Can the City confirm whether remotely operated vehicles (ROV) or sonar-based inspection methods may be utilized as a supplement to diver inspections, where appropriate, to enhance safety, efficiency, and documentation quality? Yes, that's acceptable.

9. Can the City provide a detailed asset list or map identifying the locations, approximate depths, pipe diameters, and typical conditions of the tide check valves, manatee grates, and outfalls included in this contract? Additionally, are any prior inspection reports or videos available for reference? See attached.

I. CONTRACTOR'S BID SUBMITTAL

The company that is submitting a bid declares that it has extensive experience in **Commercial Diving Services.**

The undersigned, as Bidder, hereby declares that the only person or persons interested in the Bid as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Bid or in the Agreement to be entered into; that this Bid or Agreement is made without connection with any other person, company, or parties making a Bid; and that it is in all respects fair and in good faith without collusion or fraud.

The Bidder further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of bids; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Bidder proposes and agrees, if the Bid is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Commercial Diving Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful bidder shall be required to utilize the template Agreement in this Request for Bids (RFB) and any questions regarding the Agreement must be addressed during the RFB process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Bidder proposes to furnish all materials, equipment, labor, and perform the work submitted in their bid schedule for the City of St. Pete Beach **" Commercial Diving Services".**

III. GENERAL CONTRACT TERMS

REQUEST FOR BID

The City of St. Pete Beach is submitting this RFB for bids on the Commercial Diving Services.

LOCATIONS

The City of St. Pete Beach is soliciting bids from qualified Commercial Diving Services for the City.

BID SUBMITTALS

Bid documents must include a signed/notarized Contractor's Bid Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit one electronic bid via Bonfire.

BIDDER INFORMATION

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http:// www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

PRE-BID MEETING

An optional pre-bid meeting will be held on **03/18/2026 at 9:30 AM EST** via Microsoft Teams Video conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and Microsoft Teams Meeting instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS

No oral interpretations will be made to any firms as to the meaning of the scope of work or any other contract documents included in this **RFB.** All questions pertaining to the terms and conditions or scope of work of this Request for Bid **(RFB)** must be sent in writing only via email to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 EST on 03/25/2026**. Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFB**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFB** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so.

BID PACKAGES

Sealed bids will be accepted by the City until **04/08/2026** at **9:00 AM** EST (Deadline). No bids shall be accepted by the City after this deadline – NO EXCEPTIONS. Bid Packages must be electronically submitted via Bonfire Clearly marked as: "**Commercial Dive Services**." If a link is needed for either site, please contact the Procurement Manager (purchasing@stpetebeach.org.) All Bidders are invited to attend this bid opening.

E-mail - purchasing@stpetebeach.org

SCOPE OF WORK

The City of St. Pete Beach is seeking a qualified full service commercial diving Contractor with experience in a wide range of applications. The Contractor shall provide a qualified dive team, and all related diving equipment required to assist the City of St. Pete Beach with the cleaning, inspection, repair and maintenance of tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads.

The City of St. Pete Beach has 35 tide check valves, and 25 manatee grates installed at stormwater outfalls throughout the City. Services shall include:

- Debris Removal from Valve, Pipe, Endwalls, and Pit
- Marine Growth Removal from Valve, Pipe, Endwalls, and Pit
- Maintenance of Manatee Grates, when present
- Written and Video Reports of condition per cycle
- Repair and Replacement of in-line and outfall-end type Tidal Check Valves
- Hydraulic Dredging

Services must comply with relevant standards and regulations, including OSHA diving regulations and any applicable environmental guidelines.

CONTRACTOR TO FURNISH

- A Qualified Dive Team
- All Related Diving Equipment
- Underwater Video with Digital Capture
- Shallow Water Dive Package
- Small Pneumatic Tool
- Work Boat / Barge
- Hydraulic Unit
- 4-inch Hydraulic Submersible Pump
- Jet Pump
- 4000 PSI Water Blaster
- Digital Camera

THE CITY OF ST. PETE BEACH TO FURNISH

- A Representative to Coordinate Activities
- A Representative to View Video Real Time and Direct the Crew
- Access to Work Site
- Permits (If required)
- Assist with Lock-Out Tag-Out procedures (training or supervision as needed)
- Procurement of Tidal Check Valves (as needed)

SCHEDULE

Maintenance, cleaning and inspection shall be scheduled per occurrence and may include the full asset inventory or a portion of that inventory for each cycle. Maintenance cycles are to be performed quarterly, or more frequently as-needed, based on City requirements.

Tidal check valve, manatee grate, and other miscellaneous outfall repairs shall be scheduled per occurrence, as-needed.

The Contractor must provide at least 72 hours' notice for scheduling changes. Emergency response for unscheduled maintenance requests must be available within 24 hours.

PERFORMANCE METRICS

The following performance metrics will be used to evaluate the Contractor's work:

- Timeliness of completing tasks as per the agreed schedule.
- Accuracy and thoroughness of written condition reports.
- Compliance with safety standards and regulations.
- Responsiveness to unscheduled maintenance requests.

All reports must be submitted in a digital format (PDF or Word) within ten (10) days of completing each maintenance cycle. Reports should include:

- Detailed descriptions of completed tasks.
- Photographic and video evidence.
- Identified issues and recommendations for future maintenance.

PENALTIES

Failure to adhere to the schedule or meet performance standards may result in penalties, including:

- 5% reduction in payment for delayed work (per day).
- Rework at Contractor's expense for substandard services.

EMERGENCY SERVICES

The Contractor must provide emergency maintenance services within 24 hours of the City's request. The bid form includes an emergency call-out fee to account for this service.

Once a contract is awarded, the selected vendor will be required to submit a detailed fee schedule outlining the main pay items for the project. This fee schedule will be reviewed at the pre-construction meeting and will be used to review pay applications and evaluate project progress.

DETAILED SPECIFICATIONS

LOCATIONS

The locations will cover all tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads Citywide that are City owned throughout the City of St. Pete Beach Florida.

Standard work hours shall be from 7:30 AM until 6:00 PM, Monday through Saturday. No work shall take place on Sundays or on official City holidays without prior approval by the City Manager or designee at least 1 week prior to the scheduled work. A list of current official City holidays can be found on the City's Human Resources website at http://www.stpetebeach.org/hr/holidays.html. Contractor will coordinate scheduling of work with the City's Project Manager and City's Inspector.

ADDITIONAL WORK DETAILS

Contractors or persons wishing to bid on this project are licensed, bondable and insured in accordance to the City's requirements. The Contractor will furnish all necessary labor, materials, tools, equipment and supplies to complete the scope of work. Bid must also include all costs for licenses, permits, and any material disposal fees.

Bidders shall bring questions, discrepancies, omissions, conflicts or doubt as to meaning of any part of Contract Documents to the attention of the City of St Pete Beach Procurement Manager at least ten (10) business days before bid submittal deadline. Clarification of intent of Contract Documents, if necessary, shall be made available to bidders in the form of an Addendum. Failure to request clarification of interpretation of Contract Documents shall not relieve bidders of their responsibilities to perform the work.

The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids, or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach.

STATEMENT OF WORK

The Contractor shall furnish and pay the cost, including sales tax and all other applicable taxes, licenses, permits and fees, of all the necessary materials not furnished by the City and shall furnish and pay for all the superintendence, labor, tools, equipment, transportation, and perform all the work required for the execution of all services listed in the Bidder's Proposal and Bid Form attached hereto and in strict accordance with the Plans, Specifications, and requirements of the City of St. Pete Beach which are attached hereto and made a part hereof, and any amendments thereto and such supplemental Plans and Specifications which may hereafter be approved.

BEGINNING DATE

The Contractor shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Contractor shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City. The Contractor must commence construction activities within thirty (30) business days of NTP to prepare and procure materials. Any change to the start date or the work schedule included with this bid must be submitted in writing to and approved by the City Manager or designee.

COMPLETION OF WORK

The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". The contract will be for (3) three years from time of execution (Date of last signature) of the contract with (2) additional (1) one year extensions if agreed upon by the City and vendor. .

EXAMINATION OF SITE

Bidders may visit specific areas with advanced notice.

ASSURANCES

The responding Contractor shall provide a statement of assurance that the Contractor is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

TRAFFIC CONTROL AND STAGING AREA

Contractor shall include all costs associated with vehicular and pedestrian traffic control and maintenance during the project. Contractor shall be responsible for providing a staging area. The location of this area must be approved by the City Manager or designee. The Contractor will be required to control the area including any additional fencing or barricades and Contractor will be responsible for the restoration of this and all other staging areas provided by the City.

ASSIGNMENT AND TRANSFER OF CONTRACT

The Contractor shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS

The Contractor shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PERFORMANCE PAYMENT BOND

Not required for this contract.

LIQUIDATED DAMAGES

If the work embraced by this Contract is not completed on or before the date set for completion or any extension thereof, the actual damages for the delay will be impossible to determine and in lieu thereof, the Contractor shall pay to the City fixed, agreed, and liquidated damages in the amount of either Five-Hundred Dollars ($500) per day for each calendar day of delay until the work is satisfactorily completed.

PAYMENT

Payment shall be made to the Contractor for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Contractor will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Contractor without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Contractor's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Contractor to make a change in the Work, and if the City and the Contractor do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the contractor shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Contractor believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, he shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Contractor first discovered the occurrence. The Contractor shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Contractor shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Contractor shall prepare bids detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Contractor's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Contractor's bids shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable bid will not justify an increase in Contract Amount or Contract Time. Contractor agrees that it shall give the City access to any and all of Contractor's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Contractor for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Contractor shall be at his expense without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Contractor or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Contractor bids or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to

be used shall be those used for the Contractor's costs, except that the term "Subcontractor" shall replace the term "Contractor," context permitting.

Changes in Contract Amount for extensions in Contract Time shall exclude costs that are unaffected or do not relate to the extension in Contract Time, such as: (a) operating costs of construction equipment assigned to the Work on a continuing basis, (b) operating costs and owned/rental costs of construction equipment (crane used for specific lifts, concrete pump used for specific pours, etc.), and (c) fully paid site facilities, tools, etc.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Contractor, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit. The out-of-pocket cost shall only include those direct costs which are needed to perform the work such as labor (including payroll taxes, fringe benefits, labor burden and workers' insurance), materials, equipment, and other incidental out-of-pocket construction costs directly involved in the work, including but not limited to small tools, expendables and material costs but shall not include project management or project supervisory costs unless the Change Order includes an increase in the Contract time.

In such case, the Contractor will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Contractor to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

To be eligible for consideration, the Contractor's written claim for a change in the Contract price, including claim(s) from sub-contractors, shall include an itemized cost breakdown with supporting data as described below:

A. <u>For labor</u>: Provide written documentation from the Contractor and Subcontractors or others as appropriate in the form of a detailed breakdown by each labor classification involved indicating the number of hours of Work involved and the hourly payroll rate applicable to each to substantiate the basis and amount of the direct labor cost. The direct labor cost may be increased to provide an allowance for indirect payroll costs (labor burden), such as payroll taxes, fringe benefits, and workers insurance after all premium discounts, rebates and other appropriate reductions have been taken.

B. <u>For material, supplies, equipment, furnishings, etc., to be installed or included in the Work</u>: Provide written documentation from the Contractor and Subcontractors, suppliers, etc., to substantiate the basis and amount of the various cost items involved. Material costs shall reflect the Contractor's reasonably anticipated net actual cost after consideration of trade discounts and volume rebates.

C. For construction equipment: Provide written documentation in the form of a detailed breakdown by each construction equipment category, indicating the applicable unit rates (i.e., dollar amount per hour, dollar amount per day etc.,) and the number of hours, days, etc. to substantiate the basis and amount of the construction equipment out-of-pocket costs.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Contractor (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Contractor employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

CITY'S RIGHT TO DIRECT PURCHASE

The City has reserved the right to purchase certain items and materials for this project directly in an effort to save applicable sales tax in compliance with Florida Law.

The City will issue purchase orders directly to the vendors supplying the equipment being directly purchased by the City for this project. Each Purchase Order will be accompanied by the City's Certificate of Exemption and a Certificate of Entitlement. All direct purchase vendor invoices will be issued to the City of St. Pete Beach, and the City will issue payment to each direct purchase vendor from City funds. The City will take title to the equipment at time of delivery from the vendor and will issue a separate Certificate of Entitlement for each purchase order.

The Contractor shall assist the City with receipt of materials furnished by the City in accordance with these Special Provisions including, but not limited to, verifying correct quantities, verifying documents of orders in a timely manner, providing and obtaining all warranties and guarantees required by the Contract Documents, assist with inspection of the goods at the time of delivery and notify the City immediately of any deficiencies noted. It is understood that the owner assumes the risk of damage or loss during the time that the building materials are physically stored at the job site prior to their installation or incorporation into the project. The Contractor shall coordinate with the City regarding the delivery schedules, sequence of delivery, loading orientation, and other arrangements normally required by the Contractor for the particular material furnished.

As City Furnished Materials are delivered to the job site and accepted by the City, the City shall notify the Contractor who will assist the City to visually inspect all shipments from the suppliers. The City will approve the vendor's invoice for material delivered upon adequate inspection and recommendation of the Contractor. The City shall assure that each delivery of City Furnished Materials is accompanied by documentation adequate to identify the Purchase Order against which the purchase is made and Contract Documents including but not limited to Contract, Plans, Specifications, and approved Shop Drawings. This documentation may consist of a delivery ticket, bill of lading and an invoice from the supplier conforming

to the Purchase Order together with such additional information as the City may deem necessary.

PAYMENTS FOR WORK COMPLETED

Partial payments will be made as the work progresses (if applicable) at the end of each calendar month, or as soon thereafter as practicable on estimates made by the City Manager or designee and as approved by the City, provided that the Contractor is performing the overall job in a diligent manner. In making partial payments, there shall be retained five percent (5%) on the amount of each estimate until final completion and acceptance of all work covered by the Contract. Upon completion and acceptance of the work, the City Manager or designee shall issue a certificate that the work has been completed and accepted by them under the conditions of the Contract and shall make and approve the final estimate of the work. The entire balance found to be due the Contractor, including that retained by the City, should be paid to the Contractor. Such payment shall be conditioned, however, upon the submission by the Contractor of evidence satisfactory to the City that all claims for labor, material, and any other outstanding indebtedness in connection with the Contract have been paid. Such payment shall also be conditioned upon approval and acceptance of the construction and improvements by the City.

If after the work has been substantially completed, full completion thereof is materially delayed through no fault of the Contractor and the City Manager or designee so certifies, the City shall upon the Certificate of the City Manager or designee, and without terminating the Contract make payment for the balance due for that portion of the work fully completed and accepted. Such payment shall be made under the terms and conditions governing final payment, except that it shall not constitute a waiver of claim. If such delay occurs and payment is made under this clause, the Contractor shall nevertheless be prepared to complete the work in a timely manner upon the remedy or removal of such delay, and shall be bound under this Contract for the completion of such work unless this Contract is otherwise terminated. All payments will be made in accordance with the Local Government Prompt Payment Act, Chapter 218, Florida Statutes.

PAYMENTS WITHHELD

The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Contractor to make payments properly to Subcontractors or for material or labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Contractor

f) Failure of the Contractor to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS

Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Contractor, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such

sums to the Contractor.

Before the approval of the final payment, the Contractor shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS

If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Contractor, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Contractor all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Contractor and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE

The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

INTENT OF PLANS AND SPECIFICATIONS

The Contractor shall keep on the job a copy of the Plans and Specifications and shall at any time give the City Manager or designee access thereto. Anything mentioned in the Specifications and not shown on the Plans or shown on the Plans and not mentioned in the Specifications, shall be of like effect as if shown or mentioned in both. The Contractor shall not take advantage of any errors, discrepancies or omissions that may exist in the Plans and Specifications but shall immediately call them to the attention of the City Manager or designee whose interpretation or correction thereof shall be conclusive. Should a conflict occur between the General Specifications and any Supplemental Specifications and/or Plans, the latter shall govern.

LICENSES AND PERMITS

The Contractor shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the contractor is responsible for non-compliance of all permit requirements, including all fines resulting from Contractor's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Contractor shall be

responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the contractor awarded the project, MUST also register their license with the City.

SUPERINTENDENCE

The Contractor shall constantly superintend all the work embraced in this Contract in person or by a responsible agent who shall have in writing, full authority to act for them and to carry out all the instructions given by the City Manager or designee.

LABOR PROVISIONS

The Contractor and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed.

INSURANCE

The Contractor shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Contractor's General Public Liability and Property Damage Insurance issued to the Contractor and protecting the Contractor from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Contractor or by any Subcontractor hired by the Contractor or anyone directly or indirectly employed by the Contractor or hired by the Contractor.

The successful Contractor shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Contractor or third party under the direction or control of the Contractor. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Contractor must furnish the City with Certificate of Insurance prior to commencement of work. An approved Certificate of Insurance furnished by the Contractor's carrier to guarantee the Contractor being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY

The Contractor shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Contractor shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Contractor shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Contractor will provide security on off days and holidays. The Contractor shall be responsible for all charges incurred with such action.

The Contractor shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Contractor, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Contractor shall also protect adjacent property as required by law.

PARKING

The Contractor shall arrange with City Manager or designee for temporary parking areas to accommodate construction personnel and construction equipment. Note that limited parking spaces are available in the City of St. Pete Beach. The Contractor will be asked to coordinate with the City's representative on site on a regular basis to minimize the impact on residents and visitors.

TRANSPORTATION, HANDLING AND STORAGE

The Contractor shall transport, handle, protect and store products in accordance with manufacturer's instructions and all environmental regulatory agencies.

VEHICLES

Business vehicles shall be identified on both sides with the name of the company.

ENVIRONMENTAL PROTECTION

It shall be the Contractor's responsibility to implement construction methods, best management practices, and erosion control methods that avoid water pollution as required by the State of Florida Department of Environmental Protection (FDEP), City of St. Pete Beach, and Pinellas County. Any Contractors in violation of the City of St. Pete Beach Regulations, Pinellas County Regulations, Florida Department of Environmental Protection Regulations, or any other regulatory agency regulations shall be the sole responsibility of the Contractor. The Contractor shall hold harmless the City of St. Pete Beach and the City Manager or designee from any fines and litigation resulting from the Contractor's actions. The Contractor shall pay all attorneys' fees, fines, penalties and any other such expenses resulting from the Contractor's actions. The Contractor shall provide all necessary measures to prevent any materials whatsoever from entering the waterway except for those materials, which are shown, on the plans as completed structures. The Contractor shall provide MSDS sheets to the City Manager or designee on all applicable materials before applying those materials. The Contractor shall secure the necessary education, certifications,

licenses and permits required by state and local agencies to operate and manage a construction site, including but not limited to, FDEP requirements related to Coastal Construction Control Line. The Contractor shall abide by all rules and regulations set forth and required by the City of St. Pete Beach's MS4 NPDES Permit.

TIMELY DEMAND FOR STAKES AND INSTRUCTIONS

The Contractor shall provide reasonable and necessary materials, opportunities, and assistance for setting stakes and making measurements, including the furnishing of a rodman, or a chainman at intermittent times during the construction period. They shall not proceed until they have received such stakes and instructions as may be necessary as the work progresses. The work shall be done in strict conformity with such stakes and instructions. The Contractor shall carefully preserve benchmarks, reference points and stakes, and in case of willful or careless destruction, they will be charged with the resulting expense and shall be responsible for any mistakes that may be caused by their unnecessary loss or disturbance.

WORKMANSHIP

The Contractor acknowledges that they have satisfied themselves as to the nature and location of the work; the general and local conditions including but not restricted to those bearing upon transportation, disposal, handling and storage of materials; availability of labor, water, electric power, roads; and uncertainties of weather, surface conditions, subsurface conditions, tides or similar physical conditions at the site, the character of equipment and facilities required to prosecute the work. Any failure by the Contractor to acquaint themselves with any aspect of the work or with any of the applicable conditions shall not relieve the Contractor from the responsibility to successfully perform the work under the Contract Documents, nor shall it be considered the basis for any claim for additional time or compensation.

UTILITIES

The Contractor shall anticipate all underground obstructions such as water lines, gas lines, sewer lines, utility lines, or any other public or private facilities and debris. In all cases where existing utility lines may be interfered with by the work, the Contractor shall give a minimum of thirty-six (36) hours' notice to the owners of such utilities, to permit them to relocate the lines prior to construction. No extra payment shall be allowed for the removal, replacement, repair or possible increased cost caused by underground obstructions. The location of existing structures and utilities provided in the plans are approximate only. Any damage to existing structures to remain or work of any kind shall be repaired or restored promptly by, and at the expense of the Contractor.

The Contractor shall at all times protect all desirable trees, plants, curbs, sidewalks, irrigation components, and structures not requiring removal to accomplish the work, whether or not they are shown on the plans. The Contractor must contact the City to obtain tree removal permits for the removal of any tree not identified for removal in the Project Plans.

In matters of restoration, all materials, construction, and workmanship shall be acceptable to, and approved by the City of St. Pete Beach and the City Manager or designee. No changes in size, shape, configuration, location, materials, or construction shall be made without prior written authorization from the City Manager or designee. Any demolition debris and other debris shall be hauled offsite and properly disposed of by the Contractor and shall be inclusive to the prices as stated in the BID SCHEDULE, unless otherwise stipulated as part of the project to remain.

No interruption of ingress and egress to private property shall be made unless the Contractor has made prior arrangements acceptable to the owner of the affected property. The City Manager or designee shall

notify affected residents/property owners of impending activity or inconvenience via door hanger.

The Contractor shall provide all traffic control devices utilized during construction and meet the requirements set forth in the Florida State Department of Transportation "Manual on Traffic Control and Safe Practices for Street and Highway Construction, Maintenance, and Utility Operations."

CLEANING UP

Upon completion or termination of the work the Contractor shall, as directed by the City Manager or designee, remove from the vicinity of the work all equipment and temporary structures, waste materials and rubbish resulting from his operations, leaving the premises in a neat and presentable condition. All debris generated by the Contractor will be removed before leaving the area. All areas will be raked to remove smaller debris. All surrounding sidewalks, parking lots and roadways will be cleared of any dust or debris generated by the Contractor. In the event of their failure to do so, the City at the expense of the Contractor may do the same, and their Surety shall be responsible.

DEFECTIVE WORK OR MATERIAL

The Contractor shall promptly remove from the premises all work and materials condemned by the City Manager or designee as failing to conform to the Contract, whether incorporated or not, and the Contractor shall promptly replace and re-execute his own work in accordance with the Contract and without expense to the City and shall bear the expense of making good all work of other Contractors destroyed or damaged by such removal or replacement.

If the Contractor does not remove such condemned work or materials within a reasonable time after notice, the City may remove them and store the materials at the expense of the Contractor. If the Contractor does not pay the expense of such removal within ten (10) business days' time thereafter, the City may, upon thirty (30) business days written notice sell such materials at auction or at private sale and shall account for the net proceeds thereof after deducting all the costs and expenses that should have been borne by the Contractor.

DISPUTE RESOLUTION

The Contract shall be construed under Florida law. The parties agree that all controversies, claims and other matters in question between the parties arising out of or relating to this Contract or its breach shall be resolved through mediation. Upon notice of any party to the Contract of a dispute, question or controversy, the parties shall agree to the appointment of a qualified mediator. A qualified mediator is a person who has received at least forty (40) hours of mediation training and has actual experience as a mediator in resolving contract disputes. If the dispute, question or controversy is not resolved through mediation within sixty (60) business days of a notice of the dispute between the parties, the City reserves the right to seek resolution through court action.

INDEMNIFICATION

In consideration of the payment of ten dollars ($10.00) as part of the above purchase price, Contractor shall indemnify, defend, and hold harmless the City, its officers and employees, from liabilities, damages, losses and costs, including but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the responding firm and any persons employed or utilized by the responding firm in the performance of the Contract.

GENERAL WARRANTY

Neither the final certificate nor any provision in the Contract Documents nor partial or entire occupancy of the premises by the City shall constitute an acceptance of work not done in accordance with the Contract Documents or relieve the Contractor of liability in respect to any express warranties or responsibility for faulty materials or workmanship. The Contractor shall remedy any defects in the work and pay for any damage to other work resulting therefrom that shall appear within a period of eighteen (18) months from the date of final acceptance of the work, unless a longer period is specified. The City shall give notice of observed defects with reasonable promptness.

LAND OF CITY, USE OF, BY CONTRACTOR

The City shall provide the land upon which the work under this Contract is to be done, and will, so far as is convenient, permit the Contractor to use as much of the land as is required for the erection of temporary construction facilities and storage of materials, together with the right of access to same, but beyond this, the Contractor shall provide, at his/her cost and expense, any additional land required. It will be the responsibility of the Contractor to repair or restore to the satisfaction of the City, at their own expense, any damage to land used for the above stated activities or any other activities approved by the City.

OTHER WORK

Wherever work being done by the City or by other Contractors is contiguous to work covered by this Contract, the respective rights of the various interests involved shall be established by the City Manager or designee to secure the completion of the various portions of the work in general harmony.

OTHER CONTRACTS

The City may award other Contracts. The Contractor shall fully cooperate with such other Contractors and carefully fit his/her own work to that provided under other Contracts, as may be with the performance of work by any other Contractor or City.

COOPERATIVE PURCHASING

Pursuant to their own governing laws and subject to the agreement of the Contractor, governmental entities may make purchases under the terms and conditions contained in the executed Contract, if agreed to by Contractor. Such purchases are independent of the Contract between the City and the Contractor, and the City is not a party to these transactions. Agencies seeking to make purchases under this Contract are required to follow the requirements of Rule 60A-1.045(5), F.A.C.

DELAYS AND EXTENSION OF TIME

If the Contractor should be delayed at any time in the progress of the work by an act or neglect of the City or the City Manager or designee, or of any employee of either, or by any separate Contractor employed by the City, or by changes ordered in the work, or by strike, lockouts, fire, unusual delay in transportation, unavoidable casualties, or any cases beyond the Contractor's control, or by delay authorized by the City Manager or designee, or by any cause which the City Manager or designee shall decide to justify the delay, then the time of completion shall be extended for such reasonable time as the City Manager or designee may decide. No such extension shall be made for a delay that occurs more than five (5) business days before a claim is made in writing to the City Manager or designee. In the case of a continued cause of delay, only

one (1) claim is necessary. This section does not exclude the recovery of damages for delay by either party under other provisions in the Contract Documents.

CITY'S RIGHT TO TAKE OVER THE WORK

If the Contractor shall be adjudged bankrupt, or if they should make a general assignment for the benefit of its creditors, or if a receiver should be appointed to take over their affairs, or if they should fail to prosecute their work with due diligence and carry the work forward in accordance with its' work schedule and the time limits set forth in the Contract Documents, or if they should fail to substantially perform one or more of the provisions of the Contact Documents to be performed by them, the City may serve written notice on the Contractor and the Surety on its' performance bond, stating the City's intention to exercise one of the remedies hereinafter set forth and the grounds upon which the City bases its right to exercise such remedy. In any event, unless the matter complained of is satisfactorily cleared within ten (10) business days after the service of such notice, the City may, without prejudice to any other right or remedy exercise one of such remedies at once; having first obtained a certificate from the City Manager or designee that such sufficient cause exists to justify such action.

The City may terminate the services of the Contractor, which termination shall take effect immediately upon service of notice thereof on the Contractor and their Surety, whereupon the Surety shall have the right to take over and perform the Contract. If the Surety does not commence performance of the Contract within ten (10) ten days after service of the notice of termination, the City may itself take over the work, take possession of and use all materials, tools, equipment, and appliances on the premises and prosecute the work to completion by such means as it shall deem best. In the event of such termination of their service, the Contractor shall not be entitled to any further payment under their Contract until the work is completed and accepted. If the City takes over the work and the unpaid Contract balance exceeds the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the excess unpaid Contract balance shall be paid to the Contractor. If the City takes over the work and the unpaid Contract balance does not exceed the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the Contractor and his Surety shall pay the difference to the City. The City Manager or designee shall certify such cost, expenses, and damages.

The City may take control of the work and either make good the deficiencies of the Contractor itself or direct the activities of the Contractor in doing so, employing such additional help as the City deems advisable. In such event, the City shall be entitled to collect from the Contractor and his Surety, or to deduct from any payment then or thereafter due the Contractor, the costs incurred by it through the default of the Contractor, provided the City Manager or designee approves the amount thus charged to the Contractor.

The City may require the Surety on the Contractor's bond to take control of the work at once and see to it that all deficiencies of the Contractor are made good with due diligence. As between the City and the Surety, the entire cost of making good such deficiencies shall be borne by the Surety. If the Surety takes over the work, either upon termination of the services of the Contractor or upon instructions from the City to do so, the provisions of the Contract Documents shall govern in respect to the work done by the Surety, the Surety being substituted for the Contractor as to such provisions, including provisions as to the payment for the work and provisions of this section as to the right of the City to do the work itself or to take control of the work.

RIGHT OF OCCUPANCY

The City shall have the right, if necessary, to take possession of and to use any completed or partially

completed portions of the work, if such use be approved by the City Manager or designee even if the time for completing the entire work or such portions of the work has not expired and even if the work has not been finally accepted. Such possession and use shall not constitute an acceptance of such possession and use if it materially interferes with the Contractor's operations. The City shall also have the right to enter the premises with the Contractor for the purpose of doing work not covered by its Contract.

ACCEPTANCE

Final inspection and acceptance of the work shall be made for the City by the City Manager or designee. Such inspection shall be made as soon as practical after the Contractor has notified the City in writing that the work is ready for such inspection.

WAIVER

It is expressly understood and agreed that any waiver granted by the City Manager or designee of any term, provision, or covenants of the Contract shall not constitute a precedent or breach of the same or any other terms, provisions, or covenants of the Contract. Neither the acceptance of the work by the City nor the payment of all or any part of the sum due the Contractor hereunder shall constitute a waiver by the City of any claim which the City may have against the Contractor or Surety under this Contract or otherwise.

INSPECTION

The City Manager or designee and his representative shall, at all times, have access to the work during its construction and shall be furnished with every reasonable facility for ascertaining that the stock and materials used and employed, and the workmanship, are in accordance with the requirements and intentions of the Plans. All work done and all materials furnished shall be subject to their inspection and approval by the City Manager or his designee. If any work should be covered up without approval or consent of City Manager or designee, it must, if required by the City Manager or designee, be uncovered for examination at the Contractor's expense.

The City Manager or designee may order re-examination of questioned work and if so ordered, the Contractor must uncover the work. If such work were found in accordance with the Contract Documents, the City shall pay the cost of re-examination and replacement. If such work be found not in accordance with the Contract Documents, the Contractor shall pay such costs unless they show that the defect in the work was caused by another Contractor, and in that event, the City shall pay such cost.

The inspection of the work shall not relieve the Contractor of any of their obligations to fulfill their Contract as prescribed, and defective work shall be made good and unsuitable materials shall be rejected, notwithstanding that such defective work and materials have been previously overlooked and accepted on estimates for payment. All work shall be tested to the satisfaction of the City Manager or designee before acceptance.

BID REVIEW AND CONTRACT AWARD

Failure to submit all documents requested at the time of bid may deem the Contractor's bid ineligible for award. The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach. The City shall be the sole final judge of qualifications of the bidder to perform service and reserves the exclusive right to accept or reject any bids as it deems to be in the best interests of the City. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS

The laws of the State of Florida do apply to any purchase made under this Request for Bid. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their bid and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Contractor agrees to comply with all applicable portions of Fla. Stat. 448.095. Contractor must use the U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Contractor shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Contractor with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Contractor shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Contractor must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Contractor's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Contractor may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and rebidding costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statue by the Contractor, the Contractor may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all bids, to waive irregularities and technicalities, and to request re-submission. If only one bid is received by the bid date and time listed, the bid may or may not be rejected by the City depending upon bid review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting bids. The City reserves the right to award the contract to a responsible proposer submitting a responsible bid, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, bidders, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFB during any phase of the bidding process. Failure to comply with the provision may result in disqualification of the bidder, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFB shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE

Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION

The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS

The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

IV. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization and telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the bidder's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of bidder to perform service and reserves the exclusive right to accept or reject any bid as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

V. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

   by: _____
   (Print individual's name and title)

   for: _____
   (Print name of entity submitting sworn statement)

   at: _____
   (Business address)

   and (if applicable), its Federal Employer Identification Number (FEIN):

   _____
   (FEIN)

   or, if the entity has no FEIN, include the Social Security Number:

   _____
   (SSN)

   by the individual signing this sworn statement:

   _____
   (Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any bid or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who

knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

Vendor Bid/Proposal

(Place Vendor's Bid/Proposal Behind this Page)

April 6, 2026

Subject: Commercial Diving Services RFB Submission – SEE DIVE L.L.C. (D.B.A.) Underwater Asset Management.

Underwater Asset Management is pleased to submit a bid in response to the City's Request for Bid for Commercial Diving Services.

Underwater Asset Management brings experience in underwater inspection, repair, and salvage operations, including vessel systems, structural inspections, and complex rigging support. Our team has experience supporting marine and municipal systems through underwater inspections, debris and marine growth removal, and repair of structural and mechanical components. We utilize live video feed and digital capture to provide clear documentation and support informed decision-making.

We understand the City's need for a reliable, responsive contractor to support ongoing maintenance of tide check valves, stormwater outfalls, and related infrastructure. Our approach emphasizes safety, efficiency, and clear communication, with all diving operations performed in accordance with OSHA Commercial Diving Operations (29 CFR 1910 Subpart T) and applicable industry standards.

Underwater Asset Management is prepared to support both scheduled maintenance activities and emergency response needs, and to coordinate closely with City staff to ensure work is completed effectively and in accordance with project requirements.

We appreciate the opportunity to submit and look forward to supporting the City of St. Pete Beach.

Sincerely,

Kevin Austin, President
Underwater Asset Management

I. CONTRACTOR'S BID SUBMITTAL

The company that is submitting a bid declares that it has extensive experience in **Commercial Diving Services.**

The undersigned, as Bidder, hereby declares that the only person or persons interested in the Bid as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Bid or in the Agreement to be entered into; that this Bid or Agreement is made without connection with any other person, company, or parties making a Bid; and that it is in all respects fair and in good faith without collusion or fraud.

The Bidder further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of bids; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Bidder proposes and agrees, if the Bid is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Commercial Diving Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful bidder shall be required to utilize the template Agreement in this Request for Bids (RFB) and any questions regarding the Agreement must be addressed during the RFB process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Bidder proposes to furnish all materials, equipment, labor, and perform the work submitted in their bid schedule for the City of St. Pete Beach **" Commercial Diving Services".**

SEE DIVE L.L.C. (D.B.A.) Underwater Asset Management – Capabilities Summary

Underwater Asset Management provides specialized commercial diving services focused on inspection, maintenance, and repair of subaqueous infrastructure. The company delivers safe, efficient, and well-documented underwater services aligned with municipal and marine system requirements.

Core capabilities include:

- Provision of qualified commercial dive teams and all necessary diving equipment to perform work safely and efficiently
- In-depth underwater inspections of stormwater outfalls, tide check valves, manatee grates, pipelines, piers, and structural components
- Live video feed to the surface with digital capture, allowing real-time observation and permanent documentation
- Preparation of written inspection reports, including photographic and video documentation, condition assessments, and maintenance recommendations
- Heavy cleaning of subaqueous structures, including debris removal and marine growth removal from valves, pipes, and structural elements
- Repair and maintenance of subaqueous infrastructure, including assistance with component replacement and system functionality restoration.
- Ability to support scheduled maintenance cycles as well as respond to emergency service requests within required timeframes.

All diving operations are conducted in accordance with OSHA Commercial Diving Operations (29 CFR 1910 Subpart T) and applicable industry standards, including ADCI Consensus Standards or equivalent.

Approach to Commercial Diving Services

Underwater Asset Management will provide responsive, safety-focused commercial diving services to support the City of St. Pete Beach's ongoing maintenance and inspection needs for stormwater outfalls, tide check valves, manatee grates, and associated infrastructure.

Understanding of Services

The requested services represent a recurring, maintenance-based program requiring reliable execution, efficient mobilization, and clear documentation. Work includes routine inspection,

debris and marine growth removal, minor repairs, and support for system performance and longevity. Services will be performed on an as-needed basis, including scheduled maintenance cycles and emergency response.

Dive Operations and Safety Compliance

All diving operations will be conducted in full compliance with:

- OSHA Commercial Diving Operations (29 CFS 1910 Subpart T)
- ADCI Consensus Standards (latest edition) or equivalent nationally recognized standards

See Dive LLC emphasizes disciplined dive planning, hazard awareness, and clear communication between dive team members and surface support personnel to ensure safe and efficient operations.

Inspection and Documentation

Underwater inspections will be conducted using diver-based assessments supported by:

- Live video feed to the surface for real-time observation by City personnel
- High-resolution digital video and photographic capture
- Structured reporting identifying observed conditions, deficiencies, and recommended actions

This approach ensures transparency, supports informed decision-making, and creates a consistent record of asset condition over time.

Cleaning and Maintenance

Underwater Asset Management will perform heavy/routine cleaning and maintenance of subaqueous structures, including:

- Removal of debris from valves, pipes, and outfalls
- Removal of marine growth impacting function or inspection visibility
- Maintenance of manatee grates and associated structures

Work will be executed using appropriate tools and methods to restore functionality while minimizing disturbance to surrounding infrastructure.

Repair and Support Services

Where required, Underwater Asset Management will provide repair and maintenance services to support system integrity, including minor repairs and assistance with component replacement. Experience with rigging, underwater systems, and structural components allows the team to address a wide range of field conditions.

Mobilization and Efficiency

Based on the distribution of assets and typical access conditions, Underwater Asset Management will prioritize efficient scheduling and grouping of work locations to minimize mobilization costs and maximize productivity. The team is equipped to perform work from both land-based access points and vessel-supported operations as well as remote access locations not accessible by vehicle as needed.

Responsiveness and Emergency Services

Underwater Asset Management understands the importance of timely response for municipal infrastructure. The team is prepared to:

- Support scheduled maintenance cycles
- Respond to unscheduled service requests
- Provide emergency response within required timeframes

Relevant Project Experience

Underwater Asset Management brings direct experience performing similar work, including:

- Salvage and rigging operations for submerged assets (Stuart Materials—Dredge Miss Amanda) $38,607.00 (03/20/2026)
- Removal and replacement of underwater cathodic protection systems (E.N. Bisso—Tug Trinity) $82,400.00 (02/26/2026)
- Inspection of pier berths for structural condition and navigation safety (A.R. Savage – Pier Inspection Berth 150) $3,600.00 (03/26/2026)
- Inspection of running gear and hull for damage for transfer of ownership (A.R. Savage-M/V Sea Eagle) $3,700.00 (02/19/2026)

These projects demonstrate the team’s ability to perform inspection, maintenance, and complex underwater tasks in real-world conditions.

Statement of Assurance and Bonding Capacity

Underwater Asset Management affirms that it has the personnel, equipment, and operational capability to perform the services described in this Request for Bid in a safe, timely, and professional manner.

The company maintains all required insurance coverage and operates in compliance with applicable federal, state, and local regulations governing commercial diving operations.

Underwater Asset Management is capable of obtaining bonding, if required, and will provide any necessary performance or payment bonds upon request by the City.

Stuart Materials—Dredge Miss Amanda

Client: Stuart Materials

Project Type/Value: Marine Salvage and Recovery / $38,607

Location: Moore Haven, Florida

Project Description:

Underwater Asset Management was engaged to assess and support the recovery of a sunken dredge barge (Miss Amanda). The project required evaluation of site conditions, development of a safe and effective rigging plan, and execution support for the salvage operation.

Scope of Services

- Underwater assessment of sunken barge condition and positioning
- Development of rigging approach for recovery
- Installation and adjustment of rigging systems
- Assistance with controlled lift and removal using lift bags
- Coordination with topside crew during salvage operations

Key Challenges

- Limited visibility and complex underwater conditions
- Stabilization and controlled lifting of a submerged structure
- Ensuring safe rigging configuration under variable loads

Outcome

- Successful recovery of the submerged barge
- Safe execution of lift operations without incident
- Efficient coordination between dive team and surface crew

Relevance to This Project

Demonstrates Underwater Asset Management's ability to:

- Perform complex underwater operations
- Develop and execute rigging plans
- Operate safely in low-visibility, high-risk environments

E.N. Bisso—Tug Trinity

Client: E.N. Bisso

Project Type/Value: Underwater System Repair / $82,400

Location: Tampa, Florida

Project Description:

Underwater Asset Management performed removal and replacement of an impressed current cathodic protection (ICCP) system on the tug Trinity. The work required precision, technical knowledge, and careful coordination to maintain vessel integrity.

Scope of Services

- Removal of existing cathodic protection components
- Installation of new ICCP system components
- Inspection of mounting points and associated infrastructure
- Verification of proper installation and system functionality

Key Challenges

- Working within confined and sensitive vessel structures
- Maintaining system integrity during removal and replacement
- Ensuring proper alignment and installation of new components

Outcome

- Successful installation of updated cathodic protection system
- Improved corrosion protection for vessel infrastructure
- Work completed efficiently and safely

Relevance to This Project

Demonstrates Underwater Asset Management's ability to:

- Perform technical underwater repair and installation
- Work on critical infrastructure systems
- Execute precise, detail-oriented tasks

A.R. Savage—Pier Inspection Berth 150

Client: A.R. Savage

Project Type/Value: Underwater Inspection / $3,600

Location: Tampa, Florida

Project Description:

Underwater Asset Management conducted a detailed underwater inspection of a pier at Port Tampa Bay Berth 150 to evaluate structural condition and identify potential hazards to vessel operations.

Scope of Services

- Visual inspection of submerged structural components
- Identification of damage, deterioration, and obstructions
- Assessment of potential navigation hazards
- Documentation of findings for client review

Key Challenges

- Identify structural issues in low-visibility conditions
- Ensuring comprehensive coverage of berth area
- Communicating findings clearly for operation decision-making

Outcome

- Identification of key areas requiring attention
- Improved understanding of berth condition and safety risks
- Delivery of actionable inspection results

Relevance to This Project

Demonstrates Underwater Asset Management's ability to:

- Conduct thorough underwater inspections
- Identify hazards affecting infrastructure and navigation
- Provide clear, usable information to support maintenance decisions

by the individual signing this sworn statement:

(Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any bid or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who

knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

[X] Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

[ ] The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

[ ] The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

EXHIBIT "D"

Conditional Federal/Grant-Funded Contract Addendum

(Place Conditional Federal/Grant-Funded Contract Addendum behind this page)

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

Federal/Grant Program: [insert]
Federal Awarding Agency: [insert]
Pass-Through Entity: [insert, if applicable]
Assistance Listing Number: [insert, if applicable]
Federal Award Identification Number: [insert, if applicable]
Award or Disaster Declaration Date: [insert, if applicable]
Project Number: [insert]
Special Award Conditions: [insert or attach]

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Authorize the City Manager to execute a Services Agreement with Dive-Tech International, Inc. for Commercial Diving Services in the amount not to exceed $50,000 annually.

Action Request: Motion to authorize the City Manager to execute a Services Agreement with Dive-Tech International, Inc. for Commercial Diving Services in the amount not to exceed $50,000 annually.

Strategic Objective: Reliable Infrastructure

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Bid (RFB) for qualified full-service commercial diving Contractors with experience in a wide range of applications. Eleven (11) responsive sealed bids were received on April 8, 2026. Dive-Tech International Inc., Free Agent Marine LLC, and See Dive LLC, were determined to be the lowest responsive and responsible bidders meeting all City qualification requirements.

The contract provides not-to-exceed unit prices for a qualified dive team, and all related diving equipment required to assist the City of St. Pete Beach with the cleaning, inspection, repair and maintenance of tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads. Services include:

- Debris Removal from Valve, Pipe, Endwalls, and Pit
- Marine Growth Removal from Valve, Pipe, Endwalls, and Pit
- Maintenance of Manatee Grates
- Written and Video Reports of condition per cycle
- Repair and Replacement of in-line and outfall-end type Tidal Check Valves
- Hydraulic Dredging

Work will be issued by task order on an as-needed basis, in an amount not to exceed $50,000 per year, subject to budgeted funds.

The initial agreement term is three (3) years, with up to two (2) additional one (1) year renewal options upon mutual agreement and annual appropriation.

Funding: 403.5380.546000 – Stormwater R&M Equipment ($287,996.80 remaining balance)

401.5350.546000 – Wastewater R&M Equipment ($102,791.25 remaining balance)

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Commercial Diving Services

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and (**DIVE-TECH INTERNATIONAL INC.**). (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Bids, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its June 23, 2026, public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

   a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed $50,000.

   b. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

   c. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

   d. Contractor must comply with any and all Federal, State, and local laws and regulations

now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

e. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.
   a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished

under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of (3) three years with (2) two, (1) one-year extensions from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement.

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured and providing coverage up through and including the final performance of any services provided

herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved, and any amount withheld is not subject to payment of interest by the City. The above provisions

will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:
    a. Standard Contract Addendum (Exhibit "A")
    b. Request for Bid/Proposal (Exhibit "B")
    c. Vendor Bid/Proposal (Exhibit "C")

d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:
Dive-Tech International, Inc.
PO Box 3177
Pinellas Park, FL 33780

21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Form Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this _____ day of _____, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and _____, hereinafter referred to as "Contractor", concerning that certain agreement dated the ____ day of _____, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian
cityclerk@stpetebeach.org

Phone: 727-363-9220
155 Corey Avenue
St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

ADDENDUM 2

Commercial Diving Services

Issued 3/27/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **9:30 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 2 includes:

Questions and Answers

Questions and Answers:

1. Can you advise company licensing requirements - specifically that a Licensed Specialty Marine Contractor registered through the Florida DBPR is required for Award of this contract? Not required.

2. ADCI Consensus Standards Edition 6.5 for commercial dive operations is the safe standard adopted by the USCG and many agencies for underwater work. Will this standard be enforced for the services outlined in this solicitation? All diving operations shall comply with OSHA Commercial Diving Operations (29 CFR 1910 Subpart T). Diving operations shall also conform to ADCI Consensus Standards (latest edition) or an equivalent nationally recognized commercial diving standard, such as USACE EM 385-1-1, where applicable.

The meeting was called to order at 9:33 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:

- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 9:30AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills summarized that this project will be for a maintenance contract managed by the City's operations team, with a goal to have on-call service for commercial diving.

There being no questions, the meeting was adjourned at 9:38 AM.

Questions and Answers:

1. Does this project require that the bidder hold a FL State General Contractor License? NO

2. Please provide the direct link for bid submission.
https://stpetebeach.bonfirehub.com/portal/?tab=openOpportunities

3. Can you please provide exact locations of the areas where the scheduled work is to be completed. Please see attached maps.

4. Can you please provide engineered drawings and associated structures where the dive team will work on the grates, valves, pipelines, etc… Please see link below.

5. Can the City clarify whether a Florida Certified or Registered Contractor's License is required for this contract, specifically for repair or replacement of tidal check valves, or if this work is considered maintenance under this RFB? Not required. Work is considered maintenance.

6. Can the City confirm that hydraulic dredging under this contract is limited to maintenance removal of sediment and does not include excavation or alteration of original design grade requiring contractor licensure? Yes, dredging under this contract is limited to maintenance removal of sediment.

7. Can the City provide clarification on how many locations require access by boat or barge versus land-based access, and whether work will typically be grouped to minimize mobilizations? Please see maps linked below; Majority of locations are accessible by land. Work will be grouped to minimize mobilizations.

8. Can the City confirm whether remotely operated vehicles (ROV) or sonar-based inspection methods may be utilized as a supplement to diver inspections, where appropriate, to enhance safety, efficiency, and documentation quality? Yes, that's acceptable.

9. Can the City provide a detailed asset list or map identifying the locations, approximate depths, pipe diameters, and typical conditions of the tide check valves, manatee grates, and outfalls included in this contract? Additionally, are any prior inspection reports or videos available for reference? See attached.

I. CONTRACTOR'S BID SUBMITTAL

The company that is submitting a bid declares that it has extensive experience in **Commercial Diving Services.**

The undersigned, as Bidder, hereby declares that the only person or persons interested in the Bid as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Bid or in the Agreement to be entered into; that this Bid or Agreement is made without connection with any other person, company, or parties making a Bid; and that it is in all respects fair and in good faith without collusion or fraud.

The Bidder further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of bids; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Bidder proposes and agrees, if the Bid is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Commercial Diving Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful bidder shall be required to utilize the template Agreement in this Request for Bids (RFB) and any questions regarding the Agreement must be addressed during the RFB process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Bidder proposes to furnish all materials, equipment, labor, and perform the work submitted in their bid schedule for the City of St. Pete Beach **" Commercial Diving Services".**

III. GENERAL CONTRACT TERMS

REQUEST FOR BID

The City of St. Pete Beach is submitting this RFB for bids on the Commercial Diving Services.

LOCATIONS

The City of St. Pete Beach is soliciting bids from qualified Commercial Diving Services for the City.

BID SUBMITTALS

Bid documents must include a signed/notarized Contractor's Bid Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit one electronic bid via Bonfire.

BIDDER INFORMATION

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http:// www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

PRE-BID MEETING

An optional pre-bid meeting will be held on **03/18/2026 at 9:30 AM EST** via Microsoft Teams Video conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and Microsoft Teams Meeting instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS

No oral interpretations will be made to any firms as to the meaning of the scope of work or any other contract documents included in this **RFB.** All questions pertaining to the terms and conditions or scope of work of this Request for Bid **(RFB)** must be sent in writing only via email to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 EST on 03/25/2026**. Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFB**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFB** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so.

BID PACKAGES

Sealed bids will be accepted by the City until **04/08/2026** at **9:00 AM** EST (Deadline). No bids shall be accepted by the City after this deadline – NO EXCEPTIONS. Bid Packages must be electronically submitted via Bonfire Clearly marked as: "**Commercial Dive Services**." If a link is needed for either site, please contact the Procurement Manager (purchasing@stpetebeach.org.) All Bidders are invited to attend this bid opening.

CONTACT INFORMATION

Sara Spain – Procurement Manager
Mailing Address - 155 Corey Avenue, St. Pete Beach, Florida 33706
E-mail - purchasing@stpetebeach.org

SCOPE OF WORK

The City of St. Pete Beach is seeking a qualified full service commercial diving Contractor with experience in a wide range of applications. The Contractor shall provide a qualified dive team, and all related diving equipment required to assist the City of St. Pete Beach with the cleaning, inspection, repair and maintenance of tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads.

The City of St. Pete Beach has 35 tide check valves, and 25 manatee grates installed at stormwater outfalls throughout the City. Services shall include:

- Debris Removal from Valve, Pipe, Endwalls, and Pit
- Marine Growth Removal from Valve, Pipe, Endwalls, and Pit
- Maintenance of Manatee Grates, when present
- Written and Video Reports of condition per cycle
- Repair and Replacement of in-line and outfall-end type Tidal Check Valves
- Hydraulic Dredging

Services must comply with relevant standards and regulations, including OSHA diving regulations and any applicable environmental guidelines.

CONTRACTOR TO FURNISH

- A Qualified Dive Team
- All Related Diving Equipment
- Underwater Video with Digital Capture
- Shallow Water Dive Package
- Small Pneumatic Tool
- Work Boat / Barge
- Hydraulic Unit
- 4-inch Hydraulic Submersible Pump
- Jet Pump
- 4000 PSI Water Blaster
- Digital Camera

THE CITY OF ST. PETE BEACH TO FURNISH

- A Representative to Coordinate Activities
- A Representative to View Video Real Time and Direct the Crew
- Access to Work Site
- Permits (If required)
- Assist with Lock-Out Tag-Out procedures (training or supervision as needed)
- Procurement of Tidal Check Valves (as needed)

SCHEDULE

Maintenance, cleaning and inspection shall be scheduled per occurrence and may include the full asset inventory or a portion of that inventory for each cycle. Maintenance cycles are to be performed quarterly, or more frequently as-needed, based on City requirements.

Tidal check valve, manatee grate, and other miscellaneous outfall repairs shall be scheduled per occurrence, as-needed.

The Contractor must provide at least 72 hours' notice for scheduling changes. Emergency response for unscheduled maintenance requests must be available within 24 hours.

PERFORMANCE METRICS

The following performance metrics will be used to evaluate the Contractor's work:

- Timeliness of completing tasks as per the agreed schedule.
- Accuracy and thoroughness of written condition reports.
- Compliance with safety standards and regulations.
- Responsiveness to unscheduled maintenance requests.

All reports must be submitted in a digital format (PDF or Word) within ten (10) days of completing each maintenance cycle. Reports should include:

- Detailed descriptions of completed tasks.
- Photographic and video evidence.
- Identified issues and recommendations for future maintenance.

PENALTIES

Failure to adhere to the schedule or meet performance standards may result in penalties, including:

- 5% reduction in payment for delayed work (per day).
- Rework at Contractor's expense for substandard services.

EMERGENCY SERVICES

The Contractor must provide emergency maintenance services within 24 hours of the City's request. The bid form includes an emergency call-out fee to account for this service.

Once a contract is awarded, the selected vendor will be required to submit a detailed fee schedule outlining the main pay items for the project. This fee schedule will be reviewed at the pre-construction meeting and will be used to review pay applications and evaluate project progress.

DETAILED SPECIFICATIONS

LOCATIONS

The locations will cover all tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads Citywide that are City owned throughout the City of St. Pete Beach Florida.

Standard work hours shall be from 7:30 AM until 6:00 PM, Monday through Saturday. No work shall take place on Sundays or on official City holidays without prior approval by the City Manager or designee at least 1 week prior to the scheduled work. A list of current official City holidays can be found on the City's Human Resources website at http://www.stpetebeach.org/hr/holidays.html. Contractor will coordinate scheduling of work with the City's Project Manager and City's Inspector.

ADDITIONAL WORK DETAILS

Contractors or persons wishing to bid on this project are licensed, bondable and insured in accordance to the City's requirements. The Contractor will furnish all necessary labor, materials, tools, equipment and supplies to complete the scope of work. Bid must also include all costs for licenses, permits, and any material disposal fees.

Bidders shall bring questions, discrepancies, omissions, conflicts or doubt as to meaning of any part of Contract Documents to the attention of the City of St Pete Beach Procurement Manager at least ten (10) business days before bid submittal deadline. Clarification of intent of Contract Documents, if necessary, shall be made available to bidders in the form of an Addendum. Failure to request clarification of interpretation of Contract Documents shall not relieve bidders of their responsibilities to perform the work.

The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids, or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach.

STATEMENT OF WORK

The Contractor shall furnish and pay the cost, including sales tax and all other applicable taxes, licenses, permits and fees, of all the necessary materials not furnished by the City and shall furnish and pay for all the superintendence, labor, tools, equipment, transportation, and perform all the work required for the execution of all services listed in the Bidder's Proposal and Bid Form attached hereto and in strict accordance with the Plans, Specifications, and requirements of the City of St. Pete Beach which are attached hereto and made a part hereof, and any amendments thereto and such supplemental Plans and Specifications which may hereafter be approved.

BEGINNING DATE

The Contractor shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Contractor shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City. The Contractor must commence construction activities within thirty (30) business days of NTP to prepare and procure materials. Any change to the start date or the work schedule included with this bid must be submitted in writing to and approved by the City Manager or designee.

COMPLETION OF WORK

The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". The contract will be for (3) three years from time of execution (Date of last signature) of the contract with (2) additional (1) one year extensions if agreed upon by the City and vendor. .

EXAMINATION OF SITE

Bidders may visit specific areas with advanced notice.

ASSURANCES

The responding Contractor shall provide a statement of assurance that the Contractor is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

TRAFFIC CONTROL AND STAGING AREA

Contractor shall include all costs associated with vehicular and pedestrian traffic control and maintenance during the project. Contractor shall be responsible for providing a staging area. The location of this area must be approved by the City Manager or designee. The Contractor will be required to control the area including any additional fencing or barricades and Contractor will be responsible for the restoration of this and all other staging areas provided by the City.

ASSIGNMENT AND TRANSFER OF CONTRACT

The Contractor shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS

The Contractor shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PERFORMANCE PAYMENT BOND

Not required for this contract.

LIQUIDATED DAMAGES

If the work embraced by this Contract is not completed on or before the date set for completion or any extension thereof, the actual damages for the delay will be impossible to determine and in lieu thereof, the Contractor shall pay to the City fixed, agreed, and liquidated damages in the amount of either Five-Hundred Dollars ($500) per day for each calendar day of delay until the work is satisfactorily completed.

PAYMENT

Payment shall be made to the Contractor for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Contractor will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Contractor without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Contractor's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Contractor to make a change in the Work, and if the City and the Contractor do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the contractor shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Contractor believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, he shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Contractor first discovered the occurrence. The Contractor shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Contractor shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Contractor shall prepare bids detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Contractor's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Contractor's bids shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable bid will not justify an increase in Contract Amount or Contract Time. Contractor agrees that it shall give the City access to any and all of Contractor's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Contractor for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Contractor shall be at his expense without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Contractor or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Contractor bids or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to

be used shall be those used for the Contractor's costs, except that the term "Subcontractor" shall replace the term "Contractor," context permitting.

Changes in Contract Amount for extensions in Contract Time shall exclude costs that are unaffected or do not relate to the extension in Contract Time, such as: (a) operating costs of construction equipment assigned to the Work on a continuing basis, (b) operating costs and owned/rental costs of construction equipment (crane used for specific lifts, concrete pump used for specific pours, etc.), and (c) fully paid site facilities, tools, etc.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Contractor, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit. The out-of-pocket cost shall only include those direct costs which are needed to perform the work such as labor (including payroll taxes, fringe benefits, labor burden and workers' insurance), materials, equipment, and other incidental out-of-pocket construction costs directly involved in the work, including but not limited to small tools, expendables and material costs but shall not include project management or project supervisory costs unless the Change Order includes an increase in the Contract time.

In such case, the Contractor will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Contractor to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

To be eligible for consideration, the Contractor's written claim for a change in the Contract price, including claim(s) from sub-contractors, shall include an itemized cost breakdown with supporting data as described below:

A. For labor: Provide written documentation from the Contractor and Subcontractors or others as appropriate in the form of a detailed breakdown by each labor classification involved indicating the number of hours of Work involved and the hourly payroll rate applicable to each to substantiate the basis and amount of the direct labor cost. The direct labor cost may be increased to provide an allowance for indirect payroll costs (labor burden), such as payroll taxes, fringe benefits, and workers insurance after all premium discounts, rebates and other appropriate reductions have been taken.

B. For material, supplies, equipment, furnishings, etc., to be installed or included in the Work: Provide written documentation from the Contractor and Subcontractors, suppliers, etc., to substantiate the basis and amount of the various cost items involved. Material costs shall reflect the Contractor's reasonably anticipated net actual cost after consideration of trade discounts and volume rebates.

C. For construction equipment: Provide written documentation in the form of a detailed breakdown by each construction equipment category, indicating the applicable unit rates (i.e., dollar amount per hour, dollar amount per day etc.,) and the number of hours, days, etc. to substantiate the basis and amount of the construction equipment out-of-pocket costs.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Contractor (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Contractor employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

CITY'S RIGHT TO DIRECT PURCHASE

The City has reserved the right to purchase certain items and materials for this project directly in an effort to save applicable sales tax in compliance with Florida Law.

The City will issue purchase orders directly to the vendors supplying the equipment being directly purchased by the City for this project. Each Purchase Order will be accompanied by the City's Certificate of Exemption and a Certificate of Entitlement. All direct purchase vendor invoices will be issued to the City of St. Pete Beach, and the City will issue payment to each direct purchase vendor from City funds. The City will take title to the equipment at time of delivery from the vendor and will issue a separate Certificate of Entitlement for each purchase order.

The Contractor shall assist the City with receipt of materials furnished by the City in accordance with these Special Provisions including, but not limited to, verifying correct quantities, verifying documents of orders in a timely manner, providing and obtaining all warranties and guarantees required by the Contract Documents, assist with inspection of the goods at the time of delivery and notify the City immediately of any deficiencies noted. It is understood that the owner assumes the risk of damage or loss during the time that the building materials are physically stored at the job site prior to their installation or incorporation into the project. The Contractor shall coordinate with the City regarding the delivery schedules, sequence of delivery, loading orientation, and other arrangements normally required by the Contractor for the particular material furnished.

As City Furnished Materials are delivered to the job site and accepted by the City, the City shall notify the Contractor who will assist the City to visually inspect all shipments from the suppliers. The City will approve the vendor's invoice for material delivered upon adequate inspection and recommendation of the Contractor. The City shall assure that each delivery of City Furnished Materials is accompanied by documentation adequate to identify the Purchase Order against which the purchase is made and Contract Documents including but not limited to Contract, Plans, Specifications, and approved Shop Drawings. This documentation may consist of a delivery ticket, bill of lading and an invoice from the supplier conforming

to the Purchase Order together with such additional information as the City may deem necessary.

PAYMENTS FOR WORK COMPLETED

Partial payments will be made as the work progresses (if applicable) at the end of each calendar month, or as soon thereafter as practicable on estimates made by the City Manager or designee and as approved by the City, provided that the Contractor is performing the overall job in a diligent manner. In making partial payments, there shall be retained five percent (5%) on the amount of each estimate until final completion and acceptance of all work covered by the Contract. Upon completion and acceptance of the work, the City Manager or designee shall issue a certificate that the work has been completed and accepted by them under the conditions of the Contract and shall make and approve the final estimate of the work. The entire balance found to be due the Contractor, including that retained by the City, should be paid to the Contractor. Such payment shall be conditioned, however, upon the submission by the Contractor of evidence satisfactory to the City that all claims for labor, material, and any other outstanding indebtedness in connection with the Contract have been paid. Such payment shall also be conditioned upon approval and acceptance of the construction and improvements by the City.

If after the work has been substantially completed, full completion thereof is materially delayed through no fault of the Contractor and the City Manager or designee so certifies, the City shall upon the Certificate of the City Manager or designee, and without terminating the Contract make payment for the balance due for that portion of the work fully completed and accepted. Such payment shall be made under the terms and conditions governing final payment, except that it shall not constitute a waiver of claim. If such delay occurs and payment is made under this clause, the Contractor shall nevertheless be prepared to complete the work in a timely manner upon the remedy or removal of such delay, and shall be bound under this Contract for the completion of such work unless this Contract is otherwise terminated. All payments will be made in accordance with the Local Government Prompt Payment Act, Chapter 218, Florida Statutes.

PAYMENTS WITHHELD

The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Contractor to make payments properly to Subcontractors or for material or labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Contractor

f) Failure of the Contractor to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS

Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Contractor, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such

sums to the Contractor.

Before the approval of the final payment, the Contractor shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS

If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Contractor, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Contractor all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Contractor and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE

The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

INTENT OF PLANS AND SPECIFICATIONS

The Contractor shall keep on the job a copy of the Plans and Specifications and shall at any time give the City Manager or designee access thereto. Anything mentioned in the Specifications and not shown on the Plans or shown on the Plans and not mentioned in the Specifications, shall be of like effect as if shown or mentioned in both. The Contractor shall not take advantage of any errors, discrepancies or omissions that may exist in the Plans and Specifications but shall immediately call them to the attention of the City Manager or designee whose interpretation or correction thereof shall be conclusive. Should a conflict occur between the General Specifications and any Supplemental Specifications and/or Plans, the latter shall govern.

LICENSES AND PERMITS

The Contractor shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the contractor is responsible for non-compliance of all permit requirements, including all fines resulting from Contractor's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Contractor shall be

responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the contractor awarded the project, MUST also register their license with the City.

SUPERINTENDENCE

The Contractor shall constantly superintend all the work embraced in this Contract in person or by a responsible agent who shall have in writing, full authority to act for them and to carry out all the instructions given by the City Manager or designee.

LABOR PROVISIONS

The Contractor and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed.

INSURANCE

The Contractor shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Contractor's General Public Liability and Property Damage Insurance issued to the Contractor and protecting the Contractor from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Contractor or by any Subcontractor hired by the Contractor or anyone directly or indirectly employed by the Contractor or hired by the Contractor.

The successful Contractor shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Contractor or third party under the direction or control of the Contractor. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Contractor must furnish the City with Certificate of Insurance prior to commencement of work. An approved Certificate of Insurance furnished by the Contractor's carrier to guarantee the Contractor being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY

The Contractor shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Contractor shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Contractor shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Contractor will provide security on off days and holidays. The Contractor shall be responsible for all charges incurred with such action.

The Contractor shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Contractor, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Contractor shall also protect adjacent property as required by law.

PARKING

The Contractor shall arrange with City Manager or designee for temporary parking areas to accommodate construction personnel and construction equipment. Note that limited parking spaces are available in the City of St. Pete Beach. The Contractor will be asked to coordinate with the City's representative on site on a regular basis to minimize the impact on residents and visitors.

TRANSPORTATION, HANDLING AND STORAGE

The Contractor shall transport, handle, protect and store products in accordance with manufacturer's instructions and all environmental regulatory agencies.

VEHICLES

Business vehicles shall be identified on both sides with the name of the company.

ENVIRONMENTAL PROTECTION

It shall be the Contractor's responsibility to implement construction methods, best management practices, and erosion control methods that avoid water pollution as required by the State of Florida Department of Environmental Protection (FDEP), City of St. Pete Beach, and Pinellas County. Any Contractors in violation of the City of St. Pete Beach Regulations, Pinellas County Regulations, Florida Department of Environmental Protection Regulations, or any other regulatory agency regulations shall be the sole responsibility of the Contractor. The Contractor shall hold harmless the City of St. Pete Beach and the City Manager or designee from any fines and litigation resulting from the Contractor's actions. The Contractor shall pay all attorneys' fees, fines, penalties and any other such expenses resulting from the Contractor's actions. The Contractor shall provide all necessary measures to prevent any materials whatsoever from entering the waterway except for those materials, which are shown, on the plans as completed structures. The Contractor shall provide MSDS sheets to the City Manager or designee on all applicable materials before applying those materials. The Contractor shall secure the necessary education, certifications,

licenses and permits required by state and local agencies to operate and manage a construction site, including but not limited to, FDEP requirements related to Coastal Construction Control Line. The Contractor shall abide by all rules and regulations set forth and required by the City of St. Pete Beach's MS4 NPDES Permit.

TIMELY DEMAND FOR STAKES AND INSTRUCTIONS

The Contractor shall provide reasonable and necessary materials, opportunities, and assistance for setting stakes and making measurements, including the furnishing of a rodman, or a chainman at intermittent times during the construction period. They shall not proceed until they have received such stakes and instructions as may be necessary as the work progresses. The work shall be done in strict conformity with such stakes and instructions. The Contractor shall carefully preserve benchmarks, reference points and stakes, and in case of willful or careless destruction, they will be charged with the resulting expense and shall be responsible for any mistakes that may be caused by their unnecessary loss or disturbance.

WORKMANSHIP

The Contractor acknowledges that they have satisfied themselves as to the nature and location of the work; the general and local conditions including but not restricted to those bearing upon transportation, disposal, handling and storage of materials; availability of labor, water, electric power, roads; and uncertainties of weather, surface conditions, subsurface conditions, tides or similar physical conditions at the site, the character of equipment and facilities required to prosecute the work. Any failure by the Contractor to acquaint themselves with any aspect of the work or with any of the applicable conditions shall not relieve the Contractor from the responsibility to successfully perform the work under the Contract Documents, nor shall it be considered the basis for any claim for additional time or compensation.

UTILITIES

The Contractor shall anticipate all underground obstructions such as water lines, gas lines, sewer lines, utility lines, or any other public or private facilities and debris. In all cases where existing utility lines may be interfered with by the work, the Contractor shall give a minimum of thirty-six (36) hours' notice to the owners of such utilities, to permit them to relocate the lines prior to construction. No extra payment shall be allowed for the removal, replacement, repair or possible increased cost caused by underground obstructions. The location of existing structures and utilities provided in the plans are approximate only. Any damage to existing structures to remain or work of any kind shall be repaired or restored promptly by, and at the expense of the Contractor.

The Contractor shall at all times protect all desirable trees, plants, curbs, sidewalks, irrigation components, and structures not requiring removal to accomplish the work, whether or not they are shown on the plans. The Contractor must contact the City to obtain tree removal permits for the removal of any tree not identified for removal in the Project Plans.

In matters of restoration, all materials, construction, and workmanship shall be acceptable to, and approved by the City of St. Pete Beach and the City Manager or designee. No changes in size, shape, configuration, location, materials, or construction shall be made without prior written authorization from the City Manager or designee. Any demolition debris and other debris shall be hauled offsite and properly disposed of by the Contractor and shall be inclusive to the prices as stated in the BID SCHEDULE, unless otherwise stipulated as part of the project to remain.

No interruption of ingress and egress to private property shall be made unless the Contractor has made prior arrangements acceptable to the owner of the affected property. The City Manager or designee shall

notify affected residents/property owners of impending activity or inconvenience via door hanger.

The Contractor shall provide all traffic control devices utilized during construction and meet the requirements set forth in the Florida State Department of Transportation "Manual on Traffic Control and Safe Practices for Street and Highway Construction, Maintenance, and Utility Operations."

CLEANING UP

Upon completion or termination of the work the Contractor shall, as directed by the City Manager or designee, remove from the vicinity of the work all equipment and temporary structures, waste materials and rubbish resulting from his operations, leaving the premises in a neat and presentable condition. All debris generated by the Contractor will be removed before leaving the area. All areas will be raked to remove smaller debris. All surrounding sidewalks, parking lots and roadways will be cleared of any dust or debris generated by the Contractor. In the event of their failure to do so, the City at the expense of the Contractor may do the same, and their Surety shall be responsible.

DEFECTIVE WORK OR MATERIAL

The Contractor shall promptly remove from the premises all work and materials condemned by the City Manager or designee as failing to conform to the Contract, whether incorporated or not, and the Contractor shall promptly replace and re-execute his own work in accordance with the Contract and without expense to the City and shall bear the expense of making good all work of other Contractors destroyed or damaged by such removal or replacement.

If the Contractor does not remove such condemned work or materials within a reasonable time after notice, the City may remove them and store the materials at the expense of the Contractor. If the Contractor does not pay the expense of such removal within ten (10) business days' time thereafter, the City may, upon thirty (30) business days written notice sell such materials at auction or at private sale and shall account for the net proceeds thereof after deducting all the costs and expenses that should have been borne by the Contractor.

DISPUTE RESOLUTION

The Contract shall be construed under Florida law. The parties agree that all controversies, claims and other matters in question between the parties arising out of or relating to this Contract or its breach shall be resolved through mediation. Upon notice of any party to the Contract of a dispute, question or controversy, the parties shall agree to the appointment of a qualified mediator. A qualified mediator is a person who has received at least forty (40) hours of mediation training and has actual experience as a mediator in resolving contract disputes. If the dispute, question or controversy is not resolved through mediation within sixty (60) business days of a notice of the dispute between the parties, the City reserves the right to seek resolution through court action.

INDEMNIFICATION

In consideration of the payment of ten dollars ($10.00) as part of the above purchase price, Contractor shall indemnify, defend, and hold harmless the City, its officers and employees, from liabilities, damages, losses and costs, including but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the responding firm and any persons employed or utilized by the responding firm in the performance of the Contract.

GENERAL WARRANTY

Neither the final certificate nor any provision in the Contract Documents nor partial or entire occupancy of the premises by the City shall constitute an acceptance of work not done in accordance with the Contract Documents or relieve the Contractor of liability in respect to any express warranties or responsibility for faulty materials or workmanship. The Contractor shall remedy any defects in the work and pay for any damage to other work resulting therefrom that shall appear within a period of eighteen (18) months from the date of final acceptance of the work, unless a longer period is specified. The City shall give notice of observed defects with reasonable promptness.

LAND OF CITY, USE OF, BY CONTRACTOR

The City shall provide the land upon which the work under this Contract is to be done, and will, so far as is convenient, permit the Contractor to use as much of the land as is required for the erection of temporary construction facilities and storage of materials, together with the right of access to same, but beyond this, the Contractor shall provide, at his/her cost and expense, any additional land required. It will be the responsibility of the Contractor to repair or restore to the satisfaction of the City, at their own expense, any damage to land used for the above stated activities or any other activities approved by the City.

OTHER WORK

Wherever work being done by the City or by other Contractors is contiguous to work covered by this Contract, the respective rights of the various interests involved shall be established by the City Manager or designee to secure the completion of the various portions of the work in general harmony.

OTHER CONTRACTS

The City may award other Contracts. The Contractor shall fully cooperate with such other Contractors and carefully fit his/her own work to that provided under other Contracts, as may be with the performance of work by any other Contractor or City.

COOPERATIVE PURCHASING

Pursuant to their own governing laws and subject to the agreement of the Contractor, governmental entities may make purchases under the terms and conditions contained in the executed Contract, if agreed to by Contractor. Such purchases are independent of the Contract between the City and the Contractor, and the City is not a party to these transactions. Agencies seeking to make purchases under this Contract are required to follow the requirements of Rule 60A-1.045(5), F.A.C.

DELAYS AND EXTENSION OF TIME

If the Contractor should be delayed at any time in the progress of the work by an act or neglect of the City or the City Manager or designee, or of any employee of either, or by any separate Contractor employed by the City, or by changes ordered in the work, or by strike, lockouts, fire, unusual delay in transportation, unavoidable casualties, or any cases beyond the Contractor's control, or by delay authorized by the City Manager or designee, or by any cause which the City Manager or designee shall decide to justify the delay, then the time of completion shall be extended for such reasonable time as the City Manager or designee may decide. No such extension shall be made for a delay that occurs more than five (5) business days before a claim is made in writing to the City Manager or designee. In the case of a continued cause of delay, only

one (1) claim is necessary. This section does not exclude the recovery of damages for delay by either party under other provisions in the Contract Documents.

CITY'S RIGHT TO TAKE OVER THE WORK

If the Contractor shall be adjudged bankrupt, or if they should make a general assignment for the benefit of its creditors, or if a receiver should be appointed to take over their affairs, or if they should fail to prosecute their work with due diligence and carry the work forward in accordance with its' work schedule and the time limits set forth in the Contract Documents, or if they should fail to substantially perform one or more of the provisions of the Contact Documents to be performed by them, the City may serve written notice on the Contractor and the Surety on its' performance bond, stating the City's intention to exercise one of the remedies hereinafter set forth and the grounds upon which the City bases its right to exercise such remedy. In any event, unless the matter complained of is satisfactorily cleared within ten (10) business days after the service of such notice, the City may, without prejudice to any other right or remedy exercise one of such remedies at once; having first obtained a certificate from the City Manager or designee that such sufficient cause exists to justify such action.

The City may terminate the services of the Contractor, which termination shall take effect immediately upon service of notice thereof on the Contractor and their Surety, whereupon the Surety shall have the right to take over and perform the Contract. If the Surety does not commence performance of the Contract within ten (10) ten days after service of the notice of termination, the City may itself take over the work, take possession of and use all materials, tools, equipment, and appliances on the premises and prosecute the work to completion by such means as it shall deem best. In the event of such termination of their service, the Contractor shall not be entitled to any further payment under their Contract until the work is completed and accepted. If the City takes over the work and the unpaid Contract balance exceeds the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the excess unpaid Contract balance shall be paid to the Contractor. If the City takes over the work and the unpaid Contract balance does not exceed the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the Contractor and his Surety shall pay the difference to the City. The City Manager or designee shall certify such cost, expenses, and damages.

The City may take control of the work and either make good the deficiencies of the Contractor itself or direct the activities of the Contractor in doing so, employing such additional help as the City deems advisable. In such event, the City shall be entitled to collect from the Contractor and his Surety, or to deduct from any payment then or thereafter due the Contractor, the costs incurred by it through the default of the Contractor, provided the City Manager or designee approves the amount thus charged to the Contractor.

The City may require the Surety on the Contractor's bond to take control of the work at once and see to it that all deficiencies of the Contractor are made good with due diligence. As between the City and the Surety, the entire cost of making good such deficiencies shall be borne by the Surety. If the Surety takes over the work, either upon termination of the services of the Contractor or upon instructions from the City to do so, the provisions of the Contract Documents shall govern in respect to the work done by the Surety, the Surety being substituted for the Contractor as to such provisions, including provisions as to the payment for the work and provisions of this section as to the right of the City to do the work itself or to take control of the work.

RIGHT OF OCCUPANCY

The City shall have the right, if necessary, to take possession of and to use any completed or partially

completed portions of the work, if such use be approved by the City Manager or designee even if the time for completing the entire work or such portions of the work has not expired and even if the work has not been finally accepted. Such possession and use shall not constitute an acceptance of such possession and use if it materially interferes with the Contractor's operations. The City shall also have the right to enter the premises with the Contractor for the purpose of doing work not covered by its Contract.

ACCEPTANCE

Final inspection and acceptance of the work shall be made for the City by the City Manager or designee. Such inspection shall be made as soon as practical after the Contractor has notified the City in writing that the work is ready for such inspection.

WAIVER

It is expressly understood and agreed that any waiver granted by the City Manager or designee of any term, provision, or covenants of the Contract shall not constitute a precedent or breach of the same or any other terms, provisions, or covenants of the Contract. Neither the acceptance of the work by the City nor the payment of all or any part of the sum due the Contractor hereunder shall constitute a waiver by the City of any claim which the City may have against the Contractor or Surety under this Contract or otherwise.

INSPECTION

The City Manager or designee and his representative shall, at all times, have access to the work during its construction and shall be furnished with every reasonable facility for ascertaining that the stock and materials used and employed, and the workmanship, are in accordance with the requirements and intentions of the Plans. All work done and all materials furnished shall be subject to their inspection and approval by the City Manager or his designee. If any work should be covered up without approval or consent of City Manager or designee, it must, if required by the City Manager or designee, be uncovered for examination at the Contractor's expense.

The City Manager or designee may order re-examination of questioned work and if so ordered, the Contractor must uncover the work. If such work were found in accordance with the Contract Documents, the City shall pay the cost of re-examination and replacement. If such work be found not in accordance with the Contract Documents, the Contractor shall pay such costs unless they show that the defect in the work was caused by another Contractor, and in that event, the City shall pay such cost.

The inspection of the work shall not relieve the Contractor of any of their obligations to fulfill their Contract as prescribed, and defective work shall be made good and unsuitable materials shall be rejected, notwithstanding that such defective work and materials have been previously overlooked and accepted on estimates for payment. All work shall be tested to the satisfaction of the City Manager or designee before acceptance.

BID REVIEW AND CONTRACT AWARD

Failure to submit all documents requested at the time of bid may deem the Contractor's bid ineligible for award. The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach. The City shall be the sole final judge of qualifications of the bidder to perform service and reserves the exclusive right to accept or reject any bids as it deems to be in the best interests of the City. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS

The laws of the State of Florida do apply to any purchase made under this Request for Bid. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their bid and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Contractor agrees to comply with all applicable portions of Fla. Stat. 448.095. Contractor must use the U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Contractor shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Contractor with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Contractor shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Contractor must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Contractor's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Contractor may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and rebidding costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statue by the Contractor, the Contractor may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all bids, to waive irregularities and technicalities, and to request re-submission. If only one bid is received by the bid date and time listed, the bid may or may not be rejected by the City depending upon bid review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting bids. The City reserves the right to award the contract to a responsible proposer submitting a responsible bid, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, bidders, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFB during any phase of the bidding process. Failure to comply with the provision may result in disqualification of the bidder, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFB shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE

Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION

The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS

The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

IV. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization and telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the bidder's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of bidder to perform service and reserves the exclusive right to accept or reject any bid as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

V. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

   by: _____
   (Print individual's name and title)

   for: _____
   (Print name of entity submitting sworn statement)

   at: _____
   (Business address)

   and (if applicable), its Federal Employer Identification Number (FEIN):

   _____
   (FEIN)

   or, if the entity has no FEIN, include the Social Security Number:

   _____
   (SSN)

   by the individual signing this sworn statement:

   _____
   (Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any bid or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who

knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

COUNTY OF _____

I state that I_____of_____,

(Name and Title) (Name of Firm)

am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. _____, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

I. CONTRACTOR'S BID SUBMITTAL

The company that is submitting a bid declares that it has extensive experience in **Commercial Diving Services.**

The undersigned, as Bidder, hereby declares that the only person or persons interested in the Bid as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Bid or in the Agreement to be entered into; that this Bid or Agreement is made without connection with any other person, company, or parties making a Bid; and that it is in all respects fair and in good faith without collusion or fraud.

The Bidder further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of bids; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Bidder proposes and agrees, if the Bid is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Commercial Diving Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful bidder shall be required to utilize the template Agreement in this Request for Bids (RFB) and any questions regarding the Agreement must be addressed during the RFB process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Bidder proposes to furnish all materials, equipment, labor, and perform the work submitted in their bid schedule for the City of St. Pete Beach **" Commercial Diving Services".**

III. GENERAL CONTRACT TERMS

REQUEST FOR BID

The City of St. Pete Beach is submitting this RFB for bids on the Commercial Diving Services.

LOCATIONS

The City of St. Pete Beach is soliciting bids from qualified Commercial Diving Services for the City.

BID SUBMITTALS

Bid documents must include a signed/notarized Contractor's Bid Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit one electronic bid via Bonfire.

BIDDER INFORMATION

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http:// www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

PRE-BID MEETING

An optional pre-bid meeting will be held on **03/18/2026 at 9:30 AM EST** via Microsoft Teams Video conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and Microsoft Teams Meeting instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS

No oral interpretations will be made to any firms as to the meaning of the scope of work or any other contract documents included in this **RFB.** All questions pertaining to the terms and conditions or scope of work of this Request for Bid **(RFB)** must be sent in writing only via email to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 EST on 03/25/2026**. Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFB**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFB** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so.

BID PACKAGES

Sealed bids will be accepted by the City until **04/08/2026** at **9:00 AM** EST (Deadline). No bids shall be accepted by the City after this deadline – NO EXCEPTIONS. Bid Packages must be electronically submitted via Bonfire Clearly marked as: "**Commercial Dive Services**." If a link is needed for either site, please contact the Procurement Manager (purchasing@stpetebeach.org.) All Bidders are invited to attend this bid opening.

SCOPE OF WORK

The City of St. Pete Beach is seeking a qualified full service commercial diving Contractor with experience in a wide range of applications. The Contractor shall provide a qualified dive team, and all related diving equipment required to assist the City of St. Pete Beach with the cleaning, inspection, repair and maintenance of tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads.

The City of St. Pete Beach has 35 tide check valves, and 25 manatee grates installed at stormwater outfalls throughout the City. Services shall include:

- Debris Removal from Valve, Pipe, Endwalls, and Pit
- Marine Growth Removal from Valve, Pipe, Endwalls, and Pit
- Maintenance of Manatee Grates, when present
- Written and Video Reports of condition per cycle
- Repair and Replacement of in-line and outfall-end type Tidal Check Valves
- Hydraulic Dredging

Services must comply with relevant standards and regulations, including OSHA diving regulations and any applicable environmental guidelines.

CONTRACTOR TO FURNISH

- A Qualified Dive Team
- All Related Diving Equipment
- Underwater Video with Digital Capture
- Shallow Water Dive Package
- Small Pneumatic Tool
- Work Boat / Barge
- Hydraulic Unit
- 4-inch Hydraulic Submersible Pump
- Jet Pump
- 4000 PSI Water Blaster
- Digital Camera

THE CITY OF ST. PETE BEACH TO FURNISH

- A Representative to Coordinate Activities
- A Representative to View Video Real Time and Direct the Crew
- Access to Work Site
- Permits (If required)
- Assist with Lock-Out Tag-Out procedures (training or supervision as needed)
- Procurement of Tidal Check Valves (as needed)

SCHEDULE

Maintenance, cleaning and inspection shall be scheduled per occurrence and may include the full asset inventory or a portion of that inventory for each cycle. Maintenance cycles are to be performed quarterly, or more frequently as-needed, based on City requirements.

Tidal check valve, manatee grate, and other miscellaneous outfall repairs shall be scheduled per occurrence, as-needed.

The Contractor must provide at least 72 hours' notice for scheduling changes. Emergency response for unscheduled maintenance requests must be available within 24 hours.

PERFORMANCE METRICS

The following performance metrics will be used to evaluate the Contractor's work:

- Timeliness of completing tasks as per the agreed schedule.
- Accuracy and thoroughness of written condition reports.
- Compliance with safety standards and regulations.
- Responsiveness to unscheduled maintenance requests.

All reports must be submitted in a digital format (PDF or Word) within ten (10) days of completing each maintenance cycle. Reports should include:

- Detailed descriptions of completed tasks.
- Photographic and video evidence.
- Identified issues and recommendations for future maintenance.

PENALTIES

Failure to adhere to the schedule or meet performance standards may result in penalties, including:

- 5% reduction in payment for delayed work (per day).
- Rework at Contractor's expense for substandard services.

EMERGENCY SERVICES

The Contractor must provide emergency maintenance services within 24 hours of the City's request. The bid form includes an emergency call-out fee to account for this service.

Once a contract is awarded, the selected vendor will be required to submit a detailed fee schedule outlining the main pay items for the project. This fee schedule will be reviewed at the pre-construction meeting and will be used to review pay applications and evaluate project progress.

DETAILED SPECIFICATIONS

LOCATIONS

The locations will cover all tide check valves, stormwater outfalls, manatee grates, subaqueous pipelines, piers, piles, and bulkheads Citywide that are City owned throughout the City of St. Pete Beach Florida.

Standard work hours shall be from 7:30 AM until 6:00 PM, Monday through Saturday. No work shall take place on Sundays or on official City holidays without prior approval by the City Manager or designee at least 1 week prior to the scheduled work. A list of current official City holidays can be found on the City's Human Resources website at http://www.stpetebeach.org/hr/holidays.html. Contractor will coordinate scheduling of work with the City's Project Manager and City's Inspector.

ADDITIONAL WORK DETAILS

Contractors or persons wishing to bid on this project are licensed, bondable and insured in accordance to the City's requirements. The Contractor will furnish all necessary labor, materials, tools, equipment and supplies to complete the scope of work. Bid must also include all costs for licenses, permits, and any material disposal fees.

Bidders shall bring questions, discrepancies, omissions, conflicts or doubt as to meaning of any part of Contract Documents to the attention of the City of St Pete Beach Procurement Manager at least ten (10) business days before bid submittal deadline. Clarification of intent of Contract Documents, if necessary, shall be made available to bidders in the form of an Addendum. Failure to request clarification of interpretation of Contract Documents shall not relieve bidders of their responsibilities to perform the work.

The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids, or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach.

STATEMENT OF WORK

The Contractor shall furnish and pay the cost, including sales tax and all other applicable taxes, licenses, permits and fees, of all the necessary materials not furnished by the City and shall furnish and pay for all the superintendence, labor, tools, equipment, transportation, and perform all the work required for the execution of all services listed in the Bidder's Proposal and Bid Form attached hereto and in strict accordance with the Plans, Specifications, and requirements of the City of St. Pete Beach which are attached hereto and made a part hereof, and any amendments thereto and such supplemental Plans and Specifications which may hereafter be approved.

BEGINNING DATE

The Contractor shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Contractor shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City. The Contractor must commence construction activities within thirty (30) business days of NTP to prepare and procure materials. Any change to the start date or the work schedule included with this bid must be submitted in writing to and approved by the City Manager or designee.

COMPLETION OF WORK

The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". The contract will be for (3) three years from time of execution (Date of last signature) of the contract with (2) additional (1) one year extensions if agreed upon by the City and vendor. .

EXAMINATION OF SITE

Bidders may visit specific areas with advanced notice.

ASSURANCES

The responding Contractor shall provide a statement of assurance that the Contractor is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

TRAFFIC CONTROL AND STAGING AREA

Contractor shall include all costs associated with vehicular and pedestrian traffic control and maintenance during the project. Contractor shall be responsible for providing a staging area. The location of this area must be approved by the City Manager or designee. The Contractor will be required to control the area including any additional fencing or barricades and Contractor will be responsible for the restoration of this and all other staging areas provided by the City.

ASSIGNMENT AND TRANSFER OF CONTRACT

The Contractor shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS

The Contractor shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PERFORMANCE PAYMENT BOND

Not required for this contract.

LIQUIDATED DAMAGES

If the work embraced by this Contract is not completed on or before the date set for completion or any extension thereof, the actual damages for the delay will be impossible to determine and in lieu thereof, the Contractor shall pay to the City fixed, agreed, and liquidated damages in the amount of either Five-Hundred Dollars ($500) per day for each calendar day of delay until the work is satisfactorily completed.

PAYMENT

Payment shall be made to the Contractor for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Contractor will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Contractor without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Contractor's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Contractor to make a change in the Work, and if the City and the Contractor do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the contractor shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Contractor believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, he shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Contractor first discovered the occurrence. The Contractor shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Contractor shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Contractor shall prepare bids detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Contractor's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Contractor's bids shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable bid will not justify an increase in Contract Amount or Contract Time. Contractor agrees that it shall give the City access to any and all of Contractor's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Contractor for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Contractor shall be at his expense without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Contractor or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Contractor bids or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to

be used shall be those used for the Contractor's costs, except that the term "Subcontractor" shall replace the term "Contractor," context permitting.

Changes in Contract Amount for extensions in Contract Time shall exclude costs that are unaffected or do not relate to the extension in Contract Time, such as: (a) operating costs of construction equipment assigned to the Work on a continuing basis, (b) operating costs and owned/rental costs of construction equipment (crane used for specific lifts, concrete pump used for specific pours, etc.), and (c) fully paid site facilities, tools, etc.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Contractor, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit. The out-of-pocket cost shall only include those direct costs which are needed to perform the work such as labor (including payroll taxes, fringe benefits, labor burden and workers' insurance), materials, equipment, and other incidental out-of-pocket construction costs directly involved in the work, including but not limited to small tools, expendables and material costs but shall not include project management or project supervisory costs unless the Change Order includes an increase in the Contract time.

In such case, the Contractor will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Contractor to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

To be eligible for consideration, the Contractor's written claim for a change in the Contract price, including claim(s) from sub-contractors, shall include an itemized cost breakdown with supporting data as described below:

A. For labor: Provide written documentation from the Contractor and Subcontractors or others as appropriate in the form of a detailed breakdown by each labor classification involved indicating the number of hours of Work involved and the hourly payroll rate applicable to each to substantiate the basis and amount of the direct labor cost. The direct labor cost may be increased to provide an allowance for indirect payroll costs (labor burden), such as payroll taxes, fringe benefits, and workers insurance after all premium discounts, rebates and other appropriate reductions have been taken.

B. For material, supplies, equipment, furnishings, etc., to be installed or included in the Work: Provide written documentation from the Contractor and Subcontractors, suppliers, etc., to substantiate the basis and amount of the various cost items involved. Material costs shall reflect the Contractor's reasonably anticipated net actual cost after consideration of trade discounts and volume rebates.

C. For construction equipment: Provide written documentation in the form of a detailed breakdown by each construction equipment category, indicating the applicable unit rates (i.e., dollar amount per hour, dollar amount per day etc.,) and the number of hours, days, etc. to substantiate the basis and amount of the construction equipment out-of-pocket costs.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Contractor (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Contractor employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

CITY'S RIGHT TO DIRECT PURCHASE

The City has reserved the right to purchase certain items and materials for this project directly in an effort to save applicable sales tax in compliance with Florida Law.

The City will issue purchase orders directly to the vendors supplying the equipment being directly purchased by the City for this project. Each Purchase Order will be accompanied by the City's Certificate of Exemption and a Certificate of Entitlement. All direct purchase vendor invoices will be issued to the City of St. Pete Beach, and the City will issue payment to each direct purchase vendor from City funds. The City will take title to the equipment at time of delivery from the vendor and will issue a separate Certificate of Entitlement for each purchase order.

The Contractor shall assist the City with receipt of materials furnished by the City in accordance with these Special Provisions including, but not limited to, verifying correct quantities, verifying documents of orders in a timely manner, providing and obtaining all warranties and guarantees required by the Contract Documents, assist with inspection of the goods at the time of delivery and notify the City immediately of any deficiencies noted. It is understood that the owner assumes the risk of damage or loss during the time that the building materials are physically stored at the job site prior to their installation or incorporation into the project. The Contractor shall coordinate with the City regarding the delivery schedules, sequence of delivery, loading orientation, and other arrangements normally required by the Contractor for the particular material furnished.

As City Furnished Materials are delivered to the job site and accepted by the City, the City shall notify the Contractor who will assist the City to visually inspect all shipments from the suppliers. The City will approve the vendor's invoice for material delivered upon adequate inspection and recommendation of the Contractor. The City shall assure that each delivery of City Furnished Materials is accompanied by documentation adequate to identify the Purchase Order against which the purchase is made and Contract Documents including but not limited to Contract, Plans, Specifications, and approved Shop Drawings. This documentation may consist of a delivery ticket, bill of lading and an invoice from the supplier conforming

to the Purchase Order together with such additional information as the City may deem necessary.

PAYMENTS FOR WORK COMPLETED

Partial payments will be made as the work progresses (if applicable) at the end of each calendar month, or as soon thereafter as practicable on estimates made by the City Manager or designee and as approved by the City, provided that the Contractor is performing the overall job in a diligent manner. In making partial payments, there shall be retained five percent (5%) on the amount of each estimate until final completion and acceptance of all work covered by the Contract. Upon completion and acceptance of the work, the City Manager or designee shall issue a certificate that the work has been completed and accepted by them under the conditions of the Contract and shall make and approve the final estimate of the work. The entire balance found to be due the Contractor, including that retained by the City, should be paid to the Contractor. Such payment shall be conditioned, however, upon the submission by the Contractor of evidence satisfactory to the City that all claims for labor, material, and any other outstanding indebtedness in connection with the Contract have been paid. Such payment shall also be conditioned upon approval and acceptance of the construction and improvements by the City.

If after the work has been substantially completed, full completion thereof is materially delayed through no fault of the Contractor and the City Manager or designee so certifies, the City shall upon the Certificate of the City Manager or designee, and without terminating the Contract make payment for the balance due for that portion of the work fully completed and accepted. Such payment shall be made under the terms and conditions governing final payment, except that it shall not constitute a waiver of claim. If such delay occurs and payment is made under this clause, the Contractor shall nevertheless be prepared to complete the work in a timely manner upon the remedy or removal of such delay, and shall be bound under this Contract for the completion of such work unless this Contract is otherwise terminated. All payments will be made in accordance with the Local Government Prompt Payment Act, Chapter 218, Florida Statutes.

PAYMENTS WITHHELD

The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Contractor to make payments properly to Subcontractors or for material or labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Contractor

f) Failure of the Contractor to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS

Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Contractor, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such

sums to the Contractor.

Before the approval of the final payment, the Contractor shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS

If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Contractor, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Contractor all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Contractor and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE

The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

INTENT OF PLANS AND SPECIFICATIONS

The Contractor shall keep on the job a copy of the Plans and Specifications and shall at any time give the City Manager or designee access thereto. Anything mentioned in the Specifications and not shown on the Plans or shown on the Plans and not mentioned in the Specifications, shall be of like effect as if shown or mentioned in both. The Contractor shall not take advantage of any errors, discrepancies or omissions that may exist in the Plans and Specifications but shall immediately call them to the attention of the City Manager or designee whose interpretation or correction thereof shall be conclusive. Should a conflict occur between the General Specifications and any Supplemental Specifications and/or Plans, the latter shall govern.

LICENSES AND PERMITS

The Contractor shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the contractor is responsible for non-compliance of all permit requirements, including all fines resulting from Contractor's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Contractor shall be

responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the contractor awarded the project, MUST also register their license with the City.

SUPERINTENDENCE

The Contractor shall constantly superintend all the work embraced in this Contract in person or by a responsible agent who shall have in writing, full authority to act for them and to carry out all the instructions given by the City Manager or designee.

LABOR PROVISIONS

The Contractor and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed.

INSURANCE

The Contractor shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Contractor's General Public Liability and Property Damage Insurance issued to the Contractor and protecting the Contractor from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Contractor or by any Subcontractor hired by the Contractor or anyone directly or indirectly employed by the Contractor or hired by the Contractor.

The successful Contractor shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Contractor or third party under the direction or control of the Contractor. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Contractor must furnish the City with Certificate of Insurance prior to commencement of work. An approved Certificate of Insurance furnished by the Contractor's carrier to guarantee the Contractor being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY

The Contractor shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Contractor shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Contractor shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Contractor will provide security on off days and holidays. The Contractor shall be responsible for all charges incurred with such action.

The Contractor shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Contractor, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Contractor shall also protect adjacent property as required by law.

PARKING

The Contractor shall arrange with City Manager or designee for temporary parking areas to accommodate construction personnel and construction equipment. Note that limited parking spaces are available in the City of St. Pete Beach. The Contractor will be asked to coordinate with the City's representative on site on a regular basis to minimize the impact on residents and visitors.

TRANSPORTATION, HANDLING AND STORAGE

The Contractor shall transport, handle, protect and store products in accordance with manufacturer's instructions and all environmental regulatory agencies.

VEHICLES

Business vehicles shall be identified on both sides with the name of the company.

ENVIRONMENTAL PROTECTION

It shall be the Contractor's responsibility to implement construction methods, best management practices, and erosion control methods that avoid water pollution as required by the State of Florida Department of Environmental Protection (FDEP), City of St. Pete Beach, and Pinellas County. Any Contractors in violation of the City of St. Pete Beach Regulations, Pinellas County Regulations, Florida Department of Environmental Protection Regulations, or any other regulatory agency regulations shall be the sole responsibility of the Contractor. The Contractor shall hold harmless the City of St. Pete Beach and the City Manager or designee from any fines and litigation resulting from the Contractor's actions. The Contractor shall pay all attorneys' fees, fines, penalties and any other such expenses resulting from the Contractor's actions. The Contractor shall provide all necessary measures to prevent any materials whatsoever from entering the waterway except for those materials, which are shown, on the plans as completed structures. The Contractor shall provide MSDS sheets to the City Manager or designee on all applicable materials before applying those materials. The Contractor shall secure the necessary education, certifications,

licenses and permits required by state and local agencies to operate and manage a construction site, including but not limited to, FDEP requirements related to Coastal Construction Control Line. The Contractor shall abide by all rules and regulations set forth and required by the City of St. Pete Beach's MS4 NPDES Permit.

TIMELY DEMAND FOR STAKES AND INSTRUCTIONS

The Contractor shall provide reasonable and necessary materials, opportunities, and assistance for setting stakes and making measurements, including the furnishing of a rodman, or a chainman at intermittent times during the construction period. They shall not proceed until they have received such stakes and instructions as may be necessary as the work progresses. The work shall be done in strict conformity with such stakes and instructions. The Contractor shall carefully preserve benchmarks, reference points and stakes, and in case of willful or careless destruction, they will be charged with the resulting expense and shall be responsible for any mistakes that may be caused by their unnecessary loss or disturbance.

WORKMANSHIP

The Contractor acknowledges that they have satisfied themselves as to the nature and location of the work; the general and local conditions including but not restricted to those bearing upon transportation, disposal, handling and storage of materials; availability of labor, water, electric power, roads; and uncertainties of weather, surface conditions, subsurface conditions, tides or similar physical conditions at the site, the character of equipment and facilities required to prosecute the work. Any failure by the Contractor to acquaint themselves with any aspect of the work or with any of the applicable conditions shall not relieve the Contractor from the responsibility to successfully perform the work under the Contract Documents, nor shall it be considered the basis for any claim for additional time or compensation.

UTILITIES

The Contractor shall anticipate all underground obstructions such as water lines, gas lines, sewer lines, utility lines, or any other public or private facilities and debris. In all cases where existing utility lines may be interfered with by the work, the Contractor shall give a minimum of thirty-six (36) hours' notice to the owners of such utilities, to permit them to relocate the lines prior to construction. No extra payment shall be allowed for the removal, replacement, repair or possible increased cost caused by underground obstructions. The location of existing structures and utilities provided in the plans are approximate only. Any damage to existing structures to remain or work of any kind shall be repaired or restored promptly by, and at the expense of the Contractor.

The Contractor shall at all times protect all desirable trees, plants, curbs, sidewalks, irrigation components, and structures not requiring removal to accomplish the work, whether or not they are shown on the plans. The Contractor must contact the City to obtain tree removal permits for the removal of any tree not identified for removal in the Project Plans.

In matters of restoration, all materials, construction, and workmanship shall be acceptable to, and approved by the City of St. Pete Beach and the City Manager or designee. No changes in size, shape, configuration, location, materials, or construction shall be made without prior written authorization from the City Manager or designee. Any demolition debris and other debris shall be hauled offsite and properly disposed of by the Contractor and shall be inclusive to the prices as stated in the BID SCHEDULE, unless otherwise stipulated as part of the project to remain.

No interruption of ingress and egress to private property shall be made unless the Contractor has made prior arrangements acceptable to the owner of the affected property. The City Manager or designee shall

notify affected residents/property owners of impending activity or inconvenience via door hanger.

The Contractor shall provide all traffic control devices utilized during construction and meet the requirements set forth in the Florida State Department of Transportation "Manual on Traffic Control and Safe Practices for Street and Highway Construction, Maintenance, and Utility Operations."

CLEANING UP

Upon completion or termination of the work the Contractor shall, as directed by the City Manager or designee, remove from the vicinity of the work all equipment and temporary structures, waste materials and rubbish resulting from his operations, leaving the premises in a neat and presentable condition. All debris generated by the Contractor will be removed before leaving the area. All areas will be raked to remove smaller debris. All surrounding sidewalks, parking lots and roadways will be cleared of any dust or debris generated by the Contractor. In the event of their failure to do so, the City at the expense of the Contractor may do the same, and their Surety shall be responsible.

DEFECTIVE WORK OR MATERIAL

The Contractor shall promptly remove from the premises all work and materials condemned by the City Manager or designee as failing to conform to the Contract, whether incorporated or not, and the Contractor shall promptly replace and re-execute his own work in accordance with the Contract and without expense to the City and shall bear the expense of making good all work of other Contractors destroyed or damaged by such removal or replacement.

If the Contractor does not remove such condemned work or materials within a reasonable time after notice, the City may remove them and store the materials at the expense of the Contractor. If the Contractor does not pay the expense of such removal within ten (10) business days' time thereafter, the City may, upon thirty (30) business days written notice sell such materials at auction or at private sale and shall account for the net proceeds thereof after deducting all the costs and expenses that should have been borne by the Contractor.

DISPUTE RESOLUTION

The Contract shall be construed under Florida law. The parties agree that all controversies, claims and other matters in question between the parties arising out of or relating to this Contract or its breach shall be resolved through mediation. Upon notice of any party to the Contract of a dispute, question or controversy, the parties shall agree to the appointment of a qualified mediator. A qualified mediator is a person who has received at least forty (40) hours of mediation training and has actual experience as a mediator in resolving contract disputes. If the dispute, question or controversy is not resolved through mediation within sixty (60) business days of a notice of the dispute between the parties, the City reserves the right to seek resolution through court action.

INDEMNIFICATION

In consideration of the payment of ten dollars ($10.00) as part of the above purchase price, Contractor shall indemnify, defend, and hold harmless the City, its officers and employees, from liabilities, damages, losses and costs, including but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the responding firm and any persons employed or utilized by the responding firm in the performance of the Contract.

GENERAL WARRANTY

Neither the final certificate nor any provision in the Contract Documents nor partial or entire occupancy of the premises by the City shall constitute an acceptance of work not done in accordance with the Contract Documents or relieve the Contractor of liability in respect to any express warranties or responsibility for faulty materials or workmanship. The Contractor shall remedy any defects in the work and pay for any damage to other work resulting therefrom that shall appear within a period of eighteen (18) months from the date of final acceptance of the work, unless a longer period is specified. The City shall give notice of observed defects with reasonable promptness.

LAND OF CITY, USE OF, BY CONTRACTOR

The City shall provide the land upon which the work under this Contract is to be done, and will, so far as is convenient, permit the Contractor to use as much of the land as is required for the erection of temporary construction facilities and storage of materials, together with the right of access to same, but beyond this, the Contractor shall provide, at his/her cost and expense, any additional land required. It will be the responsibility of the Contractor to repair or restore to the satisfaction of the City, at their own expense, any damage to land used for the above stated activities or any other activities approved by the City.

OTHER WORK

Wherever work being done by the City or by other Contractors is contiguous to work covered by this Contract, the respective rights of the various interests involved shall be established by the City Manager or designee to secure the completion of the various portions of the work in general harmony.

OTHER CONTRACTS

The City may award other Contracts. The Contractor shall fully cooperate with such other Contractors and carefully fit his/her own work to that provided under other Contracts, as may be with the performance of work by any other Contractor or City.

COOPERATIVE PURCHASING

Pursuant to their own governing laws and subject to the agreement of the Contractor, governmental entities may make purchases under the terms and conditions contained in the executed Contract, if agreed to by Contractor. Such purchases are independent of the Contract between the City and the Contractor, and the City is not a party to these transactions. Agencies seeking to make purchases under this Contract are required to follow the requirements of Rule 60A-1.045(5), F.A.C.

DELAYS AND EXTENSION OF TIME

If the Contractor should be delayed at any time in the progress of the work by an act or neglect of the City or the City Manager or designee, or of any employee of either, or by any separate Contractor employed by the City, or by changes ordered in the work, or by strike, lockouts, fire, unusual delay in transportation, unavoidable casualties, or any cases beyond the Contractor's control, or by delay authorized by the City Manager or designee, or by any cause which the City Manager or designee shall decide to justify the delay, then the time of completion shall be extended for such reasonable time as the City Manager or designee may decide. No such extension shall be made for a delay that occurs more than five (5) business days before a claim is made in writing to the City Manager or designee. In the case of a continued cause of delay, only

one (1) claim is necessary. This section does not exclude the recovery of damages for delay by either party under other provisions in the Contract Documents.

CITY'S RIGHT TO TAKE OVER THE WORK

If the Contractor shall be adjudged bankrupt, or if they should make a general assignment for the benefit of its creditors, or if a receiver should be appointed to take over their affairs, or if they should fail to prosecute their work with due diligence and carry the work forward in accordance with its' work schedule and the time limits set forth in the Contract Documents, or if they should fail to substantially perform one or more of the provisions of the Contact Documents to be performed by them, the City may serve written notice on the Contractor and the Surety on its' performance bond, stating the City's intention to exercise one of the remedies hereinafter set forth and the grounds upon which the City bases its right to exercise such remedy. In any event, unless the matter complained of is satisfactorily cleared within ten (10) business days after the service of such notice, the City may, without prejudice to any other right or remedy exercise one of such remedies at once; having first obtained a certificate from the City Manager or designee that such sufficient cause exists to justify such action.

The City may terminate the services of the Contractor, which termination shall take effect immediately upon service of notice thereof on the Contractor and their Surety, whereupon the Surety shall have the right to take over and perform the Contract. If the Surety does not commence performance of the Contract within ten (10) ten days after service of the notice of termination, the City may itself take over the work, take possession of and use all materials, tools, equipment, and appliances on the premises and prosecute the work to completion by such means as it shall deem best. In the event of such termination of their service, the Contractor shall not be entitled to any further payment under their Contract until the work is completed and accepted. If the City takes over the work and the unpaid Contract balance exceeds the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the excess unpaid Contract balance shall be paid to the Contractor. If the City takes over the work and the unpaid Contract balance does not exceed the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the Contractor and his Surety shall pay the difference to the City. The City Manager or designee shall certify such cost, expenses, and damages.

The City may take control of the work and either make good the deficiencies of the Contractor itself or direct the activities of the Contractor in doing so, employing such additional help as the City deems advisable. In such event, the City shall be entitled to collect from the Contractor and his Surety, or to deduct from any payment then or thereafter due the Contractor, the costs incurred by it through the default of the Contractor, provided the City Manager or designee approves the amount thus charged to the Contractor.

The City may require the Surety on the Contractor's bond to take control of the work at once and see to it that all deficiencies of the Contractor are made good with due diligence. As between the City and the Surety, the entire cost of making good such deficiencies shall be borne by the Surety. If the Surety takes over the work, either upon termination of the services of the Contractor or upon instructions from the City to do so, the provisions of the Contract Documents shall govern in respect to the work done by the Surety, the Surety being substituted for the Contractor as to such provisions, including provisions as to the payment for the work and provisions of this section as to the right of the City to do the work itself or to take control of the work.

RIGHT OF OCCUPANCY

The City shall have the right, if necessary, to take possession of and to use any completed or partially

completed portions of the work, if such use be approved by the City Manager or designee even if the time for completing the entire work or such portions of the work has not expired and even if the work has not been finally accepted. Such possession and use shall not constitute an acceptance of such possession and use if it materially interferes with the Contractor's operations. The City shall also have the right to enter the premises with the Contractor for the purpose of doing work not covered by its Contract.

ACCEPTANCE

Final inspection and acceptance of the work shall be made for the City by the City Manager or designee. Such inspection shall be made as soon as practical after the Contractor has notified the City in writing that the work is ready for such inspection.

WAIVER

It is expressly understood and agreed that any waiver granted by the City Manager or designee of any term, provision, or covenants of the Contract shall not constitute a precedent or breach of the same or any other terms, provisions, or covenants of the Contract. Neither the acceptance of the work by the City nor the payment of all or any part of the sum due the Contractor hereunder shall constitute a waiver by the City of any claim which the City may have against the Contractor or Surety under this Contract or otherwise.

INSPECTION

The City Manager or designee and his representative shall, at all times, have access to the work during its construction and shall be furnished with every reasonable facility for ascertaining that the stock and materials used and employed, and the workmanship, are in accordance with the requirements and intentions of the Plans. All work done and all materials furnished shall be subject to their inspection and approval by the City Manager or his designee. If any work should be covered up without approval or consent of City Manager or designee, it must, if required by the City Manager or designee, be uncovered for examination at the Contractor's expense.

The City Manager or designee may order re-examination of questioned work and if so ordered, the Contractor must uncover the work. If such work were found in accordance with the Contract Documents, the City shall pay the cost of re-examination and replacement. If such work be found not in accordance with the Contract Documents, the Contractor shall pay such costs unless they show that the defect in the work was caused by another Contractor, and in that event, the City shall pay such cost.

The inspection of the work shall not relieve the Contractor of any of their obligations to fulfill their Contract as prescribed, and defective work shall be made good and unsuitable materials shall be rejected, notwithstanding that such defective work and materials have been previously overlooked and accepted on estimates for payment. All work shall be tested to the satisfaction of the City Manager or designee before acceptance.

BID REVIEW AND CONTRACT AWARD

Failure to submit all documents requested at the time of bid may deem the Contractor's bid ineligible for award. The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach. The City shall be the sole final judge of qualifications of the bidder to perform service and reserves the exclusive right to accept or reject any bids as it deems to be in the best interests of the City. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS

The laws of the State of Florida do apply to any purchase made under this Request for Bid. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their bid and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Contractor agrees to comply with all applicable portions of Fla. Stat. 448.095. Contractor must use the U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Contractor shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Contractor with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Contractor shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Contractor must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Contractor's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Contractor may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and rebidding costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statue by the Contractor, the Contractor may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all bids, to waive irregularities and technicalities, and to request re-submission. If only one bid is received by the bid date and time listed, the bid may or may not be rejected by the City depending upon bid review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting bids. The City reserves the right to award the contract to a responsible proposer submitting a responsible bid, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, bidders, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFB during any phase of the bidding process. Failure to comply with the provision may result in disqualification of the bidder, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFB shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE

Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION

The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS

The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

IV. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization and telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the bidder's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of bidder to perform service and reserves the exclusive right to accept or reject any bid as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

V. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

by: James "Paul" Overby
(Print individual's name and title)

for: Dive-Tech International, Inc.
(Print name of entity submitting sworn statement)

at: Post Office Box 3177 Pinellas Park , FL 33780
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

59-3499327
(FEIN)

or, if the entity has no FEIN, include the Social Security Number:

N/A
(SSN)

by the individual signing this sworn statement:

(Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any bid or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who

knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☒ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VI. NON-COLLUSION AFFADAVIT

STATE OF Florida

COUNTY OF Pinellas

I state that I James "Paul" Overby (Name and Title) of Dive-Tech International, Inc. (Name of Firm), am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. Dive-Tech International, Inc., its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

Paragraph 4:
This statement is an assurance that Dive-Tech International, Inc. is not in any violation of any statues or regulatory rules that might have impact on our operations.

Dive-Tech International, Inc.

Firm Overview

Dive-Tech International, Inc., (DTI), was established in 1980 to service marine construction and inspection needs on the West Coast of Florida. Through the late 1980's and early 1990's DTI expanded into working at power plants for utility work and other types of water borne facilities. Through recruiting, training, and improved resources, DTI has grown into a full service commercial diving and inspection company. DTI is servicing the Eastern, Mid-United States, as well as, the Caribbean.

Dive-Tech International, Inc. has performed underwater inspections of several facilities in and around the Tampa Bay region. Along with basic inspection methods, DTI has advanced into more specialized underwater assessment methods. These methods include underwater ultrasonic testing, concrete coring, underwater video recordings with digital capture, coating inspections, as well as the use of a remotely operated vehicle, (ROV).

With the use of these methods, Dive-Tech International, Inc. has successfully inspected and repaired several facilities in the Tampa Bay area. Some of these inspections include:

- Replaced valve and sluice gates at the David L. Tippin Water Treatment Facility
- Leak inspection of the clear well joints using dye and an underwater video system at the David L. Tippin Water Treatment Facility
- Inspection and evaluation of the Tampa Port Authorities Terminal #6 and Mosaic's Big Bend Terminal
- Provided engineering firm with core samples of the spillway components at the Lake Manatee Dam
- Design and install repairs to a mooring dolphin at Berth 256
- Inspection of multiple SWFMD water control structures

Dive-Tech International, Inc. is a full service commercial diving company, a Certified Small Business Enterprise, (SBE), as well as a member of the Association of Diving Contractors, (ADC), and ISNetworld, (ISN). Additionally, we are fully insured and comply with 29 CFR 1910 Subpart T (O.S.H.A.), 46 CFR 197 Subpart B (U.S.C.G.) as well as DTI's own Safe Practices Manual.

DIVE-TECH INTERNATIONAL, INC.
CONTRACTOR OWNED EQUIPMENT RENTAL RATES FOR 2026

Most of the diving equipment used is included in our labor costs: exceptions listed below. The list is comprised of equipment with a purchase value of $ 500.00 or more.

Equipment	Per Day		Equipment	Per Day
Digital Camera	150.00		4000 PSI Water Blaster	150.00
Underwater Video System with Digital Capture	450.00		CP-9 Rotary Rock Drill	100.00
Small Pneumatic Tools	35.00		6" Hydraulic Dredge System	700.00
Small Hand Tools	35.00		6" Hydraulic Sludge Pump (Pump Only)	390.00
Surface Torch	45.00		6" Hose (25')	12.50
Magnetic Drill	45.00		50' Turbidity Barrier	50.00
Underwater Welding Rig	125.00		Jet Pump	125.00
Underwater Burning Rig	125.00		1" Pneumatic Impact	100.00
D. C. Welding Machine	150.00		Radio Detection Equipment	300.00
Underwater Ultrasonic Testing Equipment	325.00		Remotely Operated Vehicle (ROV)	500.00
Hydraulic Unit	250.00		Dive Compressor	50.00
Hydraulic Hose (Per 50' Sections)	15.00		Water Reservoir & Pump	50.00
Hydraulic Grinder	125.00		Lift Barrels	15.00
Hydraulic Cutter Head	150.00		Small Generator	75.00
Hydraulic Drill	150.00		Chiller Unit	150.00
Hydraulic Impact	150.00		Dry Suit (1)	200.00
Hydraulic Core Drill	350.00		Proton Magnetometer	200.00
Underwater Hydraulic Chainsaw (Timber)	200.00		2" X 20' Polyester Slings (2)	50.00
Underwater Hydraulic Cut Off Saw (Concrete)	300.00		Potable Water Dive System	450.00
4" Hydraulic Submersible Pump	95.00		Additional Vehicle	75.00
4" Hose Suction (50')/Discharge (50')	15.00		Work Boat	325.00
600' Dive Umbilical (2)	175.00		Large Work Boat (plus fuel)	450.00
Hot Water Unit	200.00		20' X10' Work Barge	150.00
Shallow Water Dive Package	150.00		5' X 10' Section of Barge	75.00

CONSUMABLES

Material Description	Price		Material Description	Price
Oxygen (Cylinder)	Requires Quote		Chain Saw Bar or Chain Saw Chain	Requires Quote
Acetylene (Cylinder)	Requires Quote		Sand/Cement Bags (Each)	Requires Quote
Splash Zone Epoxy (Per Kit)	Requires Quote		Hydraulic Cement (Per Bucket)	Requires Quote
Underwater Cutting Rods (Each)	Requires Quote		Titanium Burr Bit (Each)	Requires Quote
Buoy Assemblies – (Upper and Lower Buoys) - Each	30.00		CP9 Drill Bits (Each)	Requires Quote

NOTE: Any other equipment the Corporation (Client) may authorize the Contractor to furnish will be rented from a Vendor. The charge(s) will be passed through with a 15% mark-up
NOTE: All consumables and supplies will be invoiced at cost plus 15%

EXHIBIT "D"

Conditional Federal/Grant-Funded Contract Addendum

(Place Conditional Federal/Grant-Funded Contract Addendum behind this page)

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

Federal/Grant Program: [insert]
Federal Awarding Agency: [insert]
Pass-Through Entity: [insert, if applicable]
Assistance Listing Number: [insert, if applicable]
Federal Award Identification Number: [insert, if applicable]
Award or Disaster Declaration Date: [insert, if applicable]
Project Number: [insert]
Special Award Conditions: [insert or attach]

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Authorize the City Manager to execute the Agreement with RCM Utilities, LLC for Wastewater System Rehabilitation Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Action Request: Motion to authorize the City Manager to execute the Agreement with RCM Utilities, LLC for Wastewater System Rehabilitation Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Strategic Objective: Reliable Infrastructure

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Proposals (RFP) for Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining, and point repairs. Fifteen (15) responsive proposals were received on April 8, 2026. Following evaluation, the City's selection committee recommended award to Flotech Environmental LLC, Hinterland Group, LLC, RCM Utilities, LLC, Rowland (DE), LLC, and SAK Construction, LLC based on the following criteria:

- Qualifications and Experience
- References and Past Performance
- Capacity to Perform the Work
- Cost

The contract provides not-to-exceed unit prices for wastewater system manhole rehabilitation, cured-in-place pipe (CIPP) lining, and point repairs on an as-needed basis, allowing the City to efficiently address defects identified through routine inspections, CCTV assessments, emergency response activities, regulatory requirements, and ongoing asset management programs.

Work will be authorized by task order on an as-needed basis in an amount not to exceed annually budgeted funding. The initial contract term is three (3) years with the option for two (2) additional one (1) year renewals upon mutual agreement and annual appropriation of funds.

Approval of this agreement will provide the City with qualified contractors to perform wastewater rehabilitation services that reduce inflow and infiltration, improve system reliability, extend asset service life, and support the City's wastewater capital improvement and maintenance programs.

Funding: 401.5350.565000 Wastewater Capital Improvements (remaining balance $2,746,041.85)

401.5350.546007 – Wastewater Repairs
(remaining balance $279,990.50)

Attachments: 1. RCM Services Agreement Signed

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Wastewater System Rehabilitation Services

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and **RCM Utilities, LLC.** (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Proposals, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its 06/23/2026, public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed the Annual Budgeted amount. Funding will be awarded by Task Orders.

b. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

c. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

d. Contractor must comply with any and all Federal, State, and local laws and regulations

now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

e. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.
   a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished

under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of (3) three years with (2) two, (1) one-year extensions from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement.

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured and providing coverage up through and including the final performance of any services provided

herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved, and any amount withheld is not subject to payment of interest by the City. The above provisions

will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:

a. Standard Contract Addendum (Exhibit "A")
b. Request for Bid/Proposal (Exhibit "B")
c. Vendor Bid/Proposal (Exhibit "C")

d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:
RCM Utilities, LLC.
1451 Pine Grove Road
Eustis, FL 32726

As to City:
City Manager
City of St. Pete Beach
155 Corey Avenue
St. Pete Beach, FL 33706

21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Contract Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this 2 day of June, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and **RCM Utilities, LLC**, hereinafter referred to as "Contractor", concerning that certain agreement dated the 2 day of June, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian
cityclerk@stpetebeach.org

Phone: 727-363-9220
155 Corey Avenue
St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

I. INVITATION

The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining and point repairs.

The proposed work will be located within the City of St. Pete Beach in Pinellas County, FL, throughout the entire wastewater collection and transmission system. Each asset to be rehabilitated and the type of rehabilitation required will be identified in each individual Work Order with the location shown on corresponding geographical exhibits.

The successful proposer shall furnish all labor, superintendence, materials, power, light, heat, fuel, water, tools, appliances, equipment, supplies, shop drawings, working drawings and other means of construction necessary or proper for performing and completing the work. The Contractor is responsible for obtaining all required permits necessary for the work, including all applications and review fees, other than those permits which may have already been obtained. The Contractor shall perform and complete the work in a speedy and efficient manner consistent with safety of life and property and to the city's satisfaction, and in strict accordance with the Contract Documents. The Contractor shall repair or restore all structures and property damaged or disturbed during performance of the work.

The types of projects include:

- **Wastewater System Manhole Rehabilitation (Manhole Project):**
  The Contractor shall furnish all labor, material, equipment, and services necessary for manhole rehabilitation. The work shall be completed at various locations through the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, re-building manhole bench and channels, ring (frame) and cover adjustment and replacement, pavement restoration, inflow/infiltration elimination, surface preparation, cementitious and polymer coatings installation, internal chimney sealing, manhole cover insert installation, testing, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.
- **Wastewater System Pipe Lining (Lining Project):**
  The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater pipe rehabilitation using Cured-In-Place-Pipe (CIPP) lining. The work shall be completed at various locations through the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, CIPP liner installation, reconnection of service laterals, testing of CIPP liners, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.
- **Wastewater System Point Repairs (Point Repair Project):**
  The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater point repairs. The work shall be completed at various locations throughout the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, dewatering, directional drilling, jack and boring, remove unsuitable materials below trench grade, sanitary sewer gravity and force main installation, force main and gravity main connections, remove out of service gravity and force mains, install manhole connections, grout out of service pipe, install valves and associated appurtenances, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.

IV. GENERAL CONTRACT TERMS

REQUEST FOR PROPOSALS
Wastewater System Rehabilitation Services

REQUEST FOR PROPOSAL SUMMARY
The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining and point repairs.

The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The "City" intends to **award multiple contracts** to vendors who can provide the best value for services. Vendors may submit proposals for all, some, or only one of the categories. **It is not mandatory to submit a proposal for every item listed**. A bidder may bid on any, all, or none of the items. The "City" reserves the right to select multiple vendors to optimize cost-efficiency and capability across different segments of the project. Proposals will be evaluated based on capability, cost, and capacity to perform the specific line items requested.

PROPOSAL SUBMITTALS
Proposal documents must include a signed/notarized Contractor's Proposal Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit electronic proposals only. Bidders must submit electronically only through Bonfire platform. When bidding electronically, only one copy should be submitted.

Proposals shall include the following:

- A signed and notarized Proposer's Contract Proposal.
- Current proof of insurance certificate.
- A list of references and minimum qualifications as outlined in Section V.
- One copy of bid electronically submitted to Bonfire platform.

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http://www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

Proposers or persons wishing to submit a proposal on this project shall be licensed, and insured in accordance with the City's requirements

The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals, or accept any proposal or part thereof deemed to be in the best interests to the City of St. Pete Beach.

Electronic proposals must be submitted by **9:00 AM on April 08, 2026 (Deadline),** clearly marked as: **"Wastewater System Rehabilitation Services."**

PRE-PROPOSAL MEETING
An optional pre-proposal meeting will be held on **March 18, 2026 at 11:00 AM EST** via Microsoft Teams conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS
No oral interpretations will be made to any firms as to the meaning of the scope of work or any other contract documents included in this **RFP.** All questions pertaining to the terms and conditions or scope of work of this Request for Proposal **(RFP)** must be sent in writing via email only to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 AM EST on March 25, 2026.** Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFP**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFP** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so. If the Proposer discovered the opportunity through the online platform (Bonfire), do not submit questions through these platforms. **Only questions emailed directly to the City Procurement Manager will be answered.**

BEGINNING DATE
The Proposer shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Proposer shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City.

COMPLETION OF WORK
The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

COSTS INCURRED BY PROPOSERS
All expenses involved with the preparation and submission of proposals to the City, or any work performed in connection therewith, shall be borne solely by the Proposers. No payment will be made for any responses received or for any other effort required of or made by; the Proposer's prior to contract commencement.

ORAL PRESENTATION
The City may require an oral presentation of the proposal at the Evaluation Committee's discretion. This could also include a formal interview of any and all members of the Proposer's contract management staff.

CONFLICT OF INTEREST
The Proposer represents that it presently has no interest and shall acquire no interest, either direct or indirect, which would conflict in any manner with the performance or services required hereunder, as provided for in FL Stat. 112.311. The Proposer further represents that no person having any interest shall be employed for said performance.

The Proposer shall promptly notify the City's representative, in writing, by certified mail, of all potential conflicts of interest for any prospective business association, interest, or other circumstance, which may influence or appear to influence the contractor's judgment or quality of services being provided hereunder. Such written notification shall identify the prospective business association, interest or circumstance, the nature of work that the Proposer may undertake and request an opinion of the city as to whether the association, interest or circumstance would, in the opinion of the City, constitute a conflict of interest if entered into by the Proposer. The City agrees to notify the Proposer of its opinion by certified mail within thirty days of receipt of notification by the Proposer.

LATE PROPOSAL OR MODIFICATIONS
Modifications in writing received prior to the time set for the proposal submittal will be accepted. Proposal modifications received after the time set for the proposal submittal will not be considered.

RELATED PARTIES AND MULTIPLE PROPOSALS
Where two (2) or more related parties each submit a proposal or multiple proposals are received from (1) Proposer, for any such contract, such proposals shall be judged non-responsive. Related parties mean Proposers or the principles thereof, which have a direct or indirect ownership interest in another Proposer for the same contract or in which a parent company or the principles thereof where one (1) Proposer has a direct ownership interest in another Proposer for the same contract.

RIGHT TO AUDIT
The City of St. Pete Beach reserves the privilege of auditing a Proposer's record as such records relate to purchases or work between the City and said Proposer. Records should be maintained for three years from contract date.

VARIANCE FROM STANDARD TERMS & CONDITIONS
All standard terms and conditions stated throughout the RFP apply to this contract except as specifically stated. This should be fully understood by Proposers prior to submitting a proposal.

ASSIGNMENT
The Proposer shall perform this contract. No assignment or subcontracting shall be allowed without prior written consent of the City. If a Proposer intends to subcontract a portion of this work, the Proposer must disclose that intent in the proposal. In the event of a corporate acquisition and/or merger, the Contractor shall provide written notice to the City within thirty (30) business days of Proposer's notice of such action or upon the occurrence of said action, whichever occurs first. The right to terminate this contract, which shall not be unreasonably exercised by the City shall include but not be limited to, instances in which a corporate acquisition and/or merger represent a conflict of interest or are contrary to any local, state, or federal laws. Action by the City awarding a proposal to a firm that has disclosed its intent to assign or subcontract in its response to the RFP, without exception shall constitute approval for purpose of this Agreement.

LOBBYING Lobbying of Evaluation Committee members, City employees, or elected officials regarding request for proposals, request for qualifications, bids or contracts, during the pendency of bid award or bid protest, by the bidder/proposer/protestor or any member of the bidder's/proposer's/protestor's staff, an agent of the bidder/proposer/protestor, or any person employed by any legal entity affiliated with representing an organization that is responding to the request for proposal, request for qualification, bid or contract, or has a pending bid protest is strictly prohibited either upon advertisement or on a date established by the City and shall be prohibited until either an award is final or the protest is finally resolved by the City Manager or Procurement Manager; provided, however, nothing herein shall prohibit a prospective bidder/proposer from contacting City departments to address situations such as clarification and/or questions related to the procurement process. For purposes of this provision, lobbying activities shall include but not be limited to, influencing or attempting to influence action or non-action in connection with any requests for proposal, request for qualification, bid or contract through direct or indirect oral or written communication or an attempt to obtain goodwill of persons and/or entities specified in this provision. Such actions may cause any request for proposal, request for qualification, bid or contract to be rejected.

ADDITIONAL REQUIREMENTS
The City reserves the right, by change order, to unilaterally add or delete locations/services, either collectively or individually, at the City's sole option, at any time after award has been made as may be deemed necessary or in the best interest of the City. In such case, the Proposer will be required to provide or reduce services to this contract in accordance with the terms, conditions, and specifications.

SERVICES AGREEMENT
A written agreement incorporating the RFP and the successful proposal will be prepared by the City, signed by the successful Proposer, and presented to the City Commission for approval and signature.

INTEGRITY OF REQUEST FOR PROPOSAL DOCUMENTS
Proposers shall use the original RFP forms provided within the RFP and enter information in the spaces where a response is requested. Proposers may use an attachment as an addendum to the RFP forms if sufficient space is not available on the original form for the Proposer to enter a complete response. Any modifications or alterations to the original RFP documents by the Proposer, whether intentional or otherwise, will constitute grounds for rejection of the RFP. Any such modifications or alterations a Proposer wishes to propose must clearly be stated in the Proposer's RFP response and presented in the form of an addendum to the original RFP documents.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in this Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the contract and requirements and shall determine acceptance of the work under this Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the contract terms in a fair and unbiased manner.
If a variation from any requirements is allowed, the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

EXAMINATION OF SITE
Proposer shall carefully examine project site and be familiar with the work required for the project, investigate all site conditions that may affect execution of work as detailed in the construction documents. Contact the City's Procurement Manager or their designee for changes or alterations before proceeding.

ASSURANCES
The responding Proposer shall provide a statement of assurance that the Proposer is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

ASSIGNMENT AND TRANSFER OF CONTRACT
The Proposer shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS
The Proposer shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PAYMENT
Payment shall be made to the Proposer for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

PERIOD OF PERFORMANCE
The target completion for the base Scope of Services is January 2027, corresponding to delivery of the Design-Build Readiness Package. The City reserves the right, at its sole discretion and subject to funding

availability, to amend this Agreement to extend the Consultant's services through final (100%) design. Any additional services shall be authorized by written amendment and negotiated in accordance with the Consultants' Competitive Negotiation Act (Section 287.055, Florida Statutes).

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Proposer will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Proposer without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Proposer's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Proposer to make a change in the Work, and if the City and the Proposer do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the Proposer shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Proposer believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, they shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Proposer first discovered the occurrence. The Proposer shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Proposer shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Proposer shall prepare proposals detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Proposer's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Proposer's proposals shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable proposal will not justify an increase in Contract Amount or Contract Time. Proposer agrees that it shall give the City access to any and all of Proposer's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Proposer for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Proposer shall be at his expense

without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Proposer or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Proposer proposals or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to be used shall be those used for the Proposer's costs, except that the term "Subcontractor" shall replace the term "Proposer," context permitting.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Proposer, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit.

In such case, the Proposer will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Proposer to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Proposer (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Proposer employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

PAYMENTS FOR WORK COMPLETED
All payments under this agreement shall comply with the requirements of Florida Statutes, Section 215.422, commonly referred to as the "Prompt Payment Law." This includes timely processing of invoices and adherence to statutory interest provisions for late payments. The Contractor shall submit detailed invoices for services rendered under this agreement. Each invoice must include: Purchase Order or Contract Number, Description of services provided, Dates of service, Total amount due. Payment will be made within 45 days of receipt of a proper invoice and acceptance of deliverables, as required by Florida law. If payment is not made within the statutory timeframe, interest penalties will apply in accordance with Section 215.422, Florida Statutes. Payments will be issued via electronic funds transfer (EFT) unless otherwise agreed in writing. Contractor must provide accurate banking information to facilitate EFT.

PAYMENTS WITHHELD
The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Proposer to make payments properly to Subcontractors or for labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Proposer

f) Failure of the Proposer to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS
Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Proposer, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such sums to the Proposer.

Before the approval of the final payment, the Proposer shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS
If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Proposer, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Proposer all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Proposer and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Proposer. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies

to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

LICENSES AND PERMITS

The Proposer shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the Proposer is responsible for non-compliance of all permit requirements, including all fines resulting from Proposer's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Proposer shall be responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the Proposer awarded the project, MUST also register their license with the City.

LABOR PROVISIONS

The Proposer and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed. The State of Florida prevailing wage law requires that the Proposer shall fully comply with all provisions contained in Section 215.19, "Schedule of Prevailing Wage Rates for Specified Public Construction." The wage rates set forth by such determination shall apply to this project.

INSURANCE

The Proposer shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Proposer's General Public Liability and Property Damage Insurance issued to the Proposer and protecting the Proposer from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Proposer or by any Subcontractor hired by the Proposer or anyone directly or indirectly employed by the Proposer or hired by the Proposer.

The successful Proposer shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Proposer or third party under the direction or control of the Proposer. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Proposer must furnish the City with Certificate of Insurance prior to commencement of work. An

approved Certificate of Insurance furnished by the Proposer's carrier to guarantee the Proposer being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Professional Liability Insurance $2,000,000 each occurrence.
- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY
The Proposer shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Proposer shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Proposer shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Proposer will provide security on off days and holidays. The Proposer shall be responsible for all charges incurred with such action.

The Proposer shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Proposer, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Proposer shall also protect adjacent property as required by law.

PROPOSAL REVIEW AND CONTRACT AWARD
Failure to submit all documents requested at the time of proposal may deem the Proposer's proposal ineligible for award. The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals. The contract shall be awarded by written notice to the responsible and responsive Contractor whose proposal is determined in writing to be the most advantageous to the City, taking into consideration the price and other criteria set forth in this request for proposals. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS
The laws of the State of Florida do apply to any purchase made under this Request for Proposal. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their proposal and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Proposer agrees to comply with all applicable portions of Fla. Stat. 448.095. Proposer must use the

U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Proposer shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Proposer with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Proposer shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Proposer must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Proposer's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Proposer may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and proposal costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statute by the Proposer, the Proposer may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all proposals, to waive irregularities and technicalities, and to request re-submission. If only one proposal is received by the proposal date and time listed, the proposal may or may not be rejected by the City depending upon proposal review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting proposals. The City reserves the right to award the contract to a responsible proposer submitting a responsible proposal, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, Proposers, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFP during any phase of the proposalding process. Failure to comply with the provision may result in disqualification of the Proposer, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFP shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE
Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION
The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS
The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience in Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining and point repairs.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Wastewater System Rehabilitation Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Wastewater System Rehabilitation Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

   by: _____
   (Print individual's name and title)

   for: _____
   (Print name of entity submitting sworn statement)

   at: _____
   (Business address)

   and (if applicable), its Federal Employer Identification Number (FEIN):

   _____
   (FEIN)
   or, if the entity has no FEIN, include the Social Security Number:

   _____
   (SSN)

   by the individual signing this sworn statement: _____
   (Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an

affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VIII. NON-COLLUSION AFFADAVIT

STATE OF _____ COUNTY OF _____

I state that **I**_____ of _____,
(Name and Title) (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. _____, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 1 - GENERAL

1.01 LOCATION OF THE WORK SITE AND ACCESS

Access to the work sites shall be over streets and walkways. Any damage to existing pavement surface and base or other surface improvements outside the Contract Pay Limits, attributable to the Contractor's activities, shall be restored to like-new condition by the Contractor at the Contractor's expense.

The proposed work will be located within the City of St. Pete Beach in Pinellas County, FL, throughout the entire wastewater collection and transmission system. Each asset to be rehabilitated and the type of rehabilitation required will be identified in each individual Work Order with the location shown on corresponding geographical exhibits.

1.02 SCOPE OF WORK

The Contractor shall furnish all labor, superintendence, materials, power, light, heat, fuel, water, tools, appliances, equipment, supplies, shop drawings, working drawings and other means of construction necessary or proper for performing and completing the work. The Contractor is responsible for obtaining all required permits necessary for the work, including all applications and review fees, other than those permits which may have already been obtained. The Contractor shall perform and complete the work in a speedy and efficient manner consistent with safety of life and property and to the city’s satisfaction, and in strict accordance with the Contract Documents. The Contractor shall repair or restore all structures and property damaged or disturbed during performance of the work.

The cost of incidental work described in this General Section, for which there are no specific Contract Items, shall be considered as part of the general cost of doing the work and shall be included in the prices for the various Contract Items. No additional payment will be made.

The Contractor shall be solely responsible for the means and methods of construction and the adequacy of his workmanship, materials, and equipment.

1.03 PROJECT SUMMARY

Wastewater System Manhole Rehabilitation (Manhole Project)

The Contractor shall furnish all labor, material, equipment, and services necessary for manhole rehabilitation. The work shall be completed at various locations through the City’s wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, re-building manhole bench and channels, ring (frame) and cover adjustment and replacement, pavement restoration, inflow/infiltration elimination, surface preparation, cementitious and polymer coatings installation, internal chimney sealing, manhole cover insert installation, testing, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.

Wastewater System Pipe Lining (Lining Project)

The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater pipe rehabilitation using Cured-In-Place-Pipe (CIPP) lining. The work shall be completed at various locations through the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, CIPP liner installation, reconnection of service laterals, testing of CIPP liners, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.

Wastewater System Point Repairs (Point Repair Project)

The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater point repairs. The work shall be completed at various locations throughout the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, dewatering, directional drilling, jack and boring, remove unsuitable materials below trench grade, sanitary sewer gravity and force main installation, force main and gravity main connections, remove out of service gravity and force mains, install manhole connections, grout out of service pipe, install valves and associated appurtenances, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.

1.04 CONTRACT DRAWINGS AND SPECIFICATIONS

Where the Contract Drawings and Specifications are not in agreement, the Contract Drawings shall govern. The Contractor shall furnish all labor, equipment, and materials to construct the Project and all miscellaneous and appurtenant work complete in place as specifically described and included under said each Contract Pay Item as shown, specified, or directed by the Engineer in accordance with the obvious or expressed intent of the Contract.

The Technical Specifications for the Project that reference FDOT-SSRBC (Florida Department of Transportation - Standard Specifications for Road and Bridge Construction) pertain to the most recent edition at the date of issuance of these Specifications.

1.04.01 COPIES FURNISHED TO CONTRACTOR

The Contractor shall furnish each of the subcontractors, manufacturers, and material men such copies of the Contract Documents as may be required for their work. Additional copies of the Contract Drawings and Specifications, when requested, may be furnished to the Contractor at cost of reproduction.

1.04.02 SUPPLEMNTARY DRAWINGS

When, in the opinion of the City, it becomes necessary to explain more fully the work to be done or to illustrate the work further or to show any changes which may be required, drawings known as Supplementary Drawings, with specifications pertaining thereto, will be prepared by the Engineer and the City and provided to the Contractor.

1.04.03 CONTRACTOR TO CHECK CONTRACT DRAWINGS AND DATA

The Contractor shall verify all dimensions, quantities and details shown on the Contract Drawings, Supplementary Drawings, Schedules, Specifications or other data received from the City or the Engineer and shall notify the City and Engineer of all errors, omissions, conflicts, and discrepancies found therein. Failure to discover or correct errors, conflicts or discrepancies shall not relieve the Contractor of full responsibility for unsatisfactory work, faulty construction or improper operation resulting therefrom nor from rectifying such conditions at the Contractor's own expense. The Contractor shall assume all responsibility for the making of estimates of the size, kind, and quality of materials and equipment included in work to be done under the Contract with approval by the City.

1.05 FIELD ENGINEERING

The Contractor shall establish and provide all vertical and horizontal control points for this Project including benchmarks. The Contractor shall provide the field layout surveying necessary to properly construct the work as indicated on the Contract Drawings.

All field layout surveying shall be performed under the supervision of a Professional Land Surveyor (Chapter 472, Florida Statutes). The Contractor shall submit the name and registration number of Surveyor as directed by the Engineer. The Engineer reserves the right to check all survey staking and to require adjustments or re-staking by the Contractor in the event that conflicts, or errors are detected.

Water pressure pipelines that are 8-inch or less diameter shall be installed with the required cover using horizontal control stakes provided by the Contractor. Sanitary sewer and sanitary pressure pipelines greater than 8-inch diameter shall be installed using an approved method for line and grade control. Methods for line and grade control shall be submitted to the Engineer for review and acceptance, as specified for shop drawings. Sketches shall be provided by the Contractor showing vertical adjustment necessary for pressure pipelines to adequately clear storm drains and other utilities.

1.06 SAFEGUARDING SURVEY MARKS

The Contractor shall safeguard all existing property monuments, benchmarks, and other survey marks adjacent to and within the Project limits and shall bear the cost of re-establishing them if disturbed or destroyed.

1.07 INSPECTION AUTHORITY

The City or Engineer has ultimate responsibility for contract administration and inspection for this Project. The City or Engineer may assign field inspection responsibilities to a Design Professional and/or City Inspector. Each step of construction is subject to review and acceptance by the City or Engineer prior to proceeding with a subsequent step.

During the progress of the Work and up to the date of final acceptance, the Contractor shall at all times afford representatives of the City, the County, the State, the Department of Environmental

Protection, the Department of Transportation, the Department of Labor, or any other agency with jurisdiction, every reasonable, safe, and proper facility for observation of the work done or being done at the site, and also the manufacture or preparation of materials and equipment at the place of such manufacture or preparation.

The Project line of authority will be presented at the Preconstruction Conference.

1.08 PROJECT SCHEDULE

The Contractor shall submit an electronic version in PDF form within 30 days following the Preconstruction Conference of each Work Order.

Scheduling and progress reporting shall be accomplished using a bar chart to provide a clear and concise comparison of progress.

1.09 MATERIALS AND EQUIPMENT

All materials, appliances, and types of construction shall be in accordance with the Technical Specifications and shall, in no event, be less than that necessary to conform to the requirements of any applicable laws, ordinances, and codes.

All materials and equipment to be incorporated into the Work shall be new, unused, and correctly designed. They shall be of standard first grade quality, produced by expert workmen, and be intended for the use for which they are offered. Materials or equipment which, in the opinion of the Engineer, are inferior or of a lower grade than indicated, specified, or required, will not be accepted.

Projects funded by the State Revolving Fund must comply with the requirements of the American Iron and Steel Requirement unless otherwise specified in the Contract Documents and approved by the Engineer.

1.10 MANUFACTURER

The names of proposed manufacturers, manufacturers' representatives, suppliers, and dealers who are to furnish materials, equipment, or other fittings, shall be submitted by the Contractor to the Engineer for review and acceptance. Such acceptance must be obtained before Shop Drawings will be accepted for review. All transactions with the manufacturer and subcontractors shall be through the Contractor.
Any two or more pieces of material or equipment of the same kind, type, or classification and being used for identical types of service, shall be made by the same manufacturer.

Projects funded by the State Revolving Fund must comply with the requirements of the American Iron and Steel Requirement unless otherwise specified in the Contract Documents and approved by the Engineer.

1.11 SAMPLES

The Contractor shall, when required, submit to the Engineer for review and acceptance, typical samples of material and appliances. The samples shall be properly identified by tags and shall be

submitted sufficiently in advance of the time when they are to be incorporated into the Work so that rejections thereof will not cause delay. A letter of transmittal from the Contractor requesting approval shall accompany all such samples.

1.12 EQUIVALENT QUALITY

In the Contract Documents, whenever an article, material, apparatus, equipment, or process is called for by trade name or by name of a patentee, manufacturer, or dealer, or by reference to catalog of a manufacturer or dealer, it shall be understood as intending to mean and specify the article, material, apparatus, equipment, or process designated, or any equal thereto in quality, finish, design, efficiency, and durability, and equally serviceable for the purposes for which it is intended.

Whenever material or equipment is submitted for review as being equal to that specified, the submittal shall include sufficient information and data to demonstrate that the material or equipment conforms to the Contract requirements. The decision as to whether such material or equipment is equal to that specified shall be made by the Engineer.

Upon rejection of any material or equipment submitted as the equivalent of that specifically named in the Contract, the Contractor shall immediately proceed to furnish the designated material or equipment.

Neither the acceptance by the Engineer of alternate material or equipment as being equivalent to that specified, nor the furnishing of the material or equipment specified, shall in any way relieve the Contractor of responsibility for failure of the material or equipment, due to faulty design, material, or workmanship, to perform the functions required of them by the Contract Documents.

1.13 MATERIAL AND EQUIPMENT DELIVERY AND STORAGE

The Contractor shall deliver materials in ample quantities to ensure the most speedy and uninterrupted progress of the work to complete the work within the allotted time. The Contractor shall also coordinate deliveries to avoid delay in, or impediment of, the progress of the work of any related contractor. The Contractor shall provide space for storage of materials and equipment.

Pipe strung along roads and rights-of-way shall be placed in a manner that will not endanger or restrict pedestrian or vehicular traffic. Pipe strings shall not be allowed outside right-of-way limits.

1.14 SERVICE OF MANUFACTURER'S REPRESENTATIVE

The Contract amount shall include but is not limited to the cost of furnishing a competent and experienced representative of the equipment manufacturer who shall assist the Contractor, when required, to install, adjust, test, and place in operation the equipment in conformity with the Contract Documents. After the equipment is placed in operation, the representative shall make all adjustments and tests required by the Engineer to prove that the installed equipment is in proper and satisfactory operating condition. The representative shall instruct personnel as may be designated by the Engineer in the proper operation and maintenance of such equipment.

1.15 CONTAMINANTS CONTAINMENT/DISPOSITION

Prior to the installation of well points for dewatering, the Contractor shall visually inspect the work area for indications of existing ground water monitoring, wells, or metal caps at grade. The Contractor shall review the work area for monitoring wells or abandoned fuel tanks and shall notify the Engineer in writing if any of the above items exist.

During dewatering activities, contractor to test water for contaminants before discharge. If the water is odorous, contaminated, or discolored (excluding tannic acid or iron), the Contractor shall stop the dewatering activities and shall notify the Engineer in writing of such, and request direction.

When work activities encounter or expose any abnormal condition that may indicate the existence of a hazardous or toxic waste, work activities shall stop in the vicinity of the abnormal condition and the Contractor shall notify the Engineer immediately. The presence of tanks or barrels; discolored earth, metal, wood, or groundwater; visible fumes; abnormal odors; excessively hot earth; smoke; or other conditions that appear abnormal, may be signs of hazardous or toxic wastes and shall be treated with extraordinary caution.

Every effort shall be made by the Contractor to minimize the spread of any hazardous or toxic waste into uncontaminated areas.

The Contractor's operations shall not resume until directed in writing by the Engineer.

Disposition of the hazardous or toxic waste will be made in accordance with the requirements and regulations of any City, County, State, or Federal agency having jurisdiction.

1.16 PREVENTION, CONTROL, AND ABATEMENT OF EROSION AND WATER POLLUTION

The Contractor shall be responsible for prevention, control, and abatement of erosion, siltation, and water pollution resulting from construction of the Project until final acceptance of the Project.

The Contractor shall implement all appropriate turbidity management practices at the point of discharge into a storm sewer, gutter, or other conveyance to ensure that state water quality standards are not violated at the point where the storm drain, gutter, or other conveyance discharges into a surface water.

All necessary provisions shall be taken to ensure compliance with the water quality standards of the State of Florida. Attention is called to Chapter 62-302, Florida Administrative Code, and in particular, the requirements that turbidity shall not exceed 29 NTUs above background level. Adequate silt containment procedures and equipment shall be used to control turbidity, at no additional cost to the City.

1.17 MAINTENANCE OF STORM DRAINAGE SYSTEM

The Contractor shall be responsible at all times to maintain the operation of existing stormwater facilities, or, when existing stormwater facilities are removed, to provide equivalent capacity alternate forms of stormwater removal adequate to prevent upstream flooding in excess of existing conditions. This responsibility shall include but is not limited to the installation of temporary

connections, bypass pumping, or other temporary means necessary until the new drainage system is fully operational.

1.18 SPILL OR DISCHARGE OF WASTEWATER OR RECLAIMED WATER

The discharge of wastewater or effluent (reclaimed water) into waters of the State and/or into canals, ditches, and ponds that are connected to waters of the State is prohibited. Any spill or discharge of wastewater or reclaimed water shall be immediately reported to the Engineer, the City's Project Manager, and the City's Emergency Dispatch Center. Contact information will be provided for all necessary City personnel and the Engineer at the Preconstruction Conference. In the event of a spill or discharge, the Contractor shall immediately control, contain, and stop the spill or discharge and shall repair any damage to the City's facilities.

The Contractor shall be responsible for any penalties and costs charged to the City by the FDEP and for all costs incurred by the City as a result of the Contractor's actions or as a result of the Contractor's negligence. The fines, and anticipated costs, which may be incurred by the City as a result of the Contractor's actions or negligence, shall be paid to the City within 30 days, or the costs incurred will be deducted from the total Contract amount.

1.19 SEQUENCE OF OPERATION

1.19.01 PIPELINE WORK

It is the intent of the City that all pipeline work associated with the Project be installed to completion in a timely and orderly manner to minimize inconvenience to the Public. Pipe and pipe materials shall not be stored or strung in residential areas more than 3 weeks in advance of pipe installation unless otherwise approved by the Engineer.

The Contractor shall include in the Project Schedule a Sequence of Operations including, but not limited to, the following components:

A. Pipe and pipe material storage
B. Bypass Pumping
C. Backfilling
D. Testing and repairs
E. Disinfection
F. Surface Restoration and Cleanup

1.19.02 PUMP/LIFT STATION WORK

It is essential that any Project work conducted at Pump/Lift Station sites be sequenced to minimize obstruction of normal daily operations of the Pump/Lift Station.

The Contractor shall include in the Project Schedule a Sequence of Operations including, but not limited to, the following components:

A. Equipment and material storage
B. Bypass Pumping

C. Testing and repairs
D. Surface Restoration and Cleanup

1.19.03 MISCELLANEOUS

Utility Companies may be present on the work site adjusting their facilities and installing new facilities. The Contractor's work shall be scheduled in such a manner as to minimize conflicts with various utility companies.

The Contractor shall clean up the site for each phase of work in accordance with the Contract Documents and confine work and personnel to designated areas in accordance with the Specifications. Before proceeding to a subsequent phase of work, unless otherwise approved by the Engineer.

1.19.04 NO TIME EXTENSION

If the Engineer orders construction, or a phase of construction, to be stopped due to the Contractor's neglect to adhere to the Sequence of Operations as outlined herein, the Stop Work Order shall not constitute a basis for extension of time.

1.20 WORK IN STREETS AND HIGHWAYS

All work within streets and highways shall be subject to the regulations and requirements of the City of St. Pete Beach, FDOT, and all other agencies with jurisdiction of the streets and highways in the work limits.

Methods and materials of construction used in restoration within such streets and highways shall conform to the requirements, inspection, and acceptance of the duly authorized representatives of the appropriate agency having jurisdiction. Restoration Work shall include but not be limited to: removal and replacement of pavement, sidewalk, curb, and gutter; replacement of storm sewer facilities; excavation and backfilling; and storage of materials and equipment.

1.21 WORK IN PRIVATE PROPERTY

The Contractor shall not trespass upon or in any way disturb private property without first obtaining written permission from the City to do so. In the event that, in the opinion of the Contractor, obtaining a temporary construction easement outside the limits of the right-of-way, of City-owned property, or of the easement(s) obtained by the City is necessary or desirable, it shall be the sole responsibility of the Contractor to obtain such easement from the owner of the property. If such easement is obtained by the Contractor, it shall contain provision to hold the City harmless from any operations of the Contractor within the easement limits. The Contractor shall not conduct construction operations on private property outside the limits of the right-of-way, of City-owned property, or of the easement(s) obtained by the City unless a copy of the Temporary Construction Easement Agreement is filed with the Engineer. It shall be the Contractor's responsibility to work equipment around poles, trees, or other obstructions and to do so at his own expense. The Contractor shall ensure all employees have a badge or visible identification during any time that they on the project site or within private property. This identification must be worn so that it is readily recognized and readable to the public.

Upon completion of work in easements, the Contractor shall, at no additional expense, restore the property, including all fences or other structures disturbed by his operations, to the full satisfaction of the City and shall obtain from the City a written release stating that restoration has been satisfactorily made. A copy of the completed written release shall be furnished to the City prior to payment. All items within the street right-of-way or sewer easement shall be removed, or removed and replaced, or restored as directed by the City.

1.22 PERMITS

Construction projects performed for the City will require licenses and permits in the same manner as private construction projects within the City.

The Contractor shall secure, at his expense, all licenses and permits, and shall comply with all applicable laws, regulations, and codes as required by the State of Florida and/or the City of St. Pete Beach whether performed by the Contractor or by others. The Contractor must be registered to complete such work within Pinellas County.

1.23 FIELD OFFICE AND APPURTENANT STRUCTURES

No field office or appurtenant structures by the Contractor, any subcontractor, or any material supplier, will be allowed on the Project site.

Space on City property or rights-of-way proposed to be used for storage and a field office for the Contractor shall be approved by the Engineer prior to installation providing such uses will not interfere in any manner with the construction of the work or the operation of existing facilities.

1.24 CONTRACTOR'S SIGN

No sign by the Contractor, any subcontractor, or any material supplier, will be allowed on the Project site.

1.25 MOBILIZATION

Mobilization shall include but is not limited to all preparatory work and operations necessary to begin the Project, including moving of personnel, equipment, traffic control, and all else necessary to commence work. The cost of bonds, insurance, shop drawings, and preconstruction expenses shall also be included.

If a separate Pay Item is included for mobilization, payment will be as specified for that Pay Item. If no Pay Item is included, costs for mobilization shall be included with the costs for the major Work items included in the Proposal.

1.26 WATER PURCHASE

Water used in connection with this Project must be coordinated with Pinellas County. Reclaimed water used in connection with this Project must be coordinated with the City.

1.27 TRAFFIC CONTROL

The Contractor shall provide required traffic controls under City observation. The Contractor shall notify the City's Project Manager a minimum of 2 working days prior to any construction affecting traffic flow. A Maintenance of Traffic plan drawing shall be submitted for review by the Engineer prior to each lane closure or opening during construction. All traffic control devices utilized during construction shall be provided by the Contractor and meet the requirements set forth in the latest revision of U.S. Department of Transportation Federal Highway Administration's "Manual on Uniform Traffic Control Devices for Streets and Highways" and the Florida State Department of Transportation's "Standard Plans for Road and Bridge Construction." Failure or refusal, on the part of the Contractor, to install, maintain and/or position traffic control devices promptly, fully, and in an acceptable manner, shall be sufficient cause for the City, after 24-hour notice, to perform the traffic control with its own organization, or to contract with any other individual, firm, or corporation to perform the required traffic control. All costs and expenses incurred thereby shall be charged against the defaulting Contractor, and the amount thereof deducted from any money due, or which may become due him, or shall be charged against the Contract Bond. Any Work performed as described by this paragraph, shall not relieve the Contractor in any way of his responsibility for the Work performed by him.

Traffic shall be performed so that vehicular traffic shall be maintained on with at least one 10-foot wide lane in each direction at all times. An acceptable detour route shall be developed by the Contractor to redirect traffic when and where necessary, with the approval of the Transportation Special Events Division. Temporary lanes shall be constructed with a minimum 1-inch thick asphaltic concrete surface over a 6-inch thick limerock base compacted to 98% of the maximum density in accordance with AASHTO T-180.

Failure of the Contractor to comply with any of the above traffic control requirements may result in issuance of a stop work order until the violation is corrected.

All maintenance of traffic in the FDOT right-of-way shall be in accordance with FDOT requirements.

1.28 TREE PROTECTION

Particular care shall be taken by the Contractor to protect trees during construction by erecting approved barricades to prevent unnecessary damage to trunk and roots during construction. Such barriers shall protect the area within the dripline.

The Contractor shall prune all branches that interfere with construction in accordance with American Forestry Association Standards. Roots over 2-inch diameter shall be preserved wherever possible. If root pruning is required, roots shall be cut cleanly.

Temporary soil deposits, concrete block, concrete wash, or solvents shall not be placed within the dripline. The grade within the dripline shall be preserved. If adjacent grade is altered, protective measures such as those described in the Florida State Division of Forestry "Tree Protection Manual for Builders and Developers" shall be constructed to protect the tree(s) from deleterious effects of the grade change.

1.29 TREE REMOVAL AND REPLACEMENT

The Contractor shall obtain any necessary tree removal permit, shall furnish and replace trees as required, and shall perform this Work in a manner conforming to all applicable provisions of said regulations or permit.

The cost of tree removal and obtaining the tree removal permits shall be included in the cost of the appropriate associated Contract Pay Item under which the Work is to be performed. The Contractor shall remove trees as required and approved by the Engineer whether or not said trees are shown on the Contract Drawings. Trees that must be removed, except for Australian pine, Brazilian pepper, punk, and other exempt species, shall be replaced as directed. Replacement trees shall be of native species at least 8-feet tall and at least 3-inch caliper diameter.

1.30 UTILITIES

Prior to construction, the Contractor shall familiarize himself with the location of all existing utilities and facilities within the Project Site. The Contractor must take the necessary precautions for the protection of any utility encountered on the Project or the restoration of any utility damaged during the work.

If excavation is required, The Contractor shall notify, at least 48 hours before breaking ground, all public or private service corporations having wire, poles, pipes, conduit, manholes, or other structures that may be affected by this operation, including all structures which are affected and not shown on these plans. Utility companies shall be contacted by calling the utility notification center "Sunshine 811" at 1-800-432-4770. Owners which are not members of the state's One Call service must be called directly. The City will furnish to the Contractor the available records of City utilities. The Contractor shall locate and mark all City utilities for his reference and for use by utility companies. The Contractor shall act as the City's agent for locating and marking City underground utilities within the Project limits, in accordance with the Florida Underground Facilities Damage Prevention and Safety Act (FS 556).

In all cases where existing utility lines may be interfered with by the work, the Contractor shall give a minimum of 48 hours' notice (excluding Saturdays, Sundays, and legal holidays) to the owners of such utilities to permit them to relocate the lines prior to construction. Existing utilities have been shown on the Contract Drawings insofar as information is reasonably available. However, it will be the Contractor's responsibility to preserve all existing utilities whether shown on the Contract Drawings or not. All maintenance, repair, and replacement of existing utilities shall be in accordance with the rules and regulations of the various utility companies having jurisdiction. All existing storm sewers, driveway drains, surface drainpipes and other property, removed or damaged during construction shall be repaired and reconnected by the Contractor as directed by the City at no additional cost to the City.

1.31 NEIGHBORHOOD NOTIFICATION

Not less than 7 days prior to the commencement of Work in the right-of-way, the Contractor shall notify all residents and businesses along the construction route with a printed door hanger notice indicating the scheduled date of construction, the type of construction, and the Contractor's and Superintendent's contact information. The door hanger text and a list of residents and businesses to

which the notification has been delivered shall be compiled and submitted to the Engineer prior to the Contractor commencing Work.

1.32 SHOP, FIELD, AND LABORATORY TESTING

The Engineer may require testing by certified personnel of certain materials to be incorporated in the Work, such as: soils density, pavement, concrete pipe and appurtenances, and welds.

In the event any such testing is required by the Engineer, a detailed description will be found in these Technical Specifications concerned with the specific item of Work.

Where reference is made for design mixes, tests of materials, or work performed, or where in the opinion of the Engineer, tests are required to ascertain compliance with the Specifications, the Contractor shall have such tests made by an approved testing laboratory. No additional payment will be made for these tests.

1.33 SALVAGED MATERIALS

The Contractor shall not proceed with demolition of existing materials or equipment without review and acceptance from the Engineer for the method of disposal.

All materials which are not returned to the City yard shall be disposed in an approved disposal site. The Engineer may request confirmation of the site's approval for disposal of the specific materials.

Salvaged materials shall be loaded on Contractor trucks and returned to the Public Services yard at 7581 Boca Ciega Drive, St. Pete Beach, Florida. The City will designate the specific location at the yard for placement of salvaged materials by the Contractor.

The following materials shall be removed and returned by the Contractor: pumps and pump rails, and all other materials as directed by the Engineer.

END OF SECTION

SECTION 2 - PAY ITEM DESCRIPTIONS

2.01 SCOPE

The scope of this section of the Contract Documents is to further define the items included in each Pay Item in the Bid Form section of the Contract Documents. Payment will be made based on the specified items included in the description in this section for each Pay Item.

All contract prices included in the Bid Form section will be full compensation for all shop drawings, working drawings, labor, materials, tools, equipment and incidentals necessary to complete the construction as shown on the Contract Drawings and/or as specified in the Contract Documents to be performed under this Contract. Actual quantities of each item bid on a unit price basis will be determined upon completion of the construction in the manner set up for each item in this section of the Specifications. Payment for all items listed in the Bid Form will constitute full compensation for all work shown and/or specified to be performed under this Contract.

2.02 ESTIMATED QUANTITIES

The quantities shown are approximate and are given only as a basis of calculation upon which the award of the Contract is to be made. The City does not assume any responsibility for the final quantities, nor shall the Contractor claim misunderstanding because of such estimate of quantities. Final payment will be made only for satisfactorily completed quantity of each item.

2.03 WORK OUTSIDE AUTHORIZED LIMITS

No payment will be made for work constructed outside the authorized limits of work.

2.04 MEASUREMENT STANDARDS

Unless otherwise specified for the particular items involved, all measurements of distance shall be taken horizontally or vertically.

2.05 AREA MEASUREMENTS

In the measurement of items to be paid for on the basis of area of finished work, the lengths and/or widths to be used in the calculations shall be the final dimensions measured along the surface of the completed work within the neat lines shown or designated.

2.06 LUMP SUM ITEMS

Where payment for items is shown to be paid for on a lump sum basis, no separate payment will be made for any item of work required to complete the lump sum items. Lump sum contracts shall be complete, tested and fully operable prior to request for final payment. Contractor may be required to provide a break-down of the lump sum totals.

2.07 PAY ITEM DESCRIPTIONS

Separate payment will be made for the items of work described herein and listed on the Bid Form. Any related work not specifically listed but required for satisfactory completion of the work shall be considered to be included in the scope of the appropriate listed work items.

No separate payment will be made for the incidental items not included in the Pay Item descriptions. The cost to complete such work shall be included in the applicable Pay Item unit cost. Final payments shall not be requested by the Contractor or made by the City until as-built (record) drawings have been submitted and approved by the City. Incidental items include, but are not limited to:

1. Shop Drawings, Working Drawings.
2. Clearing, grubbing and grading except as hereinafter specified.
3. Trench excavation, including necessary pavement removal and rock removal, except as otherwise specified.
4. Dewatering and disposal of surplus water.
5. Structural fill, backfill, and grading.
6. Replacement of unpaved roadways, and shrubbery plots.
7. Foundation and borrow materials, except as hereinafter specified.
8. Testing and placing system in operation.
9. Any material and equipment required to be installed and utilized for the tests.
10. Pipe, structures, pavement replacement, driveways and/or appurtenances included within the limits of lump sum work, unless otherwise shown.
11. Maintaining the existing quality of service during construction.
12. Appurtenant work as required for a complete and operable system.
13. Seeding and hydro mulching.
14. As-built Record Drawings, clean up, and miscellaneous work.

WASTEWATER SYSTEM MANHOLE REHABILITATION

PAY ITEM NO. 1 – MOBILIZATION

The work specified in this item consists of the preparatory work and operations in mobilizing for beginning work on the project This item includes, but is not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to and from the project site as a single occurrence per work site, and for the establishment of Subcontractor's temporary offices, buildings, safety equipment, first aid supplies, sanitary and other facilities, as required by these Specifications, special provisions, and State and local laws and regulations. The costs of bonds, permits and any required insurance, and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Labor and equipment travel time from/to the site is included in this pay item.

The Contractor will be required to respond to the request of the Engineer or designated representative within ten (10) calendar days of notification. The Scope of Work will be developed by Project manager and will be executed in accordance with the terms and conditions of this contract.

The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting, and unloading, or under its own power to complete the job assignment or project. Payment for mobilization shall not exceed 10 percent (10%) of the total Contract cost unless the Contractor can prove to the City that his actual mobilization cost exceeds 10 percent (10%).

PAY ITEMS NO. 2 – 14 – MAINTENANCE OF TRAFFIC

This work consists of maintaining traffic within the limits of the project for the duration of the construction period, including any temporary suspensions of the work. All Maintenance of Traffic (MOT) shall comply with FDOT Standard Plans Index 102 Series for Maintenance of Traffic. These pay items shall include labor and equipment to furnishing, installing and maintaining of traffic control and safety devices during construction; the construction and maintenance of any necessary detour facilities; providing necessary facilities for access to residences, businesses, pedestrian, schools, etc., control of dust and any other special requirements for safe and expeditious movement of traffic as may be called for on the plans. MOT shall include all of such facilities, devices and operations as are required for the safety and convenience of the public, as well as for minimizing public nuisance. The Contractor, however, shall not obstruct nor create a hazard to any traffic during the performance of the work and shall be responsible for repair of any damage to existing pavement or facilities caused by his operations. Traffic Control Devices include all types of barricades, arrow boards, signs, temporary pavement markers, lights, concrete barriers and permanent striping. All travel, equipment, labor overhead or any other associated expenses in transportation and setting out the MOT will be included in the price. All MOT line items for Multi-Lane work shall include all costs for items associated with the appropriate FDOT

Index (no separate payment for signs, barricades, etc. included with index will be allowed).

Maintenance of Traffic (MOT) shall be measured as units of work, each/day (EA/DY), hourly (HR) or by linear foot (LF) accordingly completed and priced on an individual project basis. The lump sum price for each assignment will be based on the specific MOT requirements for the assignment. The Contractor shall provide the Engineer with a proposal for the MOT that includes a breakdown of the costs, which are included in the lump sum price, and receive written acceptance from the Engineer prior to the installation of the MOT.

PAY ITEM	DESCRIPTION	UNITS
2	Flagmen (Per-Flagmen)	HR
3	Multi Lane, Lane Closures (FDOT Index No. 613)	EA/DY
4	Multi Lane, Intersection (FDOT Index No. 615)	EA/DY
5	Arrow Boards - 5' Minimum Horizontal Size	EA/DY
6	Variable Message Board	EA/DY
7	Concrete Barrier (FDOT Index No. 100)	EA/DY
8	Low Profile Barrier (FDOT Index No. 120)	EA/DY
9	Signs in Work Zones	EA/DY
10	6" Solid line Thermo Plastic - Permanent	LF
11	24" Stop Bar, Solid, Thermo Plastic, Perm.	LF
12	6" Skip line (6'-10' Skip) Thermo Plastic-Perm.	LF
13	Barricades Type III, with Warning Lights	EA/DY
14	Barricades Type I or II, with Warning Lights	EA/DY

PAY ITEM NO. 15 – REPAIR MANHOLE BENCH AND CHANNEL

Payment will be made per each manhole regardless of manhole diameter or depth. Payment shall include all materials, labor, equipment, and supplies necessary for the Repair of Manhole Bench and Channel, and specifically includes, but is not limited to, placement of temporary plugs, removal and disposal of all sand, rubble, deposits, and other accumulated debris, removal of deficient, deteriorated or unsound bench and channel materials, minor infiltration elimination in walls and base beneath the bench and channel, repair or replacement of bench and channels, cleaning, disposal of debris, restoration, and all other appurtenant work.

Separate Pay Items are provided for Traffic Control, Pump-Around Pumping Operation, and "Severe" Manhole Infiltration Elimination used in conjunction with this Work.

PAY ITEMS NO. 16 & 17 – REPAIR CHIMNEY, ADJUST/REPLACE MH CASTING

Payment will be made per each manhole regardless of manhole casting diameter or depth. Payment shall include all materials, labor, equipment, and supplies necessary for repair of chimney, and adjustment or replacement of manhole casting, and specifically includes, but is not limited to, locating and uncovering manhole, excavation, saw cutting, removal and disposal of existing asphalt pavement as needed, removal of existing manhole frame and cover casting, removal of deficient, deteriorated or unsound chimney materials, minor infiltration elimination, repair or replacement of chimney, reinstalling the existing manhole casting, delivering and

installing a new manhole casting of the same nominal size as the existing casting, backfill, restoration of surface to match existing conditions, cleaning, disposal of debris, and all other appurtenant work. Compensation for the Contractor to furnish new manhole castings will be made under separate Pay Items. The City may elect to furnish new manhole castings for the Contractor to install. The cost of City furnished manhole castings will be deducted from the Contract Price.

PAY ITEM	DESCRIPTION	UNITS
16	Repair Chimney, Asjust/Replace MH Casting - Unpaved	EA
17	Repair Chimney, Asjust/Replace MH Casting - Asphalt Pavement	EA

PAY ITEM NO. 18 – REBUILD CORBEL/CHIMNEY FOR TYPE B MANHOLE CASTING

Payment will be made per each manhole regardless of manhole casting diameter or depth. Payment shall include all materials, labor, equipment, and supplies necessary to rebuild and enlarge corbel/chimney for Type B manhole casting, and specifically includes, but is not limited to, additional pavement removal and excavation, removal of chimney/corbel materials and rebuilding chimney to match larger Type B manhole casting diameter, additional backfill, additional surface restoration, disposal of additional debris, and all other appurtenant work. This Pay Item is applicable only in conjunction with, and in addition to, the Work as listed under Pay Items 16 and 17.

PAY ITEMS NO. 19 & 20 – FURNISH MANHOLE CASTING

Payment will be made per each manhole casting for the applicable casting types listed in the Proposal. Payment shall include all materials, labor, equipment, and supplies necessary to furnish Type B manhole castings (nominal 34-inch diameter) or Type E manhole castings (nominal 23-inch diameter), and specifically includes, but is not limited to, purchasing and delivering the manhole casting materials to designated Work locations for use to replace existing manhole castings.

PAY ITEM	DESCRIPTION	UNITS
19	Furnish Manhole Casting – Type B	EA
20	Furnish Manhole Casting – Type E	EA

PAY ITEM NO. 21 – SEVERE MANHOLE INFILTRATION ELIMINATION

Payment will be made per each manhole regardless of the manhole diameter, depth, or the number of infiltration points sealed in each manhole. Payment shall include all materials, labor, equipment, and supplies necessary, and specifically includes, but is not limited to, surface preparation, drilling of grout holes into or through the manhole wall and floor, grout pipe penetrations, grout injection, removal of grout pipe and sealing grout holes, testing, restoration, and all other appurtenant work as specified.

PAY ITEM NO. 22 – CHEMICAL SEALING - GROUT

Payment will be made per gallon. This Pay item is applicable only in conjunction with Pay Item No. 21. Payment shall include all materials, equipment and labor for chemically sealing excessive infiltration defects for "Severe" Manhole Infiltration Elimination prior to manhole repairs.

PAY ITEMS NO. 23 & 24 – INTERNAL CHIMNEY SEALANT

Payment will be made per each manhole for the applicable manhole casting types listed in the Bid Form. Payment shall include all materials, labor, equipment, and supplies necessary for the installation of the internal chimney sealant for Type B manhole castings (nominal 34-inch diameter) or Type E manhole castings (nominal 23-inch diameter), and specifically includes, but is not limited to, cleaning, surface preparation, "Minor" infiltration elimination, applying the chimney sealant, testing, restoration, and all other appurtenant work.

PAY ITEM	DESCRIPTION	UNITS
23	Internal Chimney Sealant – Type B Manhole Casting	EA
24	Internal Chimney Sealant – Type E Manhole Casting	EA

PAY ITEM NO. 25 – ADDITIONAL ACCESS COST FOR MANHOLE COATING

Payment will be made per each Work location. A Work location shall be limited to the additional access costs for manhole coating Work to be performed on single or multiple proximate access structures or manholes regardless of the number of manholes coated. Measurement will be for a manhole coating installation where the manhole(s) is not readily accessible by standard equipment, e.g., when located in rear easements. Payment shall include all additional labor, equipment, materials and supplies to complete the manhole coating installation in locations with limited access.

PAY ITEMS NO. 26 – 33 – BYPASS PUMPING SETUP & OPERATION

This item provides for set up and operation of by-pass sewage pumping equipment and temporary piping as required and as described in the Standard Technical Specifications. This Pay Item is applicable on projects or repairs that have high flow or require an over night by pass operation.

The quantity to be measured for payment under this Pay Item will be the actual number of by-pass pumping set ups and operations, per part of day, required by the Engineer in the work. The minimum measurement for this pay item is eight (8) hours or 0.333 days and is measured from the time that the sewage is actually by-passed. This eight (8) hour minimum (0.333 days) includes full compensation for set up and operation for up to the first eight (8) hour period. Additional time will be in tenths of the day or twenty-four (24) hour period. The quantities determined shall be paid per day (DAY) or portion of day of by-pass pumping set up and operation.

PAY ITEM	DESCRIPTION	UNITS
26	Bypass Pumping, Set up, 6" - 10" diameter	EA
27	Bypass Pumping, Set up, 12" - 14" diameter	EA

28	Bypass Pumping, Set up, 15" - 21" diameter	EA
29	Bypass Pumping, Set up, 24" diameter	EA
30	Bypass Pumping, Operation, 6" - 10" diameter	DAY
31	Bypass Pumping, Operation, 12" - 14" diameter	DAY
32	Bypass Pumping, Operation, 15" - 21" diameter	DAY
33	Bypass Pumping, Operation, 24" diameter	DAY

PAY ITEMS NO. 34-36 – PURE CALCIUM ALUMINATE CEMENTITIOUS MH COATING, INITIAL

Payment will be made per each manhole for the applicable manhole diameters listed below, regardless of the overall manhole depth. Measurement will be from the bottom of the manhole to at least 3 vertical feet above the lowest pipe invert, or to the bottom of the cover frame if less than 3 vertical feet, and will be the average of minimum/maximum manhole diameter measured 12-inches above outgoing pipe rounded to the nearest foot. Payment shall include all materials, labor, equipment, and supplies necessary for installation, and specifically includes, but is not limited to, temporary plugs, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, removal of steps, surface preparation, "Minor" infiltration elimination, sealing of all manhole wall penetrations, coating the lower 3 vertical feet of the manhole (includes invert, channel, bench, piping, CIPP liner interface, wall, and cone/corbel/chimney as applicable), testing, restoration, and all other appurtenant work as specified.

Separate Pay Items are provided for Maintenance of Traffic, Bypass Pumping Operation, and "Severe" Manhole Infiltration Elimination used in conjunction with this Work.

PAY ITEM	DESCRIPTION	UNITS
34	Pure Calcium Aluminate Cementitious MH Coating – 48” Diameter, Initial	EA
35	Pure Calcium Aluminate Cementitious MH Coating – 60” Diameter, Initial	EA
36	Pure Calcium Aluminate Cementitious MH Coating – 72” Diameter, Initial	EA

PAY ITEMS NO. 37-39 – PURE CALCIUM ALUMINATE CEMENTITIOUS MH COATING, ADDITIONAL

Payment will be made per vertical foot for the applicable manhole diameters listed below, regardless of the overall manhole depth. Measurement will be from the lowest pipe invert to the bottom of the cover frame minus the 3 vertical feet paid for under Pay Items 34 through 36. This Pay Item is applicable only in conjunction with, and includes the same Work as listed in Pay Items 34 through 36.

PAY ITEM	DESCRIPTION	UNITS
37	Pure Calcium Aluminate Cementitious MH Coating – 48” Diameter, Additional	VF
38	Pure Calcium Aluminate Cementitious MH Coating –	VF

	60” Diameter, Additional	
39	Pure Calcium Aluminate Cementitious MH Coating – 72” Diameter, Additional	VF

PAY ITEMS NO. 40-42 – REINFORCED POLYMER MH COATING, INITIAL

Payment will be made per each manhole for the applicable manhole diameters listed below, regardless of the overall manhole depth. Measurement will be from the bottom of the manhole to at least 3 vertical feet above the lowest pipe invert, or to the bottom of the cover frame if less than 3 vertical feet, and will be the average of minimum/maximum manhole diameter measured 12-inches above outgoing pipe rounded to the nearest foot. Payment shall include all materials, labor, equipment, and supplies necessary for installation, and specifically includes, but is not limited to, temporary plugs, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, removal of steps, surface preparation, "Minor" infiltration elimination, sealing of all manhole wall penetrations, coating the lower 3 vertical feet of the manhole (includes invert, channel, bench, piping, CIPP liner interface, wall, and cone/corbel/chimney as applicable), testing, restoration, and all other appurtenant work as specified.

Separate Pay Items are provided for Maintenance of Traffic, Bypass Pumping Operation, and "Severe" Manhole Infiltration Elimination used in conjunction with this Work.

PAY ITEM	DESCRIPTION	UNITS
40	Reinforced Polymer MH Coating – 48” Diameter, Initial	EA
41	Reinforced Polymer MH Coating – 60” Diameter, Initial	EA
42	Reinforced Polymer MH Coating – 72” Diameter, Initial	EA

PAY ITEMS NO. 43-45 – REINFORCED POLYMER MH COATING, ADDITIONAL

Payment will be made per vertical foot for the applicable manhole diameters listed below, regardless of the overall manhole depth. Measurement will be from the lowest pipe invert to the bottom of the cover frame minus the 3 vertical feet paid for under Pay Items 40 through 42. This Pay Item is applicable only in conjunction with, and includes the same Work as listed in Pay Items 40 through 42.

PAY ITEM	DESCRIPTION	UNITS
43	Polymer MH Coating – 48” Diameter, Additional	VF
44	Polymer MH Coating – 60” Diameter, Additional	VF
45	Polymer MH Coating – 72” Diameter, Additional	VF

PAY ITEMS NO. 46-48 – CONCRETE CURB REPLACEMENT

Payment for all work included in this Pay Item will be made at the applicable Contract unit price bid per linear foot for removal of existing curbing and for furnishing and placing curb and gutter as shown on the Contract Drawings and listed on the Bid Form. Measurement will be per actual number of linear feet of curbing installed. Payment shall represent full compensation for removal of existing curb and all labor, material and equipment for compacting subgrade, forming,

furnishing, placing the concrete, and finishing as specified and all incidentals necessary for completion of this Pay Item.

PAY ITEM	DESCRIPTION	UNITS
46	Concrete Curb Replacement – Type D	LF
47	Concrete Curb Replacement – Type F	LF
48	Concrete Curb Replacement – Miami Curb	LF

PAY ITEMS NO. 49 & 50 – CONCRETE SIDEWALK REPLACEMENT

Payment will be made per square yard for the applicable sidewalk thickness listed below, regardless of the overall length. Measurement will be for complete sections. Payment shall include all materials, labor, equipment, and supplies necessary for concrete sidewalk replacement, and specifically includes, but is not limited to, excavation, saw cutting and removal of existing sidewalk, installation of replacement sidewalk to match cross section and slope of adjacent sidewalk, expansion joint material, contraction joints, backfill, restoration, cleaning, disposal of debris, and all other appurtenant work as specified.

PAY ITEM	DESCRIPTION	UNITS
49	Concrete Sidewalk Replacement – 4” Thick	SY
50	Concrete Sidewalk Replacement – 6” Thick	SY

PAY ITEMS NO. 51 & 52 – CONCRETE DRIVEWAY REPLACEMENT

Payment will be made per square yard for the applicable driveway thickness listed below, regardless of the overall length. Measurement will be for complete section. Payment shall include all materials, labor, equipment, and supplies necessary for concrete driveway replacement, and specifically includes, but is not limited to, excavation, saw cutting and removal of existing driveway, installation of replacement driveway to match cross section and slope of existing driveway, expansion joint material, contraction joints, backfill, restoration, cleaning, disposal of debris, and all other appurtenant work as specified.

PAY ITEM	DESCRIPTION	UNITS
51	Concrete Driveway Replacement – 4” Thick	SY
52	Concrete Driveway Replacement – 6” Thick	SY

PAY ITEM NO. 53 – INFLOW DISH

Payment for all work included under this Pay Item will be made at the Contract unit price bid for furnishing and installing each inflow dish as shown on the Contract Drawings and listed on the Bid Form. Payment will be made for each inflow dish installed and will represent full compensation for all labor, material, excavation, including rock, bedding, backfill, compaction, sheeting, testing and equipment required to complete this Pay Item. Included in this Pay Item, but not limited to, are all 304 stainless steel inflow dishes, as shown in the Contract Drawings. Submittal shall include a complete bill of materials for all equipment, showing dimensions and materials of construction of

all components, verifying that product will meet the standards specified in the Technical Specifications and Contract Drawings.

WASTEWATER SYSTEM PIPE LINING

PAY ITEM NO. 1 – MOBILIZATION

The work specified in this item consists of the preparatory work and operations in mobilizing for beginning work on the project This item includes, but is not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to and from the project site as a single occurrence per work site, and for the establishment of Subcontractor's temporary offices, buildings, safety equipment, first aid supplies, sanitary and other facilities, as required by these Specifications, special provisions, and State and local laws and regulations. The costs of bonds, permits and any required insurance, and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Labor and equipment travel time from/to the site is included in this pay item.

The Contractor will be required to respond to the request of the Engineer, or designated representative within ten (10) calendar days of notification. The Scope of Work will be developed by Project manager and will be executed in accordance with the terms and conditions of this contract.

The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting and unloading, or under its own power to complete the job assignment or project. Payment for mobilization shall not exceed 10 percent (10%) of the total Contract cost unless the Contractor can prove to the City that his actual mobilization cost exceeds 10 percent (10%).

PAY ITEMS NO. 2 – 14 – MAINTENANCE OF TRAFFIC

This work consists of maintaining traffic within the limits of the project for the duration of the construction period, including any temporary suspensions of the work. All Maintenance of Traffic (MOT) shall comply with FDOT Standard Plans Index 102 Series for Maintenance of Traffic. These pay items shall include labor and equipment to furnishing, installing and maintaining of traffic control and safety devices during construction; the construction and maintenance of any necessary detour facilities; providing necessary facilities for access to residences, businesses, pedestrian, schools, etc., control of dust and any other special requirements for safe and expeditious movement of traffic as may be called for on the plans. MOT shall include all of such facilities, devices and operations as are required for the safety and convenience of the public, as well as for minimizing public nuisance. The Contractor, however, shall not obstruct nor create a hazard to any traffic during the performance of the work and shall be responsible for repair of any damage to existing pavement or facilities caused by his operations. Traffic Control Devices include all types of barricades, arrow boards, signs, temporary pavement markers, lights, concrete barriers and permanent striping. All travel, equipment, labor overhead or any other associated expenses in transportation and setting out the MOT will be included in the price. All MOT line items for Multi-Lane work shall include all costs for items associated with the appropriate FDOT Index (no separate payment for signs, barricades, etc. included with index will be allowed).

Maintenance of Traffic (MOT) shall be measured as units of work, each/day (EA/DY), hourly (HR) or by linear foot (LF) accordingly completed and priced on an individual project basis. The lump sum price for each assignment will be based on the specific MOT requirements for the assignment. The Contractor shall provide the Engineer with a proposal for the MOT that includes a breakdown of the costs, which are included in the lump sum price, and receive written acceptance from the Engineer prior to the installation of the MOT.

PAY ITEM	DESCRIPTION	UNITS
2	Flagmen (Per-Flagmen)	HR
3	Multi Lane, Lane Closures (FDOT Index No. 613)	EA/DY
4	Multi Lane, Intersection (FDOT Index No. 615)	EA/DY
5	Arrow Boards - 5' Minimum Horizontal Size	EA/DY
6	Variable Message Board	EA/DY
7	Concrete Barrier (FDOT Index No. 100)	EA/DY
8	Low Profile Barrier (FDOT Index No. 120)	EA/DY
9	Signs in Work Zones	EA/DY
10	6" Solid line Thermo Plastic - Permanent	LF
11	24" Stop Bar, Solid, Thermo Plastic, Perm.	LF
12	6" Skip line (6'-10' Skip) Thermo Plastic-Perm.	LF
13	Barricades Type III, with Warning Lights	EA/DY
14	Barricades Type I or II, with Warning Lights	EA/DY

PAY ITEMS NO. 15 – 22 – CIPP MAIN LINER

Payment will be made per linear foot for the applicable pipe diameters and minimum thicknesses listed below, regardless of the depth or overall length. Measurement will be from the upstream manhole to the downstream manhole centerlines. Payment shall include all materials, labor, equipment, and supplies necessary for the CIPP Main Liner installation, and specifically includes, but is not limited to, pre-rehabilitation CCTV inspection, liner sampling and storage of samples for testing, sealing liner connections at manholes, matching existing manhole lining to the CIPP liner, matching existing flow channels and surfacing to the liner to minimize turbulence, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris after liner installation, post-rehabilitation CCTV inspection video and log, restoration, and all other appurtenant work as specified.

PAY ITEM	DESCRIPTION	UNITS
15	CIPP Main Liner 6” Diameter – 6.0 mm Thickness	LF
16	CIPP Main Liner 8” Diameter – 6.0 mm Thickness	LF
17	CIPP Main Liner 10” Diameter – 6.0 mm Thickness	LF
18	CIPP Main Liner 12” Diameter – 6.0 mm Thickness	LF
19	CIPP Main Liner 15” Diameter – 7.5 mm Thickness	LF
20	CIPP Main Liner 18” Diameter – 9.0 mm Thickness	LF
21	CIPP Main Liner 21” Diameter – 9.0 mm Thickness	LF
22	CIPP Main Liner 24” Diameter – 10.5 mm Thickness	LF

PAY ITEMS NO. 23 – 30 – CIPP MAIN LINER THICKNESS VARIANCE

Payment for CI PP Main Liner Thickness Variance will be made per linear foot for the applicable pipe diameters listed in the Proposal, regardless of depth or overall length. Liner thickness may be varied due to field conditions requiring a change in the specified minimum thickness. The per linear foot price for CIPP Main Liner Thickness Variance will be added to, or deducted from, the per linear foot price of the Main Liner for the applicable pipe diameter listed in the Bid Form (Pay Items 15 through 22). The Main Liner per linear foot price will be adjusted for each 1.5 mm thickness variance increment. Liner thickness shall be in accordance with Technical Specification Section headed "Cured-In-Place-Pipe (CIPP) " unless otherwise approved by the Engineer in writing.

PAY ITEM	DESCRIPTION	UNITS
23	CIPP Main Liner 6” Diameter – Thickness Variance + 1.5 mm	LF
24	CIPP Main Liner 8” Diameter – Thickness Variance + 1.5 mm	LF
25	CIPP Main Liner 10” Diameter – Thickness Variance + 1.5 mm	LF
26	CIPP Main Liner 12” Diameter – Thickness Variance + 1.5 mm	LF
27	CIPP Main Liner 15” Diameter – Thickness Variance + 1.5 mm	LF
28	CIPP Main Liner 18” Diameter – Thickness Variance + 1.5 mm	LF
29	CIPP Main Liner 21” Diameter – Thickness Variance + 1.5 mm	LF
30	CIPP Main Liner 24” Diameter – Thickness Variance + 1.5 mm	LF

PAY ITEMS NO. 31 – 38 – BYPASS PUMPING SETUP & OPERATION

This item provides for set up and operation of by-pass sewage pumping equipment and temporary piping as required and as described in the Standard Technical Specifications. This Pay Item is applicable on projects or repairs that have high flow or require an over night by pass operation.

The quantity to be measured for payment under this Pay Item will be the actual number of by-pass pumping set ups and operations, per part of day, required by the Engineer in the work. The minimum measurement for this pay item is eight (8) hours or 0.333 days and is measured from the time that the sewage is actually by-passed. This eight (8) hour minimum (0.333 days) includes full compensation for set up and operation for up to the first eight (8) hour period. Additional time will be in tenths of the day or twenty-four (24) hour period. The quantities determined shall be paid per day (DAY) or portion of day of by-pass pumping set up and operation.

PAY ITEM	DESCRIPTION	UNITS
31	Bypass Pumping, Set up, 6" - 10" diameter	EA
32	Bypass Pumping, Set up, 12" - 14" diameter	EA
33	Bypass Pumping, Set up, 15" - 21" diameter	EA
34	Bypass Pumping, Set up, 24" diameter	EA
35	Bypass Pumping, Operation, 6" - 10" diameter	DAY
36	Bypass Pumping, Operation, 12" - 14" diameter	DAY
37	Bypass Pumping, Operation, 15" - 21" diameter	DAY
38	Bypass Pumping, Operation, 24" diameter	DAY

PAY ITEMS NO. 39-42 – NORMAL CLEANING

Payment for Normal Cleaning will be made per linear foot for the applicable pipe diameters listed in the Bid Form, regardless of depth or overall length. Measurement will be from the upstream manhole to the downstream manhole centerlines and based on the average debris depth. Payment shall include all materials, labor, equipment, and supplies necessary for Normal Cleaning, and specifically includes, but is not limited to, the complete removal and disposal of all accumulated debris within the pipe including sludge, dirt, rocks, sand, rubble, and other materials and obstructions, restoration, and all other appurtenant work as specified. Separate Pay Items are provided for Specialty Cleaning.

PAY ITEM	DESCRIPTION	UNITS
39	Normal Cleaning – 6” and 8” Diameter	LF
40	Normal Cleaning – 10” and 12” Diameter	LF
41	Normal Cleaning – 15” and 18” Diameter	LF
42	Normal Cleaning – 21” and 24” Diameter	LF

PAY ITEMS NO. 43-46 – SPECIALTY CLEANING

Payment will be made per linear foot for the applicable pipe diameters listed in the Bid Form, regardless of depth or overall length. Measurement will be based on a minimum of 50 linear feet of pipe, or the actual length of the Specialty Cleaning performed, but not necessarily for the entire pipe segment length. Specialty Cleaning of only joints within a pipe segment, or portion thereof, shall count as 2.5 feet of equivalent pipe length (For Example: 400 feet of 8" pipe with 5 ft joints, clean all joints =80 joints x 2.5 ft =200 feet of specialty cleaning). Equivalent joint length shall not be counted in addition to the length of a pipe segment, or portion thereof, where continuous Specialty Cleaning has been performed. Payment shall include all materials, labor, equipment, and supplies necessary for Specialty Cleaning of wastewater pipe, and specifically includes, but is not limited to, the complete removal and disposal of all accumulated debris within the pipe including grease, roots, joint sealant, tuberculation, and other adherent deposits through the use of special equipment, restoration, and all other appurtenant work as specified. Specialty Cleaning is in addition to Normal Cleaning as described in Pay Items 39 through 42.

PAY ITEM	DESCRIPTION	UNITS
43	Normal Cleaning – 6” and 8” Diameter	LF
44	Normal Cleaning – 10” and 12” Diameter	LF

45	Normal Cleaning – 15” and 18” Diameter	LF
46	Normal Cleaning – 21” and 24” Diameter	LF

PAY ITEMS NO. 47-49 – CHEMICAL SEALING OF HOST PIPE

Payment will be made per each host pipe for the applicable pipe diameters listed in the Bid Form, regardless of depth, overall length, or the number of infiltration points sealed. Measurement will be for a host pipe between manholes. Payment shall include all materials, labor, equipment and supplies necessary for the Chemical Sealing of Host Pipe, and specifically includes, but is not limited to, sealing excessive infiltration at pipe joints and other defects, disposal of debris, post-rehabilitation CCTV inspection video and log, restoration, and all other appurtenant work as specified. A separate Pay Item is provided Chemical Sealing - Grout material.

PAY ITEM	DESCRIPTION	UNITS
47	Chemical Sealing of Host Pipe – 10” Diameter and Less	EA
48	Chemical Sealing of Host Pipe – 12” and 15” Diameter	EA
49	Chemical Sealing of Host Pipe – 18” to 24” Diameter	EA

PAY ITEM NO. 50 – CHEMICAL SEALING - GROUT

Payment will be made per gallon. This Pay item is applicable only in conjunction with Pay Items 47 through 49. Payment shall include all materials, equipment and labor for chemically sealing excessive infiltration at pipe joints and other defects at specified locations for Chemical Sealing of Host Pipe prior to CIPP liner installation.

PAY ITEM NO. 51 – REMOVAL & SEALING OF PROTRUDING SERVICE CONNECTIONS

Payment will be made per each service regardless of the connection diameter or main pipe diameter. Payment shall include all materials, labor, equipment and supplies necessary for the Removal & Sealing of Protruding Connections, and specifically includes, but is not limited to, removing protruding lateral by internal cutting or other remote methods, grouting the main/lateral connection, disposal of debris, post-rehabilitation CCTV inspection video and log, restoration, and all other appurtenant work as specified.

PAY ITEM NO. 52 – ADDITIONAL ACCESS COST MAIN LINER

Payment for Additional Access Cost Main Liner will be made per each access. Measurement will be for a liner installation where both the upstream and downstream manhole are not readily accessible by standard equipment, e.g., when located in rear easements. Payment shall include all additional labor, equipment, materials and supplies to complete the CIPP Main Liner installation in locations with limited access. The Contractor shall attempt to schedule and stage the Work to permit the lining of multiple, contiguous pipe segments from an accessible manhole where feasible.

PAY ITEM NO. 53 – SERVICE RECONNECTION

Payment will be made per each service regardless of the connection diameter or host pipe diameter, and regardless of depth or overall length of the host pipe. Payment shall include all materials, labor, equipment, and supplies necessary for the service reconnection, and specifically includes, but is not limited to, reconnecting service lateral by internal cutting or other remote methods, grouting the annular space between the liner and host pipe at the lateral connection and the first 18-inches of the service lateral, post-rehabilitation CCTV inspection video and log, disposal of debris, restoration, and all other appurtenant work as specified. No additional payment will be made for service reconnections made by excavation.

PAY ITEM NO. 54 – CIPP LINER TESTING

Payment will be made per each test. Measurement will be for a set of tests completed for a liner installation and accepted by the Engineer. Payment shall include all materials, labor, equipment, supplies, and expenses necessary for CIPP Liner Testing, and specifically includes, but is not limited to, preparing samples, laboratory testing, submitting the results to the Engineer, and all other appurtenant work as specified. The cost to obtain and store samples for testing, and any retesting of samples is not included in this Pay Item.

WASTEWATER SYSTEM POINT REPAIRS

PAY ITEM NO. 1 – MOBILIZATION FOR ROUTINE RESPONSE

The work specified in this item consists of the preparatory work and operations in mobilizing for beginning work on the project This item includes, but is not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to and from the project site as a single occurrence per work site, and for the establishment of Subcontractor's temporary offices, buildings, safety equipment, first aid supplies, sanitary and other facilities, as required by these Specifications, special provisions, and State and local laws and regulations. The costs of bonds, permits and any required insurance, and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Labor and equipment travel time from/to the site is included in this pay item.

For routine work, as identified by the Engineer or his designee, the Contractor will be required to respond to the request of the Engineer, or designated representative within ten (10) calendar days of notification. The Scope of Work will be developed by Project manager and will be executed in accordance with the terms and conditions of this contract.

The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting and unloading, or under its own power to complete the job assignment or project.

PAY ITEM NO. 2 – MOBILIZATION FOR EMERGENCY RESPONSE

The work specified in this item consists of the preparatory work and operations in mobilizing for beginning work on the project This item includes, but is not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to and from the project site as a single occurrence per work site, and for the establishment of Subcontractor's temporary offices, buildings, safety equipment, first aid supplies, sanitary and other facilities, as required by these Specifications, special provisions, and State and local laws and regulations. The costs of bonds, permits and any required insurance, and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Labor and equipment travel time from/to the site is included in this pay item.

For emergency work, as identified by the Engineer or his designee, the Contractor will be required to respond to the request of the Engineer, or designated representative within ten (10) calendar days of notification. The Scope of Work will be developed by Project manager and will be executed in accordance with the terms and conditions of this contract.

The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting and unloading, or under its own power to complete the job assignment or project.

PAY ITEMS NO. 3 – 15 – MAINTENANCE OF TRAFFIC

This work consists of maintaining traffic within the limits of the project for the duration of the construction period, including any temporary suspensions of the work. All Maintenance of Traffic (MOT) shall comply with FDOT Standard Plans Index 102 Series for Maintenance of Traffic. These pay items shall include labor and equipment to furnishing, installing and maintaining of traffic control and safety devices during construction; the construction and maintenance of any necessary detour facilities; providing necessary facilities for access to residences, businesses, pedestrian, schools, etc., control of dust and any other special requirements for safe and expeditious movement of traffic as may be called for on the plans. MOT shall include all of such facilities, devices and operations as are required for the safety and convenience of the public, as well as for minimizing public nuisance. The Contractor, however, shall not obstruct nor create a hazard to any traffic during the performance of the work and shall be responsible for repair of any damage to existing pavement or facilities caused by his operations. Traffic Control Devices include all types of barricades, arrow boards, signs, temporary pavement markers, lights, concrete barriers and permanent striping. All travel, equipment, labor overhead or any other associated expenses in transportation and setting out the MOT will be included in the price. All MOT line items for Multi-Lane work shall include all costs for items associated with the appropriate FDOT Index (no separate payment for signs, barricades, etc. included with index will be allowed).

Maintenance of Traffic (MOT) shall be measured as units of work, each/day (EA/DY), hourly (HR) or by linear foot (LF) accordingly completed and priced on an individual project basis. The lump sum price for each assignment will be based on the specific MOT requirements for the assignment. The Contractor shall provide the Engineer with a proposal for the MOT that includes a breakdown of the costs, which are included in the lump sum price, and receive written acceptance from the Engineer prior to the installation of the MOT.

PAY ITEM	DESCRIPTION	UNITS
3	Flagmen (Per-Flagmen)	HR
4	Multi Lane, Lane Closures (FDOT Index No. 613)	EA/DY
5	Multi Lane, Intersection (FDOT Index No. 615)	EA/DY
6	Arrow Boards - 5' Minimum Horizontal Size	EA/DY
7	Variable Message Board	EA/DY
8	Concrete Barrier (FDOT Index No. 100)	EA/DY
9	Low Profile Barrier (FDOT Index No. 120)	EA/DY
10	Signs in Work Zones	EA/DY
11	6" Solid line Thermo Plastic - Permanent	LF
12	24" Stop Bar, Solid, Thermo Plastic, Perm.	LF
13	6" Skip line (6'-10' Skip) Thermo Plastic-Perm.	LF
14	Barricades Type III, with Warning Lights	EA/DY
15	Barricades Type I or II, with Warning Lights	EA/DY

PAY ITEM NO. 16 – AS-BUILT SURVEY

Payment for all work included, but is not limited to, under this Pay Item shall represent full

compensation in accordance with the lump sum price bid for as-built record drawings or any other required certifications to put the proposed system in service. All items are subject to approval by the Engineer.

The quantity to be paid for under this pay item shall per as-built survey completed by a professional surveyor based on the linear foot of sewer main installed.

PAY ITEM NO. 17 – EXCAVATION, UNSUITABLE MATERIAL

The work specified in this item describes the removal of soil unsuitable for a proper foundation, encountered at trench grade. The unsuitable soil shall be removed and disposed of the full width of the trench and to the depth required by the Engineer and replaced with approved bedding material. The backfill shall be thoroughly compacted and shaped to form the pipe bed.

The quantity to be paid for under this Item shall be the volume in cubic yards (CY), computed by the average end area method, of the unsuitable material removed within the limits of depth shown on the Plans or as directed by the Engineer or his representative.

PAY ITEMS NO. 18 & 19 – SHEETING AND BRACING, ADDITIONAL

The quantities to be paid for under this item shall be the number of square feet of sheeting installed in addition to 6’ of depth. The quantities to be paid for under this item shall be based on the square feet of sheeting installed and accepted.

PAY ITEM	DESCRIPTION	UNITS
18	Sheeting & Bracing (Left in Place)	SF
19	Sheeting & Bracing, Pipe Trenches (Removed)	SF

PAY ITEMS NO. 20 - 25 – WELL POINT DEWATERING INITIAL

Measurement and payment of this pay item is based on the set up of dewatering equipment as required by the Contractor and allowed or directed by the Engineer to perform contracted work in accordance with the Technical Specifications. The work shall include all labor, equipment and materials, testing, and any required incidentals necessary to completely install, monitor and operate the dewatering system including the placement of up to twenty (20) well points to the various depths listed in the proposal per job assignment. The dewatering system shall stabilize the excavation and remain in operation until backfilling operations are complete. This pay item shall include the maintenance, repairs, pumps, fueling, oiling greasing, and other operational support procedures and supplies required for the operation of the system.

Well point dewatering is an authorized pay item only when the installation is below 6 feet in depth and site conditions warrant or on emergency response work where site conditions warrant as directed by the City representative.

The quantities to be paid for under this item shall be based on the depth of each (EA) dewatering

system per job assignment, installed and accepted.

PAY ITEM	DESCRIPTION	UNITS
20	Well Point Dewatering Initial – 6'-8' Deep	EA
21	Well Point Dewatering Initial – 8'-10' Deep	EA
22	Well Point Dewatering Initial – 10'-12' Deep	EA
23	Well Point Dewatering Initial – 12'-14' Deep	EA
24	Well Point Dewatering Initial – 14'-16' Deep	EA
25	Well Point Dewatering Initial – >16' Deep	EA

PAY ITEMS NO. 26 – 31 – WELL POINT DEWATERING ADDITIONAL

This item provides all labor, materials and equipment for the placement and operation of additional well points over and above the twenty (20) well points paid for under Pay Items 20-25. The work includes connection of the well points to the dewatering pumping equipment.

The quantity to be paid under this item will be the actual number of each (EA) well points placed and operated in the work as directed by Engineer for the various depths listed in the proposal less the twenty (20) paid for under Pay Items 20-25.

PAY ITEM	DESCRIPTION	UNITS
26	Well Point Dewatering Additional – 6'-8' Deep	EA
27	Well Point Dewatering Additional – 8'-10' Deep	EA
28	Well Point Dewatering Additional – 10'-12' Deep	EA
29	Well Point Dewatering Additional – 12'-14' Deep	EA
30	Well Point Dewatering Additional – 14'-16' Deep	EA
31	Well Point Dewatering Additional – >16' Deep	EA

PAY ITEMS NO. 32 – 35 – JACK & BORE

The work consists of furnishing all labor, equipment and materials and installing the crossing listed on the Bid Form by the jack and bore method in accordance with the specifications. The unit price shall include all costs necessary to install the crossing at the specified depth and size, including survey layout (based upon property monuments established by others), protection of property, materials, dewatering, pavement cutting, launching and receiving pits, exploratory pits, restrained joints, carrier pipe, tracer wire, tracer wire testing, casing pipe, casing spacers, casing end seals, fitting material including joints and jointing material, bracing, utility crossings, barricades, clearing, grubbing and stripping of the right-of-way, trenching, bedding and backfilling, protection of existing utilities; pigging, flushing and cleaning, pressure testing and As-built documentation. Surface restoration if specified or directed, will be paid for under other Pay Items.

The quantity for furnishing and installing the pipe or casing shall be made on a per linear foot basis as measured horizontally above the centerline of the casing including the length of four (4) feet beyond the edge of pavement or back of the concrete curb from each side of the road or driveway.

PAY ITEM	DESCRIPTION	UNITS
32	Jack & Bore 12” x 0.188” Steel Casing (6” GS)	LF
33	Jack & Bore 16” x 0.219” Steel Casing (8” GS)	LF
34	Jack & Bore 20” x 0.250” Steel Casing (10” GS)	LF
35	Jack & Bore 24” x 0.281” Steel Casing (12” GS)	LF

PAY ITEMS NO. 36 – 41 – DIRECTIONAL DRILL

The work consists of furnishing and installing underground sewer mains using the horizontal directional drilling (HDD) method of installation. This work shall include all services, equipment, materials, labor, installation of two 14 gauge minimum tracer wires, tracer wire testing, appurtenances, DI/HDPE mechanical joint adapters, pipe and joint restraints for connections to fittings, materials above or below ground along pipeline alignment; joints and jointing materials, bentonite clay slurry seal, launching and receiving pits, exploratory pits; bracing, bedding and backfill, disposal of spoil; pressure testing; pigging, flushing, cleaning erosion protection and control, surface grading, and all other related and necessary materials for the complete and proper installation, testing, and restoration of underground sewer mains

Measurement for payment for furnishing and installing HDD pipe for drill depths up to 20-foot-deep shall be made on a per linear foot (LF) basis as measured horizontally on the ground above the pipe centerline through valves and fittings for all pipe. Measurement for payment for finishing and installation HDD pipe for drill depths greater than 20-foot depth shall be made on a per linear foot (LF) basis of the actual length of pipe installed.

PAY ITEM	DESCRIPTION	UNITS
36	2” Directional Drill HDPE DR 9, IPS	LF
37	4” Directional Drill HDPE DR 11, DIPS	LF
38	6” Directional Drill HDPE DR 11, DIPS	LF
39	8” Directional Drill HDPE DR 11, DIPS	LF
40	10” Directional Drill HDPE DR 11, DIPS	LF
41	12” Directional Drill HDPE DR 11, DIPS	LF

PAY ITEMS NO. 42 – 146 – GRAVITY SANITARY SEWER

The work consists of furnishing all labor, equipment and materials for installing pipe as shown on the plans or directed by the Engineer. All ductile iron pipe shall have polyethylene encasement. The unit price shall include all costs necessary to install the pipe including survey layout (based upon property monuments established by others), clearing and grubbing, excavation, sheeting/shoring for excavation up to 6-ft deep, bracing, dewatering for excavations up to 6-ft deep, structural fill, material, polyethylene wrap on ductile iron pipe, testing, pavement cutting, trenching, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, field layout, etc. Restoration will be paid for under separate pay items. Work performed for Point Repairs of gravity sewer pipes will be paid for under separate pay items.

The quantities of pipe to be paid for under this item shall be the length in linear feet of pipe measured along the centerline of the pipe through manholes in place, completed, tested, and accepted.

PAY ITEM NO. 147 – INSTALL PVC CLEANOUT

The work consists of furnishing all labor, equipment, and materials for installation of a new PVC riser pipe and cleanout at the ROW line (or other location as directed by the Engineer) on existing sewer lateral. The existing sewer lateral material may be PVC, Vitrified Clay, or DIP pipe. The unit price shall include all costs necessary to install riser pipe and cleanout including survey layout (based upon property monuments established by others), material, polyethylene wrap on ductile iron pipe, fittings, pipe cutting, wye unit on main, installation of riser pipe and cleanout, pavement cutting, trenching, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, field layout, restoration, sodding, etc. The pay item shall include cleanout installation up to ten (10) feet in depth.

The quantities of pipe to be paid for under this item shall be each measured and inspected in place, completed, and accepted.

PAY ITEM NO. 148 – REPLACE PVC CLEAN OUT WITH MANHOLE STRUCTURE

The work consists of furnishing all labor, equipment, and materials for the replacement of an existing PVC clean out with a concrete manhole. The unit price shall include all costs necessary to replace clean out including survey layout (based on property monuments established by others), material, fittings, pipe cutting, concrete manhole installation, pavement cutting, trenching, dewatering for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, field layout, restoration, sodding, etc. The pay item shall include the removal of clean outs and installation of manholes up to four (4) feet in depth.

The quantities of manholes to be paid for under this item shall be each measured and inspected in place, completed, and accepted.

PAY ITEMS NO. 149 – 153 – REMOVE PIPE (GRAVITY SEWER)

The work consists of furnishing all labor and equipment to remove and dispose of out of service mains. Unless otherwise indicted by the Engineer or his representative, the pipe removed becomes the property of the Contractor. The unit price shall include all costs necessary to remove the pipe (including fittings, valves, reverse deadmen, etc.) including pavement cutting, trenching, replacement of base material, dewatering for excavations up to 6- ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, restoration of pavement and grass, etc.

The quantities of pipe removal to be paid for under this Item shall be the length in linear feet (LF) of pipe measured along the centerline of the pipe through valves and fittings actually removed.

PAY ITEM	DESCRIPTION	UNITS
149	Remove Pipe 2” or 4” (Gravity Sewer)	LF
150	Remove Pipe 6” or 8” (Gravity Sewer)	LF
151	Remove Pipe 10” or 12” (Gravity Sewer)	LF
152	Remove Pipe 15”, 16”, or 18” (Gravity Sewer)	LF
153	Remove Pipe 21” or 24” (Gravity Sewer)	LF

PAY ITEMS NO. 154 – 167 – INSTALL OR ADJUST SERVICE LATERAL

The work consists of furnishing all labor, equipment, by-pass operations, customer coordination and materials for installation of a new or relocating a sanitary sewer service lateral found to be in conflict with proposed improvement or as directed by the Engineer. The unit price shall include all costs necessary to install up 30 linear feet of service pipe including survey layout (based upon property monuments established by others), material, polyethylene wrap on ductile iron pipe, fittings, pipe cutting, wye unit on main, installation of riser pipe and cleanout at the ROW line, pavement cutting, trenching, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, field layout, etc. Service pipe lengths in excess of 30 feet will be paid for as Gravity Sewer Pipe (Pay Items 41-145). Restoration will be paid for under separate pay items.

The quantities of pipe to be paid for under this item shall be each measured and inspected in place, completed, and accepted.

PAY ITEM	DESCRIPTION	UNITS
154	4" Pipe - Install or Adjust Service Lateral 0'-6' Deep	EA
155	4" Pipe - Install or Adjust Service Lateral 6'-8' Deep	EA
156	4" Pipe - Install or Adjust Service Lateral 8'-10' Deep	EA
157	4" Pipe - Install or Adjust Service Lateral 10'-12' Deep	EA

158	4" Pipe - Install or Adjust Service Lateral 12'-14' Deep	EA
159	4" Pipe - Install or Adjust Service Lateral 14'-16' Deep	EA
160	4" Pipe - Install or Adjust Service Lateral 16'-18' Deep	EA
161	6" Pipe - Install or Adjust Service Lateral 0'-6' Deep	EA
162	6" Pipe - Install or Adjust Service Lateral 6'-8' Deep	EA
163	6" Pipe - Install or Adjust Service Lateral 8'-10' Deep	EA
164	6" Pipe - Install or Adjust Service Lateral 10'-12' Deep	EA
165	6" Pipe - Install or Adjust Service Lateral 12'-14' Deep	EA
166	6" Pipe - Install or Adjust Service Lateral 14'-16' Deep	EA
167	6" Pipe - Install or Adjust Service Lateral 16'-18' Deep	EA

PAY ITEMS NO. 168 – 177 – SEWER LINE MANHOLE CONNECTION

The work consists of all labor, equipment, investigative digging, and materials for repair of an existing connection into manhole wall or to install a new connection. All core drills shall be of sufficient diameter to accommodate pipe connection. Manhole connections may be either gravity sewer or sewer forcemain. All connections shall include a water stop or boot connection. Payment shall also include core drills, masonry or concrete patching, fiberglass and interior surface patching, shoring, dewatering for excavations up to 6-ft deep, backfill, refill, compaction operations, and compaction testing or re-testing. All sewer forcemain connections shall include installation of a drop bowl, paid for under Pay Items 177-186. The work does not include excavation or surface restoration which, if required, will be paid for, or is part of the work, under other Pay Items.

The quantities of connections into manholes to be paid under this item shall be each measured in place, completed, inspected, and accepted.

PAY ITEM	DESCRIPTION	UNITS
168	2" Sewer Line Manhole Connection	EA
169	4" Sewer Line Manhole Connection	EA
170	6" Sewer Line Manhole Connection	EA
171	8" Sewer Line Manhole Connection	EA
172	10" Sewer Line Manhole Connection	EA
173	12" Sewer Line Manhole Connection	EA
174	16" Sewer Line Manhole Connection	EA
175	18" Sewer Line Manhole Connection	EA
176	21” Sewer Line Manhole Connection	EA
177	24” Sewer Line Manhole Connection	EA

PAY ITEMS NO. 178 – 187 – INSIDE DROP CONNECTION

This item provides for all labor, equipment and material to install a PVC drop connection inside an existing manhole. This work includes all interior piping, drop bowl and any masonry or concrete

and coatings patching required to complete a repair connection or install a new drop connection to an existing manhole in accordance with Technical Specifications.

The quantity to be measured for payment under this Pay Item will be the actual number each (EA) of manhole inside drop connections completed and accepted.

PAY ITEM	DESCRIPTION	UNITS
178	2" Inside Drop Connection	EA
179	4" Inside Drop Connection	EA
180	6" Inside Drop Connection	EA
181	8" Inside Drop Connection	EA
182	10" Inside Drop Connection	EA
183	12" Inside Drop Connection	EA
184	15"/16" Inside Drop Connection	EA
185	18" Inside Drop Connection	EA
186	21" Inside Drop Connection	EA
187	24" Inside Drop Connection	EA

PAY ITEM NO. 188 – GROUTING OUT OF SERVICE PIPE (FORCE MAIN)

This item provides for all labor, equipment and material to install chemical grout or flowable fill into an existing pipe to be abandoned. Prior to grout filling the line, the Contractor shall verify that no live services remain connected to the line. The underground conduit (pipe, waterline, sewer line, storm drain line, etc.) be completely filled with a low strength cement grout (or flowable fill). In order to achieve this, the grout to be pumped into the line shall have a consistency that will permit forced flow into the entire length of line. Blocking the line by intermediate excavation and gravity flow concrete or grout is NOT acceptable. The existing line to be grout filled shall be exposed and plugged with concrete bulkheads or plugs at both ends. The grout shall be pumped through the pipe until the grout is visible at the other end of the underground conduit. No more than 15 psi shall be used to pump the grout mixture, and care should be used to avoid grout filling adjoining voids.

The quantities of pipe to be paid for under this Item shall be the volume in cubic yards of the inside pipe area times the length of pipe. No payment will be made for material that escapes the pipe or ends enclosures.

PAY ITEMS NO. 189 – 191 – DISCONNECT & PLUG PIPE

The work consists of furnishing all labor, equipment and materials to disconnect and cap/plug sewer mains that will remain in or out of service. The unit price shall include all nuts, bolts, gaskets, caps/plugs, restraint devices, thrust blocks, cutting existing pipe, removal of valve boxes, blow-off assemblies, scheduling and notification of service interruptions and all other operations required to disconnect and cap/plug the water mains.

The quantity of disconnect and cap/plug water mains to be paid for under this item shall be the

number each (EA) measured in place, completed and accepted.

PAY ITEM	DESCRIPTION	UNITS
189	Disconnect & Plug 2" or 4" Pipe	EA
190	Disconnect & Plug 6" or 8" Pipe	EA
191	Disconnect & Plug 10" or 12" Pipe	EA

PAY ITEMS NO. 192 – 202 – SANITARY SEWER FORCE MAIN

The work consists of furnishing all labor, equipment and materials and installing sanitary forcemain pipe by the open-cut method in accordance with the specifications.

The unit price shall include all costs necessary to install the pipe up to 6 feet in depth, including: survey layout (based upon property monuments established by others); protection of property; protection of existing utilities, mailboxes and service connections; erosion protection (silt fence, hay bales, floating turbidity barriers, or other means, as required); materials, pavement cutting, extra pipe fitting material including joints/jointing material/restraints; shoring, sheeting for excavations up to 6-ft deep; bracing; utility crossings; barricades; clearing; grubbing and stripping of the right-of-way; trenching, bedding and backfilling; pigging; flushing and cleaning; pressure testing. Fittings shall be included in the cost of 2” pipe. Dual tracer wire and tracer wire testing shall be included in the price for PVC pipe items. Polyethylene encasement shall be included in the bid price for DI pipe items. Restoration will be paid for under separate pay items.

Additional payment will be made for extra depth installation over six feet under a separate pay item. Well point dewatering is an authorized pay item only when the installation is below 6 feet in depth and site conditions warrant; all dewatering up to 6 feet in depth is included in this pay item.

The quantities of pipe to be paid for under this Item shall be the length in linear feet of pipe measured along the centerline of the pipe in place, completed, tested, and accepted.

199	10" PVC Pipe, C-900 DR 18 (Force Main)	LF
200	10" PVC Restrained Joint Pipe & Fittings FM, C-900 DR 18	LF

201	12" PVC Pipe, C-900 DR 18 (Force Main)	LF
202	12" PVC Restrained Joint Pipe & Fittings FM, C-900 DR 18	LF

PAY ITEMS NO. 203 – 208 – RESTRAINED JOINTS

The work specified in this item describes measurement and payment for furnishing all labor, equipment and materials and installing restrained joint hardware including mechanical joint restrainers, bell restrainers and PVC restrainers complete including bolts, gaskets, rods, special flanges, color coded polyethylene encasement , testing, acceptance, and ready for service. Restrained joints for pipe associated with fittings per the design of new pipe shall be paid for under separate pay item. This item shall only be used to restrain existing in-service pipelines or to install additional restraints above the amount specified, as directed by the Engineer or his representative.
`

The quantities of retrained joints to be paid for under this item shall be the number of each (EA) measured in place and accepted. No restrained joint hardware or any part of a restrained joint hardware shall be included for payment under more than one Item.

PAY ITEM	DESCRIPTION	UNITS
203	2" Restrained Joints	EA
204	4" Restrained Joints	EA
205	6" Restrained Joints	EA
206	8" Restrained Joints	EA
207	10" Restrained Joints	EA
208	12" Restrained Joints	EA

PAY ITEMS NO. 209 – 211 - FORCE MAIN OVER DEPTH EXCAVATION

The work consists of furnishing all labor and equipment to excavate additional depth greater than 6 feet depth for installation of sewer forcemain pipe by the open-cut method in accordance with the specifications. The unit price shall include all costs necessary to excavate additional depth over 6 feet including: survey layout (based upon property monuments established by others); protection of property, existing utilities, mailboxes and service connections; erosion protection (silt fence, hay bales, floating turbidity barriers, or other means, as required); materials; pavement cutting; bracing; utility crossings; barricades; clearing; grubbing and stripping of the right-of-way; trenching, bedding; and backfilling. Well point dewatering and sheeting are authorized pay items when the installation is below 6 feet in depth and site conditions warrant.

Measurement for payment for excavating each additional foot of depth to install pipe or appurtenances shall be made on a per linear foot (LF) basis for each additional vertical foot of depth over 6 feet as measured horizontally above the pipe centerline through valves and fittings.

PAY ITEM	DESCRIPTION	UNITS
209	2"-4" Forcemain Pipe and Appurtenances - Over Depth Excavation	LF

210	6"-8" Forcemain Pipe and Appurtenances - Over Depth Excavation	LF
211	10"-12" Forcemain Pipe and Appurtenances - Over Depth Excavation	LF

PAY ITEMS NO. 212 – 214 – REMOVE OUT OF SERVICE PIPE (FORCE MAIN)

The work consists of furnishing all labor and equipment to remove and dispose of out of service mains. Unless otherwise indicted by the Engineer or his representative, the pipe removed becomes the property of the Contractor. The unit price shall include all costs necessary to remove the pipe (including fittings, valves, reverse deadmen, etc) including pavement cutting, trenching, replacement of base material, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, etc. Restoration will be paid for under separate pay items.

The quantities of pipe removal to be paid for under this Item shall be the length in linear feet (LF) of pipe measured along the centerline of the pipe through valves and fittings actually removed.

PAY ITEM	DESCRIPTION	UNITS
212	Remove Out of Service Pipe 2" or 4" (Force Main)	LF
213	Remove Out of Service Pipe 6" or 8" (Force Main)	LF
214	Remove Out of Service Pipe 10" or 12" (Force Main)	LF

PAY ITEMS NO. 215 – 220 – SLEEVED CONNECTION

The work consists of furnishing all labor, equipment and materials for installing sleeve connections not included in other items. The unit price shall include notification of shutdown to property owners, establishing alignment, moving and aligning old and new pipe, cleaning and cutting old pipe, sterilization, restraint jointing materials, color-coded polyethylene encasement, and all other operations required to make the connection. All connections shall include the cost of the sleeve or coupling, joint restraints and removal & disposal of up to twenty feet of existing main. Valves, pipe, additional joint restraints on existing main and fittings for connections shall be paid for under separate pay items.

The quantities of sleeve connection to be paid for under this item shall be the number each measured in place, completed, tested, and accepted

PAY ITEM	DESCRIPTION	UNITS
215	2" Sleeved Connection	EA
216	4" Sleeved Connection	EA
217	6" Sleeved Connection	EA
218	8" Sleeved Connection	EA
219	10" Sleeved Connection	EA
220	12" Sleeved Connection	EA

PAY ITEMS NO. 221 – 223 – REVERSE DEADMAN

The work covered by this item consists of reverse deadman installation for mains up to 12 inch in diameter. The installation shall include the corresponding size restrained joint as shown in the standard detail. This pay item includes: the furnishing of all materials and for the proper installation of the reverse deadman in strict accordance with the appropriate pipe specifications, excavation, erosion protection and control, backfill, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, shoring, surface grading, disposal of water, appropriate sized joint restraint, and concrete, all tools, equipment, labor, and materials necessary to install the reverse deadman as shown, specified or required for the proper completion of the work. Concrete shall cure for 72 hours or as determined by concrete mix design before applying force.

The quantities of reverse dead-man construction to be paid under this item shall be each measured in place, inspected, cured, and accepted.

PAY ITEM	DESCRIPTION	UNITS
221	Reverse Deadman for 2" or 4" Pipe	EA
222	Reverse Deadman for 6" or 8" Pipe	EA
223	Reverse Deadman for 10" or 12" Pipe	EA

PAY ITEM NO. 224 – DUCTILE IRON FITTINGS

The work consists of furnishing all labor, equipment and materials for installing ductile iron fittings not included in other items. All fittings shall include and be installed with joint restraints. The unit price includes furnishing and installing all fittings and materials above or below ground along the pipeline alignment; joints, joint restrainers, and jointing materials; bracing, shoring, and sheeting; dewatering, clearing, grubbing, and stripping; trenching, bedding and backfill; constructing the specified protection and adjusting of existing above ground and underground utilities and service connections; disposal of spoil; color coded polyethylene encasement; pressure testing; erosion protection and control, and all other related and necessary materials, work and equipment required to construct a complete, operable pipeline. The cost of furnishing and installing joint restraints shall be included in the unit price for Ductile Iron Fittings.

The quantities of ductile iron fittings to be paid for under this Item shall be the weight of the fitting required as established weight per fitting, including bolts, in tons (2,000 pounds) measured in place, completed, tested, and accepted. The weight of gaskets, jointing materials, etc., shall not be included in the computation of ductile iron fitting tonnage.

PAY ITEMS NO. 225 & 226 – 2” SS 316 AIR RELEASE VALVE ASSEMBLIES

The work consists of installing 2” SS 316 air release assemblies on sanitary sewer force mains. The unit bid price shall include installing the air release assembly, testing, excavation, backfill, bracing, shoring, sheeting for excavations up to 6-ft deep, dewatering for excavations up to 6-ft deep, surface grading, erosion protection and control, furnishing and installing tap saddle, tap, corporation stop, ball corporation, curb stop, automatic air release valve, enclosure, testing, miscellaneous brass nipples and fittings, and incidental items required to install a new assembly

as shown on the standard detail. All assemblies shall include tracer wire access, drainage gravel and miscellaneous nipples and fittings as shown in the standard details, filter fabric, valve identification tags, paint reference stripe on curb, painting of valve cover and meter boxes.

Measurement shall be on an individual basis for each (EA) assembly installed and accepted.

PAY ITEM	DESCRIPTION	UNITS
225	2" SS 316 Air Release Assembly (Underground)	EA
226	2" SS 316 Air Release Assembly (Aboveground)	EA

PAY ITEMS NO. 227 – 232 – RESILIENT WEDGE GATE VALVE

The work consists of furnishing all labor, equipment and materials for installing a valve not included in other items. The unit bid price includes furnishing and installing valves, valve boxes and covers, color coded polyethylene encasement, tracer wire access, filter fabric, valve identification tags, paint reference stripe on curb, painting of valve cover, concrete valve box pad, extension stems, joint restraints, pressure testing, excavation, backfill, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, shoring, surface grading and incidental construction associated with these items.

The quantities of valves to be paid for under this Item shall be the number each measured in place, completed, tested, and accepted.

PAY ITEM	DESCRIPTION	UNITS
227	2" RWGV (Resilient Wedge Gate Valve) & Box	EA
228	4" RWGV & Box C 515	EA
229	6" RWGV & Box C 515	EA
230	8" RWGV & Box C 515	EA
231	10" RWGV & Box C 515	EA
232	12" RWGV & Box C 515	EA

PAY ITEMS NO. 233 & 234 – ADJUST VALVE BOX TO FINISHED GRADE

The work consists of furnishing all labor, equipment, and materials for the vertical adjustment of an existing valve box and cover to match proposed finish grade. The unit price shall include placement of the valve cover to finish grade as shown on plans or directed by the Engineer.

the quantity of valve box and cover adjustments to be paid for under this item shall be the number each measured in place, on grade, inspected, and accepted.

PAY ITEM	DESCRIPTION	UNITS
233	Adjust Valve Box to Finished Grade (In Pavement)	EA
234	Adjust Valve Box to Finished Grade (Outside of Pavement)	EA

PAY ITEMS NO. 235 – 239 – LINE STOPS

The work consists of furnishing all labor, equipment and materials, including but not limited to dewatering for excavations up to 6-ft deep, excavation, sheeting for excavations up to 6-ft deep, shoring, preliminary measurements of the pipe prior to ordering the saddle, installing concrete cradle and support, line stop tapping sleeve, valve, and performing line stop installation with and for the duration of the new valve installation, pressure testing of tap saddle/sleeve, polyethylene wrap, and valve box for constructing a line stop on an existing sewer main and the adjustment of its valve box to finish grade. If a by-pass line stop installation is required, the by-pass piping will be paid for under line items for piping.

The quantities of Line Stops to be paid for under this Item shall be the number each measured in place, completed, tested, and accepted.

PAY ITEM	DESCRIPTION	UNITS
235	4" Line Stop	EA
236	6" Line Stop	EA
237	8" Line Stop	EA
238	10" Line Stop	EA
239	12" Line Stop	EA

PAY ITEMS NO. 240 – 259 – TAPPLING SLEEVE/SADDLE VALVE & BOX

The work consists of the installation of tapping saddle or sleeve and associated valves. The quantity to be paid for under this item is the number of connections acceptably installed. Cut in tee and valve may be required in some locations due to utility conflicts and will be paid for as equal sized tap. The unit bid price includes all materials and installation from the point of connection to the main line including scheduling and notification of service interruptions, furnishing and installing tapping saddle, color coded polyethylene encasement, valves, taps, fittings, piping, joint restraints, valve boxes and covers, concrete valve box pads, valve extension stems, tracer wire access, valve identification tags, filter fabric, paint reference stripe on curb, painting of valve box cover, excavation, erosion protection and control, backfill, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, shoring, surface grading, disposal of water, pressure testing and all other related, necessary, and incidental materials, work and equipment required to complete the connection. All joints shall be restrained.

The quantities of valves/taps to be paid for under this Item shall be the number each measured in place, completed, tested, and accepted.

PAY ITEM	DESCRIPTION	UNITS
240	4" x 2" Tapping Saddle Valve & Box	EA
241	4" x 4" Tapping Sleeve Valve & Box	EA
242	6" x 2" Tapping Saddle Valve & Box	EA
243	6" x 4" Tapping Sleeve Valve & Box	EA
244	6" x 6" Tapping Sleeve Valve & Box	EA

245	8" x 2" Tapping Saddle Valve & Box	EA
246	8" x 4" Tapping Sleeve Valve & Box	EA
247	8" x 6" Tapping Sleeve Valve & Box	EA
248	8" x 8" Tapping Sleeve Valve & Box	EA
249	10" x 2" Tapping Saddle Valve & Box	EA
250	10" x 4" Tapping Sleeve Valve & Box	EA
251	10" x 6" Tapping Sleeve Valve & Box	EA
252	10" x 8" Tapping Sleeve Valve & Box	EA
253	10" x 10" Tapping Sleeve Valve & Box	EA
254	12" x 2" Tapping Saddle Valve & Box	EA
255	12" x 4" Tapping Sleeve Valve & Box	EA
256	12" x 6" Tapping Sleeve Valve & Box	EA
257	12" x 8" Tapping Sleeve Valve & Box	EA
258	12" x 10" Tapping Sleeve Valve & Box	EA
259	12" x 12" Tapping Sleeve Valve & Box	EA

PAY ITEMS NO. 260 – 269 – MANHOLES

The work consists of furnishing all labor, equipment, by-pass operations, customer coordination and materials for constructing a sanitary sewer manhole at location shown on plans or as directed by the Engineer. The unit price shall include all costs necessary to construct the manhole including survey layout (based upon property monuments established by others), material, pavement cutting, trenching, replacement of base material, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, and backfilling. The depth of the manhole will be measured from the top of the cover down to the invert of the outlet sewer pipe. Excavation and well point dewatering for pipeline Manhole installations are separate pay items.

The quantities of manholes to be paid under this item shall be vertical feet of depth measured in place, completed, inspected, and accepted.

PAY ITEM	DESCRIPTION	UNITS
260	4' Dia. - Precast Manhole Standard	VF
261	4' Dia. - Precast Manhole Inside Drop	VF
262	4' Dia. - Precast Manhole Outside Drop	VF
263	5' Dia. - Precast Manhole Standard	VF
264	5' Dia. - Precast Manhole Inside Drop	VF
265	5' Dia. - Precast Manhole Outside Drop	VF
266	5' Dia. - Precast Air Release Manhole	VF
267	6' Dia. - Precast Manhole Standard	VF
268	6' Dia. - Precast Manhole Inside Drop	VF
269	6' Dia. - Precast Manhole Outside Drop	VF

PAY ITEM NO. 270 – REMOVAL OF EXISTING MANHOLE

This work item shall provide all labor, equipment and materials for the removal of existing manholes up to four feet in depth and plugging of existing lines with brick and mortar. The work does not include excavation, surface restoration, sheeting, MOT, or well point dewatering which, if required, will be paid for under other Pay Items.

The quantity to be measured for payment under this Pay Item will be the actual number of manhole removals completed and accepted up to four (4) feet in depth.

PAY ITEM NO. 271 – REMOVAL OF EXISITING MANHOLE ADDITIONAL

The work consists of all work contained in Pay Item Remove Existing Manholes and provides for manhole removal for depths greater than four (4') feet deep.

The quantity to be measured for payment under this Pay Item will be the actual length in vertical feet of additional manhole removal in the work less the four (4) feet paid for under other Pay Items

PAY ITEMS NO. 272 – 279 – INITIAL EXCAVATION

The work consists of furnishing all labor, equipment, materials, traffic control and supervision necessary for the excavation exposing up to 30 linear feet of existing sanitary sewer gravity or forcemain pipe as measured along the pipe in a horizontal plane. The unit price shall contain all costs necessary to expose the pipe, temporary sheeting/shoring/bracing up to 6-ft deep, dewatering, well point dewatering up to 6' deep, crushed stone, stabilization and protection of existing utilities, property protection, backfilling, compaction, and all other related and necessary materials required to expose the pipe to be repaired in accordance with the Contract Documents. There shall be one Initial Excavation per work site unless otherwise approved by the Engineer. The following items, if required or as determined by the Engineer, will be paid for under other Contract Pay Items: pipeline point repair, pipeline offset relocation, select backfill material, well point dewatering, by-pass pumping, surface restoration, sheeting for excavations greater than 6-ft deep, and pavement restoration.

The quantity to be paid for under this item shall be the actual number of each (EA) per job assignment for initial excavation made in conjunction with exploration or pipe repair at the various cut ranges listed. The cut for Initial Excavation shall be the average of the pipe cut (grade elevation minus the pipe invert elevation) measured at each end of the trench, which measures 30 feet in length or less in conjunction of pipeline point repair or relocation offset.

PAY ITEM	DESCRIPTION	UNITS
272	Initial Excavation - 0'-6' Deep	EA
273	Initial Excavation - 6'-8' Deep	EA
274	Initial Excavation - 8'-10' Deep	EA
275	Initial Excavation - 10'-12' Deep	EA
276	Initial Excavation - 12'-14' Deep	EA
277	Initial Excavation - 14'-16' Deep	EA
278	Initial Excavation - 16'-18' Deep	EA
279	Initial Excavation - 18'-20' Deep	EA

PAY ITEMS NO. 280 – 287 – ADDITIONAL EXCAVATION

The work consists of furnishing all labor, equipment, materials, traffic control and supervision necessary for the excavation to expose existing pipe as measured in the horizontal plane in excess of the original 30 linear feet included in Initial Excavation pay item. This Pay Item is applicable only in conjunction with, and includes the same work as listed in Pay Items 271-278.

Measurement of payment shall be the actual number of linear feet (LF) per job assignment for additional excavations made in conjunction with exploration of pipeline point repair or relocation offset.

PAY ITEM	DESCRIPTION	UNITS
280	Additional Excavation - 0'-6' Deep	LF
281	Additional Excavation - 6'-8' Deep	LF
282	Additional Excavation - 8'-10' Deep	LF
283	Additional Excavation - 10'-12' Deep	LF
284	Additional Excavation - 12'-14' Deep	LF
285	Additional Excavation - 14'-16' Deep	LF
286	Additional Excavation - 16'-18' Deep	LF
287	Additional Excavation - 18'-20' Deep	LF

PAY ITEMS NO. 288 – 295 – BYPASS PUMPING SETUP & OPERATION

This item provides for set up and operation of by-pass sewage pumping equipment and temporary piping as required and as described in the Standard Technical Specifications. This Pay Item is applicable on projects or repairs that have high flow or require an over night by pass operation.

The quantity to be measured for payment under this Pay Item will be the actual number of by-pass pumping set ups and operations, per part of day, required by the Engineer in the work. The minimum measurement for this pay item is eight (8) hours or 0.333 days and is measured from the time that the sewage is actually by-passed. This eight (8) hour minimum (0.333 days) includes full compensation for set up and operation for up to the first eight (8) hour period. Additional time will be in tenths of the day or twenty-four (24) hour period. The quantities determined shall be paid per day (DAY) or portion of day of by-pass pumping set up and operation.

PAY ITEM	DESCRIPTION	UNITS
288	Wastewater Bypass Pumping, Set up, 6" - 10" diameter	EA
289	Wastewater Bypass Pumping, Set up, 12" - 14" diameter	EA
290	Wastewater Bypass Pumping, Set up, 15" - 21" diameter	EA
291	Wastewater Bypass Pumping, Set up, 24" diameter	EA
292	Wastewater Bypass Pumping, Operation, 6" - 10" diameter	DAY

293	Wastewater Bypass Pumping, Operation, 12" - 14" diameter	DAY
294	Wastewater Bypass Pumping, Operation, 15" - 21" diameter	DAY
295	Wastewater Bypass Pumping, Operation, 24" diameter	DAY

PAY ITEMS NO. 296 – 311 – GRAVITY SEWER POINT REPAIR

This item provides all labor, equipment and materials for the replacement of up to twenty (20) linear feet of gravity sewer pipe with PVC or Ductile Iron pipe (Material as directed by the Engineer at each occurrence). The existing sewer pipe may be Vitrified Clay, PVC, Ductile Iron, Cast Iron, or Concrete gravity sewer main. The work includes repair sleeves, cutting existing pipe, pipe bedding, new replacement pipe, disposal of existing pipe, and reconnection of lateral connections to sewer main. This item also includes maintaining of flow in low flow systems that can be accomplished with up to a four (4) inch mud hog, diaphragm or centrifugal type pump and lay flat hose or temporarily blocking the sewer for a period of time to facilitate the repair. The cost of lengths of pipe greater than twenty (20) linear feet will be paid for under Pay Items 209-324. The work does not include sheeting or well point dewatering which, if required, will be paid for, or is part of the work, under other Pay Items.

The quantity to be paid under this item will be in accordance with each (EA) pipe size to be repaired as noted in the contract pay items.

PAY ITEM	DESCRIPTION	UNITS
296	6" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
297	6" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
298	8" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
299	8" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
300	10" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
301	10" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
302	12" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
303	12" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
304	15"/16" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
305	15"/16" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
306	18" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA

307	18" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
308	21" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
309	21" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
310	24" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
311	24" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA

PAY ITEMS NO. 312 – 327 – GRAVITY SEWER POINT REPAIR – ADDITIONAL LENGTH

This item provides all labor, equipment and materials for the additional length of replacement gravity sewer pipe with PVC or Ductile Iron pipe (Material as directed by the Engineer at each occurrence). This Pay Item provides for an additional thirty (30) feet of replacement pipe. This Pay Item is used only in conjunction with Pay Items 295-310 and contains the same work therein described. Pipe point repairs requiring greater than fifty (50) feet of pipe will be constructed under separate Contract Pay Items.

The quantity to be paid under this item will be in accordance with the linear feet (LF) installed above twenty (20) linear for each pipe size to be repaired as noted in the contract pay items.

PAY ITEM	DESCRIPTION	UNITS
312	6" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
313	6" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF
314	8" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
315	8" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF

324	21" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
325	21" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF
326	24" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
327	24" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF

PAY ITEMS NO. 328 – 333 – FORCE MAIN POINT REPAIR

This item provides all labor, equipment and materials for the replacement of up to ten (10) linear feet of pipe and may be used for routine response and emergency repairs at the discretion of the Engineer or his representative. The pipe being repaired may be PVC, HDPE, Ductile Iron, or Cast Iron. All ductile iron pipe shall have polyethylene encasement. The work includes furnishing and installing two full seal clamps, bell joint seal clamps or two solid sleeves, cutting existing pipe, pipe bedding, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, and disposal of existing pipe. Additional pipe materials over ten (10) linear feet in length will be paid for under Pay Items 191-201. Excavations and well point dewatering for pipeline point repairs are separate pay items.

The quantity to be paid under this item will be in accordance with each (EA) pipe size to be repaired as noted in the contract pay items.

PAY ITEM	DESCRIPTION	UNITS
328	2" Dia. Pipe Forcemain Point Repair	EA
329	4" Dia. Pipe Forcemain Point Repair	EA
330	6" Dia. Pipe Forcemain Point Repair	EA
331	8" Dia. Pipe Forcemain Point Repair	EA
332	10" Dia. Pipe Forcemain Point Repair	EA

333	12" Dia. Pipe Forcemain Point Repair	EA

PAY ITEMS NO. 334 & 335 – REPLACE MANHOLE RING AND COVER

This pay includes replacement of existing manhole rings and covers in roadway paved areas, or other areas, as directed by the Engineer. The work includes all labor, equipment and material for replacement of manhole rings and covers. The work does not include excavation or surface restoration which, if required, will be paid for, or is part of the work, under other Contract Pay Items.

The quantity to be measured for payment under this Pay Item will be the actual number each of manhole ring and covers replaced completed and accepted.

PAY ITEM	DESCRIPTION	UNITS
334	Replace Manhole Ring & Cover (Asphalt Pavement)	EA
335	Replace Manhole Ring & Cover (Unpaved)	EA

PAY ITEMS NO. 336 – 338 – MANOLE BENCH REPLACEMENT

This pay item includes the replacement of manhole benches and invert channels. The work includes all labor, equipment and material for rebuilding existing manhole inverts and benches as described in the Technical Specifications.

The quantity of manhole bench replacement to be measured for payment under this Pay Item will be the actual number each (EA) of manholes that have manhole inverts and benches rebuilt.

PAY ITEM	DESCRIPTION	UNITS
336	Manhole Bench Replacement, 4' Diameter	EA
337	Manhole Bench Replacement, 5' Diameter	EA
338	Manhole Bench Replacement, 6' Diameter	EA

PAY ITEMS NO. 339 & 340 – ADJUST MANHOLE RING AND COVER TO FINISHED GRADE

This item provides all labor, equipment and materials for adjusting existing manhole risers, frames, and covers. Adjustment includes removal of existing ring and cover and removal or placement of up to 6 courses of brick and reinstalling the existing ring and cover. The work does not include excavation, surface restoration, sheeting or well point dewatering which, if required, will be paid for, or is part of the work, under other Pay Items.

The quantities of manhole rim and cover adjustments to be paid under this item shall be each measured in place, on grade, inspected, and accepted.

PAY ITEM	DESCRIPTION	UNITS
339	Adjust Manhole Ring & Cover to Finished Grade (In Pavement)	EA

340	Adjust Manhole Ring & Cover to Finished Grade (Outside of Pavement)	EA

PAY ITEM NO. 341– FLOWABLE CONCRETE FILL

This item provides all labor, equipment, and materials for placing flowable fill per the Technical Specifications. The quantity of Flowable Concrete Fill to be paid under this item shall be per cubic yard measured in place, inspected, and accepted.

PAY ITEMS NO. 342 – 346 - PAVEMENT REPAIR AND ROAD RESTORATION

This item provides all labor, equipment, and materials for the installation of roadway base and surface course per the Technical Specifications and Contract Drawings. Replacement base material shall be the same as the existing base. Measurement will be based on the actual number of cubic yards of Roadway Base and tons of Superpave Asphalt base and concrete installed, tested, completed, and approved. The weight of the Superpave asphalt base and concrete shall be determined from batch weights, truck scale weights or other methods approved by the Engineer. Delivery tickets, in duplicate, signed by a sworn weigher, must accompany each load of material to the project site. One copy of the delivery ticket must be retained by the Contractor and one copy must be delivered to the City Inspector. The total number of tons reflected in one set of all delivery tickets collected by the Inspector must be the measured pay quantity.

PAY ITEM	DESCRIPTION	UNITS
342	Roadway Base, Lime Rock, Primed, Min. LBR 100, Variable Thickness	CY
343	Roadway Base, Crushed Concrete/Graded Aggregate, Min. LBR 100, Variable Thickness	CY
344	Superpave Asphalt Base, Type B 12.5, Variable Thickness	TN
345	Superpave Asphalt Concrete, Type SP 9.5, Fine, Traffic Level C, Variable Thickness	TN
346	Superpave Asphalt Concrete, Type SP 12.5, Fine, Traffic Level C, Variable Thickness	TN

PAY ITEMS NO. 347 - 349 – DRIVEWAY RESTORATION

Payment for all work included under this Pay Item will be made at the Contract unit price bid per square yard of driveway installed as shown in the Contract Drawings and as listed on the Bid Form. Measurement will be based on the actual number of square yards of driveway installed, tested, completed and approved. Payment shall represent full compensation for all labor, materials and equipment for cutting the edges of existing driveways, compacting subgrade, furnishing and installing the shell, asphaltic concrete, concrete, or decorative block and all incidentals necessary to complete the driveway restoration as shown on the Contract Drawings and included in the Specifications. No payment for restoration of a private driveway outside the right-of-way shall be made under this Pay Item.

PAY ITEM	DESCRIPTION	UNITS
347	Pavement, Cement Concrete, 6" Min Thickness (Driveways)	SY
348	Pavement, Cement Concrete, 8" Thick	SY
349	Driveway Restoration, In Kind, Decorative Block	SY

PAY ITEMS NO 350 - 352 – MILLING OF EXISTING ASPHALT

Payment for all work included under this Pay Item will be made at the Contract unit price bid per square yard of asphalt milling within the Contract Drawings and as listed on the Bid Form. Measurement will be based on the actual number of square yards of milling installed, tested, completed and approved. The measurement will be from face of curb to face of curb or as specified, but not greater than the width of the existing roadway prior to construction. Payment will include the milling of the asphaltic concrete in accordance with these Specifications. No payment for milling of a private driveway within or outside the right-of-way shall be made under this Pay Item.

PAY ITEM	DESCRIPTION	UNITS
350	Milling Existing Asphalt Pavement, 1/2" Average Depth	SY
351	Milling Existing Asphalt Pavement, 3/4" Average Depth	SY
352	Milling Existing Asphalt Pavement, 1" Average Depth	SY

PAY ITEMS NO. 353 – 356 – CURB AND GUTTER REPLACEMENT

Payment for all work included in this Pay Item will be made at the applicable Contract unit price bid per linear foot for removal of existing curbing and for furnishing and placing FDOT Type D or F curb and gutter, Miami curb, or Valley gutter as shown on the Contract Drawings and listed on the Bid Form. Measurement will be per actual number of linear feet of curbing installed. Payment shall represent full compensation for removal of existing curb and all labor, material and equipment for compacting subgrade, forming, furnishing, placing the concrete, and finishing as specified and all incidentals necessary for completion of this Pay Item, in accordance with FDOT specifications.

PAY ITEM	DESCRIPTION	UNITS
353	Curb & Gutter, Concrete, FDOT Type D	LF
354	Curb & Gutter Concrete, FDOT Type F	LF
355	Curb & Gutter, Concrete, Miami Curb	LF
356	Valley Gutter, Concrete, PCED Index 1315	LF

PAY ITEMS NO. 357 & 358 – CONCRETE SIDEWALKS

Payment for all work included under this Pay Item will be made at the Contract unit price bid per square foot of concrete sidewalk installed as shown in the Contract Drawings and as listed on the

Bid Form. Measurement of sidewalk restoration will be per the actual number of square feet of sidewalk replaced. Payment shall represent full compensation for all labor, materials and equipment for cutting the edges of existing concrete, compacting subgrade, furnishing and installing the concrete and all incidentals necessary to complete the sidewalk restoration as shown on the Contract Drawings in accordance with FDOT Specifications where applicable.

PAY ITEM	DESCRIPTION	UNITS
357	Sidewalk, Concrete, 4" Min. Thickness, Remove and Replace	SF
358	Sidewalk, Concrete, 6" Min. Thickness, Remove and Replace	SF

PAY ITEM NO. 359 – SODDING

Payment for all work included under this Pay Item will be made at the Contract unit price bid per square yard of sod installed as shown in the Contract Drawings and as listed on the Bid Form. Measurement of sodding will be per the actual number of square yards of sod installed. Payment shall represent full compensation for all labor, materials and equipment for furnishing and installing the sod and all incidentals necessary to complete the work as shown on the Contract Drawings in accordance with FDOT Specifications where applicable.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 3 - SUBMITTALS

3.01 GENERAL

When used in the Contract Documents, the term "Shop Drawings" shall be considered to mean Contractor's plans for material and equipment which become an integral part of the Project. These drawings shall be complete and detailed. Shop Drawings shall consist of fabrication, drawings, setting drawings, schedule drawings, manufacturer's scale drawings and wiring and control diagrams. Cuts, catalogs, pamphlets, descriptive literature and performance and test data, shall be considered only as supportive to required Shop Drawings as defined above.

Data on materials and equipment shall include, without limitation, materials and equipment lists, catalog sheets, cuts, performance curves, diagrams, materials of construction and similar descriptive material. Materials and equipment lists shall give, for each item thereon, the name and location of the supplier or manufacturer, trade name, catalog reference, size, finish and all other pertinent data. Submittal distribution will be by electronic submittal as coordinated during the Preconstruction Conference.

3.02 CONTRACTOR RESPONSIBILITIES

The Contractor shall submit to the City and Engineer for review and acceptance: working drawings, shop drawings, test reports and data on materials and equipment, and material samples (hereinafter in this section called samples) as are required for the proper control of work, including, but not limited to those working drawings, shop drawings, data and samples for materials and equipment specified elsewhere in the Specifications and in the Contract Drawings.

Drawings and schedules shall be checked and coordinated with the work of all trades involved before they are submitted for review by the City and the Engineer and shall bear the Contractor's stamp of approval and original signature as evidence of such checking and coordination. Drawings or schedules submitted without this stamp of approval and original signature shall be returned to the Contractor for resubmission.

If drawings show variations from Contract requirements because of standard shop practice or for other reasons, the Contractor shall describe such variations in his letter of transmittal. If acceptable, proper adjustment in the contract shall be implemented where appropriate. If the Contractor fails to describe such variations, he shall not be relieved of the responsibility of executing the work in accordance with the Contract, even though such drawings have been reviewed.

For all mechanical and electrical equipment furnished, the Contractor shall provide a list including the equipment name and address and telephone number of the manufacturer's representative and service company so that service and/or spare parts can be readily obtained.

All manufacturers or equipment suppliers who proposed to furnish equipment or products shall submit an installation list to the City along with the required shop drawings. The installation list shall include at least five installations where identical equipment has been installed and have been in operation for a period of at least one (1) year.

No materials or equipment shall be ordered, fabricated or shipped or any work performed until the Engineer reviews and returns to the Contractor the submittals as acceptable according to the

submittal review codes in Section 3.04.

3.03 SUBMITTAL NUMBERING

When submitting shop drawings or samples, utilize a unique numbering system of the Contractors choice. Subsequent resubmittals of a revised submittal shall be denoted with a letter, A-Z, indicating the resubmission of the same drawing (i.e. A=2nd submission, B=3rd submission, C=4th submission, etc.).
An example of a submittal numbering would be as follows: Submittal No. 5A - HDPE Pipe 6.03

1. 5A is the second submission of the 5th shop drawing submitted for the project
2. HDPE Pipe is the subject of the submittal
3. 6.05 is the Specification Section for HDPE Pressure Pipe

3.04 SUBMITTAL REVIEW

Submittals shall be transmitted in sufficient time to allow the Engineer at least twenty (20) working days for review and processing. The review of shop drawings, data and samples will be for general conformance with the design concept and Contract Documents. An acceptance of a submittal shall be interpreted to mean that the Engineer has no specific objections to the submitted material, subject to conformance with the Contract Drawings and Specifications. This is not to be construed as permitting any departure from the Contract requirements, relieving the Contractor of responsibility for any errors, including details, dimensions, and materials, or approving departures from details furnished by the City, except as otherwise provided herein.

Submittals will be returned to the Contractor under one (1) of the following codes:

A. "NO EXCEPTIONS TAKEN" is assigned when there are no notations or comments on the submittal. When returned under this code the Contractor may release the equipment and/or material for manufacture.
B. "CORRECTIONS NOTED". This code is assigned when a confirmation of the notations and comments IS NOT required by the Contractor. The Contractor may release the equipment or material for manufacture; however, all notations and comments must be incorporated into the final product.
C. "REVISE AND RESUBMIT". This code is assigned when notations and comments are extensive enough to require a resubmittal of the package. The Contractor may release the equipment or material for manufacture; however, all notations and comments must be incorporated into the final product. This resubmittal is to address all comments, omissions and non-conforming items that were noted. Resubmittal is to be received by the Engineer within 15 Calendar Days of the date of the Engineer's transmittal requiring the resubmittal.
D. “REJECTED" is assigned when the submittal does not meet the intent of the Contract Documents. The Contractor must resubmit the entire package revised to bring the submittal into conformance. It may be necessary to resubmit using a different manufacturer/vendor to meet the Contract Documents.
E. “Filed as Received” is assigned when the submittal is for informational purposes only. No review or comments will be provided by the Engineer.

END OF SECTION

SECTION 4 – AS-BUILT DRAWINGS

4.01 MINIMUM AS-BUILT DRAWING STANDARDS FOR ALL AS-BUILT DRAWINGS

For all elements of construction, As-Built Drawings shall be submitted to at least the level of detail in the contract documents. It is anticipated that the original contract documents shall serve as at least a background for all record information. Original drawings in CAD format may be requested by the City.

Project data points shall contain both horizontal and vertical data relative to the FL Florida State Plane, West Zone, US Foot. Vertical datum is NAVD 1988. All elevations shall be in feet and tenths, referenced to NAVD 1988. Each sheet of the As-Built Drawings shall have the title “AS-BUILT DRAWING” printed in large bold lettering near the title block and a date corresponding to the date the as-built drawing was issued. As-Built Drawings notes, and information shall be bold or italics to identify them as As-Built information.

4.02 AS-BUILT DRAWINGS PREPARATION

The As-Built Drawings shall show the name, address, and phone number of the Contractor. Each drawing shall be certified by a responsible representative of the Contractor and dated. As-built information shall be recorded currently with construction progress and work shall not be concealed until required information is recorded. Properly prepared As-Built Drawings shall be certified by a Professional Engineer or Surveyor registered to the state of Florida, employed by the Contractor.

The As-Built Drawings shall at a minimum legibly include the following:

A. All underground piping with elevations and dimensions. Changes to piping location. Horizontal and vertical locations of underground utilities and appurtenances referenced to permanent surface improvements. Actual installed pipe material, size, class, etc.

B. Locations of drainage ditches, swales, water lines and force mains shall be shown every 200 feet (measured along the centerline). Dimensions at these locations shall indicate distance from centerline of right-of-way to the facility.

C. All horizontal locations, if not in the right-of-way, must relate to easement.

D. Field changes of dimension and detail.

E. Changes made by Field Order or by Change Order.

F. Details not on original Contract Drawings.

G. Equipment and piping relocations.

H. Locations of all valves, air release valves, fire hydrants, manholes, water and sewer services, water and force main fittings, underdrain cleanouts, catch basins, junction boxes

and any other structures located in the right-of-way or easement, shall be located by elevation and by station and offset based on intersection P.I.'s and centerline of right-of-way. For facilities located on private roads, the dimensioning shall be from centerline of paving or another readily visible baseline.

I. Elevations shall be provided for all manhole rim and inverts; junction box rim and inverts; catch basin rim and inverts; and baffle, weir and invert elevations in control structures. Elevations shall also be provided at the PVI's and at every other lot line or 200 feet, whichever is less, of drainage swales and ditches. Benchmarks and elevation datum shall be indicated.

J. Slopes for pipes and ditches shall be recalculated, based on actual field measured distances, elevations, pipe sizes, and type shown. Cross section of drainage ditches and swales shall be verified.

K. Centerline of roads shall be tied to right-of-way lines. Elevation of roadway centerline shall be given at PVI's and at all intersections.

L. As-Built Drawings shall show bearings and distances for all right-of-way and easement lines, and property corners.

M. Sidewalks, fences, and walls, if installed at the time of initial as-built drawing submittal, shall be located every 200 feet or alternate lot lines, whichever is closer. Dimensions shall include distance from the right-of-way line and the back of curb and lot line or easement line.

N. Allowable tolerance shall be ± 6.0 inches for horizontal dimensions. Vertical dimensions such as the difference in elevations between manhole inverts shall have an allowable tolerance of ± 1/8 inch per 50 feet (or part thereof) of horizontal distance up to a maximum tolerance of ± 2 inch.

Specifications and Addenda shall be legibly marked to record manufacturer, trade name, catalog number and supplier of each product and item of equipment actually installed and changes made by Field Order or by Change Order.

4.02.01 REQUIREMENTS FOR RECLAIMED WATER MAINS AND FORCE MAINS

In addition to that specified above, the following information shall be provided on the As-Built Drawings.

A. Location (vertical and any horizontal) at intervals not to exceed two hundred (200) feet and at all locations where the direction changes by more than ten (10) degrees.

B. Pipe size, material, and dimension ratio.

C. Location of air release valve.

D. Detailed location of valves (horizonal).

E. Elevations shall be provided on the top of operating nuts for all water and force main valves.

F. Reclaimed water service connection location based on distance from main line and property line for each designed meter.

G. Horizontal Directional Drilling (HDD) locations and elevations shall be shown on the As-Built Drawings. The beginning, ending, and surface locations shall be indicated as well as the horizontal and vertical location at least every 25 linear feet along the pipe as provided in the HDD Contractor's certified report and bore log.

All top of pipe elevations shall be accompanied by a finished grade elevation at the same location. Horizontal location of the pipe shall be defined using ties to back of curb and nearest property corner, property line or permanent control point.

4.02.02 REQUIREMENTS FOR GRAVITY SEWER

In addition to that specified above, the following information shall be provided on the As-Built Drawings.

A. Manhole rim and invert elevations (include pipe inverts).

B. Manhole horizontal location (i.e. dimension from right-of-way line or permanent control point.)

C. Service laterals located from the nearest downstream manhole. These dimensions shall be provided by on-site inspections or televising of the sewer following installation.

D. Distance between manholes.

Size and material of all pipe.

4.02.03 REQUIREMENTS FOR WASTEWATER PUMP/LIFT STATIONS

In addition to that specified above, the following information shall be provided on the As-Built Drawings.

A. Location ties back to back of curb and nearest property corner or permanent control point.

B. Wet well invert elevations.

C. Pipe invert elevations.

D. Valve vault inverts.

E. Top of slab elevations.

F. Pump make and model, horsepower, impellor size, design point.

G. Operating set point elevations

4.03 AS-BUILT DRAWINGS SUBMITTAL

Prior to substantial completion and prior to starting the bacteria testing of water lines, Contractor shall deliver electronic As-Built Documents and As-Built Drawings to the City and the Engineer for review. If there are any required changes or additions, these shall be completed and resubmitted for review. Signed and sealed As-Built Documents and As-Built Drawings shall be submitted prior to final pay application to the City and the Engineer, both electronically and in hard copy paper format. Up to six (6) copies shall be provided at the City's request.

The Contractor shall employ a Professional Engineer or Surveyor registered in the State of Florida to verify survey data and properly prepare As-Built Drawings. As-Built Drawings shall be certified by the professional(s) (Engineer or Surveyor licensed in Florida), as stipulated by the Land Development Ordinance and submitted in electronic format and up to six (6) hardcopies signed and sealed by a Florida registered surveyor and mapper.

AutoCAD drawings shall be in DWG or DXF form. All fonts, line types, shape files, external references, or other pertinent information used in the drawing and not normally included in AutoCAD shall be included on the media with a text file or attached noted as to its relevance and use.

Accompany submittal with transmittal letter, containing:

A. Date.
B. Project title.
C. Contractor's name and address.
D. Title and number of each As-Built Document.
E. Signature of Contractor or his authorized representative.

Note: The data required to properly prepare these As-Built Drawings shall be obtained at the site, at no cost to the City by the responsible design professional or his/her duly appointed representative. The appointed representative shall be a qualified employee of the responsible design professional or a qualified inspector retained by the responsible design professional on a project-by-project basis.

END OF SECTION

SECTION 5 - CONCRETE, MASONRY, AND REINFORCING STEEL

5.01 GENERAL

The Work in this section includes furnishing, placing, finishing, and curing all reinforced and plain concrete, prestressed concrete, reinforcing steel, welded wire fabric, brick, masonry block, mortar, and related work. Brick used for paving and hexagon block used for sidewalks are not included in this section.

5.02 PORTLAND CEMENT CONCRETE

Portland cement concrete shall conform to the applicable requirements of the FDOT-SSRBC Sections 346, 347, and 921.

Class IV concrete shall be used for all concrete in contact with, or over, salt or brackish water.

Concrete used for structures in contact with sewage shall be mixed from Type II Portland cement containing the lowest calcium thiosulfate available as specified in AASHTO M 85.

Concrete shall meet the following minimum 28-day compressive strength:

Miscellaneous concrete (thrust blocks, pipe encasement, etc.)	2,500 psi
Concrete curb/gutter/sidewalk/pavement	3,000 psi
Cast-in-place/precast structures	4,000 psi
Prestressed structures	5,000 psi

5.03 REINFORCING STEEL

Reinforcing steel shall conform to ASTM A 615, Grade 60 deformed bars and to the applicable requirements of FDOT-SSRBC Sections 415 and 931.

Reinforcing steel shall not be coated, except as specifically specified on the Contract Drawings.

All welded wire fabric shall conform to ASTM A 497 (deformed) or ASTM A 185 (plain) and to the applicable requirements of FDOT-SSRBC Article 415-6.

5.04 FIBROUS CONCRETE REINFORCEMENT

Fibrous concrete reinforcement may be used, where shown or approved, in lieu of welded wire fabric for shrinkage and thermal contraction/expansion in concrete pavement, driveway, and sidewalk.

Fibrous concrete reinforcement shall conform to ASTM C 1116, ASTM C 94, and ASTM E 119-83.

Fibrous concrete reinforcement shall be 100 percent virgin polypropylene fibrillated material mixed with concrete at a minimum of 1.5 pounds per cubic yard of concrete.

5.05 PLACEMENT OF REINFORCEMENT

Reinforcing steel placement shall conform to the applicable requirements of FDOT-SSRBC Articles 350-7 and 415-5.

The following minimum concrete cover shall be provided for all reinforcement:

Concrete cast against and permanently exposed to earth	3-inch
Concrete exposed to earth or weather	
Primary reinforcement	2-inch
Stirrups, ties, and spirals	1 1/2-inch
Concrete deck slabs, top and bottom	2-inch
Concrete not exposed to earth or weather	
Primary reinforcement	1 1/2-inch
Stirrups, ties, and spirals	1-inch

For bundled bars, the minimum concrete cover shall be equal to the equivalent diameter of the bundle, but need not be greater than 2-inch, except against and permanently exposed to earth, in which case the minimum cover shall be 3-inch.

Minimum concrete cover shall be increased in corrosive environment areas.

5.06 PLACEMENT OF CONCRETE

Placement of Portland cement concrete shall conform to the applicable requirements of FDOT-SSRBC Article 400-7.

Unless specific permission is granted prior to each occurrence, no concrete shall be delivered to the job site before 7:30 a.m. or after 4:30 p.m. No concrete shall be placed until the reinforcing steel placement has been inspected and approved by the Engineer.

5.07 CURING OF CONCRETE

Curing of Portland cement concrete shall conform to the applicable requirements of FDOT-SSRBC Article 520-8.

5.08 FINISHING OF CONCRETE

Finishing of Portland cement concrete shall conform to the applicable requirements of FDOT-SSRBC Article 400-15.

5.09 CONCRETE BRICK

Concrete brick for use in drainage structures and where shown on the Contract Drawings shall be approximately 3 5/8-inch by 7 5/8-inch by 2 1/4-inch in size and shall conform to ASTM C 55, Grade N-II or S-II.

5.10 CLAY BRICK

Brick shall be sound, hard, and uniformly burned regular and uniform in shape and size or compact texture and conforming to ASTM C 32, "Specification for Sewer and Manhole Brick (Made from Clay or Shale) Grade MS or MM."

5.11 MASONRY BLOCK

Load bearing units shall be hollow or solid, as shown on the Contract Drawings, and shall conform to ASTM C 90, Type I, 8-inch by 16-inch or 4-inch by 16-inch nominal face dimension.

Non-load bearing units shall conform to ASTM C 129, Type I, 8-inch by 16-inch or 4-inch by 16-inch nominal face dimension.

Horizontal continuous joint reinforcement shall be provided at every other joint. Reinforcement shall be a minimum of #9 gage steel, Grade 50. Wire shall be hot-dip galvanized, conforming to ASTM A 153, Class B-2 (1.5 ounce per square foot of wire surface) for zinc coating after prefabrication into units. Mortar coverage shall be not less than 5/8-inch on joint faces exposed to exterior, and not less than 1/2-inch elsewhere.

5.12 MORTAR

Mortar shall consist of a mixture of cementitious materials, aggregate, and water. All proportions shall be by volume and/or weight. Masonry cement shall conform to ASTM C 91 and C 270. Fine aggregate and Portland cement shall conform to the applicable requirements of FDOT-SSRBC Sections 902 and 921 respectively. Mortar shall have a minimum compressive strength of 1,500 psi.

5.13 GROUT

Grout shall be identical to mortar in all respects.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 6 – EXCAVATION AND BACKFILL

6.01 GENERAL

The Work in this section includes furnishing all labor, materials, tools, and equipment for excavation and backfill of roadways, sidewalks, curbs, driveways, pipelines, and structures. The Work also includes removing and disposing of leftover material and furnishing and placing off-site fill.

Bidders shall examine the site of the Work, make their own additional soil borings and tests, and make their own determination of the character of materials and the conditions to be encountered on the Work; their Bid shall be based upon their own investigation.

6.02 TRENCH SAFETY

The Contractor shall be responsible for maintaining safety at each excavation. The Contractor shall adhere to the Florida Trench Safety Act (FS 90-96), OSHA trench excavation safety standards (29 CFR, Subpart P, 1926.650), and OSHA trench excavation shielding, sloping, or sheeting requirements. Inspections required by OSHA trench excavation safety standards shall be provided by the Contractor's "competent person," as defined by OSHA 29 CF, Subpart P, 1926. The Contractor's "competent person" shall be identified at the Preconstruction Conference.

The Contractor certifies by submitting the bid and subsequently executing this Contract, that all trench excavation done within his control shall be accomplished in strict adherence with OSHA trench safety standards, the Florida Trench Safety Act, and public safety.

The Contractor also agrees to produce or obtain, prior to award of the subcontracts, identical certification from subcontractors who will perform trench excavation, and to retain such certification for at least 3 years following Final Acceptance.

The Contractor shall consider all available geotechnical information when designing the trench excavation safety system. If sufficient geotechnical information is not available, the Contractor may obtain such to support the requirements set forth above, at no additional cost to the City.

6.03 WORK IN WETLANDS, MANGROVES, AND PRESERVATION AREAS

Strict adherence to all permits is required. Damage to wetlands, periodically wet areas, mangroves, and preservation areas is prohibited. Any such damage by the Contractor shall be duly rectified at no additional cost to the City and as approved by the regulatory agencies.

6.04 CLEARING AND GRUBBING

All clearing and grubbing Work shall conform to all applicable requirements of FDOT-SSRBC Section 110 "Clearing and Grubbing" except as modified herein.

The Contractor shall remove only those trees and bushes necessary to complete the specified Work. Not all the trees and bushes have been located or shown on the Contract Drawings. The Contractor shall flag those trees and bushes to be removed. All other trees and bushes shall be protected per Specifications.

All roots, stumps, and other debris shall be removed to a depth not less than 12 inches below a bearing surface. The disturbed surface shall be backfilled, graded, and compacted as specified.

No tree or bush shall be removed without the review and acceptance of the Engineer. The Contractor shall obtain all necessary City or County permits for each tree to be removed. Tree removal shall conform to the provisions of the Specifications.

6.05 ROADWAY EXCAVATION

The extent of excavation shall be as shown on the Contract Drawings or otherwise approved by the City and shall include roadway excavation and/or filling and grading, together with the removal of trees, bushes, existing asphalt, concrete, or other material, as required to facilitate construction and restoration as directed by the City.

All excavation Work shall conform to all applicable requirements of FDOT-SSRBC Section 120 “Excavation and Embankment” except as modified herein.

6.06 TRENCH EXCAVATION

Mechanical excavation shall be terminated at least 2 inches above the proposed pipe bed and trench bottom, then shaped and compacted so as to provide uniform bearing on the barrel of the pipe. Particular care shall be taken to recess the bottom of the trench at the bell of the pipe to relieve the bell of all load.

A minimum trench width shall be maintained, allowing room for the jointing and proper compaction of the backfill. If material is encountered that is unsuitable in the opinion of the Engineer, it shall be removed by the Contractor and replaced with acceptable material compacted in place as specified. In the event the Contractor excavates below the elevation required without approval, the Contractor shall backfill with approved materials compacted to obtain a suitable trench bottom, all to the satisfaction of the Engineer and at no additional cost to the City.

The amount of open trench shall be limited so that no more than 100 feet of open trench in advance of the backfilling operation will remain at the end of that working day. All open trench shall be protected by the Contractor with barriers, warning devices, and traffic control devices, which shall be kept in the correct position, properly directed, anchored when required, and clearly visible at all times. The barriers, warning devices, and traffic control devices shall be suitably lighted at all times when vehicular traffic lights are required.

6.07 STRUCTURE EXCAVATION

Excavation shall be of the size and depth required for construction of structures and their foundations. Unsuitable material encountered shall be removed to the depth required to obtain sound foundation material or as ordered by the Engineer. Over-excavated areas shall be filled with approved backfill material compacted as specified, at no additional cost to the City.

Unsuitable existing soil shall be removed and replaced with compacted material, as approved by the Engineer and as specified in the subsection herein headed "Excavation of Unsuitable Material."

6.08 EXCAVATION OF UNSUITABLE MATERIAL

Unsuitable material shall include rock, concrete, and boulders. Unsuitable soft material shall include logs, muck, other soft soils, organic soils, and other soils as specified or as ordered by the Engineer to be unsuitable.

All excavation of unsuitable material shall conform to all applicable requirements of FDOT-SSRBC Section 120 “Excavation and Embankment” except as modified herein.

Unsuitable material encountered below or within the roadway stabilized subgrade, the trench bottom, or a structure bottom, shall be removed by the Contractor to the limits established by the Engineer and disposed of from the Work area at an approved disposal area. Unsuitable material shall be replaced with approved material and compacted as specified.

No additional payment will be made for backfill material obtained from any source and used to replace any unsuitable material except as otherwise specified.

6.09 SHEETING, SHIELDING, AND SLOPING

All excavations shall be properly sheeted, shielded, or sloped to the required slope to furnish safe working conditions, to prevent shifting of material, to prevent damage to structures or other Work, and to avoid delay to the Work, all in accordance with applicable safety and health regulations. The minimum sheeting and shielding for trench excavations shall meet the general trenching requirements of the Florida Trench Safety Act and OSHA standards.

The sheeting and shielding shall be of adequate strength and quantity for the purpose intended. Any sheeting extending below the level of above the top of pipeline shall be cut off as ordered by the Engineer and left in place. In addition, the Engineer may order the Contractor to cut off and leave in place any sheeting, shielding, or other approved support where required to protect construction, property, or existing facilities or utilities.

Damages resulting in the installation or removal of sheet piling shall be rectified by the Contractor at no additional cost to the City.

6.10 DEWATERING

A. All pipeline and appurtenances shall be laid entirely in a dry trench. All foundations and structure walls shall be constructed or installed in a dry excavation.

B. Before commencing any excavation at the site of the Work, the Contractor shall submit to the Engineer for review, the methods, equipment, and arrangement of facilities proposed for dewatering and disposal of water at the site and of all water entering any excavation or other part of the Work from any source whatsoever.

C. Water discharged from dewatering equipment shall be carried into surface drainage facilities except water quality treatment systems and shall not be discharged into sanitary sewer lines. The Contractor shall prevent water from puddling in streets or on private properties. The depositing of dirt in storm drains and ditches and staining of existing facilities shall not be permitted.

D. Adequate standby facilities shall be provided to ensure that the excavation will be kept dry in the event of power failure or mechanical breakdown. Facilities for the removal and disposal of water shall be of sufficient capacity to keep the excavation dry under all circumstances with one-half of the facilities out of service. If well points are used, provision shall be made for removing and resetting individual well points without taking the system of which they are a part out of service.

E. The City reserves the right to require the Contractor to replace noisy equipment in order to keep disturbance to a minimum.

F. The cost of dewatering and disposal of water shall be included in the unit quantity for each appropriate item bid.

G. Refer to the Specifications for requirements concerning encountered groundwater contaminates.

6.11 BORROW MATERIAL

Any borrow excavation Work shall consist of the excavation and satisfactory utilization of material from areas provided by the Contractor when necessary material is not available from the normal excavation or grading operations. This Work shall conform to DOT-SSRBC Section 120 “Excavation and Embankment” except as modified herein.

If additional fill material is required, it shall be City approved material supplied and compacted by the Contractor. All compaction under roadway, alley, driveway, curb, walk, or other improved surface shall be to a density as specified in the Contract Documents. Unless otherwise directed by the City, all material not required for construction shall be removed from the premises and disposed of by the Contractor.

6.12 BEDDING MATERIAL

A. Where shown, ordered, or required, the Contractor shall place bedding material prior to placing pipelines, structures, or slabs. Bedding material may be either excavated approved native sand, concrete sand, gravel, or reclaimed concrete.

B. Off-site bedding material shall be sand or gravel. Sand bedding material shall be a clean concrete sand of uniform gradation between sieve sizes No. 4 and No. 50. All particles shall pass a 3/8-inch sieve and no particles shall pass a No. 100 sieve.

C. Gravel bedding material shall meet the requirements of ASTM C33 and shall be coarse aggregate, DOT Size No. 67 (3/4-inch to No. 4) or approved equal.

D. Reclaimed concrete bedding material shall be graded to meet the size requirements as specified for gravel bedding.

E. Bedding material, where required, shall be placed in lifts and compacted in a manner to achieve the specified density as specified and/or as shown.

F. If gravel bedding is used, an impermeable groundwater barrier shall be placed at 100-foot intervals in the gravel bedding. The impermeable groundwater barrier shall consist of a 10

mil sheet of polyethylene covering the full cross sectional area of the gravel, embedded 6 inches into the trench sides and bottom, and extending to the top of the gravel. The barrier shall be offset a minimum of 2 feet from any culvert or pipe joint. Ends and splice points shall be lapped a minimum of 12 inches.

6.13 STRUCTURAL SLAB BEDDING

Structural slabs for manhole bases, footings, and similar structures shall be placed on approved compacted bedding material and leveled as specified and/or as shown.

6.14 BACKFILL MATERIAL

Backfill material shall consist of earth, loam, sandy clay, sand, gravel, soft shale, or other materials, free from organic materials, large clods of earth, or stones. Backfill material shall be either soil classification A-1, A-2 or A-3, per AASHTO M-145, and shall be free of organic matter, lumps of clay or marl, muck, compressible materials, and rock exceeding 2.5 inches in diameter. Broken concrete, masonry, rubble or other similar materials shall not be used as backfill.

6.15 BACKFILL COMPACTION

All backfill shall be compacted as specified herein and shall meet the following minimum density as determined by the AASHTO T-180 method for backfill outside the right-of-way and in City streets, and by the AASHTO T-99 method if in County or FDOT right-of-way.

AASHTO T-180 Method C or D will be used for stabilized subgrade and base compaction tests, and Method A or B will be used for backfill testing, or as directed by the Engineer or jurisdiction.

	T-180	T-99
Roadway stabilized subgrade	98%	N/A*
Roadway base	98%	N/A*
Curb base	98%	N/A
Sidewalk and driveway base	98%	N/A
Pipe bedding	98%	100%
Pipe backfill - under pavement	98%	100%
Pipe backfill - under grass	95%	100%
Structure base slabs	100%	N/A
Structure backfill	98%	N/A

*Roadway stabilized subgrade and base material shall meet LBR requirements as specified in the Contract Documents.

6.16 BACKFILLING OF TRENCH

Backfilling shall be accomplished with suitable material and shall commence only after the pipelines have been laid and tentatively accepted by the City. The space between the pipe and the sides of the trench shall be packed full by hand-shoveled earth free from lumps or debris.

The backfill material shall be placed in 6-inch lifts and compacted, using approved tampers to the required compaction, to a point 12 inches over the top of the pipe. The remaining backfill (under areas other than roadways) shall be placed in uniform lifts not greater than 12 inches thick (or less as approved for mechanical equipment available) and tamped to the required compaction. Backfill under roadways shall be compacted in 6-inch lifts.

Where trenches are improperly backfilled, or where settlement occurs, the trenches shall be reopened to the depth required for proper compaction, refilled and compacted, and the surface restored to the grade and compaction, mounded over and smoothed off.

6.17 BACKFILLING STRUCTURES

Backfill around structures shall be of suitable job-excavated material, suitable off-site fill material, or other material approved by the Engineer. Such backfill shall extend from the bottom of the excavation or top of bedding to the bottom of pavement base course, the bottom of the subgrade for lawns or lawn replacement, the top of the existing ground surface, or to such other grades as may be shown or required.

The backfill shall be placed in uniform lifts not greater than 12 inches thick, and thoroughly compacted in place.

6.18 BACKFILLING UNDER ROADWAYS

Backfill placed under roadways and other paved surfaces shall be compacted in 6 -inch lifts and thoroughly compacted in place, with suitable equipment as specified herein.

6.19 DISPOSING OF LEFTOVER MATERIAL

The Contractor shall bring the surface to the same level as existed prior to the excavation. All leftover material shall be hauled from the site and disposed of by the Contractor. Leftover material shall not be stored in or along rights-of-way or easements.

6.20 ADJACENT FACILITIES

The Contractor shall be responsible for the protection, removal, and replacement of all adjacent structures, utilities, trees, shrubbery, curbs, culverts, headwalls, fences, signs, and other miscellaneous structures encountered during the course of the Work.

6.21 TEMPORARY SUPPORTS

Temporary supports for 16-inch and larger pressure and gravity pipes shall be designed by the Contractor and submitted to the City as required by Specifications. Temporary supports that include a structural beam, or other such member(s), shall be designed, signed and sealed by a Professional Engineer.

6.22 FLOWABLE FILL

Where shown on the Contract Drawings, or where ordered by the Engineer, the Contractor shall backfill a void area or an excavation with flowable fill. Flowable fill may be shown, or ordered, to fill

abandoned pipes, abandoned underground steel storage tanks, trench backfill, washout area under structural slabs or behind walls, or other similar locations.

Flowable fill shall be produced and delivered to the site. Placing of flowable fill shall be by chute, pumping, or other approved methods. Flowable fill shall be placed to the designated fill line without vibration. The Contractor shall take all necessary precautions to prevent any damage caused by hydraulic pressure of the fill during placement prior to hardening. Flowable fill shall not be used for pipe bedding and backfill in the zone from the bottom of a pipe to 12 inches above the top of pipe.

Flowable fill shall consist of materials conforming to FDOT-SSRBC Sections as follows:

Cement (Type I or II)	Section 921	"Portland Cement and Blended Cement"
Fly ash (Type F)	Section 929	"Fly Ash, Slag, Microsilica and Other Pozzolanic Materials for Portland Cement Concrete"
Fine aggregate (sand)	Section 902	"Fine Aggregate"
Water	Section 923	"Water for Concrete"

The Contractor shall submit a proposed design mix that will produce a flowable fill meeting the strength requirements specified herein, using the following materials:

	Pounds per cubic yard
Cement (Type I or II)	50 - 200
Fly ash (Type F)	0 - 2,000
Fine aggregate (sand)	2,500 - 3,000
Water	325 - 550
Note: 6-inch to 10-inch slump	

Flowable fill material shall be proportioned to produce a 28-day compressive strength approximately as follows:

	Pounds per square inch
Pipe trench backfill	50 - 150
Fill abandoned pipes or tanks	30 - 150
Under slabs, behind walls	300 - 1000
Note: Density in place 115 to 145 pounds per cubic foot.	

Not more than 60 minutes shall elapse between the start of moist mixing and the placement of the flowable fill.

Flowable fill placed on slopes shall have a reduced slump with a reduction in water and shall be able to be shaped as required.

The Contractor shall place the flowable fill in such a manner as to eliminate all cavities.

Flowable fill shall not be placed in salt water. When within a tidal area, the flowable fill shall be placed immediately after the salt water has receded.

When flowable fill is used adjacent to ductile iron pipe, the pipe shall be polyethylene encased.

END OF SECTION

SECTION 7 - SURFACE RESTORATION

7.01 GENERAL

The Work in this section includes restoring and maintaining pavements and pavement bases, curbing, sidewalks, driveways, and grass surfaces that are disturbed, damaged, or destroyed during the course of the Work under this Contract.

The quality of workmanship and materials used in the restoration shall produce a surface equal to or better than the condition before the Work began.

Prior to restoration, the Contractor shall saw cut and remove all existing pavement within 2 feet of the edge of the excavation, or within such widths as may be ordered by the Engineer.

Compaction of soil and base materials shall be tested using the AASHTO T 180 method.

Surface restoration workmanship and materials shall conform to the applicable sections of the FDOT-SSRBC.

All dirt areas disturbed shall be restored with sod, unless otherwise specified.

7.02 ROADWAY RESTORATION

Where the installation of pipe or structures occurs within an existing roadway, the limits of excavation shall be saw cut leaving a straight and square edge. The upper portion of the trench backfill shall be replaced with a compacted shell, crushed (reclaimed) concrete, or limerock base as shown on the Contract Drawings, and paved to match the surrounding surface. Replacement base material shall be the same as the existing base. Roadway restoration shall conform to the detail for shown in the Contract Drawings.

7.03 TEMPORARY PAVEMENT

Immediately upon completion of backfilling, the pavement surfaces damaged or destroyed shall be temporarily restored by placing a shell (FDOT-SSRBC Section 911), crushed (reclaimed) concrete (FDOT-SSRBC Section 204 applicable sections), or limerock (FDOT-SSRBC Section 911) base on the backfilled, compacted subgrade, and an adequate temporary asphaltic patch as shown or as approved by the Engineer. Shell crushed (reclaimed) concrete, or limerock shall be used as a base for all bituminous pavements.

Temporary work shall be maintained in a suitable and safe condition for traffic until the permanent pavement is laid or until final acceptance of the Work.

7.04 SHELL BASE

Shell base shall be constructed on the prepared subgrade to not less than 98 percent of maximum density, in accordance with the requirements of FDOT-SSRBC Section 911. The minimum compacted thickness of shell base shall conform to the detail shown on the Contract Drawings.

7.05 LIMEROCK BASE

Limerock base shall be constructed on the prepared subgrade to not less than 98 percent of maximum density, in accordance with the requirements of FDOT-SSRBC Section 911. The minimum compacted thickness of limerock base shall conform to the detail shown on the Contract Drawings.

7.06 CRUSHED (RECLAIMED) CONCRETE BASE

Crushed (reclaimed) concrete base shall be constructed on the prepared subgrade to not less than 98 percent of maximum density, in accordance with the requirements of FDOT-SSRBC Section 204. The minimum compacted thickness of crushed (reclaimed) concrete base shall conform to detail shown on the Contract Drawings.

The minimum limerock bearing ratio (LBR) value shall be 150.

7.07 ASPHALTIC CONCRETE PAVEMENT

A prime coat shall be applied to the prepared base in accordance with FDOT-SSRBC Section 300 prior to permanent asphaltic concrete pavement.

Unless specified elsewhere, all permanent asphaltic concrete pavement replacement shall be constructed in accordance with the requirements of FDOT-SSRBC Sections 320, 330, 334, and 337. Surface types and compacted thickness shall conform to the detail shown on the Contract Drawings.

7.08 BRICK PAVEMENT

Construction of brick pavement shall follow the details as shown on the Contract Drawings and City standard practice using City standard paving brick or red clay brick conforming to ASTM C 32, Grade SS with City standard dimensions.

Brick street abutting asphalt pavement shall have a minimum 6-inch-wide flush Type A Header Curb.

7.09 CURB AND GUTTER

All permanent restoration of street curb, or curb and gutter, shall be of the same type and thickness as the curb, or curb and gutter, which abuts. The grade of the restored curb, or curb and gutter, shall conform to the grade of the existing adjacent curb, or curb and gutter, so that positive drainage is maintained.

7.10 CONCRETE SIDEWALK

The restoration and construction of concrete sidewalks shall conform to applicable requirements of FDOT-SSRBC Section 522 and the Contract Drawings and shall be constructed where shown on the Contract Drawings and directed by the City. Sidewalk expansion joints with bituminous filler shall be installed at a maximum of 50-foot intervals on center and struck joints shall be spaced equidistant with walk width (joints wider than 6 feet shall be spaced as directed by the City). Where

new construction is to be tied into existing facilities, the old material is to be removed back to the nearest construction joint, or sawcut to a straight line as directed by the City or Engineer. The soil under sidewalks and driveways shall be compacted to 98 percent of the maximum density.

New sidewalks shall be 4 inches thick. Concrete pour for walk construction shall be made only on dampened subgrade. A soft broom finish shall be given the walk surface as directed by the Engineer.

Sidewalks crossing driveways shall be constructed according to the Specifications for concrete driveways.

Curb ramps for physically handicapped shall be constructed at all locations where sidewalks cross the curb or where directed by the Engineer. Those existing sidewalks which are removed to accomplish associated work as a part of this Project shall be replaced with a curb ramp when the sidewalk crosses the curb. The cost of curb ramps shall be included in the appropriate proposal item for sidewalk restoration.

Where sidewalks are replaced, the replacement shall be the full width of the walk and the minimum length shall be 60 inches. Restoration of adjacent lawn is incidental to sidewalk replacement and no separate payment will be made therefore.

7.11 HEXAGON BLOCK SIDEWALK

The restoration and construction of hexagon block sidewalks shall conform to the details shown on the Contract Drawings and City standard practice using City standard hexagon blocks.

The soil under sidewalks and driveways shall be compacted to 98 percent of the maximum density. New hexagon block sidewalks shall be 2 inches thick.

Curb ramps for physically handicapped shall be constructed at all locations where sidewalks cross the curb, or where directed by the City or Engineer. Those existing sidewalks which are removed to accomplish associated work as a part of this Project shall be replaced with a curb ramp when the sidewalk crosses the curb. The cost of curb ramps shall be included in the appropriate Pay Item for sidewalk restoration.

Where sidewalks are replaced, the replacement shall be the full width of the walk. Restoration of adjacent grass is incidental to sidewalk replacement and no separate payment will be made therefore.

7.12 DRIVEWAY AND PARKING LOT

Except as otherwise specified, all permanent restoration of base and surface of driveways, parking aprons, and sidewalks shall match the materials, thicknesses, elevations, lines, and grades of the existing construction, all to the Engineer's satisfaction. Patching of Portland cement driveway areas will not be allowed between joints or dummy joints.

For areas where streets are to be paved, or where more than 50 percent of the driveway apron is disturbed, concrete or brick driveways shall be replaced in kind. All other driveways, including shell

and dirt, shall be restored with an asphalt concrete surface from the street to the property line or front of sidewalk, as directed by the City or Engineer.

All base compaction under driveways shall be to a minimum density of 98 percent of the maximum density.

7.13 DRIVEWAY - ASPHALT

Residential asphalt driveway restoration shall include 1-inch thick asphaltic concrete surface over 2 inches of compacted sand-asphalt hot mix base, or 5 inches of compacted limerock or shell base.

Commercial asphalt driveway restoration shall be constructed of 1-inch thick asphaltic concrete surface over 8 inches of limerock base compacted in 2 lifts.

7.14 DRIVEWAY - CONCRETE

The restoration and construction of concrete driveways shall conform to applicable requirements of FDOT-SSRBC Section 522 and the Contract Drawings and shall be constructed where shown on the Contract Drawings and directed by the City or Engineer.

Residential concrete driveway restoration shall be 5 inches thick and shall include placing a single layer of 6-inch by 6-inch wire mesh (WWF 6 x 6 - W1.4 x W1.4).

Commercial concrete driveways shall be 6 inches thick with a double layer of 6-inch by 6-inch wire mesh (WWF 6 x 6 - W1.4 x W1.4).

7.15 DRIVEWAY - PEAGRAVEL

Where less than 50 percent of the driveway apron is disturbed, pea gravel driveways shall be restored to match the existing driveway. Pea gravel driveway restoration shall include asphalt treated shell base 5 inches thick after compaction to a minimum density of 98 percent of the maximum.

7.16 DRIVEWAY - SHELL

Where less than 50 percent of the driveway apron is disturbed, shell driveways shall be restored to match the existing driveway. Shell driveway restoration shall be 5 inches thick after compaction to a minimum density of 98 percent.

7.17 GRASS

7.17.01 Sodding

Sod shall be planted as soon as practical after paving, pipeline, or other work has been completed. Sodding shall always be used over seeding.

All work and materials shall meet the applicable requirements FDOT-SSRBC Section 570 (Sodding).

Sodding shall be done as directed by the Engineer, using only material which, in the opinion of the Engineer, is healthy and free of weeds, and (unless specified otherwise by the Engineer) of the same variety predominating at time of removal. Sod may be St. Augustine, Bahia, or other varieties as selected by the Engineer.

Sod shall be planted within 72 hours of being cut. Only moist, green sod having a virile root system may be planted. Sod shall be cut into adjacent sod to provide a smooth surface, and "top dressed" where necessary. Sod shall be rolled or tamped after planting to provide a uniform and consistent grade.

7.17.02 Grass Maintenance

The Contractor shall properly water and otherwise maintain all seeded and sodded areas for a minimum of 60 consecutive calendar days after completion of sodding operations. After the 60 days, and upon receipt of written request from the Contractor, the Engineer will inspect the areas for acceptance by the City. Any area that is washed or eroded, fails to show a uniform stand of healthy, vigorous grassing, or does not appear to be otherwise developing satisfactorily, shall be re-sodded and maintained until suitable for acceptance by the Engineer.

In the event that the stand of grass is found to be contaminated by weeds or other undesirable growth, the Contractor will be required to effectively eliminate such undesirable growth at his own expense.

7.18 EXPANSION JOINT MATERIAL

Expansion joint material for concrete pavement surfaces, including sidewalks and driveways, shall be the bituminous strip type, 1/2-inch thick, and shall conform to applicable requirements of FDOT-SSRBC Section 932.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 8 – PAINTING

8.01 GENERAL

Painting materials not obtainable from the prime manufacturer shall be obtained from a second source recommended by the prime manufacturer for compatibility. All products furnished shall meet current Federal Regulations for lead, mercury and other heavy metals, as well as current VOC air quality regulations. Products of the following acceptable manufacturers may be used on this project, except where noted otherwise.

A. Ameron – Corrosion Control Division
B. Devoe & Raynolds Company
C. Indurall
D. KopCoat –RPM
E. MAB Paints
F. PPG Industries, Inc.
G. Rust-Oleum Corporation
H. Sherwin-Williams
I. Tnemec Company, Inc.

The Contractor shall paint or provide a protective coating for all interior and exterior wood and metal surfaces, all interior masonry, valves, and all submerged piping and other metal, whether specifically called for or not. In addition, all exposed piping shall be painted and further identified in accordance with other sections of these specifications. Because of their very nature, some areas or items do not require specific painting or coating for protection or appearance. The following generally do not require painting or coating unless specifically noted otherwise or required by manufacture, color coding, insulation from dissimilar metals, insulation from concrete or cement products, or architectural considerations:

A. Non-Ferrous Alloys:

Aluminum
Monel
Stainless Steel

B. Corrosion Resistant Metals:

Chromium Plated Steel
Weathering Steel
Galvanized Steel

C. Non-Metallic Materials:

Exterior Brick
Concrete
Glass

	Plastic &FRP
	PVC
	Porcelain
Pre-Finished Manufactured Items:	Cabinets
	Louvers
	Motor Control Centers
	Panels
	Signs and Nameplates
	Switchgear
	Switchboards
	Transformers
	Tile

D. Electrical Conduits Attached to Unpainted Surfaces.

E. Insulation and Insulation Jackets.

All exposed piping and conduit within the fence enclosure shall be color-coded in accordance with the following Color Coding Schedule:

A.	Electric	Gray
B.	Gas, Oil, Dangerous Materials	Red
C.	Telephone, Telegraph, Television, Communications	Safety Alert Orange
D.	Potable Water	Safety Blue
E.	Treated Sewage	Safety Green

Other paint colors will be selected by the Engineer

All materials shall be pure and first quality. Materials listed shall be the standard for each such type of material. Primers and finish coats shall be compatible and of the same manufacture where possible. Emulsion and alkyd paints shall contain a mildewcide, and both the paint and mildewcide shall conform to OSHA and Federal requirements, including Fed. Spec. TT-P-19. Paint and protective coating materials shall be sealed in containers that plainly show the designated name, formula or specification number, batch number, color, date of manufacture, manufacturer's directions, and name of manufacturer, all of which shall be plainly legible at the time of use. Pigmented paints shall be furnished in containers not larger than five (5) gallons. Materials shall conform to the specifications shown herein and to the requirements hereinafter specified.

To the maximum extent possible, all products shall be the product of one manufacturer unless a specific specialty coating system is specified. Without exception, all coatings for any service condition specified herein shall be by one manufacturer. Once a paint manufacturer has been selected by the Contractor and approved by the Engineer, the Contractor shall ensure that all

equipment manufacturers prime their equipment with the same or a compatible primer. If this cannot be or is not done for any reason, the Contractor shall apply a "universal primer" and recoat with the approved manufacturer's product in the field.

8.02 SUBMITTALS

Submittals shall be in accordance with the following:

A. Samples. Prepare and submit for Engineer's approval copies of color samples on 8-1/2" x 11" size cards for each paint and protective coating system. Each sample card shall clearly show each coat of the finish system, and shall be clearly marked with the manufacturer's name and product identification, and shall be submitted in sufficient time to allow for approval and, if necessary, disapproval and resubmittal without causing any delay of the project.

B. Coating Materials List.
   1. The Contractor shall provide copies of a paint and coating materials list which indicates the manufacturer and paint number, keyed to the coating schedule herein, for approval by the Engineer prior to or at the time of submittal of samples required herein.
   2. The Contractor shall include with his submittal, his protective coating schedule for shop and field coatings of items to receive protection. The schedule shall conform to the specified requirements for surface preparation, priming, and coating for items covered, and shall follow the same requirements for similar work where such work has not been specifically called-out. No bare ferrous nonworking surfaces shall be omitted from the schedule. Particular care shall be taken to cover in sufficient detail the coating of mechanical joints and other mechanical devices which shall conform to the recommended practice of the manufacturer of the joint or other mechanical devices.
   3. Coatings to be used on plastic and fiberglass materials shall be certified as acceptable by all plastic and fiberglass manufacturers whose products are to be coated. Certification copies shall be submitted to the Engineer. The Contractor shall be certified in writing by the painting and coating material manufacturers as qualified applicators of their products with copies of the certification submitted to the Engineer.

C. Product Data Sheets. Contractor shall submit paint and coatings material manufacturers' printed technical data sheets for products intended for use in each paint and coating system. Data sheets shall fully describe material as to its intended use, makeup, recommended surface preparation and application conditions, primers, material mixing and application (including recommended dry mil thickness recoat time), precautions, safety and maintenance cleaning directions.

D. Material Safety Data Sheets. Material Safety Data Sheets (MSDS) shall accompany all paint submittals and shall be prominently displayed at the job site during all painting activities.

8.03 PAINTING SCHEDULES AND SYSTEMS

Painting and coating of surfaces shall conform to the following schedules and systems, unless otherwise specified or shown on the drawings:

A. Schedule A: System 1 – Exposed exterior structural and miscellaneous steel, piping, equipment to include all stainless steel and carbon steel electrical control cabinets non-submerged, not exposed to corrosion, splash, fumes or immersion conditions.

1. Prime: One sprayed coat of a combination of a two-part epoxy primer, gray, of 3.0 mils, minimum dry film thickness as by Devoe Paints, Tru-Glaze Epoxy Primer Nos. 12735 and 12702 (ratio 19:1) or equal. If shop coat is damaged, re-prime bare areas in the field. The exterior of electrical cabinets, in stainless steel, shall be sand-blasted and spray-primed per the paint manufacturer's instructions.

2. Finish: Two coats of "hanging moss green" (Devoe Paints FX-70), Semi-Gloss Advanced Technology Acrylic Resin of 1.5 to 2.0 mils, dry thickness as Exterior Waterborne Semi-Gloss Enamel #83XX by Devoe Paints, or equal. Coats to be applied by spray painting in the shop.

B. Schedule B: System 2 – Piping and pumping equipment – submerged or non-submerged, exposed to spray, splash or corrosive atmosphere, excluding chains and sprockets, and stainless steel bracing in the wetwell:

1. Prime: One coat chemical resistant red iron oxide, based on a polyamide cured epoxy resin, minimum of 3.0-5.0 mils dry film thickness as by Devoe Paints, Devron 201. If shop coat is damaged, re-prime bare areas in the field.

2. Finish: Two coats of polyamide cured, epoxy resin coating, minimum of 4.0-6.0 mils dry film thickness per coat as by Devoe Paints, Devron 224HS-color, moss green as required above.

D. Schedule C; System 3 - Coating aluminum and non-ferrous metal surfaces, including undersides of aluminum access hatches, frames, and checkered plate, subject to corrosive atmosphere and condensation

1. Surface Preparation: Clean non-ferrous surfaces in accordance with 26 SSPC-SP7 (brush-off blast cleaning)
2. Prime: Minimum 3.0 mil DFT (Tnemec Primer – Series 66)
3. Finish: Minimum 4 mil DFT for a minimum total dry mil thickness of 7 mils (Tnemec Finish Coat – Series 66)

8.04 EXECUTION

All painting shall be done by skilled and experienced craftsmen and shall be of highest quality workmanship. Application of materials shall be done only on properly prepared surfaces as herein specified.

Before commencing work, the painter shall make certain that surfaces to be covered are in good condition. Should the painter find such surfaces not to be totally acceptable for covering, he shall report such fact to the Engineer. The application of paint shall be held as acceptance of the surfaces and working conditions and the painter will be held responsible for the results reasonably expected from the materials and processes specified.

Only compatible materials shall be used in the work. Particular attention shall be directed to compatibility of primers and finish coats. If necessary, subject to approval of the Engineer, a compatible barrier coat shall be applied between all existing prime coat and subsequent field coats to ensure compatibility. Ductile iron pipe that has an exterior bituminous coating shall not be painted unless the bituminous coating is removed by sand blasting or an appropriate, compatible, intermediate coat is applied before top coating in accordance with this specification

Hardware, hardware accessories, machined surfaces, nameplates giving manufacturer's data, cover plates, grease fittings, lighting fixtures and similar items in contact with painted surfaces and not to be painted shall be removed, masked, or otherwise protected prior to surface preparation and painting operations so they remain clean and free from paint.

Ferrous metals (not shop primed) shall be sandblasted per SSPC-SP6 to remove mill scale and rust. Ferrous surfaces to be submerged or exposed to spray, splash, fumes or corrosive atmosphere shall be sandblasted to near-white metal blast cleaning according to SSPC-SP 10. Brush blast or clean other metals as appropriate to provide suitable surface. Surface profile as obtained from sandblasting shall be recommended by the coating manufacturer. All metal surfaces shall be completely degreased by solvent cleaning in compliance with SSPC-SP 1.

Galvanized surfaces shall be cleaned of dirt, grease and other foreign substances and solvent cleaned. Surfaces shall be pro-treated with one coat of proprietary acid bound resinous or crystalline zinc phosphate preparation, used in accordance with the manufacturer's directions.

Remove glaze, of florescence, dirt, loose particles and grease (and existing paint, if applicable) from concrete receiving masonry paint. Fill all cracks, cut out defective joints and repaint.

In addition to the above listed surface preparations, all dirt, rust, scale, splinters, loose particles, disintegrated paint grease, oil and other deleterious substances shall be removed from all surfaces that are to be coated.

Work shall be done only under favorable weather conditions and as recommended by paint supplier. Exterior painting shall be done only in dry weather. Any surface coating damaged by moisture or rain shall be removed and redone as directed by the Engineer. Coatings shall be mixed, thinned, tinted and applied in accordance with the manufacturer's recommendations. The Contractor shall tint or match colors as selected by the Owner. A sample shall be applied on the job for review and approval before work is actually done. No thinners shall be used except those specifically mentioned and only in such quantity as directed by the manufacturer's instructions. If thinning is used, sufficient additional coat shall be applied to assure the required dry film thickness is achieved.

The manufacturer's recommended thinner or cleanup solvent shall be used for all cleanup. Application by brush, spray, airless spray or roller shall be as recommend by the manufacturer for

optimum performance and appearance. Paint shall be applied in a neat manner with finished surface free of runs, sags, ridges, laps and brush marks.

Each coat shall be applied in a manner that will produce an even film of uniform and proper thickness, and no variation in sheen or color. Where more than one coat of paint is specified, each coat shall be sufficiently tinted to result in a perceptible difference in shades of the various coats of paints so that the application of subsequent coats can be properly and uniformly spread and inspected. Provision shall be made to allow thorough drying between coats as recommended by the manufacturer before the next coat is applied, and paint used in successive field coats shall be produced by the same manufacturer.

Seal coats shall be used over bitumen-coated surfaces as applicable. Plastic pipe shall be painted in accordance with the pipe manufacturer's recommendations. Pipes, shoot metal ducts and other metal items which are to be installed in inaccessible locations shall be painted prior to installation.

Pumps, motors, machinery, equipment, electrical panels and other manufactured items shall have surfaces prepared, primed and coating in accordance with the recommendations of the manufacturer, and be given at least one touch-up coat with the intermediate coat material and one compete finish cost in the field.

The prime and intermediate coats for the various coating systems shall be as specified earlier and shall be compatible with the field coat or coats. Paint used in the first field coat over shop painted or previously painted surfaces shall cause no wrinkling, lifting or other damage to underlying paint.

All completed surfaces will be checked by the Engineer, and the Contractor shall provide the necessary properly calibrated gages. All non-ferrous surfaces shall be checked for number of coats and thickness by use of a Tooke gage. All ferrous surfaces shall be checked for film thickness by use of Elcometer or Micro-Test magnetic dry film gauge properly calibrated. . The Engineer shall have the right to reject all material for work that is unsatisfactory and require the replacement of either or both at the expense of the Contractor.

All paint brushed, splattered, spilled, or splashed on any surface not specified to be painted shall be removed. Upon completion of the painting work, the Owner shall be furnished one (1) gallon of each type and color of finish paint for touching up at no additional cost. Paint container labels, in addition to other required information, shall have location of color and type marked thereon.

Surfaces to be painted shall be inspected before any paint materials are applied, and after preparation has been completed.

Painted surfaces shall be inspected between coats, prior to application of next coat of painting material. Failure to get acceptance between coats will nullify credits for coats previously applied.

All paint shall be delivered to the job site in unopened original containers.

All paint not intended for the job shall be removed from the job site.

END OF SECTION

SECTION 9 - PIPING MATERIALS: DUCTILE IRON PIPE AND FITTINGS

9.01 GENERAL

The Work in this section includes furnishing all ductile iron pipe, fittings, joints, and appurtenant materials. All castings furnished shall have been cast in the United States of America unless complete certification is furnished in accordance with the latest edition of ANSI/AWWA C 110.

Standards referenced in this section are the latest revision of the following specifications:

ANSI/AWWA C104	"Cement Mortar Lining for Ductile-Iron Pipe and Fittings for Water"
ANSI/AWWA C110	"Ductile-Iron and Gray Iron Fittings, 3-Inch through 48-Inch, for Water and Other Liquids"
ANSI/AWWA C111	"Rubber-Gasket Joints for Ductile-Iron and Pressure Pipe and Fittings"
ANSI/AWWA C115	"Flanged Ductile-Iron Pipe with Threaded Flanges"
ANSI/AWWA C150	"Thickness Design of Ductile-Iron Pipe"
ANSI/AWWA C151	"Ductile-Iron Pipe, Centrifugally Cast, for Water or Other Liquids"
ANSI/AWWA C153	"Ductile-Iron Compact Fittings, 3-Inch through 24-Inch, for Water and Other Liquids"
ASTM D 1248	"Polyethylene Plastics Molding and Extrusion Materials"

9.02 PIPE

9.02.01 GENERAL

All ductile iron pipe shall be designed in accordance with ANSI/AWWA C150. Pipe shall be minimum pressure class as follows:

Size	Pressure Class
3-inch through 18-inch	350
20-inch through 24-inch	300
30-inch through 48-inch	200

For threaded flanged pipe the minimum thickness shall be the nominal thickness as shown on Table 15.1 of ANSI/AWWA C115.

Thickness shall be designed for a flat-bottom trench backfill lightly consolidated to centerline of pipe. Pipe shall be manufactured in accordance with ANSI/AWWA C151.

The pressure rating, metal thickness class, net weight of pipe (without lining) length of pipe, name of manufacturer, "DI" or "DUCTILE," and country where cast, shall be clearly marked on each length of pipe.

The Contractor shall take extreme care when handling pipe and fittings to ensure the interior lining does not get damaged during construction. Lined pipe and fittings must be handled only from the outside of the pipe and fittings. No forks, chains, straps, hooks, etc. shall be placed inside the pipe and fittings for lifting, positioning, or laying. The pipe shall not be dropped or unloaded by rolling.

Care should be taken not to let the pipe strike sharp objects while swinging or being off loaded. Ductile iron pipe should never be placed on grade by use of hydraulic pressure from an excavator bucket or by banging with heavy hammers.

9.02.02 LINING

A. **Potable Water Lines and Reclaimed Water Lines**: Ductile iron pipe and fittings for use in potable and reclaimed water lines shall be cement mortar lined. Cement lining shall conform to ANSI/AWWA C104, and seal coated with approved bituminous seal coat in accordance with ANSI/AWWA C151. Seal coating shall be UL listed or NSF approved for use in potable water mains.

B. **Sanitary Force Mains and Gravity Sanitary Pipe**: Ductile iron pipe and fittings for sanitary sewer force mains and gravity sewer pipe shall be polyethylene, polyurethane, or epoxy lined.

   Epoxy lining shall be 40 mil minimum thickness (multi-pass process) and shall be Protecto 401 Ceramic Epoxy, as manufactured by the Protecto Division of Vulcan Painters, Inc., or approved equal.

   Polyethylene lining shall be factory furnished with a fusion bonded polyethylene liner of 60 mil minimum thickness conforming to ASTM D1248, such as Polybond Plus as furnished by American Cast Iron Pipe Co. or approved equal.

   Polyurethane lining shall be factory applied conforming to Corropipe, as manufactured by Madison Chemical Industries, Inc., or an approved equal. Material shall be applied in conformance with the manufacturer's recommendation and shall be a 40-mil final dry film thickness.

   For any lining method, to ensure a holiday-free lining, documentation must be provided, prior to shipment, showing each section of lined pipe has passed holiday testing at the time of production per ASTM G62. The lining shall have a minimum three (3) year warranty covering failure of the lining and bond failure between liner and pipe.

C. **Storm Drain Gravity Pipe**: Ductile iron pipe and fittings for storm drain gravity pipe shall be epoxy lined as per sanitary pipe or cement mortar lined as per water pipe, at the Contractor's option.

9.03 FITTINGS

Ductile iron fittings shall conform to ANSI/AWWA C110 or ANSI/AWWA C153.

Fittings shall be suitable for a minimum water pressure plus water hammer as follows:

Size	Type	Pressure Rating
3-inch through 12-inch	DI	350
14-inch through 24-inch	DI	350
30-inch through 48-inch	DI	250

Fittings shall be coated outside with petroleum asphaltic coating, 1 mil minimum thickness.

Fittings shall be lined as specified herein headed "4.02 Pipe."

Anchor couplings equal to McWayne Clow F-1211 for fire hydrant assemblies may be substituted with an anchoring tee equal to Catalog No. A-10180 locked hydrant tee as manufactured by American Ductile Iron Pipe Co. or hydrant tee with rotatable MJ gland as manufactured by U.S. Pipe Co. in place of the MJ tee and anchor coupling as shown, at the Contractor's option.

9.04 JOINTS - BURIED PIPE AND FITTINGS

Joints for ductile iron pipe and fittings shall conform to ANSI/AWWA C111, except as otherwise specified. All pipe and fittings shall be furnished complete with joint accessories necessary for installation conforming to ANSI/AWWA C111. No additional payment will be made for joint accessories, including retainer glands, unless otherwise specified.

When deflection is required the joint shall be completed prior to setting the deflection. The deflection shall conform to applicable AWWA Standards or manufacturer's recommendation with prior Engineer's approval.

The Contractor shall furnish and install all necessary materials, equipment, and appurtenances required to complete the work.

A. **Unrestrained Joints**: Joints for unrestrained pipe shall be push-on joint. Joints for fittings, when installed with unrestrained pipe, shall be mechanical joint with DI retainer glands, as specified herein for restrained joints.

B. **Restrained Joints**: All joints in restrained pipe systems shall be of the same type (pipe and fittings), except valves shall be mechanical joint with DI retainer glands as specified.

1. **12-inch and Smaller**: Joints for restrained pipe and fittings, 12-inch and smaller, shall be one of the following:

a. Push-on restrained joint utilizing a retainer ring, equal to U.S. Pipe TR Flex. It shall be UL listed, FM approved, or shall be certified by an approved laboratory that the restrained joint will not separate at the specified test pressure.

b. Push-on restrained joint using a locking type gasket, equal to Field-Lok, as manufactured by U.S. Pipe and Foundry, Inc. It shall be UL listed, FM approved, or shall be certified by an approved laboratory that the restrained joint will not separate at the specified test pressure.

c. Mechanical joint with DI retainer glands shall be furnished with retainer glands equal to Series 1100 Megalug, as manufactured by EBAA Iron Inc., Stargrip 3000 as manufactured by Star Pipe Products, or DI MJ Gripper Gland as manufactured by U.S. Pipe and Foundry Co. for use with ductile iron pipe. All retainer glands shall be UL listed, FM approved, or shall be certified for 350 psi pressure rating with a 2:1 safety factor.

2. **Larger than 12-inch**: Joints for restrained pipe and fittings larger than 12-inch shall be as follows:

   a. Restrained pipe joints shall be modified push-on restrained joint, equal to U.S. Pipe TR Flex, and shall be UL listed or FM approved.

   b. Fittings joints shall be equal to U.S. Pipe TR Flex or shall be mechanical joint with DI retainer glands. Retainer glands shall be equal to Series 1100 Megalug or Stargrip 3000 for 16-inch and larger pipe. All retainer glands shall be UL listed, FM approved, or certified for 350 psi pressure rating (for 16-inch) and 250 psi pressure rating (for larger than 16-inch) with a 2:1 safety factor.

   c. Valve joints shall be mechanical joint with DI retainer glands as specified herein for larger than 12-inch fittings joints.

9.05 JOINTS - EXPOSED PIPE AND FITTINGS

Joints for exposed ductile iron pipe and fittings shall be restrained, except as otherwise noted on the Contract Drawings. Joints for exposed pipe in plants and in vaults shall be flanged where noted on the Contract Drawings.

Joints for exposed pipe and fittings 12-inch and smaller shall be modified push-on restrained joint using a retainer ring, or modified push-on joint using a locking type gasket, as specified herein headed "4.04 Joints - Buried Pipe and Fittings."

Joints for exposed pipe and fittings larger than 12-inch shall be modified push-on restrained joint using a retainer ring as specified herein headed "4.04 Joints - Buried Pipe and Fittings."

9.06 DETECTION

Pipe shall have 3-inch detectable metallic tape of the proper color placed directly above the pipe and 12-inch below finished grade or 6-inch detectable tape between 12-inch and 24-inch below finished grade.

Pipe shall also have tracer wire installed along the pipe alignment. The tracer wire to be used shall be a solid, 10-gauge, high strength, copper clad steel wire with a polyethylene jacket of appropriate color manufactured by Copperhead Industries or approved equal.

9.07 ZINC/EPOXY/FLUOROPOLYMER PROTECTIVE COATING

Joints and Pipe exposed to extreme coastal environments including, but not limited to, aerial ocean crossings shall have this system or an approved equal applied as a protective coating.

Surface Preparation: SSPC-SP6/NACE No.3 Commercial Blast Cleaning with a minimum 1.5 mil angular anchor profile.

Tnemec	Coating Thickness
Primer: Series 90-97 Tneme-Zinc	2.5 - 3.5 mils
2nd Coat: Series 66HS Hi-Build Epoxoline	3.0 - 6.0 mils

3rd Coat: Series 700 Hydroflon	2.0 - 3.0 mils

Total Dry Film Thickness: 7.5 - 12.5 mils

Minimum Dry Film Thickness: 9.5 mils

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 10 - PIPING MATERIALS: PVC PRESSURE PIPE

10.01 GENERAL

The Work in this section includes furnishing all Polyvinyl Chloride (PVC) pressure pipe and fittings. PVC pressure pipe includes all PVC pressure pipe 2-inch through 36-inch.

Standards referenced in this Section are the latest revision of the following specifications:

ANSI/AWWA C900-16	"Polyvinyl Chloride (PVC) Pressure Pipe and Fabricated Fittings, 4 In. Through 60 In."
ANSI/AWWA C110	"Ductile-Iron and Gray-Iron Fittings, 3-Inch through 48-Inch for Water"
ANSI/AWWA C111	"Rubber-Gasket Joints for Ductile-Iron Pressure Pipe and Fittings"
ANSI/AWWA C153	"Ductile-Iron and Gray-Iron Fittings, 3-Inch through 48-Inch for Water"
ASTM D 1784	"Standard Specification for Rigid Poly (Vinyl Chloride) (PVC) Compounds and Chlorinated Poly (Vinyl Chloride) (CPVC) Compounds"
ASTM D 1785	"Standard Specification for Poly (Vinyl Chloride) (PVC) Plastic Pipe, Schedules 40, 80, and 120
ASTM D 2241	"Standard Specification for Poly (Vinyl Chloride) (PVC) Pressure-Rated Pipe (SDR Series)"
ASTM D 3139	"Standard Specification for Joints for Plastic Pressure Pipes Using Flexible Elastomeric Seals"

10.02 PIPE

A. **Two-inch Pipes**: All 2-inch PVC pipe shall meet ASTM D 1784 specification for rigid PVC compounds and ASTM D 2241 specification for PVC plastic pipe. PVC pipe shall be suitable for use at maximum hydrostatic working pressure of 160 psi at 73°F. Pipe shall have a standard dimension ratio (SDR) 26 and bear the NSF Seal for potable water pipe.

B. **4-inch Through 36-inch Pipes**: PVC pressure pipe 4-inch through 36-inch shall meet the requirements of ANSI/AWWA C900-16, with outside diameter dimensions of ductile iron pipe. All 4-inch through 36-inch PVC pressure pipe shall be Class 235 and DR18.

C. **UV Resistant PVC Pipe**: All PVC piping exposed to sunlight shall contain titanium dioxide for UV resistance, and shall conform to ASTM D 1784 and ASTM D 1785 (IPS). The Contractor shall submit the manufacturer's certificate of conformance to the City. Pipe shall be marked with manufacturer's identification.

10.03 FITTINGS

A. **Two-inch Pipes**: Gasketed joint standard dimension ratio (SDR) 21 PVC or galvanized steel fittings shall be used with all 2-inch PVC pipe. PVC adapters, Harco as manufactured by the Harrinton Corporation or approved equal, shall be used for jointing to 2-inch gate valves, galvanized fittings, and existing threaded pipe.

B. **Four-inch Through 36-inch Pipes**

1. **Molded PVC Pressure Fittings**: Fittings for 4-inch through 8-inch sanitary sewer pressure pipe shall be molded PVC pressure fittings, unless DI fittings are directed by the Engineer. Molded PVC fittings shall meet the requirements of ANSI/AWWA C900-16 and shall be Harco Class 150 as manufactured by the Harrington Corporation, or approved equal, as directed by the Engineer.

2. **DI Fittings**: Fittings for pipe larger than 8-inch shall be DI, mechanical joint. DI fittings for 4-inch through 36-inch PVC pressure pipe shall conform to ANSI/AWWA C110 or C153 and shall conform to the Technical Specifications section headed "Piping Materials: Ductile Iron Pipe and Fittings."

C. Where flanged fittings are shown, specified, or directed by the Engineer, adapter flanges shall be used on plain end PVC pipe. Adapter flanges shall be suitable for PVC pipe and be equal to Uni-Flange Series 900 as manufactured by Ford/Uni-Flange, Wabash, Indiana.

10.04 JOINTS

Pipe joints shall be plain end, rubber gasket push-on joints, unless otherwise shown. Push-on joints shall meet the requirements of ASTM D 3139.

Joints to DI fittings shall be rubber gasket mechanical joints with retainer glands, unless otherwise shown. All retainer glands shall be UL listed or FM approved. The retainer glands shall be installed in accordance with the manufacturer's recommendations.

When deflection is required the joint shall be completed prior to setting the deflection. The deflection shall conform to applicable AWWA Standards or manufacturer's recommendation with prior Engineer's approval.

Mechanical joints shall meet the requirements of ANSI/AWWA C111.

10.05 DETECTION

Pipe shall have 3-inch detectable metallic tape of the proper color placed directly above the pipe and 12-inch below finished grade or 6-inch detectable tape between 12-inch and 24-inch below finished grade.

Pipe shall also have tracer wire installed along the pipe alignment. The tracer wire to be used shall be a solid, 10-gauge, high strength, copper clad steel wire with a polyethylene jacket of appropriate color manufactured by Copperhead Industries or approved equal.

10.06 MARKINGS AND COLOR CODING

In addition to the standard markings required by ANSI/AWWA C900-16, the letters NSF denoting National Sanitation Foundation approval shall be included in the marking system, on each pipe length and fitting.

PVC pipe shall be manufactured of solid color as specified, or white with continuous colored ink lettering. The applicable color codes, with light color stabilant, are as follows:

Pipe Use	Color Coding
Potable Water	Safety Blue
Sanitary Sewer	Safety Green
Reclaimed Water	Safety Purple

UV resistant PVC pipe shall be solid color as specified above, or white with colored lettering as specified above.

10.07 HARNESSING

Ductile iron fittings with mechanical joints used with PVC pipe that require harnessing, shall be provided with ductile iron retainer glands such as Series 2000 PV Megalug as manufactured by EBAA Iron Inc., Stargrip 4000 as manufactured by Star Pipe Products, or approved equal.

PVC push-on joints for pipe in casings, for joints to PVC pressure fittings, or where shown, shall be harnessed using a ductile iron retainer for push-on joint PVC pipe, such as Series 1600 as manufactured by EBAA Iron Inc., Series 1100 as manufactured by Star Pipe Products, or approved equal.

10.08 INSPECTION AND TESTING

All pipelines shall remain undisturbed for 24 hours to develop complete strength at all joints. All pipelines shall be subjected to a hydrostatic pressure and leak test per the Specifications.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 11 - PIPING MATERIALS: HDPE PRESSURE PIPE

11.01 SCOPE OF WORK

The Contractor shall furnish all labor, materials, equipment and incidentals required to install polyethylene pressure pipe, fittings and appurtenances as shown on the Contract Drawings and specified in the Contract Documents and these Standards.

Newly installed pipe shall be kept clean and free of all foreign matter & gouges.

All pipe shall be correctly color coded / identified.

11.02 QUALIFICATIONS

All polyethylene pipe, fittings and appurtenances shall be furnished by a single manufacturer who is fully experienced, reputable and qualified in the manufacture of the items to be furnished.

11.03 POLYETHYLENE PRESSURE PIPE

A. Polyethylene pipe 4" diameter and larger shall be high-density bimodal PE4710 polyethylene resin with a minimum cell classification of 445574 per ASTM D3350, Class 200, DR 11, meeting the requirements of AWWA C906. All pipe materials used in potable water systems shall comply with NSF Standard 61. Outside diameters of water, reclaimed water and pressure sewer HDPE pipes shall be ductile-iron pipe sizing system (DIPS).

B. Polyethylene tubing 2 inches in diameter and smaller for potable water and reclaimed water shall be high-density PE4710 polyethylene resin with a minimum cell classification of 445574 per ASTM D3350, Pressure Class 200, Copper Tube Size (CTS), SDR 9, meeting the requirements of AWWA C901 and ASTM D2737. Butt fusion or CTS brass connections shall be used. All pipe materials used in potable water systems shall comply with NSF Standard 61.

C. Alternatively, polyethylene tubing 2 inches in diameter and smaller for potable water and reclaimed water shall be crosslinked high-density polyethylene (PEXa) 3306 pipe, Pressure Class 200, Copper Tube Size (CTS), SDR 9, meeting the requirements of AWWA C904. Butt fusion or CTS brass connections shall be used. All pipe materials used in potable water systems shall comply with NSF Standard 61.

D. All HDPE MJ Adapters (DIPS) shall be a DIPS Bell MJ Adaptor with a retaining gland, stainless steel reinforcing collar, gland ring, standard MJ gasket, and extra-long Tee-head bolts. The gland ring shall be ductile iron, C110, heavy body gland ring. Twist-off nuts, sized same as tee-head bolts, and shall be used to insure proper actuating of restraining devices.

11.04 JOINTS

Where PE pipe is joined to PE pipe, it shall be by thermal butt fusion. Thermal fusion shall be accomplished in accordance with the written instructions of the pipe manufacturer and fusion equipment supplier. The installer of the thermal butt fused PE pipe shall have received training in

heat fusion pipe joining methods and shall have had experience in performing this type of work. The date of technician certification shall not exceed 12 months before commencing construction.

Where thermal butt fusion cannot be used, or when specifically called for on the Contract Drawings, electro-fused couplings may be used. Fusion shall be in accordance with the written instructions of the fitting manufacturer. However, Contractor must get prior approval from the City and Engineer before implementing a fusion coupling. Solvent epoxy cementing, electro-fusion couplings and mechanical joining with bolt on wrap around clamps or mechanical joints without an adapter shall not be used for connections.

All fittings for HDPE pipe (4” and larger), except for D.I/HDPE Mechanical Joint Adaptors, shall be ductile iron mechanical joint fittings and shall be joined to the pipe using a butt fused restrained mechanical joint adapter. The D.I./HDPE mechanical joint adapter shall be connected to the HDPE pipe by a heat-fused joint on one end, and connected to a ductile iron pipe valve, or fitting with a mechanical joint on the other end.

Flanged adapter, mechanical adapter and molded fittings for 4-inch and larger pipe shall be Pressure Class 200, PE4710, Ductile Iron Pipe Size (DIPS), DR 11, conforming to AWWA C906 with min. cell classification of 445474 per ASTM D3350. Mechanical joints and fittings for 2-inch and smaller tubing shall meet the requirements of: AWWA C901, ASTM D3350 and ASTM D3140.

11.05 DETECTION

Direct buried HDPE pipe shall have 3-inch detectable metallic tape of the proper color placed directly above the pipe and 12-inch below finished grade or 6-inch detectable tape between 12-inch and 24" below finished grade.

Direct buried or horizontal directional drilled HDPE pipe shall also have tracer wire installed along the pipe alignment. The tracer wire to be used shall be a solid, 10-gauge, high strength, copper clad steel wire with a polyethylene jacket of appropriate color manufactured by Copperhead Industries or approved equal.

11.06 IDENTIFICATION

Pipe shall bear identification markings in accordance with AWWA C906.

Pipe shall be color coded blue for water, purple (Pantone 522 C) for reclaimed water or green for pressure sewer using a solid pipe color or embedded colored stripes. Where stripes are used, there shall be a minimum of three stripes equally spaced.

11.07 INSTALLING POLYETHYLENE PRESSURE PIPE AND FITTINGS

All polyethylene pressure pipe shall be installed by direct bury, directional bore, or a method approved by the City prior to construction. If directional bore is used, or if directed by the City, the entire area of construction shall be surrounded by silt barriers during construction.

11.08 INSPECTION AND TESTING

All pipelines shall remain undisturbed for 24 hours to develop complete strength at all joints. All pipelines shall be subjected to a hydrostatic pressure and leak test per the Specifications.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 12 - PRESSURE PIPE CONSTRUCTION

12.01 GENERAL

The Work in this section includes construction of potable water mains, reclaimed water mains, sanitary force mains, and appurtenances.

Pressure pipelines are to be constructed at locations shown on the Contract Drawings. The City reserves the right to make minor changes in grade and/or alignments as the Work progresses.

Piping materials for pressure pipe installations shall be as follows:

Potable Water Main		
PVC Pipe	2-inch	
DI Pipe	6-inch and larger	
HDPE Pipe	2-inch and larger	ASTM D3350 meeting PE 3408 code designation
Galvanized Pipe	2-inch blow-off assemblies, 2-inch connections, 2-inch short tunneling, and 2-inch short relocations	
Fittings	2-inch PVC pipe:	PVC with gasketed joint
	2-inch galvanized pipe	Galvanized steel with threaded joint
	6-inch and larger pipe	Ductile Iron (DI) with push-on or mechanical joint

Sanitary Force Main		
PVC Pipe	4-inch through 36-inch:	ANSI/AWWA C900-16
DI Pipe	14-inch and larger pipe:	ANSI/AWWA C151
HDPE Pipe	2-inch and larger	ASTM D3350 meeting PE 3408 code designation
PVC Fittings	4-inch through 48-inch pipe:	DI with push-on or mechanical joint
DI Fittings	4-inch and larger pipe:	DI with push-on or mechanical joint
HDPE Fittings	2-inch and larger pipe:	ASTM D3350 meeting PE4710 code designation or DI with HDPE mechanical joint adapter

All existing water services shall be kept in service during the construction of water mains and the preparation of new service connections. Water meters requiring disconnection by the Contractor to accomplish the Work shall be promptly restored to service by the Contractor. The Contractor shall give a minimum of 24 hours prior written notice to all affected water customers of the intended service interruption.

The Contractor's attention is called to the fact that the existing sewer system must be kept in operation at all times. Where connections are made to existing mains or other shutdowns are necessary, permission must be obtained and arrangements must be made with the Utilities

Department for removing from service those mains that will be affected. Shutdowns must be held to a minimum in both number and duration. Bypass pumping and hauling operations may be required to interrupt service.

No valve or other control device on the existing system shall be operated by the Contractor without first obtaining approval from the Utilities Department. The Contractor shall, at least forty-eight (48) hours in advance, notify citizens subject to interruption of service by means of door hangers or any other approved method of the starting time and duration of such interruption.

All pipe, fittings, and appurtenances shall be furnished by the Contractor and be transported, delivered, and installed by the Contractor in accordance with the requirements of the subsection headed "Laying and Jointing Pipelines."

All pipelines shall be tested in accordance with the requirements of the subsection headed "Testing and Disinfection of Pressure Pipelines: Pressure Test."

All potable water and reclaimed water pipelines shall be disinfected before they are put into service as specified in the subsection headed "Testing and Disinfection of Pressure Pipelines: Disinfection."

As-built drawings shall be submitted to the Engineer prior to acceptance of the Work and prior to commencement of the warranty period.

Standards referenced in this Section are the latest revision of the following specifications:

ANSI/AWWA C105	"Polyethylene Encasement for Ductile-Iron Piping for Water and Other Liquids"
ANSI/AWWA C110	"Ductile-Iron and Gray-Iron Fittings, 3-Inch through 48-Inch
ANSI/AWWA C111	"Rubber-Gasket Joints for Ductile-Iron Pressure Pipe and Fittings"
ANSI/AWWA C504	"Rubber-Seated Butterfly Valves"
ANSI/AWWA C509	"Resilient-Seated Gate Valves for Water and Sewerage Systems"
ANSI/AWWA C515	“Reduced Wall, Resilient-Seated Gate Valves for Water Supply Service”
ANSI/AWWA C550	"Protective Epoxy Interior Coating for Valves and Hydrants"
ANSI/AWWA C600	"Installation of Ductile-Iron Water Mains and Their Appurtenances"
ANSI/AWWA C605	"Underground Installation of PVC Pressure Pipe and Fittings for Water"
ANSI/AWWA C651	"Disinfecting Water Mains"
ANSI/AWWA C800	"Underground Service Line Valves and Fittings"

ANSI/AWWA C900-16	"Polyvinyl Chloride (PVC) Pressure Pipe and Fabricated Fittings, 4 In. Through 60 In."
ANSI/AWWA C901	"Polyethylene (PE) Pressure Pipe and Tubing, 1/2-Inch through 3-Inch for Water Service"
ANSI/AWWA C906	"Polyvinyl Chloride (PVC) Pressure Pipe and Fittings 4-Inch through 63-Inch, for Water Distribution and Transmission"
ANSI/AWWA C901	"Polyethylene (PE) Pressure Pipe and Tubing, 1/2-Inch through 3-Inch for Water Service"
ASTM A 126	“Specification for Gray Iron Castings for Valves, Flanges, and Pipe Fittings”
ASTM D 429	"Test Methods for Rubber Property - Adhesion to Rigid Substrates"
ASTM D 3139	"Standard Specification for Joints for Plastic Pressure Pipes using Flexible Elastomeric Seals"

12.02 DATA TO BE SUBMITTED

The Contractor shall submit shop drawings in accordance with the Specifications.

Pipe
Valves
Joints and joint accessories
Fittings
Specials and accessories
Special linings and coatings
Water service materials

12.03 MATERIALS

All pressure pipe materials shall be in accordance with the applicable requirements of the Technical Specifications sections headed:

DIP “Piping Materials: Ductile Iron Pipe and Fittings”
PVC “Piping Materials: PVC Pressure Pipe”
HDPE “Piping Materials: HDPE Pressure Pipe”

All pressure pipe materials (pipe, fittings, valves, valve boxes, tapping valves and sleeves, precast thrust blocks, blow-offs, house services, etc.) except fire hydrants, shall be furnished by the Contractor. All pressure pipe fittings and valves shall be cast and manufactured in the United States of America unless complete certification is furnished in accordance with ANSI/AWWA C110.

All materials furnished shall be new. Materials not specified herein or on the Contract Drawings

shall conform to AWWA Standards and Industry Standards.

Piping, concrete, masonry, and all other materials shall conform to those materials as specified in the appropriate Technical Specifications sections for those materials. Specific pressure pipe and appurtenances materials shall conform to the following specifications:

All materials found during the progress of work to have flaws, cracks, or other defects will be rejected by the Engineer regardless of whether or not it has been installed and shall be replaced by and at the expense of the Contractor.

Materials shall not be stacked or placed under materials in such a manner that damage could result. Slings, hooks, or tongs used for lifting shall be padded in such a manner as to prevent damage to exterior surfaces, interior linings and components. If any part of the coating, lining or components is damaged, the repairs or replacement shall be made by the Contractor at his expense and in a manner satisfactory to the Engineer prior to attempting installation. In the event that materials supplied by the City are defective, the Contractor shall notify the Engineer immediately so arrangements can be made for replacing such devices.

12.03.01 2-INCH DIAMETER PIPE

1. Steel pipe shall be standard galvanized steel, Schedule 40, furnished in 21-foot lengths with both ends threaded.

2. All 2-inch steel fittings shall have screw type joints.

3. Pipe thread compound shall not be used. Threads shall be wrapped with teflon joint tape, non-hardening, Mil. Spec. T27730A. Cutting oils shall be dark, non-toxic, and equal to cutting oil manufactured by the Rigid Tool Company. The Contractor shall take caution not to allow cutting oil inside the pipe and shall remove all cuttings. Cutting oils shall be UL listed or NSF approved for use in potable water systems.

4. PVC pressure pipe to be used in the potable water system shall be Safety Blue in color or white with Safety Blue identification tape or color coded approved ink lettering as specified. PVC pressure pipe to be used in the reclaimed water system shall be Safety Purple in color or white with Safety Purple identification tape or approved color-coded ink lettering as specified.

   PVC pipe shall conform to the Technical Specifications section headed "Piping Materials - PVC Pressure Pipe."

5. HDPE pressure pipe shall conform to the Technical Specifications section headed, “Piping Materials – HDPE Pressure Pipe.”

12.03.02 VALVES - GENERAL

1. Valves shall be iron body, bronze mounted, and have joint ends as shown or specified. Valves shall have O-ring seals, unless otherwise specified.

2. A standard 2-inch square AWWA operating nut shall be provided on each valve. Valves shall have non-rising stems and shall open when the nut is turned counterclockwise. Each nut shall be marked with an arrow.

3. All valves of the same type shall be from the same manufacturer. Parts of valves of the same type and size shall be interchangeable. Unless otherwise specified, all valves shall be designed for a cold water working pressure of 150 psi.

4. All valves shall be furnished complete with gaskets, bolts, nuts, and glands necessary for installation.

5. All valves larger than 2-inch shall have restrained rubber gasketed compression joints, or mechanical joints with retainer glands, conforming to ANSI/AWWA C111, at the Contractor's option unless otherwise noted.

6. Valves used for sanitary force mains shall be the same as those used in other pressure pipe applications, unless otherwise specified.

7. Upon request, the valve manufacturer shall provide an affidavit of compliance, proof of design testing, and proof of production testing.

12.04 CONNECTIONS TO EXISTING MAINS

The Contractor shall connect the new pressure pipelines to the existing pressure pipelines at locations as shown on the Contract Drawings and as specified. The Engineer shall be notified at least 2 working days prior to making connections. The time at which the connections are to be made and the manner of making the connections shall be subject to review and acceptance by the Engineer.

The connections to the existing pressure pipeline shall be made to minimize the time during which the existing pressure pipeline will be out of service. The Contractor shall utilize the necessary number of crews and types of equipment and shall work the necessary hours to ensure completion of the connections within the time specified.

12.05 CONSTRUCTION OPERATIONS

Pressure pipelines shall be installed in open trenches, except when another method, such as jacking, boring, or tunneling, is shown on the Contract Drawings, specified, or ordered. Jetting shall not be allowed under roadway, alley, or driveway. All mains shall be laid and maintained at the required lines and grades with fittings, valves and appurtenances at the described locations. All pipe shall be laid to the depth as shown on the Plans, or when a depth is not indicated, with a minimum cover of thirty-six (36) inches outside of the roadway, and forty-two (42) inches under the roadway. Grade lines shall be set by the Contractor. The tolerance of such grades shall not be more than that specified on the drawings. When no tolerance is indicated a tolerance of 0.5 foot shall be used. All other realignments must be approved by the Engineer. The Contractor shall have suitable survey equipment on the site at all times.

All joints, fittings and other appurtenances shall not be covered until inspected by the City Inspector.

Non-compliance will require excavation of all joints and fittings

Pipe and fittings shall not be strung in residential areas more than 3 weeks in advance of pipelaying, unless otherwise approved by the Engineer. The Contractor shall install pipelines, pressure test, disinfect, and restore the ground surface in pipeline segments of 3,500 linear feet or less, except as otherwise approved by the Engineer. The new segment of pipelaying shall not start until restoration has commenced on the previous segment, or as approved by the Engineer.

Pipeline segments shall be pressure tested and disinfected after pipelaying is complete, to minimize inconvenience to the Public, except as otherwise approved by the Engineer.

No excavation shall be left open over a weekend. All pavement openings shall be completely repaired as specified in the Technical Specifications section headed "Surface Restoration" within 7 days of opening, or a temporary asphaltic pavement patch placed and maintained daily.

Where shown on the Contract Drawings or where directed by the Engineer, the Contractor shall remove existing pipelines which are shown to be abandoned. Any such pipe, fitting, etc., shall be removed after the new pipeline (replacing the existing line) is accepted and put into service by the City. Removed pipe and appurtenances 6 inches or larger which are described elsewhere or deemed by the Engineer to be reusable shall be delivered to the City by the Contractor. All material not deemed reusable shall become the Contractor's property and shall be removed from the site by the Contractor. No additional payment will be made for salvaging pipe and fittings.

In general, pipe six inches and smaller abandoned within City rights-of-way shall be capped at both ends and abandoned in place. Grouting is not required unless specifically required by the Engineer or the City. Abandoned pipes eight inches and larger shall be filled with grout or flowable fill unless otherwise directed by the City or the Engineer. Pipe abandoned in rights-of-way owned by municipalities other than the City shall be subject to the requirements of the agency having jurisdiction. All pipes shall be abandoned in a manner which results in the abandoned pipeline not being pressurized.

Short tunneling of pressure pipe shall be constructed as required to protect trees, shrubs, and existing surface or subsurface utilities and structures. Short tunnels shall be constructed to the lengths shown on the Contract Drawings, specified, or directed by the Engineer. The Contractor will be allowed to utilize an auger machine and to push or pull the carrier pipe into the bore without the need of a casing. The Contractor shall install the pipe within the bore hole on a line and grade to allow connection to open cut piping adjacent to the bore hole within pipe jointing alignment limits defined for the pipe in question. The completed installation shall not result in settlement of soil under the obstacle.

Existing fences shall be restored by the Contractor and shall be finished and installed so that the restoration is equal to or better than the original. Only those portions of original fencing or materials there from, that the Engineer approves for re-use, shall be used by the Contractor in fence restoration. All other materials, including lumber, paint, wood preservative, concrete, and metal products shall be furnished by the Contractor.

The cost of protecting, replacing, relocating, and maintaining (including using hay bales) storm and sanitary sewerage facilities shall be included in the various unit price Pay Items, and no separate

payment will be made therefore unless otherwise specified in other Pay Items.

12.06 LAYING AND JOINTING PRESSURE PIPELINES

All pressure pipeline installation shall comply with applicable standards of ANSI/AWWA C600, C605, and C906, and with these Specifications.

Mechanical joint fittings and valves installed in sections of unrestrained pipe, and in blow-offs, shall be installed using ductile iron retainer glands, as set forth in the Technical Specifications section headed "Piping Materials: Ductile Iron Pipe."

PVC push-on fittings for pressure pipelines shall conform to the Technical Specifications section headed "Piping Materials: PVC Pressure Pipe."

Laying and jointing of HDPE pressure pipe shall conform to the Technical Specifications section headed “Piping Materials: HDPE Pressure Pipe.”

Excavation and backfill shall conform to the Technical Specifications section headed "Excavation and Backfill."

In lieu of jacking and boring or pushing of pipe up to 4-inch in diameter, the Contractor may use a soft bore directional drilling process as provided by Flow Mole Corporation or approved equal.

Cover for all pressure pipeline Work, if not shown on the Contract Drawings, shall be not less than:

	2-inch and 4-inch	6-inch and larger
Under roadways and alleys:	36 inches	42 inches
Under grass and sidewalks:	24 inches	36 inches

Unless otherwise noted on the Contract Drawings or in other sections of this Specification, the pressure pipeline shall be handled and installed in strict accordance with the manufacturer's instructions and with the applicable AWWA Standards. If a conflict exists between the manufacturer's instructions and the AWWA Standards, the manufacturer's instructions shall govern.

Prior to installation, all pipe shall be inspected for defects and all lump or excess coatings shall be removed. The inside of the bell and outside of the spigot shall be cleaned prior to joining of all pipe. Caution shall be taken to prevent damage to the pipe during lowering into the trench.

Any defective material shall be removed from the job site immediately. Should a defect be discovered after the item has been placed in the trench, the replacement will be at the Contractor's expense. Materials shall be stored along installation routes in a manner acceptable to the Engineer or as described elsewhere in the Specifications.

Polyethylene wrapping shall be installed on ductile iron pipe and appurtenances where shown on the Contract Drawings or where ordered by the Engineer.

Polyethylene encasement materials and installation shall meet the applicable requirements of ANSI/AWWA C105. Care shall be taken while backfilling to prevent puncturing, tearing, or otherwise damaging the polyethylene wrapping.

The Contractor shall use every precaution during construction to protect the pressure pipeline against the entry of non-potable water, dirt, wood, small animals, and any other foreign material that would hinder or contaminate the operation of the pipeline. Where the groundwater elevation is above the bottom of the trench, the Contractor shall provide suitable dewatering equipment.

All dewatering shall meet the requirements set forth in the Technical Specifications section headed "Excavation and Backfill."

Watertight plugs of an approved type shall be installed in the ends of all pipe, fittings, and valves during 24-hour or longer periods when installation is not in progress, or as required to prevent ditch water, sand, etc. from entering the pipe. Standard plugs shall be inserted into all dead end pipes, tees or crosses; spigot ends shall be capped; flanged ends shall have blind flanges, or sheet metal or plywood caps. Plugs installed for pressure testing shall be fully secured and restrained to withstand the test pressure.

Where plugging is required because of Contract division or phasing for later connection, the ends of such lines shall be equipped with a permanent type cast iron or ductile iron plug/cap or blind flange with or without a blowoff cock, as shown on the Drawings. Installation or removal of such plugging shall be considered incidental to the work and no payment shall be expected for this work by the Contractor.

Concrete thrust blocks of the proper size and type shall be furnished and installed at all locations where a change in the pipe alignment exceeds 7 degrees or dead ends, unless Contract Drawings show that adjacent pipe, in excess of 2 bells each direction, shall be restrained. Concrete thrust blocks used on 12-inch and larger mains shall be poured in place. Precast thrust blocks may be used on mains less than 12-inch in diameter. Thrust block concrete shall conform to the Technical Specifications section headed "Concrete, Masonry, and Reinforcing Steel."

Boring, soft boring, and jacking work other than new services shall strictly conform to all applicable stipulations of the State of Florida Department of Transportation Utility Accommodation Manual, unless otherwise specified. Softbore shall utilize a guided boring system, equal to FlowMole or DirectLine.

12.06.01 Expose Existing Pressure Pipeline and Record Elevation

The Contractor shall expose the existing pressure pipelines prior to the construction stake-out to determine the station, offset, and elevation, before actual construction begins. The Contract Drawings may be modified by the Engineer, as necessary, to accommodate the pressure pipelines which must remain.

12.06.02 Conflict Adjustment of Existing Pressure Pipelines

In some locations existing pressure pipelines intended to remain in service may need to be adjusted horizontally or vertically to avoid conflicts with the proposed storm drains, sanitary

sewers, roadway base, manholes, inlets, or other proposed improvements. The conflict may not be shown on the Contract Drawings.

In the event that a conflict is encountered and confirmed by the Engineer, the adjustment to alleviate the conflict shall be constructed in accordance with the applicable "Obstruction Detail" or as ordered by the Engineer.

12.06.03 Pipe Joints

1. **Standard Mechanical Joints**: In making mechanical joints, the pipe shall be centered in the bells. The surfaces of ductile iron pipe with which the rubber gasket comes in contact shall be thoroughly brushed with a wire brush just prior to assembly of the joint. The surfaces of PVC pipe shall be wiped clean with a cloth and soapy water. A pipe lubricant shall be brushed over the gasket just prior to installation. The gasket and gland shall be placed in position, the bolts inserted, and the nuts tightened finger tight. The nuts shall be tightened by means of a torque wrench, or as approved by the City, in such a manner that the gland shall be brought up evenly into the joint. The following range of bolt torques shall be applied:

Bolt Size (inch dia.)	Range of Torque (foot lbs.)
5/8	45 - 60
3/4	75 - 90
1	70 - 100

   If effective sealing is not obtained at a maximum torque listed above, the joint shall be disassembled and reassembled after thorough cleaning.

2. **DI Pipe Push-On Joints**: In making up the push-on rubber gasket joint, the gasket seat in the socket shall be thoroughly brushed with a wire brush and the gasket shall be wiped with a clean cloth. The gasket shall be placed in the socket with the large round end entering first so that the groove fits over the bend in the seat. A thin film of approved lubricant shall then be applied to the inside surface of the gasket that will come in contact with the entering pipe. The plain end of the pipe to be entered shall be thoroughly brushed with a wire brush and placed in alignment with the bell of the pipe to which it is to be joined. Ends of cut pipe shall be ground to a smooth bevel edge before inserting in bell. The joint shall be made up by exerting sufficient force on the entering pipe so that its plain end is moved past the gasket until it makes contact with the base of the socket.

   Backhoe buckets or excavation equipment are not to be applied directly to the pipe.

3. **PVC Pipe Push-On Joints**: Procedures for the making of PVC pipe push-on joints shall be similar in nature to those set forth in the preceding paragraph (except the bell shall be wiped with a clean cloth). Procedures shall strictly follow the manufacturer's printed instruction for the making of joints. In a like manner, all other PVC pipeline Work shall be performed in accordance with the manufacturer's recommendations.

4. **Restrained Joints**: Ductile iron mechanical joint pipe, fittings, and valves 12-inch and smaller that require restraint shall be installed using ductile iron retainer glands, as specified. The glands shall be installed in accordance with the manufacturer's recommendations. Glands using a frangible bolt for setting the restraining devices shall be tightened with standard wrenches.

   Glands using standard bolts for setting the restraining devices shall be tightened with a torque wrench. The assembly shall be given 2 heavy coats of a bituminous coating after installation.

   Restrained push-on joint pipe, fittings, and valves, where shown on the Contract Drawings, shall be with a restraining gland or restraining gasket, as specified.

   Pipe, fittings, and valve joints shall be restrained at locations shown on the Contract Drawings, or as specified. In addition, all other fittings and valves shall be installed using a ductile iron retainer gland.

   The following shall apply to various restrained joint/pipe size type:

Pipe Size (Inches)	Restrained Joint Type
2	No restrained joint allowed
4 through 12	Mechanical joint/retainer glands Tyton Pipe/Loc Fast Gasket, or equal
16 and larger	Mechanical joint/retainer glands TR Flex, or equal, pipe valves and fittings

12.06.04 Color Coding

Prior to backfilling, all pressure pipelines shall be identified with color coding. The applicable color codes, with light color stabilant, are:

Pipe Use	Color Coding
Potable Water	Safety Blue
Sanitary Sewer	Safety Green
Reclaimed Water	Safety Purple

1. **Coding on the Pipe**: HDPE and PVC pipe shall be colored at the point of manufacture. If black or white pipe must be used, pipe shall have City approved color coded ink lettering stamped on the pipe or shall be continuously taped with plastic adhesive tape using the color coding as stated above. Plastic adhesive tape shall be applied as follows:

   Black and white 2-inch and 4-inch pipe -- continuously taped at top center.

   Black and white 6-inch and larger pipe -- continuously taped at "10, 12, and 2 o'clock."

   Ductile iron pipe shall be continuously painted along the top one-third of the pipe with a 2-part high build epoxy-polyamide paint or approved equal. The paint shall be dry prior to the pipe being installed.

Ductile iron pipe wrapped in color coded polyethylene wrapping is not required to be painted.

2. **Coding above the Pipe**: Pipe shall have 3-inch detectable metallic tape of the proper color placed directly above the pipe and 12-inch below finished grade or 6-inch detectable tape between 12-inch and 24-inch below finished grade.

12.06.05 Valves and Valve Boxes

Valves shall be installed in a closed position, free from all distortion and strain, and left in satisfactory operating condition. Valves shall be tested in place by the Contractor, as far as practicable, and any defects in valves or connections shall be corrected to the satisfaction of the Engineer.

Tapping sleeves shall be pressure tested prior to making the tap.

Valve boxes with stay-put cover shall be vertical and concentric with the valve stem. Any valve box which is moved from its original position, preventing the operation of the valve stem, shall be satisfactorily reset by the Contractor at his expense.

Please see the Specifications for additional information for Valves.

12.06.06 Connections (Tie-ins) and Shutdowns

The Contractor shall furnish all labor and equipment necessary for the connection of approved pipelines to the existing system and the shutdown, removal or disconnection and plugging of existing pipelines as indicated on the Contract Drawings or as directed by the Engineer.

This may be required in instances where existing pipelines are to be abandoned or where a short segment of existing pipeline must be cut out and adjusted either vertically or horizontally to avoid a conflict with a proposed storm drain or storm drain structure, sanitary sewer, or other proposed improvement.

The Contractor shall make all taps and tie-ins required, under the direct observation of the Engineer.

12.07 PIPELINE CLEANING

All mains shall be pigged, cleaned and flushed to remove all sand and other foreign matter if required by the City and Engineer. The Contractor shall be responsible for developing a pigging and flushing plan to be submitted to the Engineer for approval prior to pigging and flushing. The Contractor shall dispose of all water used pigging and for flushing without causing a nuisance or property damage, in accordance with state and local requirements. Any permits or fees required for the disposal of flushing water shall be the responsibility of the Contractor.

Flushing water used by the Contractor shall be taken from an approved metered source. The water utility will provide the meter and designate the source. Potable and reclaimed flushing water shall be at the Contractor’s expense. Reclaimed water should be used for sanitary force mains and potable

water can be used for all service types.

The cleaning of the pipeline shall be done by the controlled and pressurized passage of a polyurethane pig of varying dimensions, coatings and densities as determined by the City through the piping system.

A series of pigs shall be entered into the system at a point as near to the beginning as is logistically and mechanically feasible.

A launching assembly shall be used as the entrance point for the pig. This assembly shall allow for the following:

1. The entering of pigs into the system by providing the means to induce flow from an external source, independent of the flows and pressures immediately available from the system, on the back of the pig to develop sufficient pressure to force the pig through the system.
2. A means to control and regulate the flow.
3. A means to monitor the flows and pressures.
4. A means to connect and disconnect from the system without any disruption to the operation of the system.

The pig shall be removed or discharged from the system at a point as near to the end as is logistically and mechanically feasible.

The contractor shall be responsible for the retrieval of the pig at the discharge point. This may include setting a trap that will not disrupt normal flow and operations but will capture the pig and any debris. A retrieval assembly may also be used but said assembly shall be able to connect and disconnect from the system without any disruption to the operation of the system.

Alternative launching and retrieval methods shall be done with the prior approval of the City.

Any pig that cannot progress through the piping system shall be located by the contractor and removed by excavation of the pipe to remove the blockage. All pipe repairs shall be the responsibility of the contractor and shall be performed with as little disruption to the system as possible.

Any increase in pressure that cannot be accounted for, i.e. fittings or valves or additional cleaning runs, shall be investigated, per the Engineers' review and acceptance, by locating the pig at the beginning of the increased pressure and excavating to determine the cause of the pressure increase. All pipe repairs shall be the responsibility of the contractor and shall be performed with as little disruption to the system as possible.

Final flushing of the cleansed lines shall be performed after the last successful run of the pig as determined by the City. The contractor shall be responsible for all applicable flushing and disinfection requirements for potable water lines.

The contractor shall maintain and provide a report at the end of the cleaning procedure containing the following:

1. The pressures in the pipe during the pigging procedure.
2. Any inline problems encountered during the procedure including all excavations with detailed locations, reason for the excavation and any corrective measures taken to the pipeline.
3. A record of the pigs used, their sizes, styles and other pertinent information regarding what materials were used during the cleaning.
4. An analysis of the condition of the pipeline before and after the cleaning procedure.

12.08 TESTING AND DISINFECTION OF PRESSURE PIPELINES

All new pressure pipelines shall be subjected to a water pressure test between valves. In order to expedite the restoration of certain surface facilities, it may be required that individual sections between valves be tested as soon as the valves are installed. Disinfection shall be accomplished after the pressure test requirements have been met for the entire segment of pressure pipe.

The Contractor shall furnish all labor, materials, equipment, and chemicals to perform the required pressure tests and disinfection. All testing and disinfection will be subject to City inspection. All new valves shall be operated by the Contractor. However, all tie-in valves to the existing water system shall only be operated with the approval of, and in the presence of, the City, and shall be scheduled to be performed during the standard work hours of City staff, unless otherwise approved by the Engineer.

All existing valves shall be operated by the City or by the Contractor under the direct supervision of the City.

Testing and disinfection of pressure pipelines shall be completed per Flushing, Testing, and Disinfection section.

12.09 SURFACE RESTORATION AND MISCELLANEOUS

All surfaces disturbed by the Contractor shall be restored to their original condition in conformance to the Technical Specifications sections headed "Surface Restoration".

Sanitary sewers and laterals which cross a new potable water pipeline with less than 18 inches clear vertical separation, shall be replaced with 20 linear feet of ductile iron pipe, PVC pressure pipe (ANSI/AWWA C900-16), or SDR26 gravity pipe centered on the new pipeline, or as ordered by the Engineer.

Sanitary sewers and/or laterals which conflict with the new pipeline or are damaged by pipeline construction shall be reconstructed with ductile iron pipe, PVC pressure pipe (ANSI/AWWA C900-16), or SDR26 gravity pipe, as ordered by the Engineer.

Each valve box in an unpaved area shall have an 18-inch by 18-inch by 4-inch concrete pad. Pad shall be 1 inch above grade, and sod shall be so placed to maintain this 1 inch.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 13 - DIRECTIONAL BORING OF PIPE

13.01 GENERAL

A. All existing structures, water and sewer lines, storm drains, utilities, driveways, sidewalks, signs, mail boxes, fences, trees, landscaping, and any other improvement or facility in the construction area that the Contractor disturbs for his own construction purposes shall be replaced to original condition at no additional cost to the City.

B. For “Navigable Waters of the U.S.” reference 33 of the Code of Federal Regulations, Part 329.

C. For “Waters of the U.S.” reference 33 of the Code of Federal Regulations, Part 323.

D. For “Waters of the State” reference Section 62-301 of the Florida Administrative Code.

13.02 TESTING

A. In place soil compaction tests shall be performed by a qualified testing laboratory.

B. Compaction tests shall be taken at every excavation, except in the road crossings or road shoulders; tests are to be taken according to current FDOT Standards.

C. All pipe shall be tested in accordance with the appropriate material specifications.

D. Reference Standards: American Society for Testing and Materials (ASTM), D1557, Moisture-Density Relations of Soils Using 10-lb. Rammer and 18-in. Drop.

E. The density of soil in place shall be a minimum of 95 percent in accordance with ASTM test 1557-70T, Method A or C.

13.03 QUALIFICATIONS

A. Pipe Manufacturer: All pipe and fittings shall be furnished by a single manufacturer who is fully experienced, reputable and qualified in the manufacture of the items to be furnished.

B. Drilling Supervisor: The Contractor shall provide a competent boring specialist who shall remain on the project site during the entirety of the directional boring operation. This includes, but is not limited to, drilling fluid preparation, seaming, boring and pulling. The boring specialist shall have a minimum of five years of experience in supervising directional bores of similar nature, diameter, materials and lengths.

C. Pipe Fusion: All boring and fusing equipment shall be certified for operation. The Contractor responsible for thermal butt fusing pipe and fittings shall have manufacturer certification for performing such work or a minimum of five years of experience performing this type of work. If no certification is available, written documentation of the required work experience shall be submitted for review and acceptance.

D. Drilling Fluid Specialist: The personnel responsible for supervising the supply, mixing, monitoring fluid quality, pumping and re-circulation system proposed for the drilling fluid shall have a written certification issued by the Drilling Fluid manufacturer for performing such work or a minimum of five years of experience performing this type of work. If no certification is available, written documentation of the required work experience for the proposed personnel shall be submitted for review and acceptance.

13.04 SUBMITTALS

A. Detailed description including specifications and catalog cuts for:

1. Shop drawings and catalog data for all HDD equipment.
2. The pipe manufacturer's maximum degree of radial bending allowed for the pipe when full and when empty and pullback force recommended setting.
3. Steering and tracking devices including specific tracer wire.
4. Drilling fluids; the drilling fluid submittal shall include the ratio of mixture to water, including any additives, based on the Contractor's field observations prior to construction, knowledge and experience with drilling in similar conditions, and any soil data provided in the Contract Documents, which shall be verified by the fluid specialist.
5. Shop drawings for the breakaway swivel, including the method of setting the swivels' break point and set point to be used.
6. Shop drawings for sizing of the mandrel for pull through testing
7. Pipe assembly procedure, details of support devices, and staging area layout including methods to avoid interference with local streets, driveways, and sidewalks.
8. Details of pipe fusion procedures and copies of the fusion technician qualification certification or documentation.
9. Drilling fluid technician qualification certification or documentation

B. Bore Plan: For all contiguous piping installations over 300 feet in length or any installations for piping larger than 4" in diameter, the Contractor shall submit a Bore Plan that includes the following at least 21 days prior to beginning work:

1. Contact information and experience for the drilling fluid specialist.
2. The number of passes the bore will include to get the product pipe installed.
3. The pilot bore and all reaming bore sizes including the final pullback with the product pipe.
4. Drilling rod length in feet.
5. The pilot bore, pre-ream bores (if any) and pullback production rate in minutes per (drilling) rod to maintain adequate mud flow.
6. Details of the entry and exit pit locations along with entry and exit angles for the bore, drawn to scale, depicting the position of all required equipment, access points, existing facilities to remain in place, existing traffic lanes to be maintained in operation, office trailers and storage sites.
7. The method of fusing or joining pipe of adjacent bores to ensure that the joint is on grade with the installed pipe.

C. If the Contractor is planning on deviating from bid document Profile, then the Contractor is required to submit detailed calculations supporting the modifications. The calculations

shall consist of the following:

1. Predicted and allowable pulling loads and bending stress, and the minimum allowable bending radius (Provide an estimate of the pulling loads and bending stress at characteristic points along the drill path when the curvature of the drill path changes).
2. Calculations for safety factors against ring collapse of the pipe during pullback and confirm ring deflection is within limits.
3. Graphical representation of evaluation of frac-out risks, showing maximum allowable and minimum required pressures at all critical locations along the bore alignment. The calculations shall be conducted by or under the direct supervision of a Professional Engineer licensed in the State of Florida, who shall stamp and seal the calculations.
4. The deviation drawings shall include a HDD Profile, plan view and cross-section. The Contractor is also recommended to submit deviation drawings for larger bores for site layout plans (Rig and Product Pipe Layout site) and pipeline stringing area (rollers).

D. Bore Schedule: For all contiguous piping installations over 300 feet in length or any installations for piping larger than 4-inches in diameter, the Contractor shall submit a detailed schedule for the HDD installation at least fifteen days prior to mobilization. The detail schedule shall identify all major construction activities and durations, with beginning and completion dates shown. The detail schedule shall be updated at least every two weeks or more frequently, as directed by the Engineer, and shall include but not limited to the following items:

1. Pre-construction walk over and inspection
2. Regular Mobilization and set-up
3. Pilot bore
4. Pre-reaming and reaming
5. Layout and thermal butt fusing of pipe
6. Pressure Testing of pipe prior to pullback when practical or as directed by the Engineer.
7. Final reaming and pullback of product pipe.
8. Annulus grouting after installation (optional).
9. Mandrel/pig test to confirm deformations of product pipe are within allowable tolerances.
10. Cleanup, surface restoration, and demobilization.

F. Prepare a Frac-out and Surface Spill Contingency Plan. Submit the plan to the Engineer prior to construction. Submit a letter of intent signed by an authorized representative of Contractor, confirming that the plan will be followed. The contingency plan for inadvertent returns/hydrofracture shall address all potential pathways for release of drilling fluid, and shall address containment, cleanup, and mitigation measures as well as inspection and reporting procedures and points of contact for regulatory and permitting agencies. The Plan shall address releases to the ground surface and controlled releases at any relief wells installed by the Contractor. Describe the location, installation, monitoring, and abandonment procedures for any relief wells. Provide stand-by equipment on-site to recover fluids via vacuum. Describe equipment and procedures

to private residence yard areas to inspect for and clean up fluid releases.

G. The Contractor shall submit an as-built profile of the pilot bore within twenty-four (24) hours of completion of the pilot bore to the Engineer and City Representative. Contractor shall receive written review and acceptance from either party in order to continue with the proposed profile alignment.

H. Furnish a Bore Path Report to the City within seven days of the completion of each bore path. Data collected by the City Representative does not relieve the Contractor from the responsibility of recording his own data. Include the following in the report:

1. Location of project, project name and number
2. Name of person collecting data, including title, position and company name
3. Investigation site location (Contract plans station number or reference to a permanent structure within the project right-of-way)
4. Driller's Log & identification of the detection method used
5. Elevations and offset dimensions of installed pipe as referenced to the drawings
6. Data log of pullback force during product pipe installation
7. All failed bores. Include length of pipe left in place and explanation of failed installation.

13.05 MATERIALS

A. Incidental materials that may or may not be used to install the product depending on field requirements are not paid for separately and will be included in the cost of the installed product.

B. Drilling Fluids shall use a mixture of bentonite clay or other approved stabilizing agent mixed with potable water with a pH of 8.5 to 10.0 to create the drilling fluid for lubrication and soil stabilization. Vary the fluid viscosity to best fit the soil conditions encountered. Contractor shall have appropriate additives for drilling fluid available for different soil conditions that may be encountered. Do not use any other chemicals or polymer surfactants in the drilling fluid without written consent from the City. Certify to the City in writing that any chemicals to be added are environmentally safe and not harmful or corrosive to the product pipe.

C. For drilling operations that will be below waters of the State of Florida, only bentonite free drilling fluids shall be used. Acceptable products are BioMax, manufactured by M-I Swaco, Inc., P.O. Box 2216, Laurel, Mississippi 39440, Phone: (800) 731-7331 or Bio-Bore, manufactured by Baroid Drilling Fluids, Inc., P.O. Box 1675, Houston, Texas 77251, Phone: (731) 987-5900 or approved equal.

D. Identify the source of water for mixing the drilling fluid. Approvals and permits are required for obtaining water from such sources as streams, rivers, ponds or fire hydrants. Any water source used other than potable water may require a pH test.

E. Directional Drilling/Boring pipeline construction shall require the installation of minimum #10 AWG Copper Clad, Extra High Strength Steel tracer wire with minimum 1,150 lb.

break load, with a minimum 45 mil HDPE insulation thickness. Refer to the Specifications for tracer wire details.

F. Breakaway connectors shall be supplied by DCD Design & Manufacturing, Condux International, Inc. or approved equal.

13.06 SITE CONDITIONS

A. Carry out excavation for entry, exit, recovery pits, slurry sump pits, or any other excavation as specified in the Contract documents. Sump pits are required to contain drilling fluids if vacuum devices are not operated throughout the drilling operation, unless approved by the City.

B. Within 48 hours of completing installation of the boring product, clean the work site of all excess slurry or spoils. Take responsibility for the removal and final disposition of excess slurry or spoils. Ensure that the work site is restored to pre-construction conditions or as identified on the Contract Drawings.

C. Exposure of product pipe to sunlight shall be limited to 14 consecutive days unless approved by the City.

D. The pipe shall be supported at intervals along its length with rollers or Teflon pads to minimize frictional forces when being pulled, and to hold the pipe above the ground. Surface cuts or scratches greater than or equal to the maximum defect depth in 3.08 E are not acceptable.

13.07 DAMAGE RESTORATION & REMEDIATION

A. The Contractor shall take responsibility for restoration for any damage caused by heaving, settlement, separation of pavement, escaping drilling fluid (frac-out), or the directional drilling operation, at no cost to the City.

B. When required by the City, provide detailed Contract Drawings which show how damage to any roadway facility will be remedied. These details will become part of the Record Drawings Package. Remediation Plans must follow the same guidelines for development and presentation of the Record Drawings. When remediation plans are required, they must be approved by the City before any work proceeds.

C. For HDD operations that will be below waters of the State of Florida, the contractor shall be responsible for any damage caused by the drilling operation, including, but not limited to, fracturing of the channel bottom. Any State or Federal required environmental cleanup due to the release of drilling fluids into State waters shall be at the Contractor's expense. The Contractor may at his own expense increase the depth of his drilling operations upon the approval from the City.

13.08 QUALIFICATIONS FOR REJECTION OF DIRECTIONAL BORE

A. The City may reject any portion of the work that is deemed to be non-responsive to the Contract requirements or not in conformance with approved Contract Drawings and

submittals, and for other factors including the following:

1. Failed Bore: When there is any indication that the installed product has sustained damage, stop all work, notify the City and investigate damage. The City may require a pressure and / or mandrel test at no additional cost to the City and shall have a City representative present during the test. Perform all testing within 24 hours unless otherwise approved by the City. Furnish a copy of the test results and all bore logs to the City for review and acceptance. The City is allowed up to 5 working days to approve or determine if the product installation is not in compliance with the specifications.
2. Obstructions: If an obstruction is encountered during boring which prevents completion of the installation in accordance with the design location and specification, the pipe may be taken out of service and left in place at the discretion of the City.
3. Pull-back Failure: If the installed breakaway device should fail during pull back.
4. Loss of Drilling Fluids: If the drilling fluid is “lost” during the pull back of the product and cannot be regained within the required timeframe of the manufacturer or if more than a reasonable amount of fluid is used to fill an unknown void and flow cannot be regained. No pipe shall be pulled without visible flow of drilling fluid.
5. Test Failure: If the pipe shall fail a hydraulic pressure test or mandrel test as specified by the City.
6. Damaged Pipe: If at any time when the product is pulled back and any exposed areas have a greater than allowable “gouging” or visible marring of the pipe per the table in 3.08 G.
7. Alignment Tolerance Exceeded: If the vertical and horizontal limits are not within tolerances.
8. Defective Material: Any other defect in material or workmanship which would affect the quality, performance, or installation life of the installed pipeline.

B. Remediation: All rejected bores shall be at the Contractor’s expense to correct and provide a satisfactory installed product. The Contractor shall submit to the City a revised installation plan and procedure for review and acceptance before resuming work. The City may require non-compliant installations to be filled with excavatable flowable fill or to be completely removed at no additional cost to the City.

13.09 PRODUCT LOCATING AND TRACKING

A. The City recognizes walkover, wire line, and wire line with surface grid verification, or any other system as approved by the City, as the accepted methods of tracking directional bores. Use a locating and tracking system capable of ensuring that the proposed installation is installed as intended. The locating and tracking system must provide information on:

1. Clock and pitch information
2. Depth
3. Transmitter temperature
4. Battery status
5. Position (x,y)

6. Azimuth, where direct overhead readings (walkover) are not possible (i.e. sub aqueous)

B. Ensure proper calibration of all equipment before commencing directional drilling operation.

C. Prepare the Driller's Log. Take and record alignment readings or plot points such that elevations on top of and offset dimensions from the center of the product to a permanent fixed feature are provided. Such permanent fixed feature must have prior approval of the City. Provide elevations and dimensions at all bore alignment corrections (vertical and horizontal) with a minimum distance between points of 10 feet. Provide a sufficient number of elevations and offset distances to accurately plot the vertical and horizontal alignment of the installed product.

13.10 PRODUCT BORE HOLE DIAMETER

Minimize potential damage from soil displacement/settlement by limiting the ratio of the bore hole to the product size. The size of the back reamer bit or pilot bit, if no back reaming is required, will be limited relative to the product diameter to be installed as follows:

Table 2-1. Recommended Relationship between Product Diameter and Reamed Diameter

Product Diameter	Reamed Diameter
< 8"	Diameter of product + 4"
8" – 24"	Diameter of product x 1.5
> 24"	Diameter of product + 12"
*Horizontal Directional Drilling Good Practices Guidelines – HDD Consortium	

13.11 EQUIPMENT REQUIREMENTS

A. The HDD equipment selected by the Contractor shall be capable of drilling, steering, tracking, reaming and installing the pipeline through all the subsurface conditions that may be present at the site.

B. Match equipment to the size of pipe being installed. Obtain the City's review and acceptance for installations differing from the above chart. Ensure that the drill rod can meet the bend radius required for the proposed installation.

C. All HDD equipment shall have an electronic data logger to record pull back force during all pipe installations.

D. All HDD equipment that has the capability to exceed the maximum recommended pulling force shall have a breakaway swivel properly attached to the product pipe that will release if the pullback force exceeds the pipe manufacturer's recommended pulling force.

13.12 THRUST / PULLBACK REQUIREMENTS

The Contractor shall provide as part of the required working drawings submittal complete data regarding the operational and maximum thrust or pulling forces to be used for the initial drill head and back-reamer installations, and the final pull-back of the pipe. Gages or other measurement tools shall be used to monitor the forces being used.

13.13 INSTALLATION PROCESS

A. Contractor shall contact the City and Engineer at least forty-eight (48) hours before each of the following activities:
   1. The setup of a drill rig pit,
   2. The start of the pilot bore,
   3. The pull back of the product pipe. Upon completion of the pilot-hole phase of the operation, a complete set of as-built records shall be submitted in duplicate to the Engineer. These records shall include copies of the plan and profile drawing, as well as directional readings recorded during the drilling operation.

B. Ensure adequate removal of soil cuttings and stability of the bore hole by monitoring the drilling fluids such as the pumping rate, pressures, viscosity and density during the pilot bore, back reaming and pipe installation. Relief holes can be used as necessary to relieve excess pressure down hole. Obtain the City's review and acceptance of the location and all conditions necessary to construct relief holes to ensure the proper disposition of drilling fluids is maintained and unnecessary inconvenience is minimized to other facility users.

C. At all times during the pilot bore the Contractor shall provide and maintain a bore tracking system that is capable of accurately locating the position of the drill head in the x, y, and z axes. The Contractor shall record these data at least twice per drill pipe length or every fifteen (15) feet, whichever is more frequent.

   1. Contractor shall monitor and record x, y, and z coordinates relative to an established surface survey benchmark, from downhole survey data using downhole wireline system. "Tru-Tracker" energized surface grid, or equivalent, shall be installed and used to supplement the wireline system. The "Tru-Tracker" grid shall encompass the entire area of the bore including underwater across the water. Alternatively, the Contractor may propose fixed "TruTracker" grids on land outside the waterway, supplemented by moveable grids on floating templates that can be temporarily anchored and surveyed while drilling the pilot hole. The moveable template should be sufficiently large to encompass the active drilling area for a two hour drilling period and should be at least as wide as the maximum depth of the bore. The grids shall be surveyed to establish horizontal and vertical position to 0.1 feet accuracy. The data shall be continuously monitored and recorded at least twice per drill pipe length or every fifteen (15) feet, whichever is most frequent.

   2. Deviations between the recorded and design bore path shall be calculated and reported on the daily log. If the deviations exceed tolerances specified

elsewhere, such occurrences shall be reported immediately to the City and Engineer. The Contractor shall undertake all necessary measures to correct deviations and return to design line and grade.

3. Drilling fluid pressures and flow rates shall be continuously monitored and recorded by the Contractor. The pressures shall be monitored at the pump and within the annular space with a downhole pressure-sensing tool located within thirty (30) feet of the drilling head.

4. Maximum allowable drilling speeds shall be calculated by the Contractor for pilot boring and each reaming pass and shall not be exceeded for pilot boring or reaming passes. Measurements shall be taken every fifteen (15) feet.

5. The Contractor shall measure and record drilling fluid viscosity and density at least three times per shift with at least two hours between readings, using calibrated Marsh funnel and mud balance. These measurements shall be included in daily logs submitted to the Engineer. The Contractor shall document modifications to the drilling fluids, by noting the types and quantities of drilling fluid additives and the dates and times when introduced. The reason for the addition of drilling fluid additives or other modifications shall be documented and reported.

6. The Contractor shall measure and record the pH on a regular basis (three times per shift with at least two hours between readings) with pH strips, paper or a pH meter.

7. The drilling fluid report shall include desired mud properties including weight, viscosity in cP, yield point in lb/100 sf, measured mud weight, funnel viscosity, plastic viscosity, fluid loss, % solids, chlorides, and detailed log of type and quantity of bentonite and all additives.

8. The Contractor shall constantly monitor and record the circulating volume, particularly for the early detection of drilling fluid losses, or thinning, or the danger of borehole collapse. Ground upheavals can also be detected early from such differences, and necessary action can be implemented to prevent further damage.

9. The Contractor shall constantly monitor and record the solid (sand) content to assure there is no significant increase, which can diversely impact efficiency of the circulations system.

D. The Contractor shall determine the pull-back rate in order to allow the removal of soil cuttings without building excess down-hole pressure and to avoid local heaving, or spills. Contain excess drilling fluids at entry and exit points until they are recycled and separated from excavated materials or removed from the site or vacuumed during drilling operations. Ensure that entry and exit pits and storage tanks are of sufficient size to contain the expected return of drilling fluids and soil cuttings. The bored hole shall always be maintained full of drilling fluids for support of surfaces, and the fluid re-circulation equipment shall operate continuously until the pipe installation is completed

and accepted by the City.

E. Ensure that all drilling fluids are disposed of or recycled in a manner acceptable to the appropriate local, state, or federal regulatory agencies. When drilling in suspected contaminated ground, test the drilling fluid for contamination and appropriately dispose of it. Remove any excess material upon completion of the bore. If in the drilling process it becomes evident that the soil is contaminated, contact the City immediately. Do not continue drilling without the City's approval.

F. The timing of all boring processes is critical. Install a product into a bore hole within the same day that the pre-bore is completed to ensure necessary support exists. Once pullback operations have commenced, the operation shall continue without interruption until the pipe is completely pulled into the borehole.

G. All prepared pipe that is being used for installation shall be adequately supported off the ground along the entire length to avoid damaging of the material during pullback due to ground surface conditions. Surface cuts or scratches greater than or equal to the maximum defect depth are not acceptable.

Pipe Size In.	Max. Defect Depth In.
4	1/16
6	1/11
8	5/32
10	3/16
12	1/4
> 12	Per Pipe Manufacturer's Recommendations

H. The drilling fluid specialist shall remain on the project site during the entirety of the directional boring operation to ensure proper mixture and production of drilling fluids needed for the bore.

I. Upon successful completion of the pilot hole, the borehole shall be reamed to a minimum of 25 percent greater than the outside diameter of the pipe being installed.

J. For bores with more than two radii of curvature (entrance and exit), the borehole should be reamed up to 50 percent larger than the outside diameter of the carrier pipe. Prereaming may be necessary dependent on size of material to be pulled.

K. Additional passes for prereaming may be required for larger pipe. Incremental increases shall be used as needed until appropriate bore hole size has been achieved.

L. Prereaming must be accomplished with no product attached to the reamer head on all bore pipe 6-inches and larger. The bore product may be pulled back on final pass of prereaming upon prior approval from the City.

M. After reaming the borehole to the required diameter, the pipe shall be pulled through the hole. In front of the pipe shall be a breakaway swivel and barrel reamer to compact the borehole walls.

N. The Contractor shall not ream at a rate greater than the drilling equipment and drilling fluid system are designed to safely handle.

O. Install all piping such that their location can be readily determined by electronic designation (tracer wire) after installation.

1. For all pipe installations, externally attach two (2) tracer wires; to the top of product pipe and secure in place with duct tape or 10-mil thickness polyethylene pressure sensitive tape at every joint and at 5 foot intervals.

P. Connect any break in the conductor line before construction with an electrical clamp, or solder, and coat the connection with a rubber or plastic insulator to maintain the integrity of the connection from corrosion. Clamp connections must be made of brass or copper and of the butt end type with wires secured by compression. Soldered connections must be made by tight spiral winding of each wire around the other with a finished length minimum of 3 inches overlap. Tracking conductors must extend 2 feet beyond bore ends. Test conductors for continuity. Each conductor that passes must be identified as such by removing the last 6 inches of the sheath. No deductions are allowed for failed tracking conductors. Upon completion of the directional bore, the Contractor shall demonstrate to the City that the wire is continuous and unbroken through the entire run of the pipe by providing full signal conductivity (including splices) when energizing for the entire run in the presence of the City Representative. If the wire is broken, the Contractor shall repair or replace it at no additional cost to the City.

Q. The pilot bore shall follow the design path of the bore shown on the Drawings:

1. Horizontal and vertical deviations shall be less than plus or minus three feet from the design path centerline. The Contractor shall continuously monitor horizontal and vertical position and record the position at least twice per drill pipe length, or at fifteen (15) feet intervals, whichever is most frequent.
2. The radius of curvature shall not be less than that shown on the Drawings. The radius of curvature shall be calculated over the distance of three drill pipe sections. If design radius of curvature is exceeded, the Contractor shall re-drill the pilot hole at no extra cost to the contract.
3. The location of the entry and exit points shall be as shown on the Drawings. The Contractor shall be solely responsible for all work necessary to correct excessive deviations from line and grade, including re-drilling, redesigning connections, and acquiring additional easement, at no additional cost to the Owner and without schedule extension.

R. Inadvertent Returns (Frac-Outs) and planned returns (at relief wells):

1. Contractor shall be responsible for avoiding any impact to existing utilities, structures, facilities, pools, and waterways in the Project area during the drilling operation. If the drilling fluid starts leaking to the surface (other than at the entry and exit points or relief wells), or if fluid loss results in surface movement, Contractor shall cease drilling until fluid loss volumes can be brought under control to minimize any inadvertent returns in the Project area. In such event, notify Engineer immediately. The Contractor shall clean up any locations where

drilling fluid surfaces, including releases at relief well locations. Contractor shall pay particular attention to the potential of inadvertent returns washing out along existing utility crossings and shall have preventive measures in place to prevent these occurrences from happening. Contractor shall be fully responsible for all damages caused by the force main installation operations. The pilot bore shall be pre-reamed and reamed using equipment and methods submitted by the Contractor. The Contractor shall completely ream the borehole to the final diameter prior to pull back, when practical or as directed by the Engineer.

O. The Contractor shall perform hydrostatic water pressure test in accordance with the manufacturer's guidelines prior to product pipe pullback.

13.14 PIPELINE TESTING

A. Hydrostatic Testing
   1. Refer to Specifications for pipe material.

B. Mandrel Deflection Testing Process

   1. The deflection test for flexible pipe systems shall be performed by pulling a mandrel through the pipeline. The mandrel shall have a diameter equal to 80 percent of the inside diameter of the pipe system being tested. When the mandrel cannot be pulled through the pipeline the Contractor shall locate and correct the defect to the satisfaction of the City. After the defect is corrected and trench backfilled, the section of line shall then be retested to compliance.

   2. Deflection tests shall be performed not sooner than 24 hours after completion of the pipe pull-back. The Contractor shall take measures to ensure the pipe is clean as not to interfere with the mandrel test.

   3. The mandrel types that can be used are:

      a. a rigid, nonadjustable, odd number of legs (9 legs minimum), mandrel having an effective length not less than its nominal diameter; and to be fabricated of steel, fitted with pulling rings at each end, stamped or engraved on some segment other than a runner indicating the pipe material specification, nominal size and be furnished in a suitable carrying case labeled with the same data as stamped or engraved on the mandrel.

      b. If approved by the City, a smaller diameter piece of similar material that is approximately double the nominal diameter in length and meets the 80% reduction of the inside diameter of the pipe being tested. The pipe length may need to be adjusted to ensure the pipe section cannot become skewed and become lodged; this may cause the test to fail.

   4. The mandrel shall be pulled through the pipe by hand to ensure that maximum allowable deflections have not been exceeded or that "necking" has not occurred. Prior to use, the mandrel shall be inspected by City personnel. Use of an unapproved mandrel or a mandrel altered or modified after inspection will

invalidate the test. If the mandrel fails to pass, the pipe will be deemed over deflected or necked.

5. Over deflected or necked pipe shall be abandoned and reinstalled. The replaced pipe shall be tested for deflection not sooner than 24 hours after installation.

C. The following deficiencies in the flexible pipe system installation shall be corrected by the Contractor at no cost to the City:

1. Over deflections
2. Stretched or “Necked” Pipe
3. Damaged Pipe
4. Improper Pipe Welds
5. Infiltration Points
6. Debris in the line

D. The City will not accept a credit, maintenance bond, or any other form of compensation in lieu of corrective measures that may be required to correct any sections of flexible pipe system that are improperly installed or do not meet the requirements of these specifications. In addition, all corrective measures proposed by the Contractor shall be approved by the City. In addition, should repairs of the flexible pipe system be accomplished by the use of any unauthorized materials or procedure, the City will require replacement of those substandard portions or repairs made to conform to the requirements of these specifications.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 14 - JACKING AND BORING

14.01 SCOPE OF WORK

The Contractor shall furnish all labor, equipment, materials and incidentals required to install road or railroad crossings as shown on the Contract Drawings and as specified herein.

The Contractor is responsible for verifying the location of all utilities in the ground before commencing the jack and bore operation. No compensation will be allowed for labor or materials for unused casing. The Contractor will be responsible for all damage incurred to roadways or utilities by his operation.

14.02 OPERATIONS IN THE CITY OF ST. PETE BEACH OR STATE OF FLORIDA PROPERTY

All work affecting The City of St. Pete Beach, Florida Department of Transportation (FDOT), any other governmental agency's right-of-way or facilities, or railroad right-of-way shall be carried out to the full satisfaction of the applicable Department's authorized representative. The Contractor shall be responsible to meet any and all requirements of the Department of Transportation, railroad, or other agency pertaining to the specific project and shall conduct all his work accordingly.

Prior to the start of the jacking operation, a detailed jacking plan shall be submitted to the City for review and acceptance. No work shall be permitted until the submittals are accepted.

Prior to construction, a minimum of three (3) working days written notice prior to start of the actual work shall be given to the City and to the FDOT or other applicable agency.

A Bore Path Report shall be submitted with in three (3) days of completion of the bore.

The Contractor shall install, maintain and leave in place any sheeting, underpinning, cribbing and other related items (other than that required for the jacking pits) to support any structures or facility on the right-of-way owned by either The City of St. Pete Beach, FDOT or other governmental agency or railroad entity. The Contractor, at his expense, may be directed by FDOT, other applicable agency, or the City, to leave sheeting in place.

The Contractor shall perform all necessary soil test borings to determine actual soil conditions and shall utilize the results of said borings to determine the procedures required for each jack and bore operation, including, but not limited to, the presence of rock and necessary dewatering requirements.

No wires, equipment, or other appurtenances shall be permitted to be placed across or pass across State property without the express written permission of FDOT’s authorized representative.

All equipment used by the Contractor on State property may be inspected by the State and shall not be used if it is deemed unsatisfactory by an authorized State representative. State

highways shall be kept free of obstructions at all times.

No blasting shall be permitted under or adjacent to any State highways.

The Contractor shall be responsible for all damages arising from his negligence or failure to comply with any State or The City of St. Pete Beach regulations or requirements or deviations from the Contract Documents.

All State highway crossings shall be performed and completed in a manner fully satisfactory to the Department of Transportation and The City of St. Pete Beach.

14.03 SHOP DRAWINGS

The Contractor shall furnish working drawings showing all fabrication and construction details for the jacked crossings.

14.04 SUBMITTALS

Contractor shall submit a Jacking Plan that includes the following:

1. Site layout plan for entry and exit pit locations, drawn to scale, depicting the position of all required equipment, access points, existing facilities to remain in place, existing traffic lanes to be maintained in operation, and storage sites.
2. Qualification information on jack/bore contractor.
3. Manufacturer's information on equipment to be used.
4. Methods and materials for retaining walls for jacking and receiving pits.
5. Bore Report that details final alignment, dimensions, and record documentation.

14.05 CASING PIPE

All casings shall be installed accurately to line and grade and shall meet all requirements of the prevailing rights-of-way holder. Casings shall be new and of domestic material and manufacture.

Pipe casing shall be welded steel conforming to the requirements of AWWA C200 and ASTM A-139,Grade B. The pipe shall be coated internally and externally with Tnemec 46H-413 Hi-Build Tneme-tar per manufacturer's recommendations.

Joints shall be full penetration butt welded in accordance with the requirements of AWWA C206. The joints shall be double groove welded with continuous circumferential welds and field lined and coated in accordance with AWWA C203.

All casings shall be in conformance with the specifications as shown on the plans and detail sheets.

14.06 CARRIER PIPE

All carrier pipe shall be Class 50 ductile iron pipe with joint restraints or fully restrained PVC pipe.

14.07 CASING SPACERS

The carrier pipe shall be installed in the casing on spacer skids. The supports shall be dimensioned to center the carrier pipe in the casing with a top clearance of one-half inch. The height of the supports and runners combined shall be sufficient to provide not less than three-quarter inch between the casing pipe and outside diameter of the carrier pipe joints.

Adequate casing spacers shall be provided to properly support the carrier pipe and maintain pipe deflection within the pipe manufacturer's requirements. In any case, not less than three spacers for each individual length of carrier pipe shall be provided.

For metallic casing spacers, bolts, nuts, and washers shall be 316 stainless steel. Shell shall be min. 14 gauge 304 stainless steel. Risers shall be min. 10 gauge 304 stainless steel.

For metallic casing spacers, each shell shall be lined with a min. thickness of 0.090" ribbed PVC/EPDM extrusion with a min. Durometer "A" 85-90 hardness.

For metallic casing spacers, each riser shall have runners (bearing surfaces) made of ultra-high molecular weight polyethylene (UHMWPE) or glass filled polymer plastic to provide abrasion resistance and a low coefficient of friction.

For nonmetallic casing spacers, the runners (bearing surfaces) shall be of a projection type. The projections shall be made of preformed sections of HDPE or virgin polypropylene and shall conform to ISO 9001:2000 for strength and quality. The casing spacers shall be sized in accordance to the manufacturer's recommendations.

14.08 TUNNEL LINER PLATES

Tunnel liner plates shall be asphalt coated galvanized steel plates. The Contractor shall submit plans signed and sealed by a registered Engineer in the State of Florida and written installation procedures with his request for approval.

14.09 CASING END SEALS

Contractor shall provide properly sized rubber end seals to completely close both openings on either side of the casing.

Ends seals shall be pull on (seamless) or wrap around with 316 stainless steel straps for securing to the carrier pipe and the casing.

The seals shall have min. thickness of 1/8 inch of specially compounded synthetic rubber.

14.10 CONSTRUCTION

The Contractor shall provide all labor, material, equipment and appurtenances required for jacking the casing pipe beneath the roadway or railroad tracks. The casing pipe shall be welded steel pipe and jacked in one continuous operation at the locations shown on the drawings. Once the operation starts, jacking shall not be discontinued. Proper alignment and elevation of the casing pipe shall be consistently maintained throughout the jacking operation. The casing pipe shall be installed by jacking and to the length shown on the plans.

The installation of the casing and boring at the head of the casing shall be one simultaneously. Track guides of sufficient length to carry the power unit and pipe installation shall be used, in order to maintain proper line and grade of the casing. Surplus and unsuitable excavated material shall be disposed of by the Contractor.

The Contractor shall shore the jacking pits with sheeting or such other materials as required. Sheeting shall be driven to a sufficient depth below the invert of the steel casing pipe to resist any pressure developed by the soil outside the jacking pit. Sheeting shall terminate not less than 3-feet, 6-inches above existing grade. The Contractor shall install adequate protective railing or temporary fences around the pits within the crossing right-of-way at all times during construction.

The sections of casing pipe shall be field welded in accordance with the applicable portions of AWWA C206 for field welded water pipe joints. Steel casing pipes shall receive one (1) internal and external coat of Tnemec 46H-413 Hi-Build Tneme-tar applied in accordance with manufacturer's recommendation.

All surfaces shall be smooth and uniform without bulges, dents, or warping of lengths, and only new pipe shall be used. Finished lengths of pipe shall be furnished with beveled cut ends to facilitate proper welding of transverse joints. The diameter and wall thickness of the pipe shown on the drawings is the minimum required and no extra compensation shall be claimed by the Contractor if a larger and thicker pipe is used. It will be the Contractor's responsibility in the event that the casing does buckle or collapse during these operations.

At the completion of the jacking operations, the Contractor shall be required to leave all sheeting in place. The top of the sheeting shall be cut off 36-inches below finished grade.

The Contractor shall be responsible for preventing voids outside the casing pipe. Should they occur, the Contractor may be directed to fill them with grout in a method approved by the City. The Contractor shall exercise care in the sleeve removal to prevent voids.

The Contractor shall be responsible for furnishing, installing and removing the thrust block or restraint which was employed in driving the sleeve forward. No additional payment for the jacking restraint shall be made other than the unit price for this item. The entire jacking operation shall be discussed and accepted by the City prior to commencing jack and bore operation. After completion, the backup structures shall be removed in part or whole to permit construction of the pipeline in the sleeve.

Tunneling for the installation of large carrier pipe may be substituted for jacking and boring

when approved by the Engineer.

14.11 INSTALLING CARRIER PIPE IN CASING PIPE

The Contractor shall install the carrier pipe in full conformity with the Contract Documents. The pipe shall be installed to the lines and grades required within the casing pipe and placed to the acceptance of the City. The carrier pipe shall be braced to the side and the top of the casing pipe to prevent flotation or motion.

A bulkhead or rubber end seals shall be placed at each end of the casing pipe to keep the surrounding soil and material from migrating into the voids of the casing pipe.

14.12 TESTING

The pipe shall be tested as provided in the Contract Documents.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 15 - FLUSHING, TESTING AND DISINFECTION

15.01 SCOPE OF WORK

A. Flushing, Pressure Testing, and Disinfection of systems including, but not limited to, the pipelines shown in the Contract Documents.

B. Contractor shall furnish all necessary pumps, hoses, piping, fittings, meters, gauges, chemicals and labor to conduct specified testing.

C. Testing shall be repeated at the Contractor's expense until satisfactory results are achieved.

15.02 REFERENCES

A. AWWA C651 - Standard for Disinfecting Water Mains.

B. UNI-B-6 - Recommended Practice for Low-Pressure Air Testing of Installed Sewer Pipe

C. ASTM F1417 - Standard Test Method for Installation Acceptance of Plastic Gravity Sewer Lines Using Low-Pressure Air

D. AWWA C600 – Standards for Installation of Ductile-Iron Water Mains and Their Appurtenances.

E. AWWA C605 - Standard for Underground Installation of Polyvinyl Chloride (PVC) Pressure Pipe and Fittings for Water.

F. ASTM 2164 - Standard Practice for Field Leak Testing of Polyethylene (PE) and Crosslinked Polyethylene (PEX) Pressure Piping Systems Using Hydrostatic Pressure

15.03 SUBMITTALS

A. Test Reports: Indicate results comparative to specified requirements. Submit two (2) copies of test results to Engineer in accordance with Submittal specifications.

B. Final approval of the bacterial samples shall be received from the Florida Department of Environmental Protection prior to the time that the system is placed into operation. Sampling procedures shall be done in accordance with FDEP requirements.

C. Bacteriological sampling locations shall meet FDEP requirements and be taken where shown on the drawings and as directed by the Engineer at no additional cost to Owner. Costs for all bacteriological testing shall be borne by the Contractor.

15.04 QUALITY ASSURANCE

A. Perform Work in accordance with these specifications, applicable utility provider standards, and the applicable reference standards listed in Section 1.03 above.

15.05 REGULATORY REQUIREMENTS

A. Conform to applicable FDEP requirements for performing the work of this Section.

15.06 DISINFECTION CHEMICALS

A. Chemicals: The disinfecting agent shall be sodium hypochlorite solution ANSI/AWWA B303 or liquid chlorine ANSI/AWWA B301. Dry hypochlorite, similar to "HTH" or equal may also be used as the disinfecting agent. Bleach or Clorox is not acceptable.

15.07 FLUSHING AND PRESSURE TESTING - PIPING

The Contractor shall furnish and install suitable temporary testing plugs or caps for the water lines, all necessary pressure pumps, hose, pipe connections, meters, gauges and other similar equipment, and all labor required, all without additional compensation for conducting pressure and leakage tests and flushing of the new water lines. Flushing and pressure testing shall be conducted in the following order:

A. After all piping lines have been installed and before pressure testing and final connections to equipment, each run of pipe shall be thoroughly flushed so as to remove all debris and foreign matter from the piping and equipment. Clean and flush all piping using potable water. Cleaning and Flushing shall be achieved by pigging with two (2) polyurethane foam pigs as manufactured by Girard Poly-Pig Inc. or "an approved equal". For watermain installation, the Contractor must ensure that there will be no contaminated water re-entering the main where the pig is flushed out, or it will be re-pigged at the Contractor's expense. Each pig will run through the line prior to running the second pig. On short runs (100 feet or less), or small lines (less than 4"), cleaning shall be accomplished by flushing with a minimum velocity of 2.5 feet per second. Contractor shall furnish and install required pig launch and exit assemblies. Non-abrasive pigs shall be employed. Flushed water may be discharged to the closest public catch basins and be coordinated with the City. Contractor to provide means of discharging water to catch basins at Contractor's expense.

B. Pressure and leakage tests shall be conducted in the presence of the Engineer, or his representative. All pressure mains, fittings, water services, and appurtenances shall undergo pressure and leakage tests. The Contractor will provide all necessary apparatus including a suitable pressure gage, pump, measuring device, piping connections and fittings and the necessary labor to conduct the test. Leakage is defined as the quantity of water added to the pipe being tested during the test period. The Contractor shall submit to the Engineer the testing pattern he proposes to follow prior to testing for the Engineer's approval. The Contractor shall not test more than 1,500 feet of pipe in a single test without approval from the Engineer.

C. In preparation for pressure testing the following parameters must be followed:

1. All air must be vented from the pipeline prior to pressurization. This may be accomplished with the use of the air relief valves or corporation stop valves, vent piping in the testing hardware or end caps, or any other method which adequately allows air to escape the pipeline at all high points. Venting may also be

accomplished by 'flushing' the pipeline in accordance with the parameters and procedures as described in AWWA C600/C605.

2. The pipeline must be fully restrained prior to pressurization. This includes complete installation of all mechanical restraints per the restraint manufacturer's guidelines, whether permanent or temporary to the final installation. This also includes the installation and curing of any and all required thrust blocking. All appurtenances included in the pressure test, including valves, blow-offs, and air-relief valves shall be checked for proper installation and restraint prior to beginning the test.
3. Temporary pipeline alignments that are being tested, such as those that are partially installed in their permanent location shall be configured to minimize the amount of potentially trapped air in the pipeline.

15.07.01 PRESSURE TESTING DUCTILE IRON AND PVC PIPING SYSTEMS:

1. The test pressure for piping constructed of ductile iron and PVC pipe shall be a minimum of 150 psi and this pressure shall be maintained for a period of not less than two hours. Tests shall be made between valves and as far as practicable and as approved by the Engineer. Potable water from the distribution system shall be used. Pressure shall not vary more than five (5) psi for piping during the test periods or as approved by the Engineer. Additionally, allowable leakage shall be computed on the basis of AWWA C-600, C-605 where practical.
2. All leaks evident at the surface shall be uncovered and repaired regardless of the total leakage as indicated by the test, and all pipes, valves and fittings and other materials found defective under the test shall be removed and replaced at the Contractor's expense. Tests shall be repeated until leakage has been reduced below the allowable amount.
3. Should, in the judgment of the Engineer, it not be practical to follow the foregoing procedures exactly for any reason, modifications in the procedure shall be made as approved by the Engineer and the City.

15.07.02 PRESSURE TESTING HDPE PIPING SYSTEMS:

1. The HDPE pipe installed by the directional drill method shall be pressure tested after the entire length is installed.

2. The test pressure for all piping systems shall be a minimum of 150 psi and this pressure shall be maintained for a period of two hours. Testing procedure shall be in accordance with ASTM F2164 and generally as follows.

    a. Take safety precautions as required and as specified in ASTM F2164.
    b. Completely fill pipe with clean water and remove all air from pipe to be tested.
    c. Allow water in pipe to equalize to a common temperature with surrounding ground/groundwater for 24 hours
    d. With air removed and temperature equalized, gradually bring pipe being tested to test pressure plus 10 psi. If test pressure cannot be achieved, discontinue testing and correct fault.

e. Add make-up liquid as required to maintain test pressure plus 10 psi over a 4 hour period.
f. Test Phase - Immediately following the end of the 4 hour period, reduce pressure by 10 psi and monitor pressure for 1 hour. Do not increase pressure or add make up water.
g. Pass/Fail Criteria - If no leakage is observed, and pressure during the test phase remains steady (within 5% of the test pressure) for the 1 hour test phase period, a passing test is indicated.
h. Retesting – If retesting is necessary, depressurize the test section in accordance with ASTM F2164 and correct any faults. Do not attempt to correct any faults while the system is under pressure.
i. Allow the test section to "relax" for at least 8 hours before re-pressurizing. After the relaxation period, repeat the initial expansion and test phases as described above.
j. All leaks shall be repaired regardless of the total leakage as indicated by the test, and all pipes, valves and fittings and other materials found defective under the test shall be removed and re placed at the Contractor's expense. Tests shall be repeated until leakage has been reduced below the allowable amount.
k. All visible leaks shall be repaired regardless of the total leakage as indicated by the test, and all pipes, valves and fittings and other materials found defective under the test shall be removed and replaced at the Contractor's expense. Tests shall be repeated until leakage has been reduced below the allowable amount.
l. Should, in the judgment of the Engineer, it not be practical to follow the foregoing procedures exactly for any reason, modifications in the procedure shall be made as approved by the Engineer. In any event, the Contractor shall be responsible for the ultimate tightness of the watermain within the preceding requirements.

15.07.03 PRESSURE TESTING FUSIBLE PVC SYSTEMS:

1. Fusible PVC pipe installed by the directional drill method shall be pressure tested after the entire length is installed.

2. The test pressure for the water piping constructed fusible PVC pipe shall be a minimum of 150 psi. This pressure shall be maintained for a period of not less than two hours. Tests shall be made between valves and as far as practicable and as approved by the Engineer. Potable water from the distribution system shall be used. Pressure shall not vary more than five (5) psi for piping during the test periods or as approved by the Engineer. Additionally, allowable leakage shall be computed on the basis of AWWA C-600, C-605 where practical.

3. All leaks evident at the surface shall be uncovered and repaired regardless of the total leakage as indicated by the test, and all pipes, valves and fittings and other materials found defective under the test shall be removed and replaced at the Contractor's expense. Tests shall be repeated until leakage has been reduced below the allowable amount.

4. Should, in the judgment of the Engineer, it not be practical to follow the foregoing procedures exactly for any reason, modifications in the procedure shall be made as approved by the Engineer and the City. In any event, the Contractor shall be responsible for the ultimate water tightness of the piping within the preceding requirements

15.07.04 LEAKAGE TESTING FOR NON-PRESSURE PIPING

A. Gravity sanitary sewers need to be tested for leakage.

B. Gravity sanitary sewer leakage testing may include appropriate water or low pressure air testing. The leakage outward or inward (exfiltration or infiltration) shall not exceed 25 gallons per inch of pipe diameter per mile per day for any section of the system. An exfiltration or infiltration test shall be performed with a minimum positive head of two feet. The air test, if used, shall be conducted in accordance with one of the following Standards:

1. ASTM F1417
2. UNI-B-6

C. The testing method selected shall properly consider the existing groundwater elevations during the test.

15.07.05 DEFLECTION TESTING FOR NON-PRESSURE PIPING

D. After completion of the backfill, the engineer or owner may require that a deflection test be performed.

E. Deflection tests should be conducted using a go/no-go mandrel. The mandrel's outside dimension shall be sized to permit no more than 7.5 percent deflection. The percent deflection shall be established from the base inside diameter of the pipe. If the internal beading of the fused joints for the pipe is not required to be removed, the mandrel shall account for this clearance as well. The mandrel shall be approved by the owner or engineer prior to use. Lines that permit safe entry may allow other deflection test options, such as direct measurements.

15.08 DISINFECTION FOR WATER MAIN INSTALLATION

A. The Contractor shall furnish and install suitable temporary connections to the piping, all necessary pressure pumps, hose, pipe connections, meters, gauges and other similar equipment, and all labor required, all without additional compensation for the disinfection of all required potable water piping systems. Disinfection shall be in accordance with the City. If no standards exist, disinfection shall be conducted on the following systems in the following manner:

1. All relocated and new potable water and private fire line piping.

B. Conform to AWWA Standards and as modified herein.

C. Maintain disinfectant for a minimum of 8 hours in such a manner that the entire system will be filled with water containing a minimum chlorine concentration of 50 ppm at any point.

D. After the disinfecting agents have been permitted to remain for the specified contact periods, the water lines, and valves shall be thoroughly flushed with water until the residual chlorine tests are less than 4 PPM in each instance. The determination of the amount of residual chlorine in the system shall be made at such points and in accord with standard tests by means of a standard orthotolodine test set.

E. Replace permanent system devices removed for disinfection.

15.09 BACTERIOLOGICAL SAMPLING FOR WATER MAIN INSTALLATION

A. It shall be the responsibility of the Contractor under this contract to perform the bacteriological testing required by the Florida Department of Environmental Protection and the City to obtain clearance of all piping. The Contractor shall be responsible to disinfect and repeat testing as needed until clearance is obtained for all required systems. The Contractor shall be responsible to pay for additional water needed if the bacteriological testing must be repeated.

B. The piping requires two (2) passing consecutive daily samples taken from the locations called out on the plans or as determined by the Engineer. The samples shall be taken concurrently at all the respective sample point locations.

C. Sampling must be coordinated with Engineer and other construction activities so as to minimize re-sampling.

D. Contractor shall submit schedule for bacteriological testing and pressure tests.

E. The Contractor shall incur all costs needed to provide bacteriological clearance of the piping systems.

F. If repeated tests of such samples show the presence of coliform organisms, the disinfection shall be repeated until tests indicate an absence of contamination.

15.10 QUALITY CONTROL

A. The laboratory and personnel collecting bacteriological samples shall be Florida State certified in accordance with FDEP requirements.

15.11 CONNECTIONS TO EXISTING MAINS

A. The Contractor shall make connections to existing mains as shown on the drawings only after the new mains have passed their pressure and leakage test and completed the disinfection and bacteriological clearance procedures as required.

END OF SECTION

SECTION 16 - SANITARY SEWER BYPASS PUMPING

16.01 SCOPE OF WORK

The Contractor shall furnish all labor, materials, equipment and incidentals required to maintain existing and anticipated flows within the affected portion of the collection system throughout the construction period.

16.02 PUBLIC IMPACTS

The contractor shall not create a public nuisance due to excessive noise or dust, nor impact the public with flooding of adjacent lands, discharge of raw sewage, or release of other potential hazards, nor shall he encroach on or limit access to adjacent lands. No extra charge may be made for increased costs to the contractor due to any of the above.

16.03 SUBMITTALS

The Contractor shall, within 30 days of the date of the Notice to Proceed, submit to the Project Manager a detailed Bypass Pumping Plan for each site by-pass pumping will be needed. The Bypass Pumping Plan shall address all measures and systems to prevent a sanitary sewer overflow (SSO) as defined by the EPA. The Plan shall include as a minimum:

A. Working drawings and sketches showing work location, pump location, piping layout & routing. Show all proposed encroachment and access impacts on adjacent properties or facilities.
B. Pump, control, alarm and pipe specifications or catalog cuts. Detailed sketch of controls and alarm system.
C. Power requirements and details on methods to provide by-pass power or fueling.
D. Calculation and determination of response times to prevent an SSO after a high-water alarm.
E. Procedures to be taken in case of power, pump, or piping failures; including contact names and numbers for emergency notifications.
F. Frequency and specific responsibility for monitoring pump operation, fuel levels, pump maintenance and entire length of piping.

16.04 EQUIPMENT

A. Pumps:

1. By-pass pumping system shall consist of at least a primary pump and a backup pump. Each pump shall have a minimum pumping capacity of 150% of the anticipated peak flows. When bypassing a pump station, 150% of the lift station capacity (G.P.M. & T.D.H) shall be provided.
2. Pumps shall be low noise or sound attenuated. The noise level at any operating condition, in any direction, shall not exceed 70dBA at a distance of twenty-three (23) feet (7 meters) from the pump and/or power source.

B. Controls:

The by-pass pump system shall be equipped with automatic controls and an alarm system. The automatic controls will automatically start the backup pump in the event of a high-water condition or failure of the primary pump. The alarm system will immediately notify the Contractor of a pump failure or high-water condition.

C. Pipe:

Pipe shall be of adequate size and capacity to match the pumps. Pipe type and materials will depend on the particulars of the site conditions and shall be detailed in the Bypass Pumping Plan. Contractor will provide all connections.

16.05 SITE CONDITIONS

Site conditions will vary by site. Contractor is responsible to determine and address requirements such as traffic control, excavation, connections & fittings, impacts on access to adjacent properties, routing and support of by-pass piping, etc., in the Bypass Pumping Plan.

16.06 ON-SITE MONITORING

A. The Contractor shall have personnel experienced with the pumps and controls on site within the calculated response time to prevent an SSO after a high-water alarm.

B. During by-pass operations, the Contractor shall have posted on site with the permit, a copy of the approved Plan and the name and 24-hour contact number of the primary response person, the job site superintendent, and the construction company owner.

16.07 OPERATIONS

A. The Contractor is responsible for securing and providing power, fuel, site security, traffic control and all other supplies, materials and permits required for the by-pass pumping.

B. Contractor shall demonstrate automatic pump switching and alarm system to the satisfaction of the City of St. Pete Beach, prior to beginning by-pass pumping.

Satisfactory demonstration shall be documented by the engineer's, PM's or the City's dated signature on the posted copy of the approved Bypass Pumping Plan.

16.08 DAMAGE RESTORATION & REMEDIATION

A. The Contractor shall be responsible for any pre-pump notifications, all restoration of pre-pump conditions and any damage caused by by-pass operations.

B. Should there be an SSO caused by or as a direct result of the by-pass pumping, the contractor is responsible for all immediate & long term response, notifications, clean up, mitigation, etc. Copies of all written response plans, notifications, documentation, mitigation plans, etc., shall be submitted to the City.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 17 - VALVES AND APPURTENANCES

17.01 GENERAL

17.01.01 SCOPE OF WORK

The Contractor shall furnish all labor, materials, equipment and incidentals required and install complete and ready for operation all valves and appurtenances as shown on the Contract Drawings and as specified herein.

All valves and appurtenances shall be of the size shown on the Contract Drawings and, to the extent possible, all equipment of the same type on the Project shall be from one manufacturer.

All valves and appurtenances shall have the name of the manufacturer and the working pressure for which they are designed cast in raised letters upon some appropriate part of the body.

All valves shall have a factory applied, fusion bonded epoxy coating on interior and exterior unless noted otherwise in the Contract Drawings or the Specifications.

Any valve, unless otherwise specified, that is removed from the system shall become the property of the Contractor and he shall insure proper disposal.

The equipment shall include, but not be limited to, the following:

1. Gate valves (Sec. 17.03)
2. Pressure Sustaining and Check Valves (Sec. 17.04)
3. Ball Valves for PVC Pipe (Sec. 17.05)
4. Butterfly Valves (Sec. 17.06)
5. Plug Valves (Sec. 17.07)
6. Valve Actuators (Sec. 17.08)
7. Air Release Valves (Sec. 17.09)
8. Valves Boxes (Sec. 17.10)
9. Corporation Cocks (Sec. 17.11)
10. Flange Adapter Couplings (Sec. 17.12)
11. Flexible Couplings (Sec. 17.13)
12. Hose Bibs (Sec. 17.14)
13. Slow Closing Air and Vacuum Valves (Sec. 17.15)
14. Surge Anticipator Valve (Sec. 17.16)
15. Check Valves (Sec. 17.17)
16. Hydrants (Sec. 17.18)
17. Restraining Clamps (Sec. 17.19)
18. Tapping Sleeves and Tapping Valves (Sec. 17.20)
19. Single Acting Altitude Valves (Sec. 17.21)

17.01.02 DESCRIPTION OF SYSTEMS

All of the equipment and materials specified herein are intended to be standard for use in

controlling the flow of potable water, reclaim water, wastewater, etc., depending on the applications.

17.01.03 QUALIFICATIONS

All of the types of valves and appurtenances shall be products of well-established reputable firms who are fully experienced and qualified in the manufacture of the particular equipment to be furnished. The equipment shall be designed, constructed and installed in accordance with the best practices and methods and shall comply with these Specifications as applicable. Valves shall be as covered under mechanical devices in Section 8 of ANSI/NSF Standard 61.

17.01.04 SUBMITTALS

Submittals shall conform to the following:

A. Submit to the City within 30 days after execution of the contract a list of materials to be furnished, the names of the suppliers and the date of delivery of materials to the site.

B. Complete shop drawings of all valves and appurtenances shall be submitted to the City and Engineer for review and acceptance in accordance with the Specifications.

17.02 TOOLS

Special tools, if required for normal operation and maintenance shall be supplied with the equipment.

17.03 GATE VALVES

Gate Valves shall conform to the following:

A. All buried valves shall have cast or ductile iron three (3) piece valve bodies.

B. Where indicated on the Contract Drawings or necessary due to locations, size, or inaccessibility, chain wheel operators shall be furnished with the valves. Such operators shall be designed with adequate strength for the valves with which they are supplied and provide for easy operation of the valve. Chains for valve operators shall be galvanized.

C. Where required, gate valves shall be provided with a box cast in a concrete slab and a box cover. Length of box shall include slab thickness. Box cover opening shall be for valve stem and nut. Valve wrenches and extension stems shall be provided by the manufacturer to actuate the valves. The floor box and cover shall be equal to those manufactured by Rodney Hunt Machine Company, Orange, Massachusetts, Clow, DeZurik or approved equal.

D. Gate valves with 3inch-20inch diameters shall be resilient seated, manufactured to meet or exceed the requirements of AWWA C509 or C515 and UL/FM of latest revision and in accordance with the following specifications. Valves shall have an unobstructed waterway equal to or greater than the full nominal diameter of the valve.

E. Wrench nut shall be provided for operating the valve.

F. Valves shall be suitable for an operating pressure of 200 psi and shall be tested in accordance with AWWA C509 or C515. Mueller, Kennedy, M&H, and Clow are acceptable valves.

G. All bonnet bolts, nuts and studs shall be stainless steel.

17.04 PRESSURE SUSTAINING AND CHECK VALVE

Pressure sustaining and check valves shall conform to the following:

A. Pressure sustaining and check valve shall be pilot operated diaphragm actuated valve with cast iron body, bronze trim, and 125-pound flanged ends. The valve shall be hydraulically operated, diaphragm type globe valve. The main valve shall have a single removable seat and a resilient disc, of rectangular cross section, surrounded on three and a half sides. The stainless-steel stem shall be fully guided at both ends by a bearing in the valve cover, and an integral bearing in the valve seat. It shall be sleeved at both ends with delrin. No external packing glands are permitted and there shall be no pistons operating the main valve or any controls. The valve shall be equipped with isolation cocks to service the pilot system while permitting flow if necessary. Main valve and all pilot controls shall be manufactured in the United States of America. Valve shall be single chamber type, with seat cut to 5 degrees taper.

B. Valve shall maintain a minimum (adjustable) upstream pressure to a preset (adjustable) maximum. The pilot system shall consist of two direct acting, adjustable, spring loaded diaphragm valves.

C. Valve shall be cast iron (ASTM A48) with main valve trim of brass (QQB-B-626) and bronze (ASTM B61). The pilot control valves shall be cast brass (ASTM B62) with 303 stainless steel trim. All ferrous surfaces inside and outside shall have a 2-part epoxy coating. Valve shall be similar in all respects to CLA-VAL Company, Model 692G-01ABKG, as manufactured by CLA-VAL Company, Winter Park, Florida, or similar pressure sustaining and check valve as manufactured by Golden Alderson; or approved equal.

17.05 BALL VALVES FOR PVC PIPE

Ball valves shall conform to the following:

A. Ball valves for PVC pipe shall be of PVC Type 1 with union, socket, threaded or flanged ends as required. Ball valves shall be full port, full flow, all plastic construction, 150 psi rated with Teflon seat seals and T-handles. PVC ball valves shall be as manufactured by Celanese Piping Systems, Inc., Wallace and Tiernan, Inc., Plastiline, Inc., or approved equal.

B. All valves shall be mounted in such a position that valve position indicators are plainly visible when standing on the floor.

17.06 BUTTERFLY VALVES

Butterfly valves shall conform to the following:

A. Butterfly valves shall conform to the AWWA Standard Specifications for Rubber Seated Butterfly Valves, Designated C504, except as hereinafter specified. Valves, except as specified hereinafter, shall be Class 150A or B, except that valves furnished downstream of the high service pumps shall be Class 250 and equal to those manufactured by Henry Pratt Company, DeZurik, Mueller, or approved equal. M&H/Kennedy/Clow are not generally approved equals. Ductile iron conforming to ASTM A536, Grade 65-45-12 shall be provided for all Class 250 valves. All valves shall be leak tested at 200 psi.

B. The face-to-face dimensions of flanged end valves shall be in accordance with Table 1 of above mentioned AWWA Specification for short-body valve. Adequate two-way thrust bearings shall be provided. Flange drilling shall be in accordance with ANSI B16.1.

C. Valve seats shall be an EPDM elastomer. Valve seats 24 inches and larger shall be field adjustable and replaceable without dismounting operator disc or shaft and without removing the valve from the line. All retaining segments and adjusting devices shall be of corrosion resistant material with stainless Nylock screws and be capable of the 1/8-inch adjustment. Valves 20 inches and smaller shall have bonded or mechanically restrained seats as outlined in AWWA C 504. Where the EPDM seat is mounted on the valve body, the mating edge of the valve disc shall be 18-8 stainless steel or Nickel-Chrome, 80-20%. Where the EPDM seat is mounted on the valve disc, the valve body shall be fitted with an 18-8 stainless steel seat offset from the shaft, mechanically restrained and covering 360 degrees of the peripheral opening or seating surface.

D. The valve body shall be constructed of ductile iron or close grain cast iron per ASTM A126, Class B with integrally cast hubs for shaft bearing housings of the through boss-type. Butterfly valves of the "wafer" or "spool" type will not be accepted.

E. The valve shaft shall be turned, ground, and polished constructed of 18-8, ASTM A-276, Type 304 stainless steel and designed for both torsional and shearing stresses when the valve is operated under its greatest dynamic or seating torque. Shaft shall be of either a one-piece unit extending full size through the valve disc and valve bearing or it may be of a stub shaft design. Shaft bearings shall be Teflon or nylon, self-lubricated type.

F. All valves shall be subject to hydrostatic and leakage tests at the point of manufacture. The hydrostatic test for Class 250 valves shall be performed with an internal hydrostatic pressure equal to 500 psi applied to the inside of the valve body of each valve for a period of five minutes. During the hydrostatic test, there shall be no leakage through the metal, the end joints or the valve shaft seal. The leakage test for the Class 250 valves shall be performed at a differential pressure of 230 psi and against both sides of the valve. No adjustment of the valve disc shall be necessary after pressure test for normal operation of valve. The Class 150 valves shall be tested in conformance with AWWA C-504.

G. In general, the butterfly valve operators shall conform to the requirements of Section 3.8 of the AWWA Standard Specifications for Rubber Seated Butterfly Valves, Designation C504, insofar as

applicable, and as herein specified.

H. Gearing for the operators shall be totally enclosed in a gear case in accordance with paragraph 3.8.3 of the above mentioned AWWA Standard Specification.

I. Operators shall be capable of seating and unseating the disc against the full design pressure of velocity, as specified for each class, into a dry system downstream and shall transmit a minimum torque to the valve. Operators shall be rigidly attached to the valve body.

J. The manufacturer shall certify that the required tests on the various materials and on the completed valves have been satisfactory and that the valves conform with all requirements of this Specification and the AWWA standard.

K. Where indicated on the Contract Drawings, extension stems, floor stands, couplings, stem guides, and floor boxes as required shall be furnished and installed.

17.07 PLUG VALVES

Plug valves shall conform to the following:

A. All plug valves shall be eccentric plug valves capable of sustaining 150 psi in either direction without leaking.

Exception: Single direction plug valves may be used if it is clearly demonstrated they will never be required to resist pressure in both directions either in service or during pipe line testing.

B. Plug valves shall be tested in accordance with current AWWA Standard C-504-80 Section 5. Each valve shall be performance tested in accordance with paragraph 5.2 and shall be given a leakage test and hydrostatic test as described in paragraphs 5.3 and 5.4. Plug valves shall be Kennedy or Dezurik.

C. Plug valves shall be of the non-lubricated eccentric type with resilient faced plugs and shall be furnished with end connections as shown on the Contract Drawings. Flanged valves shall be faced and drilled to the ANSI 150 lb. standard. Mechanical joint ends shall be to the AWWA Standard C111-72. Bell ends shall be to the AWWA Standard C100-55 Class B. Screwed ends shall be to the NPT standard.

D. Plug valve bodies shall be of ASTM A126 Class B Semi-steel, 31,000 psi tensile strength minimum in compliance with AWWA Standard C507-73, Section 5.1 and AWWA Standard C504-70 Section 6.4. Port areas for valves 20-inches and smaller shall be full port 100 percent of full pipe area. Valves 24-inch and larger shall have a minimum port area between 80 and 100 percent of full nominal pipe area. All exposed nuts, bolts, springs, washers, etc. shall be zinc or cadmium plated. Resilient plug facings shall be of Hycar or Neoprene.

E. Plug valves shall be furnished with permanently lubricated stainless steel or oil-impregnated bronze upper and lower plug stem bushings. These bearings shall comply with current AWWA Standards.

17.08 VALVE ACTUATORS

17.08.01 GENERAL

A. All valve actuators shall conform to Section 3.8 of the AWWA Standard Specification and shall be either manual or motor operated.

B. Actuators shall be capable of seating and unseating the disc against the full design pressure and velocity, as specified for each class, into a dry system downstream, and shall transmit a minimum torque to the valve. Actuators shall be rigidly attached to the valve body.

C. Butterfly valve actuators shall conform to the requirements of Section 3.8 of the AWWA Standard specifications for Rubber Seated Butterfly Valves, Designated C504, insofar as applicable and as herein specified.

17.08.02 MANUAL ACTUATORS

A. Manual actuators shall have permanently lubricated, totally enclosed gearing with handwheel and gear ratio sized on the basis of actual line pressure and velocities. Actuators shall be equipped with handwheel, position indicator, and mechanical stop-limiting locking devices to prevent over travel of the disc in the open and closed positions. They shall turn counter-clockwise to open valves. Manual actuators shall be of the traveling nut, self-locking type and shall be designed to hold the valve in any intermediate position between fully open and fully closed without creeping or fluttering. Actuators shall be fully enclosed and designed to produce the specified torque with a maximum pull of 80 pounds on the handwheel or chainwheel. Actuator components shall withstand an input of 450 foot pounds for 30-inch and smaller and 300 foot pounds for larger than 30-inch size valves at extreme actuator positions without damage. Valves located above grade shall have handwheel and position indicator, and valves located below grade shall be equipped with a 2-inch square AWWA operating nut located at ground level and cast-iron extension type valve box. Valve actuators shall conform to AWWA C504, latest revision.

17.08.03 MOTOR ACTUATORS (MODULATING)

A. The motor actuated valve controller shall include the motor, actuator unit gearing, limit switch gearing, limit switches, position transmitter which shall transmit a 4-20 mA DC signal, control power transformer, electronic controller which will position the valve based on a remote 4-20 milliamp signal, torque switches, bored and key-wayed drive sleeve for non-rising stem valves, declutch lever and auxiliary handwheel as a self-contained unit.

B. The motor shall be specifically designed for valve actuator service using 480-volt, 60 Hertz, three phase power as shown, on the electrical drawings. The motor shall be sized to provide an output torque and shall be the totally enclosed, non-ventilated type. The power gearing shall consist of helical gears fabricated from heat treated alloy steel forming the first stage of reduction. The second reduction stage shall be a single stage worm gear. The worm shall be of alloy steel with carburized threads hardened and ground for high

efficiency. The worm gear shall be of high tensile strength bronze with hobbed teeth. All power gearing shall be grease lubricated. Ball or roller bearings shall be used throughout. Preference will be given to units having a minimum number of gears and moving parts. Spur gear reduction shall be provided as required.

C. Limit switches and gearing shall be an integral part of the valve control. The limit switch gearing shall be made of bronze and shall be grease lubricated, intermittent type and totally enclosed to prevent dirt and foreign matter from entering the gear train. Limit switches shall be of the adjustable type capable of being adjusted to trip at any point between fully opened valve and fully closed valve.

D. The speed of the actuator shall be the responsibility of the system supplier with regard to hydraulic requirements and response compatibility with other components within the control loop. Each valve controller shall be provided with a minimum of two rotor type gear limit switches, one for opening and one for closing. The rotor type gear limit switch shall have two normally open and two normally closed contacts per rotor. Gear limit switches must be geared to the driving mechanism and in step at all times whether in motor or manual operation. Provision shall be made for two additional rotors as described above, each to have two normally open and two normally closed contacts. Each valve controller shall be equipped with a double torque switch. The torque switch shall be adjustable and will be responsive to load encountered in either direction of travel. It shall operate during the complete cycle without auxiliary relays or devices to protect the valve, should excessive load be met by obstructions in either direction of travel. The torque switch shall be provided with double-pole contacts.

E. A permanently mounted handwheel shall be provided for manual operation. The handwheel shall not rotate during electric operations but must be responsive to manual operation at all times except when being electrically operated. The motor shall not rotate during hand operation nor shall a fused motor prevent manual operation. When in manual operating position, the unit will remain in this position until motor is energized at which time the valve operator will automatically return to electric operation and shall remain in motor position until handwheel operation is desired. This movement from motor operation to handwheel operation shall be accomplished by a positive declutching lever which will disengage the motor and motor gearing mechanically, but not electrically. Hand operation must be reasonably fast. It shall be impossible to place the unit in manual operation when the motor is running. The gear limit switches and torque switches shall be housed in a single easily accessible compartment integral with the power compartment of the valve control. All wiring shall be accessible through this compartment. Stepping motor drives will not be acceptable.

F. The motor with its control module must be capable of continuously modulating over its entire range without interruption by heat protection devices. The system, including the operator and control module must be able to function, without override protection of any kind, down to zero dead zone.

G. All units shall have strip heaters in both the motor and limit switch compartments.

H. The actuator shall be equipped with open-stop-close push buttons, an auto-manual selector switch, and indicating lights, all mounted on the actuator or on a separate locally mounted power control station.

I. The electronics for the electric operator shall be protected against temporary submergence.

J. Actuators shall be Limitorque L120 with Modutronic Control System containing a position transmitter with a 4-20MA output signal or equal.

17.08.04 MOTOR ACTUATORS (OPEN-CLOSE)

A. The electronic motor-driven valve actuator shall include the motor, actuator gearing, limit switch gearing, limit switches, torque switches, fully machined drive sleeve, declutch lever, and auxiliary handwheel as a self-contained unit.

B. The motor shall be specifically designed for valve actuator service and shall be of high torque totally enclosed, nonventilated construction, with motor leads brought into the limit switch compartment without having external piping or conduit box.

a) The motor shall be of sufficient size to open or close the valve against maximum differential pressure when voltage to motor terminals is 10% above or below nominal voltage.
b) The motor shall be prelubricated and all bearings shall be of the anti-friction type.

C. The power gearing shall consist of helical gears fabricated from heat treated steel and worm gearing. The worm shall be carburized and hardened alloy steel with the threads ground after heat treating. The worm gear shall be of alloy bronze accurately cut with a hobbing machine. All power gearing shall be grease lubricated. Ball or roller bearings shall be used throughout.

D. Limit switches and gearing shall be an integral part of the valve actuator. The switches shall be of the adjustable rotor type capable of being adjusted to trip at any point between fully opened valve and fully closed valve. Each valve controller shall be provided with a minimum of two rotor type gear limit switches, one for opening and one for closing (influent valves require additional contacts to allow stopping at an intermediate position). The rotor type gear limit switch shall have two normally open and two normally closed contacts per toro. Additional switches shall be provided if shown on the control and/or instrumentation diagrams. Limit switches shall be geared to the driving mechanism and in step at all times whether in motor or manual operation. Each valve actuator shall be equipped with a double torque switch. The torque switch shall be adjustable and will be responsive to load encountered in either direction of travel. It shall operate during the complete cycle without auxiliary relays or devices to protect the valve should excessive load be met by obstructions in either direction of travel. Travel and thrusts shall be independent of wear in valve disc or seat rings.

E. A permanently mounted handwheel shall be provided for manual operation. The

handwheel shall not rotate during electric operation except when being electrically operated. The motor shall not rotate during hand operation, nor shall a fused motor prevent manual operation. When in manual operating position, the unit will remain in this position until motor is energized at which time the valve actuator will automatically return to electric operation and shall remain in motor position until handwheel operation is desired. Movement from motor operation to handwheel operation shall be accomplished by a positive declutching lever which will disengage the motor and motor gearing mechanically, but not electrically. Hand operation must be reasonably fast. It shall be impossible to place the unit in manual operation when the motor is running.

F. Valve actuators shall be equipped with an integral reversing controller and three phase overload relays, Open-Stop-Close push buttons, local-remote-manual selector switch, control circuit transformer, three-phase thermal overload relays and two pilot lights in a NEMA 4X enclosure. In addition to the above, a close coupled air circuit breaker or disconnect switch shall be mounted and wired to the valve input power terminals for the purpose of disconnecting all underground phase conductors.

G. The valve actuator shall be capable of being controlled locally or remotely via a selector switch integral with the actuator. In addition, an auxiliary dry contact shall be provided for remote position feedback.

H. Valve A.C. motors shall be designed for operation on a 480 volt, 3-phase service. Valve control circuit shall operate from a fuse protected 120-volt power supply.

I. Motor operators shall be as manufactured by Limitorque Corporation, Type L120 or approved equal.

17.09 AIR RELEASE VALVES

The air release valves for use in water or force mains shall be installed as shown on the Contract Drawings. The valves shall have a 316 stainless steel body and cover, 316 stainless steel float, plug, seat ring, and internal mechanism, bronze water diffuser, Buna-N or Viton seat, and 316 stainless steel trim and hardware. The fittings shall be threaded. Back flushing attachments shall be included. The air release valves shall be Figure 942 or 942F as manufactured by VAG/GA Industries or approved equal.

17.10 VALVE BOXES

Valve Boxes shall conform to the following:

A. Buried valves shall have cast-iron three-piece valve boxes or HDPE adjustable valve boxes. Cast iron valve boxes shall be provided with suitable heavy bonnets and shall extend to such elevation at or slightly above the finished grade surface as directed by the City. The barrel shall be two-piece, screw type, having a 5 1/4-inch shaft. The upper section shall have a flange at the bottom with sufficient bearing area to prevent settling and shall be complete with cast iron covers. Covers shall have WATER, SEWER, or RECLAIM, as applicable, cast into the top. Lids will be painted “safety” blue for potable, purple for reclaimed, and green for sanitary sewer.

B. All valves shall have actuating nuts extended to within four (4) feet of the top of the valve box. All valve extensions will have a centering guide plate two (2) inches maximum below the actuating nut. The valve extension shall be fastened to the existing nut with a set screw. Valve boxes shall be provided with a concrete base and a valve nameplate engraved with lettering 1/8-inch deep as shown on the Contract Drawings.

C. HDPE adjustable valve boxes shall be one complete assembled unit composed of the valve box and extension stem. All moving parts of the extension stem shall be enclosed in a housing to prevent contact with the soil. Valve box assembly shall be adjustable to accommodate variable trench depths.

D. The entire assembly shall be made of heavy wall high density polyethylene. All exterior components shall be joined with stainless steel screws. The valve box top section shall be adaptable to fit inside a valve box upper section.

E. The stem assembly shall be of a telescoping design that allows for variable adjustment length. The stem material shall be of plated steel square tubing. The stem assembly shall have a built-in device that keeps the stem assembly from disengaging at its fully extended length. The extension stem must be torque tested to 1000 foot pounds. Covers shall have WATER, SEWER or RECLAIMED clearly and permanently impressed into the top surface.

17.11 CORPORATION COCKS

Corporation cocks for connections to cast-iron, ductile iron or steel piping shall be all brass or bronze suitable for 180 psi operating pressure and similar to Mueller Co. H-10046 or approved equal by Clow Corp. and shall be of sizes required and/or noted on the Contract Drawings.

17.12 FLANGE ADAPTER COUPLINGS

Flange adapter couplings shall be of the size and pressure rating required for each installation and shall be suitable for use on either cast iron or ductile iron pipe. They shall be similar or approved equal to Dresser Company, Style 128. All couplings shall have a sufficient number of factory installed anchor studs to meet or exceed a minimum test pressure rating of 230 psi minimum.

17.13 FLEXIBLE COUPLINGS

A. Flexible couplings shall be either the split type or the sleeve type as shown on the Contract Drawings.

B. Split type coupling shall be used with all interior piping and with exterior piping noted on the Contract Drawings. The couplings shall be mechanical type for radius groove piping. The couplings shall mechanically engage and lock grooved pipe ends in a positive couple and allow for angular deflection and contracting and expansion.

C. Couplings shall consist of malleable iron, ASTM Specification A47, Grade 32510 housing clamps in two or more parts, a single chlorinated butyl composition sealing gasket with a "C" shaped cross-section and internal sealing lips projecting diagonally inward, and two or more oval track head type

bolts with hexagonal heavy nuts conforming to ASTM Specification A 183 and A194 to assemble the housing clamps. Bolts and nuts shall be hot dipped galvanized after fabrication.

D. Victualic type couplings and fittings may be used in lieu of flanged joints. Pipes shall be radius grooved as specified for use with the Victaulic couplings. Flanged adapter connections at fittings, valves, and equipment shall be Victaulic Vic Flange Style 741, equal by Gustin-Bacon Group, Division of Certain-Teed Products, Kansas City, Kansas, or approved equal.

E. Sleeve type couplings shall be used with all buried piping. The couplings shall be of steel and shall be Dresser Style 38 or 40, as shown on the Contract Drawings, or equal. The coupling shall be provided with hot dipped galvanized steel bolts and nuts unless indicated otherwise.

F. All couplings shall be furnished with the pipe stop removed.

G. Couplings shall be provided with gaskets of a composition suitable for exposure to the liquid within the pipe.

H. If the Contractor decides to use victaulic couplings in lieu of flanged joints, he shall be responsible for supplying supports for the joints.

17.14 HOSE BIBS

Hose bibs shall be 3/4-inch or 1-inch brass, polished chromium plated brass, with vacuum breaker as noted on the Contract Drawings.

17.15 SLOW CLOSING AIR AND VACUUM VALVES

A. The Contractor shall furnish and install slow closing air and vacuum valves as shown on the Contract Drawings which shall have two (2) independent valves bolted together. The air and vacuum valve shall have all stainless-steel float, guided on both ends with stainless shafts. The air and vacuum valve seat shall be Buna-N to insure drop tight closure. The Buna-N seat shall be fastened to the cover stainless shoulder screws in a manner to prevent distortion of the seat. The float shall be guided at both ends with stainless steel bushings.

B. The valve cover shall have a male lip designed to fit into the body register for accurate alignment of the float into the Buna-N seat. The valve cover shall have 250-pound class flanged outlet connection.

C. The surge check valve shall be bolted to the inlet of the air and vacuum valve and consist of a body, seat, disc, and compression spring. A surge check unit shall operate on the interphase between the kinetic energy and relative velocity flows of air and water, so that after air passes through, and water rushes into the surge check, the disc starts to close, reducing the rate of flow of water into the air valve by means of throttling orifices in the disc to prevent water hammer in the air valves. The surge check orifices must be adjustable type for regulation in the field to suit operating conditions. Valve shall be rated for 250-pound class working pressure.

D. The complete slow closing air and vacuum valve with air release valve shall have been flow tested in the field, substantiated with test data to show reduction of surge pressure in the valve. Flow test data

shall be submitted with initial shop drawings for review and acceptance.

E. Valve exterior to be painted Red Oxide, Phenolic TT-P86, Primer or approved equal for high resistance to corrosion.

F. All materials of construction shall be certified in writing to conform to ASTM specifications as follows:

Air Valve Cover, Body, and Surge Check Body	Cast Iron	ASTM A48, Class 30
Float	Stainless Steel	ASTM A240
Surge Check Seat and Disc	Stainless Steel	ASTM A582
Air Valve Seat Spring	Buna-N Stainless Steel	T302

17.16 SURGE ANTICIPATOR VALVES

A. Surge anticipator valves shall be furnished for the pumping systems as shown on the Contract Drawings. The valve shall be hydraulically operated, pilot controlled, and diaphragm or piston actuated. The main valve shall be cast iron conforming to ASTM A48 with bronze trim conforming to ASTM B61 and flanged ends conforming to ANSI B161.1. The main valve shall be globe type with a single removable seat and a resilient disc.

B. The diaphragm actuated valve shall have a stainless-steel stem guided at both ends by a bearing in the valve cover and an integral bearing surface in the seat. No external packing glands shall be permitted. The valve shall be fully serviceable without removing it from the line. The pilot system shall be of noncorrosive construction and provided with isolation cocks.

C. The piston actuated valve shall operate on the differential piston principle. The valve piston shall be guided on its outside diameter. The valve shall be able to operate in any position and shall be fully serviceable without removing it from the line. The pilot system shall be provided with isolation cocks and be of noncorrosive materials of construction.

D. The valve shall be designed specifically to minimize the effects of water hammer, resulting from power failure at the pumping station, or from normal stopping and starting of pumping operators. The valve shall open hydraulically on a down surge, or low-pressure wave created when the pump stops, remain open during the low-pressure cycle in order to be open when the high-pressure wave returns. The high-pressure pilot shall be adjustable over a 20 to 200 psi range and the low-pressure pilot shall be adjustable over a 15 to 75 psi range. The valve shall be the 250 Class.

17.17 CHECK VALVES

A. Check valves for cast iron and ductile iron pipe lines shall be swing type and shall meet the material requirements of AWWA Specification C508. The valves shall be iron body, bronze mounted, single disc, 175 psi working water pressure and nonshock. Valves shall be as manufactured by Mueller, Clow, Kennedy, or M&H. Valves 8-inch and larger shall be air cushioned to reduce valve slam.

B. When there is no flow through the line, the disc shall hang lightly against its seat in practically a vertical position. When open, the disc shall swing clear of the waterway.

C. Check valves shall have bronze seat and body rings, extended bronze hinge pins and bronze nuts on the bolts of bolted covers. The interior and exterior of the valve body shall have a factory applied fusion bonded or 10 mil 2-part epoxy coating (Protecto 401 or approved equal).

D. Valves shall be so constructed that disc and body seat may easily be removed and replaced without removing the valve from the line. Valves shall be fitted with an extended hinge arm with outside lever and weight. Weights provided and approved by the City shall be installed.

17.18 HYDRANTS

Hydrants shall be AVK Series 2780 Barrel (nostalgic style with stainless steel bolts) American Darling B-84-B or Mueller Super Centurian 250, or approved equal and shall conform to the "Standard Specification for Fire Hydrants for Ordinary Water Works Service", AWWA C502, and UL/FM certified, and shall in addition meet the specific requirements and exceptions which follow:

1. Hydrants shall be according to manufacturer's standard pattern and of standard size and shall have one 4-1/2inch steamer nozzle and two 2-1/2 inch hose nozzles.
2. Hydrant inlet connections shall have mechanical joints for 6 inch ductile-iron pipe.
3. Hydrant valve opening shall have an area at least equal to that area of a 5-1/4 inch minimum diameter circle and be obstructed only by the valve rod. Each hydrant shall be able to deliver 500 gallons minimum through its two 2-1/2 inch hose nozzles when opened together with a loss of not more than 2 psi in the hydrants.
4. Each hydrant shall be designed for installation in a trench that will provide 5-ft. cover.
5. Hydrants shall be hydrostatically tested as specified in AWWA C502.
6. Hydrants shall be rated at 200 psi.
7. All nozzle threads shall be American National Standard.
8. Each nozzle cap shall be provided with a Buna N rubber washer.
9. Hydrants shall be so arranged that the direction of outlets may be turned 90 degrees without interference with the drip mechanism and without the mechanism obstructing the discharge from any outlet.
10. Hydrants must be capable of being extended without removing any operating parts.
11. Hydrants shall have bronze-to-bronze seatings as per AWWA C502-85.
12. Hydrant main valve closure shall be of the compression type opening against the pressure and closing with the pressure. The resilient seat material shall meet the requirements of AWWA C-509 and shall preferably be EPDM Elastomer.
13. Internal and below ground iron parts (bonnet, nozzle section and base) shall have a fusion bonded epoxy coating per AWWA C550. Aboveground external hydrant parts (cap, bonnet and nozzle section) shall be either epoxy coated together with a UV resistant polyester coating or have two shop coats of paint per AWWA C502. The lower stand pipe or barrel shall be protected with asphaltic coatings per AWWA C502.
14. Exterior nuts, bolts and washer shall be stainless steel. Bronze nuts may be used below grade.
15. All internal operating parts shall be removable without requiring excavation.

17.19 RESTRAINING CLAMPS

Restraining clamp assemblies as detailed in the Contract Drawings for use at hydrant connections to water mains, or at fittings where shown on the Contract Drawings, shall be as manufactured by American

Cast Iron Pipe, Star Pipe Products, U.S. Pipe; or approved equal.

17.20 TAPPING SLEEVES AND GATE VALVES

Tapping valves shall meet the requirement of AWWA C500. The valves shall be flanged, shall be mechanical joint outlet with non-rising stem, designed for vertical burial and shall open left or counterclockwise. Stuffing boxes shall be the "O-ring" type. Operating nut shall be AWWA Standard 2-inch square for valves 2-inch and up. The valves shall be provided with an overload seat to permit the use of full size cutters. Gaskets shall cover the entire area of flange surfaces and shall be supplied with EPDM wedges up to 30-inch diameter.

Tapping sleeves and saddles shall seal to the pipe by the use of a confined "O" ring gasket and shall be able to withstand a pressure test of 180 psi for one hour with no leakage in accordance with AWWA C110, latest edition. A stainless steel 3/4-inch NPT test plug shall be provided for pressure testing. All bolts joining the two halves shall be stainless steel and shall be included with the sleeve or saddle. Sleeves and saddles shall be protected from corrosion by being fusion applied epoxy coated or be made of 18-8 Type 304 stainless steel. Saddle straps shall be 18-8 Type 304 stainless steel.

17.21 SINGLE ACTING ALTITUDE VALVES

17.21.01 FUNCTION

A. The altitude control valve shall be of the single acting type, closing off tightly when the water reaches the maximum predetermined level in the tank to prevent overflow; and opening to permit replenishing of the tank supply when the water level drops approximately 6-inch to 12-inch below the maximum level.

B. A hand operated valve in the power water line to the top of the piston shall permit adjustment of the speed of valve closing. The tank water level control shall be by means of a diaphragm operated, spring loaded, three-way pilot which directs power water to or from the top of the main valve piston. The three-way pilot shall be of bronze construction. The diaphragm surface exposed to the tank head shall be not less than 57 sq. inches. It shall be possible to adjust the spring above the diaphragm for water level control approximately 20% above or below the factory setting.

17.21.02 DESCRIPTION

A. The main valve shall operate on the differential piston principle such that the area on the underside of the piston is no less than the pipe area on the upper surface of the piston is of a greater area than the underside of the piston.

B. The valve piston shall be guided on its outside diameter by long stroke stationary Vee ports which shall be downstream of the seating surface to minimize the consequences of throttling. Throttling shall be done by the valve Vee ports and not the valve seating surfaces.

C. The valve shall be capable of operating in any position and shall incorporate only one flanged cover at the valve top from which all internal parts shall be accessible. There shall be no

stems, stem guides, or spokes within the waterway. There shall be no springs to assist the valve operation.

17.21.03 CONSTRUCTION

A. The valve body shall be of cast iron ASTM A-126 with flanges conforming to the latest ANSI Standards. The valve shall be extra heavy construction throughout. The valve interior trim shall be bronze B-62 as well as the main valve operation.

B. The valve seals shall be easily renewable while no diaphragm shall be permitted within the main valve body.

C. All controls and piping shall be of non-corrosive construction.

D. A visual valve position indicator shall be provided for observing the valve piston position at any time.

17.21.04 FIGURE NUMBER

The valves shall be the 20-inch Globe type (Fig. 3200-D) as manufactured by GA Industries of Mars, Pennsylvania, or approved equal.

17.22 INSTALLATION

A. All valves and appurtenances shall be installed in the location shown, true to alignment and rigidly supported. Any damage occurring to the above items before they are installed shall be repaired to the satisfaction of the City.

B. After installation, all valves and appurtenances shall be tested at least two hours at the working pressure corresponding to the class of pipe, unless a different test pressure is specified. If any joint proves to be defective, it shall be repaired to the satisfaction of the City.

C. Install all floor boxes, brackets, extension rods, guides, the various types of operators and appurtenances as shown on the Contract Drawings that are in masonry floors or walls, and install concrete inserts for hangers and supports as soon as forms are erected and before concrete is poured. Before setting these items, the Contractor shall check all Contract Documents which have a direct bearing on their location and he shall be responsible for the proper location of these valves and appurtenances during the construction of the structures.

D. Pipe for use with flexible couplings shall have plain ends as specified in the respective pipe sections.

E. Flanged joints shall be made with high strength, low alloy Corten bolts, nuts and washers. Mechanical joints shall be made with mild corrosion resistant alloy steel bolts and nuts. All exposed bolts shall be painted the same color as the pipe. All buried bolts and nuts shall be heavily coated with two (2) coats of bituminous paint comparable to Inertol No. 66 Special Heavy.

F. Prior to assembly of split couplings, the grooves as well as other parts shall be thoroughly cleaned.

The ends of the pipes and outside of the gaskets shall be moderately coated with petroleum jelly, cup grease, soft soap or graphite paste, and the gasket shall be slipped over one pipe end. After the other pipe has been brought to the correct position, the gasket shall be centered properly over the pipe ends with the lips against the pipes. The housing sections then shall be placed. After the bolts have been inserted, the nuts shall be tightened until the housing sections are firmly in contact, metal-to-metal, without excessive bolt tension.

G. Prior to the installation of sleeve-type couplings, the pipe ends shall be cleaned thoroughly for a distance of 8-inch. Soapy water may be used as a gasket lubricant. A follower and gasket, in that order, shall be slipped over each pipe to a distance of 6-inches from the end.

H. Valve boxes with concrete bases shall be installed as shown on the Contract Drawings. Mechanical joints shall be made in the standard manner. Valve stems shall be vertical in all cases. Place cast iron box over each stem with base bearing on compacted fill and the top flush with final grade. Boxes shall have sufficient bracing to maintain alignment during backfilling. Knobs on cover shall be parallel to pipe. Remove any sand or undesirable fill from valve box.

17.23 HYDRANT INSTALLATION

A. Hydrants shall be set at the locations designated by the City and/or as shown on the Contract Drawings and shall be bedded on a firm foundation. A drainage pit on crushed stone as shown on the Contract Drawings shall be filled with gravel or crushed stone and satisfactorily compacted. During backfilling, additional gravel or crushed stone shall be brought up around and 6-inch over the drain port. Each hydrant shall be set in true vertical alignment and shall be properly braced. Concrete thrust blocks shall be placed between the back of the hydrant inlet and undisturbed soil at the end of the trench. Minimum bearing area shall be as shown on the Contract Drawings. Felt paper shall be placed around the hydrant elbow prior to placing concrete. CARE MUST BE TAKEN TO ENSURE THAT CONCRETE DOES NOT PLUG THE DRAIN PORTS. Concrete used for backing shall be as specified herein.

B. When installations are made under pressure, the flow of water through the existing main shall be maintained at all times. The diameter of the tap shall be a minimum of 2-inch less than the inside diameter of the branch line.

C. The entire operation shall be conducted by workmen thoroughly experienced in the installation of tapping sleeves and valves, and under the supervision of qualified personnel furnished by the manufacturer. The tapping machine shall be furnished by the Contractor if tap is larger than 12-inch in diameter.

D. The Contractor shall determine the locations of the existing main to be tapped to confirm the fact that the proposed position for the tapping sleeve will be satisfactory and no interference will be encountered such as the occurrence of existing utilities or of a joint or fitting at the location proposed for the connection. No tap will be made closer than 30-inch from a pipe joint.

E. Tapping valves shall be set in vertical position and be supplied with a 2-inch square operating nut for valves 2-inch and larger. The valve shall be provided with an oversized seat to permit the use of full sized cutters.

F. Tapping sleeves and valves with boxes shall be set vertically or horizontally as indicated on the Contract Drawings and shall be squarely centered on the main to be tapped. Adequate support shall be provided under the sleeve and valve during the tapping operation. Sleeves shall be no closer than 30-inch from water main joints. Thrust blocks shall be provided behind all tapping sleeves. Proper tamping of supporting earth around and under the valve and sleeve is mandatory. After completing the tap, the valve shall be flushed to ensure that the valve seat is clean.

17.24 SHOP PAINTING

Ferrous surfaces of valves and appurtenances shall receive a coating of rust-inhibitive primer. All pipe connection openings shall be capped to prevent the entry of foreign matter prior to installation.

17.25 FIELD PAINTING

All metal valves and appurtenances specified herein and exposed to view shall be painted according to the Specifications. All above ground potable water main valves shall be painted safety blue.

17.26 INSPECTION AND TESTING

Completed pipe shall be subjected to hydrostatic pressure test for two hours at 180 psi. All leaks shall be repaired and lines retested as approved by the City. Prior to testing, the pipelines shall be supported in an approved manner to prevent movement during tests.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 18 - SANITARY SEWER CONSTRUCTION

18.01 GENERAL

The Work in this section includes construction of sanitary sewer gravity pipes, force mains, manholes, and appurtenances.

Sanitary Sewers are to be constructed at locations indicated on the Contract Drawings. The City reserves the right, however, to make minor changes in grade and/or alignment as the Work progresses.

All Work shall be fully completed within the established limits as outlined for the various Pay Items listed in the Proposal. It is not the intent of the City to allow additional compensation for obstructions, interferences, or similar contingencies on this Project.

Pipe materials used for gravity sewers shall be subject to the depth limitations indicated in accordance with the Contract Documents.

All force main pipe and fittings shall be furnished and installed in accordance with the applicable requirements of the Technical Specifications sections headed “Piping Materials: Ductile Iron Pipe,” “Piping Materials: PVC Pressure Pipe,” and "Pressure Pipe Construction."

At the ends of the sections where adjoining pipelines have not been completed and are not ready to connect, temporary bulkheads or plugs (as specified herein) approved by the Engineer shall be installed. All such bulkheads or plugs shall be removed when they are no longer needed or when ordered by the Engineer.

All pipelines shall be tested and closed-circuit television video (CCTV) inspected. Any leak or defect shall be repaired and re-televised. Tests shall be conducted in accordance with these Specifications.

PVC pipe for gravity sewers shall be tested for allowable deflection. Tests shall be conducted in accordance with the requirements of these Specifications.

Connections between dissimilar gravity pipe materials or diameters shall be made as specified herein.

Connections between pressure pipes shall be made with solid sleeves as specified herein.

The ends of all new sanitary laterals shall be marked by witness posts or protruding galvanized pipe, as directed by the Engineer. Witness posts shall be 4-inch diameter PVC pipe filled with concrete; 4 to 5 feet of the pipe shall be exposed and wrapped with green tape. The 1-inch diameter galvanized pipe shall protrude 1 inch above grade.

The following Standards are referenced in this section:

ASTM C 12	“Practice for Installing Vitrified Clay Pipe Lines”
ASTM C 76	"Standard Specification for Reinforced Concrete Culvert, Storm Drain, and

	Sewer Pipe"
ASTM C 443	"Standard Specification for Joints for Circular Concrete Sewer and Culvert Pipe, Using Rubber Gaskets"
ASTM C 478	"Standard Specification for Precast Reinforced Concrete Manhole Sections"
ASTM C 1107	"Standard Specification for Packaged Dry, Hydraulic-Cement Grout (NonShrink)"
ASTM D 2321	"Standard Practice for Underground Installation of Thermoplastic Pipe for Sewers and Other Gravity-Flow Applications"
ASTM D 3034	"Standard Specification for Type PSM Poly (Vinyl Chloride) (PVC) Sewer Pipe and Fittings"
ASTM D 3753	"Standard Specification for Glass-Fiber-Reinforced Polyester Manholes"
ASTM F 477	"Standard Specification for Elastomeric Seals (Gaskets) for Joining Plastic Pipe"
ASTM F 679	"Standard Specification for Poly (Vinyl Chloride) (PVC) Large-Diameter Plastic Gravity Sewer Pipe and Fittings"
UNI-B-6-98	"Recommended Practice for Low-Pressure Air Testing of Installed Sewer Pipe" Uni-Bell Plastic Pipe Association, Dallas, Texas

18.02 DATA TO BE SUBMITTED

The Contractor shall submit shop drawings in accordance with the General Conditions, Article 36, for the following materials:

Piping materials
Fittings and couplings
Grouting rings
Pipe-to-manhole connectors
Precast manholes
Fiberglass manholes
Castings
Wall sleeves
Special construction methods
Interior cementitious coating (including applicator's certification from manufacturer)

18.03 MATERIALS

All materials shall be furnished by the Contractor, unless otherwise noted on the Contract Drawings. All materials shall be new and of the best quality available. Materials not specifically specified shall confirm to applicable provisions of the FDOT-SSRBC.

18.03.01 Piping Materials

Sanitary sewer pipe shall either be green in color or shall be white with continuous colored green ink lettering or shall be continuously painted green along the top 1/3 of the pipe with 2-part high-build epoxy-polyamide paint. All sanitary sewers shall be installed accompanied by green-colored metallic identification tape laid 1 foot above the pipe, cut every 10 feet.

A. Ductile iron pipe and fittings for force mains or gravity sewers shall conform to the Technical Specifications section headed "Piping Materials: Ductile Iron Pipe."

B. PVC gravity sewer pipe and fittings 4-inch through 15-inch, intended for non-pressure service, shall comply with ASTM D 3034, Type PSM, with a dimension ratio of 35 and a minimum stiffness of 46 psi; or, at the direction of the Engineer, pipe with a dimension ratio of 26 and a minimum pipe stiffness of 115 psi shall be used. Joints and gaskets shall comply with ASTM F 477. PVC fittings for use on 4-inch through 15-inch PVC pipe shall be Harco Gasketed PVC Sewer Fittings as manufactured by Harrington Corp. or approved equal.

   PVC gravity sewer pipe and fittings 18-inch through 27-inch, intended for non-pressure service, shall comply with ASTM F 679, with T-1 wall thickness and a minimum pipe stiffness of 46 psi. Joints and gaskets shall comply with ASTM F 477.

C. PVC pressure pipe and fittings for force mains or gravity sewers shall conform to the Technical Specifications section headed "Piping Materials: PVC Pressure Pipe." Fittings shall be PVC or ductile iron as specified, as directed by the Engineer.

D. High Density Polyethylene (HDPE) pressure pipe for force mains shall conform to the Technical Specifications section headed “Piping Materials: HDPE Pressure Pipe.”

18.03.02 Other Materials

A. Castings for manholes and cleanouts shall be cast iron of the sizes, shapes, and catalog references shown on the Contract Drawings. Where no reference is made on the Contract Drawings, castings shall be equivalent in quality to those manufactured by U.S. Foundry. Unless otherwise noted, all castings shall be designed for an HS-20 truck loading. Castings shall be marked "Sanitary Sewer."

B. Concrete, reinforcing, and masonry for precast, cast-in-place, or site assembled manholes and structures shall conform to the Technical Specifications section headed "Concrete, Masonry, and Reinforcing Steel."

C. Precast manholes shall be manufactured as specified herein and in accordance with the sizes and details shown on the Contract Drawings, and with the approved shop drawings.

D. Fiberglass Reinforced Polyester (FRP) manholes shall be manufactured in accordance with ASTM D 3753, the sizes and details shown on the Contract Drawings, and the approved shop drawings.

18.04 CONNECTIONS TO EXISTING SANITARY SEWERS

The Contractor shall connect new sanitary sewers to existing sanitary sewers as shown on the Contract Drawings and as specified.

All connections to existing sanitary sewers shall be by Flex-Seal Adjustable Repair Coupling Series MR-ARC with Series 316 stainless steel shear rings as manufactured by Mission Rubber Company

or approved equal. All couplings shall be centered between pipe ends and shall be tightened at both ends by Series 316 stainless steel clamps or approved equal.

The Engineer shall be notified at least 2 working days prior to making final connections. The time at which the connections are to be made shall be subject to acceptance by the Engineer.

18.05 CONSTRUCTION OPERATIONS

Pipes shall be laid in open cut, except when another method, such as jacking, augering, directional drilling, or tunneling, is shown on the Contract Drawings, specified, or ordered. Construction shall adhere to the following:

A. No excavations shall be left open over a weekend. All pavement openings shall be completely repaired within 7 days of opening.

B. Sanitary sewers may be constructed in short tunnels to protect trees, shrubs, and existing surface or subsurface utilities and structures. Short tunnels shall be constructed to the lengths shown on the Contract Drawings, specified, or directed by the Engineer. No separate payment will be made for short tunnels.

C. Temporary fences, where required, shall be "wood and wire fence" or other suitable fencing as approved by the Engineer.

D. During the Work, it will be necessary to install the sanitary sewer under or closely adjacent to existing culverts and other storm and water main facilities. Where so indicated on the Contract Drawings, the Contractor shall remove storm drains to permit construction of the sanitary sewer and shall then reconstruct the storm drain. Where removal and reconstruction are not indicated on the Contract Drawings, the Contractor shall protect all existing storm and water main facilities which are shown on the Contract Drawings or located in the field during the Work.

E. Sewers crossing water mains may be required to be constructed of ductile iron pipe, PVC pressure pipe, or heavy wall PVC pipe (SDR 26) as ordered by the Engineer, to conform to DEP and Pinellas County Public Health Unit requirements.

   Sanitary sewers and service laterals which cross under the new water pipe with less than 18 inches clear vertical separation, or which cross over the new water pipe, shall be replaced with ductile iron pipe or PVC pressure pipe, or heavy wall PVC pipe (SDR 26) for 10 feet on both sides of the new water main, or as directed by the Engineer.

F. All ground surfaces disturbed by the Contractor shall be restored to their original condition in conformance to the Technical Specifications section headed "Surface Restoration."

G. Sanitary sewers shall not be cut or pumped around without an approved sanitary sewer pump-around plan and submittal of same, a minimum of 72 hours prior to implementation, to the Water Resources Department Dispatch, 893-7261. The pump-around plan shall include size of pipes and pumps, and discharge location.

H. It is the responsibility of the Contractor to maintain operation of the existing sewerage facilities during construction and repair work. The Contractor shall be responsible for providing any equipment required to maintain operation of service during construction. Any damage done to any existing sewer pipe or structure is to be immediately repaired to a condition equal to, or better than, its original condition.

I. Cutting ductile iron pipe shall be field cut with a power saw. No impact cutting is permitted. The spigot end of pipe thus cut shall be filed or ground to form a bevel.

J. Cutting PVC sewer pipe may be field cut using hand or power saws in accordance with the manufacturer's recommendations. The raw spigot end thus formed shall be filed to remove gasket damaging burrs and to form a standard bevel.

18.06 MANHOLE CONSTRUCTION

18.06.01 Precast Concrete Manholes

Precast manholes shall be constructed in accordance with the details shown on the Plans. Full shop drawing information including design, materials, fabrication details, and installation methods of the proposed precast manholes shall be submitted to the Engineer as specified.

A. Base slabs for precast manholes 48-inch in diameter shall have a minimum thickness of 8 inches as detailed on the Plans. The diameter of the base slab shall be as detailed on the Plans. Reinforcement shall be placed with 2 inches of concrete cover over the top row of steel. Base slabs for precast manholes shall be cast with the lower manhole section and placed on a level, compacted trench bottom.

B. Riser sections, grade rings, and tops shall comply with ASTM C 478 with the exception that Article No. 11 shall be deleted. Base riser sections shall be provided with preformed pipe holes to fit the connectors. The tops of pipe holes shall not be within 4 inches of the bell or socket portion of the riser.

C. Riser joints shall conform to ASTM C 443, to the manufacturer's recommendations and as shown on the Plans. Riser shall be jointed with rubber, plastic, or preformed bituminous joint sealing compound equal to Ram-Nek as manufactured by K.T. Snyder.

D. Manhole sizes up to 10 feet in depth (invert to bottom of brick adjustment ring) shall be a minimum of 48-inch inside diameter for 18-inch diameter and smaller pipe. Manholes over 10 feet in depth shall be the specified diameter for a minimum of 6 feet above the manhole invert; the remaining portion may, at the Contractor's option, be reduced to 48-inch diameter. In no case shall the manhole diameter be less than that required to adequately enclose the sewer pipe.

E. Tops shall have a minimum opening 24 inches in diameter for pipes 18-inch and smaller and 32-inch minimum for pipes 21-inch and larger, with an 8-inch wide flange at the top. For Type I manholes, only concentric cones are acceptable.

F. Top grades of precast manholes shall be established so that a minimum of 3, but no more than 6, courses of brick are placed under the ring and cover casting.

G. Inverts shall be formed using poured-in-place concrete conforming to the Technical Specifications section headed "Concrete, Masonry and Reinforcing Steel" and shall have a minimum strength of 2500 psi.

H. Drop inlets shall be provided where directed by the Engineer or shown on the Plans, and such drop inlets shall conform to details shown on the Plans.

I. A protective coal tar epoxy coating of Carboline (formerly Kop-Coat) Bitumastic 300-M, or approved equal, shall be applied to the exterior surfaces of manholes. One coat shall be applied to the outside and shall yield a final dry film thickness of 9 mils.

J. A dense and durable concrete lining of 100 percent pure fused calcium-aluminate cementitious lining of SewperCoat PG as manufactured by Kerneos Inc., shall be applied in accordance with manufacturer's recommendations, to all interior surfaces of manholes including walls, benches, flow channels, and inverts. Lining shall have a final minimum thickness of 1/2 inch.

K. Manhole wall penetrations for precast manholes shall be as specified for brick manholes.

L. Pipe-to-manhole connections (for New Precast) shall be made with a flexible watertight connector such as Kwik Seal or PSX: Positive Seal as manufactured by Press-Seal Gasket Corporation, or Kor-N-Seal connectors for pipe sizes up to 15-inch and Kor-N-Seal II connectors for pipe sizes 15-inch through 30-inch as manufactured by NPC Inc. Pipe-to-manhole connection shall be installed by the precaster for new manholes, unless specified otherwise.

18.06.02 Fiberglass Reinforced Polyester (FRP) Manholes

The construction of FRP manholes shall conform to the details on the Plans. Full shop drawing information including design, materials, fabrication details, and installation methods of the proposed fiberglass manholes shall be submitted to the Engineer as specified.

A. FRP manholes shall be a one-piece unit consisting of a watertight base and corbel section with a concentric cone, as manufactured by LF Manufacturing, Containment Solutions, or an approved equal.

B. A minimum wall thickness of 0.318 inch shall be used for 48-inch diameter manholes. A minimum wall thickness of 0.50 inch shall be used for manholes larger than 48-inch diameter. All manholes shall have a U/V inhibitor that is homogeneous with the resin mixture.

C. All FRP manholes shall have a minimum 20-year manufacturer’s warranty against corrosion and structural defects. All FRP manholes shall have a minimum AASHTO HS-20 axle loading.

D. Base Slabs: FRP manhole base slabs shall be precast or cast-in-place concrete and shall conform to the thickness specified in the details on the Plans. Cast-in-place concrete base slab reinforcement shall be placed with 3 inches of concrete cover in accordance with Technical Specifications Section 5 headed "Concrete, Masonry, and Reinforcing Steel" Cast-in-place base slabs for FRP manholes shall be cast in place on a level, compacted bottom.

E. Watertight Bottom: The FRP manhole shall have a resin 'fiber-reinforced bottom and a 2 and 1/2-inch-wide anti-floatation flange as a homogeneous part of the bottom section. The manhole bottom shall be a minimum 1/2-inch thick.

F. For FRP manhole depths greater than 10 feet, the manufacturer shall install a minimum of two 1 and 1/2-inch-deep by 3 and 1/2-inch-wide stiffening ribs. Stiffening ribs shall be completely enclosed with resin fiber-reinforcement.

G. FRP manholes shall be anchored to the cast-in-place concrete base slab with 316 stainless steel Kwik Bolt II Wedge anchors and washers as manufactured by Hilti, or approved equal. The size, number of anchors, and embedment depth shall be as shown on the Plans. The anchors shall be installed a minimum of 1 and 1/2 inches from the outer edge of the anchoring flange and shall be equally spaced around the circumference of the manhole bottom.

H. No fiberglass manhole shall have less than 4 feet clear inside height (measured from invert of bench to finished grade.)

I. Inverts shall be as shown on the Plans. A concrete invert may be formed in the field using poured-in-place concrete conforming to Technical Specifications Section 5 headed "Concrete, Masonry, and Reinforcing Steel" and shall have a minimum strength of 2,500 psi.

J. FRP stub outs shall be installed as shown on the Plans or directed by the Engineer, in accordance with approved shop drawings.

K. Pipe-to-manhole connectors for new manholes shall be installed by the FRP manhole manufacturer, unless specified otherwise. Connections for 4-inch through 15-inch pipe shall be made with a Kor-N-Seal boot as manufactured by NPC Inc., or approved equal, and laminated sleeve, as shown in the details on the Plans. Connections of 18-inch and larger shall be with a Link-Seal connector as manufactured by Pipeline Seal & Insulator Inc., or approved equal, and laminated sleeve as shown on the details on the Plans.

L. Laminated sleeves shall be formed using resin and fiberglass of same type and grade as used in the fabrication of the fiberglass manhole. Laminated sleeves may be factory installed or field installed. Field installation shall be by a manufacturer's certified representative or a Contractor-certified person.

M. All holes cut into the FRP manhole shall be by core methods recommended by the manhole manufacturer. A minimum of 12-inch clear wall between cutouts shall be maintained in all directions for each cored hole.

18.07 LAYING AND JOINTING PIPELINES

18.07.01 General

Ductile iron pipelines, PVC pressure pipelines, and HDPE pressure pipelines for force mains shall be laid and jointed as specified in the Technical Specifications section headed "Pressure Pipe Construction." Retainer glands used for PVC force mains shall be UL listed or FM approved and shall have factory certification for pressures up to 188 psi.

PVC, concrete, and FRPMP gravity pipelines shall be laid in conformance to applicable requirements of ASTM C 12 for concrete pipe, ASTM D 2321 for PVC pipe, and ASTM D 3262 and D 4161 for FRPMP.

18.07.02 Line and Grade

Sewers shall be laid to exact line and grade using approved methods consistent with common practice and approved by the Engineer. All line and grade controls shall be furnished by the Contractor. The line and the grade of the sewer, as well as the location of manholes, and all other appurtenances, shall be as shown on the Plans or, as directed by the Engineer. The grade line as given on the Plans indicates the grade of the invert of the sewer pipe. The trench bottom shall form a solid base for the entire length of pipe and shall be capable of supporting the full weight of the pipe and backfill material. The pipe bells shall not bear against the solid bottom of the ditch. Sewers will be inspected with mirrors at intervals during construction and corrected, if necessary, before backfill.

18.07.03 Pipe

Before the pipe is jointed in the trench, the outside of the spigot end and the inside of the bell shall be thoroughly cleaned, wiped, and brushed out to ensure that no dirt or foreign material gets into the finished line. Each pipe shall be inspected for defects and cracks prior to being lowered into the trench. Any cracked or otherwise rejected pipe shall be immediately removed from the site. All pipeline work must be performed in the presence of the Engineer. When work is not in progress, water shall be kept out of the pipe, and the pipe shall be kept closed by means of a test plug. The spigot end shall be centered on grade into the bell end of the last downstream length of pipe, and properly seated. When seating pipe with a pry, lever, or other approved device, care shall be taken to protect the pipe end from damage. Ends damaged in any manner shall be cause for rejection of the pipe.

18.07.04 Service Connections

Service lateral connections shall conform to the Details and shall be installed as indicated or as directed by the Engineer. The Contractor shall locate and record the exact position of such service lateral connections and include actual data on the As-Built Drawings to be furnished to the City.

In new sewer construction, D.I.P. and PVC service connections shall be made by means of a wye or tee. All joints connected to the wye unit shall remain flexible. Service connections on existing mains shall be made using a sewer saddle approved in the Contract Documents and

Technical Specifications. All new sewer service connections shall have a continuous looped trace wire consisting of one (1) 14-gauge minimum solid copper or one (1) 12- gauge copper clad steel tracer wires taped to the top center of the pipe from the cleanout to the main line and back to the cleanout.

Service pipe for all properties shall be laid to the property line and plugged, as shown on the Standard Details. All ends of service lines shall be marked by a permanent stake and where sidewalks or curbs are located nearby, by a chiseled mark cut in the sidewalk or curb. Service pipe shall have a protective cover of not less forty-two (42) inches under all roads and thirty-six (36) inches at all property lines. Inspection of service pipe shall be made before backfill. Service pipe shall have a visibly good line and grade. Shallow service shall be laid by using a four-foot hand level with proper shim attached to one end.
In cases of extra depth where service pipe cannot be laid on a continuous grade to the property line, the Contractor shall then furnish all materials and construct risers as shown on the Plans. When pipe cannot be adequately supported on undisturbed earth, it shall be supported on a concrete cradle. No payment will be made for concrete required to correct conditions resulting from faulty construction methods or negligence.

Service reconnections require adapters for all joints that will not connect properly with ordinary factory joints. Approved pipe cutting methods shall be used to cut any pipe required for the connection. All cut pipe will be ground and smoothed to remove snags and sharp edges. No mortar or collars shall be used on reconnections unless specifically approved by the Engineer.

18.07.05 Watertight Plugs

Watertight plugs of an approved type shall be installed in the ends of all pipe at times when pipe laying is not in progress or as ordered to prevent any contaminated material or vermin from entering the pipe. Pipelines shall be thoroughly flushed out upon their completion and when directed by the Engineer.

18.07.06 Removal of Existing Pipe

Existing pipe no longer in service that is removed from the system shall be disposed of properly by the Contractor. Openings in manholes, sewer lines, or wye branches remaining in place shall be properly plugged and sealed so as to eliminate any possibility of infiltration at the point of separation. All pieces of broken pipe shall be removed from the trench before backfill operations commence. Backfill of the trench shall be as specified in Technical Specifications Section 6- “Excavation and Backfill”. Inspection of structures remaining in place shall be made before backfill.

18.08 TESTING OF SEWER PIPELINES

18.08.01 Pressure Pipelines

Pressure sanitary sewer pipelines shall be tested in accordance with the applicable requirements of Technical Specifications Section 12 headed "Pressure Pipe Construction." Pressure sanitary sewer pipelines shall not be disinfected.

18.08.02 Gravity Pipelines

Gravity pipelines shall be tested for infiltration, exfiltration, deflection, or low pressure air test, at the Engineer's direction. The Contractor shall provide a closed-circuit television video camera inspection, in the presence of the City (or engineer) for all sanitary sewer pipe repairs and all new sanitary sewer construction. The video tape, CD, or DVD shall include time and date, footage, and audio describing any pipe abnormality; also, a CCTV inspection log shall be provided with each completed inspection. Any sewer pipeline found to be unacceptable by the Engineer shall be corrected, repaired, or replaced as directed by the Engineer, at no additional cost to the City.

1. **Infiltration Test**: Upon completion of a section of sewer line, a test for infiltration shall be conducted as directed by the City Inspector. Dewatering of the line to be tested shall terminate at least 2 days prior to the infiltration test. The maximum infiltration allowed in a 24-hour period shall not exceed 200 gallons per inch of diameter per mile of sewer from any section between successive manholes. If the infiltration exceeds the allowable limits, the line shall be further checked and repaired by the Contractor until the infiltration requirements have been met. If any location indicates concentrated infiltration, such location shall be investigated and corrected regardless of the overall infiltration requirement.

   Groundwater level measuring pipes shall be installed at manholes. The groundwater level shall be measured prior to testing. If the groundwater level is at least 2 feet above the highest section of the work being tested, infiltration methods of measurement shall be used. If there is insufficient groundwater head to perform infiltration testing, exfiltration tests will be made.

2. **Exfiltration Test**: If, in the opinion of the City Inspector, the position of a sewer line is above the normal groundwater table, the Engineer may direct the Contractor to perform an exfiltration test. The maximum allowable exfiltration during a 24-hour period shall not exceed 200 gallons per inch of diameter per mile of sewer from any section between successive manholes. An allowance of an additional 10 percent of gallonage shall be permitted for each additional 2 feet of head over a basic 2-foot minimum internal head.

   The exfiltration test shall be performed by plugging the upstream and downstream manholes of the test section, filling the line with water, and maintaining a minimum of 2 feet head of water in the section of line being tested. The rate of exfiltration shall be calculated from the water level drop in the upstream manhole during the 24-hour test period.

3. **Low pressure air test**: At the direction of the City Inspector or Engineer, each pipeline reach may alternatively be tested with air pressure (minimum 3.5 psi, maximum 5 psi) in accordance with UNI-BELL UNI-B-6-98 “Recommended Practice for Low-Pressure Air Testing of Installed Sewer Pipe.” The system passes the test if the pressure drop due to leakage through the pipe or pipe joints is less than or equal to 0.5 psig over the time period described below.

Minimum time period for a 0.5 psig pressure drop

The time period for the test shall be calculated from UNI-B-6-98 as follows:

T = 28.33 DK,
T = Shortest time, in seconds allowed for the air pressure to drop 0.5 psig,
K = .000419 DL, but not less than 1.0,
D = Nominal pipe diameter in inches, and
L = Length of pipe being tested in feet.

4. **Deflection Test**: Prior to final acceptance of the Project, all PVC pipelines shall be deflection tested. The Contractor or a City-approved test lab shall perform the deflection testing at the expense of the Contractor. The deflection test shall be performed a minimum of 7 days after the base has been compacted and sealed.

   The PVC pipe/soil system has been designed so that the maximum installed deflection does not exceed 5 percent and 7.5 percent of the base inside diameter of the pipe as listed in the following table:

Nominal Size (inches)	Base Inside Diameter (inches)	5% Deflection After 7 Days Mandrel (inches)	7.5% Deflection after 30 Days Mandre (inches)
ASTM D 3034 SDR-35			
8	7.665	7.28	7.09
10	9.563	9.08	8.85
12	11.361	10.79	10.51
15	13.898	13.20	12.86
ASTM F 679 TYPE T-1			
18	16.976	16.13	15.70
21	20.004	19.01	18.50
24	22.480	21.36	20.79
27	25.327	24.06	23.43
ASTM D 3034 SDR-26			
8	7.488	7.11	6.93
10	9.342	8.87	8.64
12	11.102	10.55	10.27
15	13.575	12.90	12.56
ASTM F 679 TYPE T-2			
18	17.054	16.20	15.77
21	20.098	19.09	18.59
24	22.586	21.46	20.89
27	25.446	24.17	23.54

The Contractor shall have the option of testing for 5 percent deflection after the base has been compacted and sealed for 7 days; or for 7 and 1/2 percent deflection after the base has been compacted and sealed for 30 days.

If the pipe fails the 7-day, 5 percent deflection test, the Contractor shall immediately conduct a 7 and 1/2 percent deflection test. If the pipe passes the 7 and 1/2 percent deflection test, the Contractor has the option of repairing that section at that time or waiting until a minimum of 30 days after the base has been compacted and sealed and then re-testing for a maximum of 7 and 1/2 percent deflection.

If the pipe fails the 7 and 1/2 percent deflection test after 7 days or at 30 days, the Contractor shall repair that section immediately.

If the Contractor performs the deflection testing rather than employing a City-approved test lab, the following shall apply:

The Contractor shall furnish the mandrel, labor, materials, and equipment necessary to perform the tests as approved by the Engineer. The mandrel shall be pulled through by hand or a hand operated reel in the presence of the Engineer. Prior to performing the deflection tests, the Contractor shall submit to the Engineer certification that the 9-arm mandrels are preset as stated above. Each mandrel shall be engraved with the following:

- Serial Number
- Nominal Pipe Diameter
- Either “ASTM D 3034,” year and either “SDR-35” or SDR-26” or “ASTM F 679,” year and either “Type T-1” or Type T-2”
- Percent deflection as stated above

If the mandrel fails to pass any section of pipe, the Contractor shall excavate and make all repairs (section replacements) necessary to correct the excessive deflection. The Contractor shall then backfill, recompact, reseal the permanent pavement base, and retest the line. If the mandrel fails to pass a second time, the affected section shall be replaced. Re-rounding shall not be permitted.

18.09 SANITARY SEWER PIPE REPAIRS

The contractor shall furnish all labor and materials to repair sanitary sewer pipelines as specified herein

18.09.01 General

A. The Contractor shall excavate and expose suspected damaged pipeline at general locations described by the County. The pipeline shall be exposed for visual inspection four feet on each side of the damaged area or as directed by the County. The City may authorize replacing bad joint materials (vitrified clay or concrete pipe) or removing and replacing the pipe.

B. Crushed stone shall be used in pipe bedding and to help stabilize trench bottoms. Special attention shall be given to compacting the bedding underneath the pipeline and its haunches.

C. Backfilling of repaired pipe shall proceed only in the presence of the Inspector.

18.09.02 Vitrified Clay Pipe Repairs

A. Repairs to VCP including cracked or crushed pipe, cracked bells, offset joints, holes, etc. shall be accomplished by replacing a section of damaged pipe with a piece of new C-900 PVC pipe. Such replacement shall be performed in accordance with the clay pipe manufacturer's recommendations. PVC repair sleeves shall be supplied by Contractor.

18.09.03 Iron Pipe Repairs

A. Repairs to iron pipe shall be accomplished by one of two methods
   1. Application of an appropriate repair sleeve
   2. When the damaged area is larger than recommended for repair sleeves, the damaged section will be cut out and replaced with a section of new ductile iron pipe or PVC, as specified by the Engineer.

B. The connections of new and old pipe shall be accomplished with two new ductile iron solid sleeves. All iron pipe repair work shall be performed in accordance with the manufacturer's recommendations. All repairs, including sleeves, shall be wrapped in polyethylene encasement.

18.09.04 Reinforced Concrete Pipe Repair

A. Reinforced concrete pipe repair shall be accomplished by the use of a reinforced concrete collar. Reinforcing shall be circumferential with a minimum cross-section area as specified in ASTM Des: C76 for Class V, R.C.P. of the same diameter as the damaged pipe. For damaged areas less than two feet in diameter, the collar may be the sole element of repair. A cutout of corrugated metal pipe shall be placed over the damaged area only to aid in the formation of the collar. The collar shall extend three hundred sixty (360) degrees around the pipe and two feet past the damaged area and corrugated metal in the longitudinal axis.

B. For larger repairs, the collar shall be used as a closure. The damaged pipe length shall be removed and become the property of the Contractor. The replacement length may be jointed with the existing pipe on one end only. The existing portion of the joint shall be thoroughly cleaned, and the rubber gasket replaced. After fully seating the joint, the other end shall receive a concrete collar closure extending two feet past the joint in the longitudinal direction. If the new and existing joints are not identical, the closure shall be used at both ends.

18.09.05 Polyvinyl Chlorine Pipe Repair

A. For non-pressure applications, existing and new pipe shall be jointed with flexible couplings with stainless steel straps as approved in these Technical Specifications. Only the flexible

coupling recommended by the manufacturer for the particular pipes to be jointed shall be used

B. For pressure pipe applications, repairs shall be made by one of the two methods as specified for iron pipe, except replacement pipe shall be PVC pressure pipe.

18.09.06 Final Acceptance

A. In the case of pressure pipe applications, after the pipe repair is complete and still exposed, the pipeline will be placed in service. Visual inspection, by the Engineer, of the repair while the pipeline is pressurized will provide tentative acceptance of the repair, provided no leaks are present. Repair of leaks or unsatisfactory work shall be performed at no cost to the City. Final acceptance will be granted after proper backfilling and surface restoration is accomplished.

B. In the case of non-pressure service, the Contractor shall backfill and have the line inspected by a City Inspector. The line shall be inspected by one of two methods: (1) inspection by mirrors and sunlight and/or (2) television inspection as directed by the Engineer.
   1. Upon submission of inspection video records via USB the City will review and verbally respond within one working day. If the repair is not satisfactory to the Engineer, the Contractor will, at no cost to the City, re-excavate, make repairs, television inspect and backfill.
   2. When the repair is satisfactory to the Engineer, the Contractor will be directed to complete surface restoration. Upon satisfactory completion of surface restoration, final acceptance will be granted.

END OF SECTION

SECTION 20 – WASTEWATER SYSTEM CCTV INSPECTION AND CLEANING

20.01 SCOPE OF SERVICES AND WORK PHASING FOR SYSTEM CCTV INSPECTION AND PIPE CLEANING

A. The purpose of this bid is to obtain competitive unit prices for all labor, material, and equipment necessary to inspect via closed-circuit television (CCTV) and clean existing sanitary sewers ranging in size from 6 to 24-inch diameter. The work includes hydraulic root cutting and cleaning, grinding protruding break-in service connections, remote televising and recording of the sewer location and condition. All project locations will be within the City's service area.

B. All City assets will be identified using the established facility identification code (FID) for all inspection reports, geographical exhibits, data sets and asset management tasks. Assets may include, but not be limited to, manholes, clean outs, gravity mains, force mains, air release valves, and conflict structures. Asset FIDs will be provided to the Contractor prior to the start of inspection. Failure to utilize the FID could result in additional inspection at the Contractors expense.

C. Compliance with this contract shall be complete when all conditions set forth in these specifications have been met. The work to be completed on each section of sewer will be performed as applicable and in phases as defined in the following:

20.01.01 PHASE 1: PRE-CLEANING INSPECTION

A. The preferred method for Pre-Cleaning Inspection is color CCTV conforming to NASSCO Pipeline Assessment Certification Program (PACP), and for the data to be exported electronically in a PACP certified format. The data must be shown in an Asset Management and Viewing Software that is accessible to the City of St. Pete Beach. Since this inspection is performed prior to cleaning, it is understood that the video may not provide an "unobstructed view of the entire pipe".

B. The Contractor may propose other methods to the City prior to bid for inspection such as, zoom camera inspection, digital sidewall scanning inspections, acoustical technology, etc.

C. If the Contractor is performing the Pre-Cleaning Inspection, the method must be pre-approved by the City prior to inspection of the sewer interior.

D. It is not the intent of this specification to require bypass pumping to control heavy flow; however, the Contractor must, at a minimum, make reasonable effort to control the flow by using flushing equipment. See this specification for sequencing of cleaning and inspection during heavy flow

scenarios. The Contractor must also consider weather conditions to obtain the best video image of the sewer. This may require the Contractor to delay any video work after major rain events until the system can return to lower dry weather flow.

E. Based on the quality of the results, the City can reserve the right to reduce the scope of the Phase 1 Pre-Cleaning Inspection.

20.01.02 PHASE 2: CLEANING DETERMINATION

Based on the City and Engineer's review, he or she will determine if cleaning or any additional work will be required. At the sole discretion of the City it is to either declare the work on the particular sewer segment complete or notify the Contractor of additional work (i.e. Phase 3: Light Sewer Cleaning, Heavy Cleaning, Deposit Cut, Root Cut Medium, Root Cut Ball, or Lateral Cut)

20.01.03 PHASE 3: SEWER PIPE CLEANING

The Contractor shall perform the assigned additional work, which may include, but is not limited to the following items as defined in these specifications: Light Cleaning, Heavy Cleaning, Root Cut Medium, Root Cut Ball, Deposit Cut, or Lateral Cut.

20.01.04 PHASE 4: POST CLEANING INSPECTION

Final televising of the sewer segments determined by the City include evaluating the condition of the sewer segments after all cleaning has been performed in Phase 3.

A. The recorded video must show the entire circumference of the sewer. Any flow control to remove standing water and debris shall be incidental to the contract. The Contractor shall submit PACP data to include the electronic video reports, logs, etc. for the City's review.

B. The data must be shown in an Asset Management and Viewing Software that is accessible to the City of St. Pete Beach. The Contractor shall provide up to three software licenenses to the City and the Engineer which shall include, but not be limited to, viewing, editing, and exporting capabilities of all inspection data.

C. The segments of sewer to be cleaned and televised through this contract will be located primarily within the paved areas of the public right-of-way; however, there may be some sewer segments that are located within public easements on private property. The successful bidder, with assistance of the City as required, will be responsible to coordinate and gain access to any and all sewer segments and will be responsible for any restoration in accordance with technical specification Section 07 "Surface Restoration". This will include written authorization between

Contractor and landowner. It is the City's right to omit segments that are adequately covered in the Pre-cleaning Inspection video.

20.02 COMPLIANCE AND ACCEPTANCE

Compliance with this contract shall be complete when all conditions set forth in these specifications have been met. The following defines each work item, the level of effort, and quality of work that will be necessary to meet the intent of this specification:

20.02.01 PRE-CLEANING INSPECTION

A. The preferred method for Pre-Cleaning Inspection is color CCTV conforming to National Association of Sewer Service Companies' (NASSCO) Pipeline Assessment Certification Program (PACP), exported electronically in a PACP compliant format. Other methods for inspection, including CCTV, zoom camera inspection, digital sidewall scanning inspections, acoustical technologies, etc. must be preapproved by the City prior to inspection of the sewer interior.

B. Should the level or type of debris differ from the original inspection, the work type can be adjusted by the City to the proper work type and the work shall be paid at the adjusted, proper rate. The Contractor shall be responsible for providing evidence of the change in conditions to the City.

20.02.02 LIGHT SEWER CLEANING (EACH SEGMENT)

A. The Contractor shall clean the sewer and associated manholes, including drop connections and benches, with hydro-jetting equipment. This will require an unlimited amount of passes and a minimum of two passes of high-velocity hydro-jetting equipment to remove all loose debris and collect it for removal in the downstream manhole. The first pass shall be restricted to 800 psi at the nozzle head, and the second and subsequent passes shall be at 1200 psi. All debris must be removed from the sewer, including any debris that may have been washed up into any service connections (does not include known pre-existing conditions in service connections), drop connections or the bench wall of the manholes. This item does not include any root cutting, deposit removal, or grinding of protruding service connections.

20.02.03 HEAVY SEWER CLEANING (EACH SEGMENT)

A. Pipes that cannot be cleaned by the methods described in the Light Sewer Cleaning sub-section shall be cleaned with rotating nozzle equipment. This also includes Deposits Attached Grease (DAGS) if able to remove with rotating nozzle or other mechanical means; not to

include saws or cutters. Compliance with this section requires substantial effort towards cleaning.

B. Under this bid item, the Contractor shall remove all obstructions in the sewer. All debris must be removed from the sewer, including any debris that may have been washed up into any service connections (does not include known pre-existing conditions in service connections), drop connections or the bench wall of the manholes. This includes all grease, rocks, debris, sticks, etc. that will reduce the hydraulic capacity of the sewer and limit future maintenance access of remote equipment. This work will include an unlimited number of passes by high velocity rotating nozzleequipment in conjunction with specialty cleaning equipment. All pipes shall be restored to at least 95 percent of their nominal diameter. Joint sealant shall be removed to within ¼ inch of the pipe wall. Removal of excessive joint sealant will generally not be required until just prior to lining of the pipe segment (if necessary), unless the joint sealant prevents the passage of the CCTV equipment. The Contractor shall be responsible for any damage to the sewer or any service connections. This item does not include cutting/grinding protruding break-in connections, as that work will be paid under a separate bid item.

C. The Contractor shall maintain detailed documentation of cleaning efforts made to remove these items. Such documentation shall be made available to the City at any time.

D. The Contractor shall immediately notify the City if he believes that this level of cleaning will cause a sewer collapse due to the existing deterioration of the host pipe. The City's determination whether to continue or stop work is final.

20.02.04 ROOT CUT (EACH SEGMENT)

A. Root Cut Medium - Removal of Roots Medium (RM), and Root Balls (RB) in one or two joints.

B. Root Cut Ball – Removal of Root Balls (RB) removed in at least 3 joints.

C. The City shall determine if the sewer segment requires root cut cleaning. All roots must be screened, collected, and removed from the sewer for proper disposal.

D. The Contractor shall immediately notify the City if he believes that these activities performed under this paragraph will cause a sewer collapse due to the existing deterioration of the host pipe. City's determination whether to continue or stop work is final.

20.02.05 DEPOSIT CUT (EACH SEGMENT)

A. Removal of Deposits Attached Encrustation (DAE) and Deposits Attached Grease (DAGS) that require a cutter to remove.

B. Under this bid item, the Contractor shall remove all obstructions in the sewer. All debris must be removed from the sewer, including any debris that may have been washed up into any service connections (does not include known pre-existing conditions in service connections), drop connections or the bench wall of the manholes. This includes all deposits, grease, debris, sticks, etc. that will reduce the hydraulic capacity of the sewer and limit future maintenance access of remote equipment. This work will include an adequate number of passes using high velocity hydro-cleaning equipment required to produce a clean pipe in accordance with these specifications. A mechanical/hydraulic root, chain cutter, etc. may be used where necessary at no additional cost to the City; however, the Contractor shall be responsible for any damage to the sewer or any service connections. This item does not include cutting/grinding protruding break-in connections, as that work will be paid under a separate bid item

C. Compliance with this section requires substantial effort towards cleaning, chipping, cutting, grinding, etc. to remove hardened deposits, grease, etc. The Contractor shall use remote CCTV equipment to monitor the progress of the work and ensure that the sewer is not damaged.

D. The Contractor shall immediately notify the City if they believe that activities performed under this paragraph will cause damage due to the existing deterioration of the host pipe. The City's determination whether to continue or stop work is final.

E. The Contractor shall maintain detailed documentation of cleaning efforts made to remove these items.

F. If attached deposits cannot be removed by tools normally used in the industry, the City should be consulted immediately. The City and the Contractor should discuss whether to cancel the work on that segmentation or negotiate a flat rate or hourly rate for the Contractor to do the work.

20.02.06 LATERAL CUT (EACH SEGMENT)

A. Removal of protruding laterals shall comply with Specification 36 and the requirements outlined below.

B. Removing protruding laterals, excludes DIP, SP, CAS etc.

C. The City shall determine when break-in service connections will require grinding based on his review of the initial survey television inspection. The Contractor shall cut/grind the protruding service connection by using a remote grinding/cutting device capable of removing, concrete, vitrified clay, PVC and other types of pipe material. The device shall be specifically designed to cut/grind protruding service connections. The Contractor shall use remote CCTV equipment to monitor the progress of the work and ensure that the service connection is not damaged.

D. The protruding break-in service connection shall be cut/ground flush to the main sewer pipe without scouring or damaging the main sewer or service connection. All cuttings must be screened, collected, and removed from the sewer for proper disposal.

E. During the final survey television inspection, the Contractor shall slowly pan the entire circumference of the trimmed connection to verify the quality of the work.

F. The Contractor shall immediately notify the City if he believes that the pipe is not structurally sound. The Contractor and City shall discuss the severity and risk of cutting/grinding the lateral. The City shall then determine, if they want the lateral cut/ground, at the City's risk, or if the work should not be performed on this contract.

G. If other than typical lateral materials are encountered, the Contractor shall notify the City and the City and Contractor should discuss the ability, costs and risks associated with cutting/grinding the lateral. The City shall decide whether to cut/grind the lateral or to not cut/grind the lateral. If the City decides to cut/grind the lateral, the price should be negotiated between the City and Contractor, prior to cutting/grinding the lateral.

20.02.07 DEBRIS RECORDS

The Contractor shall keep records of types of debris, removed from each segment of pipe and provide these records to City in the format requested by City.

20.02.08 FINAL SURVEY TELEVISION INSPECTION

As in the initial survey television inspection pay item, CCTV inspections will be conducted entirely in digital format.

All CCTV work shall conform to the most current NASSCO PACP standards. The documentation of the work shall consist of NASSCO PACP CCTV Reports, Unmodified NASSCO PACP database, logs, electronic reports, etc. noting defects and observations encountered during the inspection.

All City assets will be identified using the established facility identification code (FID) for all

inspection reports, geographical exhibits, data sets and asset management tasks. Assets may include, but not be limited to, manholes, clean outs, gravity mains, force mains, air release valves, and conflict structures. Asset FIDs will be provided to the Contractor prior to the start of inspection. Failure to utilize the FID could result in additional inspection at the Contractors expense.

Acceptance of pipe segment cleaning shall be made upon the successful review of the CCTV inspection by the Engineer. If the CCTV inspection shows the cleaning to be unsatisfactory, the Contractor shall be required to repeat the cleaning and CCTV inspection of the pipe segment until the cleaning is shown to be satisfactory. Such repeat cleaning and CCTV inspection shall be made at the Contractor's expense.

20.03 CLEANING EQUIPMENT

A. The wastewater system shall be cleaned with industry standard truck-mounted high velocity hydro-cleaning equipment. No mechanical bucket machinery will be acceptable for the cleaning process. The equipment shall be provided with a minimum of 500 ft of one-inch 10 high-pressure hose with a selection of high velocity nozzles, as required for the cleaning and heavy cleaning operations. The equipment shall have a minimum usable water capacity of 1000 gal. The pumps shall be capable of delivering a minimum 60 gpm at 3000 psi. Pressure to the nozzle shall be regulated by a relief valve, adjustable from a to 1,500 psi minimum. The nozzles shall produce a scouring action from 15 to 45 degrees in all size pipes to be cleaned. The equipment shall carry its own 1,000 gal water tank capable of holding corrosive or caustic cleaning or sanitizing chemicals, engines and pumps, and a hydraulically-driven hose reel. The equipment shall also include a high velocity washing hose for ancillary cleaning of the walls and floor of manholes. The hose shall have an adjustable nozzle capable of producing flow from a fine spray to a solid stream. All controls shall be located so that the equipment can be operated above ground. During hydro-cleaning, the Contractor shall restrict the flow level in the pipe to a maximum of 50 percent of the pipe diameter. Particular care should be taken to avoid flooding house connections during hydro-cleaning operations.

B. The Contractor shall provide equipment capable of removing all sand, dirt, rocks and other debris from the pipe segment to allow unobstructed remote CCTV inspection of all internal pipe surfaces.

C. The Contractor shall certify that backup cleaning equipment, including machines, devices, tools, etc, is available and can be delivered to the site within 24 hours.

D. Any blockages of building service connections resulting from the cleaning or other items of work shall be removed by cleaning of the building connection by the Contractor, at his own expense. Any damage caused by flooding of building service connections shall be corrected by the Contractor, at his own expense.

E. The Contractor shall provide specialty equipment capable of mechanically removing all attached,

hardened and/or cemented debris including, but not limited to, roots, grease, calcification, tuberculation, joint sealant, other hardened or tightly adherent deposits, etc. which cannot be removed by the use of industry standard high velocity hydro-cleaning equipment alone. Specialty equipment shall include, but is not limited to, a root saw, spring blade root cutter chuck or approved equal.

20.04 REFERENCED DOCUMENTS

A. All work must also conform to the latest edition of the following specifications:

1. State Department of Transportation, Construction and Materials Specification.
2. Rules and Regulations and Standard Drawings.
3. Rules and Regulations of the Office of the County/City Engineer.
4. If there is a difference in these specifications, the Rules and Regulations shall govern, DOT Specification.
5. NASSCO PACP Standards.
6. Other standards as appropriate.

B. Notification

1. If observed defects are believed to be such that further cleaning operations may compromise the structural integrity and/or cause the pipe to become unusable, the Contractor must provide written communication to the City's designee of the observed condition(s) and reason to believe that continued cleaning operations may cause substantial damage. The City will then direct the Contractor as to what services, precautions, etc., the City will require of the Contractor. If the contract documents do not address this potential, then the City and Contractor will negotiate in good faith, the conditions under which the work is to continue or cease to continue.

2. This exception may only be used to prevent asset damage and shall not be used to eliminate difficult or adverse cleaning areas that were previously documented in these documents or by prior written communication with the City.

20.05 GENERAL EXECUTION

A. The Contractor shall furnish and maintain, in good condition, all cleaning and televising equipment necessary for proper execution of the work.

B. Maintaining Flow: It will be the responsibility of the Contractor, throughout the tenure of this contract, to provide and maintain sufficient flow at all times to pass any flash of storm flow of drainage ditches and prevent any backwater flooding due to obstruction caused by cleaning or CCTV equipment.

C. Retrieval of Materials and Equipment: It shall be the Contractor's responsibility to remove

materials and equipment that has been lodged in the sewer from cleaning, television inspection, or point repair excavations.

D. After determining the preliminary requirements and the feasibility of effective CCTV inspection, the Contractor shall thoroughly clean all required pipe segments as required to permit an unrestricted inspection by industry standard CCTV inspection equipment. Particular emphasis shall be afforded the removal of accumulated grease, roots, sand, rocks, bricks, sludge and other debris so that the CCTV inspection will clearly show all portions of the pipe being inspected. Acceptance of pipe segment cleaning shall be made upon the successful completion of the CCTV inspection and shall be defined as removing sufficient material to permit an unrestricted view of the pipe internal surfaces and to ensure an effective rehabilitation of the pipe segment, all to the satisfaction of the Engineer.

E. Except during drought conditions, water required for the cleaning will be provided by the City or County at locations to be specified by the City. The City or County shall furnish and install water meters at all points where water is drawn from the City's supply. The City or County will charge a fee for the water used. A backflow prevention device shall be used to prevent contamination of the potable water system. The Contractor is responsible for any damage resulting from improper operation of hydrants. Do not use or obstruct a fire hydrant when there is a fire in the area.

F. The Contractor shall not waste water from the public water supply because of improper connections or from hydrants left open.

G. The Contractor shall remove all bricks, rocks, debris, sludge, dirt, sand, grease, roots and other materials from the pipe segment ordered to be cleaned and collect and remove the resulting debris from the downstream manhole of the pipe segment. Passing waste material between manholes, causing accumulations of sand, system stoppages, or damage to the pumping equipment shall not be permitted. When necessary, a dam trap or weir and screen shall be temporarily installed in the downstream manhole in such manner that debris and solids shall be trapped and retained for subsequent removal.

H. Waste and debris cleaned from the pipe segment shall be removed at the downstream manhole by pumps or other means. The discharge and drainage stream shall be returned downstream to the wastewater collection system for disposal. Under no circumstances shall wastewater or solids be dumped onto the ground surface, street, or into ditches, catch basins or storm drains. All solid and semi-solid debris resulting from the cleaning operations shall be removed from the site and taken to the wastewater treatment facility to which the debris would have arrived in the absence of the cleaning operation, unless directed otherwise. The Contractor is responsible for transporting the debris and must remove and properly dispose of excess water from the debris prior to disposal at the City's wastewater treatment facilities.

I. Where access to manholes in easements and rights-of-way is required, the Contractor shall obtain permission from the homeowner for equipment access.

J. Barricades and warning signs shall be used in work areas and around open manholes. The Contractor shall furnish and maintain traffic controls and safety devices as required.

K. Employ satisfactory precautions to protect the pipe and manholes from damage that might be inflicted by improper selection of the cleaning process or improper use of the equipment. Immediately notify Engineer if fresh soil, pieces of pipe, or other visible signs of potential problems occur during cleaning operation. When using hydraulically propelled devices, take precautions to ensure that the water pressure created does not cause damage or flooding to public or private property. Do not surcharge the wastewater beyond the elevation that could cause overflow of wastewater into area waterways or buildings, or onto the ground.

L. The Contractor shall clean upstream reaches of the system before the downstream reaches are cleaned. Hydro-cleaning equipment shall be inserted in the downstream manhole of the pipe segment, and the cleaning work shall proceed from upstream to downstream. Winching equipment used shall not damage the pipe or manholes.

20.06 SUBMITTALS

A. All submittals shall comply with Specification Section 03 - Submittals and are due as scheduled. Work will not proceed until all submittals are received and approved. The project manager reserves the right to adjust the due dates of the submittals based on Contractor performance. The Contractor shall label each submittal indicating what is represented, name of Contractor, and project number. All submittals identified as being in error shall be re-performed and corrected at the Contractor's expense.

B. Submittals Required with Bid Documents include:

1. List of references per specifications
2. Documentation of Certification of PACP Software
3. Asset Management and Viewing Software

C. Submittals required seven (7) days prior to the Pre- construction Meeting for CCTV Inspection or Pipe Cleaning

1. Name of the project supervisor and resumes.
2. Documentation of NASSCO PACP certification for all CCTV operators, database and software.
3. Site Safety Plan. A complete generic site safety plan must be submitted one week prior to the pre-construction meeting. Work will not begin until an approved site safety plan is in place.
4. Sample inspection CCTV data and video or data from other approved inspection method.
5. Acknowledgment of required nomenclature utilizing the provided FID

D. Submittals Required for the Pre-construction Meeting

1. An initial comprehensive schedule of work to be approved by the City.
2. Management Organization: Provide an organization chart depicting the essential organizational elements and senior personnel of the proposed Contractor and the functions and interrelationships of the personnel proposed to provide technical support, project management and supervision for this project. Provide succinct resumes of the personnel proposed to provide technical support and project management for this project. The personnel designated in the management summary for essential positions shall not be changed except with the permission of City. The City will only approve such a change when, in its opinion, the substitute personnel have equal or greater qualifications and experience to those intended to be replaced.
3. Proof that Contractor is an approved/bonded Contractor with the City.

E. Submittals Required One Week Prior to Any Cleaning & Televising Work

1. Site specific site safety plan addenda.
2. Entry releases, if applicable

F. Weekly Submittals

1. Detailed updates to the work schedule will be provided to the project manager no later than 1:00 p.m. on the Friday preceding the next week's cleaning and televising work.
2. USB External Storage Drive with CCTV videos, logs, and / or electronic worksheets submitted 7 days prior to work). All field paperwork must be submitted before the Contractor’s invoice will be processed for payment.
3. Corrections to punch list items as required by the project manager to fulfill the requirements of this specification.

G. Final Submittals Prior to Payment

1. Corrections to punch list items as required by the City to fulfill the requirements of this specification.

20.07 OWNER RIGHTS

A. The City reserves the right to stop the work when, in the project manager's judgment, the Contractor's work or activities are threatening the health and safety of the public or endangering the environment or endangering the waters of the state. Work shall not proceed until a satisfactory resolution has been achieved, as determined in the sole and unfettered opinion of the City.

B. The Contractor or Subcontractor shall not perform any work which is not specifically identified in the work schedule unless approved by the City. Notification of such work must be received no later than 8:00 a.m. on the day the work is to be performed. A list of persons available to be notified will be given at the pre-construction meeting.

20.08 EMERGENCY RESPONSE

The Contractor shall provide a telephone number and pager number to the City. These numbers are intended for the project manager's use in contacting the evening/weekend/holiday emergency work crew for emergencies resulting from the Contractor's actions or lack thereof during this project. This crew shall be responsible for contacting the City within one-half hour after the first verbal or electronic notification. If the Contractor's crew has not responded to the site of the emergency within one hour of the first summons, verbal or electronic, the City will make all necessary repairs and bill the Contractor for all work performed. Costs related to the emergency response will be incidental to the contract and not measured for payment.

20.09 SEQUENCE OF INSPECTION AND CLEANING

A. The Contractor shall coordinate with the City and any Jurisdictions required to isolate any pipe segments with significant flow that would prohibit cleaning and inspection. The cleaning and inspection of the pipe segment shall be done outside of peak hour flows. The steps to clean and inspect the pipe segment include:

1. The lift/pump stations contributing flow into the sewer line to be inspect and cleaned must be pumped down.
2. Once stations are pumped down, the stations shall be turned off and the sewer line must be plugged to allow work to commence.
3. The Contractor must monitor the levels within the stations at all times while work has started with City personnel present.
4. After inspection and cleaning within the pipe segment is completed, the plug shall be removed and the stations shall be restarted to be pumped down again.
5. Repeat steps 1-4 for each segment of sewer line to be cleaned or inspected.

B. The Contractor is responsible for the operation and maintenance of the bypass systems.

C. The Contractor shall perform all work associated with bypassing without causing damage to existing improvements to remain, and without causing a spill of sewage outside the sewer system. Any damage results from the Contractor's work shall be repaired or replaced to the satisfaction of the City, and at no cost to the City. All fines, and costs associated with the cleanup of spills, shall be the responsibility of the Contractor.

END OF SECTION

SECTION 21 – CURED-IN-PLACE-PIPE (CIPP)

21.01 GENERAL

It is the intent of this section of these Specifications to provide for the reconstruction of pipelines and conduits by the installation of a resin-impregnated flexible tube that is either inverted or pulled into the original pipeline/conduit and expanded to fit tightly against said pipeline by the use of water or air pressure. The resin system shall then be cured by elevating the temperature of the fluid (water/air) used for the inflation to a sufficient enough level for the initiators in the resin to affect a thermosetting reaction.

The Contractor shall furnish all materials, labor, equipment, and services necessary for liner installation including: traffic control, pump around pumping and/or diversion of wastewater flows, cleaning and closed circuit television video (CCTV) inspection of the pipe segment to be lined, service lateral reconnection, final CCTV inspection and testing of lined pipe system, surface restoration, and cleanup of the Work site.

The Contractor is advised that this Contract requires work in active wastewater collection systems and shall follow all federal, state and local requirements for safety in confined spaces. The Contractor shall conform to all guidelines by the Occupational Safety and Health Administration (OSHA) Federal Regulations; 29 CFR Ch. XVII, Section 1910.146 Confined Space Entry.

21.02 REFERENCE DOCUMENTS

This Specification references ASTM D5813 (Standard Specification for Cured-in-Place Thermosetting Resin Sewer Pipe) ASTM F1216 (Standard Practice for Rehabilitation of Existing Pipelines and Conduits by the Inversion and Curing of a Resin-Impregnated Tube), ASTM F1743 (Standard Practice for Rehabilitation of Existing Pipelines and Conduits by Pulled-In-Place Installation of Cured-In-Place Thermosetting Resin Pipe), and ASTM D3839 (Standard Practice for Underground Installation of “Fiberglass” (Glass-Fiber Reinforced Thermosetting Resin) Pipe).

21.03 QUALIFICATION REQUIREMENTS

The system proposed (materials, methods, workmanship) must be proven through previous successful installations to an extent and nature satisfactory to the City and the Engineer that is commensurate with the size of the project being proposed. Since CIPP is intended to have a 50-year design life, only products deemed to have this performance will be accepted. All products and installers must be pre-approved prior to the formal opening of proposals.

Products and Installers seeking approval must meet all of the following criteria to be deemed commercially acceptable:

For a Product to be considered Commercially Proven, a minimum of 250,000 linear feet and/or 1000 line sections must have been successfully installed in North America. The Manufacturer (Li–censor) shall have completed sufficient enough testing to document that the materials and the method(s) of installation proposed will produce the desired long-term performance. All products used shall conform to the Contract Documents and these Technical Specifications. Chemical grout designed for injection shall be: AV -100 chemical grout as manufactured by Avanti International, or approved equal.

For an Installer to be considered Commercially Proven, the Installer must satisfy all insurance, financial, and bonding requirements of the City, and must have at least three years active experience in the commercial installation of the product bid. The Installer's key personnel shall have at least 100,000 linear feet and/or 300 line sections of successful experience (included in this experience shall be a sufficient quantity of installations in the sizes proposed for this project). The Installer shall be "ISO" certified or demonstrate that he/she has a similar quality assurance system in place. Additionally, the Contractor shall be certified and/or licensed by the liner manufacturer(s) as an approved installer for the products referenced in this specification

Documentation for products and installers seeking pre-approved status must be submitted no less than two weeks prior to the proposal due date to allow time for adequate consideration. The City will advise of acceptance (or rejection) a minimum of three days prior to the due date. All required submittals must be satisfactory to the City.

21.04 SUBMITTALS

The Contractor shall submit the following information:

1. Manufacturer's certification that the materials to be used meet the referenced standards and these specifications.

2. License or certificate verifying Manufacturer's/Licensor's approval of the installer.

3. Proposed equipment and procedures for accomplishing the work.

4. Lining Manufacturer's product data and instructions for resin and catalyst system.

5. Contractor's procedures for sealing CIPP liners from groundwater infiltration/migration at manholes. Details of all component materials and construction details such as hydrophilic rubber seals.

6. Manufacturer's or Assembler's guidelines for storage procedures and temperature control, handling and inserting the liner, curing requirements and details, service connection methods, and trimming and finishing.

7. Manufacturer's or Assembler's guidelines for minimum and maximum pressures, temperatures, and time durations to be used during liner inversion, cure, and cool down. 8. Procedures for cool down and relieving static head after the CIPP liner is cured

8. Manufacturer's or Assembler's guidelines for factory and/or field (whichever applies) wet out procedures including: volume of resin per unit of liner, roller gap setting, mixing ratios and procedures for resin and catalyst/hardener, shelf life of resin, pot life of resin, and required wet out procedure to ensure full saturation.

9. The Contractor shall also provide field measurements and liner sizing calculations which demonstrate the liner wall thickness design for each pipe segment and that the liner has been properly undersized to avoid the creation of wrinkles or folds. Tabular liner wall thickness calculations shall be provided for each pipe diameter in no less than 1-foot increments from 1 foot to 6 feet cover depth and in 2-foot cover depth increments thereafter. The tabulated liner wall thickness

for each pipe diameter/cover depth interval shall be the maximum wall thickness calculated over the cover depth interval. Special liner wall thickness calculations shall be submitted for installations with less than 3 feet of cover. The liner wall thickness shall be increased as required based on actual pipe ovality determined by the pre-installation CCTV inspection.

10. The Contractor shall submit pump around pumping and/or diversion plans to the Engineer a minimum of 14 days prior to the needed use for review and approval. In some cases verbal confirmation of the plan and approval with the Engineer or City Inspector may be used in lieu of a written plan. The Contractor shall notify the Engineer a minimum of 48 hours prior to commencement of the pump around operation. Failure to receive approval by the Engineer or City Inspector may result in the Contractor's Work being halted at no cost to the City.

11. The Contractor shall submit drawings that identify the liner insertion, pump around pumping locations and methods with sufficient detail to assure that the Work can be accomplished without spill or discharge of wastewater. The pump around pumping plan shall include an emergency response plan to be followed in the event of a failure of the pumping system.

21.05 MATERIALS

21.05.01 The Tube

The tube shall consist of one or more layers of a flexible needled felt or an equivalent nonwoven or woven material, or a combination of nonwoven and woven materials, capable of carrying resin and withstanding the installation pressures and curing temperatures. The tube should be compatible with the resin system to be used on this project. The material should be able to stretch to fit irregular pipe sections and negotiate bends.

The tube should be sewn or flame-bonded to a size that, when installed, will tightly fit the internal circumference and the length of the original conduit. Allowances should be made for the longitudinal and circumferential stretching that occurs during placement of the tube.

The tube shall be uniform in thickness and when subjected to the installation pressures will meet or exceed the designed finish wall thickness.

Any plastic film applied to the tube on what will become the interior wall of the finished CIPP shall be compatible with the resin system used, translucent enough that the resin is clearly visible, and shall be firmly bonded to the felt material.

The outside of the tube shall be marked for distance at regular intervals along its entire length, not to exceed 5 feet. Such markings shall also include the lining manufacturer’s name or identifying symbol.

Seams in the tube shall be stronger than the non-seamed felt.

The minimum tube length shall be that deemed necessary by the Contractor to effectively span the distance from the inlet to the outlet of the respective manholes or access points, unless otherwise specified. The Contractor shall verify the lengths in the field before impregnation of the tube with

resin. An individual tube insertion operation may be made over multiple contiguous pipe segments as determined in the field by the Contractor and reviewed by the Engineer.

21.05.02 The Resin System

The resin system shall be a corrosion resistant polyester, vinylester, or epoxy and catalyst system that when properly cured meets the minimum requirements given herein or those that are to be utilized in the design of the CIPP for this project. Resin shall not be subjected to ultraviolet light and shall form no excessive bubbling or wrinkling during lining.

21.06 STRUCTURAL REQUIREMENTS

The design thickness of the liner shall be arrived at using standard engineering methodology. ASTM F1216, Appendix X1, has such an acceptable methodology that may be used where applicable. The long-term flexural modulus to be used in the design shall be verified through testing. The long-term modulus shall not exceed 50% of the short-term value for the resin system unless the tube contains reinforcements. In the event that a reinforced tube is utilized, the long-term flexural modulus shall be the percentage of the short-term modulus as determined by the above referenced testing.

The layers of the finished CIPP shall be uniformly bonded. It shall not be possible to separate any two layers with a probe or point of a knife blade so that the layers separate cleanly or such that the knife blade moves freely between the layers. If separation of the layers occurs during testing of the field samples, new samples will be cut from the work. Any reoccurrence may be cause for rejection of the work.

The finished CIPP shall fit tightly to the host pipeline at all observable points and shall meet or exceed the minimum thickness established by the design process. The materials properties of the finished CIPP shall meet or exceed the following structural standards:

MINIMUM PHYSICAL PROPERTIES

Property	ASTM Test Method	Polyester System	Filled Polyester System	Vinyl Ester System
Flexural Strength	D790	4,500psi	4,500psi	5,000psi
Flexural Modulus (Initial)	D790	250,000psi	400,000psi	300,000psi
Flexural Modulus (50 Yr)	D790	125,000psi	200,000psi	150,000psi
Tensile Strength	D638	3,000psi	3,000psi	4,000psi

The required CIPP liner wall thickness shall be based, as a minimum, on the physical properties in Section 17.080 of this Specification, in accordance with the design equations in the Appendix of ASTM F1216, and the following design parameters:

Design Safety Factor	=	2
Retention Factor for Long-Term Flexural Modulus to be used in Design *(as determined by Long-Term tests described in Section 17.08B)*	=	1% - 50%

Ovality	=	5%
Groundwater Depth (above invert)	=	Assume at Existing Grade
Soil Depth (above crown)	=	Based on field measurements
Soil Modulus	=	700 psi
Soil Density	=	120 pcf
Live Load	=	AASHTO HS - 20
Design Condition	=	Fully Deteriorated
Enhancement Factor	=	7.0
Poisson's Ratio	=	0.3

The CIPP liner material shall conform to the minimum wall thicknesses, as listed below:

MINIMUM WALL THICKNESSES

CIPP	Thickness
4"-6"	3.0 mm
8"-12"	6.0 mm
15"	7.5 mm
18"-21"	9.0 mm
24"-27"	10.5 mm
30"-36"	12.0 mm
42"	13.5 mm
48"	15.0 mm

Any layers of the tube that are not saturated with resin prior to insertion into the host pipe shall not be included in the CIPP liner wall structural thickness computation.

21.07 INSTALLATION

The CIPP shall be installed in accordance with the practices given in ASTM F1216 (for direct inversion installations) or ASTM F1743 (for pulled-in-place installations). The quantity of resin used for the tube's impregnation shall be sufficient to fill the volume of air voids in the tube with additional allowances being made for polymerization shrinkage and the anticipated loss of any resin through cracks and irregularities in the original pipe wall. A vacuum impregnation process shall be used in conjunction with a roller system to achieve a uniform distribution of the resin throughout the tube. The impregnated liner tube shall be transported to and stored at the site in such a manner that it will not be damaged, exposed to direct sunlight, or result in any public safety hazard. The impregnated liner tube shall be kept cool during shipment and storage. All materials shall be subject to inspection and review prior to installation.

Contractor shall ensure that an Engineer approved procedure is followed for sealing the liner from all groundwater infiltration and migration at connections to and within all manholes. Hydrophilic sealing material shall be placed per the Manufacturer's recommended product guidelines and Contractor's/Manufacturer's approved procedures prior to liner installation. Temperature gauges shall be placed at the upstream and downstream ends of the reach being lined to monitor the pressurized fluid's (air or water) temperature. In addition to monitoring the temperature inside the tube, temperature gauges shall be placed between the host pipe and the liner at as many points as is practical to record the heating that takes place on the outside of the liner. The impregnated tube shall be inserted through an existing manhole or access structure by means of the manufacturer's recommended installation process in accordance with ASTM F1216. The application of hydrostatic head, compressed air, or other means shall fully extend the CIPP liner to the next designated manhole or termination point and inflate and firmly adhere the liner to the host pipe wall. The liner tube shall be installed at a rate less than 10 feet per minute at all times. If the CIPP liner installation fails, the Contractor shall be responsible for operating the bypass pumping equipment for the additional time required until the installation can be completed, at the Contractor's expense.

Curing of the resin system shall be as per the Manufacturer (Licensor) of the CIPP product. The temperatures achieved and the duration of holding the pressurized fluid at those temperatures shall be per the Manufacturer's (Licensor's) established procedures. If a heat source is required after placement is completed, suitable heat source and distribution equipment shall be provided. The equipment shall be capable of circulating hot water, air, and/or steam throughout the section by means of a pre-strung hose which has been perforated in accordance with the manufacturer's recommendations or other methods acceptable by the Engineer to raise the temperature uniformly above the temperature required to affect a resin cure. This temperature shall be determined by the manufacturer based on the resin/catalyst system employed. The heat source piping shall be fitted with continuous monitoring thermocouples to gauge the temperature of the incoming and outgoing water, steam, and/or air supply. Water, steam, or air temperature during the cure period shall meet the requirements of the resin manufacturer as measured at the heat source inflow and outflow return lines. The Contractor shall provide standby equipment to maintain the heat source supply. An additional continuous monitoring thermocouple shall be placed between the impregnated felt tube and the pipe invert at the remote manhole and at a point midway between the upstream and downstream manholes to determine the temperature during the cure. The temperature during the cure shall not be less than 130 degrees F at the boundary between the pipe wall and the liner unless otherwise required because of the resin system used. The initial cure shall be deemed to be completed when inspection of the exposed portions of the liner appears hard and sound and the remote temperature sensors indicate that an exotherm has occurred. The cure period shall be of duration and temperature recommended by the resin manufacturer during which time the recirculation of the water, steam, and/or air and cycling of the heat exchanger continuously maintain the required temperature. A data logger shall be used for Main Liners to continuously record temperature, pressure and time during heating, cure and cool down of the liner at the insertion, intermediate and termination manholes. Where requested, this data shall be provided to the Engineer for each pipe segment.

The cured liner shall be cooled to a temperature below 100 degrees F before relieving the static head or pressure in the lined pipe and returning normal flow back into the system. The cool down may be accomplished by introducing cool water or air into the lined pipe. Care shall be taken in the release of the static head or pressure so that a vacuum will not develop which could damage the newly installed liner. Water for cooling shall be supplied by the Contractor. The finished liner shall be continuous over the

length of the host pipe and be free from defects such as dry spots, delamination and lifts. All materials other than the cured liner should be removed from the pipe by the Contractor.

21.08 CIPP MAIN LINER TERMINATION AND CONNECTION IN MANHOLES

A. The liner shall achieve a watertight seal through the manhole channel/invert and at the host pipe(s) where it enters/exits any manhole. The use of fiber felt and a suitable resin system, hydrophilic rubber waterstops, injection grouting, or other Engineer approved methods compatible with the liner shall be used to ensure a watertight CIPP liner system. CIPP liner entries at manholes shall be smooth and free of irregularities. The top half of the CIPP liner shall be neatly cut at least 4-inches away from the wall.

B. The channel in the manhole shall be a smooth continuation of the pipe(s) and shall be merged with other pipes or channels. All manholes shall be individually inspected for liner cut off, benches and sealing Work. Any visible leaks through or around the CIPP liner shall be corrected by an approved method at the Contractor's expense. It is anticipated that some pipe to manhole connections will require supplementary efforts to affect an acceptable watertight seal.

C. The channel in the manhole shall be a smooth continuation of the liner and pipe(s) and shall be merged with other channels. Inverts and/or benches shall be resurfaced/repaired (or constructed where necessary as directed by the Engineer) to provide a smooth flow channel. The Engineer may also require that the manhole floor and base section receive an approved monolithic coating which is chemically compatible with the CIPP liner, and any chemical/cementitious grout or repair material used in the manhole.

21.09 SERVICE RECONNECTION

A. The Contractor shall be responsible for internally reopening the service connections to the lined pipe using a pivot-head CCTV inspection camera and a remote cutting tool. The Contractor shall locate the service connections from inside the lined pipe, cut a hole matching the connection diameter, and grout the area where the service connection enters the lined pipe to produce a watertight seal approved by the Engineer. Grouting of service connections shall be accomplished using a "Logiball" type lateral packer to seal the first 18 inches of the service connection in accordance with the manufacturer's instructions and the Technical Specifications. The Contractor shall provide a nearly full-diameter hole, free from burrs, loose or abraded material, hanging fibers or projections, and with a neat, smooth and crack-free edge. The hole shall be 95 percent minimum and 100 percent maximum of the original service connection diameter. The invert of the service connection shall match the bottom of the reinstated service opening. The Contractor shall certify he has a minimum of 2 complete working cutters plus spare key components on the site before each installation. All cuttings shall be collected and disposed of properly.

B. All service connections shall be reopened including those that go to unoccupied or abandoned buildings or vacant lots, unless directed otherwise by the Engineer. Begin reconnection of services within four hours after liner insertion. The Contractor shall initially reopen each connection in an expeditious manner with a less than a full size opening to release wastewater temporarily stored in the service lateral. The Contractor shall then complete reconnection of all services within 24 hours. The Contractor shall immediately reopen any missed connections and repair any holes drilled in

error. Faulty cuts shall be repaired by methods approved by the Engineer at no additional cost to the City.

C. It is the intent of these Specifications that service connections be reopened without excavation. No additional payment will be made for excavations for the purpose of reopening connections and the Contractor will be responsible for all costs and liability associated with such excavation and restoration work.

21.10 INSTALLATION RESPONSIBILITIES FOR INCIDENTAL ITEMS

It shall be the responsibility of the Owner to locate and designate all manhole access points open and accessible for the work, and to provide rights of access to these points. If a street must be closed to traffic because of the orientation of the pipeline, the Owner shall institute the actions necessary to do this for the mutually agreed time period. The Owner shall also provide free access to water hydrants for cleaning, installation of the tube, and other work items requiring water.

The Contractor, when required, shall remove all internal debris out of the pipeline that will interfere with the installation of the CIPP. The Owner shall provide a dumpsite for all debris removed during the cleaning operations. Unless stated otherwise, it is assumed that this site will be at or near the sewage treatment facility to which the debris would have arrived in absence of the cleaning operation. Any hazardous waste encountered during this project will be considered as a changed condition.

The Contractor, when required, shall provide for the flow of sewage around the section, or sections, of pipe designated for rehabilitation. The bypass shall be made by plugging the line at the existing upstream manhole and pumping the flow into a downstream man- hole or adjacent system. The pump and bypass lines shall be of adequate capacity and size to handle the anticipated flow. The City may require a detail of the bypass plan to be submitted.

Experienced personnel trained in locating breaks, obstacles, and service connections by close circuit television shall perform inspection of the pipelines. The interior of the pipe- line shall be carefully inspected to determine the location of any conditions that may pre- vent proper installation of the CIPP into the pipelines, and it shall be noted so that these conditions may be corrected. A videotape and suitable log shall be kept for later reference by the City.

It shall be the responsibility of the Contractor to clear the line of obstructions such as solids and roots that will prevent the insertion of CIPP. If pre-installation inspection reveals an obstruction such as a protruding service connection, dropped joint, or a collapse that will prevent the installation process, and it cannot be removed by conventional sewer cleaning equipment, then the Contractor shall make a point repair excavation to uncover and remove or repair the obstruction. Such excavation shall be approved in writing by the City's representative prior to the commencement of the work and shall be considered as a separate pay item.

The Contractor shall make every effort to maintain service usage throughout the duration of the project. In the event that a service will be temporarily out of service, the maximum amount of time of no service shall be 16 hours for any property served by the sewer. The Contractor shall be required to notify the City and all affected properties whose service laterals will be out of commission and to advise against water usage until the sewer main is back in service. Such notification shall be provided to the Utility Department at least one week prior to service disconnecting.

A public notification program shall be implemented, and shall as a minimum, require the Contractor to be responsible for contacting each home or business connected to the sanitary sewer and informing them of the work to be conducted, and when the sewer will be off-line. The Contractor shall also provide the following:

A. Written notice to be delivered to each home or business describing the work, schedule, how it affects them, and a local telephone number of the Contractor they can call to discuss the project or any problems that could arise.

B. Personal contact and attempted written notice the day prior to the beginning of work being conducted on the section relative to the residents affected.

C. Personal contact with any home or business that cannot be reconnected within the time stated in the written notice.

21.11 QUALITY ASSURANCE PROCEDURES

21.11.01 Material

A. All material testing shall be performed and certified by a registered independent, third-party laboratory.

B. Wall thickness of samples shall be determined as described in ASTM F1216, Section 8 or ASTM F1743, Section 8. The minimum wall thickness at any point shall not be less than 87.5% of the design thickness as calculated in Section 17.08 of this Specification.

C. The Contractor shall obtain, prepare and store appropriate samples for all liners installed under this Contract. The Contractor shall provide samples of the cured lining material from the actual installed liner at a minimum of one set per each liner insertion setup. The preparation and testing of these samples shall be in accordance ASTM F1216, Section 8. The Contractor shall coordinate the required testing of the samples with the laboratory, and the City will pay for the initial testing of these samples in accordance with the pay item. The Contractor shall pay for the cost of retests made necessary by the failure of the samples to meet the specified requirements.

D. The cured liner shall be sampled and tested for flexural strength and flexural modulus (short term). Flexural strength and modulus shall be tested in accordance with the requirements of ASTM 0790. The liner shall be in compliance with the physical properties stated in this Specification.

E. Corrosion resistance requirements shall be as stated in ASTM F1216, Section X2, Chemical Resistance Tests.

21.11.02 Field

A. Up to 10 percent of the installed CIPP Main Liners may be tested for exfiltration in accordance with ASTM F1216, Section 8.2 prior to service lateral reconnections. Testing shall exclude maximum pressure limitation (4.3 psi) at lowest end. Leakage testing shall be performed after

all dry and non-bondable hoses and tubes are completely removed from the liner. If the liner fails the test, Contractor shall repair or replace liner as required until the tested segment passes.

B. After completion of the installation of Main Liners, service reconnections, and finish work at the manholes, the lined pipe and adjacent manholes shall be televised by the Contractor at his expense, with a color CCTV inspection tilt-head camera recorded in digital format, as required by these Specifications. Pre-installation and post-rehabilitation inspections shall either be recorded on the same media or shall be referenced, if recorded on separate media. Acceptance of the Work shall be based on Engineer's review of the CCTV inspection. Post-rehabilitation CCTV inspection shall not be performed in conjunction with cleaning operations and the liner wall shall be as dry as practical during this inspection (no dripping or splashing). All CCTV inspections delivered to the City shall be in accordance with the Technical Specifications.

END OF SECTION

SECTION 23 – FIBERGLASS WET WELL OR MANHOLE LINER

23.01 GENERAL

Fiberglass reinforced polyester wet wells shall be manufactured from commercial grade polyester resin or vinyl ester resin, with fiberglass reinforcements. The resin system shall be suitable for atmospheres containing hydrogen sulfide and dilute sulfuric acid as well as other gases associated with the wastewater collection systems. The manhole liner or fiberglass wet well shall be a one-piece unit manufactured to meet or exceed all specifications of A.S.T.M. D-3753 latest edition as manufactured by L.F. Manufacturing, Inc., Giddings, Texas, or an approved equal. Section 37 "Wastewater Structure Rehabilitation" contains additional information about fiberglass liners and will govern over this section in the event of a conflict.

23.02 MATERIALS

A. RESIN:
The resins used shall be a commercial grade unsaturated polyester resin.

B. REINFORCING MATERIALS:
The reinforcing materials shall be commercial Grade "E" type glass in the form of mat, continuous roving, chopped roving, roving fabric, or a combination of the above, having a coupling agent that will provide a suitable bond between the glass reinforcement and the resin.

20.02.01 FIBERGLASS WET WELL MATERIALS

A. SURFACING MATERIALS
If reinforcing materials is used on the surface exposed to the contained substance, it shall be a commercial grade chemical-resistant glass that will provide a suitable bond with the resin and leave a resin rich surface.

B. FILLERS AND ADDITIVES
Fillers, when used, shall be inert to the environment and wet well construction. Additives, such as thixotropic agents, catalysts, promoters, etc., may be added as required by the specific manufacturing process to be used. The resulting reinforced plastic material must meet the requirement of this specification.

20.02.02 FRP MANHOLE LINER MATERIALS

A. INTERIOR SURFACING MATERIAL
The inner surface exposed to the chemical environment shall be a resin-rich layer of 0.010 to 0.020 inch thick. The inner surface layer exposed to the corrosive environment shall be followed with a minimum of two passes of chopped roving of minimum length 0.5 inch (13 mm) to maximum length of 2.0 inch (50.8 mm) and shall be applied uniformly to an equivalent weight of 3 oz/ft. Each pass of chopped roving shall be well rolled prior to the application of additional reinforcement. The combined thickness of the inner surface and interior layer shall not be less than 0.10 inch (2.5 mm).

B. WALL CONSTRUCTION PROCEDURE:
After inner layer has been applied the manhole liner wall shall be constructed with chop and continuous strand filament wound manufacturing process which insures continuous reinforcement and uniform strength and composition. The cone section, if produced separately, shall be affixed to the barrel section at the factory with resin-glass reinforced joint resulting in a one piece unit. Seams shall be fiberglassed on the inside and the outside using the same glass-resin jointing procedure. Field joints shall not be acceptable by anyone except the manufacturer.

C. EXTERIOR SURFACE:
For a UV inhibitor the resin on the exterior surface of the manhole liner shall have gray pigment added for a minimum thickness .125 inches

D. FILLERS AND ADDITIVES:
Fillers, when used, shall be inert to the environment and manhole construction. Sand shall not be accepted as an approved filler. Additives, such as thixotropic agents, catalysts, promoters, etc., may be added as required by the specific manufacturing process to be used to meet the requirements of this standard. The resulting reinforced-plastic material must meet the requirements of this specification.

23.03 WET WELL FABRICATION

A. EXTERIOR SURFACE:
The exterior surface shall be relatively smooth with no sharp projections. Handwork finish is acceptable if enough resin is present to eliminate fiber show. The exterior surface shall be free of blisters larger than ½ inch in diameter, delamination and fiber show.

B. INTERIOR SURFACE:

The interior surface shall be resin rich with no exposed fibers. The surface shall be free of grazing, delamination, blisters larger than ½ inch in diameter, and wrinkles of 1/8 inch or greater in depth. Surface pits shall be permitted up to 6 square feet if they are less than ¾ inch in diameter and less than 1/16 inch deep.

C. FIBERGLASS REINFORCED BOTTOM:

The bottom to be fabricated using fiberglass material as stated in Section 20.02. Material and installation to meet all physical requirements as per Section 20.05. Bottom to be attached to wet well pipe with fiberglass layup to comply with A.S.T.M.-D3299 specifications. When reinforcement is necessary for strength, the reinforcement shall be completely enclosed with a fiberglass layup per A.S.T.M.-D3299.

D. FIBERGLASS REINFORCED TOP:

The fiberglass wet well top shall be fabricated using fiberglass material as stated in Section 20.02. Material and installation to meet all physical requirements as per Section 20.05. Top to be attached to wet well pipe with fiberglass layup to comply with A.S.T.M.-D3299 specifications.

When reinforcement is necessary for strength, the reinforcement shall be completely enclosed with a fiberglass layup per A.S.T.M.-D3299.

E. INSTALLATION OF STUBOUTS:

Effluent, service, or discharge lines made be factory installed. Approved methods are PVC sewer pipe, Inserta-Tee fittings, or Kor-N-Seal boots. Installation of stubouts to be fiberglass layup to comply with A.S.T.M.-D3299 specifications.

F. DEFECTS NOT PERMITTED:

A. Exposed fibers: glass fibers not wet out with resin
B. Resin runs: runs of resin and sand on the surface.
C. Dry areas: areas with glass not wet out with resin.
D. Delamination: separation in the laminate.
E. Blisters: light colored areas larger than ½ inch in diameter.
F. Crazing: cracks caused by sharp objects.
G. Pits of Voids: air pockets.
H. Wrinkles: smooth irregularities in the surface
I. Sharp projection: fiber or resin projections necessitating gloves for handling.

23.04 FRP MANHOLE LINER DESIGN

A. INTERIOR ACCESS:

All manhole liners shall be designed so that a ladder or step system can be supported by the installed manhole liner.

B. MANWAY REDUCER:

Manway reducers will be concentric with respect to the larger portion of the manhole liner diameters through 60 inches. Larger manhole liners may have concentric or eccentric manway reducer openings.

C. COVER AND RING SUPPORT:

The manhole liner shall provide an area for which grade rings or brick can be installed to accept a typical metal ring and cover and have the strength to support a traffic load without damage to the manhole liner.

D. EXTERIOR SURFACE:

The exterior surface shall be relatively smooth with no sharp projections. Hand-work finish is acceptable if enough resin is present to eliminate fiber show. The exterior surface shall be free of blisters larger than 0.5 inch in diameter, delamination or fiber show.

E. INTERIOR SURFACE:

The interior surface shall be resin rich with no exposed fibers. The surface shall be free of crazing, delamination, blisters larger than 0.5 inch in diameter and wrinkles of 0.125 inch or greater in depth. Surface pits shall be permitted if they are less than 0.75 inch in diameter and less than 0.0625 inch deep. Voids that cannot be broken with finger pressure and that are entirely below the resin surface shall be permitted if they are less than 0.5 inch in diameter and less than 0.0625 inch thick.

F. REPAIRS:

Any manhole repair is subject to meet all requirements of this specification.

G. MANHOLE LENGTH:

Manhole lengths shall be in 6-inch increments +/- 2 inches.

H. DIAMETER TOLERANCE:

Tolerance of inside diameter shall be +/- 1% of required manhole diameter.

23.05 PHYSICAL REQUIREMENTS

20.05.01 LOAD RATING

The complete wet well or manhole liner shall have a minimum dynamic-load rating of 16,000 ft-lbs when tested in accordance with A.S.T.M. 3753 Section 8. To establish this rating, the complete wet well or liner shall not leak, crack, or suffer other damage when load tested to 40,000 lbs and shall not deflect vertically downward more than ¼ inch at the point of load application when loaded to 24,000 lbs.

20.05.02 STIFFNESS

The wet well or manhole liner cylinder shall have a minimum pipe-stiffness values shown in the table below when tested in accordance with A.S.T.M. 3753 Section 8.

STIFFNESS REQUIREMENTS

FIBERGLASS WET WELL		MANHOLE LINER	
LENGTH-FT	**F/AY – PSI**	**LENGTH-FT**	**F/AY – PSI**
10 - 20	2.01	3 – 6.5	0.75
21 - 30	3.02	7 – 12.5	1.26
31 - 40	5.20	13 - 20.5	2.01

PHYSICAL PROPERTIES:	FIBERGLASS WET WELL		MANHOLE LINER	
	HOOP DIRECTION	AXIAL DIRECTION	HOOP DIRECTION	AXIAL DIRECTION
a. Tensile Strength (psi)	18,000	5,000	18,000	5,000
b. Tensile Modules (psi)	0.8 x 10^6	0.7 x 10^6	0.6 x 10^6	0.7 x 10^6
c. Flexural Strength (psi)	26,000	4,500	26,000	4,500
d. Flexural Modules (psi)	-	-	1.4 x 10^6	0.7 x 10^6
(no ribs – 48”, 60”, 72”)	1.4 x 10^6	0.7 x 10^6	-	-

(with ribs – 96", 144")	0.7 x 10^6	0.7 x 10^6	-	-
e. Compressive (psi)	-	-	18,000	5,000

23.06 TEST METHODS

Tests shall be performed as specified in A.S.T.M. 3753 latest edition, Section 8.

23.07 INSTALLATION

23.07.01 FIBERGLASS WET WELL INSTALLATION

A. EXCAVATION:

A. General:

The limit of excavation shall be such to allow for placing and removing forms, installing sheeting, shoring, bracing, etc. The Contractor shall pile excavated material in a manner that will not endanger the work and will avoid obstructing sidewalks, driveways, power poles, etc. Drainage shall be kept clear.

B. Vertical Sides:

When necessary to protect existing or proposed structures or other improvements, the Contractor shall maintain vertical sides of the excavation. The limit shall not exceed three feet outside the footing on a vertical plane parallel to the footing except where specifically approved otherwise by the Engineer. The Contractor shall provide and install any sheeting, shoring, and bracing as necessary to provide a safe work area as required to protect workmen, structures, equipment, power poles, etc. The Contractor shall be responsible for the design and adequacy of all sheeting, shoring, and bracing. The sheeting, shoring, and bracing shall be removed as the excavation is backfilled in such a manner as to prevent injurious caving.

C. Sloping sides:

Where sufficient space is available, the Contractor shall be allowed to back slope the sides of the excavation. The back slope shall be such that the excavation shall be safe from caving. The type of material being excavated shall govern the back slope used, but in any case, the back slope shall be no steeper than 1 foot horizontal to 1 foot vertical.

D. Dewatering:

The Contractor shall keep the excavation free from water by use of cofferdams, bailing, pumping, well pointing, or any combination as the particular situation may warrant. All dewatering devices shall be installed in such a manner as to provide clearance for construction, removal of forms, and inspection of exterior of form work. It is the intent of these specifications that the foundation be placed on a firm dry bed. The foundation bed shall be kept in a dewatered condition a sufficient period of time to insure the safety of the structure. All dewatering methods and procedures are subject to the review and

acceptance of the Engineer. The excavation shall be protected from excessive rainfall, drainage and drying. It is the intent of these specifications that the Contractor provide a relatively smooth, firm foundation bed for footings and slabs that bear directly on the undisturbed earth without additional cost to the Owner, regardless of the soil conditions encountered. The contractor shall pile excavated material in a manner that will not endanger the work.

E. Unauthorized Over Excavation:

Excavation for slabs, footings, etc., that bear on earth shall not be carried below the elevation shown on the drawings. In the event the excavation is carried on below the indicated elevation, the Contractor shall bring the slab, footing, etc., to the required grade by filling with concrete having a minimum compressive strength of at least 3,000 psi at 28 days.

B. OPEN BOTTOM WETWELL INSTALLATION:

Bottom of excavation should be compacted to 95% Standard Proctor Density. Pour reinforced concrete base one foot deep and at least two feet larger than the fiberglass wet well outside diameter. As soon as the concrete has set-up enough to support the fiberglass wet well, lower the wet well into place. Pour a minimum of one foot of reinforced concrete on the inside, also a minimum of one foot deep and two feet from the fiberglass wet well wall on the outside of the wet well. Insert ram neck type sealant on the outside of fiberglass wet well around the bottom where the fiberglass and concrete come together.

C. CUTOUTS:

Cutouts in wet well wall should be made with proper cutting tools, such as jig saw or hole saw. Do not use axe or other impact-type tools.

D. INSTALLATION OF SEWER PIPE:

A. Type1: Make the cutout in the wet well wall, the outside diameter of pipe, plus 1/2 inch maximum. Slip pipe into position. Apply industrial grade silicone around the pipe next to the wet well wall cutout on the inside and on the outside. Cover the outside siliconed area with epoxy grout and backfill.

B. Type 2: Make the cutout in the wet well wall, the outside diameter of pipe, plus 1/2 inch maximum. Grind the outside surface of the pipe and both the inside and the outside surfaces of the cutout in the wet well wall. (Apply a priming agent to any PVC pipe that might be used before fiberglass lay-up.) Insert the pipe through the cutout in the wall of the wet well. Apply fiberglass putty to the inside and the outside of the wet well wall cutout, filling openings between pipe and cutout. Make a good radius for the fiberglass lay-up. After putty has set-up, fiberglass the pipe into place. Use one layer of woven roving sandwiched between two layers of fiberglass mat. Allow fiberglass to completely set-up before backfilling. Fiberglass layup method to comply with A.S.T.M.-D3299 specifications.

C. Type 3: Install Insert-A-Tee type fitting per manufacturers instruction. (Fowler Mfg. Co., P.O. Box 767, Hillsboro, Or. 97123. PH. 503-359-5417) or approved equal.

E. CLOSED BOTTOM WET WELL INSTALLATION:

Bottom of excavation should be compacted to 95% Standard Proctor Density. Wet wells with diameters up to 54 inches and depths no greater than 12 feet, may be placed on a base of 6 inches of crushed stone. Wet wells with depths greater than 12' feet, should have a poured reinforced concrete base at least one foot deep and at least two feet larger than fiberglass wet well outside diameter. The fiberglass wet well shall be lowered into the wet concrete and brought to plumb. Pour reinforced concrete over the anti-flotation flange. The concrete shall be a minimum of one foot deep and two feet from outside wall of the wet well. More concrete may be required in high water table areas.

F. INTERNAL BOTTOM RIBS:

Wet wells with internal bottom stiffening ribs will require that concrete be poured on the inside of the wet well to a depth equal to that of the stiffening ribs. This is typically 4 – 6 inches.

G. FIBERGLASS WET WELL TOP:

The fiberglass top may have stubouts installed or may have a raised fiberglass collar around the hatch opening. The fiberglass top has been designed to withstand the weight of a concrete reinforced slab to be installed over it.

H. BACKFILL:

A. Backfill Material: Unless shown otherwise on the drawings, sand or crushed stone shall be used for backfill around the wet well for a distance of two feet from the outside surface and extending from the bottom of the excavation to the bottom of the top slab. Suitable material chosen from the excavation may be used for the remainder of the backfill. The material chosen shall be free of large lumps or clods, which will not readily break down under compaction. This material will be subject to review and acceptance of the Engineer. Backfill material shall be free of vegetation or other extraneous material. Excavated materials which are to be used for fill or backfill may be stockpiled on the site. Location of stockpiles shall be approved by the City. Top soil should be stockpiled separately and used for finish grading around the structure.

B. Schedule of Backfilling: The Contractor may begin backfilling of wet well as soon as the concrete has been allowed to cure and the forms removed.

C. Backfill Lifts: Backfill shall be placed in layers of not more than 12 loose measure inches and mechanically tamped to at least 95% Standard Proctor Density. Flooding will not be permitted. Backfill shall be placed in such a manner as to prevent any wedging action against the structure.

I. TOP SLAB SUPPORT:

When installing a fiberglass wet well without a fiberglass top you should pour a reinforced concrete slab support a minimum of two feet outside of fiberglass wet well wall and a minimum of six inches thick. The slab shall be specified and designed by engineer or precast manufacturer engaged by contractor per Contract Documents.

23.07.02 FRP MANHOLE LINER INSTALLATION

Unless shown otherwise on drawings and approved by the engineer, concrete grout shall be used for backfill between the old manhole and the new fiberglass manhole liner. The backfill around the excavated reducer section shall be stabilized sand or crushed stone. The material chosen shall be free of large lumps or clods which will not readily break down under compaction. This material will be subject to approval by the engineer.

The concrete grout backfill shall be poured in layers of not more than 12 inches in even lifts. The reducer section to be backfilled in 12-inch lifts evenly and compacted to 95% Standard Proctor Density.

23.08 SHIPPING AND HANDLING

23.08.01 FIBERGLASS WET WELL SHIPPING AND HANDLING

Do not drop or impact the wet well. Wet wells shall be chocked if stored horizontally. If wet wells must be moved by rolling, the ground transversed shall be smooth and free of rocks, debris, etc. FRP wet wells may be lifted by the installation of two lifting lugs as specified by the manufacturer on the outside surface near the top or by a sling or “choker” connection around the center. Use of chains or cables in contact with the wet well surface is prohibited. Wet wells may be lifted horizontally using one support point.

23.08.02 FRP MANHOLE LINER SHIPPING AND HANDLING

Do not drop or impact the fiberglass manhole liner. Fiberglass manhole liner may be lifted by inserting a 4″x 4″x 30″ timber into the top of manhole with cable attached or by a sling or “choker” connection around center of manhole, lift as required. Use of chains or cables in contact with the manhole surface is prohibited.

END OF SECTION

SECTION 33 – FRAC-OUT PLAN FOR SUBAQUEOUS CROSSINGS

33.01 GENERAL

A. The Contractor must implement and adhere to the Best Management Practices (BMPs) and Frac-Out Plan as outlined in this Specification Section for projects including subaqueous transmission lines installed, repaired, or replaced using horizontal directional drilling and permitted through the US Army Corps of Engineers (USACE).

B. The Contractor shall furnish all necessary equipment and provide the necessary labor to adhere to the BMPs and Frac-Out Plan procedures.

33.02 BEST MANAGEMENT PRACTICES (BMPs)

The Contractor will implement the following Best Management Practices (BMPs) to minimize the potential for adverse environmental impacts during horizontal directional drilling activities:

A. BMPs for erosion control within the staging area shall be implemented and maintained at all times during the drilling and back-reaming operations to prevent siltation and turbid discharges in excess of State Water Quality Standards pursuant to Rule 62-302, F.A.C. Methods shall include, but are not limited to the immediate placement of turbidity containment devices such as turbidity screen, silt containment fence, hay bales, and earthen berms, etc. to contain the drilling mud. Earthen berms shall not be utilized as to impact wetlands or other surface waters.

33.03 FRAC-OUT PLAN

A. Measures used to prevent frac-out during the HDD operation shall include maintaining the proper boring depth for the soil conditions along the drilling route as well as proper management of drilling fluids circulation pressure. The minimum distance between the top of the over-ream hole and surface shall be maintained according to the Contract Documents. This distance should be sufficient to prevent frac-out when drilling with controlled and monitored drill fluid pressure.

B. Non-toxic fluorescent dyes will be added to the drilling lubricant as a method for monitoring bentonite releases in the underwater portions of this drilling. Details of the fluorometry monitoring method shall be submitted to the USACE prior to the pre-construction meeting

C. Drilling fluid returns (flow of drilling fluids to the HDD entry/exit pit location) will be continuously monitored visually during the installation.

D. The volume and circulation pressure of drilling fluid in the HDD bore and over-ream shall be monitored at all times during the HDD operation. The HDD drill rig operator will monitor the downhole annular pressure at all times. Should a drop in volume occur, immediately conduct a visual inspection of both terrestrial and pavement portions of the HDD corridor. A visual inspection of all project area and adjacent waterbodies, and storm and sanitary sewer systems shall also be conducted.

E. Should the detection of dye or a drop in volume of bentonite occur, the Contractor will follow the Release Procedures outlined below.

F. All drilling fluids associated with the HDD operation shall be contained onsite. The volume of the drilling fluids recirculation/solids settlement pit and onsite storage/frac tanks and watertight roll-off containers shall be submitted for review by the Engineer. As required during the HDD process, screened solids and surplus drilling fluid will be removed and disposed of off the project site at a location of the HDD Contractor's choice in accordance with applicable regulations. At the conclusion of all drilling operations, drilling fluid remaining in the pit will be settled, removed completely from the pit, and hauled to a disposal site of the HDD Contractor's choice in accordance with applicable regulations within 48 hours of the pipe pull-in. After back-reaming, drilling materials will be removed from the inside of the pipeline by pigging it from the exit point towards the rig area. The paved and/or vegetated surface of the disturbed pit area shall be restored according the Contract Documents.

G. At all times, adequate protection will be taken to avoid impacts to pavement, structures, and Aquatic Preserve/Outstanding Florida Waters and contiguous wetlands. This shall include, but is not limited to halting of construction/drilling and/or placement of turbidity containment devices in accordance with the applicable regulations.

H. A pump tanker or vactor truck shall be onsite and available at all times. The Contractor shall demonstrate the contracted availability of additional pump tankers and/or vactor trucks if needed for surplus or frac-out drilling fluids.

I. A spill kit (i.e., absorbent pads/brooms, shovels, goggles, gloves) shall be onsite and available at all times.

33.04 RELEASE PROCEDURE

A. If a frac-out is confirmed, all construction activity contributing to the frac-out shall cease immediately.

B. If the return drilling fluid is less than the projected amount to be recovered, divers shall begin a search for the missing material within 1 hour of potential release if the drilling takes place under a body of water. Once the drilling fluid and frac-out is located, then the drilling mud containment plan shall be immediately implemented.

C. The Contractor shall notify the City upon confirmation of the occurrence. The notification shall include the time of the frac-out, location and impact on pavement and improvements, and the environmental conditions of the impacted area.

D. If a frac-out has occurred during construction activities, the Contractor shall coordinate with the City in order to notify the USACE of Engineers, within 24 hours of the occurrence. The notification shall include the time of the frac-out, the response time of the underwater diver, and the environmental conditions of the affected area.

F. If the loss of drilling fluid or excess fluid pumping/recirculation pressure results in the heaving and/or settlement of pavement, curb, sidewalk and/or other infrastructure, the HDD Contractor shall immediately mobilize all equipment, manpower and devices to recover the drilling fluid, relieve the fluid pressure, stop any heaving or settlement of infrastructure and protect the public. The HDD Contractor shall prepare a remediation plan to repair, replace, or restore the affected infrastructure in accordance with the governing jurisdiction's standards, reviewed for approval prior to implementation.

G. Before continuing with the HDD operation, the HDD Contractor shall prepare and submit for approval a revised plan for successful completion of the required project. The plan shall identify the manpower, equipment, drilling fluid, additives, pump pressures, original bore hole sealing, and bore path modifications that may be required.

33.05 DRILLING MUD CONTAINMENT PLAN

A. Should the release of drilling materials occur on land, a sediment fence shall be constructed around the site and the material shall be removed by vacuum truck.

B. Should the release of drilling materials occur in-water, clean-up with a vacuum system shall commence within 24 hours.

C. The scientist/biologist underwater divers will guide the suction hose of the pump to minimize both the removal of natural bottom material and the disturbance of any existing vegetation.

D. Any escaped drilling lubricant must be pumped into filter bags or directly into a vactor truck.

E. A barge company will be contacted to transport a vactor truck should it be needed to respond "in-water."

F. Once the spill is contained, the escaped drilling lubricant shall be properly disposed of in an approved upland disposal site.

G. Clean-up with a vacuum system shall commence within 24 hours.

H. After containment/recovery of the drilling material/resources, the HDD Contractor shall prepare a detailed written report to be submitted to the City and USACE, within 10 business days, that summarizes the incident, including the following:

1. Details on the release event, including an estimate of the bentonite released;
2. The location and time of release;
3. The size of the area impacted, and the success of the clean-up action;
4. Name, firm, address and telephone number of HDD Contractor reporting;
5. Photos and/or digital recording of frac-out area and impacts;
6. Date and Time;
7. How the release occurred;
8. The type of activity that was occurring around the area of the inadvertent return;

9. Description of any sensitive areas and their location in relation to the inadvertent return;
10. Description of the methods used to clean up or secure the site;
11. Changes to the drilling fluid properties or drilling process (if any); and
12. Mitigation of any impacted public utility infrastructure and water bodies from the frac-out

END OF SECTION

SECTION 34 –MANHOLE INSPECTION

34.01 SCOPE OF SERVICES

A. The Contractor shall perform visual inspections of the existing manholes and record any defect discovered. The visual inspection shall include surface photo, manhole cover and frame, chimney, walls, invert, and all appurtenances.

B. The nature of the inspections shall be to verify the physical condition of the manhole and to provide a permanent record of the existing condition as it relates to dimensions, materials, obstructions, breakage, connections, and deterioration. Inspections may be performed by personnel entry or from the surface utilizing pole mounted camera equipment to visually inspect the chimney, cone, wall, bench, pipe seals and invert conditions, and conditions of connecting pipes.

C. All City assets will be identified using the established facility identification code (FID) for all inspection reports, geographical exhibits, data sets and asset management tasks. Assets may include, but not be limited to, manholes, clean outs, gravity mains, force mains, air release valves, and conflict structures. Asset FIDs will be provided to the Contractor prior to the start of inspection. Failure to utilize the FID could result in additional inspection at the Contractors expense.

34.02 REQUIREMENTS

A. The Contractor shall inspect the manhole surroundings and the manhole interior using visual means and a digital camera for documentation.

B. All inspections shall be recorded.

C. All inspection forms shall be scanned and submitted as .PDF files.

D. All inspection data shall be entered into a NASSCO Manhole Assessment Certification Program (MACP) compliant database per Specification Section 20 “CCTV Inspection and Pipe Cleaning”.

E. The inspection photographs, report documents, and inspection database shall be in accordance with the specifications and NASSCO MACP.

F. Contractor shall maintain a copy of all report materials. The Contractor shall provide comments as necessary to fully describe the existing condition of the manhole on the inspection forms.

G. Contractor shall be responsible for modifications to equipment and/or inspection procedures to achieve City report requirements.

H. No Work shall commence prior to approval of the submitted materials by the City. Once accepted, the report materials shall serve as a standard for the remaining work.

34.03 QUALITY ASSURANCE

A. Use of PACP/MACP certified technicians to review/document defects in the office (post process) is acceptable.

B. The CCTV Contractor must have an internal quality assurance/quality control (QA/QC) program in place and all inspection data shall be subjected to the procedures prior to submittal to the City. The City will perform QA/QC audits on submitted data.

A QA/QC shall be performed by NASSCO MACP and PACP certified personnel.

34.04 SHOP DRAWINGS AND SUBMITTALS

A. Submittals shall be submitted to the City for review and acceptance prior to construction in accordance with Specification Section 03 -Submittals.

B. The above deliverables shall be submitted to the City for approval.

C. The manhole inspection reports and database shall be in accordance with the specifications and NASSCO MACP.

34.05 NOTIFICATION

The Contractor shall notify the City a minimum of 48-hours prior to performing any inspection work. The City may be present during part or all of the inspections. No payment will be made for inspections performed without proper schedule notification

34.06 EXECUTION

A. The inspection crew shall mobilize to the site of the manhole inspection and immediately establish traffic control measures per City of St. Pete Beach and Florida Department of Transportation (FDOT) requirements as well as any measures required to protect pedestrians. The crew shall inspect each manhole and record required information.

B. All manhole structures shall be located. Metal detectors shall be used to locate buried manholes. Once a buried manhole has been located, it shall be marked with paint and/or flagging, if necessary. All pertinent information available shall be recorded including area photo, address, etc. Contractor shall notify the City weekly with a list of those manholes that could not be fully inspected due to access issues. The City may arrange to have some or all these manholes exposed, or otherwise

made accessible for full inspection. The City will notify Contractor of the status and may authorize re-inspection.

34.07 MANDATORY INSPECTION HEADER INFORMATION

Once the manhole is located, the following mandatory information shall be recorded on the inspection form. Note that the mandatory fields noted below are more inclusive than the MACP requirements. All available information shall be collected and recorded for those manholes that are buried, could not open, surcharged, etc.

1. Manhole Number (City of St. Pete Beach Asset Number)
2. Sheet number
3. Date
4. Time
5. Surveyor's Name
6. Certifications Number
7. Drainage area (tributary Pump Station Number)
8. Location (street number and name)
9. Downstream pipe length (feet)
10. Rim to grade (nearest 0.1 foot)
11. Pre-cleaning method (using approved MACP codes)
12. Location code (using approved MACP codes)
13. Manhole surface type (using approved MACP codes)
14. Potential for runoff (using approved MACP codes)
15. Access point type (using approved MACP codes)
16. Inspection status (using approved MACP codes)
17. Area photo image reference Internal photo image reference

34.08 MANHOLE COMPONENT OBSERVATIONS

The inspection crew shall complete all fields within the manhole component/observation section of the inspection form. The following information shall be collected:

1. Cover type (solid, vented, bolted)
2. Cover size (top surface diameter in inches)
3. Cover material
4. Number of vent holes
5. Cover/Frame fit (cover to frame fit, MACP codes)
6. Cover condition (MACP codes)
7. Cover insert type
8. Cover insert condition
9. Frame condition
10. Frame seal condition
11. Frame offset distance
12. Frame seal inflow
13. Wall material

14. Interior wall coating
15. Wall diameter
16. Bench present
17. Channel installed
18. Additional remarks relevant to the manhole

34.09 MANHOLE INTERIOR INSPECTION

The inspection crew shall determine the types of defects within the manhole, document each defect on the manhole form and take a photograph of each defect. The manhole chimney, cone, wall, bench, and channel shall be inspected for structural integrity, signs of I/I and the presence of roots. All documentation shall follow NASSCO MACP standards. Each defect will be documented on the inspection form with the following information:

1. Defect number
2. Component of manhole containing defect
3. Defect code (using approved MACP codes)
4. Image Reference (using City approved file naming structure)

34.10 CONNECTING PIPE DETAILS

Each pipe entering and exiting the manhole shall be photographed where possible and inspected to determine diameter, pipe material, debris levels, and rim to invert distance (to 0.1-feet). The pipe inspection will include the following information:

1. Pipe photo (using City approved file naming structure)
2. Pipe direction (incoming or outgoing)
3. Pipe clock positions (6:00 position = outgoing)
4. Pipe diameter
5. Pipe material (using PACP codes)
6. Rim to invert distance (measured to nearest 1/10th of a foot)
7. Pipe special condition (drops, force mains, etc. using approved MACP codes)
8. Debris depth
9. Connecting structure number; if manhole or cleanout, service line clock position, stub-out clock position, etc.
10. Pipe seal condition (using approved MACP codes)
11. Pipe seal roots (using approved MACP codes)
12. Observed pipe defects, obstructions, roots, etc. (using PACP codes)

34.11 MANHOLE SKETCH, MAP UPDATE, AND NOTES

The inspection crew shall complete the manhole plan view sketch noting all connecting pipes. Any special observations or notes may be added to the profile sketch on the field form. Influent and effluent lines in each manhole shall be compared to the existing map and corrections noted in the sketch section of the field form.

34.12 NOTIFICATION OF EMERGENCY CONDITIONS

Inspection crews shall immediately notify the City and/or on-site inspector of any defects posing imminent danger to the public (missing lids, covers broken during inspection, sink holes, etc.) and any observed pipe blockages or potential overflow conditions.

34.13 COMPLETION

Once the inspection is complete the field crew shall make certain the ring is clean and does not have any debris preventing a proper cover fit. The manhole lid shall be replaced, and any displaced items moved back into place.

A list of manholes that could not be fully inspected, along with the problem explanation, shall be forwarded to the City weekly throughout the inspection work. If the Contractor has completed accessible inspections, and the City authorizes, then Contractor may be required to re-mobilize at the same unit price and complete the requested inspections. All re-inspections will be at the same contracted unit price. Any map updates shall be consolidated and forwarded to the City with the submitted inspections.

34.14 PHOTOGRAPH REQUIREMENTS

A. During each inspection the following series of photographs shall be taken:

1. Photograph: During the inspection, a photograph shall be taken of the manhole cover showing location within the roadway, shoulder, or easement as appropriate. Photographs shall be taken of any indications of previous overflows such as watermarks and paper or other debris typical of sewer overflows. Surface photographs shall be oriented in the direction of the outgoing pipe to show the pipeline cover and easement condition. The area photographs should show the manhole visible in the foreground where possible. A minimum of 1 area photo is required.
2. Internal Photograph: Take a photograph of the manhole interior in plan view showing the general arrangement of the incoming and outgoing sewers, manhole walls, and other appurtenances. The internal condition photograph shall be oriented with the direction of the outgoing main line flow at the bottom of the photograph (6:00 position). A minimum of 1 internal photograph is required.
3. Manhole Defect Photographs: During manhole inspections digital photographs shall be taken of all defects. Photographs must clearly and accurately show each defect and correspond to defects and photo numbers logged on the manhole inspection form. A minimum of 1 photo for each observed defect is required
4. Connecting Pipe Photographs: The camera should then be pointed into all incoming and outgoing pipes where possible to capture general conditions within the pipes. Any obvious blockages or defects should be noted using

PACP defect codes. A minimum of 1 photo of each incoming or outgoing pipe is required.

B. During inspections manholes shall be free of steam, fog, water vapor, or other conditions that will impact the quality of photographs.

C. All photographs shall adequately capture the manhole conditions and details of defects. Lighting and camera quality shall provide a clear, in-focus picture of the manhole interior, manhole defects, and manhole. The lighting shall provide uniform light free from shadows or hot spots.

D. If larger than 640 x 480 resolution, then photo will be converted to 640 x 480. Photos less than 640 x 480 are not acceptable and converting upward to 640 x 480 is not acceptable. All photographs shall be resized to 640 x 480 resolution to minimize file size.

E. The images shall be kept electronically, copied to a CD, DVD, or external hard drive. Photographs shall be named according to the photograph naming conventions included herein.

F. All digital photographs shall be referenced on the manhole inspection form and electronic database.

G. All digital photographs shall be renamed in accordance with a photo file naming convention. An example is shown below:

1. Area Photo = Manhole ID, A, Photo Number, jpg
   Example: 3965002A0001.jpg
   Manhole: 39650002
   A=Area Photo
   Photo No.0001
2. Internal Photo = Manhole ID, I, Photo Number, jpg
   Example: 3965002I0001.jpg
   Manhole: 3965002
   I=Internal Photo
   Photo No.0001
3. Manhole Defect Photo = Manhole ID, M, Photo Number, jpg
   Example: 3965002M0015
   Manhole: 3965002
   M=Manhole Defect Photo
   Photo No. 0015
4. Pipe Photo = Manhole ID, P, Photo Number, jpg
   Example: 3965002P0002.jpg
   Manhole: 3965002
   P=Pipe Photo
   Photo No. 0002

34.15 MANHOLE NUMBERING, FORMS, AND DEFECT CODES

The Contractor shall use the City manhole numbering system when performing the inspections for this Project. Manhole numbers will be provided by the City. Defect codes shall conform to those specified in the NASSCO MACP specification.

All City assets will be identified using the established facility identification code (FID) for all inspection reports, geographical exhibits, data sets and asset management tasks. Assets may include, but not be limited to, manholes, clean outs, gravity mains, force mains, air release valves, and conflict structures. Asset FIDs will be provided to the Contractor prior to the start of inspection. Failure to utilize the FID could result in additional inspection at the Contractors expense.

34.16 SITE RESTORATION

After inspecting manholes in an area, the work site shall be cleaned and restored to pre-Work conditions. If manhole is buried and exposed, then restore site by placing material back over exposed manhole. No re-sodding is anticipated or included in the pricing.

34.17 DELIVERABLES

The Contractor will be required to submit the following deliverables at the completion of inspection.

A. During each inspection the following series of photographs shall be taken:
   1. Inspection session header information (see required fields above)
   2. Component observations
   3. Manhole inspection details including defects observed and photo image references
   4. Connecting pipe details
   5. Manhole plan view sketch

B. Marked up field maps detailing map corrections and/or discrepancies noted during inspection.

C. Inspection digital photograph in City approved format and resolution and assigned file names in accordance with the City standard during each inspection the following series of photographs shall be taken.

D. All information and reports shall be exported to the electronic database described in technical specification Section 34.02.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 35 – CHEMICAL SEALING OF HOST PIPE AND SERVICE CONENCTIONS

35.01 GENERAL

The Work in this section includes furnishing all labor, materials, tools, and equipment for reducing infiltration within the host pipe and service connections to an acceptable level prior to liner installation to ensure that placement and curing is not adversely affected by the presence of excessive infiltration and seal annular space between liners and host pipes at service lateral connections. Accordingly, the Engineer will base acceptance of this portion of the Work on the reduction of infiltration at host pipe joints and other defects to a level that will insure completion liner installation in accordance with these specifications.

Contractor shall furnish all labor, materials, equipment, and incidentals to seal active infiltration at host pipe joints, service lateral connections, and other defects as directed. Sealing shall be from inside the host pipe using a device equipped with a pan and tilt camera and inflatable packer as described herein.

35.02 PRODUCTS

A. Sealing Materials

1. The sealing compound shall be Acrylic base gel -Avanti AV-100, AV-1 18, Urethane base gel — Avanti AV-350 or Acrylate base gel- Deneff AC-400 or approved equal and shall be suitable for use in domestic wastewater collection systems. Handling, formulation and storage of the sealing gel compound shall be in strict conformance with the manufacturer's recommendations. The uncured gel shall be delivered to the site in unopened containers, with the date of manufacture clearly indicated, no uncured gel manufactured more than six months prior to the date of application shall be utilized. Residual sealing materials shall be removed from the wastewater collection system after injection to ensure no flow reductions, restriction or blockage occur.

2. Icoset additive shall be added to the sealing compound for gel strengthening. The quantity of Icoset additive will be according to the manufacturer recommendation. The sealing compound admixture shall be adjusted to meet specified viscosity and reaction time.

35.03 SUBMITTALS

A. The Contractor shall submit the following to the Engineer in accordance with Specification Section 03 - Submittals

1. Gel compounds
2. Installation equipment

35.04 EQUIPMENT

A. General

1. Sealing equipment shall consist of two separate pumping systems capable of supplying an uninterrupted flow of sealing materials to completely fill the voids. Pumps, fittings and hoses shall be designed to transport a high viscosity material and shall not be affected by acetone or ketone solvents.

2. Sealing materials shall pass from the pumping system through instant reading, controlled flow meters and then through a dual hose system into the sealing device. The device (referred to hereafter as a packer) shall be a cylindrical case of a size less than pipe size, with the cables at either and used to pull it through the host pipe.

3. Generally, the equipment shall be capable of performing the specified operations in pipes where flows do not exceed 25 percent without resorting to any method of flow control.

4. Air impervious inflatable sleeves shall be mounted over the cylinder with the ends of the sleeve sealed to the ends of the casting. The sleeves shall be so constructed that they can be pneumatically expanded from the center to both ends. The center portion of the sleeve shall be sealed to the casing by a broad confining band. When the packer is inflated. Two widely spaced annular bladders shall be formed, each having an elongated shape and producing an annular void around the confined portion of the sleeve. No sealing device which is expanded mechanically nor where the expansion sleeve is not continuous will be allowed in order to prevent damage to the pipe from excessive amounts of sealing pressures or air leakage in the center area of such sealing device. The sleeve shall be a low void packer.

5. Lateral service sealing is accomplished with a "Logiball" lateral packer. The objective of the lateral service packer is to seal the lateral service connection to the main pipe and the first 18-inches of the service lateral.

35.05 EXECUTION

A. General

Sealing shall be by the pressure grout method. Generally, this shall be accomplished by forcing chemical sealing gel materials through a system of pumps and hoses into and through the joints and other defects of the host or lateral pipe from the packer within the pipe. Jetting or driving pipes from the surface that could damage or cause undermining of the wastewater system shall not be allowed.

B. Grout Mixing

1. The Contractor shall mix all grout at the job site in the presence of the Engineer. No grout will be used on the job which has been mixed off site and is in the Contractor’s

tank when the truck drives on site. The Contractor's personnel shall follow the manufacturer's recommendations for the mixing and safety procedures to protect personnel from any adverse effects of the grouting compounds. Powder and additives shall be added and mixed at rates, which will minimize the formation of lumps within grout tanks solutions. All additives will be thoroughly mixed in the grouting component tanks.

2. Prior to application of grout for seal purposes. a pump test will be performed to determine if equal quantities of grout are being pumped from the grout component tanks. Separate containers shall be used to capture the discharges from the grout component tanks. One gallon of grout shall be pumped, and the pump strokes shall be counted. If unequal quantities are being pumped, the Contractor shall take corrective action. The pump test shall be repeated until equal quantities are pumped from the grout tanks.

3. During the grouting process, the Contractor shall monitor the grout component tanks to make sure that equal quantities are being pumped. If unequal levels are noted in the tanks. the pump test shall be repeated as described above. At the beginning of each day, when new batches of grout are mixed and when grout additives are modified to change gel times, a test shall be performed with quantities of grout to determine the grout mixture gel time. The Contractor shall have accurate scale(s) which shall be used to weigh the various non water grout solution components.

C. Host Pipe Sealing by Pressure Grout Method

1. The packer shall be positioned over the area of infiltration by means of a measuring device at the surface and the closed circuit television camera in the pipe. Accurate measurement of the location of the defect to be sealed shall be made, using a portion of the packer as a "Datum" of measurement point or target. Such measurement, target or point shall also be used to obtain necessary measurement for positioning injection area of packer over the area to be sealed.

2. The packer sleeves shall then be pneumatically expanded and shall seal against the inside periphery of the pipe to form a void area at the joint or defect now completely isolated from the remainder of the pipe segment.

3. Into this isolated area sealant materials shall be pumped through the hose system at controlled pressures, which are in excess of groundwater pressures. The pumping, metering and packer shall be integrated so that proportions and quantities of materials and pressures for materials and sealing gel can be instantly monitored and regulated in accordance with the type and size of the leak, percentage of voids being filled, type of soil surrounding the pipe and the rate of flow of the sealing gel solution in relation to the back pressures. These parameters should follow the manufacturer's specifications and guidelines.

4. Upon completion of the injection, the television camera shall be moved to a position to observe and inspect the results of the injection. If inspection shows the seal was

not effective, the process shall be repeated until infiltration has been reduced to an acceptable level for liner installation.

5. The packer shall be moved forward, wiping away the excess grout. The excess sealing material removed from the joint by the grouting equipment shall be flushed or pushed forward to the next downstream manhole, removed from the wastewater system and disposed of by the Contractor as specified by disposal of debris resulting from cleaning operations. in no case shall excess grout material be allowed to accumulate and be flushed down the system.

6. it is intended that chemical sealing shall be performed on host pipe immediately prior to the installation of the liner unless otherwise authorized by the Engineer. The Contractor shall notify the City Inspector a minimum of 48 hours prior to commencing Chemical sealing operation. The quantity of grout used shall be verified by the City Inspector.

7. Any part of the wastewater system damaged as a result of the Contractor's operations shall be promptly repaired by, and at the expense of, the Contractor.

8. All activities shall be video inspected during the sealing operation. The video shall be submitted to the Engineer for review and for permanent record. The video inspection shall comply with the requirements of the Technical Specification Section headed "Closed Circuit Television Inspection".

D. Lateral Service Sealing by Pressure Grout Method

1. Air testing laterals shall be accomplished by isolating the area to be tested with the lateral service packer and by applying positive pressure into the isolated void area. A pan and tilt camera shall be used prior to positioning the lateral packer. A sensing unit shall be used for continuous monitoring of the void pressure. This sensing unit shall be located within the void area and will accurately transmit continuous pressure readout to the control panel.

2. Joint testing and grouting for laterals will utilize a "Logiball" type system. The packer ends (end elements, sleeves) shall be expanded using controlled air pressure. The expanded ends shall seal against the inside periphery of the pipe to form a void area at the lateral, now completely isolated from the remainder of the pipe segment. Into this isolated area, sealant materials shall be pumped through the hose system at controlled pressures that are in excess of groundwater pressures. The pressure device shall accurately show psi to the nearest one tenth (0.1) pound and shall instantly respond to and record any change in the void pressure. The joint shall be tested with a gauge pressure of one-half psi per foot of depth of lateral pipe as measured by the deeper of the two manholes between which the lateral is located, or a minimum of 4 psi, whichever is larger. The pumping unit, metering equipment, and the packer device shall be designated so that proportions and quantities of materials can be regulated in accordance with the type and size of the leak being tested or sealed, percentage of voids being filled, type of soil surrounding the pipe and the rate of flow of the sealing gel solution in relation to the back pressures.

These parameters should follow the manufacturer's specifications and guidelines and be reviewed with the Engineer prior to the beginning of any grouting activities.

3. The test procedure will consist of applying air pressure into each isolated void area. To isolate a void, a lateral sealing packer shall be positioned straddling the lateral. The operator shall insert an inflatable inversion tube and inflate the packer ends to isolate the lateral. Once the designated pressure in the isolated void is displayed on the meter of the control panel, the application of air pressure will be stopped and a thirty-second waiting period will commence. The void pressure will be observed during this period. If the void pressure drop is greater than that allowed in the following Air Test Table, the lateral shall be considered to have failed the air test and shall be grouted as specified herein.

Air Test Table

Initial Void Pressure (psi)	Void Pressure After 30 Seconds
12-11	4.8-4.4
11-10	4.4-4.0
10-8	4.0-3.6
9-8	3.6-3.2
8-7	3.2-2.8
7-8	2.8-2.4
6-5	2.4-2.0

4. After completing the air test for each individual lateral specified herein, the lateral packer shall be deflated, with the void pressure meter continuing to display void pressure. If the void pressure does not drop to approximately zero, the equipment shall be adjusted to provide a zero void pressure reading at the monitor.

5. An air pre-test is not required for lateral sealing of service connections in main pipes that have been lined, as lateral sealing is required regardless of air test results. Pre and post-tests, and quantity of grout pumped shall be logged.

6. lateral sealing begins if the lateral does not pass the air test as described above. The lateral packer shall remain in position, thus maintaining the isolated void. Chemical grout sealant will be pressure injected through the lateral packer into the annular space between the inversion tube and the lateral pipe. Under pressure, the grout material shall be then forced out into the soil through leaking joints and pipe defects. The amount of chemical grout pumped is based on the number of pump strokes delivered to each lateral. The number shall be recorded on the sealing log.

7. Upon completion of the lateral sealing procedure, the lateral shall be air tested to verify the sealing of the connection. The air test will be the same as outlined above. If the sealed lateral fails the air test, the grouting procedure shall be repeated at no additional cost to the City. This sequence of air testing, grouting and subsequent air testing shall be repeated until either the lateral is sealed or it is determined that the grout consumption is too high and may result in the blockage of the lateral pipe. The final determination to stop subsequent attempts to seal a lateral will be made jointly

between the Engineer and the Contractor.

8. The Contractor shall verify lateral flow after the successful sealing of each lateral. With the lateral packer in position, the inversion tube shall be retracted and air pressure injected into the lateral. Should a pressure build in the lateral and not drop to zero in a few seconds, the packer will be moved off the connection and the connection shall be viewed with a television camera. With the camera viewing the connection point, an attempt will be made to obtain a water flush by the occupant. If no water is viewed during this procedure, it shall be assumed that the building service connection is blocked with grout and the responsibility to clear the lateral will be the Contractor's at no additional cost to the City.

9. The Contractor shall attach a notification form to the door of each home or building for which laterals have been grouted. This notification to the occupant shall state the following:

   The lateral service connection to (address) _____was grouted on (date) _____

   If any blockage of wastewater flow occurs, please call (emergency number)

   Any blockages that occur as a result of the lateral sealing operations will be cleared by the Contractor.

10. All activities shall be video inspected during both the air testing and sealing operation. The video shall be submitted to the Engineer for review and for permanent record. The video shall display at a minimum the date, manhole numbers, footage to the lateral, and void pressure readout. In addition, the data obtained during this operation shall be recorded on a lateral testing and sealing log provided by the Contractor. The log shall specify conditions of each service lateral sealed, break-in-service connection, lined pipe, etc.

E. Cleanup

Residual sealing materials that extend into the pipe, reduce the pipe diameter, or restrict the flow shall be removed and disposed of by the Contractor at an approved site. Sealed joints shall be left reasonably “flush” with the existing pipe surface. Excessive residual sealing materials in the system shall be cleaned to remove the residual materials.

F. Disposal

Furnish equipment for collection of cleaning solvents used in the cleaning of the sealing equipment. Collected solvents shall be disposed of by an approved solvent recovery process. Disposal of cleaning solvents into the wastewater system or into natural watercourses will be strictly prohibited.

G. Wastewater Flow Controls

When wastewater flows are above the minimum requirements or inspection of the complete periphery of the pipe is necessary to effectively conduct the inspection and sealing operations, one or more of the following methods of flow control shall be used.

1. A plug shall be inserted into the pipe at a manhole upstream from the section to be inspected and/or sealed. The plug shall be so designed that all or any portion of the wastewater flows can be released. During the inspection portion of the operation, flows shall be shutoff or substantially reduced in order to properly inspect the pipe at the invert. After the inspection is complete, flows shall be restored to normal or not more than 1/4 of the pipe diameter during the sealing operation. The Contractor will be responsible for preventing backups and overflows.

2. Where pumping is required, in the opinion of the Engineer, to assure completion of the inspection and sealing work, the Contractor will be required to furnish pumping and bypassing equipment. Refer to the requirements of Specification Section 16 ”Bypass Pumping” or Specification Section 01 "General”.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 36 – REMOVAL OF PROTRUDING SERVICE CONNECTIONS

36.01 GENERAL

The Work in this section includes furnishing all labor, materials, tools, and equipment for internally removing and sealing protruding service connection taps and excess mortar in wastewater pipe segments scheduled to be rehabilitated.

Remove only those taps that protrude sufficiently as specified herein which are determined to interfere with the pipe rehabilitation. The intent is to remove the minimum number of protruding taps necessary to allow the entire pipe segment to be rehabilitated.

The Contractor shall maintain wastewater flows, including pump around pumping, as required at all times during the performance of this work.

The Contractor shall remove all dirt and debris caused by tap removal. Excess material will not be allowed to enter the wastewater system and carried to downstream reaches.

The Contractor is advised that this Contract requires work in active wastewater collection systems and shall follow all federal, state and local requirements for safety in confined spaces. The Contractor shall conform to all guidelines by the Occupational Safety and Health Administration (OSHA) Federal Regulations; 29 CR Ch. XVII, Section 1910.146 Confined Space Entry.

36.02 PRODUCTS

A. Equipment

1. Protruding taps shall be removed using an internal, remote-controlled intruding pipe remover. Excavation and replacement of protruding taps will not be allowed except under special situations authorized in writing by the Engineer.
2. The equipment shall consist of a main body containing a rotating head assembly equipped with carbide cutting edges. The rotating cutting head shall be driven by air or by electricity and shall be capable of cutting concrete, vitrified clay pipe or other materials commonly used for pipe construction with the exception of cast iron or steel.
3. The equipment shall be self-propelled or pulled through the pipe using winches and a cable set up between adjacent manholes.
4. The equipment shall be positioned using a TV camera in conjunction with the cutter assembly.

36.03 EXECUTION

A. Performance

1. The Contractor shall remove all service taps specified herein that inhibit pipe segment rehabilitation methods. The Contractor is required to remove protruding

taps to the point where they are flush with the inside wall of the pipe.

2. The Contractor shall maintain a complete record of all taps that were removed and furnish two (2) copies of this record at the completion of this work.
    a. The list shall show the Work Order Number, date, street, and pipe segment (by manhole numbers), station and location (left, right and top) of each tap removed.
    b. The list shall also show similar data for any taps that were not successfully removed, as well as the reason why removal was unsuccessful.
3. The Contractor shall protect existing main pipe and service laterals from damage caused by improper use of the equipment. Damage to a main pipe or service lateral caused by removal of a tap shall be repaired immediately, as directed by the Engineer, at the Contractor's expense. Any increase in infiltration at the service connection caused by the Contractor's removal of the protruding tap shall be chemically sealed by the Contractor at no additional cost to the City, in accordance with the Technical Specification Section headed "Chemical Sealing of Service Connections".
4. The Contractor shall remove all dirt and debris from the wastewater system following completion of tap removal.

B. Inspection

1. Contractor shall televise protruding service connection tap prior to removal, recording location and footage to service connection. Following successful completion of removal, Contractor shall perform post-construction television inspection.
2. Post-cleaning and post-rehabilitation television inspections shall be recorded on the same video as specified in the Technical Specifications Section headed "Closed Circuit Television Inspection." Video and data shall be submitted to the Engineer. Video and data shall become the property of the City.

END OF SECTION

SECTION 37 – WASTEWATER STRUCTURE REHABILITATION

37.01 GENERAL

The Work in this section includes furnishing and installing wastewater structure components and coatings for rehabilitation, structural enhancement, and corrosion protection of existing wastewater manholes, for the various diameters listed on the Bid Form. Wastewater structures include, but are not limited to, manholes, vaults, junctions, and wet wells.

The Contractor shall furnish all materials, labor, equipment, and services necessary for wastewater manhole component replacement and coating installation including: traffic control, bypass pumping and/or diversion of wastewater flows, void repair, inflow/infiltration elimination, surface preparation, structure component and coating installation, testing, surface restoration, and cleanup of the Work site.

37.02 GOVERNING STANDARDS

The following Standards are referenced in this section:

ASTM	C 109	"Standard Test Method for Compressive Strength of Hydraulic Cement Mortars"
ASTM	C 157	"Standard Test Method for Length Change of Hardened Hydraulic-Cement, Mortar, and Concrete"
ASTM	C 293	"Standard Test Method for Flexural Strength of Concrete (Using Simple Beam With Center-Point Loading)"
ASTM	C 307	"Standard Test Method for Tensile Strength of Chemical-Resistant Mortar, Grouts, and Monolithic Surfacing"
ASTM	C 308 Modified	"Standard Test Method for Working, Initial Setting, and Service Strength Setting Times of Chemical-Resistant Resin Mortars"
ASTM	C 309	"Standard Specification for Liquid Membrane-Forming Compounds for Curing Concrete"
ASTM	C 321	"Standard Test Method for Bond Strength of Chemical-Resistant Mortars"
ASTM	C 496	"Standard Test Method for Splitting Tensile Strength of Cylindrical Concrete Specimens"
ASTM	C 531	"Standard Test Method for Linear Shrinkage and Coefficient of Thermal Expansion of Chemical-Resistant Mortars, Grouts, Monolithic Surfacing, and Polymer Concretes"

ASTM	C 579	"Standard Test Methods for Compressive Strength of Chemical-Resistant Mortars, Grouts, Monolithic Surfacing and Polymer Concretes"
ASTM	C 596	"Standard Test Method for Drying Shrinkage of Mortar Containing Hydraulic Cement"
ASTM	C 580	"Standard Test Method for Flexural Strength and Modulus of Elasticity of Chemical-Resistant Mortars, Grouts, Monolithic Surfacing, and Polymer Concretes"
ASTM	C 666	"Standard Test Method for Resistance of Concrete to Rapid Freezing and Thawing"
ASTM	C 882	"Standard Test Method for Bond Strength of Epoxy-Resin Systems Used With Concrete By Slant Shear"
ASTM	C 905	"Standard Test Methods for Apparent Density of Chemical-Resistant Mortars, Grouts, Monolithic Surfacing, and Polymer Concretes"
ASTM	D 543	"Resistance of Plastics to Chemical Reagents"
ASTM	D 638	"Tensile Properties of Plastics"
ASTM	D 695	"Compressive Properties of Rigid Plastics"
ASTM	D 790	"Flexural Properties of Unreinforced and Reinforced Plastics"
ASTM	D 1622	"Standard Test Method for Apparent Density of Rigid Cellular Plastics"
ASTM	D 1623	"Standard Test Method for Tensile And Tensile Adhesion Properties of Rigid Cellular Plastics"
ASTM	D 2126	"Standard Test Method for Response of Rigid Cellular Plastics to Thermal and Humid Aging"
ASTM	D 2584	"Volatile Matter Content"
ASTM	D 2842	Standard Test Method for Water Absorption of Rigid Cellular Plastics"
ASTM	D 3846	"Standard Test Method for In-Plane Shear Strength of Reinforced Plastics"

ASTM	D 4258	"Standard Practice for Surface Cleaning Concrete for Coating"
ASTM	D 4259	"Standard Practice for Abrading Concrete"
ASTM	D 4541	"Standard Test Method for Pull-Off Strength of Coatings Using Portable Adhesion Testers"
ASTM	D 4787	"Standard Practice for Continuity Verification of Liquid or Sheet Linings Applied to Concrete Substrates"
ACI	503	"Use of Epoxy Compounds with Concrete"
SSPC/ NACE	SP-13/ NACE 6	"Surface Preparation of Concrete"

37.03 DEFINITIONS

A. Coating Systems: includes surface description, surface preparation, required dry film thickness, and the number and application procedure of the prime and finish coatings. Systems are defined and identified in the article headed "Coating System Specification Sheets" in this Section of the Technical Specifications.

B. Field Coating: the application of the coating system in an existing manhole or structure.

C. Dry Film Thickness (DFT): the thickness of a fully cured coating or coating system.

D Wet Film Thickness (WFT): the thickness of a coating while wet.

E. Volatile Organic Content (VOC): the portion of a coating that is a compound of carbon, is photo chemically reactive, and evaporates during drying or curing, expressed in g/L or lbs/gal as defined in ASTM D3960.

F. Solvents: Those chemicals used to dilute the liquid coating either for thinning the coating or for cleanup.

G. Lead Containing: any coating that contains any detectable amount of lead.

H. Hard To Reach: areas that may not be accessible with spray equipment but can be reached by brush, mitt, or roller.

I. Inaccessible Areas: areas such as back-to-back angles, skip welds, and other areas that a brush, mitt, or roller cannot contact the surface.

J. Manhole Floor: the bench, channel and invert of the manhole containing the concrete/brick floor of a manhole generally shaped as a fillet to direct incoming flows to the outlet piping and to minimize solids buildup, the wall/bench joint, the shaped flow-ways within the bench, the bench/channel joint, and the invert which is the line of the lowest elevation along the bottom of the channel(s).

K. Manhole Wall: that part of the manhole extending from the bench/wall joint to the bottom of the cone/corbel.

L: Manhole Cone/Corbel: the reducing section which tapers concentrically or eccentrically from the top wall joint to the bottom of the chimney or the ring (frame) casting where there is no chimney.

M. Manhole Chimney: the narrow vertical section built from brick or concrete adjusting rings extending from the top of the cone/corbel to the bottom of the frame casting.

N. Leaks/ infiltration: presence of water, or indications of water, inside the manhole caused by subsurface water entering the manhole from the exterior through cracks, fractures, holes, broken seals, or other means.

O. Inflow: surface water generally entering into a manhole through or under the manhole cover, frame, frame seal, chimney wall, or at the cone/corbel chimney joint.

P. Void: as defined in ACI.

Q. pH: a measure of acidity and alkalinity.

R. Bug Holes: small regular or irregular cavities, not exceeding 15rnm in diameter, resulting from the entrapment of air bubbles of formed concrete during placement and compaction. Re-rounding shall not be permitted.

37.04 QUALIFICATIONS

A. The Contractor shall be certified and/or licensed by the coating system manufacturer(s) as an approved Applicator for the products referenced in this section.

B. The Applicator shall be the person responsible for the actual work, either as the foreman or the person actually applying the coating system.

37.05 SUBMITTALS

The Contractor shall submit the following to the Engineer

A. List of materials including coatings, repair materials, grouts, and blasting abrasive material proposed for use.

B. List of equipment and certification by the individual coating manufacturer that the application equipment is sufficient to adequately apply the coating.

C. For each coating system, provide the manufacturer's application guidelines including:
1. Surface preparation guidelines.
2. Primer type, where required.
3. Maximum wet and dry thickness per coat.
4. Minimum and maximum curing time between coats, and atmospheric conditions for each.
5. Curing time before submergence in municipal wastewater.
6. Thinner to be used with each coating.
7. Ventilator requirements.
8. Allowable application methods.
9. Maximum storage life.
10. Material safety data sheets.
11 . Interpretation of batch code numbers.
12. Minimum and maximum relative humidity requirements.
13. Minimum and maximum surface temperature requirements.
14. Minimum and maximum ambient temperature requirements.
15. Manufacturer's recommended application procedure.

D. Shop Drawings for frame and cover castings.

E. Product Data for manhole cover inserts.

F. Provide information on planned surface preparation procedures including, when relevant. abrasive media, minimum water cleaning pressure and flow rate (e.g. 5000 psig @ 4 gpm) • nozzle types (e.g. zero degree rotating nozzle), etc. for coating systems specified. Surface preparation methods shall be based upon the conditions of the substrate and the requirements of the protective coating to be applied. Whichever method(s) are used, they shall be performed in a manner that provides a uniform, sound, clean neutralized surface. At the request of the Engineer, the Contractor shall test for adverse chemical conditions that may hinder overall product performance.

G. Maintenance of Traffic Plan including, but not limited to, specific dates that the Maintenance of Traffic Plan shall be in place.

H. Wastewater Bypass Pumping plan, where required.

I. List of all test equipment to be used, copies of the adhesive and equipment's instructions, adhesives, calibration procedures, MSDS sheets, and copies of all reference standards related to the test equipment.

37.06 QUALITY ASSURANCE/ QUALITY CONTROL

A. General
1. Deviations from the manufacturer's printed instructions will not be allowed unless approved in writing by the Engineer.
2. In the event of a discrepancy between the Contractor's, manufacturer's or City Inspector's testing equipment, all parties shall check equipment in question for proper function and calibration.

3. Where there is a conflict between the manufacturer's recommendations and these Technical Specifications, the manufacturer's recommendations shall govern.
4. Test equipment and procedures shall be the same throughout the Contract.
5. Quality Control: Contractor shall be responsible for the quality control of the coatings applied including surface preparation, testing, verifying access, dimensions, configuration, pipe connections, appurtenances, and details of each manhole prior to commencing any Work as well as remedial work to be completed as identified by inspection at the given check points.
6. Quality Assurance: City Inspector shall approve the Contractor's Work regarding surface preparation and quality control of the coatings applied. This documentation in no way relieves the Contractor of the responsibilities described under this Contract. The City Inspector may conduct tests on ambient conditions, pH and surface temperature, coating(s) applied, wet and dry film thickness, coating type coating batch numbers, and other tests.

B. QA/QC Check Points

1. pH Testing: Prior to surface preparation for cementitious coating application, measure and record pH of the manhole interior surface and other parameters as required by coating manufacturer to verify acceptable existing substrate conditions for application of the specified product and to document compliance with warranty requirements. After surface preparation and prior to coating system being applied to the interior of a manhole (excluding coatings to only the interior of a chimney), measure and record pH of the manhole interior surface in at least two locations as approved by the City Inspector. Adjust if required by the coating system manufacturer and per NACE 6/SSPC SP 13 Table 1 for severe service.
2. Concrete surface tensile strength: After surface preparation (including repair and resurfacing products) and prior to a polymer coating system being applied to the interior of a manhole (excluding coatings to only the interior of a chimney and spot type only repairs) measure and record the results of a minimum of two concrete surface tensile strength tests, without glue failures, per manhole at locations as directed by the City Inspector. Tests shall be per ASTM D4541 as modified herein. Utilize a 20 mm test dolly and portable pull-off adhesion tester. Document test failure mode. Failure of the dolly adhesive shall require retesting. If the concrete surface tensile strength is less than 200 psi (NACE 6/SSPC SP 13 Table 1 for light service) notify manufacturer and Engineer for approval before applying coating. (Destructive testing as defined herein shall be performed on the initial manhole coated with a particular coating system. After the initial test. 10% of the manholes coated may require testing as selected by the Engineer. Initial and additional testing required due to test failures shall be at the Contractor's expense.)
3. Wet Film Thickness (WFT): During coating system application, measure and record WFT of the coating in at least four locations in the manhole (one in a chimney) or as directed by the City Inspector. Use an industry standard WFT gage (ASTM D4414) designed for thick coatings. Minimum W FT thickness is specified for each product in the article headed "Coating System Specification Sheets" in this Section of the Technical Specifications.
4. Surface Moisture: After preliminary surface preparation and prior to a polymer coating system being applied to the interior of a manhole, measure and record surface moisture of the manhole interior surface in at least two locations per ASTM

D426 and use a DELMHORST ACCUSCAN moisture meter using a 0 to 100 relative scale.

5. Blotter Test: Upon start up of abrasive blasting, compressed air shall be checked daily for oil and water by blotter test per ASTM D4285.
6. Anchor Profile of Surface: After preliminary surface preparation and prior to coating application to the interior of a manhole (excluding coatings only for interior of a chimney) compare and record anchor profile by comparison to various grits of sandpaper.
7. Surface Preparation: Shall be accepted by the coating system manufacturer prior to the application of the coating system.
8. Ambient Conditions: Measure and record the test results for relative humidity, manhole wall surface temperature, dew point and ambient temperature to ensure compliance for materials applied.
9. Coating Adhesion: After polymer coating system application and cure, measure and record the results of a minimum of two adhesion tests, without glue failures, per manhole at locations within the manhole as directed by the City Inspector. Tests shall be per ASTM D4541 as modified herein. Utilize a 20 mm test dolly and portable pull-off adhesion tester. Document test failure mode, whether failure is within the substrate, failure is within the coating, or failure is at the coating/substrate interface. Failure of the dolly adhesive shall require retesting. If the testing damages the coating, spot repair the test location while following manufacturer's recommendations. Failure at the coating/substrate interface with less than 10% of substrate adhered to the coating and less than 100 psi pull-off strength, shall be deemed a coating system failure and the Contractor shall remove the coating to soundly adhered edges, re-perform surface preparation procedures, and recoat the failed surfaces, at the Contractor's expense. Low pull-off strength values <150 psi) may require additional testing/evaluation to determine potential adhesion defects at the sole discretion of the Engineer. (Destructive adhesion testing as defined herein shall be performed on the initial manhole coated with a particular coating system. After the initial test, 10% of the manholes coated may require testing as selected by the Engineer. Initial and additional testing required due to test failures shall be at the Contractor's expense.)
10. Holiday Testing: The finished polymer coating shall be inspected per ASTM D-4787 "Continuity Verification of Liquid or Sheet Linings Applied to Concrete Substrates", using high-voltage spark testing equipment with variable settings. Test voltage shall be set at an initial 100 volts per mil (4,000 volts per mm) of specified film thickness, and then increased as needed to compensate for relative conductivity of the concrete substrate by spark testing an induced holiday at furthest extension of test probe from grounding location. Once test voltage is determined, it shall be used throughout that area, and then re-determined again every time a new ground is made. Detected holidays shall be marked and repaired per coating manufacturer's recommendations. Contractor shall be responsible to provide necessary Holiday Testing equipment for final inspection. Pinhole testing shall be accomplished using a Tinker Razor Holiday Detector, San Gabriel, CA, Model AP/W or an Engineer approved equal model. A test voltage of 100 volts/mil is recommended. This test shall identify and allow for the repair of pinholes in order to ensure a continuous pinhole-free lining. (Testing shall only be required where full depth manhole coating is specified.)

11. Exfiltration Testing: If necessary or as required perform exfiltration testing according to the following guidelines: Manholes and wetwells 6 feet deep or less should see less than one (1) inch of loss in five (5) minutes. Manholes and wetwells greater than 6 feet depth use one (1) inch plus an additional one eight (1/8) inch per additional foot of depth.
12. Vacuum Testing: May be conducted per ASTM C1244-93 only after rehabilitated structure has cured for a minimum of seven (7) days.

37.07 CONTAINMENT AND SITE CONDITIONS

A. No grouting materials, solvents, chemicals, blasting media, or debris of any sort shall be allowed to be discharged to the wastewater collection system. Water from pressure washing (>100 psi) may be allowed to enter the system after any debris has settled, when it demonstrated to the satisfaction of the City Inspector that no debris will enter the collection system. Water applied at less than 100 psi and containing common, household strength detergents, which are used strictly for rinsing the interior surfaces of the structure, may be allowed into the system as long as no debris are washed into the system. All odors noticeable by the average person shall be confined to an area within 10 feet of the structure. The Contractor shall provide odor control equipment or methods so odors are confined and in conjunction with closed space entry or other safety requirements.

B. Provide environmental controls such as ventilators if the cure time of the coating is slowed by the presence of coating or solvent vapor, and heaters and/or dehumidification as necessary to meet coating application requirements.

C. Applicator shall conform to all local, state, and federal regulations including those set forth by OSHA, RCRA, and the EPA.

37.08 WARRANTY

The Contractor shall unconditionally guarantee all manhole rehabilitation Work in this Contract against defects of materials and workmanship for a period of 3 years under normal use, operation, and service in accordance with the requirements of the Supplemental General Conditions article headed "Guarantee Period".

The Contractor and cementitious coating manufacturer shall warrant all cementitious manhole coating Work in this Contract against defects of materials and workmanship for a period of 10 years under normal use, operation, and service. The Contractor shall provide all testing and prepare all required installation reports, warranty registration documentation, etc. and submit same to the coating manufacturer and Engineer on behalf of the City. The Contractor shall furnish a warranty certificate from the cementitious coating manufacturer indicating acceptance and commencement of the warranty period. The Contractor and coating manufacturer shall, within sixty (60) days of written notice thereof, propose an acceptable method and repair any defects (including all labor and materials) that may develop during the warranty period in a manner acceptable to the Engineer and at no cost to the City. Defects shall be defined as: visible leakage of groundwater into the manhole or separation of any part of the coating from the host manhole or coating interfacing joints.

37.09 MATERIALS

A. Coating Products: Pure calcium aluminate cementitious manhole coating systems shall be Product A or B. Reinforced polymer manhole coating system shall be Product C, D, E, F, G, or H. Approved equal must be submitted for review and approval by the Engineer and City prior to bid.

B. Repair and Resurfacing Products: Repair materials must be compatible with specified manhole coating products and selected to minimize curing time. The following products may be accepted and approved as compatible:

1. Deneef AC 40, Avanti AV 100, or approved equal pressure grout for infiltration elimination.
2. 100% solids, solvent free epoxy grout specifically formulated to be suitable for top coating with the specified coating product(s}.
3. Factory blended, rapid setting, high early strength, fiber reinforced, non-shrink repair mortar that can be troweled or pneumatically spray applied, and specifically formulated to be suitable for top coating with the specified coating product(s}.
4. Products specifically designed for thin (1/4-inch or less) applications shall be used for channels needing to be raised to match or transition with CIPP (cured-in-place pipe) liners. Product shall be SikaTop 123 PLUS, or approved equal. Where manholes with CIPP liners are scheduled to receive a coating, any channel repair materials shall be as recommended by the specific coating manufacturer.

C. Brick Masonry and Precast Concrete Grade Adjustment Rings

1. Bricks shall be new, first quality, sound, hard, uniformly burned, regular and uniform in shape and size. Under burned or salmon brick shall not be acceptable. Only whole brick shall be used. Bricks shall conform to ASTM C32, Grade SS.
2. Precast concrete grade adjustment rings shall conform to the requirements of ASTM C 478. Precast adjustment rings shall not be less than 2 inches thick or be of multiple piece construction. To accommodate steep surface grades, non-uniform precast grade adjustment rings may be manufactured to 2 inches thick on one side and 3 inches thick on the opposite side.
3. Precast concrete grade adjustment rings shall provide structural capacity equal to or greater than the existing or specified manhole frame casting and shall not affect the opening size or surface appearance.
4. Mortar shall be factory blended, rapid setting, high early strength, fiber reinforced, non-metallic, chloride free, non-shrink or low-shrink repair mortar that can be troweled.

D. Frame and Cover Castings

1. Grey Iron castings shall conform to the requirements of ASTM A48 Class 35 B, unless otherwise specified, and be designed for HS-20 load rating.
2. Castings shall be manufactured true to pattern, and component parts shall fit together in a satisfactory manner. They shall be smooth and well cleaned by shot blasting. Circular manhole frame and cover castings shall be furnished with machined horizontal bearing surfaces. Frame and cover castings of the same nominal size shall be interchangeable.

E. Internal Chimney Sealant
1. The chimney sealant shall be minimum 100 mils thick of corrosion resistant aromatic flexible urethane resin coating applied to the inside wall of the chimney and manhole frame casting. The product shall have a minimum elongation of 800% and a Durometer of 75. The seal shall remain flexible allowing repeated vertical or horizontal movements of the manhole frame due to frost lift, ground movement or the thermal movement of pavements.
2. The chimney sealant shall have a minimum tensile and adhesion strength of 1150 PSI and 175 lb. per linear inch respectively. The chimney sealing system shall conform to the physical requirements of ASTM 0412. The chimney sealant shall be Flex-Seal Utility Sealant as manufactured by Sealing Systems. Inc. or approved equal.

F. Manhole Cover Insert
1. The insert body shall be manufactured of 304 stainless steel with a minimum thickness of 18 gauge. The insert shall have a deep-dish bowl design to allow for easy removal of the manhole cover. The insert shall be designed to provide a sufficiently loose fit in the manhole frame casting to allow for easy removal.
2. The insert body gasket shall seal against the frame casting, be made of closed cell neoprene, and affixed to the insert body with a pressure-sensitive adhesive. The gasket shall have a minimum thickness of 1/8 inch and be installed by the manufacturer.
3. The insert body shall have a handle made 3/16" plastic coated 304 stainless steel cable installed on the side of the bowl and attached with two 304 stainless steel round head bolts with flat washers and self-locking nuts.
4. The manhole cover insert and components shall be manufactured of materials resistant to corrosion from atmospheres containing hydrogen sulfide and dilute sulfuric acid. The manhole cover insert shall be InflowShield as manufactured by Inflow Systems, Inc. or approved equal.

G. Standardization: Materials, supplies, and articles provided shall be the standard products of the manufacturers and coating system specified. Coatings in a particular system shall be the products of a single manufacturer.

H. Delivery, Storage and Handling: Deliver materials for field application to the job site in their original, unopened, undamaged containers. Each container shall bear the manufacturers name brand, batch number, date of manufacture, and storage life. Coatings shall be stored in enclosed structures and shall be protected from weather, excessive high or low temperatures, and spills. Coatings exceeding storage life recommended by the manufacturer or that have been visibly damaged shall be removed from the site. Coating materials are to be stored and handled in accordance with their material safety data sheets.

37.10 REPAIR & PREPARATION

A. Repair of Bench and Channel: Manhole bench, flow channels, and inverts shall be repaired and/or constructed as directed to provide smooth flow characteristics and transition of flow through the manhole.

1. Contractor shall prepare, clean, and repair/rebuild manhole bench and flow channel(s) in the same manner as described above. Remove obstructions and loose materials from bench prior to shaping the channel and invert. Using brick and repair/resurfacing mortar, form a smooth, U-shaped channel having a minimum depth of one-half pipe diameter across the floor of the manhole using approved manhole rehabilitation materials. The top edge of the bench at the manhole wall shall be set at an elevation above one-half diameter of the adjacent pipe(s) and sloped at 1-inch per foot to drain toward the flow-through channel and outgoing pipe, and to intersect the channel edge at the one-half diameter level. Active flow shall be diverted as required to allow sufficient setting time for material used.
2. Form a smooth transition with a reshaped channel invert and a raised manhole bench to eliminate sharp edges on the pipe, bench, channel, or invert. Build up and smooth the invert of manhole to match flow line of the connecting pipes. Channel build-up and surface preparation for manholes to be coated shall be in accordance with the section headed "General Coating Preparation" in this Section of the Technical Specifications.
3. Finished benches, channels and inverts shall be smooth and without defects which would allow for accumulation of debris. Finished benches, channels and inverts shall conform to the Contract Documents.

B. Repair/Replacement of Chimney and Frame and Cover Casting

1. Frame and Cover Casting: Frame and cover castings shall be replaced with Contractor or City furnished frame and covers, as directed. Frame and cover replacement varies according to manhole type and shall be performed in accordance with the requirements of the Contract Documents. The existing castings shall be salvaged and delivered to the designated location.
2. Chimney: Manholes that have defective chimneys, frames and/or covers, or covers below grade will be designated for adjustment or replacement of the frame and cover. The Work shall include the following:
   a. Saw cut and remove existing asphaltic or concrete pavement. Existing brick or paver stone pavement shall be carefully removed without cutting and salvaged for reuse. Excavate to at least 6 inches below the bottom of the chimney replacement.
   b. Remove the existing manhole frame and cover casting, salvage and reuse the existing casting where adjustment is required, or deliver the salvaged casting to the designated location where replacement is required. Frames broken during removal or handling by the Contractor shall be replaced at the Contractor's expense.
   c. Remove loose, cracked, broken, deteriorated, deficient or otherwise unsound existing chimney materials as required or directed by the Engineer. Existing Portland cement brick shall be removed and replaced regardless of condition. Where existing frame and cover castings are being replaced with a larger frame and cover casting, the existing chimney/corbel shall be removed and replaced as required to provide a chimney that matches the opening of the larger replacement frame casting. Existing surfaces shall be cleaned and prepared for chimney replacement.
   d. The top of the cone shall be set between two and one-half inches and fourteen and one-half (14 1/2) inches below the bottom of the manhole cover

frame. It is the intent of the specifications to provide a minimum of two and one-half inches to accommodate future grade changes without disturbing the manhole. Where the distance between the bottom of the manhole cover frame and the top of the cone is greater than fourteen and one-half (14 1/2) inches, 12-inch riser units shall be used to bring the top of the cone to within the limits specified.

e. Replace existing chimney with new specified materials. The elevation and horizontal position of the frame shall be adjusted as necessary by installing precast grade adjustment rings or a sufficient number of brick and mortar rows to obtain the desired elevation. The frame and cover elevation and cross slope shall match the existing adjacent pavement. The frame and cover elevation shall be minimum 1 inch above existing grade in unpaved areas, or higher as directed by the Engineer. No materials other than the prepared mortar bed shall be used to obtain final elevation and slope of the frame. The prepared mortar bed shall be minimum 1/2 inch thick.

f. Backfill the excavation and restore surfaces to a condition equal or better than the existing condition prior to construction, in accordance with the requirements of the Contract Documents.

C. Elimination of Infiltration: Infiltration shall be considered as "Minor" or "Severe". (1) "Minor" infiltration consists of water penetration of the manhole structure, appearing as a wet stain or a minute flow (trickle) of water on the interior surface of the manhole. (2) "Severe" infiltration consists of multiple leaks penetrating an area or of single leaks that spray into the interior of the manhole which require drilling through the manhole structure and pumping grout by the use of pressurized injection grouting equipment to stop active leaks. Contractor shall ensure that all visible leaks are eliminated in accordance with the Contract Documents and the coating manufacturer's material recommendations prior to surface preparation and coating application.

1. "Minor" infiltration: If observed within the manhole structure after surface preparation is complete, the area shall be prepared and a product specifically formulated for infiltration control and recommended by the specified manhole coating manufacturer(s) shall be used to stop minor infiltration flows in accordance with the product manufacturer's guidelines.
2. "Severe" infiltration: Requires manhole drilling and pressure grouting. The products used for pressure grouting shall be installed in accordance with the manufacturer's guidelines. Substitute materials shall meet manhole coating manufacturer's recommendations for the particular manhole coating system specified.
    a. Manhole grouting shall only be performed where approved and after associated Work such as CIPP lining.
    b. Chemical grouting shall be performed beginning at the bottom of the manhole and continue up as required to seal all points of severe infiltration.
    c. Grouting, once commenced, shall be completed without stoppage. In case of equipment breakdown, wash out grouting system sufficiently to ensure fresh grout and adequate bond and penetration will occur upon restart. Maintain grout pressure until grout has set.
    d. Grout travel shall be verified by migration of grout to defects or adjacent injection holes.
    e. Injection holes shall be cleaned and patched with waterproof quick setting

mortar as recommended by grout manufacturer.

D. General Coating Preparation

1. Surfaces to be coated shall be cleaned and prepared per the coating manufacturer's recommendations or per International Concrete Repair Institute (ICRI) Guideline Number 03732, whichever is more rigorous. Before applying coating, all contaminants including wastewater, oil, grease, dirt, rust, loose mill scale, waxes, efflorescence, sealers, salts, old coatings, and other foreign substances shall be removed. Oil and grease shall be removed before mechanical cleaning (hydro-blasting) is started. Where mechanical cleaning is accomplished by abrasive blast cleaning, the abrasive used shall be washed, graded and free of contaminates which might interfere with the adhesion of the coating. Steam cleaning, detergent, industrial degreasers, and/or hot water shall be used to clean wall surfaces unless this is contrary to the recommendations of the specific coating system manufacturer. Acid solutions shall not be used.
2. As necessary, wastewater flow shall be stopped, bypassed or diverted for the preparation and application of the coating product{s).
3. Contractor shall prepare, clean, and seal all manhole wall penetrations in accordance with coating manufacturer's recommendations and as approved by the Engineer. Bench, channel, invert, chimney, and frame and cover casting repairs and/or replacements shall be completed before coatings are applied.
4. During surface preparation and coatings application, all nearby equipment, vehicles, structures, etc. shall be protected from blasting grit, dust and over sprayed, dropped or spilled materials. Surfaces adjacent to a proposed leading edge of coating application shall be taped-off or otherwise protected.
5. Clean cloths and clean fluids shall be used in solvent cleaning.
6. Contractor shall inspect all surfaces specified to receive a protective coating prior to surface preparation. Contractor shall notify Engineer of any noticeable disparity in the surfaces which may interfere with the proper preparation or application of the repair mortar and coating. Surface profile created by mechanical cleaning shall be per the coating manufacturer's recommendations.
7. Damaged surfaces shall be observed by the City Inspector before repairs are made. Where concrete or brick deterioration in a manhole structure is severe, structural integrity may need to be restored prior to application of coating, at Engineer's approval.
8. All active infiltration must be eliminated prior to proposed repair with materials as recommended by the coating manufacturer.
9. Plug or place covers over all pipe openings to prevent extraneous material from entering the wastewater system.

E. Surface Preparation of Concrete and Masonry Surfaces

1. Concrete: prepare per SSPC SP13/NACE 6 "Surface Preparation for Concrete," and the coating manufacturer's recommendations. All leaks evidenced by indications of infiltration, shall be plugged with materials as recommended by coating manufacturer. Surface profile created by abrasive blasted surfaces shall be per the manufacturer's recommendation for the coating system.
2. Brick Manhole: prepare per the coating manufacturer's recommendations. Contractor shall remove all oil, grease, chemicals and paints or protective coatings

by chemical cleaning prior to hydro-blasting or abrasive blasting. All foreign particles and attacked or unsound mortar shall be removed from the joints. All leaks evidenced by indications of infiltration, shall be plugged with materials as recommended by coating manufacturer. Loose brickwork and voids in the mortar joints shall be re-grouted with repair materials to provide a void free smooth surface for coating application.

3. Loose or protruding brick, mortar and concrete shall be removed by using a mason's hammer and chisel. The surface to be repaired must be clean and free of any loose materials.
4. Repair products shall be used to fill bugholes, holes, honeycombs, for patching of deep craters, voids or spalled areas of concrete, and/or smoothing transitions between components prior to coating installation. Products used must be compatible with the specified coating system(s) and used/applied in accordance with the repair product manufacturer's recommendations. Materials used shall be recommended by the coating system manufacturer.
5. Resurfacing/repair products shall be mixed, applied, allowed to cure, and treated per their manufacturer's recommendations, before they are coated. The Contractor shall ensure that resurfacing/repair and/or patching materials are fully cured before final surface preparation or coating application. The Contractor shall follow manufacturer's cure schedule before over coating.
6. Surfaces which are to be coated shall be allowed to dry to the moisture content recommended by the coating manufacturer.

F. Coating Interface with Adjoining Construction Materials

1. Coating product(s) shall interface with adjoining construction materials throughout the manhole structure to effectively seal and protect concrete or masonry substrates from infiltration and attack by corrosive elements. Procedures and materials necessary to affect this interface shall be as recommended by the coating product(s) manufacturer and approved by the Engineer. Termination points of the polymer coating product(s) shall have a minimum three (3) inch interface overlap with each pipe penetration. Termination points of the cementitious coating product(s) shall have flush interface abutting each pipe penetration. Wastewater flow shall be stopped, bypassed or diverted for the preparation and application of the coating product(s) to the invert and interface with pipe materials.
2. CIPP Liners: Polymer manhole coatings shall be chemically compatible with and have the ability to bond with the external or internal (with required surface preparation) surface of CIPP liners. Where manholes are coated in conjunction with CIPP lining activities by others, coating shall take place after pipe lining and utilize the existing wastewater Bypass Pumping setup where possible. Resurfacing/repair products shall be selected to minimize curing time. Manhole surface preparation and repair materials prior to coating shall be placed within the invert, channel, and benches at proper depth to allow for proper coating thickness, interface matching with CIPP profile, and minimum three (3) inch overlap of polymer coatings with CIPP terminal edges (internally or externally) in the invert, channel, benches, and remaining areas. The coating shall be monolithic with piping and manhole components. The CIPP surface to be interfaced with and overlapped with polymer coatings shall be clean and remain protected prior to coating. Surface preparation of internal CIPP surfaces shall require wire brushing or other approved means prior to coating to ensure bonding.

G. Final Cleaning: The Contractor shall ensure that all surfaces to be coated are free of dust, moisture, and condensation. Nearby surfaces shall be cleaned to prevent contamination of substrate or freshly applied coatings.

H. Internal Chimney Sealant Application
1. All loose and protruding mortar and brick that would interfere with the seal's performance shall be removed and the manhole frame casting, chimney and cone/corbel cleaned by wire brushing. Prepare the surface as required by the manufacturer.
2. Active infiltration shall be corrected in accordance with the requirements of the section headed "Elimination of Infiltration" in this Section of the Technical Specifications prior to installing the internal chimney sealant. Resurfacing/repair products shall be completely cured in accordance with the manufacturer's requirements prior to installing the internal chimney sealant. The substrate surface must be free of sand, loose debris, dust, dirt, oil, grease or chemical contamination. A blower may be required to completely dry the substrate surface as recommended by the manufacturer.
3. Ensure the frame casting and structure is clean and dry prior to applying the adhesive primer. Brush the adhesive primer onto the casting and structure surfaces where the sealant is intended to adhere, in accordance with the requirements of the manufacturer.
4. The chimney sealant shall be evenly brush applied to the required thickness after the adhesive primer has dried, in accordance with the requirements of the manufacturer.
5. The chimney sealant shall be applied and extend vertically from 1-inch above the frame seal to 2-inches below the chimney and cone/corbel joint. The chimney sealant shall be applied and extend vertically from 1-inch above the frame seal to 12-inches below the frame seal for brick manholes where the frame is installed directly on the cone/corbel.

I. Manhole Cover Insert Installation
1. The Contractor shall accurately measure the existing frame and cover casting prior to ordering the manhole cover insert.
2. The manhole frame casting seat shall be free of all dirt, debris, rust and scale prior to the installation of the manhole cover insert. The insert shall be fully seated around the frame casting seat to ensure against water seepage between the insert and frame casting, and as recommended by the manufacturer.

37.11 COATING MATERIAL APPLICATION

A. Workmanship: Coating shall be conducted in accordance with the requirements of SSPC, Good Painting Practice, Volume 1.
1. Coated surfaces shall be free from significant runs, drips, ridges, waves, laps and brush marks, etc. Coats shall be applied so as to produce an even film of uniform thickness.
2. Coating equipment shall be designed for application of the materials specified.
   a. Compressors shall have traps and filters to remove water and oils.
   b. Spray equipment shall be equipped with mechanical agitators, pressure gages, and pressure regulators, and spray nozzles of the proper sizes and functioning in a manner suitable to perform the work.
   c. The spray equipment shall be specifically designed to accurately ratio and apply the specified protective coating materials and shall be regularly maintained and in proper working order. Spray application equipment must be approved by the coating manufacturer and shall be used to apply each coat of the protective coating.
3. Each coat shall be applied evenly and sharply cut to line.

B. Coating Properties, Mixing, and Thinning

1. Coating shall provide a monolithic film with coverage of all specified surfaces and interfacing joints. Undercoats shall be sanded as required to provide a surface suitable for the proper application and adhesion of subsequent coats. Coating shall be thoroughly stirred, strained, and kept at a uniform consistency during application.
2. Coatings shall be mixed in accordance with the manufacturer's instructions.
3. Clean, potable water shall be used for mixing and accurately metering to the prescribed amount for each batch of the lining system

C. Method of Coating Application

1. Observe OSHA Safety Guidelines when entering Confined Space working areas
2. Where two or more coats are required, all coats shall be WFT tested.
3. Coating shall not be applied to a surface until it has been prepared as specified and approved for coating by the manufacturer.
4. Action shall be taken to prevent rebound material from entering active sewer lines

D. Film Thickness and Continuity

1. Coating system thickness is the total thickness of primer and finish coats. Coatings shall be applied to the thickness specified.
2. Overspray, pinholes and other surface defects shall be repaired.

37.12 COATING SYSTEM SPECIFICATION SHEETS

Coating Systems specified for use appear on the following pages.

Product A

Manufacturer:	Kerneos Inc., 1316 Priority Lane, Chesapeake, VA-1-877-KERNEOS, 757-284-3200 or FAX 757-284-3300.
Product Name:	SewperCoat PG
Qualifications:	Applicator shall be trained and certified by the manufacturer as qualified to apply the specified coating. Applicator qualifications are addressed under item 12 of the Proposal Questionnaire. Provide references and documentation of certification and experience with submittals.
Material Classification:	Pre-packaged 100% calcium aluminate fiber reinforced cementitious monolithic coating composed of pure fused calcium aluminate cement and manufactured calcium aluminate aggregate (no other aggregate material permitted), and is resistant to biosulfuric acid attack. Chemical composition of the calcium aluminate cement and aggregate portion: Al_2O_3= 39 - 44%, CaO = 34 - 38%, $FeO+Fe_2O_3$ = 9 - 15%, SiO_2=6 - 8%.
Surfaces:	Field applied to existing manholes. Coat all of interior of existing concrete, brick, and block manholes, including channels, and interfacing pipe joints.
Color:	Gray
Compressive Strength:	>7,000 psi @ 28 Days per ASTM C1 09
Tensile Strength:	>700 psi @ 28 Days per ASTM C496
Flexural Strength:	> 1,300 psi @ 28 Days per ASTM C348
Shrinkage @ 90% RH:	<0.07% @ 28 Days per ASTM C596
Bond:	>2,500 psi @ 28 Days per ASTM C882

Freeze-Thaw:	No visible damage after 300 cycles per ASTM C666
Density:	Per manufacturer
Service Condition:	Immersed, non-immersed, domestic wastewater corrosive environment.
Surface Preparation:	Per the International Concrete Repair Institute (ICRI) Guideline No. 03732 and the section headed "Preparation" in this Section of the Technical Specifications. Inject or hand pack grout to seal holes, leaks and seeping. Prepared surface shall be thoroughly moistened with water prior to the application. Do not apply to surfaces with running water.
Repair Materials:	Patching grout, infiltration control grout, and any other repair materials shall comply with the recommendations of the manufacturer. No holes or honeycomb surfaces should remain after the application of the repair mortar. Materials shall be fully cured before coating is applied.
Environmental Controls:	Minimum air temperature 40 degrees F and do not expose to rain or snow. Maximum mix temperature 90 degrees F at time of application. Provide ventilation as recommended by manufacturer. Provide wastewater bypass as necessary
Application:	Field application by "wet-shotcrete" method typically with a low-pressure progressive cavity (rotor/stator) type pump that is clean and free of any Portland cement residue. Only unopened manufacturer pre-packaged material permitted for use and mixed with clean potable water per manufacturer's recommendation. Applied by trained technician who is experienced in the application of spray applied cementitious coatings and has been certified by the manufacturer. Coating shall be applied within 24 hours of completion of surface preparation. The finished bench surfaces shall be smooth, free of ridges and will be sloped in the direction of flow. Special care shall be used to ensure a smooth transition between the new manhole invert and intersecting pipe inverts such that flow will not be impaired. Manufacturer to certify equipment proposed for use by Contractor.
Curing:	Per manufacturer's recommendations and minimum 18 hours moist curing. Curing compound, if required, shall meet the requirements of ASTM C309 and be approved by the lining material manufacturer and the Engineer prior to use. Minimum 6 hours curing prior to contact or immersion with flowing wastewater
Thickness:	Minimum of 1/2 inch DFT
Tolerances:	Minus 0 inches.
Cleanup:	Water
Inspection Check Points:	See the subsection headed "Quality Assurance/Quality Control" in this Section of the Technical Specifications. Check Points 1 through 10.

Product B

Manufacturer:	The Strong Company, Inc., 4505 Emmett Sanders Road, Pine Bluff, AR -1-800-982-8009 or FAX 870-850-6933.
Product Name:	High Performance Mix
Qualifications:	Applicator shall be trained and certified by the manufacturer as qualified to apply the specified coating. Applicator qualifications are addressed under item 12 of the Proposal Questionnaire. Provide references and documentation of certification and experience with submittals.
Material Classification:	Pre-packaged 100% calcium aluminate fiber reinforced cementitious monolithic coating composed of pure fused calcium aluminate cement and

	manufactured calcium aluminate aggregate (no other aggregate material permitted) and is resistant to biosulfuric acid attack. Chemical composition of the calcium aluminate cement and aggregate portion: Al_20 3::: 39 44%, CaO ::: 34 - 38%, $FeO+Fe_20_3$ ::: 9 - 15%, $Si0_2$::: 6 - 8%.
Surfaces:	Field applied to existing manholes. Coat all of interior of existing concrete, brick, and block manholes, including channels, and interfacing pipe joints.
Color:	Gray
Compressive Strength:	>9,000 psi @ 28 Days per ASTM C109
Tensile Strength:	>800 psi @ 28 Days per ASTM C496
Flexural Strength:	>1,300 psi @ 28 Days per ASTM C293
Shrinkage @ 90% RH:	0% @ 28 Days per ASTM C596
Bond:	>3,000 psi @ 28 Days per ASTM C882
Freeze-Thaw:	No visible damage after 300 cycles per ASTM C666
Density:	Per manufacturer.
Service Condition:	Immersed, non-immersed, domestic wastewater corrosive environment.
Surface Preparation:	Per the International Concrete Repair Institute (ICRI) Guideline No. 03732 and the section headed "Preparation" in this Section of the Technical Specifications. Inject or hand pack grout to seal holes, leaks and seeping. Prepared surface shall be thoroughly moistened with water prior to the application. Do not apply to surfaces with running water.
Repair Materials:	Patching grout, infiltration control grout, and any other repair materials shall comply with the recommendations of the manufacturer. No holes or honeycomb surfaces should remain after the application of the repair mortar. Materials shall be fully cured before coating is applied.
Environmental Controls:	Minimum air temperature 40 degrees F and do not expose to rain or snow. Maximum mix temperature 90 degrees F at time of application. Provide ventilation as recommended by manufacturer. Provide wastewater bypass as necessary.
Application:	Field application by "wet-shotcrete" method typically with a low-pressure progressive cavity (rotor/stator) type pump that is clean and free of any Portland cement residue. Only unopened manufacturer pre-packaged material permitted for use and mixed with clean potable water per manufacturer's recommendation. Applied by trained technician who is experienced in the application of spray applied cementitious coatings and has been certified by the manufacturer. Coating shall be applied within 24 hours of completion of surface preparation. The finished bench surfaces shall be smooth, free of ridges and will be sloped in the direction of flow. Special care shall be used to ensure a smooth transition between the new manhole invert and intersecting pipe inverts such that flow will not be impaired. Manufacturer to certify equipment proposed for use by Contractor.
Curing:	Per manufacturer's recommendations and minimum 18 hours moist curing. Curing compound, if required, shall meet the requirements of ASTM C309 and be approved by the lining material manufacturer and the Engineer prior to use. Minimum 6 hours curing prior to contact or immersion with flowing wastewater.
Thickness:	Minimum of 1/2 inch DFT
Tolerances:	Minus 0 inches.
Cleanup:	Water
Inspection Check Points:	See the subsection headed "Quality Assurance/Quality Control" in this Section of the Technical Specifications. Check Points 1 through 10.

Product C

Manufacturer:	Protective Liner Systems, Inc. 7625 Mall Parkway, Lithonia, GA 30038. P.O. Box 921, Lithonia, GA 30058. (770) 482-5201, (770) 861-9965.
Product Name:	PLS-650 PerpetuWall Liner System. (PLS-613, PLS-614, PLS-700 and PLS-618)
Qualifications:	Applicator shall be trained and certified by the manufacturer as qualified to apply the specified coating. Applicator qualifications are addressed under item 12 of the Proposal Questionnaire. Provide references and documentation of certification and experience with submittals.
Material Classification:	Fiberglass-reinforced modified epoxy resin monolithic coating system. 100% solids bisphenol A epoxy resin with polyamide curing agent. Materials per ASTM D638-Test Method for Tensile Properties of Plastics, and ASTM D790-Test Methods for Flexural Properties of Unreinforced and Reinforced Plastics and Electrical Insulating Materials.
Surfaces:	Field applied to existing manholes. Coat all of interior of existing concrete, brick, and block manholes, including channels and interfacing pipe joints.
Color:	Light gray
Compressive Strength:	16,800 psi per ASTM D695
Tensile Strength:	12,400 psi per ASTM D638
Flexural Strength:	13,900 psi per ASTM D790
Shrinkage @ 90% RH:	500,000 psi per ASTM D790
Bond:	Shall exceed tensile strength of substrate
Low-Temp. Flexibility:	Per manufacturer, per ASTM D1790
Density:	Per manufacturer.
Service Condition:	Immersed, non-potable, non-immersed, domestic wastewater, corrosive environment, interior and exterior water pressure, traffic areas.
Surface Preparation:	Per the section headed "Preparation" in this Section of the Technical Specifications. In addition, galvanized steel and aluminum may require etching. Inject or hand pack grout to seal holes, leaks and seeping. Can be applied to wet or dry surface. do not apply to surfaces with active infiltration or running water.
Repair Materials:	Patching grout, infiltration control grout, and any other repair materials shall comply with the recommendations of the manufacturer. No holes or honeycomb surfaces should remain after the application of the repair mortar. Materials shall be fully cured before coating is applied.
Environmental Controls:	Provide heaters, dehumidification, and ventilation as recommended by manufacturer and as needed. Provide wastewater bypass as necessary.
Design:	Shall be designed to withstand the hydraulic load generated by the groundwater table. The invert and bench coating thickness shall be the same as that required at the bottom of the manhole wall as determined by the manufacturer's standard engineering calculations for groundwater pressure. Coating thickness design to be based on the groundwater table being one foot below the ground surface. Testing required for design values of the flexural modulus of the coating will be verified by a third-party independent testing lab paid for by the Contractor. The test results and design information for each individual structure shall be submitted to the Engineer for review.
Application:	Field application of PLS-613 or PLS-614 depending on temperature and conditions of application by trained technician who has been certified by the

	manufacturer. PLS-613 can be hand applied by brush, roller or trowel on dry or wet surface. PLS-614 is applied by trowel on dry or wet surface. Coating shall be applied within 24 hours of completion of surface preparation. Coating steps: (1) Begin with an approximate WFT of 100 mils (2) fiberglass fabric cut and pressed into epoxy mastic to full wet-out (3) adjacent applications of fabric edges to be overlapped or butt-jointed (4) fabric top coated with epoxy PLS-613 or PLS-614. Additional coats can be applied in 2-3 hours, but no later than 24 hrs. The finished bench surfaces shall be smooth, free of ridges and will be sloped in the direction of flow. Special care shall be used to ensure a smooth transition between the new manhole invert and intersecting pipe inverts such that flow will not be impaired. Manufacturer to certify equipment proposed for use by Contractor.
Curing:	Coating will cure in 3-4 hours at 70 degrees F to approximately 75% of their strength, after which time may be subjected to active flow. Maximum physical properties achieved in 4-5 days. Higher temperatures will reduce these requirements.
Thickness:	Per manufacturer's design. 125 mils minimum thickness.
Tolerances:	Plus 20 mils or minus 10 mils.
Cleanup:	Clean equipment with Xylene or lacquer thinner. Clean hands with denatured alcohol or Go-Jo type hand cleaner. Dispose of solvent and debris as required by code.
Inspection Check Points:	See the subsection headed "Quality Assurance/Quality Control" in this Section of the Technical Specifications. Check Points 1 through 10.

Product D

Manufacturer:	International Paint LLC; 6001 Antoine Drive, Houston TX 77091 (713) 682-1711
Product Name:	Enviroline 222
Qualifications:	Contractor/applicator trained in the application of high-performance industrial lining systems
Material Classification:	Epoxy novolac
Surfaces:	Carbon steel, stainless steel, concrete; substrate preparation and application in accordance with Manufacturer Data Sheet and Application Guidelines
Color:	Green, Gray
Compressive Strength:	ASTM D695 @ 40 mils TDFT: 72MPa
Tensile Strength:	ASTM D638 @ 40 mils TDFT: 38MPa
Flexural Strength:	ASTM D790 @ 40 mils TDFT: 66MPa
Shrinkage @ 90% RH:	N/A
Bond:	1700 psi on steel, exceeds tensile strength of concrete
Low-Temp. Flexibility:	N/A
Density:	11.4 lbs/gal (1.62 g/cm) / ASTM D1475
Service Condition:	Immersion or secondary containment of wastewater infrastructure, non-potable water and chemicals
Surface Preparation:	Substrate preparation in accordance with Manufacturer Data Sheet and Application Guidelines
Repair Materials:	Intercrete 4801, 4802 & 4820, for topcoat epoxy repair: Enviroline 222 and depending on service, Enviroline 124
Environmental Controls:	Substrate preparation and application in accordance with Manufacturer

	Data Sheet and Application Guidelines
Application:	Application in accordance with Manufacturer Data Sheet and Application Guidelines
Curing:	8 hours at 77° F.
Thickness:	20-100 mils TDFT
Tolerances:	SSPC-PA 2 Level 3
Cleanup:	Enviroline 71C
Abrasion Resistance	ASTM 4060 average of 41.4 mg weight loss per 1000 cycles, CS17 wheel with 1kg loading
Severe Wastewater Analysis Test (ASTM G210)	ASTM G210 Performed well in Severe Wastewater Analysis Test
Inspection Check Points:	See the subsection headed "Quality Assurance/Quality Control" in this Section of the Technical Specifications. Check Points 1 through 10.

Product E

Manufacturer:	Tnemec Company, Inc. 123 West 23rd Ave, North Kansas City, MO, 64116 Phone: 1-816-483-3400 Represented locally by Florida Protective Coatings Services Office Phone: (407) 322 – 1243 Local Representative (Chad Holmes) Phone: (727) 201 – 6706
Product Name:	Tnemec Perma-Shield Series 435 Perma-Glaze
Qualifications:	Applicator must have a minimum NACE level 1 on staff and have a minimum 5 completed projects of similar size & complexity to this work with the use of Tnemec coatings. Applicator must meet all other requirements of the municipality.
Material Classification:	Micro-Fiber Reinforced, Modified Polyamine Epoxy
Surfaces:	Field applied to existing manholes. Coat all of interior of existing concrete, brick, and block manholes, including channels and interfacing pipe joints.
Color:	Gray or Beige
Compressive Strength:	No Less than 9,427 (65.0 MPa) compressive strength, average of five tests.
Tensile Strength:	No less than 3,231 psi (22.28 MPa) tensile strength.
Tensile Modulus of Elasticity (ASTM D2370)	No less than 241,368 psi (1664.17 MPa) tensile modulus of elasticity.
Service Condition:	**Non-potable, anaerobic wastewater environments with mild H_2S concentrations (Immersion & Headspace).**
Surface Preparation:	Abrasive blast or mechanically abrade in accordance with SSPC-SP13/NACE No. 6 to remove all existing coatings and provide a minimum ICRI CSP 5 surface profile. Surface must be clean, dry, and contaminant-free prior to coating.
Repair Materials:	Tnemec Series 218 at a nominal 1/8” and as needed to bring surfaces to level. Series 217 may also be used for deeper repairs (See Application Guide for details).
Environmental Controls:	Substrate temperature should be at least 5°F above the dew point. Refer to manufacturer’s latest written recommendations for additional guidance.
Application:	Refer to product data sheet and Series 435 Application Guide for latest storage, equipment, and application recommendations. Refer to Tnemec’s Perma-Shield Details Guide for construction details

Curing:	Maximum recoat window is 7 days. Cure for 2 days (at 75°F) prior to placing into service.
Thickness:	30.0 – 40.0 mils in one or two coats.
Cleanup:	Tnemec's #4 thinner or MEK.
Abrasion Resistance	No more than 72 mg loss after 1,000 cycles, average of three tests
Severe Wastewater Analysis Test (ASTM G210)	Initial impedance of 12.46 log-Z at 0.01 Hz (ohms cm²). No blistering, cracking, checking or delamination. No less than 84.3% retention and no more than 1.95 ohms cm² reduction in electrochemical impedance after 28 days exposure. No less than 93% loss of tensile adhesion after 28 days in S.W.A.T. average of three tests.
Inspection Check Points:	See the subsection headed "Quality Assurance/Quality Control" in this Section of the Technical Specifications. Check Points 1 through 10.

Product F

Manufacturer:	Tnemec Company, Inc. 123 West 23rd Ave, North Kansas City, MO, 64116 Phone: 1-816-483-3400 Represented locally by Florida Protective Coatings Services Office Phone: (407) 322 – 1243 Local Representative (Chad Holmes) Phone: (727) 201 – 6706
Product Name:	Body Coat (Option 1): Tnemec Series 434 Perma-Shield H_2S. Body Coat (Option 2): Tnemec Series 436 Perma-Shield FR. Glaze Coat: Tnemec Series 435 Perma-Glaze
Qualifications:	Applicator must have a minimum NACE level 1 on staff and have a minimum 5 completed projects of similar size & complexity to this work with the use of Tnemec coatings. Applicator must meet all other requirements of the municipality.
Material Classification:	434: Modified Aliphatic Amine Epoxy Mortar 436: Fiber-Reinforced Modified Polyamine Epoxy 435: Micro-Fiber Reinforced, Modified Polyamine Epoxy
Surfaces:	Field applied to existing manholes. Coat all of interior of existing concrete, brick, and block manholes, including channels and interfacing pipe joints.
Color:	Gray or Beige
Compressive Strength:	No Less than 8,866 psi (6.13 MPa) compressive strength, average of five tests.
Tensile Strength:	No less than 2,940 psi (20.3 MPa) tensile strength.
Tensile Modulus of Elasticity (ASTM D2370)	No less than 6,753 psi (46.6 MPa) tensile modulus of elasticity.
Service Condition:	**Non-potable, anaerobic wastewater environments with moderate to severe H_2S concentrations (Immersion & Headspace).**
Surface Preparation:	Abrasive blast or mechanically abrade in accordance with SSPC-SP13/NACE No. 6 to remove all existing coatings and provide a minimum ICRI CSP 5 surface profile. Surface must be clean, dry, and contaminant-free prior to coating. Cementitious surfaces with a pH less than 9 shall not be considered "contaminant-free".
Repair Materials:	Tnemec Series 218 at a nominal 1/8" and as needed to bring surfaces to level. Series 217 may also be used for deeper repairs (See Application Guide for details).
Environmental Controls:	Substrate temperature should be at least 5°F above the dew point. Refer to

	manufacturer's latest written recommendations for additional guidance.
Application:	Refer to Tnemec Product Data Sheets and Application Guides for latest storage, equipment, and application recommendations. Refer to Tnemec's Perma-Shield Details Guide for construction details.
Curing:	Maximum recoat window is 7 days. Cure for 2 days (at 75°F) prior to placing into service.
Thickness:	Body Coat (Option 1) Series 434: Nominal 1/8", or 125.0 mils thickness. Body Coat (Option 2) Series 436: Nominal 1/8", or 125.0 mils thickness. Glaze Coat Series 435: 15.0 – 20.0 mils.
Cleanup:	Tnemec's #4 thinner or MEK.
Abrasion Resistance	No more than 72 mg loss after 1,000 cycles, average of three tests.
Severe Wastewater Analysis Test (ASTM G210)	Series 434: Initial impedance of 10.6 log-Z at 0.01 Hz (ohms cm²). No blistering, cracking, checking or delamination. No less than 86.7% retention or not more than 1.4 ohms cm² reduction in log-Z electrochemical impedance at 0.01 Hz after 28 days exposure. No loss of adhesion after 28 days in S.W.A.T., average of three tests. Series 436: Initial impedance of 10.2 log-Z at 0.01 Hz (ohms cm²). No blistering, cracking, checking or delamination. No less than 83.7% retention or not more than 1.6 ohms cm² reduction in log-Z electrochemical impedance at 0.01 Hz after 28 days exposure. Series 435: Initial impedance of 12.46 log-Z at 0.01 Hz (ohms cm²). No blistering, cracking, checking or delamination. No less than 84.3% retention and no more than 1.95 ohms cm² reduction in electrochemical impedance after 28 days exposure. No less than 93% loss of tensile adhesion after 28 days in S.W.A.T. average of three tests.
Inspection Check Points:	See the subsection headed "Quality Assurance/Quality Control" in this Section of the Technical Specifications. Check Points 1 through 10.

Product G

Manufacturer:	GML Coatings, LLC. 10315 Technology Terrace, Bradenton FL 34211 (941) 755-2176, GMLCOATINGS.COM
Product Name:	Green Monster Liner Structural
Qualifications:	Coating shall be manufactured by GML Coatings, LLC., or pre-approved equal. The completed system shall provide a waterproof, corrosion resistant liner to prevent any deterioration of concrete surfaces from hydrogen sulfide and other corrosive gases/acids produced by wastewater and to prevent infiltration. **To ensure total unit responsibility, all materials and installation thereof shall be approved and furnished by, and coordinated with, GML Coatings LLC.**
Material Classification:	Green Monster Liner Structural is a two component, 100% solids, zero VOC, polyurethane hybrid, structural coating.
Surfaces:	Existing and new concrete or brick manholes, lift stations, WWTP infrastructures, metals, and fiberglass.
Color:	Light Green
Tensile Strength:	4,500 psi per ASTM D412

Flexural Modulus	>80,000 per ASTM D729
Bond (without primer):	>480 psi per ASTM D 4541 (Substrate failure) concrete >3000 psi per ASTM D 4541 (Substrate failure) carbon steel
Service Condition:	Manholes, Wetwells, WWTP
Surface Preparation:	For optimum performance, concrete should be hydro blasted and/or sandblasted. Concrete that has been adhesion tested and approved to be compatible with **Green Monster Liner Structural** should have cured completely and show a pH of 11 or lower and heated with indirect heat before priming and coating.
Repair Materials:	Remove the portion that is damaged, clean concrete behind damaged liner, prepare surrounding liner for application, apply new liner.
Environmental Controls:	Bypass wastewater as needed, provide heaters, and ventilation
Application:	Surface temperature shall be decreasing while applying liner. Surface moisture content shall be 2% or less, (RH humidity chart will allow higher reading). Prior to application of material, make sure that there is no loose dust, dirt, grease, petrochemicals, or any material that will interfere with the bonding process. For maximum adhesion, Green Monster Liner Structural should always be applied over Green Monster Primer. After following the proper steps according to the GML System Specs, Green Monster Liner Structural should be applied in a cross directional method. It is very important to maintain constant pressure while spraying. A radical variation of these pressures can result in a loss of physical properties, poor color retention, bubbling and de-bonding of the material from the surface applied to. Hose temperature should maintain a minimum temperature of 155°F.
Thickness:	It is recommended to apply Green Monster Liner Structural at a minimum thickness of 125 mils to an unlimited build thickness. Standard application thickness for manholes and lift stations is 250 mils.
Cleanup:	Cured product may be disposed of without restriction. The uncured isocyanate and resin portions should be disposed of according to local, state, and federal laws.
Inspection Check Points:	See the subsection headed "Quality Assurance/Quality Control" in this Section of the Technical Specifications. Check Points 1 through 10.

Product H

Manufacturer:	Raven Lining Systems 686 S. Adams St. Kansas City, KS. 66105 (913) 321-9000
Product Name:	Raven 405
Qualifications:	Applicator shall be trained and certified by the manufacturer as qualified to apply the specified coating.
Material Classification:	100% solids, ultra-high build, solvent-free epoxy coating
Surfaces:	Field applied to existing manholes. Coat all of interior of existing concrete, brick, and block manholes, including channels and interfacing pipe joints.
Color:	Light blue
Compressive Strength:	18,000 psi per ASTM D695
Tensile Strength:	>9000 psi per ASTM D638
Flexural Strength:	15,000 psi per ASTM D790

Shrinkage @ 90% RH:	Per manufacturer
Bond:	Shall exceed tensile strength of substrate
Low-Temp. Flexibility:	Per manufacturer, per ASTM D1790
Density:	Per manufacturer.
Service Condition:	Immersed, non-potable, non-immersed, domestic wastewater, corrosive environment, interior and exterior water pressure, traffic areas.
Surface Preparation:	Per TDS
Repair Materials:	Patching grout, infiltration control grout, and any other repair materials shall comply with the recommendations of the manufacture.
Environmental Controls:	Per manufacturer
Design:	Shall be designed to withstand the hydraulic load generated by the groundwater table. All structures shall be coated with 125 mils Raven 405 un structure is more than 60 ft below water table.
Application:	Shall be applied per manufacturer's application guidelines.
Curing:	Flow can continue after 3 to 6 hours depending on environmental conditions.
Thickness:	Per manufacturer's design. 125 mils minimum thickness.
Tolerances:	Plus 20 mils or minus 10 mils.
Cleanup:	Per manufacturer
Inspection Check Points:	See the subsection headed "Quality Assurance/Quality Control" in this Section of the Technical Specifications. Check Points 1 through 10.

The meeting was called to order at 11:03 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:

- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 10AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills summarized that this project will be for as-needed repairs to the City's wastewater collection system. Multiple vendors may be awarded.

The following questions were asked:
Q: Bid bond required? A: Will clarify via an addendum.
Q: Can previous bid tabulations for this project be shared? A:No bid tabs to provide, this is the first time the City has issued a project like this.
Q: Is there anticipated work already prepared? A: Yes, this can be shared via an addendum.
Q: Anticipated annual budget? A: Yes, will clarify in an addendum.
Q: Is there a self- performed percentage requirement? A: Will clarify via an addendum.
Q: Does the City need to be listed for proof of insurance? A: Yes.
Q: Can you provide the address exactly how it needs to be for the COIs? A: Yes.

Mr. Taylor clarified that this is bondable based on the project at that time, meaning a bid bond is not required to submit on this bid however it may be required based on project costs.

There being no additional questions, the meeting was adjourned at 11:16 AM.

Questions and Answers:

1. **Can you confirm if there are any DBE Requirements or good faith efforts to complete for this project? No. Because there are no federal funds nor does the City of St. Pete Beach include these requirements in the Procurement Ordinance, there are no DBE requirements.**
2. **Are there any SBEs/DBEs requirements? No. Because there are no federal funds nor does the City of St. Pete Beach include these requirements in the Procurement Ordinance, there are no SBE/DBE requirements.**
3. **Is a bid bond required? If so, what is the percentage? Yes, 5% of the total bid price.**
4. **What is the engineer's estimate / annual budget cost? Estimated $1,000,000 to $2,500,000 annually.**
5. **I was not able to locate a proposed budget for this project, would you happen to have that information available? Estimated $1,000,000 to $2,500,000 annually.**
6. **Are there any liquidated damages? Yes. If the work embraced by this Contract is not completed on or before the date set for completion or any extension thereof, the actual damages for the delay will be impossible to determine and in lieu thereof, the Contractor shall pay to the City fixed, agreed, and liquidated damages in the amount of either Five-Hundred Dollars ($500) per day for each calendar day of delay until the work is satisfactorily completed.**
7. **Hinterland Group respectfully request that Refratta's 100% pure-fused calcium aluminate coating be approved as an equal under that manhole rehabilitation specifications. Refratta's specs are attached for your review. The specifications for CIPP liner materials and manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications.**
8. **Hinterland Group respectfully requests that Global Materials Company be approved as a CIPP liner manufacturer. Global specs are attached for your review. The specifications for CIPP liner materials and manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications.**
9. **Is there a plan holders list for this project? Please see minutes with organizations present at the pre-bid meeting. The City of St. Pete Beach cannot see who has viewed the bid documents.**
10. **Do you have a plan holders list you could provide me for the above referenced bid? Please see minutes with organizations present at the pre-bid meeting. The City of St. Pete Beach cannot see who has viewed the bid documents.**
11. **Will the Owner/Engineer please provide a copy of the current plan holders list? Please see minutes with organizations present at the pre-bid meeting. The City of St. Pete Beach cannot see who has viewed the bid documents.**
12. **Will the Owner/Engineer please provide the anticipated annual spending for this contract to include each rehab division? Estimated $1,000,000 to $2,500,000 annually total.**
13. **Will the Engineer/Owner please provide previous itemized bid tabulation or contract pricing for each division/ contract? The City of St. Pete Beach does not have bid tabulations within the last 5 years.**
14. **Will the Owner/Engineer provide example work orders from previous contract periods? No.**

15. **Will the Owner provide a disposal site for pipe cleaning debris at no cost to the Contractor? Yes.**
16. **Will the Contractor be allowed to increase pricing from year 1 to subsequent years? Contract prices to remain firm through the first three contract years. Sixty days prior to the contract renewal date, contract/vendor may request a price adjustment.**
17. **Prebid question: Bid bond required? Yes, 5% of the total bid price.**
18. **Prebid question: Can previous bid tabulations for this project be shared? The City of St. Pete Beach does not have bid tabulations within the last 5 years.**
19. **Prebid question: Is there anticipated work already prepared? Bid form reflects anticipated work. City is underway with cleaning/televising entire wastewater collection system to analyze current conditions and will reprioritize if needed once that project is complete (estimated Dec 2026).**
20. **Prebid question: Anticipated annual budget? Estimated $1,000,000 to $2,500,000 annually.**
21. **Prebid question: Is there a self-performed percentage requirement? Yes, 100% Performance Bond.**
22. **Prebid question: Does the City need to be listed for proof of insurance? Yes**
23. **Prebid question: Can you provide the address exactly how it needs to be for the COIs?**

ADDENDUM 2

Wastewater System Rehabilitation Services

Issued 3/27/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **10:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 2 includes:

Questions and Answers

Questions and Answers:

1. **Is there a form to fill out for our sub-contractor for the bid submittal? Do I need to add anything for them with our bid? You are welcome to list them as a sub-contractor in your proposal, but there is no form. The sub-contractor is the contractor's financial responsibility.**

2. **Please clarify the Period of Performance in the General Contract Terms. This states base scope target completion of January 2027 while other parts of the RFP specify a three year contract. Three-year contract with options for up to (2) 1-year extensions for ongoing work.**

3. **Will any bonding be required? Yes, 5% total bid cost.**

4. **How will work be assigned on this contract? Will multiple contractors be assigned to a single project? Multiple contractors may be assigned to a single project, depending on scope required and contractor's abilities.**

5. **Is there an estimated yearly budget for this contract? $1M to $2.5M annually.**

6. **Are there any previous detailed, itemized bid tabs available for this or other similarly bid projects? Please see minutes with organizations present at the pre-bid meeting. The City of St. Pete Beach cannot see who has viewed the bid documents.**

7. **Is Item PL-50, (Grout, Gal) to be used in conjunction with items PL-47 through PL-49? Yes, please refer to the technical specifications. This pay item is applicable only in conjunction with Pay Items 47 through 49.**

8. **Can the owner add a Lateral Grouting, Per EA, Bid Item? Yes, pay item 55 has been added under pipe lining.**

9. **Does the owner have an annual budget for the Wastewater System Pipe (CIPP) Lining portion? No specific budget per portion.**

10. **In the addendum it says we need a 5% Bid Bond. Do you have a form to provide, or can our Surety use there's? We do not have a form. This would come from your surety company for the bond.**

11. **Several vendors have asked about using specific material manufacturers. The specifications for manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications. Accordingly, bidders may base their bids on any manhole lining system that meets the performance and technical requirements of the specifications. Any proposed material or product will be subject to review for compliance with the Contract Documents through the submittal process after award.**

12. **In Addendum 1, there are contradicting answers for the bid bond needing to be submitted. On page 3 after the questions asked during the pre-bid, it states that it is bondable based on the project at that time, meaning a bid bond wasn't required to be submitted. On page 4 and 5, it states a bid bond of 5% is required to be submitted. Can you please clarify if a bid bond is required to be submitted with the proposal, and if so, what percentage is required? Discussion after the meeting led the City of St. Pete Beach to require a bid bond of 5% total bid cost, which must be submitted with the proposal.**

13. **Are alternate products being considered if they meet specification requirements of the proposed products? The specifications for manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications. Accordingly, bidders may base their bids on any manhole lining system that meets the performance and technical requirements of the specifications. Any proposed material or product will be subject to review for compliance with the Contract Documents through the submittal process after award.**

14. **Do we have to fill out each individual section of the bid form, or can we bid the section that only pertains to our capabilities? See IV. General Contract Terms: It is not mandatory to submit a proposal for every item listed. A bidder may bid on any, all, or none of the items.**

15. **What is the anticipated work order size and how many work orders are anticipated to be issued annually? City anticipates issuing 3 purchase orders annually, 1 for each scope (pipe lining, point repairs, manhole rehabilitation), with multiple work orders per purchase order.**

16. **Will the work orders be issued in geographically grouped areas, or will the work be scattered across the City? Work orders will be issued in geographically grouped areas.**

17. **The RFP page 6 states "Vendors may submit proposals for all, some, or only one of the categories" and later "bidder may bid on any, all, or none of the items." Please confirm if bidders are required to bid all items with a category (Manhole Rehabilitation, Pipe Lining, and/or Point Repairs). You may bid certain line items only.**

18. **What are the allowable working hours? Standard work hours shall be from 7:30 AM until 6:00 PM, Monday through Saturday. No work shall take place on Sundays or on official City holidays without prior approval by the City Manager or designee at least 1 week prior to the scheduled work. A list of current official City holidays can be found on the City's Human Resources website at http://www.stpetebeach.org/hr/holidays.html. Contractor will coordinate scheduling of work with the City's Project Manager and City's Inspector.**

19. **Pipe Lining Item 15 for 6" Diameter CIPP shows a thickness of 6.0mm. This is not feasible for 6" diameter pipe and industry standard is 4.5mm. Please confirm 4.5mm will be acceptable for 6" diameter CIPP. 4.5mm is acceptable. This is acceptable. Pay item 15 has been updated accordingly.**

20. Regarding Mobilization bid item, please confirm this will be paid for each work order, and will not be paid only once per year. Please refer to the technical specifications. The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting, and unloading, or under its own power to complete the job assignment or project. Payment for mobilization shall not exceed 10 percent (10%) of the total Contract cost unless the Contractor can prove to the City that his actual mobilization cost exceeds 10 percent (10%).

21. Section 2 Pay Item Descriptions for Mobilization includes "establishment of Subcontractor's temporary offices, buildings, …" Please confirm a temporary office or building is not required. Not required.

22. Section 2 Pay Item Descriptions for Bypass Pumping Setup & Operation states this "Pay Item is applicable on projects or repairs that have high flow or require an over night by pass operation." What is considered "high flow"? Will this item be paid for a "typical" bypass for an 8" diameter CIPP installation? Please elaborate on the requirements for this item and how it will be paid. These pay items apply when bypass pumping is needed to complete the repair without overflows. Pay item 26 would be used for bypass for an 8" diameter installation. The quantity to be measured for payment under this Pay Item will be the actual number of by-pass pumping set ups and operations, per part of day, required by the Engineer in the work. The minimum measurement for this pay item is eight (8) hours or 0.333 days and is measured from the time that the sewage is actually by-passed. This eight (8) hour minimum (0.333 days) includes full compensation for set up and operation for up to the first eight (8) hour period. Additional time will be in tenths of the day or twenty-four (24) hour period. The quantities determined shall be paid per day (DAY) or portion of day of by-pass pumping set up and operation.

23. The measurement for bypass also states the minimum measurement is 8 hours and will be paid for the first 8 hour period with additional time in tenths of a day. Please explain how this will be paid for say a 10 hour day. For example with $1,000/EA Setup and $500/Day: If a 10 hour day is being bypassed, will the contractor be paid the $1000 setup plus 2 hours (10-8 hours) / 24 hours x $1000 = $83.33 + $500 for a total of $1,583.33? In this scenario, payment would be total $1,216.50. ($1,000 setup + $500 operation x (0.333 day + 0.1 day))

24. Section 2 Pay Item Descriptions for CIPP Main Liner include cleaning and pre/post CCTV inspection. However, there are bid items for Normal Cleaning and Specialty Cleaning. Please confirm cleaning and pre CCTV inspection to prep the pipe for CIPP lining will be paid under the Normal Cleaning and/or Specialty Cleaning items, and is not incidental to CIPP Main Liner items. Cleaning and pre CCTV Cleaning and pre-CCTV inspection to prep the pipe for CIPP is incidental to CIPP main liner items. Payment shall include all materials, labor, equipment, and supplies necessary for the CIPP Main Liner installation, and specifically includes, but is not limited to, pre-rehabilitation CCTV inspection, liner sampling and storage of samples for testing, sealing liner connections at manholes, matching existing manhole lining to the CIPP

liner, matching existing flow channels and surfacing to the liner to minimize turbulence, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris after liner installation, post-rehabilitation CCTV inspection video and log, restoration, and all other appurtenant work as specified. Pay items 39-46 are for services requiring cleaning only.

25. Section 2 Pay Item Descriptions for Chemical Sealing of Host Pipe states this item will be paid for each pipe "regardless of…the number of infiltration points sealed." This currently reads that a pipe with one single joint with infiltration will be paid the same as a different pipe with 80 joints that all need to be sealed. Bidders have no way of knowing how many joints may be leaking on a particular segment which could drastically skew the pricing. Would you please consider revising this item to include Chemical Sealing of Host Pipe per Joint or per Service Connection? This pay item is to provide a cost for sealing excessively leaking infiltration points prior to lining of a host pipe. Revising this to a per-seal price would introduce the need to verify the number of leaking joints prior to approving a pay application following execution of the work. For tracking purposes, a flat-fee price will remain.

26. Section 2 Pay Item Descriptions for Service Reconnection states each service shall be grouted 18-inches into the lateral. Will this remain a requirement? If so, would you please consider adding Service Reconnection bid items per pipe diameter as there is substantial cost difference in grouting laterals per main diameter? Main diameter should not be a big factor, the lateral diameters are fairly consistent and the annular space volume will be dependent on the lateral diameter, not the main diameter. Pay item to remain as is.

27. The CIPP Spec (Section 21), paragraph 21.11.02 states up to 10% of the installed liners may be tested for exfiltration per ASTM F1216, Section 8.2 which is a hydrostatic pressure test. This test is not applicable to any line with services and adds unnecessary cost to the project as any potential defects will be verified via the post-rehab CCTV inspection. Would you please consider removing this unnecessary requirement which will ultimately create the most competitive pricing for the Owner? Section 21.11.02 specifies the testing is to be performed prior to any service lateral reconnections. Pay item to remain as-is.

28. Also, please accept SAK Construction, LLC as Installer and Pipenology, LLC as Manufacturer of CIPP Liners, in regards to the above referenced project. Per prequalification requirements on pages 1 and 2 of the Section 21 – CIPP Specification, please see attached documents for your review: SAK Company Information, CIPP Completed Project List, Pipenology CIPP Liner Submittal. The specifications for manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications. Accordingly, bidders may base their bids on any manhole lining system that meets the performance and technical requirements of the specifications. Any proposed material or product will be subject to review for compliance with the Contract Documents through the submittal process after award.

29. **Can you please specify whether the minimum CIPP thicknesses are pre- or post- installation measurements? Post-installation (finished-in-place) thickness.**

30. **Will the Owner provide water, at no cost to the contractor, for work requiring water? Yes.**

ADDENDUM 3

Wastewater System Rehabilitation Services

Issued 3/30/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **10:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 3 includes:

Questions and Answers

Questions and Answers:

Do we add all documents including the bid for (Price) to one PDF for submission? You may submit more than one document. They do not have to all be on one PDF.

For pay items 34-36 and pay items 40-42, the units are EA. Can you provide the depths of the manholes under "EACH" since this will significantly affect the price? Or can you change the units to VF as you have on the pay items for Additional MH Coating? 48" diameter manhole depths range from approx. 2 to 14 ft, with the majority between 4 and 6 ft.

I. INVITATION

The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining and point repairs.

The proposed work will be located within the City of St. Pete Beach in Pinellas County, FL, throughout the entire wastewater collection and transmission system. Each asset to be rehabilitated and the type of rehabilitation required will be identified in each individual Work Order with the location shown on corresponding geographical exhibits.

The successful proposer shall furnish all labor, superintendence, materials, power, light, heat, fuel, water, tools, appliances, equipment, supplies, shop drawings, working drawings and other means of construction necessary or proper for performing and completing the work. The Contractor is responsible for obtaining all required permits necessary for the work, including all applications and review fees, other than those permits which may have already been obtained. The Contractor shall perform and complete the work in a speedy and efficient manner consistent with safety of life and property and to the city's satisfaction, and in strict accordance with the Contract Documents. The Contractor shall repair or restore all structures and property damaged or disturbed during performance of the work.

The types of projects include:

- **Wastewater System Manhole Rehabilitation (Manhole Project):**
  The Contractor shall furnish all labor, material, equipment, and services necessary for manhole rehabilitation. The work shall be completed at various locations through the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, re-building manhole bench and channels, ring (frame) and cover adjustment and replacement, pavement restoration, inflow/infiltration elimination, surface preparation, cementitious and polymer coatings installation, internal chimney sealing, manhole cover insert installation, testing, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.
- **Wastewater System Pipe Lining (Lining Project):**
  The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater pipe rehabilitation using Cured-In-Place-Pipe (CIPP) lining. The work shall be completed at various locations through the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, CIPP liner installation, reconnection of service laterals, testing of CIPP liners, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.
- **Wastewater System Point Repairs (Point Repair Project):**
  The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater point repairs. The work shall be completed at various locations throughout the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, dewatering, directional drilling, jack and boring, remove unsuitable materials below trench grade, sanitary sewer gravity and force main installation, force main and gravity main connections, remove out of service gravity and force mains, install manhole connections, grout out of service pipe, install valves and associated appurtenances, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.

IV. GENERAL CONTRACT TERMS

REQUEST FOR PROPOSALS
Wastewater System Rehabilitation Services

REQUEST FOR PROPOSAL SUMMARY
The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining and point repairs.

The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The "City" intends to **award multiple contracts** to vendors who can provide the best value for services. Vendors may submit proposals for all, some, or only one of the categories. **It is not mandatory to submit a proposal for every item listed**. A bidder may bid on any, all, or none of the items. The "City" reserves the right to select multiple vendors to optimize cost-efficiency and capability across different segments of the project. Proposals will be evaluated based on capability, cost, and capacity to perform the specific line items requested.

PROPOSAL SUBMITTALS
Proposal documents must include a signed/notarized Contractor's Proposal Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit electronic proposals only. Bidders must submit electronically only through Bonfire platform. When bidding electronically, only one copy should be submitted.

Proposals shall include the following:

- A signed and notarized Proposer's Contract Proposal.
- Current proof of insurance certificate.
- A list of references and minimum qualifications as outlined in Section V.
- One copy of bid electronically submitted to Bonfire platform.

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http://www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

Proposers or persons wishing to submit a proposal on this project shall be licensed, and insured in accordance with the City's requirements

The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals, or accept any proposal or part thereof deemed to be in the best interests to the City of St. Pete Beach.

Electronic proposals must be submitted by **9:00 AM on April 08, 2026 (Deadline),** clearly marked as: **"Wastewater System Rehabilitation Services."**

PRE-PROPOSAL MEETING
An optional pre-proposal meeting will be held on **March 18, 2026 at 11:00 AM EST** via Microsoft Teams conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS
No oral interpretations will be made to any firms as to the meaning of the scope of work or any other contract documents included in this **RFP.** All questions pertaining to the terms and conditions or scope of work of this Request for Proposal **(RFP)** must be sent in writing via email only to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 AM EST on March 25, 2026.** Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFP**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFP** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so. If the Proposer discovered the opportunity through the online platform (Bonfire), do not submit questions through these platforms. **Only questions emailed directly to the City Procurement Manager will be answered.**

BEGINNING DATE
The Proposer shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Proposer shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City.

COMPLETION OF WORK
The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

COSTS INCURRED BY PROPOSERS
All expenses involved with the preparation and submission of proposals to the City, or any work performed in connection therewith, shall be borne solely by the Proposers. No payment will be made for any responses received or for any other effort required of or made by; the Proposer's prior to contract commencement.

ORAL PRESENTATION
The City may require an oral presentation of the proposal at the Evaluation Committee's discretion. This could also include a formal interview of any and all members of the Proposer's contract management staff.

CONFLICT OF INTEREST
The Proposer represents that it presently has no interest and shall acquire no interest, either direct or indirect, which would conflict in any manner with the performance or services required hereunder, as provided for in FL Stat. 112.311. The Proposer further represents that no person having any interest shall be employed for said performance.

The Proposer shall promptly notify the City's representative, in writing, by certified mail, of all potential conflicts of interest for any prospective business association, interest, or other circumstance, which may influence or appear to influence the contractor's judgment or quality of services being provided hereunder. Such written notification shall identify the prospective business association, interest or circumstance, the nature of work that the Proposer may undertake and request an opinion of the city as to whether the association, interest or circumstance would, in the opinion of the City, constitute a conflict of interest if entered into by the Proposer. The City agrees to notify the Proposer of its opinion by certified mail within thirty days of receipt of notification by the Proposer.

LATE PROPOSAL OR MODIFICATIONS
Modifications in writing received prior to the time set for the proposal submittal will be accepted. Proposal modifications received after the time set for the proposal submittal will not be considered.

RELATED PARTIES AND MULTIPLE PROPOSALS
Where two (2) or more related parties each submit a proposal or multiple proposals are received from (1) Proposer, for any such contract, such proposals shall be judged non-responsive. Related parties mean Proposers or the principles thereof, which have a direct or indirect ownership interest in another Proposer for the same contract or in which a parent company or the principles thereof where one (1) Proposer has a direct ownership interest in another Proposer for the same contract.

RIGHT TO AUDIT
The City of St. Pete Beach reserves the privilege of auditing a Proposer's record as such records relate to purchases or work between the City and said Proposer. Records should be maintained for three years from contract date.

VARIANCE FROM STANDARD TERMS & CONDITIONS
All standard terms and conditions stated throughout the RFP apply to this contract except as specifically stated. This should be fully understood by Proposers prior to submitting a proposal.

ASSIGNMENT
The Proposer shall perform this contract. No assignment or subcontracting shall be allowed without prior written consent of the City. If a Proposer intends to subcontract a portion of this work, the Proposer must disclose that intent in the proposal. In the event of a corporate acquisition and/or merger, the Contractor shall provide written notice to the City within thirty (30) business days of Proposer's notice of such action or upon the occurrence of said action, whichever occurs first. The right to terminate this contract, which shall not be unreasonably exercised by the City shall include but not be limited to, instances in which a corporate acquisition and/or merger represent a conflict of interest or are contrary to any local, state, or federal laws. Action by the City awarding a proposal to a firm that has disclosed its intent to assign or subcontract in its response to the RFP, without exception shall constitute approval for purpose of this Agreement.

LOBBYING Lobbying of Evaluation Committee members, City employees, or elected officials regarding request for proposals, request for qualifications, bids or contracts, during the pendency of bid award or bid protest, by the bidder/proposer/protestor or any member of the bidder's/proposer's/protestor's staff, an agent of the bidder/proposer/protestor, or any person employed by any legal entity affiliated with representing an organization that is responding to the request for proposal, request for qualification, bid or contract, or has a pending bid protest is strictly prohibited either upon advertisement or on a date established by the City and shall be prohibited until either an award is final or the protest is finally resolved by the City Manager or Procurement Manager; provided, however, nothing herein shall prohibit a prospective bidder/proposer from contacting City departments to address situations such as clarification and/or questions related to the procurement process. For purposes of this provision, lobbying activities shall include but not be limited to, influencing or attempting to influence action or non-action in connection with any requests for proposal, request for qualification, bid or contract through direct or indirect oral or written communication or an attempt to obtain goodwill of persons and/or entities specified in this provision. Such actions may cause any request for proposal, request for qualification, bid or contract to be rejected.

ADDITIONAL REQUIREMENTS
The City reserves the right, by change order, to unilaterally add or delete locations/services, either collectively or individually, at the City's sole option, at any time after award has been made as may be deemed necessary or in the best interest of the City. In such case, the Proposer will be required to provide or reduce services to this contract in accordance with the terms, conditions, and specifications.

SERVICES AGREEMENT
A written agreement incorporating the RFP and the successful proposal will be prepared by the City, signed by the successful Proposer, and presented to the City Commission for approval and signature.

INTEGRITY OF REQUEST FOR PROPOSAL DOCUMENTS
Proposers shall use the original RFP forms provided within the RFP and enter information in the spaces where a response is requested. Proposers may use an attachment as an addendum to the RFP forms if sufficient space is not available on the original form for the Proposer to enter a complete response. Any modifications or alterations to the original RFP documents by the Proposer, whether intentional or otherwise, will constitute grounds for rejection of the RFP. Any such modifications or alterations a Proposer wishes to propose must clearly be stated in the Proposer's RFP response and presented in the form of an addendum to the original RFP documents.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in this Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the contract and requirements and shall determine acceptance of the work under this Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the contract terms in a fair and unbiased manner.
If a variation from any requirements is allowed, the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

EXAMINATION OF SITE
Proposer shall carefully examine project site and be familiar with the work required for the project, investigate all site conditions that may affect execution of work as detailed in the construction documents. Contact the City's Procurement Manager or their designee for changes or alterations before proceeding.

ASSURANCES
The responding Proposer shall provide a statement of assurance that the Proposer is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

ASSIGNMENT AND TRANSFER OF CONTRACT
The Proposer shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS
The Proposer shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PAYMENT
Payment shall be made to the Proposer for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

PERIOD OF PERFORMANCE
The target completion for the base Scope of Services is January 2027, corresponding to delivery of the Design-Build Readiness Package. The City reserves the right, at its sole discretion and subject to funding

availability, to amend this Agreement to extend the Consultant's services through final (100%) design. Any additional services shall be authorized by written amendment and negotiated in accordance with the Consultants' Competitive Negotiation Act (Section 287.055, Florida Statutes).

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Proposer will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Proposer without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Proposer's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Proposer to make a change in the Work, and if the City and the Proposer do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the Proposer shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Proposer believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, they shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Proposer first discovered the occurrence. The Proposer shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Proposer shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Proposer shall prepare proposals detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Proposer's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Proposer's proposals shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable proposal will not justify an increase in Contract Amount or Contract Time. Proposer agrees that it shall give the City access to any and all of Proposer's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Proposer for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Proposer shall be at his expense

without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Proposer or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Proposer proposals or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to be used shall be those used for the Proposer's costs, except that the term "Subcontractor" shall replace the term "Proposer," context permitting.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Proposer, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit.

In such case, the Proposer will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Proposer to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Proposer (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Proposer employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

PAYMENTS FOR WORK COMPLETED
All payments under this agreement shall comply with the requirements of Florida Statutes, Section 215.422, commonly referred to as the "Prompt Payment Law." This includes timely processing of invoices and adherence to statutory interest provisions for late payments. The Contractor shall submit detailed invoices for services rendered under this agreement. Each invoice must include: Purchase Order or Contract Number, Description of services provided, Dates of service, Total amount due. Payment will be made within 45 days of receipt of a proper invoice and acceptance of deliverables, as required by Florida law. If payment is not made within the statutory timeframe, interest penalties will apply in accordance with Section 215.422, Florida Statutes. Payments will be issued via electronic funds transfer (EFT) unless otherwise agreed in writing. Contractor must provide accurate banking information to facilitate EFT.

PAYMENTS WITHHELD
The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Proposer to make payments properly to Subcontractors or for labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Proposer

f) Failure of the Proposer to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS
Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Proposer, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such sums to the Proposer.

Before the approval of the final payment, the Proposer shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS
If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Proposer, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Proposer all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Proposer and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Proposer. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies

to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

LICENSES AND PERMITS

The Proposer shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the Proposer is responsible for non-compliance of all permit requirements, including all fines resulting from Proposer's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Proposer shall be responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the Proposer awarded the project, MUST also register their license with the City.

LABOR PROVISIONS

The Proposer and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed. The State of Florida prevailing wage law requires that the Proposer shall fully comply with all provisions contained in Section 215.19, "Schedule of Prevailing Wage Rates for Specified Public Construction." The wage rates set forth by such determination shall apply to this project.

INSURANCE

The Proposer shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Proposer's General Public Liability and Property Damage Insurance issued to the Proposer and protecting the Proposer from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Proposer or by any Subcontractor hired by the Proposer or anyone directly or indirectly employed by the Proposer or hired by the Proposer.

The successful Proposer shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Proposer or third party under the direction or control of the Proposer. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Proposer must furnish the City with Certificate of Insurance prior to commencement of work. An

approved Certificate of Insurance furnished by the Proposer's carrier to guarantee the Proposer being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Professional Liability Insurance $2,000,000 each occurrence.
- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY
The Proposer shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Proposer shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Proposer shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Proposer will provide security on off days and holidays. The Proposer shall be responsible for all charges incurred with such action.

The Proposer shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Proposer, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Proposer shall also protect adjacent property as required by law.

PROPOSAL REVIEW AND CONTRACT AWARD
Failure to submit all documents requested at the time of proposal may deem the Proposer's proposal ineligible for award. The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals. The contract shall be awarded by written notice to the responsible and responsive Contractor whose proposal is determined in writing to be the most advantageous to the City, taking into consideration the price and other criteria set forth in this request for proposals. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS
The laws of the State of Florida do apply to any purchase made under this Request for Proposal. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their proposal and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Proposer agrees to comply with all applicable portions of Fla. Stat. 448.095. Proposer must use the

U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Proposer shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Proposer with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Proposer shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Proposer must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Proposer's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Proposer may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and proposal costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statute by the Proposer, the Proposer may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all proposals, to waive irregularities and technicalities, and to request re-submission. If only one proposal is received by the proposal date and time listed, the proposal may or may not be rejected by the City depending upon proposal review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting proposals. The City reserves the right to award the contract to a responsible proposer submitting a responsible proposal, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, Proposers, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFP during any phase of the proposalding process. Failure to comply with the provision may result in disqualification of the Proposer, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFP shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE
Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION
The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS
The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience in Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining and point repairs.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Wastewater System Rehabilitation Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Wastewater System Rehabilitation Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

by: Francis Allen Bates III - VP
(Print individual's name and title)

for: RCM Utilities, LLC
(Print name of entity submitting sworn statement)

at: 1451 Pine Grove Road Eustis, FL 32726
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

82-4160762
(FEIN)
or, if the entity has no FEIN, include the Social Security Number:

(SSN)

by the individual signing this sworn statement: F. Allen Bates III
(Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an

affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☒ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VIII. NON-COLLUSION AFFADAVIT

STATE OF Florida COUNTY OF Lake

I state that I Francis A Bates III - VP of RCM Utilities, LLC,
(Name and Title) (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. RCM Utilities, LLC, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

Letter of Recommendation

To Whom It May Concern,

Marion County has worked with RCM Utilities on a range of stormwater and wastewater lift station projects, including routine maintenance, emergency repairs, and system upgrades. Throughout our working relationship, they have demonstrated a high level of professionalism, quality workmanship, and a strong commitment to clear communication.

Over the past two years, RCM Utilities has completed services for us such as preventative maintenance, pump and piping repairs, and troubleshooting of minor to complex issues. No matter the task, they approach each project with dependability and efficiency.

RCM Utilities has consistently proven to be a responsive and capable partner, particularly during urgent situations. Their team has shown a willingness to tackle challenging issues and provide timely solutions when they're needed most.

Marion County fully intends to continue utilizing RCM Utilities for future lift station work and related services. I am confident in their ability to meet the expectations of any client, and I highly recommend them.

Should you need any additional information, please do not hesitate to contact me.

Sincerely,

Josh Kramer, Utilities Deputy Director

June 13, 2025

To Whom It May Concern,

It is my pleasure to recommend the services of RCM Utilities.

The City of Orange City has had a great relationship with RCM Utilities for maintenance, repairs, and improvements to its stormwater and wastewater lift stations. RCM Utilities has always been extremely responsive, performing of quality work, and communicative. We have used RCM over the past two years for services such as lift station cleaning, lift station preventative maintenance, repairs to lift station piping, and alarm repairs amongst other projects.

RCM Utilities has always been willing to take on any challenge and respond in times of emergency. The City of Orange City has every intention to continue working with RCM Utilities for projects and addressing any lift station needs. I am confident they will be more than capable to meet any needs and give my recommendation.

Please feel free to contact me if you should require any further information.

Respectfully yours,

Robert Lawler, P.E., MPA
Utilities Services Director

RE: RCM Utilities, LLC Bonding Letter

To Whom It May Concern,

It is a privilege to be the surety agents for RCM Utilities, LLC. Bonds are currently written through The Gray Insurance Company which is A.M. Best Rated “A-, VIII” and has a U.S. Treasury Listing of $21,807,000.00.

RCM Utilities, LLC is an outstanding contractor and we hold them in the highest regard. We are extremely confident in our contractor and encourage you to offer them an opportunity to execute any upcoming projects.

We usually anticipate no difficulties in providing surety bonds for RCM Utilities, LLC in the $7,000,000 single, $40,000,000 aggregate range. These limits are merely guidelines and can be extended subject to underwriting which includes surety review of the contract terms, pertinent bond forms and general financial reporting at the time of said request.

This letter is not an assumption of liability or a commitment to provide any bonds unless all underwriting requirements including contract, bond form and financing review are met prior to issuing any bonds. Neither our agency, nor the surety is liable for any damages relating to this letter or project.

Should you have any questions, please do not hesitate to contact me. My email is sarah@floridasuretybonds.com and my direct line is 407-755-6353.

Best regards,

Sarah K O'Linn

Firm Experience and Capabilities

RCM Utilities LLC is a Florida-based contractor specializing in wastewater infrastructure rehabilitation, manhole restoration, and inflow and infiltration (I&I) mitigation services. The firm provides turnkey solutions to municipal clients throughout Florida, with a focus on restoring aging infrastructure, reducing system infiltration, and extending asset service life. RCM Utilities has successfully completed numerous municipal wastewater rehabilitation projects ranging in value from $12,000 to over $847,000, demonstrating the firm's ability to execute both small-scale repairs and large, multi-site rehabilitation programs.

- The firm routinely performs work directly aligned with this project, including: Manhole rehabilitation and structural restoration
- Cementitious and polymer coating system installation
- Inflow and infiltration (I&I) detection and elimination
- Manhole chimney sealing and frame/cover adjustments
- Bypass pumping and live sewer flow management
- Maintenance of traffic (MOT) and surface restoration

Relevant Project Experience

St. Johns County – Manhole Rehabilitation Program
Contract Value: $847,659.00 (Completed 08/2025)
County-wide manhole rehabilitation at multiple locations.

City of Panama City – Sanitary Sewer Manholes
Contract Value: $226,382.02 (Completed 12/2024)
Rehabilitation of 58 manholes including ring, cover replacement and chimney sealing.

City of Winter Haven – Hamilton Shores Manhole Rehabilitation
Contract Value: $79,520.00 (Completed 05/2025)
Rehabilitation of 27 manholes including infiltration repair and coating.

City of Zephyrhills – Manhole Rehabilitation
Contract Value: $49,593.00 (Completed 02/2025)
Rehabilitation of 21 manholes including coating and hardware installation.

City of Alachua – Lift Station 14 Rehabilitation
Contract Value: $12,229.36 (Completed 08/2024)
Wet well rehabilitation and coating with bypass assistance.

Technical Capabilities

RCM Utilities is fully equipped to self-perform all aspects of the proposed work, including bypass pumping, confined space entry, cleaning, structural repair, coating installation, chimney sealing, frame adjustments, and restoration.

RCM Utilities, LLC
1451 Pine Grove Road
Eustis, FL 32726
352-561-2990

Ability to Complete the Project

RCM Utilities has the personnel, equipment, and operational capacity to complete this project in accordance with all specifications and schedule requirements, including multi-site coordination and uninterrupted service operations.

Personnel Experience

RCM Utilities employs experienced project managers, superintendents, and field crews trained in confined space entry, coating systems, and structural rehabilitation, with over 200 years of combined experience.

Claims, Litigation, and Compliance Statement

Claims and Disputes

RCM Utilities LLC affirms that there are no unresolved or ongoing claims or disputes in excess of $500,000 currently pending against the firm. There are no such claims against the principals of the firm, nor does the company have any active claims exceeding $500,000 against third parties.

Litigation History (Past Five Years)

RCM Utilities LLC has not been involved in any material litigation that would adversely impact its financial condition or ability to perform contractual obligations. Any minor disputes have been resolved without material litigation or adverse judgments.

Regulatory Compliance Statement

RCM Utilities LLC certifies that it is not currently in violation of any federal, state, or local statutes, rules, or regulations that would impact its operations. The firm complies with all applicable State of Florida laws, local ordinances, OSHA standards, and wastewater infrastructure regulations, including those of the City of St. Pete Beach.

Bid Bond

CONTRACTOR:
(Name, legal status and address)
RCM Utilities, LLC
1451 Pine Grove Road
Eustis, FL 32726

SURETY:
(Name, legal status and principal place of business)
The Gray Casualty & Surety Company
P.O. Box 6202
Metairie, LA 70009-6202

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.
Any singular reference to Contractor, Surety, Owner or other party shall be considered plural where applicable.

OWNER:
(Name, legal status and address)
City of St. Pete Beach
155 Corey Avenue
St. Pete Beach, FL 33706-1839

BOND AMOUNT:
5% Five Percent of Amount Bid

PROJECT:
(Name, location or address, and Project number, if any) Wastewater System Rehabilitation Services, St. Pete Beach, FL
Project Number, if any:

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

By arrangement with the American Institute of Architects, the National Association of Surety Bond Producers (NASBP) (www.nasbp.org) makes this form document available to its members, affiliates, and associates in Microsoft Word format for use in the regular course of surety business. NASBP vouches that the original text of this document conforms exactly to the text in AIA Document A310-2010, Bid Bond. Subsequent modifications may be made to the original text of this document by users, so careful review of its wording and consultation with an attorney are encouraged before its completion, execution or acceptance.

THE GRAY INSURANCE COMPANY
THE GRAY CASUALTY & SURETY COMPANY

GENERAL POWER OF ATTORNEY

Bond Number: Bid Bond
Principal: RCM Utilities, LLC
Obligee: City of St. Pete Beach

KNOW ALL BY THESE PRESENTS, THAT The Gray Insurance Company and The Gray Casualty & Surety Company, corporations duly organized and existing under the laws of Louisiana, and having their principal offices in Metairie, Louisiana, do hereby make, constitute, and appoint: Jeffrey W. Reich

on behalf of each of the Companies named above its true and lawful Attorney(s)-in-Fact, to make, execute, seal and deliver, for and on its behalf and as its deed, bonds, or other writings obligatory in the nature of a bond, as surety, contracts of suretyship as are or may be required or permitted by law, regulation, contract or otherwise, provided that no bond or undertaking or contract of suretyship executed under this authority shall exceed the amount of
$25,000,000.00.

This Power of Attorney is granted and is signed by facsimile under and by the authority of the following Resolutions adopted by the Boards of Directors of both The Gray Insurance Company and The Gray Casualty & Surety Company at meetings duly called and held on the 26th day of June, 2003.

"RESOLVED, that the President, Executive Vice President, any Vice President, or the Secretary be and each or any of them hereby is authorized to execute a power of Attorney qualifying the attorney named in the given Power of Attorney to execute on behalf of the Company bonds, undertakings, and all contracts of surety, and that each or any of them is hereby authorized to attest to the execution of such Power of Attorney, and to attach the seal of the Company; and it is

FURTHER RESOLVED, that the signature of such officers and the seal of the Company may be affixed to any such Power of Attorney or to any certificate relating thereto by facsimile, and any such Power of Attorney or certificate bearing such facsimile signature or facsimile seal shall be binding upon the Company now and in the future when so affixed with regard to any bond, undertaking or contract of surety to which it is attached.

IN WITNESS WHEREOF, The Gray Insurance Company and The Gray Casualty & Surety Company have caused their official seals to be hereinto affixed, and these presents to be signed by their authorized officers this 28th day of October, 2021.

The meeting was called to order at 11:03 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:

- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 10AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills summarized that this project will be for as-needed repairs to the City's wastewater collection system. Multiple vendors may be awarded.

The following questions were asked:
Q: Bid bond required? A: Will clarify via an addendum.
Q: Can previous bid tabulations for this project be shared? A:No bid tabs to provide, this is the first time the City has issued a project like this.
Q: Is there anticipated work already prepared? A: Yes, this can be shared via an addendum.
Q: Anticipated annual budget? A: Yes, will clarify in an addendum.
Q: Is there a self- performed percentage requirement? A: Will clarify via an addendum.
Q: Does the City need to be listed for proof of insurance? A: Yes.
Q: Can you provide the address exactly how it needs to be for the COIs? A: Yes.

Mr. Taylor clarified that this is bondable based on the project at that time, meaning a bid bond is not required to submit on this bid however it may be required based on project costs.

There being no additional questions, the meeting was adjourned at 11:16 AM.

Questions and Answers:

1. **Can you confirm if there are any DBE Requirements or good faith efforts to complete for this project? No. Because there are no federal funds nor does the City of St. Pete Beach include these requirements in the Procurement Ordinance, there are no DBE requirements.**
2. **Are there any SBEs/DBEs requirements? No. Because there are no federal funds nor does the City of St. Pete Beach include these requirements in the Procurement Ordinance, there are no SBE/DBE requirements.**
3. **Is a bid bond required? If so, what is the percentage? Yes, 5% of the total bid price.**
4. **What is the engineer's estimate / annual budget cost? Estimated $1,000,000 to $2,500,000 annually.**
5. **I was not able to locate a proposed budget for this project, would you happen to have that information available? Estimated $1,000,000 to $2,500,000 annually.**
6. **Are there any liquidated damages? Yes. If the work embraced by this Contract is not completed on or before the date set for completion or any extension thereof, the actual damages for the delay will be impossible to determine and in lieu thereof, the Contractor shall pay to the City fixed, agreed, and liquidated damages in the amount of either Five-Hundred Dollars ($500) per day for each calendar day of delay until the work is satisfactorily completed.**
7. **Hinterland Group respectfully request that Refratta's 100% pure-fused calcium aluminate coating be approved as an equal under that manhole rehabilitation specifications. Refratta's specs are attached for your review. The specifications for CIPP liner materials and manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications.**
8. **Hinterland Group respectfully requests that Global Materials Company be approved as a CIPP liner manufacturer. Global specs are attached for your review. The specifications for CIPP liner materials and manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications.**
9. **Is there a plan holders list for this project? Please see minutes with organizations present at the pre-bid meeting. The City of St. Pete Beach cannot see who has viewed the bid documents.**
10. **Do you have a plan holders list you could provide me for the above referenced bid? Please see minutes with organizations present at the pre-bid meeting. The City of St. Pete Beach cannot see who has viewed the bid documents.**
11. **Will the Owner/Engineer please provide a copy of the current plan holders list? Please see minutes with organizations present at the pre-bid meeting. The City of St. Pete Beach cannot see who has viewed the bid documents.**
12. **Will the Owner/Engineer please provide the anticipated annual spending for this contract to include each rehab division? Estimated $1,000,000 to $2,500,000 annually total.**
13. **Will the Engineer/Owner please provide previous itemized bid tabulation or contract pricing for each division/ contract? The City of St. Pete Beach does not have bid tabulations within the last 5 years.**
14. **Will the Owner/Engineer provide example work orders from previous contract periods? No.**

15. **Will the Owner provide a disposal site for pipe cleaning debris at no cost to the Contractor? Yes.**
16. **Will the Contractor be allowed to increase pricing from year 1 to subsequent years? Contract prices to remain firm through the first three contract years. Sixty days prior to the contract renewal date, contract/vendor may request a price adjustment.**
17. **Prebid question: Bid bond required? Yes, 5% of the total bid price.**
18. **Prebid question: Can previous bid tabulations for this project be shared? The City of St. Pete Beach does not have bid tabulations within the last 5 years.**
19. **Prebid question: Is there anticipated work already prepared? Bid form reflects anticipated work. City is underway with cleaning/televising entire wastewater collection system to analyze current conditions and will reprioritize if needed once that project is complete (estimated Dec 2026).**
20. **Prebid question: Anticipated annual budget? Estimated $1,000,000 to $2,500,000 annually.**
21. **Prebid question: Is there a self-performed percentage requirement? Yes, 100% Performance Bond.**
22. **Prebid question: Does the City need to be listed for proof of insurance? Yes**
23. **Prebid question: Can you provide the address exactly how it needs to be for the COIs?**

ADDENDUM 2

Wastewater System Rehabilitation Services

Issued 3/27/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **10:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 2 includes:

Questions and Answers

Questions and Answers:

1. **Is there a form to fill out for our sub-contractor for the bid submittal? Do I need to add anything for them with our bid? You are welcome to list them as a sub-contractor in your proposal, but there is no form. The sub-contractor is the contractor's financial responsibility.**

2. **Please clarify the Period of Performance in the General Contract Terms. This states base scope target completion of January 2027 while other parts of the RFP specify a three year contract. Three-year contract with options for up to (2) 1-year extensions for ongoing work.**

3. **Will any bonding be required? Yes, 5% total bid cost.**

4. **How will work be assigned on this contract? Will multiple contractors be assigned to a single project? Multiple contractors may be assigned to a single project, depending on scope required and contractor's abilities.**

5. **Is there an estimated yearly budget for this contract? $1M to $2.5M annually.**

6. **Are there any previous detailed, itemized bid tabs available for this or other similarly bid projects? Please see minutes with organizations present at the pre-bid meeting. The City of St. Pete Beach cannot see who has viewed the bid documents.**

7. **Is Item PL-50, (Grout, Gal) to be used in conjunction with items PL-47 through PL-49? Yes, please refer to the technical specifications. This pay item is applicable only in conjunction with Pay Items 47 through 49.**

8. **Can the owner add a Lateral Grouting, Per EA, Bid Item? Yes, pay item 55 has been added under pipe lining.**

9. **Does the owner have an annual budget for the Wastewater System Pipe (CIPP) Lining portion? No specific budget per portion.**

10. **In the addendum it says we need a 5% Bid Bond. Do you have a form to provide, or can our Surety use there's? We do not have a form. This would come from your surety company for the bond.**

11. **Several vendors have asked about using specific material manufacturers. The specifications for manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications. Accordingly, bidders may base their bids on any manhole lining system that meets the performance and technical requirements of the specifications. Any proposed material or product will be subject to review for compliance with the Contract Documents through the submittal process after award.**

12. **In Addendum 1, there are contradicting answers for the bid bond needing to be submitted. On page 3 after the questions asked during the pre-bid, it states that it is bondable based on the project at that time, meaning a bid bond wasn't required to be submitted. On page 4 and 5, it states a bid bond of 5% is required to be submitted. Can you please clarify if a bid bond is required to be submitted with the proposal, and if so, what percentage is required? Discussion after the meeting led the City of St. Pete Beach to require a bid bond of 5% total bid cost, which must be submitted with the proposal.**

13. **Are alternate products being considered if they meet specification requirements of the proposed products? The specifications for manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications. Accordingly, bidders may base their bids on any manhole lining system that meets the performance and technical requirements of the specifications. Any proposed material or product will be subject to review for compliance with the Contract Documents through the submittal process after award.**

14. **Do we have to fill out each individual section of the bid form, or can we bid the section that only pertains to our capabilities? See IV. General Contract Terms: It is not mandatory to submit a proposal for every item listed. A bidder may bid on any, all, or none of the items.**

15. **What is the anticipated work order size and how many work orders are anticipated to be issued annually? City anticipates issuing 3 purchase orders annually, 1 for each scope (pipe lining, point repairs, manhole rehabilitation), with multiple work orders per purchase order.**

16. **Will the work orders be issued in geographically grouped areas, or will the work be scattered across the City? Work orders will be issued in geographically grouped areas.**

17. **The RFP page 6 states "Vendors may submit proposals for all, some, or only one of the categories" and later "bidder may bid on any, all, or none of the items." Please confirm if bidders are required to bid all items with a category (Manhole Rehabilitation, Pipe Lining, and/or Point Repairs). You may bid certain line items only.**

18. **What are the allowable working hours? Standard work hours shall be from 7:30 AM until 6:00 PM, Monday through Saturday. No work shall take place on Sundays or on official City holidays without prior approval by the City Manager or designee at least 1 week prior to the scheduled work. A list of current official City holidays can be found on the City's Human Resources website at http://www.stpetebeach.org/hr/holidays.html. Contractor will coordinate scheduling of work with the City's Project Manager and City's Inspector.**

19. **Pipe Lining Item 15 for 6" Diameter CIPP shows a thickness of 6.0mm. This is not feasible for 6" diameter pipe and industry standard is 4.5mm. Please confirm 4.5mm will be acceptable for 6" diameter CIPP. 4.5mm is acceptable. This is acceptable. Pay item 15 has been updated accordingly.**

20. Regarding Mobilization bid item, please confirm this will be paid for each work order, and will not be paid only once per year. Please refer to the technical specifications. The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting, and unloading, or under its own power to complete the job assignment or project. Payment for mobilization shall not exceed 10 percent (10%) of the total Contract cost unless the Contractor can prove to the City that his actual mobilization cost exceeds 10 percent (10%).

21. Section 2 Pay Item Descriptions for Mobilization includes "establishment of Subcontractor's temporary offices, buildings, …" Please confirm a temporary office or building is not required. Not required.

22. Section 2 Pay Item Descriptions for Bypass Pumping Setup & Operation states this "Pay Item is applicable on projects or repairs that have high flow or require an over night by pass operation." What is considered "high flow"? Will this item be paid for a "typical" bypass for an 8" diameter CIPP installation? Please elaborate on the requirements for this item and how it will be paid. These pay items apply when bypass pumping is needed to complete the repair without overflows. Pay item 26 would be used for bypass for an 8" diameter installation. The quantity to be measured for payment under this Pay Item will be the actual number of by-pass pumping set ups and operations, per part of day, required by the Engineer in the work. The minimum measurement for this pay item is eight (8) hours or 0.333 days and is measured from the time that the sewage is actually by-passed. This eight (8) hour minimum (0.333 days) includes full compensation for set up and operation for up to the first eight (8) hour period. Additional time will be in tenths of the day or twenty-four (24) hour period. The quantities determined shall be paid per day (DAY) or portion of day of by-pass pumping set up and operation.

23. The measurement for bypass also states the minimum measurement is 8 hours and will be paid for the first 8 hour period with additional time in tenths of a day. Please explain how this will be paid for say a 10 hour day. For example with $1,000/EA Setup and $500/Day: If a 10 hour day is being bypassed, will the contractor be paid the $1000 setup plus 2 hours (10-8 hours) / 24 hours x $1000 = $83.33 + $500 for a total of $1,583.33? In this scenario, payment would be total $1,216.50. ($1,000 setup + $500 operation x (0.333 day + 0.1 day))

24. Section 2 Pay Item Descriptions for CIPP Main Liner include cleaning and pre/post CCTV inspection. However, there are bid items for Normal Cleaning and Specialty Cleaning. Please confirm cleaning and pre CCTV inspection to prep the pipe for CIPP lining will be paid under the Normal Cleaning and/or Specialty Cleaning items, and is not incidental to CIPP Main Liner items. Cleaning and pre CCTV Cleaning and pre-CCTV inspection to prep the pipe for CIPP is incidental to CIPP main liner items. Payment shall include all materials, labor, equipment, and supplies necessary for the CIPP Main Liner installation, and specifically includes, but is not limited to, pre-rehabilitation CCTV inspection, liner sampling and storage of samples for testing, sealing liner connections at manholes, matching existing manhole lining to the CIPP

liner, matching existing flow channels and surfacing to the liner to minimize turbulence, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris after liner installation, post-rehabilitation CCTV inspection video and log, restoration, and all other appurtenant work as specified. Pay items 39-46 are for services requiring cleaning only.

25. Section 2 Pay Item Descriptions for Chemical Sealing of Host Pipe states this item will be paid for each pipe "regardless of…the number of infiltration points sealed." This currently reads that a pipe with one single joint with infiltration will be paid the same as a different pipe with 80 joints that all need to be sealed. Bidders have no way of knowing how many joints may be leaking on a particular segment which could drastically skew the pricing. Would you please consider revising this item to include Chemical Sealing of Host Pipe per Joint or per Service Connection? This pay item is to provide a cost for sealing excessively leaking infiltration points prior to lining of a host pipe. Revising this to a per-seal price would introduce the need to verify the number of leaking joints prior to approving a pay application following execution of the work. For tracking purposes, a flat-fee price will remain.

26. Section 2 Pay Item Descriptions for Service Reconnection states each service shall be grouted 18-inches into the lateral. Will this remain a requirement? If so, would you please consider adding Service Reconnection bid items per pipe diameter as there is substantial cost difference in grouting laterals per main diameter? Main diameter should not be a big factor, the lateral diameters are fairly consistent and the annular space volume will be dependent on the lateral diameter, not the main diameter. Pay item to remain as is.

27. The CIPP Spec (Section 21), paragraph 21.11.02 states up to 10% of the installed liners may be tested for exfiltration per ASTM F1216, Section 8.2 which is a hydrostatic pressure test. This test is not applicable to any line with services and adds unnecessary cost to the project as any potential defects will be verified via the post-rehab CCTV inspection. Would you please consider removing this unnecessary requirement which will ultimately create the most competitive pricing for the Owner? Section 21.11.02 specifies the testing is to be performed prior to any service lateral reconnections. Pay item to remain as-is.

28. Also, please accept SAK Construction, LLC as Installer and Pipenology, LLC as Manufacturer of CIPP Liners, in regards to the above referenced project. Per prequalification requirements on pages 1 and 2 of the Section 21 – CIPP Specification, please see attached documents for your review: SAK Company Information, CIPP Completed Project List, Pipenology CIPP Liner Submittal. The specifications for manhole lining materials do not specify specific manufacturers and/or products for use under this contract. As specified in Specification Section 1.09, all materials, appliances, and types of construction shall be in accordance with the Technical Specifications. Accordingly, bidders may base their bids on any manhole lining system that meets the performance and technical requirements of the specifications. Any proposed material or product will be subject to review for compliance with the Contract Documents through the submittal process after award.

29. **Can you please specify whether the minimum CIPP thicknesses are pre- or post- installation measurements?** Post-installation (finished-in-place) thickness.

30. **Will the Owner provide water, at no cost to the contractor, for work requiring water?** Yes.

ADDENDUM 3

Wastewater System Rehabilitation Services

Issued 3/30/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **10:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 3 includes:

Questions and Answers

Questions and Answers:

Do we add all documents including the bid for (Price) to one PDF for submission? You may submit more than one document. They do not have to all be on one PDF.

For pay items 34-36 and pay items 40-42, the units are EA. Can you provide the depths of the manholes under "EACH" since this will significantly affect the price? Or can you change the units to VF as you have on the pay items for Additional MH Coating? 48" diameter manhole depths range from approx. 2 to 14 ft, with the majority between 4 and 6 ft.

EXHIBIT "D"

Conditional Federal/Grant-Funded Contract Addendum

(Place Conditional Federal/Grant-Funded Contract Addendum behind this page)

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

Federal/Grant Program: [insert]
Federal Awarding Agency: [insert]
Pass-Through Entity: [insert, if applicable]
Assistance Listing Number: [insert, if applicable]
Federal Award Identification Number: [insert, if applicable]
Award or Disaster Declaration Date: [insert, if applicable]
Project Number: [insert]
Special Award Conditions: [insert or attach]

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Authorize the City Manager to execute the Agreement with Rowland (DE), LLC for Wastewater System Rehabilitation Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Action Request: Motion to authorize the City Manager to execute the Agreement with Rowland (DE), LLC for Wastewater System Rehabilitation Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Strategic Objective: Reliable Infrastructure

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Proposals (RFP) for Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining, and point repairs. Fifteen (15) responsive proposals were received on April 8, 2026. Following evaluation, the City's selection committee recommended award to Flotech Environmental LLC, Hinterland Group, LLC, RCM Utilities, LLC, Rowland (DE), LLC, and SAK Construction, LLC based on the following criteria:

- Qualifications and Experience
- References and Past Performance
- Capacity to Perform the Work
- Cost

The contract provides not-to-exceed unit prices for wastewater system manhole rehabilitation, cured-in-place pipe (CIPP) lining, and point repairs on an as-needed basis, allowing the City to efficiently address defects identified through routine inspections, CCTV assessments, emergency response activities, regulatory requirements, and ongoing asset management programs.

Work will be authorized by task order on an as-needed basis in an amount not to exceed annually budgeted funding. The initial contract term is three (3) years with the option for two (2) additional one (1) year renewals upon mutual agreement and annual appropriation of funds.

Approval of this agreement will provide the City with qualified contractors to perform wastewater rehabilitation services that reduce inflow and infiltration, improve system reliability, extend asset service life, and support the City's wastewater capital improvement and maintenance programs.

Funding: 401.5350.565000 Wastewater Capital Improvements (remaining balance $2,746,041.85)

401.5350.546007 – Wastewater Repairs (remaining balance $279,990.50)

Attachments: 1. Rowland Services Agreement Signed

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Wastewater System Rehabilitation Services

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and **ROWLAND (DE), LLC** (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Proposals, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its 06/23/2026, public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed the Annual Budgeted amount. Funding will be awarded by Task Orders.

b. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

c. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

d. Contractor must comply with any and all Federal, State, and local laws and regulations

now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

e. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.
   a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished

under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of (3) three years with (2) two, (1) one-year extensions from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement.

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured

and providing coverage up through and including the final performance of any services provided herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved,

and any amount withheld is not subject to payment of interest by the City. The above provisions will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:

a. Standard Contract Addendum (Exhibit "A")
b. Request for Bid/Proposal (Exhibit "B")

c. Vendor Bid/Proposal (Exhibit "C")
d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:
Rowland (DE), LLC.
8250 Bryan Dairy Rd. Ste. 100
Largo, FL 33777

As to City:

21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on

behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Contract Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this _____ day of _____, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and _____, hereinafter referred to as "Contractor", concerning that certain agreement dated the ____ day of _____, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian
cityclerk@stpetebeach.org

Phone: 727-363-9220
155 Corey Avenue
St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

I. INVITATION

The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining and point repairs.

The proposed work will be located within the City of St. Pete Beach in Pinellas County, FL, throughout the entire wastewater collection and transmission system. Each asset to be rehabilitated and the type of rehabilitation required will be identified in each individual Work Order with the location shown on corresponding geographical exhibits.

The successful proposer shall furnish all labor, superintendence, materials, power, light, heat, fuel, water, tools, appliances, equipment, supplies, shop drawings, working drawings and other means of construction necessary or proper for performing and completing the work. The Contractor is responsible for obtaining all required permits necessary for the work, including all applications and review fees, other than those permits which may have already been obtained. The Contractor shall perform and complete the work in a speedy and efficient manner consistent with safety of life and property and to the city's satisfaction, and in strict accordance with the Contract Documents. The Contractor shall repair or restore all structures and property damaged or disturbed during performance of the work.

The types of projects include:

- **Wastewater System Manhole Rehabilitation (Manhole Project):**
  The Contractor shall furnish all labor, material, equipment, and services necessary for manhole rehabilitation. The work shall be completed at various locations through the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, re-building manhole bench and channels, ring (frame) and cover adjustment and replacement, pavement restoration, inflow/infiltration elimination, surface preparation, cementitious and polymer coatings installation, internal chimney sealing, manhole cover insert installation, testing, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.
- **Wastewater System Pipe Lining (Lining Project):**
  The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater pipe rehabilitation using Cured-In-Place-Pipe (CIPP) lining. The work shall be completed at various locations through the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, CIPP liner installation, reconnection of service laterals, testing of CIPP liners, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.
- **Wastewater System Point Repairs (Point Repair Project):**
  The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater point repairs. The work shall be completed at various locations throughout the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, dewatering, directional drilling, jack and boring, remove unsuitable materials below trench grade, sanitary sewer gravity and force main installation, force main and gravity main connections, remove out of service gravity and force mains, install manhole connections, grout out of service pipe, install valves and associated appurtenances, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.

See attached Bid Form Excel document.

IV. GENERAL CONTRACT TERMS

REQUEST FOR PROPOSALS
Wastewater System Rehabilitation Services

REQUEST FOR PROPOSAL SUMMARY
The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining and point repairs.

The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The "City" intends to **award multiple contracts** to vendors who can provide the best value for services. Vendors may submit proposals for all, some, or only one of the categories. **It is not mandatory to submit a proposal for every item listed**. A bidder may bid on any, all, or none of the items. The "City" reserves the right to select multiple vendors to optimize cost-efficiency and capability across different segments of the project. Proposals will be evaluated based on capability, cost, and capacity to perform the specific line items requested.

PROPOSAL SUBMITTALS
Proposal documents must include a signed/notarized Contractor's Proposal Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit electronic proposals only. Bidders must submit electronically only through Bonfire platform. When bidding electronically, only one copy should be submitted.

Proposals shall include the following:

- A signed and notarized Proposer's Contract Proposal.
- Current proof of insurance certificate.
- A list of references and minimum qualifications as outlined in Section V.
- One copy of bid electronically submitted to Bonfire platform.

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http://www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

Proposers or persons wishing to submit a proposal on this project shall be licensed, and insured in accordance with the City's requirements

The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals, or accept any proposal or part thereof deemed to be in the best interests to the City of St. Pete Beach.

Electronic proposals must be submitted by **9:00 AM on April 08, 2026 (Deadline),** clearly marked as: **"Wastewater System Rehabilitation Services."**

PRE-PROPOSAL MEETING
An optional pre-proposal meeting will be held on **March 18, 2026 at 11:00 AM EST** via Microsoft Teams conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS
No oral interpretations will be made to any firms as to the meaning of the scope of work or any other contract documents included in this **RFP.** All questions pertaining to the terms and conditions or scope of work of this Request for Proposal **(RFP)** must be sent in writing via email only to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 AM EST on March 25, 2026.** Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFP**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFP** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so. If the Proposer discovered the opportunity through the online platform (Bonfire), do not submit questions through these platforms. **Only questions emailed directly to the City Procurement Manager will be answered.**

BEGINNING DATE
The Proposer shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Proposer shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City.

COMPLETION OF WORK
The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

COSTS INCURRED BY PROPOSERS
All expenses involved with the preparation and submission of proposals to the City, or any work performed in connection therewith, shall be borne solely by the Proposers. No payment will be made for any responses received or for any other effort required of or made by; the Proposer's prior to contract commencement.

ORAL PRESENTATION
The City may require an oral presentation of the proposal at the Evaluation Committee's discretion. This could also include a formal interview of any and all members of the Proposer's contract management staff.

CONFLICT OF INTEREST
The Proposer represents that it presently has no interest and shall acquire no interest, either direct or indirect, which would conflict in any manner with the performance or services required hereunder, as provided for in FL Stat. 112.311. The Proposer further represents that no person having any interest shall be employed for said performance.

The Proposer shall promptly notify the City's representative, in writing, by certified mail, of all potential conflicts of interest for any prospective business association, interest, or other circumstance, which may influence or appear to influence the contractor's judgment or quality of services being provided hereunder. Such written notification shall identify the prospective business association, interest or circumstance, the nature of work that the Proposer may undertake and request an opinion of the city as to whether the association, interest or circumstance would, in the opinion of the City, constitute a conflict of interest if entered into by the Proposer. The City agrees to notify the Proposer of its opinion by certified mail within thirty days of receipt of notification by the Proposer.

LATE PROPOSAL OR MODIFICATIONS
Modifications in writing received prior to the time set for the proposal submittal will be accepted. Proposal modifications received after the time set for the proposal submittal will not be considered.

RELATED PARTIES AND MULTIPLE PROPOSALS
Where two (2) or more related parties each submit a proposal or multiple proposals are received from (1) Proposer, for any such contract, such proposals shall be judged non-responsive. Related parties mean Proposers or the principles thereof, which have a direct or indirect ownership interest in another Proposer for the same contract or in which a parent company or the principles thereof where one (1) Proposer has a direct ownership interest in another Proposer for the same contract.

RIGHT TO AUDIT
The City of St. Pete Beach reserves the privilege of auditing a Proposer's record as such records relate to purchases or work between the City and said Proposer. Records should be maintained for three years from contract date.

VARIANCE FROM STANDARD TERMS & CONDITIONS
All standard terms and conditions stated throughout the RFP apply to this contract except as specifically stated. This should be fully understood by Proposers prior to submitting a proposal.

ASSIGNMENT
The Proposer shall perform this contract. No assignment or subcontracting shall be allowed without prior written consent of the City. If a Proposer intends to subcontract a portion of this work, the Proposer must disclose that intent in the proposal. In the event of a corporate acquisition and/or merger, the Contractor shall provide written notice to the City within thirty (30) business days of Proposer's notice of such action or upon the occurrence of said action, whichever occurs first. The right to terminate this contract, which shall not be unreasonably exercised by the City shall include but not be limited to, instances in which a corporate acquisition and/or merger represent a conflict of interest or are contrary to any local, state, or federal laws. Action by the City awarding a proposal to a firm that has disclosed its intent to assign or subcontract in its response to the RFP, without exception shall constitute approval for purpose of this Agreement.

LOBBYING Lobbying of Evaluation Committee members, City employees, or elected officials regarding request for proposals, request for qualifications, bids or contracts, during the pendency of bid award or bid protest, by the bidder/proposer/protestor or any member of the bidder's/proposer's/protestor's staff, an agent of the bidder/proposer/protestor, or any person employed by any legal entity affiliated with representing an organization that is responding to the request for proposal, request for qualification, bid or contract, or has a pending bid protest is strictly prohibited either upon advertisement or on a date established by the City and shall be prohibited until either an award is final or the protest is finally resolved by the City Manager or Procurement Manager; provided, however, nothing herein shall prohibit a prospective bidder/proposer from contacting City departments to address situations such as clarification and/or questions related to the procurement process. For purposes of this provision, lobbying activities shall include but not be limited to, influencing or attempting to influence action or non-action in connection with any requests for proposal, request for qualification, bid or contract through direct or indirect oral or written communication or an attempt to obtain goodwill of persons and/or entities specified in this provision. Such actions may cause any request for proposal, request for qualification, bid or contract to be rejected.

ADDITIONAL REQUIREMENTS
The City reserves the right, by change order, to unilaterally add or delete locations/services, either collectively or individually, at the City's sole option, at any time after award has been made as may be deemed necessary or in the best interest of the City. In such case, the Proposer will be required to provide or reduce services to this contract in accordance with the terms, conditions, and specifications.

SERVICES AGREEMENT
A written agreement incorporating the RFP and the successful proposal will be prepared by the City, signed by the successful Proposer, and presented to the City Commission for approval and signature.

INTEGRITY OF REQUEST FOR PROPOSAL DOCUMENTS
Proposers shall use the original RFP forms provided within the RFP and enter information in the spaces where a response is requested. Proposers may use an attachment as an addendum to the RFP forms if sufficient space is not available on the original form for the Proposer to enter a complete response. Any modifications or alterations to the original RFP documents by the Proposer, whether intentional or otherwise, will constitute grounds for rejection of the RFP. Any such modifications or alterations a Proposer wishes to propose must clearly be stated in the Proposer's RFP response and presented in the form of an addendum to the original RFP documents.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in this Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the contract and requirements and shall determine acceptance of the work under this Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the contract terms in a fair and unbiased manner.
If a variation from any requirements is allowed, the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

EXAMINATION OF SITE
Proposer shall carefully examine project site and be familiar with the work required for the project, investigate all site conditions that may affect execution of work as detailed in the construction documents. Contact the City's Procurement Manager or their designee for changes or alterations before proceeding.

ASSURANCES
The responding Proposer shall provide a statement of assurance that the Proposer is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

ASSIGNMENT AND TRANSFER OF CONTRACT
The Proposer shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS
The Proposer shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PAYMENT
Payment shall be made to the Proposer for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

PERIOD OF PERFORMANCE
The target completion for the base Scope of Services is January 2027, corresponding to delivery of the Design-Build Readiness Package. The City reserves the right, at its sole discretion and subject to funding

availability, to amend this Agreement to extend the Consultant's services through final (100%) design. Any additional services shall be authorized by written amendment and negotiated in accordance with the Consultants' Competitive Negotiation Act (Section 287.055, Florida Statutes).

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Proposer will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Proposer without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Proposer's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Proposer to make a change in the Work, and if the City and the Proposer do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the Proposer shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Proposer believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, they shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Proposer first discovered the occurrence. The Proposer shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Proposer shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Proposer shall prepare proposals detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Proposer's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Proposer's proposals shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable proposal will not justify an increase in Contract Amount or Contract Time. Proposer agrees that it shall give the City access to any and all of Proposer's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Proposer for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Proposer shall be at his expense

without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Proposer or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Proposer proposals or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to be used shall be those used for the Proposer's costs, except that the term "Subcontractor" shall replace the term "Proposer," context permitting.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Proposer, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit.

In such case, the Proposer will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Proposer to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Proposer (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Proposer employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

PAYMENTS FOR WORK COMPLETED
All payments under this agreement shall comply with the requirements of Florida Statutes, Section 215.422, commonly referred to as the "Prompt Payment Law." This includes timely processing of invoices and adherence to statutory interest provisions for late payments. The Contractor shall submit detailed invoices for services rendered under this agreement. Each invoice must include: Purchase Order or Contract Number, Description of services provided, Dates of service, Total amount due. Payment will be made within 45 days of receipt of a proper invoice and acceptance of deliverables, as required by Florida law. If payment is not made within the statutory timeframe, interest penalties will apply in accordance with Section 215.422, Florida Statutes. Payments will be issued via electronic funds transfer (EFT) unless otherwise agreed in writing. Contractor must provide accurate banking information to facilitate EFT.

PAYMENTS WITHHELD
The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Proposer to make payments properly to Subcontractors or for labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Proposer

f) Failure of the Proposer to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS
Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Proposer, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such sums to the Proposer.

Before the approval of the final payment, the Proposer shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS
If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Proposer, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Proposer all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Proposer and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Proposer. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies

to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

LICENSES AND PERMITS

The Proposer shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the Proposer is responsible for non-compliance of all permit requirements, including all fines resulting from Proposer's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Proposer shall be responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the Proposer awarded the project, MUST also register their license with the City.

LABOR PROVISIONS

The Proposer and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed. The State of Florida prevailing wage law requires that the Proposer shall fully comply with all provisions contained in Section 215.19, "Schedule of Prevailing Wage Rates for Specified Public Construction." The wage rates set forth by such determination shall apply to this project.

INSURANCE

The Proposer shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Proposer's General Public Liability and Property Damage Insurance issued to the Proposer and protecting the Proposer from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Proposer or by any Subcontractor hired by the Proposer or anyone directly or indirectly employed by the Proposer or hired by the Proposer.

The successful Proposer shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Proposer or third party under the direction or control of the Proposer. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Proposer must furnish the City with Certificate of Insurance prior to commencement of work. An

approved Certificate of Insurance furnished by the Proposer's carrier to guarantee the Proposer being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Professional Liability Insurance $2,000,000 each occurrence.
- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY
The Proposer shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Proposer shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Proposer shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Proposer will provide security on off days and holidays. The Proposer shall be responsible for all charges incurred with such action.

The Proposer shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Proposer, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Proposer shall also protect adjacent property as required by law.

PROPOSAL REVIEW AND CONTRACT AWARD
Failure to submit all documents requested at the time of proposal may deem the Proposer's proposal ineligible for award. The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals. The contract shall be awarded by written notice to the responsible and responsive Contractor whose proposal is determined in writing to be the most advantageous to the City, taking into consideration the price and other criteria set forth in this request for proposals. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS
The laws of the State of Florida do apply to any purchase made under this Request for Proposal. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their proposal and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Proposer agrees to comply with all applicable portions of Fla. Stat. 448.095. Proposer must use the

U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Proposer shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Proposer with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Proposer shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Proposer must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Proposer's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Proposer may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and proposal costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statute by the Proposer, the Proposer may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all proposals, to waive irregularities and technicalities, and to request re-submission. If only one proposal is received by the proposal date and time listed, the proposal may or may not be rejected by the City depending upon proposal review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting proposals. The City reserves the right to award the contract to a responsible proposer submitting a responsible proposal, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, Proposers, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFP during any phase of the proposalding process. Failure to comply with the provision may result in disqualification of the Proposer, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFP shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE
Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION
The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS
The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience in Wastewater System Rehabilitation Services, including manhole rehabilitation, pipe lining and point repairs.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Wastewater System Rehabilitation Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Wastewater System Rehabilitation Services."**

   by the individual signing this sworn statement: _____
   (Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an

affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

STATE OF _____ COUNTY OF _____

I state that **I**_____of_____,
(Name and Title) (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.
2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.
3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.
4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.
5. _____, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

SECTION 1 - GENERAL

1.01 LOCATION OF THE WORK SITE AND ACCESS

Access to the work sites shall be over streets and walkways. Any damage to existing pavement surface and base or other surface improvements outside the Contract Pay Limits, attributable to the Contractor's activities, shall be restored to like-new condition by the Contractor at the Contractor's expense.

The proposed work will be located within the City of St. Pete Beach in Pinellas County, FL, throughout the entire wastewater collection and transmission system. Each asset to be rehabilitated and the type of rehabilitation required will be identified in each individual Work Order with the location shown on corresponding geographical exhibits.

1.02 SCOPE OF WORK

The Contractor shall furnish all labor, superintendence, materials, power, light, heat, fuel, water, tools, appliances, equipment, supplies, shop drawings, working drawings and other means of construction necessary or proper for performing and completing the work. The Contractor is responsible for obtaining all required permits necessary for the work, including all applications and review fees, other than those permits which may have already been obtained. The Contractor shall perform and complete the work in a speedy and efficient manner consistent with safety of life and property and to the city’s satisfaction, and in strict accordance with the Contract Documents. The Contractor shall repair or restore all structures and property damaged or disturbed during performance of the work.

The cost of incidental work described in this General Section, for which there are no specific Contract Items, shall be considered as part of the general cost of doing the work and shall be included in the prices for the various Contract Items. No additional payment will be made.

The Contractor shall be solely responsible for the means and methods of construction and the adequacy of his workmanship, materials, and equipment.

1.03 PROJECT SUMMARY

Wastewater System Manhole Rehabilitation (Manhole Project)

The Contractor shall furnish all labor, material, equipment, and services necessary for manhole rehabilitation. The work shall be completed at various locations through the City’s wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, re-building manhole bench and channels, ring (frame) and cover adjustment and replacement, pavement restoration, inflow/infiltration elimination, surface preparation, cementitious and polymer coatings installation, internal chimney sealing, manhole cover insert installation, testing, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.

Wastewater System Pipe Lining (Lining Project)

The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater pipe rehabilitation using Cured-In-Place-Pipe (CIPP) lining. The work shall be completed at various locations through the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, CIPP liner installation, reconnection of service laterals, testing of CIPP liners, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.

Wastewater System Point Repairs (Point Repair Project)

The Contractor shall furnish all labor, material, equipment, and services necessary for wastewater point repairs. The work shall be completed at various locations throughout the City's wastewater service area and shall include, but is not limited to, maintenance of traffic, temporary by-pass pumping and/or diversion of wastewater, dewatering, directional drilling, jack and boring, remove unsuitable materials below trench grade, sanitary sewer gravity and force main installation, force main and gravity main connections, remove out of service gravity and force mains, install manhole connections, grout out of service pipe, install valves and associated appurtenances, project site cleanup and restoration, and all other incidentals as required and directed by the Engineer to complete the work.

1.04 CONTRACT DRAWINGS AND SPECIFICATIONS

Where the Contract Drawings and Specifications are not in agreement, the Contract Drawings shall govern. The Contractor shall furnish all labor, equipment, and materials to construct the Project and all miscellaneous and appurtenant work complete in place as specifically described and included under said each Contract Pay Item as shown, specified, or directed by the Engineer in accordance with the obvious or expressed intent of the Contract.

The Technical Specifications for the Project that reference FDOT-SSRBC (Florida Department of Transportation - Standard Specifications for Road and Bridge Construction) pertain to the most recent edition at the date of issuance of these Specifications.

1.04.01 COPIES FURNISHED TO CONTRACTOR

The Contractor shall furnish each of the subcontractors, manufacturers, and material men such copies of the Contract Documents as may be required for their work. Additional copies of the Contract Drawings and Specifications, when requested, may be furnished to the Contractor at cost of reproduction.

1.04.02 SUPPLEMNTARY DRAWINGS

When, in the opinion of the City, it becomes necessary to explain more fully the work to be done or to illustrate the work further or to show any changes which may be required, drawings known as Supplementary Drawings, with specifications pertaining thereto, will be prepared by the Engineer and the City and provided to the Contractor.

1.04.03 CONTRACTOR TO CHECK CONTRACT DRAWINGS AND DATA

The Contractor shall verify all dimensions, quantities and details shown on the Contract Drawings, Supplementary Drawings, Schedules, Specifications or other data received from the City or the Engineer and shall notify the City and Engineer of all errors, omissions, conflicts, and discrepancies found therein. Failure to discover or correct errors, conflicts or discrepancies shall not relieve the Contractor of full responsibility for unsatisfactory work, faulty construction or improper operation resulting therefrom nor from rectifying such conditions at the Contractor's own expense. The Contractor shall assume all responsibility for the making of estimates of the size, kind, and quality of materials and equipment included in work to be done under the Contract with approval by the City.

1.05 FIELD ENGINEERING

The Contractor shall establish and provide all vertical and horizontal control points for this Project including benchmarks. The Contractor shall provide the field layout surveying necessary to properly construct the work as indicated on the Contract Drawings.

All field layout surveying shall be performed under the supervision of a Professional Land Surveyor (Chapter 472, Florida Statutes). The Contractor shall submit the name and registration number of Surveyor as directed by the Engineer. The Engineer reserves the right to check all survey staking and to require adjustments or re-staking by the Contractor in the event that conflicts, or errors are detected.

Water pressure pipelines that are 8-inch or less diameter shall be installed with the required cover using horizontal control stakes provided by the Contractor. Sanitary sewer and sanitary pressure pipelines greater than 8-inch diameter shall be installed using an approved method for line and grade control. Methods for line and grade control shall be submitted to the Engineer for review and acceptance, as specified for shop drawings. Sketches shall be provided by the Contractor showing vertical adjustment necessary for pressure pipelines to adequately clear storm drains and other utilities.

1.06 SAFEGUARDING SURVEY MARKS

The Contractor shall safeguard all existing property monuments, benchmarks, and other survey marks adjacent to and within the Project limits and shall bear the cost of re-establishing them if disturbed or destroyed.

1.07 INSPECTION AUTHORITY

The City or Engineer has ultimate responsibility for contract administration and inspection for this Project. The City or Engineer may assign field inspection responsibilities to a Design Professional and/or City Inspector. Each step of construction is subject to review and acceptance by the City or Engineer prior to proceeding with a subsequent step.

During the progress of the Work and up to the date of final acceptance, the Contractor shall at all times afford representatives of the City, the County, the State, the Department of Environmental

Protection, the Department of Transportation, the Department of Labor, or any other agency with jurisdiction, every reasonable, safe, and proper facility for observation of the work done or being done at the site, and also the manufacture or preparation of materials and equipment at the place of such manufacture or preparation.

The Project line of authority will be presented at the Preconstruction Conference.

1.08 PROJECT SCHEDULE

The Contractor shall submit an electronic version in PDF form within 30 days following the Preconstruction Conference of each Work Order.

Scheduling and progress reporting shall be accomplished using a bar chart to provide a clear and concise comparison of progress.

1.09 MATERIALS AND EQUIPMENT

All materials, appliances, and types of construction shall be in accordance with the Technical Specifications and shall, in no event, be less than that necessary to conform to the requirements of any applicable laws, ordinances, and codes.

All materials and equipment to be incorporated into the Work shall be new, unused, and correctly designed. They shall be of standard first grade quality, produced by expert workmen, and be intended for the use for which they are offered. Materials or equipment which, in the opinion of the Engineer, are inferior or of a lower grade than indicated, specified, or required, will not be accepted.

Projects funded by the State Revolving Fund must comply with the requirements of the American Iron and Steel Requirement unless otherwise specified in the Contract Documents and approved by the Engineer.

1.10 MANUFACTURER

The names of proposed manufacturers, manufacturers' representatives, suppliers, and dealers who are to furnish materials, equipment, or other fittings, shall be submitted by the Contractor to the Engineer for review and acceptance. Such acceptance must be obtained before Shop Drawings will be accepted for review. All transactions with the manufacturer and subcontractors shall be through the Contractor.
Any two or more pieces of material or equipment of the same kind, type, or classification and being used for identical types of service, shall be made by the same manufacturer.

Projects funded by the State Revolving Fund must comply with the requirements of the American Iron and Steel Requirement unless otherwise specified in the Contract Documents and approved by the Engineer.

1.11 SAMPLES

The Contractor shall, when required, submit to the Engineer for review and acceptance, typical samples of material and appliances. The samples shall be properly identified by tags and shall be

submitted sufficiently in advance of the time when they are to be incorporated into the Work so that rejections thereof will not cause delay. A letter of transmittal from the Contractor requesting approval shall accompany all such samples.

1.12 EQUIVALENT QUALITY

In the Contract Documents, whenever an article, material, apparatus, equipment, or process is called for by trade name or by name of a patentee, manufacturer, or dealer, or by reference to catalog of a manufacturer or dealer, it shall be understood as intending to mean and specify the article, material, apparatus, equipment, or process designated, or any equal thereto in quality, finish, design, efficiency, and durability, and equally serviceable for the purposes for which it is intended.

Whenever material or equipment is submitted for review as being equal to that specified, the submittal shall include sufficient information and data to demonstrate that the material or equipment conforms to the Contract requirements. The decision as to whether such material or equipment is equal to that specified shall be made by the Engineer.

Upon rejection of any material or equipment submitted as the equivalent of that specifically named in the Contract, the Contractor shall immediately proceed to furnish the designated material or equipment.

Neither the acceptance by the Engineer of alternate material or equipment as being equivalent to that specified, nor the furnishing of the material or equipment specified, shall in any way relieve the Contractor of responsibility for failure of the material or equipment, due to faulty design, material, or workmanship, to perform the functions required of them by the Contract Documents.

1.13 MATERIAL AND EQUIPMENT DELIVERY AND STORAGE

The Contractor shall deliver materials in ample quantities to ensure the most speedy and uninterrupted progress of the work to complete the work within the allotted time. The Contractor shall also coordinate deliveries to avoid delay in, or impediment of, the progress of the work of any related contractor. The Contractor shall provide space for storage of materials and equipment.

Pipe strung along roads and rights-of-way shall be placed in a manner that will not endanger or restrict pedestrian or vehicular traffic. Pipe strings shall not be allowed outside right-of-way limits.

1.14 SERVICE OF MANUFACTURER'S REPRESENTATIVE

The Contract amount shall include but is not limited to the cost of furnishing a competent and experienced representative of the equipment manufacturer who shall assist the Contractor, when required, to install, adjust, test, and place in operation the equipment in conformity with the Contract Documents. After the equipment is placed in operation, the representative shall make all adjustments and tests required by the Engineer to prove that the installed equipment is in proper and satisfactory operating condition. The representative shall instruct personnel as may be designated by the Engineer in the proper operation and maintenance of such equipment.

1.15 CONTAMINANTS CONTAINMENT/DISPOSITION

Prior to the installation of well points for dewatering, the Contractor shall visually inspect the work area for indications of existing ground water monitoring, wells, or metal caps at grade. The Contractor shall review the work area for monitoring wells or abandoned fuel tanks and shall notify the Engineer in writing if any of the above items exist.

During dewatering activities, contractor to test water for contaminants before discharge. If the water is odorous, contaminated, or discolored (excluding tannic acid or iron), the Contractor shall stop the dewatering activities and shall notify the Engineer in writing of such, and request direction.

When work activities encounter or expose any abnormal condition that may indicate the existence of a hazardous or toxic waste, work activities shall stop in the vicinity of the abnormal condition and the Contractor shall notify the Engineer immediately. The presence of tanks or barrels; discolored earth, metal, wood, or groundwater; visible fumes; abnormal odors; excessively hot earth; smoke; or other conditions that appear abnormal, may be signs of hazardous or toxic wastes and shall be treated with extraordinary caution.

Every effort shall be made by the Contractor to minimize the spread of any hazardous or toxic waste into uncontaminated areas.

The Contractor's operations shall not resume until directed in writing by the Engineer.

Disposition of the hazardous or toxic waste will be made in accordance with the requirements and regulations of any City, County, State, or Federal agency having jurisdiction.

1.16 PREVENTION, CONTROL, AND ABATEMENT OF EROSION AND WATER POLLUTION

The Contractor shall be responsible for prevention, control, and abatement of erosion, siltation, and water pollution resulting from construction of the Project until final acceptance of the Project.

The Contractor shall implement all appropriate turbidity management practices at the point of discharge into a storm sewer, gutter, or other conveyance to ensure that state water quality standards are not violated at the point where the storm drain, gutter, or other conveyance discharges into a surface water.

All necessary provisions shall be taken to ensure compliance with the water quality standards of the State of Florida. Attention is called to Chapter 62-302, Florida Administrative Code, and in particular, the requirements that turbidity shall not exceed 29 NTUs above background level. Adequate silt containment procedures and equipment shall be used to control turbidity, at no additional cost to the City.

1.17 MAINTENANCE OF STORM DRAINAGE SYSTEM

The Contractor shall be responsible at all times to maintain the operation of existing stormwater facilities, or, when existing stormwater facilities are removed, to provide equivalent capacity alternate forms of stormwater removal adequate to prevent upstream flooding in excess of existing conditions. This responsibility shall include but is not limited to the installation of temporary

connections, bypass pumping, or other temporary means necessary until the new drainage system is fully operational.

1.18 SPILL OR DISCHARGE OF WASTEWATER OR RECLAIMED WATER

The discharge of wastewater or effluent (reclaimed water) into waters of the State and/or into canals, ditches, and ponds that are connected to waters of the State is prohibited. Any spill or discharge of wastewater or reclaimed water shall be immediately reported to the Engineer, the City's Project Manager, and the City's Emergency Dispatch Center. Contact information will be provided for all necessary City personnel and the Engineer at the Preconstruction Conference. In the event of a spill or discharge, the Contractor shall immediately control, contain, and stop the spill or discharge and shall repair any damage to the City's facilities.

The Contractor shall be responsible for any penalties and costs charged to the City by the FDEP and for all costs incurred by the City as a result of the Contractor's actions or as a result of the Contractor's negligence. The fines, and anticipated costs, which may be incurred by the City as a result of the Contractor's actions or negligence, shall be paid to the City within 30 days, or the costs incurred will be deducted from the total Contract amount.

1.19 SEQUENCE OF OPERATION

1.19.01 PIPELINE WORK

It is the intent of the City that all pipeline work associated with the Project be installed to completion in a timely and orderly manner to minimize inconvenience to the Public. Pipe and pipe materials shall not be stored or strung in residential areas more than 3 weeks in advance of pipe installation unless otherwise approved by the Engineer.

The Contractor shall include in the Project Schedule a Sequence of Operations including, but not limited to, the following components:

A. Pipe and pipe material storage
B. Bypass Pumping
C. Backfilling
D. Testing and repairs
E. Disinfection
F. Surface Restoration and Cleanup

1.19.02 PUMP/LIFT STATION WORK

It is essential that any Project work conducted at Pump/Lift Station sites be sequenced to minimize obstruction of normal daily operations of the Pump/Lift Station.

The Contractor shall include in the Project Schedule a Sequence of Operations including, but not limited to, the following components:

A. Equipment and material storage
B. Bypass Pumping

C. Testing and repairs
D. Surface Restoration and Cleanup

1.19.03 MISCELLANEOUS

Utility Companies may be present on the work site adjusting their facilities and installing new facilities. The Contractor's work shall be scheduled in such a manner as to minimize conflicts with various utility companies.

The Contractor shall clean up the site for each phase of work in accordance with the Contract Documents and confine work and personnel to designated areas in accordance with the Specifications. Before proceeding to a subsequent phase of work, unless otherwise approved by the Engineer.

1.19.04 NO TIME EXTENSION

If the Engineer orders construction, or a phase of construction, to be stopped due to the Contractor's neglect to adhere to the Sequence of Operations as outlined herein, the Stop Work Order shall not constitute a basis for extension of time.

1.20 WORK IN STREETS AND HIGHWAYS

All work within streets and highways shall be subject to the regulations and requirements of the City of St. Pete Beach, FDOT, and all other agencies with jurisdiction of the streets and highways in the work limits.

Methods and materials of construction used in restoration within such streets and highways shall conform to the requirements, inspection, and acceptance of the duly authorized representatives of the appropriate agency having jurisdiction. Restoration Work shall include but not be limited to: removal and replacement of pavement, sidewalk, curb, and gutter; replacement of storm sewer facilities; excavation and backfilling; and storage of materials and equipment.

1.21 WORK IN PRIVATE PROPERTY

The Contractor shall not trespass upon or in any way disturb private property without first obtaining written permission from the City to do so. In the event that, in the opinion of the Contractor, obtaining a temporary construction easement outside the limits of the right-of-way, of City-owned property, or of the easement(s) obtained by the City is necessary or desirable, it shall be the sole responsibility of the Contractor to obtain such easement from the owner of the property. If such easement is obtained by the Contractor, it shall contain provision to hold the City harmless from any operations of the Contractor within the easement limits. The Contractor shall not conduct construction operations on private property outside the limits of the right-of-way, of City-owned property, or of the easement(s) obtained by the City unless a copy of the Temporary Construction Easement Agreement is filed with the Engineer. It shall be the Contractor's responsibility to work equipment around poles, trees, or other obstructions and to do so at his own expense. The Contractor shall ensure all employees have a badge or visible identification during any time that they on the project site or within private property. This identification must be worn so that it is readily recognized and readable to the public.

Upon completion of work in easements, the Contractor shall, at no additional expense, restore the property, including all fences or other structures disturbed by his operations, to the full satisfaction of the City and shall obtain from the City a written release stating that restoration has been satisfactorily made. A copy of the completed written release shall be furnished to the City prior to payment. All items within the street right-of-way or sewer easement shall be removed, or removed and replaced, or restored as directed by the City.

1.22 PERMITS

Construction projects performed for the City will require licenses and permits in the same manner as private construction projects within the City.

The Contractor shall secure, at his expense, all licenses and permits, and shall comply with all applicable laws, regulations, and codes as required by the State of Florida and/or the City of St. Pete Beach whether performed by the Contractor or by others. The Contractor must be registered to complete such work within Pinellas County.

1.23 FIELD OFFICE AND APPURTENANT STRUCTURES

No field office or appurtenant structures by the Contractor, any subcontractor, or any material supplier, will be allowed on the Project site.

Space on City property or rights-of-way proposed to be used for storage and a field office for the Contractor shall be approved by the Engineer prior to installation providing such uses will not interfere in any manner with the construction of the work or the operation of existing facilities.

1.24 CONTRACTOR'S SIGN

No sign by the Contractor, any subcontractor, or any material supplier, will be allowed on the Project site.

1.25 MOBILIZATION

Mobilization shall include but is not limited to all preparatory work and operations necessary to begin the Project, including moving of personnel, equipment, traffic control, and all else necessary to commence work. The cost of bonds, insurance, shop drawings, and preconstruction expenses shall also be included.

If a separate Pay Item is included for mobilization, payment will be as specified for that Pay Item. If no Pay Item is included, costs for mobilization shall be included with the costs for the major Work items included in the Proposal.

1.26 WATER PURCHASE

Water used in connection with this Project must be coordinated with Pinellas County. Reclaimed water used in connection with this Project must be coordinated with the City.

1.27 TRAFFIC CONTROL

The Contractor shall provide required traffic controls under City observation. The Contractor shall notify the City's Project Manager a minimum of 2 working days prior to any construction affecting traffic flow. A Maintenance of Traffic plan drawing shall be submitted for review by the Engineer prior to each lane closure or opening during construction. All traffic control devices utilized during construction shall be provided by the Contractor and meet the requirements set forth in the latest revision of U.S. Department of Transportation Federal Highway Administration's "Manual on Uniform Traffic Control Devices for Streets and Highways" and the Florida State Department of Transportation's "Standard Plans for Road and Bridge Construction." Failure or refusal, on the part of the Contractor, to install, maintain and/or position traffic control devices promptly, fully, and in an acceptable manner, shall be sufficient cause for the City, after 24-hour notice, to perform the traffic control with its own organization, or to contract with any other individual, firm, or corporation to perform the required traffic control. All costs and expenses incurred thereby shall be charged against the defaulting Contractor, and the amount thereof deducted from any money due, or which may become due him, or shall be charged against the Contract Bond. Any Work performed as described by this paragraph, shall not relieve the Contractor in any way of his responsibility for the Work performed by him.

Traffic shall be performed so that vehicular traffic shall be maintained on with at least one 10-foot wide lane in each direction at all times. An acceptable detour route shall be developed by the Contractor to redirect traffic when and where necessary, with the approval of the Transportation Special Events Division. Temporary lanes shall be constructed with a minimum 1-inch thick asphaltic concrete surface over a 6-inch thick limerock base compacted to 98% of the maximum density in accordance with AASHTO T-180.

Failure of the Contractor to comply with any of the above traffic control requirements may result in issuance of a stop work order until the violation is corrected.

All maintenance of traffic in the FDOT right-of-way shall be in accordance with FDOT requirements.

1.28 TREE PROTECTION

Particular care shall be taken by the Contractor to protect trees during construction by erecting approved barricades to prevent unnecessary damage to trunk and roots during construction. Such barriers shall protect the area within the dripline.

The Contractor shall prune all branches that interfere with construction in accordance with American Forestry Association Standards. Roots over 2-inch diameter shall be preserved wherever possible. If root pruning is required, roots shall be cut cleanly.

Temporary soil deposits, concrete block, concrete wash, or solvents shall not be placed within the dripline. The grade within the dripline shall be preserved. If adjacent grade is altered, protective measures such as those described in the Florida State Division of Forestry "Tree Protection Manual for Builders and Developers" shall be constructed to protect the tree(s) from deleterious effects of the grade change.

1.29 TREE REMOVAL AND REPLACEMENT

The Contractor shall obtain any necessary tree removal permit, shall furnish and replace trees as required, and shall perform this Work in a manner conforming to all applicable provisions of said regulations or permit.

The cost of tree removal and obtaining the tree removal permits shall be included in the cost of the appropriate associated Contract Pay Item under which the Work is to be performed. The Contractor shall remove trees as required and approved by the Engineer whether or not said trees are shown on the Contract Drawings. Trees that must be removed, except for Australian pine, Brazilian pepper, punk, and other exempt species, shall be replaced as directed. Replacement trees shall be of native species at least 8-feet tall and at least 3-inch caliper diameter.

1.30 UTILITIES

Prior to construction, the Contractor shall familiarize himself with the location of all existing utilities and facilities within the Project Site. The Contractor must take the necessary precautions for the protection of any utility encountered on the Project or the restoration of any utility damaged during the work.

If excavation is required, The Contractor shall notify, at least 48 hours before breaking ground, all public or private service corporations having wire, poles, pipes, conduit, manholes, or other structures that may be affected by this operation, including all structures which are affected and not shown on these plans. Utility companies shall be contacted by calling the utility notification center "Sunshine 811" at 1-800-432-4770. Owners which are not members of the state's One Call service must be called directly. The City will furnish to the Contractor the available records of City utilities. The Contractor shall locate and mark all City utilities for his reference and for use by utility companies. The Contractor shall act as the City's agent for locating and marking City underground utilities within the Project limits, in accordance with the Florida Underground Facilities Damage Prevention and Safety Act (FS 556).

In all cases where existing utility lines may be interfered with by the work, the Contractor shall give a minimum of 48 hours' notice (excluding Saturdays, Sundays, and legal holidays) to the owners of such utilities to permit them to relocate the lines prior to construction. Existing utilities have been shown on the Contract Drawings insofar as information is reasonably available. However, it will be the Contractor's responsibility to preserve all existing utilities whether shown on the Contract Drawings or not. All maintenance, repair, and replacement of existing utilities shall be in accordance with the rules and regulations of the various utility companies having jurisdiction. All existing storm sewers, driveway drains, surface drainpipes and other property, removed or damaged during construction shall be repaired and reconnected by the Contractor as directed by the City at no additional cost to the City.

1.31 NEIGHBORHOOD NOTIFICATION

Not less than 7 days prior to the commencement of Work in the right-of-way, the Contractor shall notify all residents and businesses along the construction route with a printed door hanger notice indicating the scheduled date of construction, the type of construction, and the Contractor's and Superintendent's contact information. The door hanger text and a list of residents and businesses to

which the notification has been delivered shall be compiled and submitted to the Engineer prior to the Contractor commencing Work.

1.32 SHOP, FIELD, AND LABORATORY TESTING

The Engineer may require testing by certified personnel of certain materials to be incorporated in the Work, such as: soils density, pavement, concrete pipe and appurtenances, and welds.

In the event any such testing is required by the Engineer, a detailed description will be found in these Technical Specifications concerned with the specific item of Work.

Where reference is made for design mixes, tests of materials, or work performed, or where in the opinion of the Engineer, tests are required to ascertain compliance with the Specifications, the Contractor shall have such tests made by an approved testing laboratory. No additional payment will be made for these tests.

1.33 SALVAGED MATERIALS

The Contractor shall not proceed with demolition of existing materials or equipment without review and acceptance from the Engineer for the method of disposal.

All materials which are not returned to the City yard shall be disposed in an approved disposal site. The Engineer may request confirmation of the site's approval for disposal of the specific materials.

Salvaged materials shall be loaded on Contractor trucks and returned to the Public Services yard at 7581 Boca Ciega Drive, St. Pete Beach, Florida. The City will designate the specific location at the yard for placement of salvaged materials by the Contractor.

The following materials shall be removed and returned by the Contractor: pumps and pump rails, and all other materials as directed by the Engineer.

END OF SECTION

SECTION 2 - PAY ITEM DESCRIPTIONS

2.01 SCOPE

The scope of this section of the Contract Documents is to further define the items included in each Pay Item in the Bid Form section of the Contract Documents. Payment will be made based on the specified items included in the description in this section for each Pay Item.

All contract prices included in the Bid Form section will be full compensation for all shop drawings, working drawings, labor, materials, tools, equipment and incidentals necessary to complete the construction as shown on the Contract Drawings and/or as specified in the Contract Documents to be performed under this Contract. Actual quantities of each item bid on a unit price basis will be determined upon completion of the construction in the manner set up for each item in this section of the Specifications. Payment for all items listed in the Bid Form will constitute full compensation for all work shown and/or specified to be performed under this Contract.

2.02 ESTIMATED QUANTITIES

The quantities shown are approximate and are given only as a basis of calculation upon which the award of the Contract is to be made. The City does not assume any responsibility for the final quantities, nor shall the Contractor claim misunderstanding because of such estimate of quantities. Final payment will be made only for satisfactorily completed quantity of each item.

2.03 WORK OUTSIDE AUTHORIZED LIMITS

No payment will be made for work constructed outside the authorized limits of work.

2.04 MEASUREMENT STANDARDS

Unless otherwise specified for the particular items involved, all measurements of distance shall be taken horizontally or vertically.

2.05 AREA MEASUREMENTS

In the measurement of items to be paid for on the basis of area of finished work, the lengths and/or widths to be used in the calculations shall be the final dimensions measured along the surface of the completed work within the neat lines shown or designated.

2.06 LUMP SUM ITEMS

Where payment for items is shown to be paid for on a lump sum basis, no separate payment will be made for any item of work required to complete the lump sum items. Lump sum contracts shall be complete, tested and fully operable prior to request for final payment. Contractor may be required to provide a break-down of the lump sum totals.

2.07 PAY ITEM DESCRIPTIONS

Separate payment will be made for the items of work described herein and listed on the Bid Form. Any related work not specifically listed but required for satisfactory completion of the work shall be considered to be included in the scope of the appropriate listed work items.

No separate payment will be made for the incidental items not included in the Pay Item descriptions. The cost to complete such work shall be included in the applicable Pay Item unit cost. Final payments shall not be requested by the Contractor or made by the City until as-built (record) drawings have been submitted and approved by the City. Incidental items include, but are not limited to:

1. Shop Drawings, Working Drawings.
2. Clearing, grubbing and grading except as hereinafter specified.
3. Trench excavation, including necessary pavement removal and rock removal, except as otherwise specified.
4. Dewatering and disposal of surplus water.
5. Structural fill, backfill, and grading.
6. Replacement of unpaved roadways, and shrubbery plots.
7. Foundation and borrow materials, except as hereinafter specified.
8. Testing and placing system in operation.
9. Any material and equipment required to be installed and utilized for the tests.
10. Pipe, structures, pavement replacement, driveways and/or appurtenances included within the limits of lump sum work, unless otherwise shown.
11. Maintaining the existing quality of service during construction.
12. Appurtenant work as required for a complete and operable system.
13. Seeding and hydro mulching.
14. As-built Record Drawings, clean up, and miscellaneous work.

WASTEWATER SYSTEM MANHOLE REHABILITATION

PAY ITEM NO. 1 – MOBILIZATION

The work specified in this item consists of the preparatory work and operations in mobilizing for beginning work on the project This item includes, but is not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to and from the project site as a single occurrence per work site, and for the establishment of Subcontractor's temporary offices, buildings, safety equipment, first aid supplies, sanitary and other facilities, as required by these Specifications, special provisions, and State and local laws and regulations. The costs of bonds, permits and any required insurance, and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Labor and equipment travel time from/to the site is included in this pay item.

The Contractor will be required to respond to the request of the Engineer or designated representative within ten (10) calendar days of notification. The Scope of Work will be developed by Project manager and will be executed in accordance with the terms and conditions of this contract.

The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting, and unloading, or under its own power to complete the job assignment or project. Payment for mobilization shall not exceed 10 percent (10%) of the total Contract cost unless the Contractor can prove to the City that his actual mobilization cost exceeds 10 percent (10%).

PAY ITEMS NO. 2 – 14 – MAINTENANCE OF TRAFFIC

This work consists of maintaining traffic within the limits of the project for the duration of the construction period, including any temporary suspensions of the work. All Maintenance of Traffic (MOT) shall comply with FDOT Standard Plans Index 102 Series for Maintenance of Traffic. These pay items shall include labor and equipment to furnishing, installing and maintaining of traffic control and safety devices during construction; the construction and maintenance of any necessary detour facilities; providing necessary facilities for access to residences, businesses, pedestrian, schools, etc., control of dust and any other special requirements for safe and expeditious movement of traffic as may be called for on the plans. MOT shall include all of such facilities, devices and operations as are required for the safety and convenience of the public, as well as for minimizing public nuisance. The Contractor, however, shall not obstruct nor create a hazard to any traffic during the performance of the work and shall be responsible for repair of any damage to existing pavement or facilities caused by his operations. Traffic Control Devices include all types of barricades, arrow boards, signs, temporary pavement markers, lights, concrete barriers and permanent striping. All travel, equipment, labor overhead or any other associated expenses in transportation and setting out the MOT will be included in the price. All MOT line items for Multi-Lane work shall include all costs for items associated with the appropriate FDOT

Index (no separate payment for signs, barricades, etc. included with index will be allowed).

Maintenance of Traffic (MOT) shall be measured as units of work, each/day (EA/DY), hourly (HR) or by linear foot (LF) accordingly completed and priced on an individual project basis. The lump sum price for each assignment will be based on the specific MOT requirements for the assignment. The Contractor shall provide the Engineer with a proposal for the MOT that includes a breakdown of the costs, which are included in the lump sum price, and receive written acceptance from the Engineer prior to the installation of the MOT.

PAY ITEM	DESCRIPTION	UNITS
2	Flagmen (Per-Flagmen)	HR
3	Multi Lane, Lane Closures (FDOT Index No. 613)	EA/DY
4	Multi Lane, Intersection (FDOT Index No. 615)	EA/DY
5	Arrow Boards - 5' Minimum Horizontal Size	EA/DY
6	Variable Message Board	EA/DY
7	Concrete Barrier (FDOT Index No. 100)	EA/DY
8	Low Profile Barrier (FDOT Index No. 120)	EA/DY
9	Signs in Work Zones	EA/DY
10	6" Solid line Thermo Plastic - Permanent	LF
11	24" Stop Bar, Solid, Thermo Plastic, Perm.	LF
12	6" Skip line (6'-10' Skip) Thermo Plastic-Perm.	LF
13	Barricades Type III, with Warning Lights	EA/DY
14	Barricades Type I or II, with Warning Lights	EA/DY

PAY ITEM NO. 15 – REPAIR MANHOLE BENCH AND CHANNEL

Payment will be made per each manhole regardless of manhole diameter or depth. Payment shall include all materials, labor, equipment, and supplies necessary for the Repair of Manhole Bench and Channel, and specifically includes, but is not limited to, placement of temporary plugs, removal and disposal of all sand, rubble, deposits, and other accumulated debris, removal of deficient, deteriorated or unsound bench and channel materials, minor infiltration elimination in walls and base beneath the bench and channel, repair or replacement of bench and channels, cleaning, disposal of debris, restoration, and all other appurtenant work.

Separate Pay Items are provided for Traffic Control, Pump-Around Pumping Operation, and "Severe" Manhole Infiltration Elimination used in conjunction with this Work.

PAY ITEMS NO. 16 & 17 – REPAIR CHIMNEY, ADJUST/REPLACE MH CASTING

Payment will be made per each manhole regardless of manhole casting diameter or depth. Payment shall include all materials, labor, equipment, and supplies necessary for repair of chimney, and adjustment or replacement of manhole casting, and specifically includes, but is not limited to, locating and uncovering manhole, excavation, saw cutting, removal and disposal of existing asphalt pavement as needed, removal of existing manhole frame and cover casting, removal of deficient, deteriorated or unsound chimney materials, minor infiltration elimination, repair or replacement of chimney, reinstalling the existing manhole casting, delivering and

installing a new manhole casting of the same nominal size as the existing casting, backfill, restoration of surface to match existing conditions, cleaning, disposal of debris, and all other appurtenant work. Compensation for the Contractor to furnish new manhole castings will be made under separate Pay Items. The City may elect to furnish new manhole castings for the Contractor to install. The cost of City furnished manhole castings will be deducted from the Contract Price.

PAY ITEM	DESCRIPTION	UNITS
16	Repair Chimney, Asjust/Replace MH Casting - Unpaved	EA
17	Repair Chimney, Asjust/Replace MH Casting - Asphalt Pavement	EA

PAY ITEM NO. 18 – REBUILD CORBEL/CHIMNEY FOR TYPE B MANHOLE CASTING

Payment will be made per each manhole regardless of manhole casting diameter or depth. Payment shall include all materials, labor, equipment, and supplies necessary to rebuild and enlarge corbel/chimney for Type B manhole casting, and specifically includes, but is not limited to, additional pavement removal and excavation, removal of chimney/corbel materials and rebuilding chimney to match larger Type B manhole casting diameter, additional backfill, additional surface restoration, disposal of additional debris, and all other appurtenant work. This Pay Item is applicable only in conjunction with, and in addition to, the Work as listed under Pay Items 16 and 17.

PAY ITEMS NO. 19 & 20 – FURNISH MANHOLE CASTING

Payment will be made per each manhole casting for the applicable casting types listed in the Proposal. Payment shall include all materials, labor, equipment, and supplies necessary to furnish Type B manhole castings (nominal 34-inch diameter) or Type E manhole castings (nominal 23-inch diameter), and specifically includes, but is not limited to, purchasing and delivering the manhole casting materials to designated Work locations for use to replace existing manhole castings.

PAY ITEM	DESCRIPTION	UNITS
19	Furnish Manhole Casting – Type B	EA
20	Furnish Manhole Casting – Type E	EA

PAY ITEM NO. 21 – SEVERE MANHOLE INFILTRATION ELIMINATION

Payment will be made per each manhole regardless of the manhole diameter, depth, or the number of infiltration points sealed in each manhole. Payment shall include all materials, labor, equipment, and supplies necessary, and specifically includes, but is not limited to, surface preparation, drilling of grout holes into or through the manhole wall and floor, grout pipe penetrations, grout injection, removal of grout pipe and sealing grout holes, testing, restoration, and all other appurtenant work as specified.

PAY ITEM NO. 22 – CHEMICAL SEALING - GROUT

Payment will be made per gallon. This Pay item is applicable only in conjunction with Pay Item No. 21. Payment shall include all materials, equipment and labor for chemically sealing excessive infiltration defects for "Severe" Manhole Infiltration Elimination prior to manhole repairs.

PAY ITEMS NO. 23 & 24 – INTERNAL CHIMNEY SEALANT

Payment will be made per each manhole for the applicable manhole casting types listed in the Bid Form. Payment shall include all materials, labor, equipment, and supplies necessary for the installation of the internal chimney sealant for Type B manhole castings (nominal 34-inch diameter) or Type E manhole castings (nominal 23-inch diameter), and specifically includes, but is not limited to, cleaning, surface preparation, "Minor" infiltration elimination, applying the chimney sealant, testing, restoration, and all other appurtenant work.

PAY ITEM	DESCRIPTION	UNITS
23	Internal Chimney Sealant – Type B Manhole Casting	EA
24	Internal Chimney Sealant – Type E Manhole Casting	EA

PAY ITEM NO. 25 – ADDITIONAL ACCESS COST FOR MANHOLE COATING

Payment will be made per each Work location. A Work location shall be limited to the additional access costs for manhole coating Work to be performed on single or multiple proximate access structures or manholes regardless of the number of manholes coated. Measurement will be for a manhole coating installation where the manhole(s) is not readily accessible by standard equipment, e.g., when located in rear easements. Payment shall include all additional labor, equipment, materials and supplies to complete the manhole coating installation in locations with limited access.

PAY ITEMS NO. 26 – 33 – BYPASS PUMPING SETUP & OPERATION

This item provides for set up and operation of by-pass sewage pumping equipment and temporary piping as required and as described in the Standard Technical Specifications. This Pay Item is applicable on projects or repairs that have high flow or require an over night by pass operation.

The quantity to be measured for payment under this Pay Item will be the actual number of by-pass pumping set ups and operations, per part of day, required by the Engineer in the work. The minimum measurement for this pay item is eight (8) hours or 0.333 days and is measured from the time that the sewage is actually by-passed. This eight (8) hour minimum (0.333 days) includes full compensation for set up and operation for up to the first eight (8) hour period. Additional time will be in tenths of the day or twenty-four (24) hour period. The quantities determined shall be paid per day (DAY) or portion of day of by-pass pumping set up and operation.

PAY ITEM	DESCRIPTION	UNITS
26	Bypass Pumping, Set up, 6" - 10" diameter	EA
27	Bypass Pumping, Set up, 12" - 14" diameter	EA

28	Bypass Pumping, Set up, 15" - 21" diameter	EA
29	Bypass Pumping, Set up, 24" diameter	EA
30	Bypass Pumping, Operation, 6" - 10" diameter	DAY
31	Bypass Pumping, Operation, 12" - 14" diameter	DAY
32	Bypass Pumping, Operation, 15" - 21" diameter	DAY
33	Bypass Pumping, Operation, 24" diameter	DAY

PAY ITEMS NO. 34-36 – PURE CALCIUM ALUMINATE CEMENTITIOUS MH COATING, INITIAL

Payment will be made per each manhole for the applicable manhole diameters listed below, regardless of the overall manhole depth. Measurement will be from the bottom of the manhole to at least 3 vertical feet above the lowest pipe invert, or to the bottom of the cover frame if less than 3 vertical feet, and will be the average of minimum/maximum manhole diameter measured 12-inches above outgoing pipe rounded to the nearest foot. Payment shall include all materials, labor, equipment, and supplies necessary for installation, and specifically includes, but is not limited to, temporary plugs, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, removal of steps, surface preparation, "Minor" infiltration elimination, sealing of all manhole wall penetrations, coating the lower 3 vertical feet of the manhole (includes invert, channel, bench, piping, CIPP liner interface, wall, and cone/corbel/chimney as applicable), testing, restoration, and all other appurtenant work as specified.

Separate Pay Items are provided for Maintenance of Traffic, Bypass Pumping Operation, and "Severe" Manhole Infiltration Elimination used in conjunction with this Work.

PAY ITEM	DESCRIPTION	UNITS
34	Pure Calcium Aluminate Cementitious MH Coating – 48” Diameter, Initial	EA
35	Pure Calcium Aluminate Cementitious MH Coating – 60” Diameter, Initial	EA
36	Pure Calcium Aluminate Cementitious MH Coating – 72” Diameter, Initial	EA

PAY ITEMS NO. 37-39 – PURE CALCIUM ALUMINATE CEMENTITIOUS MH COATING, ADDITIONAL

Payment will be made per vertical foot for the applicable manhole diameters listed below, regardless of the overall manhole depth. Measurement will be from the lowest pipe invert to the bottom of the cover frame minus the 3 vertical feet paid for under Pay Items 34 through 36. This Pay Item is applicable only in conjunction with, and includes the same Work as listed in Pay Items 34 through 36.

PAY ITEM	DESCRIPTION	UNITS
37	Pure Calcium Aluminate Cementitious MH Coating – 48” Diameter, Additional	VF
38	Pure Calcium Aluminate Cementitious MH Coating –	VF

	60” Diameter, Additional	
39	Pure Calcium Aluminate Cementitious MH Coating – 72” Diameter, Additional	VF

PAY ITEMS NO. 40-42 – REINFORCED POLYMER MH COATING, INITIAL

Payment will be made per each manhole for the applicable manhole diameters listed below, regardless of the overall manhole depth. Measurement will be from the bottom of the manhole to at least 3 vertical feet above the lowest pipe invert, or to the bottom of the cover frame if less than 3 vertical feet, and will be the average of minimum/maximum manhole diameter measured 12-inches above outgoing pipe rounded to the nearest foot. Payment shall include all materials, labor, equipment, and supplies necessary for installation, and specifically includes, but is not limited to, temporary plugs, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris, removal of steps, surface preparation, "Minor" infiltration elimination, sealing of all manhole wall penetrations, coating the lower 3 vertical feet of the manhole (includes invert, channel, bench, piping, CIPP liner interface, wall, and cone/corbel/chimney as applicable), testing, restoration, and all other appurtenant work as specified.

Separate Pay Items are provided for Maintenance of Traffic, Bypass Pumping Operation, and "Severe" Manhole Infiltration Elimination used in conjunction with this Work.

PAY ITEM	DESCRIPTION	UNITS
40	Reinforced Polymer MH Coating – 48” Diameter, Initial	EA
41	Reinforced Polymer MH Coating – 60” Diameter, Initial	EA
42	Reinforced Polymer MH Coating – 72” Diameter, Initial	EA

PAY ITEMS NO. 43-45 – REINFORCED POLYMER MH COATING, ADDITIONAL

Payment will be made per vertical foot for the applicable manhole diameters listed below, regardless of the overall manhole depth. Measurement will be from the lowest pipe invert to the bottom of the cover frame minus the 3 vertical feet paid for under Pay Items 40 through 42. This Pay Item is applicable only in conjunction with, and includes the same Work as listed in Pay Items 40 through 42.

PAY ITEM	DESCRIPTION	UNITS
43	Polymer MH Coating – 48” Diameter, Additional	VF
44	Polymer MH Coating – 60” Diameter, Additional	VF
45	Polymer MH Coating – 72” Diameter, Additional	VF

PAY ITEMS NO. 46-48 – CONCRETE CURB REPLACEMENT

Payment for all work included in this Pay Item will be made at the applicable Contract unit price bid per linear foot for removal of existing curbing and for furnishing and placing curb and gutter as shown on the Contract Drawings and listed on the Bid Form. Measurement will be per actual number of linear feet of curbing installed. Payment shall represent full compensation for removal of existing curb and all labor, material and equipment for compacting subgrade, forming,

furnishing, placing the concrete, and finishing as specified and all incidentals necessary for completion of this Pay Item.

PAY ITEM	DESCRIPTION	UNITS
46	Concrete Curb Replacement – Type D	LF
47	Concrete Curb Replacement – Type F	LF
48	Concrete Curb Replacement – Miami Curb	LF

PAY ITEMS NO. 49 & 50 – CONCRETE SIDEWALK REPLACEMENT

Payment will be made per square yard for the applicable sidewalk thickness listed below, regardless of the overall length. Measurement will be for complete sections. Payment shall include all materials, labor, equipment, and supplies necessary for concrete sidewalk replacement, and specifically includes, but is not limited to, excavation, saw cutting and removal of existing sidewalk, installation of replacement sidewalk to match cross section and slope of adjacent sidewalk, expansion joint material, contraction joints, backfill, restoration, cleaning, disposal of debris, and all other appurtenant work as specified.

PAY ITEM	DESCRIPTION	UNITS
49	Concrete Sidewalk Replacement – 4” Thick	SY
50	Concrete Sidewalk Replacement – 6” Thick	SY

PAY ITEMS NO. 51 & 52 – CONCRETE DRIVEWAY REPLACEMENT

Payment will be made per square yard for the applicable driveway thickness listed below, regardless of the overall length. Measurement will be for complete section. Payment shall include all materials, labor, equipment, and supplies necessary for concrete driveway replacement, and specifically includes, but is not limited to, excavation, saw cutting and removal of existing driveway, installation of replacement driveway to match cross section and slope of existing driveway, expansion joint material, contraction joints, backfill, restoration, cleaning, disposal of debris, and all other appurtenant work as specified.

PAY ITEM	DESCRIPTION	UNITS
51	Concrete Driveway Replacement – 4” Thick	SY
52	Concrete Driveway Replacement – 6” Thick	SY

PAY ITEM NO. 53 – INFLOW DISH

Payment for all work included under this Pay Item will be made at the Contract unit price bid for furnishing and installing each inflow dish as shown on the Contract Drawings and listed on the Bid Form. Payment will be made for each inflow dish installed and will represent full compensation for all labor, material, excavation, including rock, bedding, backfill, compaction, sheeting, testing and equipment required to complete this Pay Item. Included in this Pay Item, but not limited to, are all 304 stainless steel inflow dishes, as shown in the Contract Drawings. Submittal shall include a complete bill of materials for all equipment, showing dimensions and materials of construction of

all components, verifying that product will meet the standards specified in the Technical Specifications and Contract Drawings.

WASTEWATER SYSTEM PIPE LINING

PAY ITEM NO. 1 – MOBILIZATION

The work specified in this item consists of the preparatory work and operations in mobilizing for beginning work on the project This item includes, but is not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to and from the project site as a single occurrence per work site, and for the establishment of Subcontractor's temporary offices, buildings, safety equipment, first aid supplies, sanitary and other facilities, as required by these Specifications, special provisions, and State and local laws and regulations. The costs of bonds, permits and any required insurance, and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Labor and equipment travel time from/to the site is included in this pay item.

The Contractor will be required to respond to the request of the Engineer, or designated representative within ten (10) calendar days of notification. The Scope of Work will be developed by Project manager and will be executed in accordance with the terms and conditions of this contract.

The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting and unloading, or under its own power to complete the job assignment or project. Payment for mobilization shall not exceed 10 percent (10%) of the total Contract cost unless the Contractor can prove to the City that his actual mobilization cost exceeds 10 percent (10%).

PAY ITEMS NO. 2 – 14 – MAINTENANCE OF TRAFFIC

This work consists of maintaining traffic within the limits of the project for the duration of the construction period, including any temporary suspensions of the work. All Maintenance of Traffic (MOT) shall comply with FDOT Standard Plans Index 102 Series for Maintenance of Traffic. These pay items shall include labor and equipment to furnishing, installing and maintaining of traffic control and safety devices during construction; the construction and maintenance of any necessary detour facilities; providing necessary facilities for access to residences, businesses, pedestrian, schools, etc., control of dust and any other special requirements for safe and expeditious movement of traffic as may be called for on the plans. MOT shall include all of such facilities, devices and operations as are required for the safety and convenience of the public, as well as for minimizing public nuisance. The Contractor, however, shall not obstruct nor create a hazard to any traffic during the performance of the work and shall be responsible for repair of any damage to existing pavement or facilities caused by his operations. Traffic Control Devices include all types of barricades, arrow boards, signs, temporary pavement markers, lights, concrete barriers and permanent striping. All travel, equipment, labor overhead or any other associated expenses in transportation and setting out the MOT will be included in the price. All MOT line items for Multi-Lane work shall include all costs for items associated with the appropriate FDOT Index (no separate payment for signs, barricades, etc. included with index will be allowed).

Maintenance of Traffic (MOT) shall be measured as units of work, each/day (EA/DY), hourly (HR) or by linear foot (LF) accordingly completed and priced on an individual project basis. The lump sum price for each assignment will be based on the specific MOT requirements for the assignment. The Contractor shall provide the Engineer with a proposal for the MOT that includes a breakdown of the costs, which are included in the lump sum price, and receive written acceptance from the Engineer prior to the installation of the MOT.

PAY ITEM	DESCRIPTION	UNITS
2	Flagmen (Per-Flagmen)	HR
3	Multi Lane, Lane Closures (FDOT Index No. 613)	EA/DY
4	Multi Lane, Intersection (FDOT Index No. 615)	EA/DY
5	Arrow Boards - 5' Minimum Horizontal Size	EA/DY
6	Variable Message Board	EA/DY
7	Concrete Barrier (FDOT Index No. 100)	EA/DY
8	Low Profile Barrier (FDOT Index No. 120)	EA/DY
9	Signs in Work Zones	EA/DY
10	6" Solid line Thermo Plastic - Permanent	LF
11	24" Stop Bar, Solid, Thermo Plastic, Perm.	LF
12	6" Skip line (6'-10' Skip) Thermo Plastic-Perm.	LF
13	Barricades Type III, with Warning Lights	EA/DY
14	Barricades Type I or II, with Warning Lights	EA/DY

PAY ITEMS NO. 15 – 22 – CIPP MAIN LINER

Payment will be made per linear foot for the applicable pipe diameters and minimum thicknesses listed below, regardless of the depth or overall length. Measurement will be from the upstream manhole to the downstream manhole centerlines. Payment shall include all materials, labor, equipment, and supplies necessary for the CIPP Main Liner installation, and specifically includes, but is not limited to, pre-rehabilitation CCTV inspection, liner sampling and storage of samples for testing, sealing liner connections at manholes, matching existing manhole lining to the CIPP liner, matching existing flow channels and surfacing to the liner to minimize turbulence, cleaning, removal and disposal of all sand, rubble, deposits, and other accumulated debris after liner installation, post-rehabilitation CCTV inspection video and log, restoration, and all other appurtenant work as specified.

PAY ITEM	DESCRIPTION	UNITS
15	CIPP Main Liner 6” Diameter – 6.0 mm Thickness	LF
16	CIPP Main Liner 8” Diameter – 6.0 mm Thickness	LF
17	CIPP Main Liner 10” Diameter – 6.0 mm Thickness	LF
18	CIPP Main Liner 12” Diameter – 6.0 mm Thickness	LF
19	CIPP Main Liner 15” Diameter – 7.5 mm Thickness	LF
20	CIPP Main Liner 18” Diameter – 9.0 mm Thickness	LF
21	CIPP Main Liner 21” Diameter – 9.0 mm Thickness	LF
22	CIPP Main Liner 24” Diameter – 10.5 mm Thickness	LF

PAY ITEMS NO. 23 – 30 – CIPP MAIN LINER THICKNESS VARIANCE

Payment for CI PP Main Liner Thickness Variance will be made per linear foot for the applicable pipe diameters listed in the Proposal, regardless of depth or overall length. Liner thickness may be varied due to field conditions requiring a change in the specified minimum thickness. The per linear foot price for CIPP Main Liner Thickness Variance will be added to, or deducted from, the per linear foot price of the Main Liner for the applicable pipe diameter listed in the Bid Form (Pay Items 15 through 22). The Main Liner per linear foot price will be adjusted for each 1.5 mm thickness variance increment. Liner thickness shall be in accordance with Technical Specification Section headed "Cured-In-Place-Pipe (CIPP) " unless otherwise approved by the Engineer in writing.

PAY ITEM	DESCRIPTION	UNITS
23	CIPP Main Liner 6” Diameter – Thickness Variance + 1.5 mm	LF
24	CIPP Main Liner 8” Diameter – Thickness Variance + 1.5 mm	LF
25	CIPP Main Liner 10” Diameter – Thickness Variance + 1.5 mm	LF
26	CIPP Main Liner 12” Diameter – Thickness Variance + 1.5 mm	LF
27	CIPP Main Liner 15” Diameter – Thickness Variance + 1.5 mm	LF
28	CIPP Main Liner 18” Diameter – Thickness Variance + 1.5 mm	LF
29	CIPP Main Liner 21” Diameter – Thickness Variance + 1.5 mm	LF
30	CIPP Main Liner 24” Diameter – Thickness Variance + 1.5 mm	LF

PAY ITEMS NO. 31 – 38 – BYPASS PUMPING SETUP & OPERATION

This item provides for set up and operation of by-pass sewage pumping equipment and temporary piping as required and as described in the Standard Technical Specifications. This Pay Item is applicable on projects or repairs that have high flow or require an over night by pass operation.

The quantity to be measured for payment under this Pay Item will be the actual number of by-pass pumping set ups and operations, per part of day, required by the Engineer in the work. The minimum measurement for this pay item is eight (8) hours or 0.333 days and is measured from the time that the sewage is actually by-passed. This eight (8) hour minimum (0.333 days) includes full compensation for set up and operation for up to the first eight (8) hour period. Additional time will be in tenths of the day or twenty-four (24) hour period. The quantities determined shall be paid per day (DAY) or portion of day of by-pass pumping set up and operation.

PAY ITEM	DESCRIPTION	UNITS
31	Bypass Pumping, Set up, 6" - 10" diameter	EA
32	Bypass Pumping, Set up, 12" - 14" diameter	EA
33	Bypass Pumping, Set up, 15" - 21" diameter	EA
34	Bypass Pumping, Set up, 24" diameter	EA
35	Bypass Pumping, Operation, 6" - 10" diameter	DAY
36	Bypass Pumping, Operation, 12" - 14" diameter	DAY
37	Bypass Pumping, Operation, 15" - 21" diameter	DAY
38	Bypass Pumping, Operation, 24" diameter	DAY

PAY ITEMS NO. 39-42 – NORMAL CLEANING

Payment for Normal Cleaning will be made per linear foot for the applicable pipe diameters listed in the Bid Form, regardless of depth or overall length. Measurement will be from the upstream manhole to the downstream manhole centerlines and based on the average debris depth. Payment shall include all materials, labor, equipment, and supplies necessary for Normal Cleaning, and specifically includes, but is not limited to, the complete removal and disposal of all accumulated debris within the pipe including sludge, dirt, rocks, sand, rubble, and other materials and obstructions, restoration, and all other appurtenant work as specified. Separate Pay Items are provided for Specialty Cleaning.

PAY ITEM	DESCRIPTION	UNITS
39	Normal Cleaning – 6” and 8” Diameter	LF
40	Normal Cleaning – 10” and 12” Diameter	LF
41	Normal Cleaning – 15” and 18” Diameter	LF
42	Normal Cleaning – 21” and 24” Diameter	LF

PAY ITEMS NO. 43-46 – SPECIALTY CLEANING

Payment will be made per linear foot for the applicable pipe diameters listed in the Bid Form, regardless of depth or overall length. Measurement will be based on a minimum of 50 linear feet of pipe, or the actual length of the Specialty Cleaning performed, but not necessarily for the entire pipe segment length. Specialty Cleaning of only joints within a pipe segment, or portion thereof, shall count as 2.5 feet of equivalent pipe length (For Example: 400 feet of 8" pipe with 5 ft joints, clean all joints =80 joints x 2.5 ft =200 feet of specialty cleaning). Equivalent joint length shall not be counted in addition to the length of a pipe segment, or portion thereof, where continuous Specialty Cleaning has been performed. Payment shall include all materials, labor, equipment, and supplies necessary for Specialty Cleaning of wastewater pipe, and specifically includes, but is not limited to, the complete removal and disposal of all accumulated debris within the pipe including grease, roots, joint sealant, tuberculation, and other adherent deposits through the use of special equipment, restoration, and all other appurtenant work as specified. Specialty Cleaning is in addition to Normal Cleaning as described in Pay Items 39 through 42.

PAY ITEM	DESCRIPTION	UNITS
43	Normal Cleaning – 6” and 8” Diameter	LF
44	Normal Cleaning – 10” and 12” Diameter	LF

45	Normal Cleaning – 15” and 18” Diameter	LF
46	Normal Cleaning – 21” and 24” Diameter	LF

PAY ITEMS NO. 47-49 – CHEMICAL SEALING OF HOST PIPE

Payment will be made per each host pipe for the applicable pipe diameters listed in the Bid Form, regardless of depth, overall length, or the number of infiltration points sealed. Measurement will be for a host pipe between manholes. Payment shall include all materials, labor, equipment and supplies necessary for the Chemical Sealing of Host Pipe, and specifically includes, but is not limited to, sealing excessive infiltration at pipe joints and other defects, disposal of debris, post-rehabilitation CCTV inspection video and log, restoration, and all other appurtenant work as specified. A separate Pay Item is provided Chemical Sealing - Grout material.

PAY ITEM	DESCRIPTION	UNITS
47	Chemical Sealing of Host Pipe – 10” Diameter and Less	EA
48	Chemical Sealing of Host Pipe – 12” and 15” Diameter	EA
49	Chemical Sealing of Host Pipe – 18” to 24” Diameter	EA

PAY ITEM NO. 50 – CHEMICAL SEALING - GROUT

Payment will be made per gallon. This Pay item is applicable only in conjunction with Pay Items 47 through 49. Payment shall include all materials, equipment and labor for chemically sealing excessive infiltration at pipe joints and other defects at specified locations for Chemical Sealing of Host Pipe prior to CIPP liner installation.

PAY ITEM NO. 51 – REMOVAL & SEALING OF PROTRUDING SERVICE CONNECTIONS

Payment will be made per each service regardless of the connection diameter or main pipe diameter. Payment shall include all materials, labor, equipment and supplies necessary for the Removal & Sealing of Protruding Connections, and specifically includes, but is not limited to, removing protruding lateral by internal cutting or other remote methods, grouting the main/lateral connection, disposal of debris, post-rehabilitation CCTV inspection video and log, restoration, and all other appurtenant work as specified.

PAY ITEM NO. 52 – ADDITIONAL ACCESS COST MAIN LINER

Payment for Additional Access Cost Main Liner will be made per each access. Measurement will be for a liner installation where both the upstream and downstream manhole are not readily accessible by standard equipment, e.g., when located in rear easements. Payment shall include all additional labor, equipment, materials and supplies to complete the CIPP Main Liner installation in locations with limited access. The Contractor shall attempt to schedule and stage the Work to permit the lining of multiple, contiguous pipe segments from an accessible manhole where feasible.

PAY ITEM NO. 53 – SERVICE RECONNECTION

Payment will be made per each service regardless of the connection diameter or host pipe diameter, and regardless of depth or overall length of the host pipe. Payment shall include all materials, labor, equipment, and supplies necessary for the service reconnection, and specifically includes, but is not limited to, reconnecting service lateral by internal cutting or other remote methods, grouting the annular space between the liner and host pipe at the lateral connection and the first 18-inches of the service lateral, post-rehabilitation CCTV inspection video and log, disposal of debris, restoration, and all other appurtenant work as specified. No additional payment will be made for service reconnections made by excavation.

PAY ITEM NO. 54 – CIPP LINER TESTING

Payment will be made per each test. Measurement will be for a set of tests completed for a liner installation and accepted by the Engineer. Payment shall include all materials, labor, equipment, supplies, and expenses necessary for CIPP Liner Testing, and specifically includes, but is not limited to, preparing samples, laboratory testing, submitting the results to the Engineer, and all other appurtenant work as specified. The cost to obtain and store samples for testing, and any retesting of samples is not included in this Pay Item.

WASTEWATER SYSTEM POINT REPAIRS

PAY ITEM NO. 1 – MOBILIZATION FOR ROUTINE RESPONSE

The work specified in this item consists of the preparatory work and operations in mobilizing for beginning work on the project This item includes, but is not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to and from the project site as a single occurrence per work site, and for the establishment of Subcontractor's temporary offices, buildings, safety equipment, first aid supplies, sanitary and other facilities, as required by these Specifications, special provisions, and State and local laws and regulations. The costs of bonds, permits and any required insurance, and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Labor and equipment travel time from/to the site is included in this pay item.

For routine work, as identified by the Engineer or his designee, the Contractor will be required to respond to the request of the Engineer, or designated representative within ten (10) calendar days of notification. The Scope of Work will be developed by Project manager and will be executed in accordance with the terms and conditions of this contract.

The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting and unloading, or under its own power to complete the job assignment or project.

PAY ITEM NO. 2 – MOBILIZATION FOR EMERGENCY RESPONSE

The work specified in this item consists of the preparatory work and operations in mobilizing for beginning work on the project This item includes, but is not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to and from the project site as a single occurrence per work site, and for the establishment of Subcontractor's temporary offices, buildings, safety equipment, first aid supplies, sanitary and other facilities, as required by these Specifications, special provisions, and State and local laws and regulations. The costs of bonds, permits and any required insurance, and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Labor and equipment travel time from/to the site is included in this pay item.

For emergency work, as identified by the Engineer or his designee, the Contractor will be required to respond to the request of the Engineer, or designated representative within ten (10) calendar days of notification. The Scope of Work will be developed by Project manager and will be executed in accordance with the terms and conditions of this contract.

The quantity of mobilization to be paid for under this item shall be measured as one unit each (EA) per job assignment. One (1) mobilization will be allowed for each job assignment, project, or work order no matter how many times the equipment must be relocated by loading, transporting and unloading, or under its own power to complete the job assignment or project.

PAY ITEMS NO. 3 – 15 – MAINTENANCE OF TRAFFIC

This work consists of maintaining traffic within the limits of the project for the duration of the construction period, including any temporary suspensions of the work. All Maintenance of Traffic (MOT) shall comply with FDOT Standard Plans Index 102 Series for Maintenance of Traffic. These pay items shall include labor and equipment to furnishing, installing and maintaining of traffic control and safety devices during construction; the construction and maintenance of any necessary detour facilities; providing necessary facilities for access to residences, businesses, pedestrian, schools, etc., control of dust and any other special requirements for safe and expeditious movement of traffic as may be called for on the plans. MOT shall include all of such facilities, devices and operations as are required for the safety and convenience of the public, as well as for minimizing public nuisance. The Contractor, however, shall not obstruct nor create a hazard to any traffic during the performance of the work and shall be responsible for repair of any damage to existing pavement or facilities caused by his operations. Traffic Control Devices include all types of barricades, arrow boards, signs, temporary pavement markers, lights, concrete barriers and permanent striping. All travel, equipment, labor overhead or any other associated expenses in transportation and setting out the MOT will be included in the price. All MOT line items for Multi-Lane work shall include all costs for items associated with the appropriate FDOT Index (no separate payment for signs, barricades, etc. included with index will be allowed).

Maintenance of Traffic (MOT) shall be measured as units of work, each/day (EA/DY), hourly (HR) or by linear foot (LF) accordingly completed and priced on an individual project basis. The lump sum price for each assignment will be based on the specific MOT requirements for the assignment. The Contractor shall provide the Engineer with a proposal for the MOT that includes a breakdown of the costs, which are included in the lump sum price, and receive written acceptance from the Engineer prior to the installation of the MOT.

PAY ITEM	DESCRIPTION	UNITS
3	Flagmen (Per-Flagmen)	HR
4	Multi Lane, Lane Closures (FDOT Index No. 613)	EA/DY
5	Multi Lane, Intersection (FDOT Index No. 615)	EA/DY
6	Arrow Boards - 5' Minimum Horizontal Size	EA/DY
7	Variable Message Board	EA/DY
8	Concrete Barrier (FDOT Index No. 100)	EA/DY
9	Low Profile Barrier (FDOT Index No. 120)	EA/DY
10	Signs in Work Zones	EA/DY
11	6" Solid line Thermo Plastic - Permanent	LF
12	24" Stop Bar, Solid, Thermo Plastic, Perm.	LF
13	6" Skip line (6'-10' Skip) Thermo Plastic-Perm.	LF
14	Barricades Type III, with Warning Lights	EA/DY
15	Barricades Type I or II, with Warning Lights	EA/DY

PAY ITEM NO. 16 – AS-BUILT SURVEY

Payment for all work included, but is not limited to, under this Pay Item shall represent full

compensation in accordance with the lump sum price bid for as-built record drawings or any other required certifications to put the proposed system in service. All items are subject to approval by the Engineer.

The quantity to be paid for under this pay item shall per as-built survey completed by a professional surveyor based on the linear foot of sewer main installed.

PAY ITEM NO. 17 – EXCAVATION, UNSUITABLE MATERIAL

The work specified in this item describes the removal of soil unsuitable for a proper foundation, encountered at trench grade. The unsuitable soil shall be removed and disposed of the full width of the trench and to the depth required by the Engineer and replaced with approved bedding material. The backfill shall be thoroughly compacted and shaped to form the pipe bed.

The quantity to be paid for under this Item shall be the volume in cubic yards (CY), computed by the average end area method, of the unsuitable material removed within the limits of depth shown on the Plans or as directed by the Engineer or his representative.

PAY ITEMS NO. 18 & 19 – SHEETING AND BRACING, ADDITIONAL

The quantities to be paid for under this item shall be the number of square feet of sheeting installed in addition to 6’ of depth. The quantities to be paid for under this item shall be based on the square feet of sheeting installed and accepted.

PAY ITEM	DESCRIPTION	UNITS
18	Sheeting & Bracing (Left in Place)	SF
19	Sheeting & Bracing, Pipe Trenches (Removed)	SF

PAY ITEMS NO. 20 - 25 – WELL POINT DEWATERING INITIAL

Measurement and payment of this pay item is based on the set up of dewatering equipment as required by the Contractor and allowed or directed by the Engineer to perform contracted work in accordance with the Technical Specifications. The work shall include all labor, equipment and materials, testing, and any required incidentals necessary to completely install, monitor and operate the dewatering system including the placement of up to twenty (20) well points to the various depths listed in the proposal per job assignment. The dewatering system shall stabilize the excavation and remain in operation until backfilling operations are complete. This pay item shall include the maintenance, repairs, pumps, fueling, oiling greasing, and other operational support procedures and supplies required for the operation of the system.

Well point dewatering is an authorized pay item only when the installation is below 6 feet in depth and site conditions warrant or on emergency response work where site conditions warrant as directed by the City representative.

The quantities to be paid for under this item shall be based on the depth of each (EA) dewatering

system per job assignment, installed and accepted.

PAY ITEM	DESCRIPTION	UNITS
20	Well Point Dewatering Initial – 6'-8' Deep	EA
21	Well Point Dewatering Initial – 8'-10' Deep	EA
22	Well Point Dewatering Initial – 10'-12' Deep	EA
23	Well Point Dewatering Initial – 12'-14' Deep	EA
24	Well Point Dewatering Initial – 14'-16' Deep	EA
25	Well Point Dewatering Initial – >16' Deep	EA

PAY ITEMS NO. 26 – 31 – WELL POINT DEWATERING ADDITIONAL

This item provides all labor, materials and equipment for the placement and operation of additional well points over and above the twenty (20) well points paid for under Pay Items 20-25. The work includes connection of the well points to the dewatering pumping equipment.

The quantity to be paid under this item will be the actual number of each (EA) well points placed and operated in the work as directed by Engineer for the various depths listed in the proposal less the twenty (20) paid for under Pay Items 20-25.

PAY ITEM	DESCRIPTION	UNITS
26	Well Point Dewatering Additional – 6'-8' Deep	EA
27	Well Point Dewatering Additional – 8'-10' Deep	EA
28	Well Point Dewatering Additional – 10'-12' Deep	EA
29	Well Point Dewatering Additional – 12'-14' Deep	EA
30	Well Point Dewatering Additional – 14'-16' Deep	EA
31	Well Point Dewatering Additional – >16' Deep	EA

PAY ITEMS NO. 32 – 35 – JACK & BORE

The work consists of furnishing all labor, equipment and materials and installing the crossing listed on the Bid Form by the jack and bore method in accordance with the specifications. The unit price shall include all costs necessary to install the crossing at the specified depth and size, including survey layout (based upon property monuments established by others), protection of property, materials, dewatering, pavement cutting, launching and receiving pits, exploratory pits, restrained joints, carrier pipe, tracer wire, tracer wire testing, casing pipe, casing spacers, casing end seals, fitting material including joints and jointing material, bracing, utility crossings, barricades, clearing, grubbing and stripping of the right-of-way, trenching, bedding and backfilling, protection of existing utilities; pigging, flushing and cleaning, pressure testing and As-built documentation. Surface restoration if specified or directed, will be paid for under other Pay Items.

The quantity for furnishing and installing the pipe or casing shall be made on a per linear foot basis as measured horizontally above the centerline of the casing including the length of four (4) feet beyond the edge of pavement or back of the concrete curb from each side of the road or driveway.

PAY ITEM	DESCRIPTION	UNITS
32	Jack & Bore 12” x 0.188” Steel Casing (6” GS)	LF
33	Jack & Bore 16” x 0.219” Steel Casing (8” GS)	LF
34	Jack & Bore 20” x 0.250” Steel Casing (10” GS)	LF
35	Jack & Bore 24” x 0.281” Steel Casing (12” GS)	LF

PAY ITEMS NO. 36 – 41 – DIRECTIONAL DRILL

The work consists of furnishing and installing underground sewer mains using the horizontal directional drilling (HDD) method of installation. This work shall include all services, equipment, materials, labor, installation of two 14 gauge minimum tracer wires, tracer wire testing, appurtenances, DI/HDPE mechanical joint adapters, pipe and joint restraints for connections to fittings, materials above or below ground along pipeline alignment; joints and jointing materials, bentonite clay slurry seal, launching and receiving pits, exploratory pits; bracing, bedding and backfill, disposal of spoil; pressure testing; pigging, flushing, cleaning erosion protection and control, surface grading, and all other related and necessary materials for the complete and proper installation, testing, and restoration of underground sewer mains

Measurement for payment for furnishing and installing HDD pipe for drill depths up to 20-foot-deep shall be made on a per linear foot (LF) basis as measured horizontally on the ground above the pipe centerline through valves and fittings for all pipe. Measurement for payment for finishing and installation HDD pipe for drill depths greater than 20-foot depth shall be made on a per linear foot (LF) basis of the actual length of pipe installed.

PAY ITEM	DESCRIPTION	UNITS
36	2” Directional Drill HDPE DR 9, IPS	LF
37	4” Directional Drill HDPE DR 11, DIPS	LF
38	6” Directional Drill HDPE DR 11, DIPS	LF
39	8” Directional Drill HDPE DR 11, DIPS	LF
40	10” Directional Drill HDPE DR 11, DIPS	LF

PAY ITEMS NO. 42 – 146 – GRAVITY SANITARY SEWER

The work consists of furnishing all labor, equipment and materials for installing pipe as shown on the plans or directed by the Engineer. All ductile iron pipe shall have polyethylene encasement. The unit price shall include all costs necessary to install the pipe including survey layout (based upon property monuments established by others), clearing and grubbing, excavation, sheeting/shoring for excavation up to 6-ft deep, bracing, dewatering for excavations up to 6-ft deep, structural fill, material, polyethylene wrap on ductile iron pipe, testing, pavement cutting, trenching, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, field layout, etc. Restoration will be paid for under separate pay items. Work performed for Point Repairs of gravity sewer pipes will be paid for under separate pay items.

The quantities of pipe to be paid for under this item shall be the length in linear feet of pipe measured along the centerline of the pipe through manholes in place, completed, tested, and accepted.

PAY ITEM	DESCRIPTION	UNITS
42	6" PVC Pipe, C-900 DR 18 (Gravity Sewer) 0' - 6' Depth	LF
43	6" PVC Pipe, C-900 DR 18 (Gravity Sewer) 6' - 8' Depth	LF

PAY ITEM NO. 147 – INSTALL PVC CLEANOUT

The work consists of furnishing all labor, equipment, and materials for installation of a new PVC riser pipe and cleanout at the ROW line (or other location as directed by the Engineer) on existing sewer lateral. The existing sewer lateral material may be PVC, Vitrified Clay, or DIP pipe. The unit price shall include all costs necessary to install riser pipe and cleanout including survey layout (based upon property monuments established by others), material, polyethylene wrap on ductile iron pipe, fittings, pipe cutting, wye unit on main, installation of riser pipe and cleanout, pavement cutting, trenching, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, field layout, restoration, sodding, etc. The pay item shall include cleanout installation up to ten (10) feet in depth.

The quantities of pipe to be paid for under this item shall be each measured and inspected in place, completed, and accepted.

PAY ITEM NO. 148 – REPLACE PVC CLEAN OUT WITH MANHOLE STRUCTURE

The work consists of furnishing all labor, equipment, and materials for the replacement of an existing PVC clean out with a concrete manhole. The unit price shall include all costs necessary to replace clean out including survey layout (based on property monuments established by others), material, fittings, pipe cutting, concrete manhole installation, pavement cutting, trenching, dewatering for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, field layout, restoration, sodding, etc. The pay item shall include the removal of clean outs and installation of manholes up to four (4) feet in depth.

The quantities of manholes to be paid for under this item shall be each measured and inspected in place, completed, and accepted.

PAY ITEMS NO. 149 – 153 – REMOVE PIPE (GRAVITY SEWER)

The work consists of furnishing all labor and equipment to remove and dispose of out of service mains. Unless otherwise indicted by the Engineer or his representative, the pipe removed becomes the property of the Contractor. The unit price shall include all costs necessary to remove the pipe (including fittings, valves, reverse deadmen, etc.) including pavement cutting, trenching, replacement of base material, dewatering for excavations up to 6- ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, restoration of pavement and grass, etc.

The quantities of pipe removal to be paid for under this Item shall be the length in linear feet (LF) of pipe measured along the centerline of the pipe through valves and fittings actually removed.

PAY ITEM	DESCRIPTION	UNITS
149	Remove Pipe 2” or 4” (Gravity Sewer)	LF
150	Remove Pipe 6” or 8” (Gravity Sewer)	LF
151	Remove Pipe 10” or 12” (Gravity Sewer)	LF
152	Remove Pipe 15”, 16”, or 18” (Gravity Sewer)	LF
153	Remove Pipe 21” or 24” (Gravity Sewer)	LF

PAY ITEMS NO. 154 – 167 – INSTALL OR ADJUST SERVICE LATERAL

The work consists of furnishing all labor, equipment, by-pass operations, customer coordination and materials for installation of a new or relocating a sanitary sewer service lateral found to be in conflict with proposed improvement or as directed by the Engineer. The unit price shall include all costs necessary to install up 30 linear feet of service pipe including survey layout (based upon property monuments established by others), material, polyethylene wrap on ductile iron pipe, fittings, pipe cutting, wye unit on main, installation of riser pipe and cleanout at the ROW line, pavement cutting, trenching, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, field layout, etc. Service pipe lengths in excess of 30 feet will be paid for as Gravity Sewer Pipe (Pay Items 41-145). Restoration will be paid for under separate pay items.

The quantities of pipe to be paid for under this item shall be each measured and inspected in place, completed, and accepted.

PAY ITEM	DESCRIPTION	UNITS
154	4" Pipe - Install or Adjust Service Lateral 0'-6' Deep	EA
155	4" Pipe - Install or Adjust Service Lateral 6'-8' Deep	EA
156	4" Pipe - Install or Adjust Service Lateral 8'-10' Deep	EA
157	4" Pipe - Install or Adjust Service Lateral 10'-12' Deep	EA

158	4" Pipe - Install or Adjust Service Lateral 12'-14' Deep	EA
159	4" Pipe - Install or Adjust Service Lateral 14'-16' Deep	EA
160	4" Pipe - Install or Adjust Service Lateral 16'-18' Deep	EA
161	6" Pipe - Install or Adjust Service Lateral 0'-6' Deep	EA
162	6" Pipe - Install or Adjust Service Lateral 6'-8' Deep	EA
163	6" Pipe - Install or Adjust Service Lateral 8'-10' Deep	EA
164	6" Pipe - Install or Adjust Service Lateral 10'-12' Deep	EA
165	6" Pipe - Install or Adjust Service Lateral 12'-14' Deep	EA
166	6" Pipe - Install or Adjust Service Lateral 14'-16' Deep	EA
167	6" Pipe - Install or Adjust Service Lateral 16'-18' Deep	EA

PAY ITEMS NO. 168 – 177 – SEWER LINE MANHOLE CONNECTION

The work consists of all labor, equipment, investigative digging, and materials for repair of an existing connection into manhole wall or to install a new connection. All core drills shall be of sufficient diameter to accommodate pipe connection. Manhole connections may be either gravity sewer or sewer forcemain. All connections shall include a water stop or boot connection. Payment shall also include core drills, masonry or concrete patching, fiberglass and interior surface patching, shoring, dewatering for excavations up to 6-ft deep, backfill, refill, compaction operations, and compaction testing or re-testing. All sewer forcemain connections shall include installation of a drop bowl, paid for under Pay Items 177-186. The work does not include excavation or surface restoration which, if required, will be paid for, or is part of the work, under other Pay Items.

The quantities of connections into manholes to be paid under this item shall be each measured in place, completed, inspected, and accepted.

PAY ITEM	DESCRIPTION	UNITS
168	2" Sewer Line Manhole Connection	EA
169	4" Sewer Line Manhole Connection	EA
170	6" Sewer Line Manhole Connection	EA
171	8" Sewer Line Manhole Connection	EA
172	10" Sewer Line Manhole Connection	EA
173	12" Sewer Line Manhole Connection	EA
174	16" Sewer Line Manhole Connection	EA
175	18" Sewer Line Manhole Connection	EA
176	21” Sewer Line Manhole Connection	EA
177	24” Sewer Line Manhole Connection	EA

PAY ITEMS NO. 178 – 187 – INSIDE DROP CONNECTION

This item provides for all labor, equipment and material to install a PVC drop connection inside an existing manhole. This work includes all interior piping, drop bowl and any masonry or concrete

and coatings patching required to complete a repair connection or install a new drop connection to an existing manhole in accordance with Technical Specifications.

The quantity to be measured for payment under this Pay Item will be the actual number each (EA) of manhole inside drop connections completed and accepted.

PAY ITEM	DESCRIPTION	UNITS
178	2" Inside Drop Connection	EA
179	4" Inside Drop Connection	EA
180	6" Inside Drop Connection	EA
181	8" Inside Drop Connection	EA
182	10" Inside Drop Connection	EA
183	12" Inside Drop Connection	EA
184	15"/16" Inside Drop Connection	EA
185	18" Inside Drop Connection	EA
186	21" Inside Drop Connection	EA
187	24" Inside Drop Connection	EA

PAY ITEM NO. 188 – GROUTING OUT OF SERVICE PIPE (FORCE MAIN)

This item provides for all labor, equipment and material to install chemical grout or flowable fill into an existing pipe to be abandoned. Prior to grout filling the line, the Contractor shall verify that no live services remain connected to the line. The underground conduit (pipe, waterline, sewer line, storm drain line, etc.) be completely filled with a low strength cement grout (or flowable fill). In order to achieve this, the grout to be pumped into the line shall have a consistency that will permit forced flow into the entire length of line. Blocking the line by intermediate excavation and gravity flow concrete or grout is NOT acceptable. The existing line to be grout filled shall be exposed and plugged with concrete bulkheads or plugs at both ends. The grout shall be pumped through the pipe until the grout is visible at the other end of the underground conduit. No more than 15 psi shall be used to pump the grout mixture, and care should be used to avoid grout filling adjoining voids.

The quantities of pipe to be paid for under this Item shall be the volume in cubic yards of the inside pipe area times the length of pipe. No payment will be made for material that escapes the pipe or ends enclosures.

PAY ITEMS NO. 189 – 191 – DISCONNECT & PLUG PIPE

The work consists of furnishing all labor, equipment and materials to disconnect and cap/plug sewer mains that will remain in or out of service. The unit price shall include all nuts, bolts, gaskets, caps/plugs, restraint devices, thrust blocks, cutting existing pipe, removal of valve boxes, blow-off assemblies, scheduling and notification of service interruptions and all other operations required to disconnect and cap/plug the water mains.

The quantity of disconnect and cap/plug water mains to be paid for under this item shall be the

number each (EA) measured in place, completed and accepted.

PAY ITEM	DESCRIPTION	UNITS
189	Disconnect & Plug 2" or 4" Pipe	EA
190	Disconnect & Plug 6" or 8" Pipe	EA
191	Disconnect & Plug 10" or 12" Pipe	EA

PAY ITEMS NO. 192 – 202 – SANITARY SEWER FORCE MAIN

The work consists of furnishing all labor, equipment and materials and installing sanitary forcemain pipe by the open-cut method in accordance with the specifications.

The unit price shall include all costs necessary to install the pipe up to 6 feet in depth, including: survey layout (based upon property monuments established by others); protection of property; protection of existing utilities, mailboxes and service connections; erosion protection (silt fence, hay bales, floating turbidity barriers, or other means, as required); materials, pavement cutting, extra pipe fitting material including joints/jointing material/restraints; shoring, sheeting for excavations up to 6-ft deep; bracing; utility crossings; barricades; clearing; grubbing and stripping of the right-of-way; trenching, bedding and backfilling; pigging; flushing and cleaning; pressure testing. Fittings shall be included in the cost of 2” pipe. Dual tracer wire and tracer wire testing shall be included in the price for PVC pipe items. Polyethylene encasement shall be included in the bid price for DI pipe items. Restoration will be paid for under separate pay items.

Additional payment will be made for extra depth installation over six feet under a separate pay item. Well point dewatering is an authorized pay item only when the installation is below 6 feet in depth and site conditions warrant; all dewatering up to 6 feet in depth is included in this pay item.

The quantities of pipe to be paid for under this Item shall be the length in linear feet of pipe measured along the centerline of the pipe in place, completed, tested, and accepted.

PAY ITEM	DESCRIPTION	UNITS
192	2" PVC Restrained Joint Pipe & Fittings FM, SDR 21	LF
193	4" PVC Pipe, C-900 DR 18 (Force Main)	LF
194	4" PVC Restrained Joint Pipe & Fittings FM, C-900 DR 18	LF

202	12" PVC Restrained Joint Pipe & Fittings FM, C-900 DR 18	LF

PAY ITEMS NO. 203 – 208 – RESTRAINED JOINTS

The work specified in this item describes measurement and payment for furnishing all labor, equipment and materials and installing restrained joint hardware including mechanical joint restrainers, bell restrainers and PVC restrainers complete including bolts, gaskets, rods, special flanges, color coded polyethylene encasement , testing, acceptance, and ready for service. Restrained joints for pipe associated with fittings per the design of new pipe shall be paid for under separate pay item. This item shall only be used to restrain existing in-service pipelines or to install additional restraints above the amount specified, as directed by the Engineer or his representative.
`

The quantities of retrained joints to be paid for under this item shall be the number of each (EA) measured in place and accepted. No restrained joint hardware or any part of a restrained joint hardware shall be included for payment under more than one Item.

PAY ITEM	DESCRIPTION	UNITS
203	2" Restrained Joints	EA
204	4" Restrained Joints	EA
205	6" Restrained Joints	EA
206	8" Restrained Joints	EA
207	10" Restrained Joints	EA
208	12" Restrained Joints	EA

PAY ITEMS NO. 209 – 211 - FORCE MAIN OVER DEPTH EXCAVATION

The work consists of furnishing all labor and equipment to excavate additional depth greater than 6 feet depth for installation of sewer forcemain pipe by the open-cut method in accordance with the specifications. The unit price shall include all costs necessary to excavate additional depth over 6 feet including: survey layout (based upon property monuments established by others); protection of property, existing utilities, mailboxes and service connections; erosion protection (silt fence, hay bales, floating turbidity barriers, or other means, as required); materials; pavement cutting; bracing; utility crossings; barricades; clearing; grubbing and stripping of the right-of-way; trenching, bedding; and backfilling. Well point dewatering and sheeting are authorized pay items when the installation is below 6 feet in depth and site conditions warrant.

Measurement for payment for excavating each additional foot of depth to install pipe or appurtenances shall be made on a per linear foot (LF) basis for each additional vertical foot of depth over 6 feet as measured horizontally above the pipe centerline through valves and fittings.

PAY ITEM	DESCRIPTION	UNITS
209	2"-4" Forcemain Pipe and Appurtenances - Over Depth Excavation	LF

210	6"-8" Forcemain Pipe and Appurtenances - Over Depth Excavation	LF
211	10"-12" Forcemain Pipe and Appurtenances - Over Depth Excavation	LF

PAY ITEMS NO. 212 – 214 – REMOVE OUT OF SERVICE PIPE (FORCE MAIN)

The work consists of furnishing all labor and equipment to remove and dispose of out of service mains. Unless otherwise indicted by the Engineer or his representative, the pipe removed becomes the property of the Contractor. The unit price shall include all costs necessary to remove the pipe (including fittings, valves, reverse deadmen, etc) including pavement cutting, trenching, replacement of base material, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, backfilling, etc. Restoration will be paid for under separate pay items.

The quantities of pipe removal to be paid for under this Item shall be the length in linear feet (LF) of pipe measured along the centerline of the pipe through valves and fittings actually removed.

PAY ITEM	DESCRIPTION	UNITS
212	Remove Out of Service Pipe 2" or 4" (Force Main)	LF
213	Remove Out of Service Pipe 6" or 8" (Force Main)	LF
214	Remove Out of Service Pipe 10" or 12" (Force Main)	LF

PAY ITEMS NO. 215 – 220 – SLEEVED CONNECTION

The work consists of furnishing all labor, equipment and materials for installing sleeve connections not included in other items. The unit price shall include notification of shutdown to property owners, establishing alignment, moving and aligning old and new pipe, cleaning and cutting old pipe, sterilization, restraint jointing materials, color-coded polyethylene encasement, and all other operations required to make the connection. All connections shall include the cost of the sleeve or coupling, joint restraints and removal & disposal of up to twenty feet of existing main. Valves, pipe, additional joint restraints on existing main and fittings for connections shall be paid for under separate pay items.

The quantities of sleeve connection to be paid for under this item shall be the number each measured in place, completed, tested, and accepted

PAY ITEM	DESCRIPTION	UNITS
215	2" Sleeved Connection	EA
216	4" Sleeved Connection	EA
217	6" Sleeved Connection	EA
218	8" Sleeved Connection	EA
219	10" Sleeved Connection	EA
220	12" Sleeved Connection	EA

PAY ITEMS NO. 221 – 223 – REVERSE DEADMAN

The work covered by this item consists of reverse deadman installation for mains up to 12 inch in diameter. The installation shall include the corresponding size restrained joint as shown in the standard detail. This pay item includes: the furnishing of all materials and for the proper installation of the reverse deadman in strict accordance with the appropriate pipe specifications, excavation, erosion protection and control, backfill, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, shoring, surface grading, disposal of water, appropriate sized joint restraint, and concrete, all tools, equipment, labor, and materials necessary to install the reverse deadman as shown, specified or required for the proper completion of the work. Concrete shall cure for 72 hours or as determined by concrete mix design before applying force.

The quantities of reverse dead-man construction to be paid under this item shall be each measured in place, inspected, cured, and accepted.

PAY ITEM	DESCRIPTION	UNITS
221	Reverse Deadman for 2" or 4" Pipe	EA
222	Reverse Deadman for 6" or 8" Pipe	EA
223	Reverse Deadman for 10" or 12" Pipe	EA

PAY ITEM NO. 224 – DUCTILE IRON FITTINGS

The work consists of furnishing all labor, equipment and materials for installing ductile iron fittings not included in other items. All fittings shall include and be installed with joint restraints. The unit price includes furnishing and installing all fittings and materials above or below ground along the pipeline alignment; joints, joint restrainers, and jointing materials; bracing, shoring, and sheeting; dewatering, clearing, grubbing, and stripping; trenching, bedding and backfill; constructing the specified protection and adjusting of existing above ground and underground utilities and service connections; disposal of spoil; color coded polyethylene encasement; pressure testing; erosion protection and control, and all other related and necessary materials, work and equipment required to construct a complete, operable pipeline. The cost of furnishing and installing joint restraints shall be included in the unit price for Ductile Iron Fittings.

The quantities of ductile iron fittings to be paid for under this Item shall be the weight of the fitting required as established weight per fitting, including bolts, in tons (2,000 pounds) measured in place, completed, tested, and accepted. The weight of gaskets, jointing materials, etc., shall not be included in the computation of ductile iron fitting tonnage.

PAY ITEMS NO. 225 & 226 – 2” SS 316 AIR RELEASE VALVE ASSEMBLIES

The work consists of installing 2” SS 316 air release assemblies on sanitary sewer force mains. The unit bid price shall include installing the air release assembly, testing, excavation, backfill, bracing, shoring, sheeting for excavations up to 6-ft deep, dewatering for excavations up to 6-ft deep, surface grading, erosion protection and control, furnishing and installing tap saddle, tap, corporation stop, ball corporation, curb stop, automatic air release valve, enclosure, testing, miscellaneous brass nipples and fittings, and incidental items required to install a new assembly

as shown on the standard detail. All assemblies shall include tracer wire access, drainage gravel and miscellaneous nipples and fittings as shown in the standard details, filter fabric, valve identification tags, paint reference stripe on curb, painting of valve cover and meter boxes.

Measurement shall be on an individual basis for each (EA) assembly installed and accepted.

PAY ITEM	DESCRIPTION	UNITS
225	2" SS 316 Air Release Assembly (Underground)	EA
226	2" SS 316 Air Release Assembly (Aboveground)	EA

PAY ITEMS NO. 227 – 232 – RESILIENT WEDGE GATE VALVE

The work consists of furnishing all labor, equipment and materials for installing a valve not included in other items. The unit bid price includes furnishing and installing valves, valve boxes and covers, color coded polyethylene encasement, tracer wire access, filter fabric, valve identification tags, paint reference stripe on curb, painting of valve cover, concrete valve box pad, extension stems, joint restraints, pressure testing, excavation, backfill, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, shoring, surface grading and incidental construction associated with these items.

The quantities of valves to be paid for under this Item shall be the number each measured in place, completed, tested, and accepted.

PAY ITEM	DESCRIPTION	UNITS
227	2" RWGV (Resilient Wedge Gate Valve) & Box	EA
228	4" RWGV & Box C 515	EA
229	6" RWGV & Box C 515	EA
230	8" RWGV & Box C 515	EA
231	10" RWGV & Box C 515	EA
232	12" RWGV & Box C 515	EA

PAY ITEMS NO. 233 & 234 – ADJUST VALVE BOX TO FINISHED GRADE

The work consists of furnishing all labor, equipment, and materials for the vertical adjustment of an existing valve box and cover to match proposed finish grade. The unit price shall include placement of the valve cover to finish grade as shown on plans or directed by the Engineer.

the quantity of valve box and cover adjustments to be paid for under this item shall be the number each measured in place, on grade, inspected, and accepted.

PAY ITEM	DESCRIPTION	UNITS
233	Adjust Valve Box to Finished Grade (In Pavement)	EA
234	Adjust Valve Box to Finished Grade (Outside of Pavement)	EA

PAY ITEMS NO. 235 – 239 – LINE STOPS

The work consists of furnishing all labor, equipment and materials, including but not limited to dewatering for excavations up to 6-ft deep, excavation, sheeting for excavations up to 6-ft deep, shoring, preliminary measurements of the pipe prior to ordering the saddle, installing concrete cradle and support, line stop tapping sleeve, valve, and performing line stop installation with and for the duration of the new valve installation, pressure testing of tap saddle/sleeve, polyethylene wrap, and valve box for constructing a line stop on an existing sewer main and the adjustment of its valve box to finish grade. If a by-pass line stop installation is required, the by-pass piping will be paid for under line items for piping.

The quantities of Line Stops to be paid for under this Item shall be the number each measured in place, completed, tested, and accepted.

PAY ITEM	DESCRIPTION	UNITS
235	4" Line Stop	EA
236	6" Line Stop	EA
237	8" Line Stop	EA
238	10" Line Stop	EA
239	12" Line Stop	EA

PAY ITEMS NO. 240 – 259 – TAPPLING SLEEVE/SADDLE VALVE & BOX

The work consists of the installation of tapping saddle or sleeve and associated valves. The quantity to be paid for under this item is the number of connections acceptably installed. Cut in tee and valve may be required in some locations due to utility conflicts and will be paid for as equal sized tap. The unit bid price includes all materials and installation from the point of connection to the main line including scheduling and notification of service interruptions, furnishing and installing tapping saddle, color coded polyethylene encasement, valves, taps, fittings, piping, joint restraints, valve boxes and covers, concrete valve box pads, valve extension stems, tracer wire access, valve identification tags, filter fabric, paint reference stripe on curb, painting of valve box cover, excavation, erosion protection and control, backfill, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, shoring, surface grading, disposal of water, pressure testing and all other related, necessary, and incidental materials, work and equipment required to complete the connection. All joints shall be restrained.

The quantities of valves/taps to be paid for under this Item shall be the number each measured in place, completed, tested, and accepted.

PAY ITEM	DESCRIPTION	UNITS
240	4" x 2" Tapping Saddle Valve & Box	EA
241	4" x 4" Tapping Sleeve Valve & Box	EA
242	6" x 2" Tapping Saddle Valve & Box	EA
243	6" x 4" Tapping Sleeve Valve & Box	EA
244	6" x 6" Tapping Sleeve Valve & Box	EA

245	8" x 2" Tapping Saddle Valve & Box	EA
246	8" x 4" Tapping Sleeve Valve & Box	EA
247	8" x 6" Tapping Sleeve Valve & Box	EA
248	8" x 8" Tapping Sleeve Valve & Box	EA
249	10" x 2" Tapping Saddle Valve & Box	EA
250	10" x 4" Tapping Sleeve Valve & Box	EA
251	10" x 6" Tapping Sleeve Valve & Box	EA
252	10" x 8" Tapping Sleeve Valve & Box	EA
253	10" x 10" Tapping Sleeve Valve & Box	EA
254	12" x 2" Tapping Saddle Valve & Box	EA
255	12" x 4" Tapping Sleeve Valve & Box	EA
256	12" x 6" Tapping Sleeve Valve & Box	EA
257	12" x 8" Tapping Sleeve Valve & Box	EA
258	12" x 10" Tapping Sleeve Valve & Box	EA
259	12" x 12" Tapping Sleeve Valve & Box	EA

PAY ITEMS NO. 260 – 269 – MANHOLES

The work consists of furnishing all labor, equipment, by-pass operations, customer coordination and materials for constructing a sanitary sewer manhole at location shown on plans or as directed by the Engineer. The unit price shall include all costs necessary to construct the manhole including survey layout (based upon property monuments established by others), material, pavement cutting, trenching, replacement of base material, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, bracing, utility crossings, barricades, clearing of the right-of-way, protection of property, and backfilling. The depth of the manhole will be measured from the top of the cover down to the invert of the outlet sewer pipe. Excavation and well point dewatering for pipeline Manhole installations are separate pay items.

The quantities of manholes to be paid under this item shall be vertical feet of depth measured in place, completed, inspected, and accepted.

PAY ITEM	DESCRIPTION	UNITS
260	4' Dia. - Precast Manhole Standard	VF
261	4' Dia. - Precast Manhole Inside Drop	VF
262	4' Dia. - Precast Manhole Outside Drop	VF
263	5' Dia. - Precast Manhole Standard	VF
264	5' Dia. - Precast Manhole Inside Drop	VF
265	5' Dia. - Precast Manhole Outside Drop	VF
266	5' Dia. - Precast Air Release Manhole	VF
267	6' Dia. - Precast Manhole Standard	VF
268	6' Dia. - Precast Manhole Inside Drop	VF
269	6' Dia. - Precast Manhole Outside Drop	VF

PAY ITEM NO. 270 – REMOVAL OF EXISTING MANHOLE

This work item shall provide all labor, equipment and materials for the removal of existing manholes up to four feet in depth and plugging of existing lines with brick and mortar. The work does not include excavation, surface restoration, sheeting, MOT, or well point dewatering which, if required, will be paid for under other Pay Items.

The quantity to be measured for payment under this Pay Item will be the actual number of manhole removals completed and accepted up to four (4) feet in depth.

PAY ITEM NO. 271 – REMOVAL OF EXISITING MANHOLE ADDITIONAL

The work consists of all work contained in Pay Item Remove Existing Manholes and provides for manhole removal for depths greater than four (4') feet deep.

The quantity to be measured for payment under this Pay Item will be the actual length in vertical feet of additional manhole removal in the work less the four (4) feet paid for under other Pay Items

PAY ITEMS NO. 272 – 279 – INITIAL EXCAVATION

The work consists of furnishing all labor, equipment, materials, traffic control and supervision necessary for the excavation exposing up to 30 linear feet of existing sanitary sewer gravity or forcemain pipe as measured along the pipe in a horizontal plane. The unit price shall contain all costs necessary to expose the pipe, temporary sheeting/shoring/bracing up to 6-ft deep, dewatering, well point dewatering up to 6' deep, crushed stone, stabilization and protection of existing utilities, property protection, backfilling, compaction, and all other related and necessary materials required to expose the pipe to be repaired in accordance with the Contract Documents. There shall be one Initial Excavation per work site unless otherwise approved by the Engineer. The following items, if required or as determined by the Engineer, will be paid for under other Contract Pay Items: pipeline point repair, pipeline offset relocation, select backfill material, well point dewatering, by-pass pumping, surface restoration, sheeting for excavations greater than 6-ft deep, and pavement restoration.

The quantity to be paid for under this item shall be the actual number of each (EA) per job assignment for initial excavation made in conjunction with exploration or pipe repair at the various cut ranges listed. The cut for Initial Excavation shall be the average of the pipe cut (grade elevation minus the pipe invert elevation) measured at each end of the trench, which measures 30 feet in length or less in conjunction of pipeline point repair or relocation offset.

PAY ITEM	DESCRIPTION	UNITS
272	Initial Excavation - 0'-6' Deep	EA
273	Initial Excavation - 6'-8' Deep	EA
274	Initial Excavation - 8'-10' Deep	EA
275	Initial Excavation - 10'-12' Deep	EA
276	Initial Excavation - 12'-14' Deep	EA
277	Initial Excavation - 14'-16' Deep	EA
278	Initial Excavation - 16'-18' Deep	EA
279	Initial Excavation - 18'-20' Deep	EA

PAY ITEMS NO. 280 – 287 – ADDITIONAL EXCAVATION

The work consists of furnishing all labor, equipment, materials, traffic control and supervision necessary for the excavation to expose existing pipe as measured in the horizontal plane in excess of the original 30 linear feet included in Initial Excavation pay item. This Pay Item is applicable only in conjunction with, and includes the same work as listed in Pay Items 271-278.

Measurement of payment shall be the actual number of linear feet (LF) per job assignment for additional excavations made in conjunction with exploration of pipeline point repair or relocation offset.

PAY ITEM	DESCRIPTION	UNITS
280	Additional Excavation - 0'-6' Deep	LF
281	Additional Excavation - 6'-8' Deep	LF
282	Additional Excavation - 8'-10' Deep	LF
283	Additional Excavation - 10'-12' Deep	LF
284	Additional Excavation - 12'-14' Deep	LF
285	Additional Excavation - 14'-16' Deep	LF
286	Additional Excavation - 16'-18' Deep	LF
287	Additional Excavation - 18'-20' Deep	LF

PAY ITEMS NO. 288 – 295 – BYPASS PUMPING SETUP & OPERATION

This item provides for set up and operation of by-pass sewage pumping equipment and temporary piping as required and as described in the Standard Technical Specifications. This Pay Item is applicable on projects or repairs that have high flow or require an over night by pass operation.

The quantity to be measured for payment under this Pay Item will be the actual number of by-pass pumping set ups and operations, per part of day, required by the Engineer in the work. The minimum measurement for this pay item is eight (8) hours or 0.333 days and is measured from the time that the sewage is actually by-passed. This eight (8) hour minimum (0.333 days) includes full compensation for set up and operation for up to the first eight (8) hour period. Additional time will be in tenths of the day or twenty-four (24) hour period. The quantities determined shall be paid per day (DAY) or portion of day of by-pass pumping set up and operation.

PAY ITEM	DESCRIPTION	UNITS
288	Wastewater Bypass Pumping, Set up, 6" - 10" diameter	EA
289	Wastewater Bypass Pumping, Set up, 12" - 14" diameter	EA
290	Wastewater Bypass Pumping, Set up, 15" - 21" diameter	EA
291	Wastewater Bypass Pumping, Set up, 24" diameter	EA
292	Wastewater Bypass Pumping, Operation, 6" - 10" diameter	DAY

293	Wastewater Bypass Pumping, Operation, 12" - 14" diameter	DAY
294	Wastewater Bypass Pumping, Operation, 15" - 21" diameter	DAY
295	Wastewater Bypass Pumping, Operation, 24" diameter	DAY

PAY ITEMS NO. 296 – 311 – GRAVITY SEWER POINT REPAIR

This item provides all labor, equipment and materials for the replacement of up to twenty (20) linear feet of gravity sewer pipe with PVC or Ductile Iron pipe (Material as directed by the Engineer at each occurrence). The existing sewer pipe may be Vitrified Clay, PVC, Ductile Iron, Cast Iron, or Concrete gravity sewer main. The work includes repair sleeves, cutting existing pipe, pipe bedding, new replacement pipe, disposal of existing pipe, and reconnection of lateral connections to sewer main. This item also includes maintaining of flow in low flow systems that can be accomplished with up to a four (4) inch mud hog, diaphragm or centrifugal type pump and lay flat hose or temporarily blocking the sewer for a period of time to facilitate the repair. The cost of lengths of pipe greater than twenty (20) linear feet will be paid for under Pay Items 209-324. The work does not include sheeting or well point dewatering which, if required, will be paid for, or is part of the work, under other Pay Items.

The quantity to be paid under this item will be in accordance with each (EA) pipe size to be repaired as noted in the contract pay items.

PAY ITEM	DESCRIPTION	UNITS
296	6" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
297	6" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
298	8" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
299	8" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
300	10" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
301	10" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
302	12" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
303	12" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
304	15"/16" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
305	15"/16" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
306	18" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA

307	18" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
308	21" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
309	21" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA
310	24" Dia. Pipe Gravity Sewer Point Repair (DI Replacement Pipe)	EA
311	24" Dia. Pipe Gravity Sewer Point Repair (PVC Replacement Pipe)	EA

PAY ITEMS NO. 312 – 327 – GRAVITY SEWER POINT REPAIR – ADDITIONAL LENGTH

This item provides all labor, equipment and materials for the additional length of replacement gravity sewer pipe with PVC or Ductile Iron pipe (Material as directed by the Engineer at each occurrence). This Pay Item provides for an additional thirty (30) feet of replacement pipe. This Pay Item is used only in conjunction with Pay Items 295-310 and contains the same work therein described. Pipe point repairs requiring greater than fifty (50) feet of pipe will be constructed under separate Contract Pay Items.

The quantity to be paid under this item will be in accordance with the linear feet (LF) installed above twenty (20) linear for each pipe size to be repaired as noted in the contract pay items.

PAY ITEM	DESCRIPTION	UNITS
312	6" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
313	6" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF
314	8" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
315	8" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF
316	10" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
317	10" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF
318	12" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
319	12" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF

320	15"/16" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
321	15"/16" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF
322	18" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
323	18" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF
324	21" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
325	21" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF
326	24" Dia. Pipe Gravity Sewer Point Repair - Additional Length (DI Replacement Pipe)	LF
327	24" Dia. Pipe Gravity Sewer Point Repair - Additional Length (PVC Replacement Pipe)	LF

PAY ITEMS NO. 328 – 333 – FORCE MAIN POINT REPAIR

This item provides all labor, equipment and materials for the replacement of up to ten (10) linear feet of pipe and may be used for routine response and emergency repairs at the discretion of the Engineer or his representative. The pipe being repaired may be PVC, HDPE, Ductile Iron, or Cast Iron. All ductile iron pipe shall have polyethylene encasement. The work includes furnishing and installing two full seal clamps, bell joint seal clamps or two solid sleeves, cutting existing pipe, pipe bedding, dewatering for excavations up to 6-ft deep, sheeting for excavations up to 6-ft deep, and disposal of existing pipe. Additional pipe materials over ten (10) linear feet in length will be paid for under Pay Items 191-201. Excavations and well point dewatering for pipeline point repairs are separate pay items.

The quantity to be paid under this item will be in accordance with each (EA) pipe size to be repaired as noted in the contract pay items.

PAY ITEM	DESCRIPTION	UNITS
328	2" Dia. Pipe Forcemain Point Repair	EA
329	4" Dia. Pipe Forcemain Point Repair	EA
330	6" Dia. Pipe Forcemain Point Repair	EA
331	8" Dia. Pipe Forcemain Point Repair	EA
332	10" Dia. Pipe Forcemain Point Repair	EA

333	12" Dia. Pipe Forcemain Point Repair	EA

PAY ITEMS NO. 334 & 335 – REPLACE MANHOLE RING AND COVER

This pay includes replacement of existing manhole rings and covers in roadway paved areas, or other areas, as directed by the Engineer. The work includes all labor, equipment and material for replacement of manhole rings and covers. The work does not include excavation or surface restoration which, if required, will be paid for, or is part of the work, under other Contract Pay Items.

The quantity to be measured for payment under this Pay Item will be the actual number each of manhole ring and covers replaced completed and accepted.

PAY ITEM	DESCRIPTION	UNITS
334	Replace Manhole Ring & Cover (Asphalt Pavement)	EA
335	Replace Manhole Ring & Cover (Unpaved)	EA

PAY ITEMS NO. 336 – 338 – MANOLE BENCH REPLACEMENT

This pay item includes the replacement of manhole benches and invert channels. The work includes all labor, equipment and material for rebuilding existing manhole inverts and benches as described in the Technical Specifications.

The quantity of manhole bench replacement to be measured for payment under this Pay Item will be the actual number each (EA) of manholes that have manhole inverts and benches rebuilt.

PAY ITEM	DESCRIPTION	UNITS
336	Manhole Bench Replacement, 4' Diameter	EA
337	Manhole Bench Replacement, 5' Diameter	EA
338	Manhole Bench Replacement, 6' Diameter	EA

PAY ITEMS NO. 339 & 340 – ADJUST MANHOLE RING AND COVER TO FINISHED GRADE

This item provides all labor, equipment and materials for adjusting existing manhole risers, frames, and covers. Adjustment includes removal of existing ring and cover and removal or placement of up to 6 courses of brick and reinstalling the existing ring and cover. The work does not include excavation, surface restoration, sheeting or well point dewatering which, if required, will be paid for, or is part of the work, under other Pay Items.

The quantities of manhole rim and cover adjustments to be paid under this item shall be each measured in place, on grade, inspected, and accepted.

PAY ITEM	DESCRIPTION	UNITS
339	Adjust Manhole Ring & Cover to Finished Grade (In Pavement)	EA

340	Adjust Manhole Ring & Cover to Finished Grade (Outside of Pavement)	EA

PAY ITEM NO. 341– FLOWABLE CONCRETE FILL

This item provides all labor, equipment, and materials for placing flowable fill per the Technical Specifications. The quantity of Flowable Concrete Fill to be paid under this item shall be per cubic yard measured in place, inspected, and accepted.

PAY ITEMS NO. 342 – 346 - PAVEMENT REPAIR AND ROAD RESTORATION

This item provides all labor, equipment, and materials for the installation of roadway base and surface course per the Technical Specifications and Contract Drawings. Replacement base material shall be the same as the existing base. Measurement will be based on the actual number of cubic yards of Roadway Base and tons of Superpave Asphalt base and concrete installed, tested, completed, and approved. The weight of the Superpave asphalt base and concrete shall be determined from batch weights, truck scale weights or other methods approved by the Engineer. Delivery tickets, in duplicate, signed by a sworn weigher, must accompany each load of material to the project site. One copy of the delivery ticket must be retained by the Contractor and one copy must be delivered to the City Inspector. The total number of tons reflected in one set of all delivery tickets collected by the Inspector must be the measured pay quantity.

PAY ITEM	DESCRIPTION	UNITS
342	Roadway Base, Lime Rock, Primed, Min. LBR 100, Variable Thickness	CY
343	Roadway Base, Crushed Concrete/Graded Aggregate, Min. LBR 100, Variable Thickness	CY
344	Superpave Asphalt Base, Type B 12.5, Variable Thickness	TN
345	Superpave Asphalt Concrete, Type SP 9.5, Fine, Traffic Level C, Variable Thickness	TN
346	Superpave Asphalt Concrete, Type SP 12.5, Fine, Traffic Level C, Variable Thickness	TN

PAY ITEMS NO. 347 - 349 – DRIVEWAY RESTORATION

Payment for all work included under this Pay Item will be made at the Contract unit price bid per square yard of driveway installed as shown in the Contract Drawings and as listed on the Bid Form. Measurement will be based on the actual number of square yards of driveway installed, tested, completed and approved. Payment shall represent full compensation for all labor, materials and equipment for cutting the edges of existing driveways, compacting subgrade, furnishing and installing the shell, asphaltic concrete, concrete, or decorative block and all incidentals necessary to complete the driveway restoration as shown on the Contract Drawings and included in the Specifications. No payment for restoration of a private driveway outside the right-of-way shall be made under this Pay Item.

PAY ITEM	DESCRIPTION	UNITS
347	Pavement, Cement Concrete, 6" Min Thickness (Driveways)	SY
348	Pavement, Cement Concrete, 8" Thick	SY
349	Driveway Restoration, In Kind, Decorative Block	SY

PAY ITEMS NO 350 - 352 – MILLING OF EXISTING ASPHALT

Payment for all work included under this Pay Item will be made at the Contract unit price bid per square yard of asphalt milling within the Contract Drawings and as listed on the Bid Form. Measurement will be based on the actual number of square yards of milling installed, tested, completed and approved. The measurement will be from face of curb to face of curb or as specified, but not greater than the width of the existing roadway prior to construction. Payment will include the milling of the asphaltic concrete in accordance with these Specifications. No payment for milling of a private driveway within or outside the right-of-way shall be made under this Pay Item.

PAY ITEM	DESCRIPTION	UNITS
350	Milling Existing Asphalt Pavement, 1/2" Average Depth	SY
351	Milling Existing Asphalt Pavement, 3/4" Average Depth	SY
352	Milling Existing Asphalt Pavement, 1" Average Depth	SY

PAY ITEMS NO. 353 – 356 – CURB AND GUTTER REPLACEMENT

Payment for all work included in this Pay Item will be made at the applicable Contract unit price bid per linear foot for removal of existing curbing and for furnishing and placing FDOT Type D or F curb and gutter, Miami curb, or Valley gutter as shown on the Contract Drawings and listed on the Bid Form. Measurement will be per actual number of linear feet of curbing installed. Payment shall represent full compensation for removal of existing curb and all labor, material and equipment for compacting subgrade, forming, furnishing, placing the concrete, and finishing as specified and all incidentals necessary for completion of this Pay Item, in accordance with FDOT specifications.

PAY ITEM	DESCRIPTION	UNITS
353	Curb & Gutter, Concrete, FDOT Type D	LF
354	Curb & Gutter Concrete, FDOT Type F	LF
355	Curb & Gutter, Concrete, Miami Curb	LF
356	Valley Gutter, Concrete, PCED Index 1315	LF

PAY ITEMS NO. 357 & 358 – CONCRETE SIDEWALKS

Payment for all work included under this Pay Item will be made at the Contract unit price bid per square foot of concrete sidewalk installed as shown in the Contract Drawings and as listed on the

Bid Form. Measurement of sidewalk restoration will be per the actual number of square feet of sidewalk replaced. Payment shall represent full compensation for all labor, materials and equipment for cutting the edges of existing concrete, compacting subgrade, furnishing and installing the concrete and all incidentals necessary to complete the sidewalk restoration as shown on the Contract Drawings in accordance with FDOT Specifications where applicable.

PAY ITEM	DESCRIPTION	UNITS
357	Sidewalk, Concrete, 4" Min. Thickness, Remove and Replace	SF
358	Sidewalk, Concrete, 6" Min. Thickness, Remove and Replace	SF

PAY ITEM NO. 359 – SODDING

Payment for all work included under this Pay Item will be made at the Contract unit price bid per square yard of sod installed as shown in the Contract Drawings and as listed on the Bid Form. Measurement of sodding will be per the actual number of square yards of sod installed. Payment shall represent full compensation for all labor, materials and equipment for furnishing and installing the sod and all incidentals necessary to complete the work as shown on the Contract Drawings in accordance with FDOT Specifications where applicable.

SECTION 3 - SUBMITTALS

3.01 GENERAL

When used in the Contract Documents, the term "Shop Drawings" shall be considered to mean Contractor's plans for material and equipment which become an integral part of the Project. These drawings shall be complete and detailed. Shop Drawings shall consist of fabrication, drawings, setting drawings, schedule drawings, manufacturer's scale drawings and wiring and control diagrams. Cuts, catalogs, pamphlets, descriptive literature and performance and test data, shall be considered only as supportive to required Shop Drawings as defined above.

Data on materials and equipment shall include, without limitation, materials and equipment lists, catalog sheets, cuts, performance curves, diagrams, materials of construction and similar descriptive material. Materials and equipment lists shall give, for each item thereon, the name and location of the supplier or manufacturer, trade name, catalog reference, size, finish and all other pertinent data. Submittal distribution will be by electronic submittal as coordinated during the Preconstruction Conference.

3.02 CONTRACTOR RESPONSIBILITIES

The Contractor shall submit to the City and Engineer for review and acceptance: working drawings, shop drawings, test reports and data on materials and equipment, and material samples (hereinafter in this section called samples) as are required for the proper control of work, including, but not limited to those working drawings, shop drawings, data and samples for materials and equipment specified elsewhere in the Specifications and in the Contract Drawings.

Drawings and schedules shall be checked and coordinated with the work of all trades involved before they are submitted for review by the City and the Engineer and shall bear the Contractor's stamp of approval and original signature as evidence of such checking and coordination. Drawings or schedules submitted without this stamp of approval and original signature shall be returned to the Contractor for resubmission.

If drawings show variations from Contract requirements because of standard shop practice or for other reasons, the Contractor shall describe such variations in his letter of transmittal. If acceptable, proper adjustment in the contract shall be implemented where appropriate. If the Contractor fails to describe such variations, he shall not be relieved of the responsibility of executing the work in accordance with the Contract, even though such drawings have been reviewed.

For all mechanical and electrical equipment furnished, the Contractor shall provide a list including the equipment name and address and telephone number of the manufacturer's representative and service company so that service and/or spare parts can be readily obtained.

All manufacturers or equipment suppliers who proposed to furnish equipment or products shall submit an installation list to the City along with the required shop drawings. The installation list shall include at least five installations where identical equipment has been installed and have been in operation for a period of at least one (1) year.

No materials or equipment shall be ordered, fabricated or shipped or any work performed until the Engineer reviews and returns to the Contractor the submittals as acceptable according to the

submittal review codes in Section 3.04.

3.03 SUBMITTAL NUMBERING

When submitting shop drawings or samples, utilize a unique numbering system of the Contractors choice. Subsequent resubmittals of a revised submittal shall be denoted with a letter, A-Z, indicating the resubmission of the same drawing (i.e. A=2nd submission, B=3rd submission, C=4th submission, etc.).
An example of a submittal numbering would be as follows: Submittal No. 5A - HDPE Pipe 6.03

1. 5A is the second submission of the 5th shop drawing submitted for the project
2. HDPE Pipe is the subject of the submittal
3. 6.05 is the Specification Section for HDPE Pressure Pipe

3.04 SUBMITTAL REVIEW

Submittals shall be transmitted in sufficient time to allow the Engineer at least twenty (20) working days for review and processing. The review of shop drawings, data and samples will be for general conformance with the design concept and Contract Documents. An acceptance of a submittal shall be interpreted to mean that the Engineer has no specific objections to the submitted material, subject to conformance with the Contract Drawings and Specifications. This is not to be construed as permitting any departure from the Contract requirements, relieving the Contractor of responsibility for any errors, including details, dimensions, and materials, or approving departures from details furnished by the City, except as otherwise provided herein.

Submittals will be returned to the Contractor under one (1) of the following codes:

A. "NO EXCEPTIONS TAKEN" is assigned when there are no notations or comments on the submittal. When returned under this code the Contractor may release the equipment and/or material for manufacture.
B. "CORRECTIONS NOTED". This code is assigned when a confirmation of the notations and comments IS NOT required by the Contractor. The Contractor may release the equipment or material for manufacture; however, all notations and comments must be incorporated into the final product.
C. "REVISE AND RESUBMIT". This code is assigned when notations and comments are extensive enough to require a resubmittal of the package. The Contractor may release the equipment or material for manufacture; however, all notations and comments must be incorporated into the final product. This resubmittal is to address all comments, omissions and non-conforming items that were noted. Resubmittal is to be received by the Engineer within 15 Calendar Days of the date of the Engineer's transmittal requiring the resubmittal.
D. “REJECTED" is assigned when the submittal does not meet the intent of the Contract Documents. The Contractor must resubmit the entire package revised to bring the submittal into conformance. It may be necessary to resubmit using a different manufacturer/vendor to meet the Contract Documents.
E. “Filed as Received” is assigned when the submittal is for informational purposes only. No review or comments will be provided by the Engineer.

END OF SECTION

SECTION 4 – AS-BUILT DRAWINGS

4.01 MINIMUM AS-BUILT DRAWING STANDARDS FOR ALL AS-BUILT DRAWINGS

For all elements of construction, As-Built Drawings shall be submitted to at least the level of detail in the contract documents. It is anticipated that the original contract documents shall serve as at least a background for all record information. Original drawings in CAD format may be requested by the City.

Project data points shall contain both horizontal and vertical data relative to the FL Florida State Plane, West Zone, US Foot. Vertical datum is NAVD 1988. All elevations shall be in feet and tenths, referenced to NAVD 1988. Each sheet of the As-Built Drawings shall have the title “AS-BUILT DRAWING” printed in large bold lettering near the title block and a date corresponding to the date the as-built drawing was issued. As-Built Drawings notes, and information shall be bold or italics to identify them as As-Built information.

4.02 AS-BUILT DRAWINGS PREPARATION

The As-Built Drawings shall show the name, address, and phone number of the Contractor. Each drawing shall be certified by a responsible representative of the Contractor and dated. As-built information shall be recorded currently with construction progress and work shall not be concealed until required information is recorded. Properly prepared As-Built Drawings shall be certified by a Professional Engineer or Surveyor registered to the state of Florida, employed by the Contractor.

The As-Built Drawings shall at a minimum legibly include the following:

A. All underground piping with elevations and dimensions. Changes to piping location. Horizontal and vertical locations of underground utilities and appurtenances referenced to permanent surface improvements. Actual installed pipe material, size, class, etc.

B. Locations of drainage ditches, swales, water lines and force mains shall be shown every 200 feet (measured along the centerline). Dimensions at these locations shall indicate distance from centerline of right-of-way to the facility.

C. All horizontal locations, if not in the right-of-way, must relate to easement.

D. Field changes of dimension and detail.

E. Changes made by Field Order or by Change Order.

F. Details not on original Contract Drawings.

G. Equipment and piping relocations.

H. Locations of all valves, air release valves, fire hydrants, manholes, water and sewer services, water and force main fittings, underdrain cleanouts, catch basins, junction boxes

and any other structures located in the right-of-way or easement, shall be located by elevation and by station and offset based on intersection P.I.'s and centerline of right-of-way. For facilities located on private roads, the dimensioning shall be from centerline of paving or another readily visible baseline.

I. Elevations shall be provided for all manhole rim and inverts; junction box rim and inverts; catch basin rim and inverts; and baffle, weir and invert elevations in control structures. Elevations shall also be provided at the PVI's and at every other lot line or 200 feet, whichever is less, of drainage swales and ditches. Benchmarks and elevation datum shall be indicated.

J. Slopes for pipes and ditches shall be recalculated, based on actual field measured distances, elevations, pipe sizes, and type shown. Cross section of drainage ditches and swales shall be verified.

K. Centerline of roads shall be tied to right-of-way lines. Elevation of roadway centerline shall be given at PVI's and at all intersections.

L. As-Built Drawings shall show bearings and distances for all right-of-way and easement lines, and property corners.

M. Sidewalks, fences, and walls, if installed at the time of initial as-built drawing submittal, shall be located every 200 feet or alternate lot lines, whichever is closer. Dimensions shall include distance from the right-of-way line and the back of curb and lot line or easement line.

N. Allowable tolerance shall be ± 6.0 inches for horizontal dimensions. Vertical dimensions such as the difference in elevations between manhole inverts shall have an allowable tolerance of ± 1/8 inch per 50 feet (or part thereof) of horizontal distance up to a maximum tolerance of ± 2 inch.

Specifications and Addenda shall be legibly marked to record manufacturer, trade name, catalog number and supplier of each product and item of equipment actually installed and changes made by Field Order or by Change Order.

4.02.01 REQUIREMENTS FOR RECLAIMED WATER MAINS AND FORCE MAINS

In addition to that specified above, the following information shall be provided on the As-Built Drawings.

A. Location (vertical and any horizontal) at intervals not to exceed two hundred (200) feet and at all locations where the direction changes by more than ten (10) degrees.

B. Pipe size, material, and dimension ratio.

C. Location of air release valve.

D. Detailed location of valves (horizonal).

E. Elevations shall be provided on the top of operating nuts for all water and force main valves.

F. Reclaimed water service connection location based on distance from main line and property line for each designed meter.

G. Horizontal Directional Drilling (HDD) locations and elevations shall be shown on the As-Built Drawings. The beginning, ending, and surface locations shall be indicated as well as the horizontal and vertical location at least every 25 linear feet along the pipe as provided in the HDD Contractor's certified report and bore log.

All top of pipe elevations shall be accompanied by a finished grade elevation at the same location. Horizontal location of the pipe shall be defined using ties to back of curb and nearest property corner, property line or permanent control point.

4.02.02 REQUIREMENTS FOR GRAVITY SEWER

In addition to that specified above, the following information shall be provided on the As-Built Drawings.

A. Manhole rim and invert elevations (include pipe inverts).

B. Manhole horizontal location (i.e. dimension from right-of-way line or permanent control point.)

C. Service laterals located from the nearest downstream manhole. These dimensions shall be provided by on-site inspections or televising of the sewer following installation.

D. Distance between manholes.

Size and material of all pipe.

4.02.03 REQUIREMENTS FOR WASTEWATER PUMP/LIFT STATIONS

In addition to that specified above, the following information shall be provided on the As-Built Drawings.

A. Location ties back to back of curb and nearest property corner or permanent control point.

B. Wet well invert elevations.

C. Pipe invert elevations.

D. Valve vault inverts.

E. Top of slab elevations.

F. Pump make and model, horsepower, impellor size, design point.

G. Operating set point elevations

4.03 AS-BUILT DRAWINGS SUBMITTAL

Prior to substantial completion and prior to starting the bacteria testing of water lines, Contractor shall deliver electronic As-Built Documents and As-Built Drawings to the City and the Engineer for review. If there are any required changes or additions, these shall be completed and resubmitted for review. Signed and sealed As-Built Documents and As-Built Drawings shall be submitted prior to final pay application to the City and the Engineer, both electronically and in hard copy paper format. Up to six (6) copies shall be provided at the City's request.

The Contractor shall employ a Professional Engineer or Surveyor registered in the State of Florida to verify survey data and properly prepare As-Built Drawings. As-Built Drawings shall be certified by the professional(s) (Engineer or Surveyor licensed in Florida), as stipulated by the Land Development Ordinance and submitted in electronic format and up to six (6) hardcopies signed and sealed by a Florida registered surveyor and mapper.

AutoCAD drawings shall be in DWG or DXF form. All fonts, line types, shape files, external references, or other pertinent information used in the drawing and not normally included in AutoCAD shall be included on the media with a text file or attached noted as to its relevance and use.

Accompany submittal with transmittal letter, containing:

A. Date.
B. Project title.
C. Contractor's name and address.
D. Title and number of each As-Built Document.
E. Signature of Contractor or his authorized representative.

Note: The data required to properly prepare these As-Built Drawings shall be obtained at the site, at no cost to the City by the responsible design professional or his/her duly appointed representative. The appointed representative shall be a qualified employee of the responsible design professional or a qualified inspector retained by the responsible design professional on a project-by-project basis.

END OF SECTION

SECTION 5 - CONCRETE, MASONRY, AND REINFORCING STEEL

5.01 GENERAL

The Work in this section includes furnishing, placing, finishing, and curing all reinforced and plain concrete, prestressed concrete, reinforcing steel, welded wire fabric, brick, masonry block, mortar, and related work. Brick used for paving and hexagon block used for sidewalks are not included in this section.

5.02 PORTLAND CEMENT CONCRETE

Portland cement concrete shall conform to the applicable requirements of the FDOT-SSRBC Sections 346, 347, and 921.

Class IV concrete shall be used for all concrete in contact with, or over, salt or brackish water.

Concrete used for structures in contact with sewage shall be mixed from Type II Portland cement containing the lowest calcium thiosulfate available as specified in AASHTO M 85.

Concrete shall meet the following minimum 28-day compressive strength:

Miscellaneous concrete (thrust blocks, pipe encasement, etc.)	2,500 psi
Concrete curb/gutter/sidewalk/pavement	3,000 psi
Cast-in-place/precast structures	4,000 psi
Prestressed structures	5,000 psi

5.03 REINFORCING STEEL

Reinforcing steel shall conform to ASTM A 615, Grade 60 deformed bars and to the applicable requirements of FDOT-SSRBC Sections 415 and 931.

Reinforcing steel shall not be coated, except as specifically specified on the Contract Drawings.

All welded wire fabric shall conform to ASTM A 497 (deformed) or ASTM A 185 (plain) and to the applicable requirements of FDOT-SSRBC Article 415-6.

5.04 FIBROUS CONCRETE REINFORCEMENT

Fibrous concrete reinforcement may be used, where shown or approved, in lieu of welded wire fabric for shrinkage and thermal contraction/expansion in concrete pavement, driveway, and sidewalk.

Fibrous concrete reinforcement shall conform to ASTM C 1116, ASTM C 94, and ASTM E 119-83.

Fibrous concrete reinforcement shall be 100 percent virgin polypropylene fibrillated material mixed with concrete at a minimum of 1.5 pounds per cubic yard of concrete.

5.05 PLACEMENT OF REINFORCEMENT

Reinforcing steel placement shall conform to the applicable requirements of FDOT-SSRBC Articles 350-7 and 415-5.

The following minimum concrete cover shall be provided for all reinforcement:

Concrete cast against and permanently exposed to earth	3-inch
Concrete exposed to earth or weather	
Primary reinforcement	2-inch
Stirrups, ties, and spirals	1 1/2-inch
Concrete deck slabs, top and bottom	2-inch
Concrete not exposed to earth or weather	
Primary reinforcement	1 1/2-inch
Stirrups, ties, and spirals	1-inch

For bundled bars, the minimum concrete cover shall be equal to the equivalent diameter of the bundle, but need not be greater than 2-inch, except against and permanently exposed to earth, in which case the minimum cover shall be 3-inch.

Minimum concrete cover shall be increased in corrosive environment areas.

5.06 PLACEMENT OF CONCRETE

Placement of Portland cement concrete shall conform to the applicable requirements of FDOT-SSRBC Article 400-7.

Unless specific permission is granted prior to each occurrence, no concrete shall be delivered to the job site before 7:30 a.m. or after 4:30 p.m. No concrete shall be placed until the reinforcing steel placement has been inspected and approved by the Engineer.

5.07 CURING OF CONCRETE

Curing of Portland cement concrete shall conform to the applicable requirements of FDOT-SSRBC Article 520-8.

5.08 FINISHING OF CONCRETE

Finishing of Portland cement concrete shall conform to the applicable requirements of FDOT-SSRBC Article 400-15.

5.09 CONCRETE BRICK

Concrete brick for use in drainage structures and where shown on the Contract Drawings shall be approximately 3 5/8-inch by 7 5/8-inch by 2 1/4-inch in size and shall conform to ASTM C 55, Grade N-II or S-II.

5.10 CLAY BRICK

Brick shall be sound, hard, and uniformly burned regular and uniform in shape and size or compact texture and conforming to ASTM C 32, "Specification for Sewer and Manhole Brick (Made from Clay or Shale) Grade MS or MM."

5.11 MASONRY BLOCK

Load bearing units shall be hollow or solid, as shown on the Contract Drawings, and shall conform to ASTM C 90, Type I, 8-inch by 16-inch or 4-inch by 16-inch nominal face dimension.

Non-load bearing units shall conform to ASTM C 129, Type I, 8-inch by 16-inch or 4-inch by 16-inch nominal face dimension.

Horizontal continuous joint reinforcement shall be provided at every other joint. Reinforcement shall be a minimum of #9 gage steel, Grade 50. Wire shall be hot-dip galvanized, conforming to ASTM A 153, Class B-2 (1.5 ounce per square foot of wire surface) for zinc coating after prefabrication into units. Mortar coverage shall be not less than 5/8-inch on joint faces exposed to exterior, and not less than 1/2-inch elsewhere.

5.12 MORTAR

Mortar shall consist of a mixture of cementitious materials, aggregate, and water. All proportions shall be by volume and/or weight. Masonry cement shall conform to ASTM C 91 and C 270. Fine aggregate and Portland cement shall conform to the applicable requirements of FDOT-SSRBC Sections 902 and 921 respectively. Mortar shall have a minimum compressive strength of 1,500 psi.

5.13 GROUT

Grout shall be identical to mortar in all respects.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 6 – EXCAVATION AND BACKFILL

6.01 GENERAL

The Work in this section includes furnishing all labor, materials, tools, and equipment for excavation and backfill of roadways, sidewalks, curbs, driveways, pipelines, and structures. The Work also includes removing and disposing of leftover material and furnishing and placing off-site fill.

Bidders shall examine the site of the Work, make their own additional soil borings and tests, and make their own determination of the character of materials and the conditions to be encountered on the Work; their Bid shall be based upon their own investigation.

6.02 TRENCH SAFETY

The Contractor shall be responsible for maintaining safety at each excavation. The Contractor shall adhere to the Florida Trench Safety Act (FS 90-96), OSHA trench excavation safety standards (29 CFR, Subpart P, 1926.650), and OSHA trench excavation shielding, sloping, or sheeting requirements. Inspections required by OSHA trench excavation safety standards shall be provided by the Contractor's "competent person," as defined by OSHA 29 CF, Subpart P, 1926. The Contractor's "competent person" shall be identified at the Preconstruction Conference.

The Contractor certifies by submitting the bid and subsequently executing this Contract, that all trench excavation done within his control shall be accomplished in strict adherence with OSHA trench safety standards, the Florida Trench Safety Act, and public safety.

The Contractor also agrees to produce or obtain, prior to award of the subcontracts, identical certification from subcontractors who will perform trench excavation, and to retain such certification for at least 3 years following Final Acceptance.

The Contractor shall consider all available geotechnical information when designing the trench excavation safety system. If sufficient geotechnical information is not available, the Contractor may obtain such to support the requirements set forth above, at no additional cost to the City.

6.03 WORK IN WETLANDS, MANGROVES, AND PRESERVATION AREAS

Strict adherence to all permits is required. Damage to wetlands, periodically wet areas, mangroves, and preservation areas is prohibited. Any such damage by the Contractor shall be duly rectified at no additional cost to the City and as approved by the regulatory agencies.

6.04 CLEARING AND GRUBBING

All clearing and grubbing Work shall conform to all applicable requirements of FDOT-SSRBC Section 110 "Clearing and Grubbing" except as modified herein.

The Contractor shall remove only those trees and bushes necessary to complete the specified Work. Not all the trees and bushes have been located or shown on the Contract Drawings. The Contractor shall flag those trees and bushes to be removed. All other trees and bushes shall be protected per Specifications.

All roots, stumps, and other debris shall be removed to a depth not less than 12 inches below a bearing surface. The disturbed surface shall be backfilled, graded, and compacted as specified.

No tree or bush shall be removed without the review and acceptance of the Engineer. The Contractor shall obtain all necessary City or County permits for each tree to be removed. Tree removal shall conform to the provisions of the Specifications.

6.05 ROADWAY EXCAVATION

The extent of excavation shall be as shown on the Contract Drawings or otherwise approved by the City and shall include roadway excavation and/or filling and grading, together with the removal of trees, bushes, existing asphalt, concrete, or other material, as required to facilitate construction and restoration as directed by the City.

All excavation Work shall conform to all applicable requirements of FDOT-SSRBC Section 120 “Excavation and Embankment” except as modified herein.

6.06 TRENCH EXCAVATION

Mechanical excavation shall be terminated at least 2 inches above the proposed pipe bed and trench bottom, then shaped and compacted so as to provide uniform bearing on the barrel of the pipe. Particular care shall be taken to recess the bottom of the trench at the bell of the pipe to relieve the bell of all load.

A minimum trench width shall be maintained, allowing room for the jointing and proper compaction of the backfill. If material is encountered that is unsuitable in the opinion of the Engineer, it shall be removed by the Contractor and replaced with acceptable material compacted in place as specified. In the event the Contractor excavates below the elevation required without approval, the Contractor shall backfill with approved materials compacted to obtain a suitable trench bottom, all to the satisfaction of the Engineer and at no additional cost to the City.

The amount of open trench shall be limited so that no more than 100 feet of open trench in advance of the backfilling operation will remain at the end of that working day. All open trench shall be protected by the Contractor with barriers, warning devices, and traffic control devices, which shall be kept in the correct position, properly directed, anchored when required, and clearly visible at all times. The barriers, warning devices, and traffic control devices shall be suitably lighted at all times when vehicular traffic lights are required.

6.07 STRUCTURE EXCAVATION

Excavation shall be of the size and depth required for construction of structures and their foundations. Unsuitable material encountered shall be removed to the depth required to obtain sound foundation material or as ordered by the Engineer. Over-excavated areas shall be filled with approved backfill material compacted as specified, at no additional cost to the City.

Unsuitable existing soil shall be removed and replaced with compacted material, as approved by the Engineer and as specified in the subsection herein headed "Excavation of Unsuitable Material."

6.08 EXCAVATION OF UNSUITABLE MATERIAL

Unsuitable material shall include rock, concrete, and boulders. Unsuitable soft material shall include logs, muck, other soft soils, organic soils, and other soils as specified or as ordered by the Engineer to be unsuitable.

All excavation of unsuitable material shall conform to all applicable requirements of FDOT-SSRBC Section 120 “Excavation and Embankment” except as modified herein.

Unsuitable material encountered below or within the roadway stabilized subgrade, the trench bottom, or a structure bottom, shall be removed by the Contractor to the limits established by the Engineer and disposed of from the Work area at an approved disposal area. Unsuitable material shall be replaced with approved material and compacted as specified.

No additional payment will be made for backfill material obtained from any source and used to replace any unsuitable material except as otherwise specified.

6.09 SHEETING, SHIELDING, AND SLOPING

All excavations shall be properly sheeted, shielded, or sloped to the required slope to furnish safe working conditions, to prevent shifting of material, to prevent damage to structures or other Work, and to avoid delay to the Work, all in accordance with applicable safety and health regulations. The minimum sheeting and shielding for trench excavations shall meet the general trenching requirements of the Florida Trench Safety Act and OSHA standards.

The sheeting and shielding shall be of adequate strength and quantity for the purpose intended. Any sheeting extending below the level of above the top of pipeline shall be cut off as ordered by the Engineer and left in place. In addition, the Engineer may order the Contractor to cut off and leave in place any sheeting, shielding, or other approved support where required to protect construction, property, or existing facilities or utilities.

Damages resulting in the installation or removal of sheet piling shall be rectified by the Contractor at no additional cost to the City.

6.10 DEWATERING

A. All pipeline and appurtenances shall be laid entirely in a dry trench. All foundations and structure walls shall be constructed or installed in a dry excavation.

B. Before commencing any excavation at the site of the Work, the Contractor shall submit to the Engineer for review, the methods, equipment, and arrangement of facilities proposed for dewatering and disposal of water at the site and of all water entering any excavation or other part of the Work from any source whatsoever.

C. Water discharged from dewatering equipment shall be carried into surface drainage facilities except water quality treatment systems and shall not be discharged into sanitary sewer lines. The Contractor shall prevent water from puddling in streets or on private properties. The depositing of dirt in storm drains and ditches and staining of existing facilities shall not be permitted.

D. Adequate standby facilities shall be provided to ensure that the excavation will be kept dry in the event of power failure or mechanical breakdown. Facilities for the removal and disposal of water shall be of sufficient capacity to keep the excavation dry under all circumstances with one-half of the facilities out of service. If well points are used, provision shall be made for removing and resetting individual well points without taking the system of which they are a part out of service.

E. The City reserves the right to require the Contractor to replace noisy equipment in order to keep disturbance to a minimum.

F. The cost of dewatering and disposal of water shall be included in the unit quantity for each appropriate item bid.

G. Refer to the Specifications for requirements concerning encountered groundwater contaminates.

6.11 BORROW MATERIAL

Any borrow excavation Work shall consist of the excavation and satisfactory utilization of material from areas provided by the Contractor when necessary material is not available from the normal excavation or grading operations. This Work shall conform to DOT-SSRBC Section 120 “Excavation and Embankment” except as modified herein.

If additional fill material is required, it shall be City approved material supplied and compacted by the Contractor. All compaction under roadway, alley, driveway, curb, walk, or other improved surface shall be to a density as specified in the Contract Documents. Unless otherwise directed by the City, all material not required for construction shall be removed from the premises and disposed of by the Contractor.

6.12 BEDDING MATERIAL

A. Where shown, ordered, or required, the Contractor shall place bedding material prior to placing pipelines, structures, or slabs. Bedding material may be either excavated approved native sand, concrete sand, gravel, or reclaimed concrete.

B. Off-site bedding material shall be sand or gravel. Sand bedding material shall be a clean concrete sand of uniform gradation between sieve sizes No. 4 and No. 50. All particles shall pass a 3/8-inch sieve and no particles shall pass a No. 100 sieve.

C. Gravel bedding material shall meet the requirements of ASTM C33 and shall be coarse aggregate, DOT Size No. 67 (3/4-inch to No. 4) or approved equal.

D. Reclaimed concrete bedding material shall be graded to meet the size requirements as specified for gravel bedding.

E. Bedding material, where required, shall be placed in lifts and compacted in a manner to achieve the specified density as specified and/or as shown.

F. If gravel bedding is used, an impermeable groundwater barrier shall be placed at 100-foot intervals in the gravel bedding. The impermeable groundwater barrier shall consist of a 10

mil sheet of polyethylene covering the full cross sectional area of the gravel, embedded 6 inches into the trench sides and bottom, and extending to the top of the gravel. The barrier shall be offset a minimum of 2 feet from any culvert or pipe joint. Ends and splice points shall be lapped a minimum of 12 inches.

6.13 STRUCTURAL SLAB BEDDING

Structural slabs for manhole bases, footings, and similar structures shall be placed on approved compacted bedding material and leveled as specified and/or as shown.

6.14 BACKFILL MATERIAL

Backfill material shall consist of earth, loam, sandy clay, sand, gravel, soft shale, or other materials, free from organic materials, large clods of earth, or stones. Backfill material shall be either soil classification A-1, A-2 or A-3, per AASHTO M-145, and shall be free of organic matter, lumps of clay or marl, muck, compressible materials, and rock exceeding 2.5 inches in diameter. Broken concrete, masonry, rubble or other similar materials shall not be used as backfill.

6.15 BACKFILL COMPACTION

All backfill shall be compacted as specified herein and shall meet the following minimum density as determined by the AASHTO T-180 method for backfill outside the right-of-way and in City streets, and by the AASHTO T-99 method if in County or FDOT right-of-way.

AASHTO T-180 Method C or D will be used for stabilized subgrade and base compaction tests, and Method A or B will be used for backfill testing, or as directed by the Engineer or jurisdiction.

	T-180	T-99
Roadway stabilized subgrade	98%	N/A*
Roadway base	98%	N/A*
Curb base	98%	N/A
Sidewalk and driveway base	98%	N/A
Pipe bedding	98%	100%
Pipe backfill - under pavement	98%	100%
Pipe backfill - under grass	95%	100%
Structure base slabs	100%	N/A
Structure backfill	98%	N/A

*Roadway stabilized subgrade and base material shall meet LBR requirements as specified in the Contract Documents.

6.16 BACKFILLING OF TRENCH

Backfilling shall be accomplished with suitable material and shall commence only after the pipelines have been laid and tentatively accepted by the City. The space between the pipe and the sides of the trench shall be packed full by hand-shoveled earth free from lumps or debris.

The backfill material shall be placed in 6-inch lifts and compacted, using approved tampers to the required compaction, to a point 12 inches over the top of the pipe. The remaining backfill (under areas other than roadways) shall be placed in uniform lifts not greater than 12 inches thick (or less as approved for mechanical equipment available) and tamped to the required compaction. Backfill under roadways shall be compacted in 6-inch lifts.

Where trenches are improperly backfilled, or where settlement occurs, the trenches shall be reopened to the depth required for proper compaction, refilled and compacted, and the surface restored to the grade and compaction, mounded over and smoothed off.

6.17 BACKFILLING STRUCTURES

Backfill around structures shall be of suitable job-excavated material, suitable off-site fill material, or other material approved by the Engineer. Such backfill shall extend from the bottom of the excavation or top of bedding to the bottom of pavement base course, the bottom of the subgrade for lawns or lawn replacement, the top of the existing ground surface, or to such other grades as may be shown or required.

The backfill shall be placed in uniform lifts not greater than 12 inches thick, and thoroughly compacted in place.

6.18 BACKFILLING UNDER ROADWAYS

Backfill placed under roadways and other paved surfaces shall be compacted in 6 -inch lifts and thoroughly compacted in place, with suitable equipment as specified herein.

6.19 DISPOSING OF LEFTOVER MATERIAL

The Contractor shall bring the surface to the same level as existed prior to the excavation. All leftover material shall be hauled from the site and disposed of by the Contractor. Leftover material shall not be stored in or along rights-of-way or easements.

6.20 ADJACENT FACILITIES

The Contractor shall be responsible for the protection, removal, and replacement of all adjacent structures, utilities, trees, shrubbery, curbs, culverts, headwalls, fences, signs, and other miscellaneous structures encountered during the course of the Work.

6.21 TEMPORARY SUPPORTS

Temporary supports for 16-inch and larger pressure and gravity pipes shall be designed by the Contractor and submitted to the City as required by Specifications. Temporary supports that include a structural beam, or other such member(s), shall be designed, signed and sealed by a Professional Engineer.

6.22 FLOWABLE FILL

Where shown on the Contract Drawings, or where ordered by the Engineer, the Contractor shall backfill a void area or an excavation with flowable fill. Flowable fill may be shown, or ordered, to fill

abandoned pipes, abandoned underground steel storage tanks, trench backfill, washout area under structural slabs or behind walls, or other similar locations.

Flowable fill shall be produced and delivered to the site. Placing of flowable fill shall be by chute, pumping, or other approved methods. Flowable fill shall be placed to the designated fill line without vibration. The Contractor shall take all necessary precautions to prevent any damage caused by hydraulic pressure of the fill during placement prior to hardening. Flowable fill shall not be used for pipe bedding and backfill in the zone from the bottom of a pipe to 12 inches above the top of pipe.

Flowable fill shall consist of materials conforming to FDOT-SSRBC Sections as follows:

Cement (Type I or II)	Section 921	"Portland Cement and Blended Cement"
Fly ash (Type F)	Section 929	"Fly Ash, Slag, Microsilica and Other Pozzolanic Materials for Portland Cement Concrete"
Fine aggregate (sand)	Section 902	"Fine Aggregate"
Water	Section 923	"Water for Concrete"

The Contractor shall submit a proposed design mix that will produce a flowable fill meeting the strength requirements specified herein, using the following materials:

	Pounds per cubic yard
Cement (Type I or II)	50 - 200
Fly ash (Type F)	0 - 2,000
Fine aggregate (sand)	2,500 - 3,000
Water	325 - 550
Note: 6-inch to 10-inch slump	

Flowable fill material shall be proportioned to produce a 28-day compressive strength approximately as follows:

	Pounds per square inch
Pipe trench backfill	50 - 150
Fill abandoned pipes or tanks	30 - 150
Under slabs, behind walls	300 - 1000
Note: Density in place 115 to 145 pounds per cubic foot.	

Not more than 60 minutes shall elapse between the start of moist mixing and the placement of the flowable fill.

Flowable fill placed on slopes shall have a reduced slump with a reduction in water and shall be able to be shaped as required.

The Contractor shall place the flowable fill in such a manner as to eliminate all cavities.

Flowable fill shall not be placed in salt water. When within a tidal area, the flowable fill shall be placed immediately after the salt water has receded.

When flowable fill is used adjacent to ductile iron pipe, the pipe shall be polyethylene encased.

END OF SECTION

SECTION 7 - SURFACE RESTORATION

7.01 GENERAL

The Work in this section includes restoring and maintaining pavements and pavement bases, curbing, sidewalks, driveways, and grass surfaces that are disturbed, damaged, or destroyed during the course of the Work under this Contract.

The quality of workmanship and materials used in the restoration shall produce a surface equal to or better than the condition before the Work began.

Prior to restoration, the Contractor shall saw cut and remove all existing pavement within 2 feet of the edge of the excavation, or within such widths as may be ordered by the Engineer.

Compaction of soil and base materials shall be tested using the AASHTO T 180 method.

Surface restoration workmanship and materials shall conform to the applicable sections of the FDOT-SSRBC.

All dirt areas disturbed shall be restored with sod, unless otherwise specified.

7.02 ROADWAY RESTORATION

Where the installation of pipe or structures occurs within an existing roadway, the limits of excavation shall be saw cut leaving a straight and square edge. The upper portion of the trench backfill shall be replaced with a compacted shell, crushed (reclaimed) concrete, or limerock base as shown on the Contract Drawings, and paved to match the surrounding surface. Replacement base material shall be the same as the existing base. Roadway restoration shall conform to the detail for shown in the Contract Drawings.

7.03 TEMPORARY PAVEMENT

Immediately upon completion of backfilling, the pavement surfaces damaged or destroyed shall be temporarily restored by placing a shell (FDOT-SSRBC Section 911), crushed (reclaimed) concrete (FDOT-SSRBC Section 204 applicable sections), or limerock (FDOT-SSRBC Section 911) base on the backfilled, compacted subgrade, and an adequate temporary asphaltic patch as shown or as approved by the Engineer. Shell crushed (reclaimed) concrete, or limerock shall be used as a base for all bituminous pavements.

Temporary work shall be maintained in a suitable and safe condition for traffic until the permanent pavement is laid or until final acceptance of the Work.

7.04 SHELL BASE

Shell base shall be constructed on the prepared subgrade to not less than 98 percent of maximum density, in accordance with the requirements of FDOT-SSRBC Section 911. The minimum compacted thickness of shell base shall conform to the detail shown on the Contract Drawings.

7.05 LIMEROCK BASE

Limerock base shall be constructed on the prepared subgrade to not less than 98 percent of maximum density, in accordance with the requirements of FDOT-SSRBC Section 911. The minimum compacted thickness of limerock base shall conform to the detail shown on the Contract Drawings.

7.06 CRUSHED (RECLAIMED) CONCRETE BASE

Crushed (reclaimed) concrete base shall be constructed on the prepared subgrade to not less than 98 percent of maximum density, in accordance with the requirements of FDOT-SSRBC Section 204. The minimum compacted thickness of crushed (reclaimed) concrete base shall conform to detail shown on the Contract Drawings.

The minimum limerock bearing ratio (LBR) value shall be 150.

7.07 ASPHALTIC CONCRETE PAVEMENT

A prime coat shall be applied to the prepared base in accordance with FDOT-SSRBC Section 300 prior to permanent asphaltic concrete pavement.

Unless specified elsewhere, all permanent asphaltic concrete pavement replacement shall be constructed in accordance with the requirements of FDOT-SSRBC Sections 320, 330, 334, and 337. Surface types and compacted thickness shall conform to the detail shown on the Contract Drawings.

7.08 BRICK PAVEMENT

Construction of brick pavement shall follow the details as shown on the Contract Drawings and City standard practice using City standard paving brick or red clay brick conforming to ASTM C 32, Grade SS with City standard dimensions.

Brick street abutting asphalt pavement shall have a minimum 6-inch-wide flush Type A Header Curb.

7.09 CURB AND GUTTER

All permanent restoration of street curb, or curb and gutter, shall be of the same type and thickness as the curb, or curb and gutter, which abuts. The grade of the restored curb, or curb and gutter, shall conform to the grade of the existing adjacent curb, or curb and gutter, so that positive drainage is maintained.

7.10 CONCRETE SIDEWALK

The restoration and construction of concrete sidewalks shall conform to applicable requirements of FDOT-SSRBC Section 522 and the Contract Drawings and shall be constructed where shown on the Contract Drawings and directed by the City. Sidewalk expansion joints with bituminous filler shall be installed at a maximum of 50-foot intervals on center and struck joints shall be spaced equidistant with walk width (joints wider than 6 feet shall be spaced as directed by the City). Where

new construction is to be tied into existing facilities, the old material is to be removed back to the nearest construction joint, or sawcut to a straight line as directed by the City or Engineer. The soil under sidewalks and driveways shall be compacted to 98 percent of the maximum density.

New sidewalks shall be 4 inches thick. Concrete pour for walk construction shall be made only on dampened subgrade. A soft broom finish shall be given the walk surface as directed by the Engineer.

Sidewalks crossing driveways shall be constructed according to the Specifications for concrete driveways.

Curb ramps for physically handicapped shall be constructed at all locations where sidewalks cross the curb or where directed by the Engineer. Those existing sidewalks which are removed to accomplish associated work as a part of this Project shall be replaced with a curb ramp when the sidewalk crosses the curb. The cost of curb ramps shall be included in the appropriate proposal item for sidewalk restoration.

Where sidewalks are replaced, the replacement shall be the full width of the walk and the minimum length shall be 60 inches. Restoration of adjacent lawn is incidental to sidewalk replacement and no separate payment will be made therefore.

7.11 HEXAGON BLOCK SIDEWALK

The restoration and construction of hexagon block sidewalks shall conform to the details shown on the Contract Drawings and City standard practice using City standard hexagon blocks.

The soil under sidewalks and driveways shall be compacted to 98 percent of the maximum density. New hexagon block sidewalks shall be 2 inches thick.

Curb ramps for physically handicapped shall be constructed at all locations where sidewalks cross the curb, or where directed by the City or Engineer. Those existing sidewalks which are removed to accomplish associated work as a part of this Project shall be replaced with a curb ramp when the sidewalk crosses the curb. The cost of curb ramps shall be included in the appropriate Pay Item for sidewalk restoration.

Where sidewalks are replaced, the replacement shall be the full width of the walk. Restoration of adjacent grass is incidental to sidewalk replacement and no separate payment will be made therefore.

7.12 DRIVEWAY AND PARKING LOT

Except as otherwise specified, all permanent restoration of base and surface of driveways, parking aprons, and sidewalks shall match the materials, thicknesses, elevations, lines, and grades of the existing construction, all to the Engineer's satisfaction. Patching of Portland cement driveway areas will not be allowed between joints or dummy joints.

For areas where streets are to be paved, or where more than 50 percent of the driveway apron is disturbed, concrete or brick driveways shall be replaced in kind. All other driveways, including shell

and dirt, shall be restored with an asphalt concrete surface from the street to the property line or front of sidewalk, as directed by the City or Engineer.

All base compaction under driveways shall be to a minimum density of 98 percent of the maximum density.

7.13 DRIVEWAY - ASPHALT

Residential asphalt driveway restoration shall include 1-inch thick asphaltic concrete surface over 2 inches of compacted sand-asphalt hot mix base, or 5 inches of compacted limerock or shell base.

Commercial asphalt driveway restoration shall be constructed of 1-inch thick asphaltic concrete surface over 8 inches of limerock base compacted in 2 lifts.

7.14 DRIVEWAY - CONCRETE

The restoration and construction of concrete driveways shall conform to applicable requirements of FDOT-SSRBC Section 522 and the Contract Drawings and shall be constructed where shown on the Contract Drawings and directed by the City or Engineer.

Residential concrete driveway restoration shall be 5 inches thick and shall include placing a single layer of 6-inch by 6-inch wire mesh (WWF 6 x 6 - W1.4 x W1.4).

Commercial concrete driveways shall be 6 inches thick with a double layer of 6-inch by 6-inch wire mesh (WWF 6 x 6 - W1.4 x W1.4).

7.15 DRIVEWAY - PEAGRAVEL

Where less than 50 percent of the driveway apron is disturbed, pea gravel driveways shall be restored to match the existing driveway. Pea gravel driveway restoration shall include asphalt treated shell base 5 inches thick after compaction to a minimum density of 98 percent of the maximum.

7.16 DRIVEWAY - SHELL

Where less than 50 percent of the driveway apron is disturbed, shell driveways shall be restored to match the existing driveway. Shell driveway restoration shall be 5 inches thick after compaction to a minimum density of 98 percent.

7.17 GRASS

7.17.01 Sodding

Sod shall be planted as soon as practical after paving, pipeline, or other work has been completed. Sodding shall always be used over seeding.

All work and materials shall meet the applicable requirements FDOT-SSRBC Section 570 (Sodding).

Sodding shall be done as directed by the Engineer, using only material which, in the opinion of the Engineer, is healthy and free of weeds, and (unless specified otherwise by the Engineer) of the same variety predominating at time of removal. Sod may be St. Augustine, Bahia, or other varieties as selected by the Engineer.

Sod shall be planted within 72 hours of being cut. Only moist, green sod having a virile root system may be planted. Sod shall be cut into adjacent sod to provide a smooth surface, and "top dressed" where necessary. Sod shall be rolled or tamped after planting to provide a uniform and consistent grade.

7.17.02 Grass Maintenance

The Contractor shall properly water and otherwise maintain all seeded and sodded areas for a minimum of 60 consecutive calendar days after completion of sodding operations. After the 60 days, and upon receipt of written request from the Contractor, the Engineer will inspect the areas for acceptance by the City. Any area that is washed or eroded, fails to show a uniform stand of healthy, vigorous grassing, or does not appear to be otherwise developing satisfactorily, shall be re-sodded and maintained until suitable for acceptance by the Engineer.

In the event that the stand of grass is found to be contaminated by weeds or other undesirable growth, the Contractor will be required to effectively eliminate such undesirable growth at his own expense.

7.18 EXPANSION JOINT MATERIAL

Expansion joint material for concrete pavement surfaces, including sidewalks and driveways, shall be the bituminous strip type, 1/2-inch thick, and shall conform to applicable requirements of FDOT-SSRBC Section 932.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 8 – PAINTING

8.01 GENERAL

Painting materials not obtainable from the prime manufacturer shall be obtained from a second source recommended by the prime manufacturer for compatibility. All products furnished shall meet current Federal Regulations for lead, mercury and other heavy metals, as well as current VOC air quality regulations. Products of the following acceptable manufacturers may be used on this project, except where noted otherwise.

A. Ameron – Corrosion Control Division
B. Devoe & Raynolds Company
C. Indurall
D. KopCoat –RPM
E. MAB Paints
F. PPG Industries, Inc.
G. Rust-Oleum Corporation
H. Sherwin-Williams
I. Tnemec Company, Inc.

The Contractor shall paint or provide a protective coating for all interior and exterior wood and metal surfaces, all interior masonry, valves, and all submerged piping and other metal, whether specifically called for or not. In addition, all exposed piping shall be painted and further identified in accordance with other sections of these specifications. Because of their very nature, some areas or items do not require specific painting or coating for protection or appearance. The following generally do not require painting or coating unless specifically noted otherwise or required by manufacture, color coding, insulation from dissimilar metals, insulation from concrete or cement products, or architectural considerations:

A. Non-Ferrous Alloys:

Aluminum
Monel
Stainless Steel

B. Corrosion Resistant Metals:

Chromium Plated Steel
Weathering Steel
Galvanized Steel

C. Non-Metallic Materials:

Exterior Brick
Concrete
Glass

	Plastic &FRP
	PVC
	Porcelain
Pre-Finished Manufactured Items:	Cabinets
	Louvers
	Motor Control Centers
	Panels
	Signs and Nameplates
	Switchgear
	Switchboards
	Transformers
	Tile

D. Electrical Conduits Attached to Unpainted Surfaces.

E. Insulation and Insulation Jackets.

All exposed piping and conduit within the fence enclosure shall be color-coded in accordance with the following Color Coding Schedule:

A.	Electric	Gray
B.	Gas, Oil, Dangerous Materials	Red
C.	Telephone, Telegraph, Television, Communications	Safety Alert Orange
D.	Potable Water	Safety Blue
E.	Treated Sewage	Safety Green

Other paint colors will be selected by the Engineer

All materials shall be pure and first quality. Materials listed shall be the standard for each such type of material. Primers and finish coats shall be compatible and of the same manufacture where possible. Emulsion and alkyd paints shall contain a mildewcide, and both the paint and mildewcide shall conform to OSHA and Federal requirements, including Fed. Spec. TT-P-19. Paint and protective coating materials shall be sealed in containers that plainly show the designated name, formula or specification number, batch number, color, date of manufacture, manufacturer's directions, and name of manufacturer, all of which shall be plainly legible at the time of use. Pigmented paints shall be furnished in containers not larger than five (5) gallons. Materials shall conform to the specifications shown herein and to the requirements hereinafter specified.

To the maximum extent possible, all products shall be the product of one manufacturer unless a specific specialty coating system is specified. Without exception, all coatings for any service condition specified herein shall be by one manufacturer. Once a paint manufacturer has been selected by the Contractor and approved by the Engineer, the Contractor shall ensure that all

equipment manufacturers prime their equipment with the same or a compatible primer. If this cannot be or is not done for any reason, the Contractor shall apply a "universal primer" and recoat with the approved manufacturer's product in the field.

8.02 SUBMITTALS

Submittals shall be in accordance with the following:

A. Samples. Prepare and submit for Engineer's approval copies of color samples on 8-1/2" x 11" size cards for each paint and protective coating system. Each sample card shall clearly show each coat of the finish system, and shall be clearly marked with the manufacturer's name and product identification, and shall be submitted in sufficient time to allow for approval and, if necessary, disapproval and resubmittal without causing any delay of the project.

B. Coating Materials List.
   1. The Contractor shall provide copies of a paint and coating materials list which indicates the manufacturer and paint number, keyed to the coating schedule herein, for approval by the Engineer prior to or at the time of submittal of samples required herein.
   2. The Contractor shall include with his submittal, his protective coating schedule for shop and field coatings of items to receive protection. The schedule shall conform to the specified requirements for surface preparation, priming, and coating for items covered, and shall follow the same requirements for similar work where such work has not been specifically called-out. No bare ferrous nonworking surfaces shall be omitted from the schedule. Particular care shall be taken to cover in sufficient detail the coating of mechanical joints and other mechanical devices which shall conform to the recommended practice of the manufacturer of the joint or other mechanical devices.
   3. Coatings to be used on plastic and fiberglass materials shall be certified as acceptable by all plastic and fiberglass manufacturers whose products are to be coated. Certification copies shall be submitted to the Engineer. The Contractor shall be certified in writing by the painting and coating material manufacturers as qualified applicators of their products with copies of the certification submitted to the Engineer.

C. Product Data Sheets. Contractor shall submit paint and coatings material manufacturers' printed technical data sheets for products intended for use in each paint and coating system. Data sheets shall fully describe material as to its intended use, makeup, recommended surface preparation and application conditions, primers, material mixing and application (including recommended dry mil thickness recoat time), precautions, safety and maintenance cleaning directions.

D. Material Safety Data Sheets. Material Safety Data Sheets (MSDS) shall accompany all paint submittals and shall be prominently displayed at the job site during all painting activities.

8.03 PAINTING SCHEDULES AND SYSTEMS

Painting and coating of surfaces shall conform to the following schedules and systems, unless otherwise specified or shown on the drawings:

A. Schedule A: System 1 – Exposed exterior structural and miscellaneous steel, piping, equipment to include all stainless steel and carbon steel electrical control cabinets non-submerged, not exposed to corrosion, splash, fumes or immersion conditions.

1. Prime: One sprayed coat of a combination of a two-part epoxy primer, gray, of 3.0 mils, minimum dry film thickness as by Devoe Paints, Tru-Glaze Epoxy Primer Nos. 12735 and 12702 (ratio 19:1) or equal. If shop coat is damaged, re-prime bare areas in the field. The exterior of electrical cabinets, in stainless steel, shall be sand-blasted and spray-primed per the paint manufacturer's instructions.

2. Finish: Two coats of "hanging moss green" (Devoe Paints FX-70), Semi-Gloss Advanced Technology Acrylic Resin of 1.5 to 2.0 mils, dry thickness as Exterior Waterborne Semi-Gloss Enamel #83XX by Devoe Paints, or equal. Coats to be applied by spray painting in the shop.

B. Schedule B: System 2 – Piping and pumping equipment – submerged or non-submerged, exposed to spray, splash or corrosive atmosphere, excluding chains and sprockets, and stainless steel bracing in the wetwell:

1. Prime: One coat chemical resistant red iron oxide, based on a polyamide cured epoxy resin, minimum of 3.0-5.0 mils dry film thickness as by Devoe Paints, Devron 201. If shop coat is damaged, re-prime bare areas in the field.

2. Finish: Two coats of polyamide cured, epoxy resin coating, minimum of 4.0-6.0 mils dry film thickness per coat as by Devoe Paints, Devron 224HS-color, moss green as required above.

D. Schedule C; System 3 - Coating aluminum and non-ferrous metal surfaces, including undersides of aluminum access hatches, frames, and checkered plate, subject to corrosive atmosphere and condensation

1. Surface Preparation: Clean non-ferrous surfaces in accordance with 26 SSPC-SP7 (brush-off blast cleaning)
2. Prime: Minimum 3.0 mil DFT (Tnemec Primer – Series 66)
3. Finish: Minimum 4 mil DFT for a minimum total dry mil thickness of 7 mils (Tnemec Finish Coat – Series 66)

8.04 EXECUTION

All painting shall be done by skilled and experienced craftsmen and shall be of highest quality workmanship. Application of materials shall be done only on properly prepared surfaces as herein specified.

Before commencing work, the painter shall make certain that surfaces to be covered are in good condition. Should the painter find such surfaces not to be totally acceptable for covering, he shall report such fact to the Engineer. The application of paint shall be held as acceptance of the surfaces and working conditions and the painter will be held responsible for the results reasonably expected from the materials and processes specified.

Only compatible materials shall be used in the work. Particular attention shall be directed to compatibility of primers and finish coats. If necessary, subject to approval of the Engineer, a compatible barrier coat shall be applied between all existing prime coat and subsequent field coats to ensure compatibility. Ductile iron pipe that has an exterior bituminous coating shall not be painted unless the bituminous coating is removed by sand blasting or an appropriate, compatible, intermediate coat is applied before top coating in accordance with this specification

Hardware, hardware accessories, machined surfaces, nameplates giving manufacturer's data, cover plates, grease fittings, lighting fixtures and similar items in contact with painted surfaces and not to be painted shall be removed, masked, or otherwise protected prior to surface preparation and painting operations so they remain clean and free from paint.

Ferrous metals (not shop primed) shall be sandblasted per SSPC-SP6 to remove mill scale and rust. Ferrous surfaces to be submerged or exposed to spray, splash, fumes or corrosive atmosphere shall be sandblasted to near-white metal blast cleaning according to SSPC-SP 10. Brush blast or clean other metals as appropriate to provide suitable surface. Surface profile as obtained from sandblasting shall be recommended by the coating manufacturer. All metal surfaces shall be completely degreased by solvent cleaning in compliance with SSPC-SP 1.

Galvanized surfaces shall be cleaned of dirt, grease and other foreign substances and solvent cleaned. Surfaces shall be pro-treated with one coat of proprietary acid bound resinous or crystalline zinc phosphate preparation, used in accordance with the manufacturer's directions.

Remove glaze, of florescence, dirt, loose particles and grease (and existing paint, if applicable) from concrete receiving masonry paint. Fill all cracks, cut out defective joints and repaint.

In addition to the above listed surface preparations, all dirt, rust, scale, splinters, loose particles, disintegrated paint grease, oil and other deleterious substances shall be removed from all surfaces that are to be coated.

Work shall be done only under favorable weather conditions and as recommended by paint supplier. Exterior painting shall be done only in dry weather. Any surface coating damaged by moisture or rain shall be removed and redone as directed by the Engineer. Coatings shall be mixed, thinned, tinted and applied in accordance with the manufacturer's recommendations. The Contractor shall tint or match colors as selected by the Owner. A sample shall be applied on the job for review and approval before work is actually done. No thinners shall be used except those specifically mentioned and only in such quantity as directed by the manufacturer's instructions. If thinning is used, sufficient additional coat shall be applied to assure the required dry film thickness is achieved.

The manufacturer's recommended thinner or cleanup solvent shall be used for all cleanup. Application by brush, spray, airless spray or roller shall be as recommend by the manufacturer for

optimum performance and appearance. Paint shall be applied in a neat manner with finished surface free of runs, sags, ridges, laps and brush marks.

Each coat shall be applied in a manner that will produce an even film of uniform and proper thickness, and no variation in sheen or color. Where more than one coat of paint is specified, each coat shall be sufficiently tinted to result in a perceptible difference in shades of the various coats of paints so that the application of subsequent coats can be properly and uniformly spread and inspected. Provision shall be made to allow thorough drying between coats as recommended by the manufacturer before the next coat is applied, and paint used in successive field coats shall be produced by the same manufacturer.

Seal coats shall be used over bitumen-coated surfaces as applicable. Plastic pipe shall be painted in accordance with the pipe manufacturer's recommendations. Pipes, shoot metal ducts and other metal items which are to be installed in inaccessible locations shall be painted prior to installation.
