* Contractor Job Truck Mandatory Tools

	Tool	Minimum size	Quantity
1	Air compressor	20 CFM @ 90PSI	1
2	3/4" drive ratchet and socket set		1
3	1 inch drive air impact wrench		1
4	1 inch drive sockets	1-1/2" to 3"	1 each
5	Slug wrenches	1-1/2" to 3"	1
6	End wrenches	7/16" to 1-1/2"	2 each
7	Porta band saw w spare blades	4" opening	1
8	Sawzall w spare blades		1
9	Nylon slings 5,000 and 10,000 pound rated (vertical)	2" 2 ply/4" 2 ply	2 each
10	Grade 80 Chain 10,000 pound rated	1/2" X 10 ft	2
11	Clevis or Shackles 5 ton rated	5/8" alloy	4
12	Porta power 10 ton		1
13	Shovels- round and square point		3 each
14	Cutting torch set *see note*		1
15	Gas or diesel stick welder and accessories *see note*		1
16	Small diaphragm pump and accessories	2" suction	1
17	Tap and die set	1/2" to 2" NPT	1
18	Drill and bits for steel or ductile	1/2" to 2" NPT size	1 set
19	Pry bar	5 foot	1
20	Come along	2ton	2
21	Circular Saw and blades for cribbing/forms	7 1/2 inch	2
22	Generator 120/240 volt	3500 watt	1
23	Framing hammer and nails for forms		2
24	Screw gun and screws for forms and cribbing		1
25	Gas powered cutoff saw (K-12)	12inch	1
26	Chain saw for cribbing and for'ms	14 inch bar	1
27	Sledge hammers	4t/ and 6tl	1 each
28	Crew PPE to include Hard hat and gloves at minimum	as needed	per person

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

Company History and Capabilities

PCS Civil, LLC is a leader in Heavy Civil Construction services in Florida. Originally known as Pepper Contracting, PCS was incorporated on December 21, 1993, with the mission to set the bar higher for all roadway, utility, and concrete companies in the Tampa Bay area.

From our earliest beginnings our Core Values of Passion, Respect, Integrity, Diversity and Excellence have been the backbone of our company's leadership and employees. Our highly skilled teams have constructed some of the most challenging infrastructure projects in the Tampa Bay area including complex interchanges, urban & rural roadways, underground utilities, bridges, complex drainage systems and concrete structures. Our extensive list of clients includes: FDOT District 1 & 7, Clearwater International Airport, Hillsborough / Pinellas / Pasco Counties, Port Tampa Bay, Tampa International Airport, Port Manatee and many more.

PCS Civil believes that Safety is the highest priority in every aspect of our business. We practice what we preach and create a safe and healthy work environment as part of our dynamic culture and that safety is one of our most central guiding principles. With over 200 full-time employees and staff, PCS maintains an overall total recordable incident rate (TRIR) and overall lost-time frequency rate (FTFR) among the lowest in our industry. PCS's committed to providing our employees with the training, equipment, and practices to achieve our zero accidents goal. The safety of our employees is our highest priority, and we want each employee to leave work and return home safely and healthy each day.

PCS Civil currently operates out of our 7-acre site on Asphalt Ave centrally located in Tampa, FL. This site is complete with an 11,000 SF office space and 9,000 SF equipment maintenance facility with equipment and material staging areas.

PCS is a proud member of the Design Build Institute of America and has successfully completed many design-build projects. We are also members of the Florida Transportation Builders Association and have received multiple FTBA Best in Construction Awards. Our team is also members of NUCA, SUCA and various other construction industry associations.

At PCS, we are proud to be shaping Florida's future. The projects we take on play a continuing role in improving the local communities and improving our shared infrastructure. Our highly successful team of skilled builders, engineers and operational support is responsible for our success and our culture of excellence. We continue to strive to be the best and are committed to excellence in all that we do.

Re: **PCS Civil, Inc.**/ Surety Bonding Letter

To Whom it May Concern:

Please be advised that we have been the surety bond agents for the above-mentioned company for the past several years.

We have established a line of credit for **PCS Civil, Inc.** in the $**125,000,000.00** aggregate program. This program is in place through **Markel Insurance Company** who is rated **"A XV"** by A.M. Best and appears on the U.S. Treasury Circular 570 of approved sureties at $298,854,000.

We obviously reserve the right to review final contractual documents, bond forms and obtain satisfactory evidence of funding prior to final commitment to issue bonds, and we cannot assume liability to any third party, including you, if we do not execute said bonds.

Sincerely,

Kevin R. Wojtowicz
Surety Bond Specialist
Attorney-In-Fact for Surety

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience providing Task Work Order driven Civil On-Call Construction Services.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Civil On Call Construction Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Civil On Call Construction Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach
by: Douglas J. Ebbers, President
(Print individual's name and title)

for: PCS Civil, LLC
(Print name of entity submitting sworn statement)

at: 6920Asphalt Ave., Tampa, FL 33614
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

59-3221511
(FEIN)
or, if the entity has no FEIN, include the Social Security Number:

(SSN)

by the individual signing this sworn statement:
(Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☒ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

STATE OF FLORIDA
COUNTY OF Hillsborough

VIII. NON-COLLUSION AFFADAVIT

STATE OF Florida COUNTY OF Hillsborough

I state that I Douglas J. Ebbers of PCS Civil, LLC,
(Name and Title) (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. PCS Civil, LLC, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

Bid Bond

CONTRACTOR:
(Name, legal status and address)

PCS Civil, Inc
6920 Asphalt Ave.
Tampa, FL 33614

SURETY:
(Name, legal status and principal place of business)

Markel Insurance Company
4521 Highwoods Parkway
Glen Allen, VA 23060

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

Any singular reference to Contractor, Surety, Owner or other party shall be considered plural where applicable.

OWNER:
(Name, legal status and address)

City of St. Pete Beach
155 Corey Avenue
St. Pete Beach, FL 33706

BOND AMOUNT: $ 5% Five Percent of Amount Bid

PROJECT:
(Name, location or address, and Project number, if any)

On Call Construction Services, St. Pete Beach, FL

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

REVISED
RE: CERTIFICATE OF QUALIFICATION

The Department of Transportation has qualified your company for the type of work indicated below.

FDOT APPROVED WORK CLASSES:
DRAINAGE, FLEXIBLE PAVING, GRADING, GRASSING, SEEDING AND SODDING, HOT PLANT-MIXED BITUM. COURSES, INTERMEDIATE BRIDGES, MAJOR BRIDGE - BRIDGES OF CONVENTIONAL CONSTRUCTION WHICH ARE OVER A WATER OPENING OF 1,000 FEET OR MORE, MAJOR BRIDGE - CAST IN PLACE / POST-TENSIONED / SUPER-STRUCTURE, MAJOR BRIDGE - CURVED STEEL GIRDERS, MAJOR BRIDGE - MULTI-LEVEL ROADWAYS, MINOR BRIDGES, PORTLAND CEMENT CONCRETE ROADWAY PAVING, R&R INTERMEDIATE BRIDGES ("R&R" IS REPAIR AND REHABILITATE), R&R MINOR BRIDGES, SIDEWALK, SOUND (NOISE) BARRIER WALL,CURB & GUTTER, ADA RAMPS, UNDERGROUND UTILITIES (WATER & SEWER), RIPRAP, CONCRETE PAVEMENT REPAIRS, SPALL REPAIR, STEEL SHEET PILING, RETAINING WALL, SEAWALL.

Unless notified otherwise, this Certificate of Qualification will expire **6/30/2027.**

In accordance with Section 337.14(1), Florida Statutes, an application for qualification must be filed within (4) months of the ending date of the applicant's audited annual financial statements.

If the company's maximum capacity has been revised, it may be accessed by logging into the Contractor Prequalification Application System via the following link:
HTTPS://fdotwp1.dot.state.fl.us/ContractorPreQualification

Once logged in, select "View" for the most recently approved application, and then click the "Manage" and "Application Summary" tabs.

The company may apply for a Revised Certificate of Qualification at any time prior to the expiration date of this certificate according to Section 14-22.0041(3), Florida Administrative Code (F.A.C.), by accessing the most recently approved application as shown above and choosing "Update" instead of "View." If certification in additional classes of work is desired, documentation is needed to show that the company has performed such work.

All prequalified contractors are required by Section 14-22.006(3), F.A.C., to certify their work underway monthly in order to adjust maximum bidding capacity to available bidding capacity. You can find the link to this report at the website shown above.

Sincerely,

James E. Taylor II

EXHIBIT "D"

Conditional Federal/Grant-Funded Contract Addendum

(Place Conditional Federal/Grant-Funded Contract Addendum behind this page)

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

Federal/Grant Program: [insert]
Federal Awarding Agency: [insert]
Pass-Through Entity: [insert, if applicable]
Assistance Listing Number: [insert, if applicable]
Federal Award Identification Number: [insert, if applicable]
Award or Disaster Declaration Date: [insert, if applicable]
Project Number: [insert]
Special Award Conditions: [insert or attach]

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Authorize the City Manager to execute the Agreement with Southern Road and Bridge, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Action Request: Motion to authorize the City Manager to execute the Agreement with Southern Road and Bridge, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Strategic Objective: Reliable Infrastructure

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Proposals (RFP) for a task work order-driven Civil On-Call Construction Services contract. Five (5) responsive proposals were received on March 18, 2026. Following evaluation, the City's selection committee recommended award to Ajax Paving Industries of Florida LLC, BCS Construction Group Cathcart Construction Company Florida LLC, PCS Civil LLC, and Southern Road and Bridge LLC

- Qualifications and Experience
- References and Past Performance
- Capacity to Perform the Work
- Cost

The contract provides not-to-exceed unit prices for labor, materials, equipment, tools, transportation, and incidentals necessary to perform civil construction services on an as-needed basis throughout the City. Projects may include roadway and intersection improvements, drainage upgrades, ADA improvements, sidewalk construction, alley improvements, signing and pavement markings, recreational trails, traffic signal improvements, and

intelligent transportation system (ITS) infrastructure.

Work will be authorized by task order on an as-needed basis in an amount not to exceed annually appropriated funding. The initial contract term is three (3) years with the option for two (2) additional one (1) year renewals upon mutual agreement and annual appropriation of funds.

Approval of this agreement will provide the City with qualified contractors to perform civil infrastructure improvements in a timely and cost-effective manner, improve responsiveness to maintenance and capital project needs, and support implementation of the City's transportation, drainage, utility, and public infrastructure programs.

Funding:

301.5410.563000 Improvements Other Than Buildings (remaining balance $211,746.90)

301.5411.563000 Improvements Other Than Buildings (remaining balance $8,478,760.96)

301.5726.563000 Improvements Other Than Buildings (remaining balance $825,791.26)

Other CIP funding sources may be used based on the available annual budget

1. Southern Road and Bridge Contract Signed

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Civil On-Call Construction Services

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and **SOUTHERN ROAD AND BRIDGE, LLC**. (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Bids, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its 06/23/2026, public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed the Annual Budgeted amoun. Funding will be awarded by Task Orders.

b. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

c. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

d. Contractor must comply with any and all Federal, State, and local laws and regulations

now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

e. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.
   a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished

under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of (3) three years with (2) two, (1) one-year extensions from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement.

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured and providing coverage up through and including the final performance of any services provided

herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved, and any amount withheld is not subject to payment of interest by the City. The above provisions

will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:
    a. Standard Contract Addendum (Exhibit "A")
    b. Request for Bid/Proposal (Exhibit "B")
    c. Vendor Bid/Proposal (Exhibit "C")

d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:
Southern Road and Bridge, LLC.
2997 Alt 19
Palm Harbor FL 34683

As to City:
City Manager
City of St. Pete Beach
155 Corey Avenue
St. Pete Beach, FL 33706

attorney@stpetebeach.org

21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Contract Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this _____ day of _____, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and _____, hereinafter referred to as "Contractor", concerning that certain agreement dated the ____ day of _____, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian
cityclerk@stpetebeach.org

Phone: 727-363-9220
155 Corey Avenue
St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

I. INVITATION

The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The types of projects that may be assigned under this Contract shall include, but not be limited to:

- intersection/roadway improvements
- drainage upgrades and/or installations
- ADA upgrades and pedestrian/bicyclist improvements
- sidewalk installations and upgrades
- alley improvements
- median modifications
- signing and pavement markings
- recreational trails
- signal upgrades and installations
- intelligent transportation systems (ITS) components upgrades

II. STATEMENT OF WORK

PART I: GENERAL REQUIREMENTS

1. SPECIAL CONDITIONS

A. **Local Preference, Location Points and Tie Breakers**

Location preferences do not apply due to the fact that some task orders may be funded with state or federal dollars.

B. **Minority Business Enterprise Policy**

Minority Business Enterprise Evaluation Criteria do not apply due to the fact that some task orders may be funded with state or federal dollars.

C. **Scrutinized Companies**

Scrutinized Companies with activities in Sudan List or activities in the Iran Petroleum Energy Sector List do not apply due to the fact that some task orders may be funded with state or federal dollars.

D. **Bonding and Credit**

Contractor/Vendor shall provide a letter of bondability showing their maximum bonding capacity.

E. **Contract Term**

This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

F. **Contract Pricing**

Contract prices for equipment and/or service will remain firm through the first three (3) contract years. Sixty (60) days prior to the contract renewal date, Contractor/Vendor may request a price adjustment. The price adjustment and justification must be submitted in writing, and be approved by the City. Said price increase may not, under any circumstances, exceed three (3) percent of the Construction CPI. No retroactive contract price adjustments will be allowed. If the Contractor/Vendor fails to submit a price adjustment within the sixty (60) days prior to the contract renewal date, current contract pricing will continue for the contract renewal period.

G. **Work Assignments**

All work to be performed shall take the following into consideration prior to assignment of any work to any Contractor/Vendor, at the discretion of the Procurement Manager:

1. **Estimated Cost < $250,000.00:**

The City retains the right to select any Contractor/Vendor to whom a multiple-award contract has been made when the opportunity to submit a quote for any job whose estimated cost is less than Two Hundred & Fifty Thousand Dollars ($250,000.00).

2. **Estimated Cost > $250,000.00 and < $500,000.00:**

The City shall obtain three (3) quotes from any Contractor/Vendor to whom a multiple vendor award has been made, for those jobs whose estimated cost is greater than Two Hundred & Fifty Thousand Dollars ($250,000.00) and less than Five Hundred Thousand Dollars ($500,000.00).

3. **Estimated Cost > $500,000.00:**
   a. The City retains the right to separately and competitively bid any and all projects whose cost estimates are greater than Five Hundred Thousand Dollars ($500,000.00). The determination will be made by the City Procurement Manager.
   b. Projects that exceed Five Hundred Thousand Dollars ($500,000.00) may not be sub-divided into separate projects in order to circumvent such requirement.

4. **Reassignment of Work:**

The City retains the right and authority to reassign work to another Contractor/Vendor, at any time, for the following reasons:

a. The lowest Contractor/Vendor cannot comply with the specifications in cases of an emergency.
b. The lowest Contractor/Vendor cannot respond to the job requirements, at the time, due to scheduling conflicts, staffing considerations or other reasonable cause(s) for preventing their completion of the task as required.
c. The City shall have the option to solicit additional quotes, bids, or even professional opinion about a particular job when in its best interest and could engage the services of another company/Contractor/Vendor. This exception will always require advanced written notice and explanation by the requesting City Department to the Procurement Manager, for approval, before authorizing any contemplated work to be done. The receipt of the approved purchase order shall be understood that all work is to immediately begin on the project, per the project schedule and needs as identified by the City and as agreed upon by the Contractor/Vendor.

5. **Cumulative Work shall not exceed $4,000,000.00:**

The cost of all work completed by a Contractor/Vendor shall not exceed Four Million Dollars ($4,000,000.00) in a calendar year. If all costs are expected to exceed this threshold, these services will need to be separately re-bid through issuance of a new set of bid specifications.

H. **Quotes**

1. The City will request a quote if and when needed. Vendors participating in the contract shall have ten (10) business days from written notification to respond to quotes, unless waived by the Procurement Manager. If work is an emergency, as determined by the City, vendors shall have (24) hours from email or phone notification to respond to quotes.
2. A Task Order Form will be provided to awarded Contractor/Vendor. A properly executed Purchase Order shall be issued for the work assignment and shall have the Task Order Form and all related paperwork attached as backup. The Purchase Order shall indicate the start and end dates for the project.
3. If the Contractor/Vendor does not wish to issue a quote for or cannot meet the requirements of the project, inclusive of the time given in which to complete the job; the Contractor/Vendor shall complete the Work Order Form by noting "No Quote" on the form itself and by also providing an explanation as to why they are not submitting a quote.
4. Final costs for any individual project shall not exceed the original approved and total cost for such project by more than ten percent (10%). Any and all anticipated project cost increases are subject to advanced approval by the Procurement Manager.
5. Any Contractor/Vendor that fails to submit a quote successively three (3) times in a row may have their contract cancelled due to non-performance.

I. **Notice to Proceed (NTP)**

All task orders $250,000.00 or less will use the purchase order as the Notice to Proceed (NTP). The start date and date or the number of day to complete the project must be included on the purchase order. If the start date is left off the purchase order then the date of the purchase order approval will default as the NTP start date. Projects over $250,000.00 will have a formal NTP issued through the Purchasing Division. All task orders must be reviewed by the Purchasing Division before a purchase order or NTP is issued.

J. **Liquidated Damages**

Liquidated damages will be assessed to the Contractor/Vendor/vendor for each consecutive calendar day completion of the project or work is delayed. The amount of liquidated damages will be dependent on the cost of the task order and will be calculated using the chart below.

Estimated Project Cost Over	Estimated Project Cost But Less than	Daily Charge Per Calendar Day
$0.00	$50,000.00	$960.00
$50,000.00	$250,000.00	$965.00
$250,000.00	$500,000.00	$1,245.00
$500,000.00	$2,500,000.00	$1,665.00
$2,500,000.00	$5,000,000.00	$2,715.00

K. **Project Spreadsheet Submittal**

Contractor/Vendor must submit a formal spreadsheet using the process below.

1. List of completed projects to include:
   a. Relevant project experience includes construction and delivery methods relevant to the type of project to be constructed utilizing the CM/GC method (or performing as a General Contractor/Vendor on similar types and sizes of projects).
   b. Describe no more than ten (10) and no less than five (5) projects in order of most relevant to least relevant (similar type of construction with a contract dollar amount of $500,000.00 or less) which demonstrates the firm's capabilities to perform such projects.
   c. For each project, the following information should be provided:
      i. Project name
      ii. Project location
      iii. Dates during which services were performed
      iv. Physical description (e.g. square footage, key components, site area)
      v. Brief description of Project Services performed by CM/GC or GC Firm.
      vi. Owners Information:
         a. Contact person
         b. Telephone number
         c. Email
         d. Project name
         e. Owner reference
         f. Original Contract Price
      vii. Amount of Change Orders by:
         a. Your Company
         b. Consultant
         c. Client/Entity
      viii. Final Project Price
      ix. Proposer should include a table with this information layout as follows:

Entity Name and Project Name	Contact Person Phone Email	Begin Project Amount	Change Orders by CMR	Change Orders by Engineer	Change Orders by Entity	Final Cost of Projects	Original Days for Construction	Final Construction Days

2. Any outstanding accomplishments of the firm that relates to the specific services being sought.

3. Any Quality Assurance and Value Engineering Programs should also be included.

2. STANDARD SPECIFICATIONS

The Project shall be constructed in accordance with these specifications, the Pinellas County Engineering Standard Details and the Florida Department of Transportation "Standard Specifications for Road and Bridge Construction", Latest Edition.

3. GOVERNING DOCUMENTS

The Specifications and all supplementary documents are essential parts of the Contract, and a requirement occurring in one is as binding as though occurring in all. They are intended to be complimentary and to describe and provide for a complete project. In case of discrepancy, calculated dimensions will govern over scaled dimensions.

The Contractor shall take no advantage of any apparent error or omission in the specifications. If the Contractor discovers such an error or omission, they shall immediately notify the Project Manager. The Project Manager will then make such corrections and interpretations as may be deemed necessary for fulfilling the intent of the specifications.

4. COOPERATION WITH OTHERS

The Contractor shall cooperate with the owners of any underground or overhead utilities in their removal and rearrangement operations in order that these operations may progress in a reasonable manner and that service rendered by these parties will not be interrupted.

A. Permits

1. City ROW Use Permit: The Contractor will obtain a Right of Way Use Permit from the City Permits Division located at 155 Corey Avenue, Florida. There will be no fee for this permit.
2. Public Services will require shop drawings, schedule, and the location of staging areas at the pre-construction meeting. Where the Contractor wishes to use private property, he shall obtain permission from the owner in writing and submit a copy at the first meeting.
3. The Contractor will be responsible for the requirements of all permits. There may be FDOT permits required for this project.

5. LINES, GRADES AND CONSTRUCTION SURVEYING

The Contractor shall lay out the work from the benchmarks, grades, dimensions, points and lines noted on the working drawings, established at the site, or supplied by the Project Manager. All work of every description shall be laid out and checked by the Contractor who will be held solely responsible for its correctness, and the Contractor shall pay for all expenses in connection with this work. The Contractor shall request clarification from the Project Manager of any errors, inconsistencies or omissions which they may discover. It is the Contractor's responsibility to review every street prior to milling and paving, including the inspection of overhead tree limbs, overgrown grass on pavement, manholes and gate valves.

The work may be checked by the Project Manager, and in the event of a discrepancy, their decision shall be final. No special compensation will be made to the Contractor to defray costs of any work or delays occasioned by making surveys and measurements, tests, or inspections, but such costs shall be considered as having been included in the price stipulated for the several items of work to be done under this Contract.

All attempts shall be made to protect existing property corner monumentation. The monumentation must be identified and marked prior to construction to ensure its permanency. All survey monuments, property corners, and benchmarks, which may be disturbed during construction, shall be referenced and replaced by the Contractor. All monuments and benchmarks disturbed or destroyed by the Contractor or any of his forces through accident or negligence shall be replaced by a Florida Licensed Professional Land Surveyor at the Contractor's expense. All survey markings shall be brought to the attention of the Project Manager.

6. MAINTENANCE OF DETOURS

The Contractor shall repair, at his expense, all potholes and other localized failures on streets which are used as detour routes to facilitate construction operations.

7. REPLACEMENT OF TRAFFIC, STREET SIGNS, SIGNAL LOOPS AND MAILBOXES

The Contractor shall remove and re-erect all existing traffic, street signs and mailboxes within the project site at his own expense for those which must be moved or relocated to permit construction operations.

The Contractor shall notify the City prior to disturbing any traffic signal loops and the City will install new traffic signal loops under a separate contract.

8. USE OF PREMISES

The Contractor shall confine all apparatus to the roadway or right-of-way in which the work is being performed and will not unreasonably encumber these premises with such apparatus, materials, supplies, and equipment. The Contractor shall promptly remove and dispose of all debris resulting from his operations.

9. PROSECUTION OF WORK/ LIQUIDATED DAMAGES

The Contractor shall begin work on any project/road no later than fourteen (14) calendar days after receipt of the "Notice to Proceed"; and shall diligently prosecute the same to project completion prior to the expiration of the total number of calendar days determined necessary for the project, from the date of said "Notice to Proceed".
Failure to complete each project within the determined number of calendar days shall cause the Contractor to be subject to the provisions for Liquidated Damages. The Contractor shall pay to the City as fixed liquidated damages for each calendar day of delay until the work is complete or accepted, and the Contractor and their sureties, jointly and severally, shall be liable for the amount thereof:

A. For each Task Work Order issued, the City project manager will determine the required number of days for completion of all work as well as the amount for liquidated damages, as appropriate.

B. Liquidated Damages will be assessed in accordance with Part I, 2. Special Conditions, J. Liquidated Damages of these bid specifications.

** Please refer to City of St Pete Beach Terms and Conditions, “Liquidated Damages, Penalties and Non-Conformance to Contract”

10. CONSTRUCTION SCHEDULE

A. Work shall be performed on an “as needed” basis for a **three (3) year contract period**. Upon mutual consent, this agreement may be extended for **two (2) additional one (1) year periods**, subject to the same terms and conditions and available funding being in place. No guarantee of volume or quantity of work is intended.

B. At the direction of the City of St Pete Beach, the Contractor will not be allowed to proceed with the scheduled work until restoration of preceding work areas are restored to the satisfaction of the City of St Pete Beach. It is the intent of this project to:

1. Start paving each street no later than three (3) working days after milling each street. If the street has not been paved after three (3) working days, a fee equal to the daily amount for liquidated damages indicated in Item #2J (above) will be assessed until the street has been paved. The time limit for streets to be paved where sewer manhole castings or water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve boxes have been adjusted or replaced.

2. Complete restoration including temporary striping and clean-up, shall be finished in no more than five (5) working days after the completion of paving activity and as directed by the City.

3. No work shall be done during the week between the hours of 9:00 PM and 6:00 AM, or between the hours of 9:00 PM and 9:00 AM on weekends or holidays; except for emergency work by a public service utility or by other permit approved by the City.
4. Night work may be established by the Contractor as regular procedure by obtaining the written permission of the City. Such permission may be revoked at any time by the City, if the Contractor fails to maintain adequate equipment and supervision for the proper execution, control, and safety of the work at night.

C. Work may need to be performed under more urgent timeline at the direction of the City of St Pete Beach. The Contract bid form includes pay items for Emergency Mobilizations for such occurrences. The Contactor shall respond to Emergency Work Requests within 24 hours and should expect to mobilize in less than 72 hours.

11. CONTRACTOR'S ACCEPTANCE OF CONDITIONS

The provisions of this Contract shall control any inconsistent provisions contained in the specifications. All Drawings and Specifications have been read and carefully considered by the Contractor, who understands the same, and agrees to their sufficiency for the work to be done.

It is expressly agreed that under no circumstances, conditions or situations shall this Contract be more strongly construed against the City than against the Contractor and his Surety.

Any ambiguity or uncertainty in the Drawings or Specifications shall be interpreted and construed by the Project Manager, or their designee, and their decision shall be final and binding upon all parties.

It is distinctly understood and agreed that the passing, approval and/or acceptance of any part of the work or material by the City, the Project Manager, or by any agent or representative as in compliance with the terms of this Contract and/or of the Drawings and Specifications covering said work, shall not operate as a waiver by the City of strict compliance with the terms of this Contract, and/or the Drawings and Specifications covering said work; and the City may require the Contractor and/or his surety to repair, replace, restore and/or make to
comply strictly and in all things with this Contract and the Drawings and Specifications any and all of said work and/or materials which within a period of one year from and after the date of the passing, approval, and/or acceptance of such work or material, are found to be defective or to fail in any way to comply with this Contract or with the Drawings and Specifications.

This provision shall not apply to materials or equipment normally expected to deteriorate or wear out and become subject to normal repair and replacement before the condition is discovered. The Contractor shall not be required to do normal maintenance work under the guarantee provisions. Failure on the part of the Contractor and/or his surety, immediately after notice to either repair or replace any such defective materials and workmanship, shall entitle the City, if it sees fit, to replace or repair the same and recover the reasonable cost of such replacement and/or repair from the Contractor and/or his surety, who shall in any event be jointly and severally liable to the City for all damage, loss and expense caused to the City by Reason for the Contractor's breach of this Contract and/or his failure to comply strictly and in all things with this Contract and with the Drawings and specifications.

12. HAZARDOUS MATERIALS

The Contractor shall be responsible for the independent inspection and certification of the removal, transportation and disposal of all identified and all unidentified hazardous materials located within the project site.

13. JOB CONDITIONS

A. The Contractor is to provide the City with a working schedule prior to commencing the project. The City reserves the right to revise and/or adjust the schedule accordingly.

B. City Notification**:** At least 72 hours in advance of closing, or partially closing, any street, alley, or other public thoroughfare, the Contractor shall notify the Engineering Division of the Public Services Department, and immediately notify the same agencies of the reopening.

C. Customer Notification**:** The City of St Pete Beach residents occupying a home on the street to be milled and paved shall be notified seven (7) days before the construction of the street begins. This is completed by the following:

1. A door hanger notice will be provided by the Department of Public Services. It shall contain the reason for the construction, the overall length of time with dates, any problems that may be encountered and other important information regarding the project. The Contractor is responsible for the installation of the door hanger notices no later than seven (7) working days before the construction of the street begins.

2. The Contractor shall hand this notice to each resident. If the resident is not available, the Contractor is to place the door hanger on the doorknob. In certain sensitive areas, usually business areas and as requested by the Engineer, each customer may be asked to sign a signature sheet with their name, address, and signature. The original shall be given to the Department of Public Services before any construction commences.

D. Utility Emergency Access**:** All fire hydrants, valves, water meters and backflow assemblies shall be free of all construction material and equipment and in plain view for easy emergency access or necessary maintenance by the City crews.

E. Pedestrian or School Crossings**:** Where the work crosses or interferes with school or pedestrian crossings, extreme care shall be taken by the Contractor to insure the safety of the school children or other pedestrians.

F. Temporary Staging Areas**:** The Contractor shall obtain all temporary construction staging areas approvals required and shall not encroach onto private property unless a written agreement has been made between the property owner and the Contractor; or onto public property unless a written agreement has been made and approval by the Purchasing Division's designee has been received prior to using the land. The Contractor shall assume full responsibility for the protection and safekeeping of materials stored at the staging areas.

G. Erosion Control**:** Prior to construction, all efforts for siltation/erosion control will be taken, including the use of turbidity screens, hay bales, and sod replacement at the earliest possible time prior to and after excavation/grading. Sediment/erosion controls should be used around drainage structures and any areas to mitigate erosion on or off the project site. The Contractor is responsible for any removal of asphalt debris in manholes or drainage structures.

H. Road Hauling**:** The existing paved roads in the City shall be used for transporting material required for construction of the project. The Contractor should be aware that any road that is damaged during construction due to truck/equipment involvement would be the responsibility of the Contractor to correct. The Contractor shall contact the City for specific routes to be used during construction.

I. Water on Street**:** All water shall be removed, and the streets dry prior to paving. No paving shall take place during a rainstorm event.

J. Towing of Vehicles**:** The City will remove any cars parked in the way of the resurfacing project as long as proper notification has been given as stated under Section 13.c. (above) of the Scope of Work.

K. Clippings**:** Where grass, tree roots or other vegetation has grown over or above the edge of the asphalt, it shall be removed to the existing edge of asphalt by the Contractor prior to paving the street.

L. City Utilities**:** If work by the Contractor results in damage to City owned utilities; the Contractor shall repair the damage immediately at no cost to the City. If the Contractor does not respond immediately to repair the damaged utility, the City Utilities Department will make the repair and bill the Contractor for the costs incurred.

M. Dumpsters**:** The City will relocate all dumpsters in the way of this project. The Contractor is to provide written notice to the City forty-eight (48) hours in advance when said dumpsters need to be moved.

N. Disturbed Areas**:** All areas disturbed by the construction shall be restored to a condition at least equal to the pre-construction conditions or to what shall be approved by the Project Manager.

O. Security**:** The Contractor shall be responsible for the site security and shall determine whether full time watchmen will be required. The Contractor shall inspect the area daily and take whatever measures necessary to protect the safety of the public, workmen and materials both day and night.

P. Brick/Driveways**:** The Contractor shall be responsible for the tack coat not being spread to the brick crosswalks, brick intersections, brick speed tables, driveways or other similar areas due to the hauling of the asphalt. These areas shall be covered with sand or other City approved material. If tack appears on these items from the Contract, it shall be the responsibility of the Contractor to remove it.

Q. Interference with Others**:** The Contractor shall coordinate with Pinellas Suncoast Transit Authority or any public agency to notify the agency of any and all potential disruption in service. The Contractor shall not interfere with materials, appliances, or workmen of the City, Private Utility Companies, or any other contractor, who may be performing work at the same sites. All contractors and other parties involved shall have equal rights as far as practicable, to the use of all roads and grounds, except as otherwise provided by these specifications. The decision of the Project Manager shall govern in cases of disagreement between contractors or other parties regarding such use.

R. Public Safety**:** The Contractor shall provide, erect, and maintain continually, seven days per week and twenty-four hours per day, all necessary barricades, reflectorized signs, signals, flashing lights, red lights, "danger" or "caution" or "street closed" signs, etc., and take all necessary precautions necessary for the protection of the work and the safety of the public. The Contractor shall also provide a watchman at all places where the work causes obstructions to normal traffic or constitutes in any way a hazard to the public.

S. Cleaning Up**:** The Contractor shall always keep the construction area clean from accumulation of waste material or rubbish, including storage areas. The Contractor shall remove any rubbish, tools, scaffolding, equipment and materials from and about the premises, which do not belong to the City, prior to completion of the work. The Contractor shall leave the work and premises, following the completion of work, in a clean and workmanlike condition satisfactory to the Project Manager or their representative.

T. Coordination of Details with the County Sheriff**:** Any traffic detour plan must be submitted by the Contractor for approval to the Engineer of Record, the Engineering Division of the Public Services Department and the Pinellas County Sheriff at least two (2) weeks prior to the implementation of said detour in order to provide adequate time for review. Detour plans must include all streets involved in the detour.

U. Maintaining Proper Drainage Flow**:** No drainage structure or paved waterway shall be blocked by the new pavement work. New pavement shall be feathered or tapered towards the inlet opening. This task is to be included as part of the paving operation and there shall be no separate payment for this work. Any debris entering the drainage structure during construction is to be removed by the Contractor.

V. Responsibility of the Contractor**:** The Contractor shall be entirely responsible and liable for all damage or injury as a result of his operations to all other adjacent public and private property, structures of any kind and appurtenances thereto met with during the progress of the work. The cost of protection, replacement in their original locations and conditions or payment of damages for injuries to such adjacent public and private property and structures affected by the work, whether or not shown on the drawings and the removal, relocation and reconstruction of such items called for on the drawings or specified shall be included in the various Contract Items and no separate payments shall be made thereof. Where such public and private property, structures of any kind and appurtenances thereto are not shown on the drawings and when, in the opinion of the Project Manager to avoid interference with the work, payment therefore will be made as provided for extra work in the Agreement. The Contractor is expressly advised that the protection of the buildings, structures, tanks, pipelines, and related work adjacent and in the vicinity of his operations, wherever they may be, is solely his responsibility.

W. Protection of Trees, Lawn & Sod**:** All trees, shrubs and sod shall be adequately protected by and in accordance with all ordinances governing the protection of the trees. No materials shall be placed so as to injure such trees, shrubs and sod. Trees, shrubs and sod destroyed by negligence of the Contractor or his employees shall be replaced by him with new stock of similar size and age, at its proper season and at the sole expense of the Contractor. Trees close to the work shall be protected against injury. The Contractor shall trim all branches and roots in the road that are necessary to complete the project and are liable to damage his operations, but in no case shall any tree be cut or removed without prior notification of the Project Manager. It is the Contractor's responsibility to inspect all roads that are to be milled and resurfaced. All injuries to bark, trunk, limbs, and roots of trees shall be repaired by dressing, cutting, and painting according to approved methods, using only approved tools and materials under the direction of City Staff. Lawn areas shall be left in good condition as before the starting of the work. Where sod has been removed shall be restored with new sod in a good workmanship manner approved by the resident or the Project Manager. The sod shall match existing grass and shall have no visible broad leaf weeds or foreign grasses. Water for the sod shall be supplied by the Contractor in sufficient quantities required to keep the grassed areas moist for a period of one month from the date of installation. The Contractor shall guarantee the satisfactory growth for a 90-day period.

X. Noise**:** The Contractor shall eliminate noise to as great an extent as practicable at all times. Air compressing equipment shall be equipped with silencers and the exhaust of all gasoline motors or other power equipment shall be provided with mufflers. In the vicinity of hospitals and schools, special care shall be used to avoid noise or other nuisances. The Contractor shall strictly observe all local regulations and ordinances covering noise.

Y. Access to Public Services**:** No materials used in the construction of the work shall be placed as to prevent free access to all fire hydrants, valves, manholes, driveways and roadways.

14. SUBSTITUTIONS

Whenever material or equipment are specified or described in the Contract documents by using the name of a proprietary item or the name of a particular supplier the naming of the item is intended to establish the type, function and quality required. Unless the name is followed by words indicating that no substitution is permitted, materials or equipment of other suppliers may be accepted by Project Manager if sufficient information is submitted by Contractor to allow Project Manager to determine that the material or equipment proposed is an approved alternate to that named. The procedure for review by the Project Manager will include the following as supplemented in the General Requirements. Requests for review of substitute items of material and equipment will not be accepted by Project Manager from anyone other than Contractor. If Contractor wishes to furnish or use a substitute item of material or equipment, Contractor shall make written application to Project Manager for acceptance thereof, certifying that the proposed substitute will perform adequately the functions and achieve the results called for by the general design, be similar and an approved alternate to that specified and be suited to the same use as that specified. The application will state that the evaluation and acceptance of the proposed substitute will not prejudice Contractor's achievement of Substantial Completion on time, whether or not acceptance of the substitute for use in the work will require a change in any of the contract documents (or in the provisions of any other direct contract with City for work on the Project) to adapt the design to the proposed work is subject to payment of any license fee or royalty. All variations of the proposed substitute from that specified will be identified in the application and available maintenance, repair and replacement service will be indicated. The application will also contain an itemized estimate of all costs that will result directly or indirectly from acceptance of such substitute, including costs of redesign and claims of other Contractors; affected by the resulting change, all of which shall be considered by Project Manager in evaluating the proposed substitute. The Project Manager may require Contractor to furnish at Contractor's expense additional data about the proposed substitute.

15. MINIMUM QUALIFICATIONS

The City has established minimum qualifications for Contractor expertise and experience regarding the subject project as follows:

A. The Contractor must provide a minimum of three (3) project references and may provide a maximum of five (5) project references for each of the five (5) criteria listed below.

B. Each project reference must have been successfully completed in the ten (10) years preceding the bid opening.

C. All criteria do not need to be satisfied by each submitted project reference, however, all criteria must have been satisfied two (2) times by the submitted project references.

D. Any project for which references are provided may have been self-performed with Contractor’s employees or performed by a subcontractor who is part of the Contractor’s team for this project.

E. The Contractor qualification requirements include the following:

1. Construction of site work including clearing, grubbing, and fine grading.
2. Construction of flexible and rigid pavement roadways, alleys, and trails.
3. Construction of sidewalk and ADA accessibility improvements.
4. Construction of stormwater utility upgrades.

5. Construction of signal, lighting, and intelligent transportation system (ITS) component upgrades.

[END OF PART I]

PART II: PROGRESS MEETINGS

1. **FREQUENCY**

Progress meetings will be held every other week or less, with the first meeting fourteen (14) days after the pre-construction meeting or fourteen (14) days or less after the date of the Notice to Proceed.

The City has the right to hold called meetings as required by the progress of the work.

2. **ATTENDANCE**

The following people should attend progress meetings, as applicable:

- Project Manager
- City Inspector Contractor
- Subcontractors as appropriate to the Agenda Suppliers as appropriate to the Agenda Others as appropriate

3. **PROGRESS SCHEDULE**

The Contractor shall submit a detailed schedule before work is to be started. It shall indicate the sequence of the work, the time of starting and completing each part.

4. **SUGGESTED AGENDA**

- Review approval of minutes of previous meetings. Review of work progress.

Field observations, problems, and conflicts. Problems which impede the construction schedule. Review of off-site fabrication, delivery schedules.

- Corrective measures and procedures to regain projected schedule, if necessary. Revisions to construction schedule.
- Progress schedule during succeeding work period. Coordination of schedules.
- Review submittal -- expedite as required. Maintenance of quality standards.
- Pending changes and substitutions. Shop drawing submittals.
- Review proposed changes for:
  Effect on construction schedule and on completion date. Effect on other contracts of the project.
  Other business

[END OF PART II]

***P*ART III: TECHNICAL SPECIFICATIONS**

1. GENERAL

Furnish all necessary labor, equipment, and materials to construct various types of public services infrastructure projects as outlined in Part I General Requirements, 1. Introduction.

Tasks may involve milling existing asphaltic concrete surfaces to specified depths. Excess milled material should be transported to an asphalt reprocessing plant. The streets specified should be surfaced with Superpave asphaltic concrete mix. Additionally, tasks include necessary adjustments or replacements of existing structures, traffic control, sweeping, cleanup, placement of painted and thermoplastic pavement markings, and installation of curb, gutter, and sidewalks.

2. MOBILIZATION

A. The Contractor is solely responsible for providing security for all materials stored on- site during the construction activities.
B. The Contractor shall provide ten (10) calendar days notification to the Engineer prior to initiating mobilization to the site and initiating work. The Contractor will also provide copies of all permits that have been obtained to the engineer prior to initiating work associated with such permits.
C. The Contractor shall restrict their operations to the designated work area and ensure that construction activities do not disrupt normal operational activities of the City's services.

D. The Contractor is responsible for visually inspecting the site to note obstructions or access difficulties.

E. The Contractor is responsible for providing and/or maintaining access to the work site to facilitate all construction, inspection and testing activities.

F. The contractor shall deliver/post notifications to affected citizens and business owners seven (7) calendar days prior to construction. A form of the notification must be approved by the City prior to distribution.

3. MILLING

A. Furnish all necessary labor, equipment and materials to mill pavements as specified, and haul the milled material to the reprocessing plant.

B. The methods used for milling shall meet all applicable portions of Section 327 - Milling of Existing Asphalt Pavement, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
C. All manhole castings and water valve boxes shall be adjusted and/or replaced by the Contractor, as specified, after milling is completed.

D. When the full street is required by these documents to be milled, the desired finished cross slope is to be 2%.

E. The unit price per square yard (SY) shall be full compensation for all work required to perform the milling, loading, hauling, sweeping, clean-up, and all incidentals necessary to complete the work specified in this section.

F. Milling of existing asphalt speed humps and speed tables is required as specified in the plans.

4. CONCRETE CURB AND GUTTER (INSTALLATION)

A. All Concrete Curb and Gutter work shall conform to the requirements of Section 520, "Concrete Gutter, Curb elements and Traffic Separator," of the FDOT Standard Specifications and placed in conformity with the lines, grades, dimensions and notes shown in the contract plans.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of the concrete being deposited against them. They shall be straight and free from warp or bends and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of a cross-section approved by the Project Manager and shall have a flat surface on top. The Contractor shall use flexible forms for all curb and gutter constructed on a radius.

C. Excavation shall be to the required depth, and the foundation material upon which these items are to be placed shall be compacted as specified in Section 120-9, "Compaction Requirements" of the FDOT Standard Specifications.

D. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated, and sufficient mortar brought to the surface. The top of the section shall be floated smooth, and its edges rounded to the radius shown on the plans. No concrete shall be placed during unfavorable weather conditions.

E. Except for machine placed concrete, at the option of the Contractor, joints may be formed by the use of dummy joints (either formed or sawed) or by the use of sheet metal templates. If sheet metal templates are used, they shall be at least as long as the depth of the curb section. They shall be set perpendicular to the top and face of the curb form and shall be held firmly in place during the placing of concrete. Templates shall remain in place until the concrete has set sufficiently to hold its shape, but shall be removed while the forms are still in place.

For machine placed concrete, unless an alternate method is approved by the Project Manager, contraction joints shall be sawed. The joints shall be sawed as soon as the concrete has hardened to the degree that excessive raveling will not occur and before uncontrolled shrinkage cracking begins.

Contraction joints shall be spaced at intervals of ten feet (10') except where a lesser interval is required for closure, but no section shall be less than four feet (4') in length. On medians and traffic separators, cuts shall align across from each other. Cuts shall also align with contraction joints of sidewalks adjacent to the curb.

Expansion joints shall be constructed at all structures, at all ends of curb returns, except that expansion joints shall not be constructed within twenty (20) feet of an island nose. They shall be located at intervals of 500 feet between other expansion joints or ends of a run. The expansion joint filler shall be ½ inch in width and shaped to the cross section of the curb.

F. The forms shall be removed within twenty-four (24) hours after the concrete has been placed, and minor defects then filled with mortar composed of one part of Portland cement and two parts of fine aggregate. Plastering will not be permitted on the face of the curb or the gutter. Any rejected curb and gutter shall be removed and replaced at no additional cost to the City. All exposed surfaces shall be given a brush finish while the concrete is still green. For any surface areas, however, which are too rough or where other surface defects make additional finishing necessary, the Project Manager may require that the curb be rubbed to a smooth

surface with a soft brick or wood block, with water used liberally. Also, if necessary further to provide a suitable surface, the Project Manager may require additional rubbing, using a thin grout or mortar, either of which additional rubbing shall be at no additional cost to the City.

G. When surface finishing is completed, the curb and gutter shall be cured per applicable paragraphs of Section 520-8, of the FDOT Standard Specifications.

H. After the concrete has set sufficiently, but not later than three (3) days after pouring, the spaces in front and back of the curb and gutter sections shall be refilled to the required elevation, with suitable material, adequately compacted. In sections where sidewalk is to abut the curb, the backfill shall be placed and compacted to a suitable depth for the placing of sidewalk forms. In all other sections of the work, the back of the curb shall be backfilled to the required elevation with suitable material, which shall be placed and thoroughly compacted in layers of not more than six inches (6") in thickness.

I. Where a base is to be constructed adjacent to a curb and gutter, the curb and gutter shall be properly backfilled and shall set for a period of not less than seven (7) days before any base material is placed against it.

J. The top and face of the finished curb and gutter shall be true and straight, and the top surface of curbs shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top or face of the curb or on the surface of gutters, the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

K. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per linear foot (LF) for constructing concrete curb, curb and gutter, or valley gutter, complete in place and accepted, and no additional compensation will be allowed therefore.

5. CONCRETE SIDEWALKS (INSTALLATION)

A. All Concrete Sidewalk work shall conform to the requirements of Section 522, "Concrete Sidewalks and Driveways", of the FDOT Standard Specifications and these Special Provisions and placed in conformity where so ordered by the Project Manager.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of concrete being deposited against them. They shall be straight, free from warp or bends, and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of cross-section approved by the Project Engineer and shall have a flat surface on top. The Contractor shall use flexible forms for all headers constructed on a radius.

C. Tree roots within the sidewalk area shall be removed to a minimum depth of one foot (1') below the specified subgrade surface. If a contractor must cut tree roots, sharp cuts shall be made. All roots greater than 2” shall be cut clean with a hand saw. The contractor shall hand dig near the roots and saw the roots, heavy mechanical equipment shall not be used. Broken roots shall be sawed 2” behind the ragged end. Roots smaller than 2” may be cut with a sharp-edged hand tool. Crushed or torn roots are more likely to allow decay. Sharply cut roots produce a flush of new roots helping the tree to recover from its injury. If tree roots larger than 6” must be cut, the Contractor shall inform the City Engineer or his representative prior to cutting for field direction. All boulders, organic material, soft clay, spongy material and any

other objectionable material shall be removed and replaced with material approved by the Engineer.

Before placing the forms for sidewalks, the surface upon which they are to be built shall be brought to the specified line, grade and elevation and uniformly compacted to a minimum 85 percent of AASHTO T-99 density. The materials shall be compacted at a moisture content such that the specified density can be uniformly attained. If necessary to attain the specified density, water shall be added to the material, or the moisture content shall be lowered by manipulation or allowing the material to dry, as is appropriate.

Fill areas including cut areas under the sidewalk which have been excavated more than six inches (6") below the bottom of sidewalk shall be compacted to a minimum of 95 percent of AASHTO T-99 density. The area to be compacted is defined as that area directly under the sidewalk and one foot (1') beyond each side of the sidewalk when right-of-way allows.

D. Transverse expansion joints shall be placed at intervals not exceeding eighty feet (80'), and at all places where a walk intersects or abuts a curb, driveway, building, other sidewalk or fixed objects. Expansion joints shall be constructed at each side of structures and at ends of curb returns, except that expansion joints shall not be constructed within twenty feet (20') of an island nose. Expansion joints shall be filled with ½ inch thick premolded joint filler conforming to the provisions in Section 932 of the Standard Specifications. The joint filler shall be shaped to the cross section of the sidewalk, shall extend from the surface to the subgrade, and shall be at right angles to the sidewalk surface.

   Contraction joints shall be sawed and shall be at intervals of four (4) to six (6) feet, or as shown on the plans. A slot approximately 3/16 inches wide and not less than 1 ½ inches deep shall be cut with a concrete saw after the concrete has set, and within twenty-four (24) hours of concrete being poured. Open type joints shall not be allowed.

E. Just prior to placing the concrete, the subgrade shall be moistened. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated and sufficient mortar brought to the surface. Thereafter, the surface shall be brought to a smooth even finish by means of a wooden float. No concrete shall be poured during unfavorable weather conditions.

F. The concrete shall be given a broom finish. The top of the finished sidewalk shall be true and straight, and the top surface of sidewalks shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top of the sidewalk the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

G. When surface finishing is completed, the sidewalk shall be cured per applicable paragraphs of Section 520-8, of the Standard Specifications. After concrete has set sufficiently, but no later than three (3) calendar days after pouring, the space alongside the sidewalk shall be backfilled, compacted and sodded or seeded as shown on the striping plans.

H. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per Square Yard for constructing sidewalks, complete in place and accepted, and no additional compensation will be allowed therefore.

6. LEVELING/RESURFACING

A. **Material:**

1. The material used for leveling shall be Superpave asphaltic concrete.

2. The material used for resurfacing shall be Superpave asphaltic concrete. Friction Course mixes may be used as specified by the City Project Manager.

B. **Construction Requirements:**

1. The leveling and resurfacing shall commence within three (3) working days after the milling of each street. The time limit for streets where castings or other water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve box has been adjusted or replaced.

2. The methods used for re-paving shall meet all applicable portions of Section 330 - Hot Mix Asphalt General Construction Requirements, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
3. The Contractor shall contact all utility and TV cable companies for location of their facilities. The exact location of their facilities, type of material used by the utility and TV cable, etc. shall be determined by the Contractor prior to any excavation work required by this Contract.

4. The Contractor shall be responsible for the protection of all pavements, sidewalks, and other improvements within the work area. All damage to such improvements, as a result of the Contractor's operations, beyond the limits of the work of pavement replacement as described herein, shall be repaired by the Contractor at the Contractor's expense.

5. Testing by City: Testing may be completed by an independent testing laboratory. If core borings are done to determine thickness and density, the Contractor is responsible for filling these holes in the pavement.

C. **Quality Control:**

1. The Contractor shall have a Quality Control Technician who has been certified by the State of Florida Department of Transportation as a Certified Asphalt Plant Technician, available at the asphalt plant at all times the Contractor is producing asphalt mix for use on this project.

2. The Contractor's quality control procedures, inspection and tests shall be documented, and that information shall be available for review by the Project Manager or his representative, throughout the course of the Contract.

3. The mix design shall meet the requirements of Section 334-3.2 for the type of Superpave asphalt indicated in the plans as set forth in Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. Friction course asphalt concrete must meet the requirements of Section 337 for the type of friction course indicated in the plans. Submit a Notarized Certification of Specification Compliance letter on company letterhead to the Engineer stating that all material produced and placed on the project was in substantial compliance with the specifications. The City may run independent tests during the project to determine the acceptability of the material.

7. UTILITY ADJUSTMENTS & REPLACEMENTS

A. **Adjusting Existing City Valve Boxes:**

1. The Contractor is to provide the necessary equipment to adjust the castings without damaging the existing structure. Adjustment would include being able to screw the top portion of the valve box up or down. Water valves that cannot be adjusted either up or down must be replaced under Section 6.2. If the structure is damaged, the Contractor is to replace the structure to its original condition at their cost.

2. The materials and construction methods for this work shall conform to applicable portions of Section 425 Inlets, Manholes and Junction Boxes, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.

3. The quantities to be paid for under this section shall be for the number of valve boxes, adjusted physically.

4. Structures, sections of structures, valve box sections or other items necessary for adjustment that are considered debris and that has been removed by the Contractor as part of the progress of work shall be removed from the project site by the Contractor at the end of each day's work. The Contractor is to remove all debris deposited in the structure as a result of the work performed.

B. **Castings:**

1. The Contractor shall notify the Project Manager or his representative on any questions regarding the prior adjustment or replacement of manhole frames or valve boxes.

2. Manhole frame and covers and valve boxes to be replaced are to be furnished by the Contractor.

3. Castings damaged by construction shall be replaced at no additional cost to the City of St Pete Beach.
4. All castings shall be adjusted and replaced in accordance with the manufacturers recommended requirements.

5. Adjusted or replaced castings shall be set at the grade of the proposed asphalt after compaction with not more than ¼" variation in 10 feet.

8. STRIPING AND MARKINGS

A. **Temporary Striping**: Temporary traffic stripes and markings will be required. Temporary markings shall be placed immediately after milling on any arterial/collector roads or within the immediate proximity of a school, and immediately after final asphalt on all roads. Before opening any re-paved area to traffic, temporary markings shall be applied as specified by the Project Manager. The paint used for this work shall be in accordance with the FDOT specification.

B. **Permanent Striping**: The Contractor shall place permanent traffic stripes and markings in accordance with reference points and alignment gathered by the Contractor prior to milling or overlay or in accordance with striping plans provided by the City of St Pete Beach. The Contractor shall use an Alkyd/Maleic thermoplastic compound and application methods meeting the requirements of Section 711 – Thermoplastic Pavement Markings, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. The thermoplastic compound shall be extruded on the pavement surface in a molten state by mechanical means with surface application of glass spheres, and upon cooling

to ambient pavement temperature shall produce an adherent pavement marking of the specified thickness and width and capable of resisting deformation.

C. A minimum of 21 days curing time after asphalt placement shall be allowed before the placement of any thermoplastic marking commences, with all thermoplastic markings to be completed within 28 days after asphalt placement.

D. The color of the thermoplastic shall be white, yellow, or blue as specified by the M.U.T.C.D.; and revisions thereof.

9. CLEANUP AND DUST CONTROL

A. The Contractor shall furnish and operate a minimum of one (1) mechanical sweeper for the purpose of removal of loose milled material. After milling and before resurfacing, the Contractor shall water the streets as necessary to prevent dust nuisance from his operations or from traffic.

B. Upon completion of the work on each street and before acceptance, the Contractor shall remove all surplus and discard materials and rubbish; shall restore in an acceptable manner all property, both public and private, which has been damaged during the prosecution of the work and shall leave each street in a neat and presentable condition throughout the entire length of the work under Contract. This shall include, but not be limited to the overspray of tack, and shall be completed within one (1) week after the resurfacing of each street.

C. Failure of the Contractor to comply with the Project Manager cleanup orders may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

D. 5% of the value of the work performed may be retained, should at the opinion of the City, restoration not be completed.

E. The cost of all work regarding Cleanup and Dust Control shall be included in the prices for other pay items, which are included in the Contract.

F. The Contractor shall reflect in the schedule, which shall be approved prior to construction, the time required for complete restoration. The Contractor shall strictly adhere to the schedule.

G. The Contractor shall take the necessary measures to prevent siltation and other construction related materials including tack coatings from entering storm inlet structures and manhole structures during the road repaving operation.

10. TRAFFIC CONTROL, STREET CLOSURES, DETOURS AND BARRICADES

A. The Contractor shall comply with all applicable portions of Section 102 – Maintenance of Traffic – Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision, and City requirements for traffic control.

B. The Contractor shall furnish all necessary barriers, lights, signs, and flag persons, to advise the public of detours and construction hazards. All flag persons on site shall be properly qualified.

C. The Contractor shall be responsible for compliance with additional public safety requirements, which may be ordered by the Project Manager or his authorized representative.

D. Failure of the Contractor to comply with the public safety requirements may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

E. The Contractor shall furnish and install, and upon completion of the work, promptly remove all signs and warning devices.

11. SODDING

A. **Description:** All sodding shall conform to the requirements of Section 570, FDOT Manual on Road and Bridge Construction, latest revision.

B. **Materials:**

1. **Sod:** Sod shall be Argentine Bahia as determined by the Project Engineer. Where sodding will adjoin, or be in sufficiently close proximity to, private lawns, other types of sod may be used if desired by the affected property owners and approved by the Project Engineer. The sod shall be taken up in commercial-size rectangles, preferably 12-inch by 24-inch or larger. Maximum allowable deviation from the standard widths and lengths shall be five percent (5%). Broken pads and torn or uneven ends will not be acceptable. The sod shall be sufficiently thick to secure a dense stand of live grass. The sod shall be live, fresh and uninjured, at the time of planting. It shall have a uniform soil thickness of three-fourths inch (3/4"), plus or minus one-fourth inch (1/4"), at the time of cutting. Measurement for thickness shall exclude top growth and thatch. The soil mat shall adhere firmly to the roots such that it will not break, crumble, or tear during handling and placing. No muck or heavy peat soil grown sod will be accepted. All sod shall be 97% free of weeds and other grasses. All sod shall comply with State and Federal laws with respect to inspection for plant diseases and insect infestation. An inspection certificate, required by law, may be requested by the Project Engineer for each shipment. All sod shall be placed as soon as possible after being dug and shall be shaded and kept moist from the time it is dug until it is planted. No sod which has been cut for more than 48 hours may be used unless specifically authorized by the Project Engineer.

2. **Commercial Fertilizer:** All commercial fertilizers shall comply with the State fertilizer laws. All fertilizers shall be uniform in composition, free flowing and suitable for application by mechanical spreader equipment. The chemical designation of the fertilizer shall be 12-8-8 or equivalent ratio. At least 50% of the phosphoric acid shall be from normal super phosphate or an equivalent source which will provide a minimum of two units of sulfur. The amount of sulfur shall be indicated on the quantitative analysis card attached to each bag or other container.

3. **Water:** The water may be obtained from any approved spring, pond, lake, stream or municipal water system. The water shall be free of excessive and harmful chemicals, acids, alkalies, or any substance which might be harmful to plant growth or obnoxious to traffic. Salt water shall not be used. The Contractor shall pay for all water used for the installation of sod.

C. **Construction Methods:**

1. **Soil Moisture:** Rough and fine grading shall be carefully executed to ensure that the final placed sod will conform to existing grades, free of depressions, “bird baths” or

bumps. The area on which sod is to be placed shall contain sufficient moisture for optimum results. During periods of high temperature and after all unevenness in the soil surface has been corrected, the soil shall be lightly irrigated immediately prior to laying the sod. Muddy soil shall not be created.

2. **Placing Sod:** The first row of sod shall be laid in a straight line with subsequent rows placed parallel to and tightly against each other. Lateral joints shall be staggered to promote more uniform growth and strength. Care shall be exercised to ensure that the sod is not stretched or overlapped and that all joints are butted tight in order to prevent voids which would cause air drying of the roots. The sod shall form a solid mass. The sod shall be firmly embedded by light tampering and rolling to ensure contact with the subgrade and to provide a smooth, even surface to eliminate voids under the root system making dry spots. The sod shall be staked on all slopes of 2:1 or steeper with pegs or similar material, driven through the sod blocks, six inches (6") into firm earth at suitable intervals.

3. **Watering:** The sod shall be watered with a fine spray immediately after placing, such that the underside of the new sod pad and soil immediately below the sod are thoroughly wet. The sod shall be kept in moist condition for the duration of the contract period (and in no case less than 4 weeks except in dry season it shall be 8 weeks). The moistened condition shall extend to at least to the full depth of the rooting zone. Water shall not be applied between the hours of 10:00 a.m. and 6:00 p.m.

D. **Maintenance:** The Contractor shall, at no additional expense to the City, maintain the sodded areas in a satisfactory condition until final acceptance of the project. Such maintenance shall include the filling, leveling, and repairing of any washed or eroded areas, as deemed necessary by the Project Engineer. The Project Engineer, at any time, may require resodding of any areas in which the establishment of the grass stand does not appear to be developing satisfactorily. The Contractor shall mow lawns as soon as there is enough top growth to cut with mower set at height of two inches (2") and shall repeat mowing as required throughout the duration of the project, to maintain such height. The Contractor shall not delay mowing until grass blades bend over and become matted and shall not mow when grass is wet.

E. **Measurement and Payment:** Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per square yard (SY) for furnishing, placing, maintaining and replacing sod, complete in place and accepted, and no additional compensation will be allowed therefore.

[END OF PART III]

SECTION 01425
FDOT STANDARDS REFERENCE

PART 1 GENERAL

1.01 Section Includes

Instruction on the use and applicability of FDOT standards on the project

1.02 Requirements

A. The Florida Department of Transportation, Standard Specifications for Road and Bridge Construction, latest non-metric edition ("Standard Specifications"), and Standard Plans for Road Construction, latest non-metric edition ("Standard Plans") are referenced herein as source documents for applicable technical specifications and construction details to be used in the construction of this project. The term “latest edition” refers to the latest edition implemented by FDOT and includes all FDOT implemented supplements at the time of bid advertisement.

B. Method of Measurement and Basis of Payment is to be in accordance with the Florida Department of Transportation Standard Specifications. Any item which is detailed in the Plans and for which material types, sizes and quality are also called out, the "Standard Plans" shall take preference over the plan detail unless otherwise directed by the Engineer.

C. Where the FDOT Standard Specifications use the reference "Department", replace "Department" with "Owner", except for when such reference is to Department Standards and evaluation criteria.

D. The Standard Plans are referenced herein as a source document for applicable construction items and details called for in the plans for which a specific plan detail is not provided. The Contractor shall construct the items called for in the plans in accordance with the "Standard Plans" unless otherwise defined or detailed in the plans or as directed by the Owner, Engineer or authorized representative.

E. The Standard Plans are available for download from the FDOT website at: https://www.fdot.gov/design/standardplans

F. In case of conflict, the Technical Specifications takes precedence over FDOT specifications for a particular construction requirement.

G. Copies of the latest implemented edition and implemented supplements of the Florida Department of Transportation Standard Specifications are available for download from the FDOT website at: https://www.fdot.gov/programmanagement/Implemented/SpecBooks

H. The Contractor shall inform the Owner and Engineer in writing of any specification that the Contractor feels is ambiguous or conflicting with other plan notes and details prior to the construction of the associated item. The Engineer will determine which information is to be used for construction. The Contractor is responsible for the removal and replacement of any item improperly constructed resulting from a misinterpretation of the specifications at no additional cost to the Owner.

PART 2 PRODUCTS - Not Used

PART 3 EXECUTION

3.01 General

The Contractor shall use Divisions Two (II) and Three (III) of the FDOT Specifications as they relate to methods of construction and material types and quality for the appropriate construction items contained within this project.

END OF SECTION

III. BID FORM

See attached Excel document.

IV. GENERAL CONTRACT TERMS

REQUEST FOR PROPOSALS
Civil On Call Construction Services

REQUEST FOR PROPOSAL SUMMARY
The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The "City" intends to **award multiple contracts** to vendors who can provide the best value for services. Vendors may submit proposals for all, some, or only one of the requested line items or categories. **It is not mandatory to submit a proposal for every item listed**. A bidder may bid on any, all, or none of the items. The "City" reserves the right to select multiple vendors to optimize cost-efficiency and capability across different segments of the project. Proposals will be evaluated based on capability, cost, and capacity to perform the specific line items requested.

PROPOSAL SUBMITTALS
Proposal documents must include a signed/notarized Contractor's Proposal Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit electronic proposals only. Bidders must submit electronically only through Bonfire platform. When bidding electronically, only one copy should be submitted.

Proposals shall include the following:

- A signed and notarized Proposer's Contract Proposal.
- Current proof of insurance certificate.
- A list of references and minimum qualifications as outlined in Section V.
- One copy of bid electronically submitted to Bonfire platform.

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http://www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

Proposers or persons wishing to submit a proposal on this project shall be licensed, and insured in accordance with the City's requirements

The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals, or accept any proposal or part thereof deemed to be in the best interests to the City of St. Pete Beach.

Electronic proposals must be submitted by **9:00 AM on April 08, 2026 (Deadline),** clearly marked as: **"Civil On Call Construction Services."**

PRE-PROPOSAL MEETING
An optional pre-proposal meeting will be held on **March 18, 2026 at 10:00 AM EST** via Microsoft Teams conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS
No oral interpretations will be made to any firms as to the meaning of the scope of work or any other

contract documents included in this **RFP.** All questions pertaining to the terms and conditions or scope of work of this Request for Proposal **(RFP)** must be sent in writing via email only to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 AM EST on March 25, 2026.** Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFP**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFP** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so. If the Proposer discovered the opportunity through the online platform (Bonfire), do not submit questions through these platforms. **Only questions emailed directly to the City Procurement Manager will be answered.**

BEGINNING DATE
The Proposer shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Proposer shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City.

COMPLETION OF WORK
The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

COSTS INCURRED BY PROPOSERS
All expenses involved with the preparation and submission of proposals to the City, or any work performed in connection therewith, shall be borne solely by the Proposers. No payment will be made for any responses received or for any other effort required of or made by; the Proposer's prior to contract commencement.

ORAL PRESENTATION
The City may require an oral presentation of the proposal at the Evaluation Committee's discretion. This could also include a formal interview of any and all members of the Proposer's contract management staff.

CONFLICT OF INTEREST
The Proposer represents that it presently has no interest and shall acquire no interest, either direct or indirect, which would conflict in any manner with the performance or services required hereunder, as provided for in FL Stat. 112.311. The Proposer further represents that no person having any interest shall be employed for said performance.

The Proposer shall promptly notify the City's representative, in writing, by certified mail, of all potential conflicts of interest for any prospective business association, interest, or other circumstance, which may influence or appear to influence the contractor's judgment or quality of services being provided hereunder. Such written notification shall identify the prospective business association, interest or circumstance, the nature of work that the Proposer may undertake and request an opinion of the city as to whether the association, interest or circumstance would, in the opinion of the City, constitute a conflict of interest if entered into by the Proposer. The City agrees to notify the Proposer of its opinion by certified mail within thirty days of receipt of notification by the Proposer.

LATE PROPOSAL OR MODIFICATIONS
Modifications in writing received prior to the time set for the proposal submittal will be accepted. Proposal modifications received after the time set for the proposal submittal will not be considered.

RELATED PARTIES AND MULTIPLE PROPOSALS

Where two (2) or more related parties each submit a proposal or multiple proposals are received from (1) Proposer, for any such contract, such proposals shall be judged non-responsive. Related parties mean Proposers or the principles thereof, which have a direct or indirect ownership interest in another Proposer for the same contract or in which a parent company or the principles thereof where one (1) Proposer has a direct ownership interest in another Proposer for the same contract.

RIGHT TO AUDIT
The City of St. Pete Beach reserves the privilege of auditing a Proposer's record as such records relate to purchases or work between the City and said Proposer. Records should be maintained for three years from contract date.

VARIANCE FROM STANDARD TERMS & CONDITIONS
All standard terms and conditions stated throughout the RFP apply to this contract except as specifically stated. This should be fully understood by Proposers prior to submitting a proposal.

ASSIGNMENT
The Proposer shall perform this contract. No assignment or subcontracting shall be allowed without prior written consent of the City. If a Proposer intends to subcontract a portion of this work, the Proposer must disclose that intent in the proposal. In the event of a corporate acquisition and/or merger, the Contractor shall provide written notice to the City within thirty (30) business days of Proposer's notice of such action or upon the occurrence of said action, whichever occurs first. The right to terminate this contract, which shall not be unreasonably exercised by the City shall include but not be limited to, instances in which a corporate acquisition and/or merger represent a conflict of interest or are contrary to any local, state, or federal laws. Action by the City awarding a proposal to a firm that has disclosed its intent to assign or subcontract in its response to the RFP, without exception shall constitute approval for purpose of this Agreement.

LOBBYING Lobbying of Evaluation Committee members, City employees, or elected officials regarding request for proposals, request for qualifications, bids or contracts, during the pendency of bid award or bid protest, by the bidder/proposer/protestor or any member of the bidder's/proposer's/protestor's staff, an agent of the bidder/proposer/protestor, or any person employed by any legal entity affiliated with representing an organization that is responding to the request for proposal, request for qualification, bid or contract, or has a pending bid protest is strictly prohibited either upon advertisement or on a date established by the City and shall be prohibited until either an award is final or the protest is finally resolved by the City Manager or Procurement Manager; provided, however, nothing herein shall prohibit a prospective bidder/proposer from contacting City departments to address situations such as clarification and/or questions related to the procurement process. For purposes of this provision, lobbying activities shall include but not be limited to, influencing or attempting to influence action or non-action in connection with any requests for proposal, request for qualification, bid or contract through direct or indirect oral or written communication or an attempt to obtain goodwill of persons and/or entities specified in this provision. Such actions may cause any request for proposal, request for qualification, bid or contract to be rejected.

ADDITIONAL REQUIREMENTS
The City reserves the right, by change order, to unilaterally add or delete locations/services, either collectively or individually, at the City's sole option, at any time after award has been made as may be deemed necessary or in the best interest of the City. In such case, the Proposer will be required to provide or reduce services to this contract in accordance with the terms, conditions, and specifications.

SERVICES AGREEMENT
A written agreement incorporating the RFP and the successful proposal will be prepared by the City, signed by the successful Proposer, and presented to the City Commission for approval and signature.

INTEGRITY OF REQUEST FOR PROPOSAL DOCUMENTS
Proposers shall use the original RFP forms provided within the RFP and enter information in the spaces where a response is requested. Proposers may use an attachment as an addendum to the RFP forms if sufficient space is not available on the original form for the Proposer to enter a complete response. Any modifications or alterations to the original RFP documents by the Proposer, whether intentional or otherwise, will constitute grounds for rejection of the RFP. Any such modifications or alterations a Proposer wishes to propose must clearly be stated in the Proposer's RFP response and presented in the form of an addendum to the original RFP documents.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in this Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the contract and requirements and shall determine acceptance of the work under this Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the contract terms in a fair and unbiased manner.
If a variation from any requirements is allowed, the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

EXAMINATION OF SITE
Proposer shall carefully examine project site and be familiar with the work required for the project, investigate all site conditions that may affect execution of work as detailed in the construction documents. Contact the City's Procurement Manager or their designee for changes or alterations before proceeding.

ASSURANCES
The responding Proposer shall provide a statement of assurance that the Proposer is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

ASSIGNMENT AND TRANSFER OF CONTRACT
The Proposer shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS
The Proposer shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PAYMENT
Payment shall be made to the Proposer for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

PERIOD OF PERFORMANCE
The target completion for the base Scope of Services is January 2027, corresponding to delivery of the Design-Build Readiness Package. The City reserves the right, at its sole discretion and subject to funding

availability, to amend this Agreement to extend the Consultant's services through final (100%) design. Any additional services shall be authorized by written amendment and negotiated in accordance with the Consultants' Competitive Negotiation Act (Section 287.055, Florida Statutes).

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Proposer will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Proposer without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Proposer's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Proposer to make a change in the Work, and if the City and the Proposer do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the Proposer shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Proposer believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, they shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Proposer first discovered the occurrence. The Proposer shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Proposer shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Proposer shall prepare proposals detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Proposer's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Proposer's proposals shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable proposal will not justify an increase in Contract Amount or Contract Time. Proposer agrees that it shall give the City access to any and all of Proposer's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Proposer for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Proposer shall be at his expense

without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Proposer or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Proposer proposals or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to be used shall be those used for the Proposer's costs, except that the term "Subcontractor" shall replace the term "Proposer," context permitting.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Proposer, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit.

In such case, the Proposer will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Proposer to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Proposer (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Proposer employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

PAYMENTS FOR WORK COMPLETED
All payments under this agreement shall comply with the requirements of Florida Statutes, Section 215.422, commonly referred to as the "Prompt Payment Law." This includes timely processing of invoices and adherence to statutory interest provisions for late payments. The Contractor shall submit detailed invoices for services rendered under this agreement. Each invoice must include: Purchase Order or Contract Number, Description of services provided, Dates of service, Total amount due. Payment will be made within 45 days of receipt of a proper invoice and acceptance of deliverables, as required by Florida law. If payment is not made within the statutory timeframe, interest penalties will apply in accordance with Section 215.422, Florida Statutes. Payments will be issued via electronic funds transfer (EFT) unless otherwise agreed in writing. Contractor must provide accurate banking information to facilitate EFT.

PAYMENTS WITHHELD
The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Proposer to make payments properly to Subcontractors or for labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Proposer

f) Failure of the Proposer to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS
Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Proposer, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such sums to the Proposer.

Before the approval of the final payment, the Proposer shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS
If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Proposer, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Proposer all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Proposer and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Proposer. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies

to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

LICENSES AND PERMITS

The Proposer shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the Proposer is responsible for non-compliance of all permit requirements, including all fines resulting from Proposer's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Proposer shall be responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the Proposer awarded the project, MUST also register their license with the City.

LABOR PROVISIONS

The Proposer and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed. The State of Florida prevailing wage law requires that the Proposer shall fully comply with all provisions contained in Section 215.19, "Schedule of Prevailing Wage Rates for Specified Public Construction." The wage rates set forth by such determination shall apply to this project.

INSURANCE

The Proposer shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Proposer's General Public Liability and Property Damage Insurance issued to the Proposer and protecting the Proposer from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Proposer or by any Subcontractor hired by the Proposer or anyone directly or indirectly employed by the Proposer or hired by the Proposer.

The successful Proposer shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Proposer or third party under the direction or control of the Proposer. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Proposer must furnish the City with Certificate of Insurance prior to commencement of work. An

approved Certificate of Insurance furnished by the Proposer's carrier to guarantee the Proposer being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Professional Liability Insurance $2,000,000 each occurrence.
- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY
The Proposer shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Proposer shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Proposer shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Proposer will provide security on off days and holidays. The Proposer shall be responsible for all charges incurred with such action.

The Proposer shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Proposer, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Proposer shall also protect adjacent property as required by law.

PROPOSAL REVIEW AND CONTRACT AWARD
Failure to submit all documents requested at the time of proposal may deem the Proposer's proposal ineligible for award. The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals. The contract shall be awarded by written notice to the responsible and responsive Contractor whose proposal is determined in writing to be the most advantageous to the City, taking into consideration the price and other criteria set forth in this request for proposals. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS
The laws of the State of Florida do apply to any purchase made under this Request for Proposal. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their proposal and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Proposer agrees to comply with all applicable portions of Fla. Stat. 448.095. Proposer must use the

U.S. Department of Homeland Security's E-Verify System, hhttps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Proposer shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Proposer with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Proposer shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Proposer must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Proposer's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Proposer may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and proposal costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statute by the Proposer, the Proposer may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all proposals, to waive irregularities and technicalities, and to request re-submission. If only one proposal is received by the proposal date and time listed, the proposal may or may not be rejected by the City depending upon proposal review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting proposals. The City reserves the right to award the contract to a responsible proposer submitting a responsible proposal, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, Proposers, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFP during any phase of the proposalding process. Failure to comply with the provision may result in disqualification of the Proposer, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFP shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE
Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION
The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS
The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience providing Task Work Order driven Civil On-Call Construction Services.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Civil On Call Construction Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Civil On Call Construction Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach
by: _____
(Print individual's name and title)

for: _____
(Print name of entity submitting sworn statement)

at: _____
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

_____
(FEIN)
or, if the entity has no FEIN, include the Social Security Number:

_____
(SSN)

by the individual signing this sworn statement:
_____ (Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VIII. NON-COLLUSION AFFADAVIT

STATE OF _____ COUNTY OF _____

I state that **I**_____ of _____,
(Name and Title) (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.
2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.
3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.
4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.
5. _____, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

	MATERIAL - BAHIA SOD	SY	1		$0.00
	SUB-CONTRACTOR - WELDER WITH TRUCK	HR	1		$0.00
	SUB-CONTRACTOR - TRACTOR WITH 7' BUSH HOG	HR	1		$0.00

* Contractor Job Truck Mandatory Tools

	Tool	Minimum size	Quantity
1	Air compressor	20 CFM @ 90PSI	1
2	3/4" drive ratchet and socket set		1
3	1 inch drive air impact wrench		1
4	1 inch drive sockets	1-1/2" to 3"	1 each
5	Slug wrenches	1-1/2" to 3"	1
6	End wrenches	7/16" to 1-1/2"	2 each
7	Porta band saw w spare blades	4" opening	1
8	Sawzall w spare blades		1
9	Nylon slings 5,000 and 10,000 pound rated (vertical)	2" 2 ply/4" 2 ply	2 each
10	Grade 80 Chain 10,000 pound rated	1/2" X 10 ft	2
11	Clevis or Shackles 5 ton rated	5/8" alloy	4
12	Porta power 10 ton		1
13	Shovels- round and square point		3 each
14	Cutting torch set *see note*		1
15	Gas or diesel stick welder and accessories *see note*		1
16	Small diaphragm pump and accessories	2" suction	1
17	Tap and die set	1/2" to 2" NPT	1
18	Drill and bits for steel or ductile	1/2" to 2" NPT size	1 set
19	Pry bar	5 foot	1
20	Come along	2ton	2
21	Circular Saw and blades for cribbing/forms	7 1/2 inch	2
22	Generator 120/240 volt	3500 watt	1
23	Framing hammer and nails for forms		2
24	Screw gun and screws for forms and cribbing		1
25	Gas powered cutoff saw (K-12)	12inch	1
26	Chain saw for cribbing and for'ms	14 inch bar	1
27	Sledge hammers	4t/ and 6tl	1 each
28	Crew PPE to include Hard hat and gloves at minimum	as needed	per person

ADDENDUM 1

Civil On Call Construction Services

Issued 3/23/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Pre-bid Minutes
Questions and Answers

Optional - Pre-Bid Meeting Minutes
RFP: Civil On Call Construction Services
March 18, 2026
10:00 AM

Staff Members Present:
Sara Spain, Procurement Manager
John Taylor, Assistant Finance Director
Camden Mills, Public Services Director
Dejan Milosevic, Project Manager
Michael Weaver, Infrastructure Operations Manager
Brian Gelock, Public Services
Kenneth Kosbab, Public Services
Ariana Wilson-Romo, Exec. Assistant City Clerk's Office

Others Present:

Name	***Company***	***Contact***
Abbey Boyle	PCS Civil	abbeyb@pcscivilinc.com
Bruno Sequeira	BCS Construction Group	Did not provide.
George Pappas	Southern Road & Bridge LLC	gpappas@southernrb.com
Tristan Hine	PCS Civil	tristanh@pcscivilinc.com
Dave Reid	Ajax Paving Industries of FL LLC	flestimate@ajaxpaving.com
Zachariah Wachalec	David Nelson Construction Co.	zwachalec@nelson-consturction.com

The meeting was called to order at 10:02 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:
- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 11AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills stated that the City is seeking as-needed construction services for various capital projects and/or maintenance projects. Ms. Spain clarified that the City does anticipate awarding multiple vendors.

The following questions were asked:
Q: Contract terms? A: 3yr with options for two one-year renewals.
Q: Size project monetary-wise? A: The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M. An addendum with anticipated projects can be posted.

There were questions regarding how contractors are selected if unit line items were being submitted in advance. Mr. Mills and Ms. Spain will clarify the contract language via an addendum. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.
There being no additional questions, the meeting was adjourned at 10:16 AM.

Questions and Answers:

1. **Are there any plans available for the potential work needed? Or would you like us to provide the price for each line item on the bid form? – Plans are not yet available for the potential work needed. Please provide the unit price for each line item on the bid form that you're capable of performing or subcontracting.**
2. **On the bid form for the On-Call Civil Construction Services list, pay items 285701 through 285715, Optional Base Group 1 through Optional Base Group 15, are listed, but it does not specify which base option will be required. What base options are needed for each base group? – Base Groups 1-11: Graded aggregate based or crushed concrete, consisting of granitic material (minimum LBR 100). Base groups 12-15: Type B-12.5.**
3. **Prebid question: Contract Terms? 3 year with options for 2 one-year renewals.**
4. **Prebid question: Size project monetary-wise? The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M.**
5. **Prebid question: List of anticipated projects. See list below of anticipated projects. This list is not all inclusive of potential projects, other projects may be assigned as needed.**
    - **Citywide stormwater collection system repairs and replacements (estimated > $1,000,000)**
    - **Citywide traffic signage replacements (estimated <$250,000)**
    - **Citywide pavement markings (estimated <$250,000)**
    - **Public Services operations yard expansion (estimated >$250,000 and <$500,000)**
    - **Coquina Way cul-de-sac improvements (<$250,000)**
    - **Fisherman's park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Sunset park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Gulf Way roadway rehabilitation (estimated > $2,000,000)**
    - **Belle Vista mini park improvements (estimated <$250,000)**
    - **1st Ave fishing pier hurricane damage repair (estimated <$250,000)**
    - **7th Ave fishing dock hurricane damage repair (estimated <$250,000)**
6. **Prebid question: There were questions regarding how contractors are selected if unit line items were being submitted in advance. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested. – Refer to II. Statement of Work, Part I: General Requirements, G. Work Assignments.**
7. **Will we split up projects (e.g. Seawalls and Parks)? – Multiple vendors may be selected per project depending on scope of work and vendors capabilities. Vendors are encouraged to submit unit prices for line items that they can perform or subcontract.**

ADDENDUM 2

Civil On Call Construction Services

Issued 3/27/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Questions and Answers

Questions and Answers:

1. **What class should the Round and Other-Elip/Arch pipe culvert be, class 3 or 4?** **The Round and Other-Elip/Arch pipe culvert bid items are listed as optional material pipe culverts and are not intended to specify a particular pipe class (e.g., Class III or Class IV) at the bid stage. The required pipe material and structural class, if applicable, will be determined by the City for each specific task order based on the project design, loading conditions, and applicable Florida Department of Transportation Standard Specifications.**

2. **Do the U-End walls need to be precast or cast in place?** **U-end walls may be precast or cast-in-place, as appropriate for the specific task order. The required type will be identified in the plans or directed by the City/Engineer for each assignment.**

3. **Are any inlets planned to be cast in place?** **Inlets may be precast or cast-in-place depending on site conditions and design requirements. This will be defined on a task order basis.**

4. **Will any of the end walls listed on the bid form have runs of pipe passing through them? If so, how many runs and at what skew?** **Some end walls may include pipe penetrations; however, the number of runs, pipe sizes, and skew angles (if any) will be determined by the design for each individual task order and shown in the applicable plans.**

5. **Please clarify how contract work will be assigned. The Statement of Work, Part I, Section 1, item G (Work Assignments) states that the City will obtain quotes from the Contractors who have a multiple-award contract. The City will already have contract pricing for each Contractor in the multiple-award contract, what is the criteria for these quotes?** **In the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.**

6. **Statement of Work, Part I, Section 15 states that Contractors must provide references for 5 work types in item E. If the Contractor does not intend to submit pricing for a work type, must that work type still be included in the project references?** **No, bidders shall provide references for applicable work types.**

7. **Please clarify the Period of Performance in the General Contract Terms. This states base scope target completion of January 2027 while other parts of the RFP specify a three year contract.** **3-year contract with 2 options for 1-year extensions. Ongoing work may be required.**

8. **Will any bonding be required?** **Yes, 5% of total bid amount.**

Vendor Bid/Proposal

(Place Vendor's Bid/Proposal Behind this Page)

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience providing Task Work Order driven Civil On-Call Construction Services.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Civil On Call Construction Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Civil On Call Construction Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach
by: Lucas L. Pappas, Managing Member
(Print individual's name and title)

for: Southern Road & Bridge, LLC
(Print name of entity submitting sworn statement)

at: 2997 US-19 ALT STE B, Palm Harbor, FL, 34683
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

46-1187423
(FEIN)
or, if the entity has no FEIN, include the Social Security Number:

N/A
(SSN)

by the individual signing this sworn statement:
(Signature) Lucas L. Pappas, Managing Member

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☒ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

STATE OF FLORIDA
COUNTY OF Pinellas

The foregoing instrument was sworn to (or affirmed), subscribed, and acknowledged before me by means of ☒ physical presence or ☐ online notarization, this 7th day of April, 2026, by Lucas L. Pappas, who is personally known to me or has produced N/A as identification.

VIII. NON-COLLUSION AFFADAVIT

STATE OF Florida COUNTY OF Pinellas

I state that I Lucas L. Pappas, Managing Member of Southern Road & Bridge, LLC,
(Name and Title) (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. Southern Road & Bridge, LLC, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

ADDENDUM 1

Civil On Call Construction Services

Issued 3/23/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Pre-bid Minutes
Questions and Answers

Optional - Pre-Bid Meeting Minutes
RFP: Civil On Call Construction Services
March 18, 2026
10:00 AM

Staff Members Present:
Sara Spain, Procurement Manager
John Taylor, Assistant Finance Director
Camden Mills, Public Services Director
Dejan Milosevic, Project Manager
Michael Weaver, Infrastructure Operations Manager
Brian Gelock, Public Services
Kenneth Kosbab, Public Services
Ariana Wilson-Romo, Exec. Assistant City Clerk's Office

Others Present:

Name	***Company***	***Contact***
Abbey Boyle	PCS Civil	abbeyb@pcscivilinc.com
Bruno Sequeira	BCS Construction Group	Did not provide.
George Pappas	Southern Road & Bridge LLC	gpappas@southernrb.com
Tristan Hine	PCS Civil	tristanh@pcscivilinc.com
Dave Reid	Ajax Paving Industries of FL LLC	flestimate@ajaxpaving.com
Zachariah Wachalec	David Nelson Construction Co.	zwachalec@nelson-consturction.com

The meeting was called to order at 10:02 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:
- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 11AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills stated that the City is seeking as-needed construction services for various capital projects and/or maintenance projects. Ms. Spain clarified that the City does anticipate awarding multiple vendors.

The following questions were asked:
Q: Contract terms? A: 3yr with options for two one-year renewals.
Q: Size project monetary-wise? A: The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M. An addendum with anticipated projects can be posted.

There were questions regarding how contractors are selected if unit line items were being submitted in advance. Mr. Mills and Ms. Spain will clarify the contract language via an addendum. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.
There being no additional questions, the meeting was adjourned at 10:16 AM.

Questions and Answers:

1. **Are there any plans available for the potential work needed? Or would you like us to provide the price for each line item on the bid form? – Plans are not yet available for the potential work needed. Please provide the unit price for each line item on the bid form that you're capable of performing or subcontracting.**
2. **On the bid form for the On-Call Civil Construction Services list, pay items 285701 through 285715, Optional Base Group 1 through Optional Base Group 15, are listed, but it does not specify which base option will be required. What base options are needed for each base group? – Base Groups 1-11: Graded aggregate based or crushed concrete, consisting of granitic material (minimum LBR 100). Base groups 12-15: Type B-12.5.**
3. **Prebid question: Contract Terms? 3 year with options for 2 one-year renewals.**
4. **Prebid question: Size project monetary-wise? The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M.**
5. **Prebid question: List of anticipated projects. See list below of anticipated projects. This list is not all inclusive of potential projects, other projects may be assigned as needed.**
    - **Citywide stormwater collection system repairs and replacements (estimated > $1,000,000)**
    - **Citywide traffic signage replacements (estimated <$250,000)**
    - **Citywide pavement markings (estimated <$250,000)**
    - **Public Services operations yard expansion (estimated >$250,000 and <$500,000)**
    - **Coquina Way cul-de-sac improvements (<$250,000)**
    - **Fisherman's park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Sunset park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Gulf Way roadway rehabilitation (estimated > $2,000,000)**
    - **Belle Vista mini park improvements (estimated <$250,000)**
    - **1st Ave fishing pier hurricane damage repair (estimated <$250,000)**
    - **7th Ave fishing dock hurricane damage repair (estimated <$250,000)**
6. **Prebid question: There were questions regarding how contractors are selected if unit line items were being submitted in advance. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested. – Refer to II. Statement of Work, Part I: General Requirements, G. Work Assignments.**
7. **Will we split up projects (e.g. Seawalls and Parks)? – Multiple vendors may be selected per project depending on scope of work and vendors capabilities. Vendors are encouraged to submit unit prices for line items that they can perform or subcontract.**

155 Corey Avenue
St. Pete Beach, FL 33706-1839
www.stpetebeach.org

ADDENDUM 2

Civil On Call Construction Services

Issued 3/27/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Questions and Answers

Questions and Answers:

1. **What class should the Round and Other-Elip/Arch pipe culvert be, class 3 or 4?** **The Round and Other-Elip/Arch pipe culvert bid items are listed as optional material pipe culverts and are not intended to specify a particular pipe class (e.g., Class III or Class IV) at the bid stage. The required pipe material and structural class, if applicable, will be determined by the City for each specific task order based on the project design, loading conditions, and applicable Florida Department of Transportation Standard Specifications.**

2. **Do the U-End walls need to be precast or cast in place?** **U-end walls may be precast or cast-in-place, as appropriate for the specific task order. The required type will be identified in the plans or directed by the City/Engineer for each assignment.**

3. **Are any inlets planned to be cast in place?** **Inlets may be precast or cast-in-place depending on site conditions and design requirements. This will be defined on a task order basis.**

4. **Will any of the end walls listed on the bid form have runs of pipe passing through them? If so, how many runs and at what skew?** **Some end walls may include pipe penetrations; however, the number of runs, pipe sizes, and skew angles (if any) will be determined by the design for each individual task order and shown in the applicable plans.**

5. **Please clarify how contract work will be assigned. The Statement of Work, Part I, Section 1, item G (Work Assignments) states that the City will obtain quotes from the Contractors who have a multiple-award contract. The City will already have contract pricing for each Contractor in the multiple-award contract, what is the criteria for these quotes?** **In the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.**

6. **Statement of Work, Part I, Section 15 states that Contractors must provide references for 5 work types in item E. If the Contractor does not intend to submit pricing for a work type, must that work type still be included in the project references?** **No, bidders shall provide references for applicable work types.**

7. **Please clarify the Period of Performance in the General Contract Terms. This states base scope target completion of January 2027 while other parts of the RFP specify a three year contract.** **3-year contract with 2 options for 1-year extensions. Ongoing work may be required.**

8. **Will any bonding be required?** **Yes, 5% of total bid amount.**

COMPANY INFORMATION:

Southern Road & Bridge, LLC (SRB) is a Florida Limited Liability Company and General Contractor established on October 15, 2012. We are headquartered in Palm Harbor, Florida with a primary focus on the transportation and infrastructure needs of state and municipal authorities. Southern Road & Bridge, LLC is a small business, we are also registered and current in SAM. Our strong focus on personal management, safety, and use of technology allow us to tackle projects that encompass several different trades. Our bonding capacity is $130 million per project with an aggregate of $200 million. SRB is SSPC QP-1 and SSPC QP-2 Certified. We pride ourselves on taking care of our environment for ourselves, our communities, and our children's futures by following the rules, regulations, and laws per state, county, city, as well as federally that require special permits, precautions, and trainings. We are extremely lucky to have had the pleasure of working with and/or for many wonderful agencies and companies. Each customer, Vendor, and Sub-Contractor is treated with respect and gratitude. Attached you will find letters of reference, our Certificate of Surety, similar projects completed with contact info, and licenses/certifications. RE: Southern Road & Bridge, LLC

To Whom it May Concern:

Please be advised that Southern Road & Bridge, LLC. is a valued customer of our agency. We have established a bonding program for Southern Road & Bridge, LLC. in the amount of $50,000,000 single/$150,000,000 aggregate. The current surety is Atlantic Specialty Insurance Company a T-Listed, Best Rated Insurance Company.

Please note that the decision to issue performance and payment bonds is a matter between Southern Road & Bridge, LLC. and their surety company and will be subject to standard underwriting at the time of the final bond request, which will include but not be limited to the acceptability for the contract documents, bond forms, and financing. We assume no liability to third parties or to you if for any reason we do not execute these bonds.

Should you have any questions please contact me.

Best Regards,

Keith Miller
Attorney-In-Fact

intact INSURANCE

Power of Attorney

KNOW ALL MEN BY THESE PRESENTS, that ATLANTIC SPECIALTY INSURANCE COMPANY, a New York corporation with its principal office in Plymouth, Minnesota, does hereby constitute and appoint: **Brian M Battaglia, Christopher A. Howard, James Klingensmith, Keith A. Miller**, each individually if there be more than one named, its true and lawful Attorney-in-Fact, to make, execute, seal and deliver, for and on its behalf as surety, any and all bonds, recognizances, contracts of indemnity, and all other writings obligatory in the nature thereof; provided that no bond or undertaking executed under this authority shall exceed in amount the sum of: **unlimited** and the execution of such bonds, recognizances, contracts of indemnity, and all other writings obligatory in the nature thereof in pursuance of these presents, shall be as binding upon said Company as if they had been fully signed by an authorized officer of the Company and sealed with the Company seal. This Power of Attorney is made and executed by authority of the following resolutions adopted by the Board of Directors of ATLANTIC SPECIALTY INSURANCE COMPANY on the twenty-fifth day of September, 2012:

Resolved: That the President, any Senior Vice President or Vice-President (each an "Authorized Officer") may execute for and in behalf of the Company any and all bonds, recognizances, contracts of indemnity, and all other writings obligatory in the nature thereof, and affix the seal of the Company thereto; and that the Authorized Officer may appoint and authorize an Attorney-in-Fact to execute on behalf of the Company any and all such instruments and to affix the Company seal thereto; and that the Authorized Officer may at any time remove any such Attorney-in-Fact and revoke all power and authority given to any such Attorney-in-Fact.

Resolved: That the Attorney-in-Fact may be given full power and authority to execute for and in the name and on behalf of the Company any and all bonds, recognizances, contracts of indemnity, and all other writings obligatory in the nature thereof, and any such instrument executed by any such Attorney-in-Fact shall be as binding upon the Company as if signed and sealed by an Authorized Officer and, further, the Attorney-in-Fact is hereby authorized to verify any affidavit required to be attached to bonds, recognizances, contracts of indemnity, and all other writings obligatory in the nature thereof.

This power of attorney is signed and sealed by facsimile under the authority of the following Resolution adopted by the Board of Directors of ATLANTIC SPECIALTY INSURANCE COMPANY on the twenty-fifth day of September, 2012:

Resolved: That the signature of an Authorized Officer, the signature of the Secretary or the Assistant Secretary, and the Company seal may be affixed by facsimile to any power of attorney or to any certificate relating thereto appointing an Attorney-in-Fact for purposes only of executing and sealing any bond, undertaking, recognizance or other written obligation in the nature thereof, and any such signature and seal where so used, being hereby adopted by the Company as the original signature of such officer and the original seal of the Company, to be valid and binding upon the Company with the same force and effect as though manually affixed.

IN WITNESS WHEREOF, ATLANTIC SPECIALTY INSURANCE COMPANY has caused these presents to be signed by an Authorized Officer and the seal of the Company to be affixed this first day of January, 2023.

ATLANTIC SPECIALTY INSURANCE COMPANY CORPORATE SEAL 1986 NEW YORK

Pinellas County

Public Works

8.5.2025

John Taylor
Project Coordinator
Pinellas County Public Works ▪ Transportation Division ▪ Roadway and Bridge Section
727-464-8824
jtaylor3@pinellas.gov

To Whom It May Concern:

I am pleased to write this letter of reference on behalf of **Southern Road and Bridge** who has provided reliable and high-quality bridge and box culvert repair and maintenance services for Pinellas County Public Works over the last 24 months.

During this tenure Southern Road and Bridge has consistently demonstrated professionalism, technical expertise, and a strong commitment to both safety and overall project quality. Their team has successfully completed a wide range of maintenance and repair projects of differing sizes and scopes. These projects have included:

- **Spall Repairs** on bridge decks, substructures, and box culverts to restore structure integrity and prolong life.
- **Crack Injection** using appropriate materials and methods to seal and stabilize concrete members.
- **Channel Excavation** to restore and enhance drainage paths beneath bridge structures, ensuring proper flow and minimizing flood risk.
- **Undermined Embankment Repairs** involving stabilization techniques to restore roadway support and prevent future erosion.
- **Tree Trimming and Removal** to improve visibility, maintain clear zones, and protect bridge and box culvert structures from encroaching vegetation.
- **Painting** to protect bridge and box culvert structures and restore aesthetic appearance.
- **Other tasks** have included pipe repair, scupper cleaning, expansion joint replacement, pressure washing, handrail repair, and fender system repair.

Each project has been completed in a timely manner and in accordance with all applicable specifications and regulations. In addition, Southern Road and Bridge has demonstrated adaptability in the field, responding effectively to unforeseen conditions while maintaining clear communication with us.

Based on their performance and my experience with them, I would recommend Southern Road and Bridge for any agency or municipality in need of a capable and dependable contractor for bridge and box culver related maintenance and repair work. Should you have any questions or require further information please feel free to contact me.

Sincerely,

John Taylor

SUBJECT: Financial Project ID: 442622-9-52-01

Contract Number: E8U06

Project Description: Rehabilitation of Aging Pre-stressed Concrete Piles

County: Turnpike Various Bridge Locations (MP 142.2 to 192.4)

To Whom it may concern,

Consor Engineers had the experience of working with Southern Road and Bridge on the above referenced project. Consor Engineers was the owners representative and Southern R&B was the contractor. As owners representative, we were responsible for all verification testing, contract administration, monthly payments, RFIs, shop drawings, and overseeing day to day construction.

During the life of the project, we had challenges with permitting and design that we were able to work through and find a solution without affecting the delivery of the project. Working with Ryan Finnie, it was easy to find amenable solutions that were right for the project and the contractor. In addition, Southern R&B had to work out agreements for access to the project site with the City of Port St. Lucie, a third party to the project. During this process they were professional, cooperative, and worked with the City to find a great solution. Southern R&B performed quality work and was willing to work with our staff and the team. The project was completed within contract time and under budget. It was a pleasure working with Ryan Finnie and his team. I would recommend Southern R&R for future project of similar scope and size.

If you have any questions or need additional information, please feel free to contact me at your earliest convenience.

Sincerely,

Randy Scott, P.E.

Pioneer Memorial Bridge - Bridge Painting Stage 2 Project

Subject: Letter of Recommendation

Dear Mr. Pappas,

As you are aware, Southern Road & Bridge recently completed the Pioneer Memorial Bridge - Bridge Painting Stage 2 Project located in US 395 between MP 18.59 and MP 19.07 between Kennewick and Pasco, Washington. The project's scope included cleaning of the existing approaches and super structure's structural steel via dry abrasive blasting and painting using a new three-part application system. This project introduced a containment system which was new to the WSDOT Southcentral Region which led to long review times which used close to one third of the allowed contract time. However, despite the review and approval time that was used, Southern Road & Bridge, along with Extreme Sandblasting and Painting and other subcontractors, demonstrated a remarkable ability to execute this bridge coating project on time, within budget, and to the client's satisfaction.

This letter of recommendation acknowledges Southern Road & Bridge's expertise, attention to detail, and project commitment in delivering a high-quality product on a project with a high degree of complexity. Our office has had the pleasure of working closely with you and your team at Southern Road and Bridge for the past eighteen months. During this time, we were able to witness your team's professionalism and commitment to excellence. The team members that helped successfully deliver the Pioneer Memorial Bridge - Bridge Painting Stage 2 Project besides yourself, included Pete Pantelis, Tanya Pilarinos, John Koulianos, Mahmoud Rafraf and the other project personnel who spent their weeks on this project.
In summary, our office has high confidence in Southern Road and Bridge's ability to successfully undertake and complete bridge coating projects of increasing scale or complexity and believes your company would be an excellent choice for any future client's needs.

Respectfully,

Hector Mendez

RE: Contract Number: ITB-23-13739-PC
Osceola County Public Works Osceola County, Florida
Old Lake Wilson Rd. Bridge #924147
Subject: Letter of Recommendation

Dear Mr. Pappas,

I am writing to formally recognize the excellent work Southern Road & Bridge performed on the maintenance repairs for the Old Lake Wilson Rd. Bridge #924147. As you are aware, this project involved a variety of tasks, including the replacement of expansion joint seals, repair of minor spalling, replacement of guardrails, vegetation removal, installation of reflectors and barrier delineators, slope protection, and the placement of rubble riprap. Additionally, construction activities included mobilization, maintenance of traffic, sediment barriers, clearing and grubbing, removal of existing guardrails, and minor earthwork.

Moreover, Southern Road & Bridge demonstrated exceptional responsiveness when undertaking emergency repairs to the roadway caused by settlement. The road had to be closed, and traffic diverted to other major highways. Thanks to your team's prompt action and close coordination with the Construction Engineering Inspection firm and the county, the road was fully repaired in approximately 36 hours. This quick response prevented what could have been a catastrophic failure of the roadway.

Southern Road & Bridge's performance on the Old Lake Wilson Rd. Bridge project was exemplary. The project was completed on time, within budget, and to the satisfaction of the client, highlighting your team's expertise, attention to detail, and strong commitment to quality.

Over the past 11 months, we have had the pleasure of working closely with you and your team. Throughout this time, we have observed your professionalism and dedication to excellence. In addition to yourself, we would like to acknowledge the contributions of Dallas Fortner, Tanya Pilarinos, Jason Latinka, and the other members of your team who dedicated weekends and late nights to ensuring the project's success.

In conclusion, we have full confidence in Southern Road & Bridge's ability to successfully manage and complete bridge maintenance projects of increasing scale and complexity. We believe your company would be an outstanding choice for any future projects and clients.

By submitting this letter, CONSOR Engineers LLC certifies that, based on our review of the provided information, this project was executed in reasonable conformance with the contract documents.

If you have any questions or require further clarification, please feel free to contact me.

Sincerely,
Consor Engineers, LLC

Lake Monroe Drawbridge Painting Project
Subject: Letter of Recommendation
Letter No. 018.01

Dear Mr. Pappas,

As you are aware, Southern Road & Bridge recently completed the Central Florida Rail Corridor (CFRC) Lake Monroe Drawbridge Painting Project located at MP 763.1 over the St. John's River near Sanford, Florida. The project's scope included cleaning of the existing structural steel via dry abrasive blasting and painting using a new three-part application system for the 113 feet bascule lift span. This work was conducted within the SunRail railroad corridor and over a navigable waterway which presented numerous challenges and limited work windows to your project team. However, despite the rail and marine traffic constraints, Southern Road & Bridge demonstrated a remarkable ability to execute this bridge coating project on time, within budget, and to the client's satisfaction.

This letter of recommendation acknowledges Southern Road & Bridge's expertise, attention to detail, and project commitment in delivering a high-quality product on a project with a high degree of complexity including CFRC railroad and lift span operational constraints. Our office has had the pleasure of working closely with you and your team at Southern Road and Bridge for the past fourteen months. During this time, we were able to witness your team's professionalism and commitment to excellence. The team members that helped successfully deliver the Lake Monroe Drawbridge Painting Project besides yourself, included George Pappas, Tanya Pilarinos, Manoli Triantafillos, Jason Colahan and the other project personnel who spent their weekends including nights on this project.

In summary, our office has high confidence in Southern Road and Bridge's ability to successfully undertake and complete bridge coating projects of increasing scale or complexity and believes your company would be an excellent choice for any future client's needs.

If you should have any questions, please feel free to contact our office.

MARLIN

Date: November 19, 2024

To: Southern Road and Bridge (SRB)
Attn: Manolis Triantafillos, Superintendent
715 Wesley Ave
Tarpon Springs, FL 34689

Re: 13 Tri-Rail Pedestrian Bridges Rehabilitation Project

To Whom it May Concern,

My name is Aycel Freda, P.E., and I served as the Construction Project Manager for the South Florida Regional Transportation Authority's (SFRTA) Pedestrian Bridges Rehabilitation Project from October 2024 to September 2025.

I am writing to endorse Southern Road and Bridge (SRB), with Manolis Triantafillos as the on-site Superintendent, who was responsible for the painting and rehabilitation of 13 Tri-Rail station pedestrian bridges. Throughout the project, Manolis exhibited exceptional professionalism, expertise, and attention to detail. The team demonstrated a thorough understanding of the specific requirements and challenges associated with working on pedestrian bridges located above active train rails, including the need for durability, safety, and aesthetic appeal.

The project is ongoing; however, four of the pedestrian bridges have been completed, with repairs and painting finished. The results are visually impressive and constructed to withstand the elements for many years. Manolis worked closely with our project management team, providing consistent updates and addressing any concerns promptly and effectively.

In addition to their technical skills, the team exhibited a strong commitment to safety and compliance with all relevant regulations. The work environment was organized and efficient, causing minimal disruption to the surrounding area and pedestrian traffic.

I am confident that SRB, led by Manolis, would be an excellent choice for any future painting and rehabilitation projects. I highly recommend their services and look forward to the opportunity to collaborate with them on future endeavors.

Please feel free to contact me at afreda@marlinengineering.com if you need any further information.

Sincerely,

Aycel Freda, P.E
Project Manager

Mark James McCombs, P.E.

453 SW 28th Ave
Delray Beach, FL 33445

To whom it may concern,

I had the pleasure of working with Southern Road and Bridge (SRB) and Manolis Triantafillos on the rehabilitation project for SFRTA in Palm Beach, Broward and Miami-Dade Counties. The project entailed the blasting, repair and recoating of 13 tubular steel pedestrian bridges. During our time together, I worked directly with Mr. Triantafillos. He was helpful and cooperative at all times. His knowledge, along with his integrity were second to none.

Mr. Triantafillos worked efficiently while providing a product that exceeded expectations. He was very proactive, identifying potential issues before they happened. Mr. Triantafillos always had a solution to present any time he identified the potential issue. His actions often saved time and cost for both his employer and his customer/client.

The most important virtue that SRB and Mr. Triantafillos bring to the table is the pride they take in providing an exceptional product to their clients. I would not hesitate to work with Mr. Triantafillos and SRB again and extend my strongest recommendation for anybody considering securing their services.

Please feel free to contact me if you have any questions with regard to Mr. Triantafillos or SRB.

Sincerely,

Mark (Jim) McCombs, P.E.

Dear Mr. Triantafilos,

It is my pleasure to provide this personal letter of recommendation for you, based on my experience serving as Consultant Project Engineer for the Construction Engineering and Inspection (CEI) team for the following project in which you were the Construction Project Manager / Superintendent:

- FDOT District 4 Bridge Painting of SR-858, which involved full removal and replacement of the structural steel coating system of the SR-858/Hallandale Beach Blvd Bascule Bridge over the Intracoastal Waterway, including movable bridge preventive maintenance and routine repair, adjusting movable bridge counterweight, and providing movable bridge operator (Approximate Cost: $1.5M)

Under your leadership, your staff provided an excellent quality bridge paint job, prepared safe containment, and complied with environmental requirements. Your exceptional cooperation and communication with our inspection staff as well as the public information officer assigned to the project are also very much appreciated. You provided all submittals in a timely manner, including pre-construction submittals, project schedules, and invoicing backup documentation. The final Contractor Past Performance Rating (CPPR) was a perfect score of 98.

The Hallandale Beach Blvd project was successfully completed in 144 days, when the allowed contract time was 291 days, 1/2 of the allowed time.

If you have any questions, please feel free to contact me at (305) 283-9816.

Dear Mr. Pappas,

It has been a pleasure to serve as a Consultant Project Engineer for the Construction Engineering and Inspection (CEI) team for the following project performed by Southern Road and Bridge for FDOT District 4 in Broward County:

- Bridge Painting of SR-838 Sunrise Blvd over SR-441, which involved pressure cleaning and painting of two steel bridges as well as applying Class 5 concrete coating to abutments, piers, and concrete barrier walls (Approximate Cost: $874,000)

Your entire staff from top down provided an excellent quality bridge paint job, prepared safe containment, complied with environmental requirements, and cooperated and communicated with our inspection staff as well as the public information officer assigned to the project. Your office personnel provided all submittals in a timely manner, including pre-construction submittals, project schedules, and invoicing backup documentation. The final Contractor Past Performance Rating (CPPR) was a perfect score of 98.

The Sunrise Blvd project was successfully completed in 85 days, when the allowed contract time was 262 days, 1/3 of the allowed time.

RE: Project: SR 408 Aesthetic Coatings Renewal
Project No.: 599-734
Contract No.: 001279
Contractor: Southern Road and Bridge.
O/G No.: 024
Mehta Reference Letter

Dear Mr. Pappas,

This reference letter is to acknowledge our appreciation with Southern Road and Bridge's excellent work in completing the subject coatings renewal project on time and under budget. This project was challenging as the cleaning and coating work was going on concurrent with other Central Florida Expressway Authority (CFX) work within the project limits of the coating project. Southern Road and Bridge was very cooperative working with our Mehta CEI team and the other active concurrent project teams and with coordination of vegetation removal with the owner CFX maintenance division.

The tell tail sign of an excellent quality project is when we get to the semi-final inspection and all work is found to be acceptable, by all, with no deficiency list items and the semi-final inspection becomes the final inspection and the project is ready to be recommended for final acceptance to the owner, which was the case with this project. Great Job!!

We look forward to working with Southern Road and Bridge on similar future CFX projects.

To Whom it may concern:

Please find this letter of recommendation for Southern Roads and Bridge an A+ for upcoming projects that they propose an interest in. Their quality of work was top of the line and as well as the important documents sent in from the main office (correct and on time). This is the second project that I have had with Southern Roads and Bridge and both has turned out excellent.

1.) The painting of West Bay Bridge over the Intercostal waterway (Bay County, Fl.).
2.) Dupont Bridge abutment repair after Hurricane Michael (Bay County, Fl.)

I would highly recommend Southern Roads and Bridge for any future projects.

RE: Reference

To Whom It May Concern:

The above referenced company did complete the Highlands County Structures Repairs at US 98 over Kissimmee River, US 98 over Lorida Creek and US 98 over Istokpoga Canal.

The Contractor performed the work as set forth in the plans. The project materials were certified and accepted. Southern Road & Bridge had the equipment necessary to complete the project. The project was completed on time and within budget.

Sincerely,

Stacy S Hill

Letter of Reference

To whom it may concern,

I am writing to provide a letter of reference for Southern Road & Bridge for Louisiana State Project H.011766.6. This project consisted of the rehabilitation of thirteen bridge structures over I-20 in Lincoln, Ouachita, Richland, and Madison Parishes.

The rehabilitation consisted of two structures having a latex modified concrete overlay installed, ten structures having the existing steel girders cleaned and painted, three structures having CFRP repairs made to prestressed precast concrete girders, and various concrete repairs to the substructures and superstructures and bearing replacements on all thirteen structures.

Southern Road & Bridge began the project in December 2017 and completed the project in November 2020 on schedule. Southern Road & Bridge also adhered to all Louisiana Department of Transportation and Development (LADOTD) contract specifications, DEQ specifications, and Federal Highway Administration (FHWA) specifications throughout the project.

Re: Letter of Recommendation for Specialty Bridge Work Performed

Dear Sir or Madam:

Michael Baker International served as Engineer of Record on a bridge repair and maintenance project for the City of Mobile. Southern Road and Bridge, LLC successfully and satisfactorily completed the following project(s) for the City:

Project(s)**:**	**SITE 1 – Pedestrian Bridge over Water Street (BIN No. 017197) and SITE 2 - Beauregard Street / Robert M. Hope Overpass Over CSXT (BIN 014005) Overhead Bridge Repair, Cleaning, and Painting (City Project Nos. 2019-3005-01 / 2020-3005-06)**
Client / Owner:	**City of Mobile, Alabama**
Contract Amount:	**$1,099,040.00 Total** *($410,834.00 for Site 1 / $1,049,502.45 for Site 2)*
Contract Term:	**120 Working Days Allowed (for total contract)**
Notice to Proceed:	**October 22, 2020**
Completion Date:	**August 23, 2022**
Contractor's scope of work included:	**Repair of Steel Components and Cleaning, Sandblasting and Repainting Steel and Concrete Components**

This contract included (2) separate project sites in the downtown business district of Mobile, but Michael Baker was only responsible for overseeing construction operations for Site 2. Although there were delays in the project, they were no fault of the Contractor. CSX permitting and flagger requirements, along with the high volume of train traffic, significantly slowed the progress of work. However, Southern Road & Bridge completed all work on Site 2 within 52 working days.

The Contractor was excellent to work with on this project. Their staff was professional, knowledgeable, and responsive. They provided sufficient staff to perform the work efficiently,

effectively, and in a timely manner. Additionally, the Contractor was accommodating to both the City's special scheduling needs, such as working around large conferences and Mardi Gras festivities held in or near the area of the project sites, and other special permitting requirements of the project including coordination of construction activities in accordance with strict CSX guidelines. I would highly recommend this Contractor for any specialty bridge maintenance and repair projects.

If you should have any questions or concerns, please do not hesitate to contact me at 251-380-0898.

Sincerely,

J. Brooks Miller, Jr., P.E., PTOE

To whom it may concern:

It was a pleasure working with Mr. Emmanuel Triantafillos (Manoli) at the Queen Isabella Causeway connecting Port Isabel & South Padre Island in Texas. Manoli really takes pride on his work by going above & beyond to provide an excellent end project. Manoli has a sense or urgency & understands his client, but he will NOT sacrifice quality. Manoli is well respected along his co-workers & TxDOT staff. Manoli constantly has a positive attitude regardless of the task at hand. Manoli is very knowledge when it comes to industrial coating projects & working along with others. Manoli took the time to personally go over with me bridge coating/painting procedures in detail. Our project was successful thanks to Manoli's leadership. I would strongly recommend Emmanuel on future industrial coating projects & look forward working with him in the nearby future.

Feel free to contact me at (956)399-5102 for further questions you might have.

Sincerely,

Andres Espinoza, P.E.

Good morning Mr. Pappas,

I hope this email finds you well. I wanted to take a few minutes to tell you that it was great to work with Clarence and his team. His leadership style in the construction Industry is not often seen and his team followed direction both safely and efficiently. They worked together without conflict with each other and NASA personnel, in fact they were courteous, professional, & always deferred to Clarence on matters of decision and direction. I witnessed Clarence speak to and train his team in skillsets that they wanted to improve on, and he patiently answered questions on the processes employed. Many times, I asked questions concerning their processes and he explained step by step what would be done and why. I also witnessed Clarence speak to NASA Personnel to explain various technical topics including issues addressing the expansion joints and what would be necessary to correct a previous Contractor's completed work. Clarence is a clear & effective communicator, that in part was one of the things that made me great full that he was on the team. Thank you again for the great work that your team did for Heard Construction here at NASA. Thanks to Sue & Henry from HCI for choosing a good Contractor for their team on this one. Perhaps we will have an opportunity to work together in the future.

Respectfully,

Seth Jones

Press Release

FOR IMMEDIATE RELEASE

Southern Road and Bridge Receives 2022 Best of Portland Award

Portland Award Program Honors the Achievement

PORTLAND July 27, 2022 -- Southern Road and Bridge has been selected for the 2022 Best of Portland Award in the Construction Company category by the Portland Award Program.

Each year, the Portland Award Program identifies companies that we believe have achieved exceptional marketing success in their local community and business category. These are local companies that enhance the positive image of small business through service to their customers and our community. These exceptional companies help make the Portland area a great place to live, work and play.

Various sources of information were gathered and analyzed to choose the winners in each category. The 2022 Portland Award Program focuses on quality, not quantity. Winners are determined based on the information gathered both internally by the Portland Award Program and data provided by third parties.

About Portland Award Program

The Portland Award Program is an annual awards program honoring the achievements and accomplishments of local businesses throughout the Portland area. Recognition is given to those companies that have shown the ability to use their best practices and implemented programs to generate competitive advantages and long-term value.

The Portland Award Program was established to recognize the best of local businesses in our community. Our organization works exclusively with local business owners, trade groups, professional associations and other business advertising and marketing groups. Our mission is to recognize the small business community's contributions to the U.S. economy.

SAFESPAN
MADE IN THE USA

PROJECT OF THE MONTH

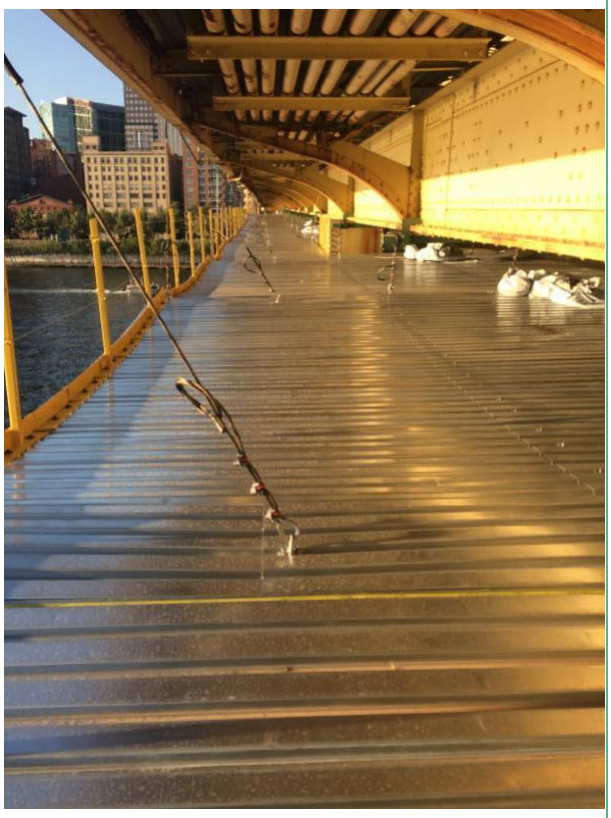
Safespan is proud to present April's project of the month,

The 7th Street Bridge!

This bridge serves the Pittsburgh, PA area.

Southern Road and Bridge was given the responsibility of providing complete access and protective shielding on this project. With Safespan in place, blasting, painting, steel repairs and deck replacement is currently ongoing for Brayman Construction.

We would like to thank Southern Road and Bridge for choosing to use Safespan's unique **Multi-Span Protective Shielding System** and **Work Platform** for access, shielding and containment**.**



Complete Access

With 65,000 sq ft of the Safespan Platform installed under the roadway deck, containment was made fast and easy to erect. This created a tight seal for full environmental protection.

Our rigid flooring allowed for vertical clearance to be maintained as vessels passing under this crossing require 39' of clearance under the bridge daily.

Safespan is prepared to custom tailor our platform to overcome any access challenges.

"Partnership for Excellence in Contract Administration" Award

---

Contract Number: 009064

Project Name: US101 Sol Duc River Bridges – Bridge Painting

Contractor Name: Southern Road and Bridge

Project Engineer: Chris Bruning

Date Project Accepted: Executed May 18th, 2017.

Category of Award *(please underline one category):*

Eastern Washington

- Projects Less than $3,000,000
- Projects $3,000,000-$10,000,000
- Projects Greater than $10,000,000

Western Washington

- Projects Less than $3,000,000
- Projects $3,000,000-$10,000,000
- Projects Greater than $10,000,000

Statewide

- Special Mention City/County or Other Project Administered by the WSDOT/Contractor Team

AGC

Washington State Department of Transportation

Brief Overview of Nominated Project

Project Description

This project includes the cleaning and painting of all metal surfaces on two bridges on US101 @ M.P. 194.3 and 212.5. These are overhead steel truss bridges that were in need of repainting. The project also included new paved panel joints and new expansion joints on the driving surface of the bridges.

Customer-Focused Administration

During the course of the project, it was evident that Southern Road and Bridge wished to perform the highest quality work within the least amount of time. They also partnered with WSDOT on more than one occasion to mitigate the impacts to the traveling public by opening up both lanes when construction activities were not ongoing. This was greatly appreciated by the surrounding community during a weekend festival in Forks, WA. Southern Road and Bridge was receptive and very quick to respond to any requests by WSDOT.

Innovative Problem Solving

Southern Road and Bridge proposed a cost reduction to the project to utilize recyclable abrasive blast media to remove the existing paint, rust, and other foreign material on the steel bridges. By utilizing recyclable abrasive blast media they were able to complete the blasting with significantly less abrasive material and generated significantly less hazardous waste. The storage and disposal of hazardous waste is a force account item paid by WSDOT, and this innovative solution greatly reduced this cost to the taxpayers. Southern Road and Bridge brought up very specialized equipment to recapture, separate, and reuse the steel grit during the blasting process. It was very evident that Southern Road and Bridge was a highly experienced company whose mission was to perform very high quality work with as little impact to the environment as possible.

Overcoming Extraordinary Challenge

There were several challenges that were overcome on this project:

1. Class 1 containment was required. This is the highest level of containment and Southern Road and Bridge was able to meet the specifications with no major releases.
2. Short project duration with limited working hours. This project was to be complete in 90 working days with only Sundays not being counted. Due to nesting birds in the area, the Contractor was only allowed to work between 2 hours after sunrise to 2 hours prior to sunset. To meet this aggressive schedule, Southern Road and Bridge worked numerous Sunday shifts and in the end worked

on both bridges simultaneously to complete the project within the allowable working days.

3. First WSDOT contract by an out of state company. This was Southern Road and Bridge's first WSDOT contract and they worked diligently to learn our submittal and materials acceptance processes. To add to this challenge, WSDOT bridge and structure reviews were hired out to a consultant. This meant that the lines of communication went through 1 extra channel and this added time and confusion to the process of approving submittals. Southern Road and Bridge worked diligently to return corrections asap and was able to get all submittals approved without significant delays to the project. Even during the most frustrating times, the project team from Southern Road and Bridge kept a positive attitude, responded quickly, and remained professional.
4. Weight/ Loading restrictions on the bridges. Due to weight/load restrictions, the bridges had to be painted in stages. First, the underdeck steel was painted with the requirement that only 1 lane of traffic could be allowed and had to be in the center of the bridge. Then once the underdeck platform and containment was removed, then the traffic could be swapped to one side or another to perform all the overhead work. This restriction made the task of completing the project in a short duration that much more difficult.

Effective Contract Administration

Southern Road and Bridge did a fantastic job of learning a new process and submitting all documentation prior to beginning work. The project teams communicated very well and kept a very professional attitude. Submittals and materials documentation was submitted in a timely manner and all requests from WSDOT were answered quickly. Southern Road and Bridge was also very helpful and took the time to explain any items of confusion to the WSDOT team.

Timely Completion of Project

Southern Road and Bridge worked very efficiently and was able to complete both bridges within the allowable time. They worked numerous Sundays to make this happen and they were determined to get the work done in time.

Safety

Southern Road and Bridge is a safe working company and there were no accidents on this project. They were also very helpful with ensuring that our project inspector had appropriate equipment and stayed safe at all times. They went above and beyond what was required to drive our inspector from the project site back to the shower facility each day during the blasting and painting work. In addition, when our inspector was ill, the project foreman volunteered to driver her to the local hospital. This was appreciated greatly and showed that Southern Road and Bridge cared about all members of the project team.

INDEPENDENT AUDITORS' REPORT

To the Members
Southern Road & Bridge, LLC
Palm Harbor, Florida

Opinion

We have audited the accompanying financial statements of Southern Road & Bridge, LLC (the "Company"), which comprise the balance sheet as of December 31, 2025, and the related statements of income and changes in members' equity, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Southern Road & Bridge, LLC as of December 31, 2025, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Southern Road & Bridge, LLC and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Southern Road & Bridge, LLC's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists.

To the Members
Southern Road & Bridge, LLC
Palm Harbor, Florida

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Southern Road & Bridge, LLC's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Southern Road & Bridge, LLC's ability to continue as a going concern for a reasonable period of time.

Report on Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary schedules of earnings from contracts, contracts completed, contracts in progress, and general and administrative expenses are presented for purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Right of use assets obtained in exchange for finance lease liabilities	$ 715,157

The accompanying notes are an integral part of these financial statements.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations:

The Company operates as a contractor engaged in paving roadways and restoring bridges, generally across the Southeast. The work is performed primarily under unit-price and fixed-price contracts. Contract lengths vary but are typically less than one year.

Accounting Estimates:

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. Management periodically evaluates estimates used in the preparation of the financial statements for continued reasonableness. Appropriate adjustments, if any, to the estimates used are made prospectively based upon such periodic evaluation. It is reasonably possible that changes may occur in the near term that would affect management's estimates with respect to the percentage of contract completion, useful lives of property and equipment, and overhead cost allocations.

Revisions in estimated contract profits are made in the year in which circumstances requiring the revision become known.

Balance Sheet Classifications:

The Company includes in current assets and liabilities retentions receivable and payable under construction contracts that may extend beyond one year. A one-year time period is used as classifying all other current assets and liabilities.

Cash and Cash Equivalents:

The Company considers all liquid investments with an original maturity of three months or less to be cash equivalents.

Revenue and Cost Recognition:

The construction services performed under each contract represent a single performance obligation that is satisfied over time. Revenues from construction contracts are recognized over time using the cost-to-cost input method, measured by the percentage of costs incurred to date to estimated total costs for each contract. This method is used because management considers costs incurred to date to be the best available measure of progress on these contracts. Because of the inherent uncertainties in estimating costs, it is at least reasonably possible that the Company's estimates of costs and revenues will change in the near term.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Revenue and Cost Recognition (Continued):

Contract costs include all subcontract, direct material and labor costs and those indirect costs related to contract performance, such as indirect labor, insurance, supplies, tools, repairs and depreciation. Costs of inefficiencies or wasted resources (material or labor) are excluded when measuring progress and are expensed as incurred. General and administrative costs are charged to expense as incurred. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined. Changes in job performance, job conditions and estimated profitability, including those arising from contract penalty provisions and final contract settlements, may result in revisions to costs and income and are recognized in the period in which the revisions are determined. Changes in estimated job profitability resulting from variable consideration (such as incentives for completing a contract early or on time, penalties for not completing a contract on time, claims for which the Company has enforceable rights, or contract modifications/change orders in which the scope of modification has been approved, but the price has not been determined or approved) are accounted for as changes in estimates in the current period, but limited to an amount that will not result in a significant reversal of revenue in future periods.

Contract Receivables:

Contract receivables from construction are based on amounts billed to customers. The Company provides an allowance for credit losses, when necessary, which is based upon a review of outstanding receivables, historical collection information, existing economic conditions and reasonable and supportable forecasts. Normal contract receivables are due 30 days after issuance of the invoice. Retainages are due upon completion of contracts. Unbilled receivables result from accrual of revenues on contracts completed for which billings have not yet been rendered. Retainage and unbilled receivables for which the right to payment is unconditional are included in contract receivables. Contract receivables past due more than 30 days are considered delinquent. Delinquent contract receivables are written off based on individual credit evaluation and specific circumstances of the customer. Balances that remain outstanding after the Company has used reasonable collection efforts are written off. Management determined no allowance was necessary as of December 31, 2025.

Contract Assets and Contract Liabilities

The contract asset, "Costs and estimated earnings in excess of billings on uncompleted contracts," represents revenues recognized in excess of amounts billed. The contract liability, "Billings in excess of costs and estimated earnings on uncompleted contracts," represents billings in excess of revenues recognized.

Retainage on uncompleted contracts and unbilled receivables that are not due until certain contract conditions are met, are included in contract assets and contract liabilities. The Company's contract assets and contract liabilities are reported net, on a contract-by-contract basis.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Property and Equipment:

Property and equipment are stated at cost and depreciated over the estimated useful lives of the individual assets utilizing the straight-line method. Estimated useful lives are generally as follows:

Construction equipment	5 - 10 years
Transportation equipment	4 - 5 years
Office furniture and equipment	5 - 7 years

Major expenditures for property and equipment, and those which substantially increase useful lives, are capitalized. Maintenance, repairs and minor renewals not included as contract costs are expensed as incurred. When assets are retired, or otherwise disposed of, their costs and related accumulated depreciation are removed from the accounts and any resulting gain or loss is included in income for the year.

Income Taxes:

The Company, with the consent of its members, has elected to be taxed as a partnership under the provisions of the Internal Revenue Code, whereby income is passed through to the individual members. Under this election, the Company does not pay any federal or state income taxes. Accordingly, no provision for income taxes on current period income has been made in the accompanying financial statements.

If it is probable that an uncertain tax position will result in a material liability and the amount of the liability can be estimated, then the estimated liability is accrued. If the Company were to incur any income tax liability in the future, interest on any income tax liability would be reported as interest expense, and penalties on any income tax would be reported as income taxes. As of December 31, 2025, management believes there were no uncertain tax positions.

Leases:

ASC 842, "*Leases*" ("ASC 842") requires a lessee to recognize a right-of-use asset and a lease liability for all leases with a term greater than 12 months on its balance sheet regardless of whether the lease is classified as financing or operating.

The Company's lessee arrangements include both operating and finance leases for the Company's office facility, storage space, and various pieces of equipment. Under these arrangements, the Company records right-of-use assets and corresponding lease liabilities, each of which is based on the present value of the remaining lease payments discounted using the risk-free rate practical expedient allowable under ASC 842. Right-of-use assets are reported in noncurrent assets and the related lease liabilities are reported in current and long-term liabilities on the balance sheet. All leases are recorded on the balance sheet except for leases with an initial term less than 12 months for which the Company elected short-term lease recognition under ASC 842. Lease terms may contain renewal and extension options and early termination features. Lease expense is recognized on a straight-line basis over the lease term.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Subsequent Events:

Management has evaluated subsequent events through February 24, 2026 which is the date the financial statements were available to be issued.

NOTE 2 - CONTRACT RECEIVABLES

Contract receivables consist of the following:

Completed contracts	$ 11,902
Contracts in progress	12,870,728
	12,882,630
Retainage on completed contracts	117,313
	$ 12,999,943

As of December 31, 2024 the balance of contract receivables was $13,493,576.

NOTE 3 - CONTRACT ASSETS AND LIABILITIES

Information concerning uncompleted contracts is summarized as follows:

Cost incurred on uncompleted contracts	$ 95,045,810
Estimated earnings	25,987,298
	121,033,108
Less billings to date	(113,730,476)
	7,302,632
Retainage receivable on uncompleted contracts	821,609
	$ 8,124,241

NOTE 3 - CONTRACT ASSETS AND LIABILITIES (Continued)

Retainage receivable and contract balances from uncompleted contracts with customers are summarized as follows:

Costs and estimated earnings in excess of billings on uncompleted contracts	$ 7,519,978
Retainage - included in contract assets	794,095
Billings in excess of costs and estimated earnings on uncompleted contracts	(217,346)
Retainage - included in contract liabilities	27,514
	$ 8,124,241

Included in the accompanying balance sheet under the following captions:

Contract assets	$ 8,314,073
Contract liabilities	(189,832)
	$ 8,124,241

As of December 31, 2024, the balance in contract assets was $8,053,248 and the balance in contract liabilities was $848,670.

NOTE 4 - BACKLOG

Backlog represents the amount of revenue the Company expects to realize from work to be performed on contracts in progress at year end and from contractual agreements on which work has not yet begun. The following schedule summarizes changes in backlog on contracts for the year ended December 31, 2025:

Backlog balance at beginning of year	$ 97,884,470
New contracts during the year	70,739,692
Contract adjustments on contracts in progress	13,677,702
	182,301,864
Less contract revenue earned during the year	(95,532,398)
Backlog balance at end of year	$ 86,769,466

Contracts totaling $461,285 were signed but not yet started at December 31, 2025.

NOTE 5 - PROPERTY AND EQUIPMENT

Property and equipment consist of the following:

Construction equipment	$	6,394,270
Transportation equipment		2,055,344
Office furniture and equipment		15,415
		8,465,029
Less accumulated depreciation		(6,622,594)
Property and equipment, net	$	1,842,435

Depreciation expense was $501,517 for the year ended December 31, 2025.

NOTE 6 - INVESTMENT IN CAPTIVE INSURANCE COMPANY

The Company holds an investment totaling $795,723 in Highway Insurance Solutions, LTD, a group captive insurance company domiciled in the Cayman Islands. This captive insurance company provides workers' compensation insurance, auto liability, auto physical damage, and general liability insurance coverage to the Company.

NOTE 7 - RELATED PARTY NOTES RECEIVABLE

Related party notes receivable consist of:

Note receivable from related party, bearing interest at 6%, matures May 2029, secured by equipment	$	740,877
Note receivable from related party, unsecured, bearing interest at 5%, no interest is accrued until June 2026, matures May 2041		1,400,000
		2,140,877
Less current maturities		(212,049)
Related party notes receivable, less current maturities	$	1,928,828

NOTE 7 - RELATED PARTY NOTES RECEIVABLE (Continued)

Scheduled maturities for related party notes receivable are as follows:

2026	$ 212,049
2027	245,880
2028	260,347
2029	275,650
2030	77,260
Thereafter	1,069,691
	$ 2,140,877

NOTE 8 - EMPLOYEE NOTE RECEIVABLE

In 2019, the Company sold land to an employee for $168,000 in exchange for a note receivable, with monthly payments of $887. In 2025, the Company wrote off the remaining balance of $113,583 as a credit loss.

NOTE 9 - LINE OF CREDIT

The Company has a $5,000,000 revolving line of credit with a financial institution which renews annually and is due upon demand. The line of credit accrues interest at the SOFR Index plus 3% (6.87% on December 31, 2025), is secured by substantially all assets of the Company, is guaranteed by the members, and contains various restrictive covenants. At December 31, 2025 there was no balance on the line of credit.

NOTE 10 - LONG-TERM DEBT

Long-term debt consists of the following:

Notes payable to bank and finance companies, bearing interest at fixed rates up to 6.6%, maturities through January 2031, secured by substantially all assets of the Company, guaranteed by the members	$ 647,415
Less current maturities	(219,093)
Long-term debt, less current maturities	$ 428,322

NOTE 10 - LONG-TERM DEBT (Continued)

Scheduled maturities of long-term debt are as follows:

2026	$	219,093
2027		138,163
2028		126,730
2029		97,478
2030		62,187
Thereafter		3,764
	$	647,415

NOTE 11 - LEASES

Operating Leases:

The Company leases an office facility and storage space from a third-party lender under a lease that expired in August 2025 and continues on a month-to-month basis. The Company also leases equipment from a third-party lender under a lease which expires in April 2029. As of December 31, 2025, the right-of-use assets related to the operating leases totaled $16,721 and the lease liabilities totaled $16,721. Lease expense for the year ended December 31, 2025 was $161,082 and includes short-term leases with terms that are less than 12 months.

The following table presents supplemental information pertaining to the operating leases as of and for the year ended December 31, 2025:

Operating cash flows from operating leases	$	36,050
Weighted-average remaining lease term in years for operating leases		3.33
Weighted-average discount rate for operating leases		4.35%

The following table represents the maturities of the Company's operating lease liabilities and the present value discount at December 31, 2025:

2026	$	5,378
2027		5,378
2028		5,378
2029		1,793
Total undiscounted cash flows		17,927
Less present value discount		(1,206)
Total lease liabilities	$	16,721

NOTE 11 - LEASES (Continued)

Finance Leases:

The Company leases fleet vehicles under leases which extend through July 2029. As of December 31, 2025, the right-of-use assets related to the finance leases totaled $715,263 and the lease liabilities totaled $722,620. Amortization expense for the year ended December 31, 2025 was $251,014.

The following table presents supplemental information pertaining to the finance leases as of and for the year ended December 31, 2025:

Operating cash flows from finance leases (i.e. interest)	$	25,493
Financing cash flows from finance leases (i.e. principal portion)	$	244,440
ROU assets obtained in exchange for new finance lease liabilities	$	715,157
Weighted-average remaining lease term in years for finance leases		3.02
Weighted-average discount rate for finance leases		4.02%

The following table represents the maturities of the Company's finance lease liabilities and the present value discount at December 31, 2025:

2026	$	283,398
2027		226,967
2028		195,477
2029		62,362
Total undiscounted cash flows		768,204
Less present value discount		(45,584)
Total lease liabilities	$	722,620

NOTE 12 - COMMITMENTS AND CONTINGENCIES

Concentration of Credit Risk:

The Company's cash balances held at financial institutions are insured by the Federal Deposit Insurance Corporation ("FDIC") up to certain limits. At December 31, 2025, the Company had cash balances of $4,170,755 held by financial institutions in excess of insured limits.

Concentration of Revenue - Major Customers:

The Company's customer base consists of a diverse mix of corporate and governmental entities in a wide variety of industries. During 2025, the Company derived 25% of its total contract revenue from one major customer. At December 31, 2025, amounts due from this one major customer comprised 34% of total contract receivables and retainage at December 31, 2025.

NOTE 12 - COMMITMENTS AND CONTINGENCIES (Continued)

Captive Insurance Policy:

The Company manages its risk for various insurance claims through its participation in a captive insurance policy. The Company incurred premiums of $1,890,242 for the year ended December 31, 2025. Management is not aware of any claims in excess of fund balances at December 31, 2025; accordingly, no reserve has been recorded at December 31, 2025.

NOTE 13 - RELATED PARTY TRANSACTIONS

The Company holds notes receivables with various related parties as discussed in Note 7.

The Company's payroll is processed by a related entity. Payroll processing expenses were approximately $322,583 for the year ended December 31, 2025.

The Company leases office space from a related entity under a lease which matured in December 2025 and subsequently continued on a month-to-month basis. Operating lease expense related to this agreement was approximately $122,000 for the year ended December 31, 2025.

The Company leases equipment from a related entity on an as-needed basis. Equipment rental expenses paid to this entity amounted to approximately $1,032,000 for the year ended December 31, 2025, which is included within cost of revenues earned.

* Contractor Job Truck Mandatory Tools

	Tool	Minimum size	Quantity
1	Air compressor	20 CFM @ 90PSI	1
2	3/4" drive ratchet and socket set		1

3	1 inch drive air impact wrench		1
4	1 inch drive sockets	1-1/2" to 3"	1 each
5	Slug wrenches	1-1/2" to 3"	1
6	End wrenches	7/16" to 1-1/2"	2 each
7	Porta band saw w spare blades	4" opening	1
8	Sawzall w spare blades		1
9	Nylon slings 5,000 and 10,000 pound rated (vertical)	2" 2 ply/4" 2 ply	2 each
10	Grade 80 Chain 10,000 pound rated	1/2" X 10 ft	2
11	Clevis or Shackles 5 ton rated	5/8" alloy	4
12	Porta power 10 ton		1
13	Shovels- round and square point		3 each
14	Cutting torch set *see note*		1
15	Gas or diesel stick welder and accessories *see note*		1
16	Small diaphragm pump and accessories	2" suction	1
17	Tap and die set	1/2" to 2" NPT	1
18	Drill and bits for steel or ductile	1/2" to 2" NPT size	1 set
19	Pry bar	5 foot	1
20	Come along	2ton	2
21	Circular Saw and blades for cribbing/forms	7 1/2 inch	2
22	Generator 120/240 volt	3500 watt	1
23	Framing hammer and nails for forms		2

24	Screw gun and screws for forms and cribbing		1
25	Gas powered cutoff saw (K-12)	12inch	1
26	Chain saw for cribbing and for'ms	14 inch bar	1
27	Sledge hammers	4t/ and 6tl	1 each
28	Crew PPE to include Hard hat and gloves at minimum	as needed	per person

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Authorize the City Manager to execute the Agreement with Ajax Paving Industries of Florida, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Action Request: Motion to authorize the City Manager to execute the Agreement with Ajax Paving Industries of Florida, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Strategic Objective: Reliable Infrastructure

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Proposals (RFP) for a task work order-driven Civil On-Call Construction Services contract. Five (5) responsive proposals were received on March 18, 2026. Following evaluation, the City's selection committee recommended award to Ajax Paving Industries of Florida LLC, BCS Construction Group, Cathcart Construction Company Florida LLC, PCS Civil LLC, and Southern Road and Bridge LLC

- Qualifications and Experience
- References and Past Performance
- Capacity to Perform the Work
- Cost

The contract provides not-to-exceed unit prices for labor, materials, equipment, tools, transportation, and incidentals necessary to perform civil construction services on an as-needed basis throughout the City. Projects may include roadway and intersection improvements, drainage upgrades, ADA improvements, sidewalk construction, alley improvements, signing and pavement markings, recreational trails, traffic signal improvements, and

intelligent transportation system (ITS) infrastructure.

Work will be authorized by task order on an as-needed basis in an amount not to exceed annually appropriated funding. The initial contract term is three (3) years with the option for two (2) additional one (1) year renewals upon mutual agreement and annual appropriation of funds.

Approval of this agreement will provide the City with qualified contractors to perform civil infrastructure improvements in a timely and cost-effective manner, improve responsiveness to maintenance and capital project needs, and support implementation of the City's transportation, drainage, utility, and public infrastructure programs.

Funding:

301.5410.563000 Improvements Other Than Buildings (remaining balance $211,746.90)

301.5411.563000 Improvements Other Than Buildings (remaining balance $8,478,760.96)

301.5726.563000 Improvements Other Than Buildings (remaining balance $825,791.26)

Other CIP funding sources may be used based on the available annual budget

1. Ajax Paving Contract Signed

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Civil On-Call Construction Services

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and **AJAX PAVING IDUSTRIES OF FLORIDA, LLC.** (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Proposals, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its June 23, 2026, public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed the Annual Budgeted amount. Funding will be awarded by Task Orders.

b. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

c. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

d. Contractor must comply with any and all Federal, State, and local laws and regulations

now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

e. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.
   a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished

under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of (3) three years with (2) two, (1) one-year extensions from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement.

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured and providing coverage up through and including the final performance of any services provided

herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved, and any amount withheld is not subject to payment of interest by the City. The above provisions

will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:
    a. Standard Contract Addendum (Exhibit "A")
    b. Request for Bid/Proposal (Exhibit "B")
    c. Vendor Bid/Proposal (Exhibit "C")

d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:	**As to City:**
Ajax Paving Industries of Florida, LLC.	City Manager
One Ajax Drive	City of St. Pete Beach
Venice, FL 34275	155 Corey Avenue

21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Form Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this _____ day of _____, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and _____, hereinafter referred to as "Contractor", concerning that certain agreement dated the ____ day of _____, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian

St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

I. INVITATION

The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The types of projects that may be assigned under this Contract shall include, but not be limited to:

- intersection/roadway improvements
- drainage upgrades and/or installations
- ADA upgrades and pedestrian/bicyclist improvements
- sidewalk installations and upgrades
- alley improvements
- median modifications
- signing and pavement markings
- recreational trails
- signal upgrades and installations
- intelligent transportation systems (ITS) components upgrades

II. STATEMENT OF WORK

PART I: GENERAL REQUIREMENTS

1. SPECIAL CONDITIONS

A. **Local Preference, Location Points and Tie Breakers**

Location preferences do not apply due to the fact that some task orders may be funded with state or federal dollars.

B. **Minority Business Enterprise Policy**

Minority Business Enterprise Evaluation Criteria do not apply due to the fact that some task orders may be funded with state or federal dollars.

C. **Scrutinized Companies**

Scrutinized Companies with activities in Sudan List or activities in the Iran Petroleum Energy Sector List do not apply due to the fact that some task orders may be funded with state or federal dollars.

D. **Bonding and Credit**

Contractor/Vendor shall provide a letter of bondability showing their maximum bonding capacity.

E. **Contract Term**

This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

F. **Contract Pricing**

Contract prices for equipment and/or service will remain firm through the first three (3) contract years. Sixty (60) days prior to the contract renewal date, Contractor/Vendor may request a price adjustment. The price adjustment and justification must be submitted in writing, and be approved by the City. Said price increase may not, under any circumstances, exceed three (3) percent of the Construction CPI. No retroactive contract price adjustments will be allowed. If the Contractor/Vendor fails to submit a price adjustment within the sixty (60) days prior to the contract renewal date, current contract pricing will continue for the contract renewal period.

G. **Work Assignments**

All work to be performed shall take the following into consideration prior to assignment of any work to any Contractor/Vendor, at the discretion of the Procurement Manager:

1. **Estimated Cost < $250,000.00:**

The City retains the right to select any Contractor/Vendor to whom a multiple-award contract has been made when the opportunity to submit a quote for any job whose estimated cost is less than Two Hundred & Fifty Thousand Dollars ($250,000.00).

2. **Estimated Cost > $250,000.00 and < $500,000.00:**

The City shall obtain three (3) quotes from any Contractor/Vendor to whom a multiple vendor award has been made, for those jobs whose estimated cost is greater than Two Hundred & Fifty Thousand Dollars ($250,000.00) and less than Five Hundred Thousand Dollars ($500,000.00).

3. **Estimated Cost > $500,000.00:**
   a. The City retains the right to separately and competitively bid any and all projects whose cost estimates are greater than Five Hundred Thousand Dollars ($500,000.00). The determination will be made by the City Procurement Manager.
   b. Projects that exceed Five Hundred Thousand Dollars ($500,000.00) may not be sub-divided into separate projects in order to circumvent such requirement.

4. **Reassignment of Work:**

The City retains the right and authority to reassign work to another Contractor/Vendor, at any time, for the following reasons:

a. The lowest Contractor/Vendor cannot comply with the specifications in cases of an emergency.
b. The lowest Contractor/Vendor cannot respond to the job requirements, at the time, due to scheduling conflicts, staffing considerations or other reasonable cause(s) for preventing their completion of the task as required.
c. The City shall have the option to solicit additional quotes, bids, or even professional opinion about a particular job when in its best interest and could engage the services of another company/Contractor/Vendor. This exception will always require advanced written notice and explanation by the requesting City Department to the Procurement Manager, for approval, before authorizing any contemplated work to be done. The receipt of the approved purchase order shall be understood that all work is to immediately begin on the project, per the project schedule and needs as identified by the City and as agreed upon by the Contractor/Vendor.

5. **Cumulative Work shall not exceed $4,000,000.00:**

The cost of all work completed by a Contractor/Vendor shall not exceed Four Million Dollars ($4,000,000.00) in a calendar year. If all costs are expected to exceed this threshold, these services will need to be separately re-bid through issuance of a new set of bid specifications.

H. **Quotes**

1. The City will request a quote if and when needed. Vendors participating in the contract shall have ten (10) business days from written notification to respond to quotes, unless waived by the Procurement Manager. If work is an emergency, as determined by the City, vendors shall have (24) hours from email or phone notification to respond to quotes.
2. A Task Order Form will be provided to awarded Contractor/Vendor. A properly executed Purchase Order shall be issued for the work assignment and shall have the Task Order Form and all related paperwork attached as backup. The Purchase Order shall indicate the start and end dates for the project.
3. If the Contractor/Vendor does not wish to issue a quote for or cannot meet the requirements of the project, inclusive of the time given in which to complete the job; the Contractor/Vendor shall complete the Work Order Form by noting "No Quote" on the form itself and by also providing an explanation as to why they are not submitting a quote.
4. Final costs for any individual project shall not exceed the original approved and total cost for such project by more than ten percent (10%). Any and all anticipated project cost increases are subject to advanced approval by the Procurement Manager.
5. Any Contractor/Vendor that fails to submit a quote successively three (3) times in a row may have their contract cancelled due to non-performance.

I. **Notice to Proceed (NTP)**

All task orders $250,000.00 or less will use the purchase order as the Notice to Proceed (NTP). The start date and date or the number of day to complete the project must be included on the purchase order. If the start date is left off the purchase order then the date of the purchase order approval will default as the NTP start date. Projects over $250,000.00 will have a formal NTP issued through the Purchasing Division. All task orders must be reviewed by the Purchasing Division before a purchase order or NTP is issued.

J. **Liquidated Damages**

Liquidated damages will be assessed to the Contractor/Vendor/vendor for each consecutive calendar day completion of the project or work is delayed. The amount of liquidated damages will be dependent on the cost of the task order and will be calculated using the chart below.

Estimated Project Cost Over	Estimated Project Cost But Less than	Daily Charge Per Calendar Day
$0.00	$50,000.00	$960.00
$50,000.00	$250,000.00	$965.00
$250,000.00	$500,000.00	$1,245.00
$500,000.00	$2,500,000.00	$1,665.00
$2,500,000.00	$5,000,000.00	$2,715.00

K. **Project Spreadsheet Submittal**

Contractor/Vendor must submit a formal spreadsheet using the process below.

1. List of completed projects to include:
   a. Relevant project experience includes construction and delivery methods relevant to the type of project to be constructed utilizing the CM/GC method (or performing as a General Contractor/Vendor on similar types and sizes of projects).
   b. Describe no more than ten (10) and no less than five (5) projects in order of most relevant to least relevant (similar type of construction with a contract dollar amount of $500,000.00 or less) which demonstrates the firm's capabilities to perform such projects.
   c. For each project, the following information should be provided:
      i. Project name
      ii. Project location
      iii. Dates during which services were performed
      iv. Physical description (e.g. square footage, key components, site area)
      v. Brief description of Project Services performed by CM/GC or GC Firm.
      vi. Owners Information:
         a. Contact person
         b. Telephone number
         c. Email
         d. Project name
         e. Owner reference
         f. Original Contract Price
      vii. Amount of Change Orders by:
         a. Your Company
         b. Consultant
         c. Client/Entity
      viii. Final Project Price
      ix. Proposer should include a table with this information layout as follows:

Entity Name and Project Name	Contact Person Phone Email	Begin Project Amount	Change Orders by CMR	Change Orders by Engineer	Change Orders by Entity	Final Cost of Projects	Original Days for Construction	Final Construction Days

2. Any outstanding accomplishments of the firm that relates to the specific services being sought.

3. Any Quality Assurance and Value Engineering Programs should also be included.

2. STANDARD SPECIFICATIONS

The Project shall be constructed in accordance with these specifications, the Pinellas County Engineering Standard Details and the Florida Department of Transportation "Standard Specifications for Road and Bridge Construction", Latest Edition.

3. GOVERNING DOCUMENTS

The Specifications and all supplementary documents are essential parts of the Contract, and a requirement occurring in one is as binding as though occurring in all. They are intended to be complimentary and to describe and provide for a complete project. In case of discrepancy, calculated dimensions will govern over scaled dimensions.

The Contractor shall take no advantage of any apparent error or omission in the specifications. If the Contractor discovers such an error or omission, they shall immediately notify the Project Manager. The Project Manager will then make such corrections and interpretations as may be deemed necessary for fulfilling the intent of the specifications.

4. COOPERATION WITH OTHERS

The Contractor shall cooperate with the owners of any underground or overhead utilities in their removal and rearrangement operations in order that these operations may progress in a reasonable manner and that service rendered by these parties will not be interrupted.

A. Permits

1. City ROW Use Permit: The Contractor will obtain a Right of Way Use Permit from the City Permits Division located at 155 Corey Avenue, Florida. There will be no fee for this permit.
2. Public Services will require shop drawings, schedule, and the location of staging areas at the pre-construction meeting. Where the Contractor wishes to use private property, he shall obtain permission from the owner in writing and submit a copy at the first meeting.
3. The Contractor will be responsible for the requirements of all permits. There may be FDOT permits required for this project.

5. LINES, GRADES AND CONSTRUCTION SURVEYING

The Contractor shall lay out the work from the benchmarks, grades, dimensions, points and lines noted on the working drawings, established at the site, or supplied by the Project Manager. All work of every description shall be laid out and checked by the Contractor who will be held solely responsible for its correctness, and the Contractor shall pay for all expenses in connection with this work. The Contractor shall request clarification from the Project Manager of any errors, inconsistencies or omissions which they may discover. It is the Contractor's responsibility to review every street prior to milling and paving, including the inspection of overhead tree limbs, overgrown grass on pavement, manholes and gate valves.

The work may be checked by the Project Manager, and in the event of a discrepancy, their decision shall be final. No special compensation will be made to the Contractor to defray costs of any work or delays occasioned by making surveys and measurements, tests, or inspections, but such costs shall be considered as having been included in the price stipulated for the several items of work to be done under this Contract.

All attempts shall be made to protect existing property corner monumentation. The monumentation must be identified and marked prior to construction to ensure its permanency. All survey monuments, property corners, and benchmarks, which may be disturbed during construction, shall be referenced and replaced by the Contractor. All monuments and benchmarks disturbed or destroyed by the Contractor or any of his forces through accident or negligence shall be replaced by a Florida Licensed Professional Land Surveyor at the Contractor's expense. All survey markings shall be brought to the attention of the Project Manager.

6. MAINTENANCE OF DETOURS

The Contractor shall repair, at his expense, all potholes and other localized failures on streets which are used as detour routes to facilitate construction operations.

7. REPLACEMENT OF TRAFFIC, STREET SIGNS, SIGNAL LOOPS AND MAILBOXES

The Contractor shall remove and re-erect all existing traffic, street signs and mailboxes within the project site at his own expense for those which must be moved or relocated to permit construction operations.

The Contractor shall notify the City prior to disturbing any traffic signal loops and the City will install new traffic signal loops under a separate contract.

8. USE OF PREMISES

The Contractor shall confine all apparatus to the roadway or right-of-way in which the work is being performed and will not unreasonably encumber these premises with such apparatus, materials, supplies, and equipment. The Contractor shall promptly remove and dispose of all debris resulting from his operations.

9. PROSECUTION OF WORK/ LIQUIDATED DAMAGES

The Contractor shall begin work on any project/road no later than fourteen (14) calendar days after receipt of the "Notice to Proceed"; and shall diligently prosecute the same to project completion prior to the expiration of the total number of calendar days determined necessary for the project, from the date of said "Notice to Proceed".
Failure to complete each project within the determined number of calendar days shall cause the Contractor to be subject to the provisions for Liquidated Damages. The Contractor shall pay to the City as fixed liquidated damages for each calendar day of delay until the work is complete or accepted, and the Contractor and their sureties, jointly and severally, shall be liable for the amount thereof:

A. For each Task Work Order issued, the City project manager will determine the required number of days for completion of all work as well as the amount for liquidated damages, as appropriate.

B. Liquidated Damages will be assessed in accordance with Part I, 2. Special Conditions, J. Liquidated Damages of these bid specifications.

** Please refer to City of St Pete Beach Terms and Conditions, “Liquidated Damages, Penalties and Non-Conformance to Contract”

10. CONSTRUCTION SCHEDULE

A. Work shall be performed on an “as needed” basis for a **three (3) year contract period**. Upon mutual consent, this agreement may be extended for **two (2) additional one (1) year periods**, subject to the same terms and conditions and available funding being in place. No guarantee of volume or quantity of work is intended.

B. At the direction of the City of St Pete Beach, the Contractor will not be allowed to proceed with the scheduled work until restoration of preceding work areas are restored to the satisfaction of the City of St Pete Beach. It is the intent of this project to:

1. Start paving each street no later than three (3) working days after milling each street. If the street has not been paved after three (3) working days, a fee equal to the daily amount for liquidated damages indicated in Item #2J (above) will be assessed until the street has been paved. The time limit for streets to be paved where sewer manhole castings or water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve boxes have been adjusted or replaced.

2. Complete restoration including temporary striping and clean-up, shall be finished in no more than five (5) working days after the completion of paving activity and as directed by the City.

3. No work shall be done during the week between the hours of 9:00 PM and 6:00 AM, or between the hours of 9:00 PM and 9:00 AM on weekends or holidays; except for emergency work by a public service utility or by other permit approved by the City.
4. Night work may be established by the Contractor as regular procedure by obtaining the written permission of the City. Such permission may be revoked at any time by the City, if the Contractor fails to maintain adequate equipment and supervision for the proper execution, control, and safety of the work at night.

C. Work may need to be performed under more urgent timeline at the direction of the City of St Pete Beach. The Contract bid form includes pay items for Emergency Mobilizations for such occurrences. The Contactor shall respond to Emergency Work Requests within 24 hours and should expect to mobilize in less than 72 hours.

11. CONTRACTOR'S ACCEPTANCE OF CONDITIONS

The provisions of this Contract shall control any inconsistent provisions contained in the specifications. All Drawings and Specifications have been read and carefully considered by the Contractor, who understands the same, and agrees to their sufficiency for the work to be done.

It is expressly agreed that under no circumstances, conditions or situations shall this Contract be more strongly construed against the City than against the Contractor and his Surety.

Any ambiguity or uncertainty in the Drawings or Specifications shall be interpreted and construed by the Project Manager, or their designee, and their decision shall be final and binding upon all parties.

It is distinctly understood and agreed that the passing, approval and/or acceptance of any part of the work or material by the City, the Project Manager, or by any agent or representative as in compliance with the terms of this Contract and/or of the Drawings and Specifications covering said work, shall not operate as a waiver by the City of strict compliance with the terms of this Contract, and/or the Drawings and Specifications covering said work; and the City may require the Contractor and/or his surety to repair, replace, restore and/or make to
comply strictly and in all things with this Contract and the Drawings and Specifications any and all of said work and/or materials which within a period of one year from and after the date of the passing, approval, and/or acceptance of such work or material, are found to be defective or to fail in any way to comply with this Contract or with the Drawings and Specifications.

This provision shall not apply to materials or equipment normally expected to deteriorate or wear out and become subject to normal repair and replacement before the condition is discovered. The Contractor shall not be required to do normal maintenance work under the guarantee provisions. Failure on the part of the Contractor and/or his surety, immediately after notice to either repair or replace any such defective materials and workmanship, shall entitle the City, if it sees fit, to replace or repair the same and recover the reasonable cost of such replacement and/or repair from the Contractor and/or his surety, who shall in any event be jointly and severally liable to the City for all damage, loss and expense caused to the City by Reason for the Contractor's breach of this Contract and/or his failure to comply strictly and in all things with this Contract and with the Drawings and specifications.

12. HAZARDOUS MATERIALS

The Contractor shall be responsible for the independent inspection and certification of the removal, transportation and disposal of all identified and all unidentified hazardous materials located within the project site.

13. JOB CONDITIONS

A. The Contractor is to provide the City with a working schedule prior to commencing the project. The City reserves the right to revise and/or adjust the schedule accordingly.

B. City Notification**:** At least 72 hours in advance of closing, or partially closing, any street, alley, or other public thoroughfare, the Contractor shall notify the Engineering Division of the Public Services Department, and immediately notify the same agencies of the reopening.

C. Customer Notification**:** The City of St Pete Beach residents occupying a home on the street to be milled and paved shall be notified seven (7) days before the construction of the street begins. This is completed by the following:

1. A door hanger notice will be provided by the Department of Public Services. It shall contain the reason for the construction, the overall length of time with dates, any problems that may be encountered and other important information regarding the project. The Contractor is responsible for the installation of the door hanger notices no later than seven (7) working days before the construction of the street begins.

2. The Contractor shall hand this notice to each resident. If the resident is not available, the Contractor is to place the door hanger on the doorknob. In certain sensitive areas, usually business areas and as requested by the Engineer, each customer may be asked to sign a signature sheet with their name, address, and signature. The original shall be given to the Department of Public Services before any construction commences.

D. Utility Emergency Access**:** All fire hydrants, valves, water meters and backflow assemblies shall be free of all construction material and equipment and in plain view for easy emergency access or necessary maintenance by the City crews.

E. Pedestrian or School Crossings**:** Where the work crosses or interferes with school or pedestrian crossings, extreme care shall be taken by the Contractor to insure the safety of the school children or other pedestrians.

F. Temporary Staging Areas**:** The Contractor shall obtain all temporary construction staging areas approvals required and shall not encroach onto private property unless a written agreement has been made between the property owner and the Contractor; or onto public property unless a written agreement has been made and approval by the Purchasing Division's designee has been received prior to using the land. The Contractor shall assume full responsibility for the protection and safekeeping of materials stored at the staging areas.

G. Erosion Control**:** Prior to construction, all efforts for siltation/erosion control will be taken, including the use of turbidity screens, hay bales, and sod replacement at the earliest possible time prior to and after excavation/grading. Sediment/erosion controls should be used around drainage structures and any areas to mitigate erosion on or off the project site. The Contractor is responsible for any removal of asphalt debris in manholes or drainage structures.

H. Road Hauling**:** The existing paved roads in the City shall be used for transporting material required for construction of the project. The Contractor should be aware that any road that is damaged during construction due to truck/equipment involvement would be the responsibility of the Contractor to correct. The Contractor shall contact the City for specific routes to be used during construction.

I. Water on Street**:** All water shall be removed, and the streets dry prior to paving. No paving shall take place during a rainstorm event.

J. Towing of Vehicles**:** The City will remove any cars parked in the way of the resurfacing project as long as proper notification has been given as stated under Section 13.c. (above) of the Scope of Work.

K. Clippings**:** Where grass, tree roots or other vegetation has grown over or above the edge of the asphalt, it shall be removed to the existing edge of asphalt by the Contractor prior to paving the street.

L. City Utilities**:** If work by the Contractor results in damage to City owned utilities; the Contractor shall repair the damage immediately at no cost to the City. If the Contractor does not respond immediately to repair the damaged utility, the City Utilities Department will make the repair and bill the Contractor for the costs incurred.

M. Dumpsters**:** The City will relocate all dumpsters in the way of this project. The Contractor is to provide written notice to the City forty-eight (48) hours in advance when said dumpsters need to be moved.

N. Disturbed Areas**:** All areas disturbed by the construction shall be restored to a condition at least equal to the pre-construction conditions or to what shall be approved by the Project Manager.

O. Security**:** The Contractor shall be responsible for the site security and shall determine whether full time watchmen will be required. The Contractor shall inspect the area daily and take whatever measures necessary to protect the safety of the public, workmen and materials both day and night.

P. Brick/Driveways**:** The Contractor shall be responsible for the tack coat not being spread to the brick crosswalks, brick intersections, brick speed tables, driveways or other similar areas due to the hauling of the asphalt. These areas shall be covered with sand or other City approved material. If tack appears on these items from the Contract, it shall be the responsibility of the Contractor to remove it.

Q. Interference with Others**:** The Contractor shall coordinate with Pinellas Suncoast Transit Authority or any public agency to notify the agency of any and all potential disruption in service. The Contractor shall not interfere with materials, appliances, or workmen of the City, Private Utility Companies, or any other contractor, who may be performing work at the same sites. All contractors and other parties involved shall have equal rights as far as practicable, to the use of all roads and grounds, except as otherwise provided by these specifications. The decision of the Project Manager shall govern in cases of disagreement between contractors or other parties regarding such use.

R. Public Safety**:** The Contractor shall provide, erect, and maintain continually, seven days per week and twenty-four hours per day, all necessary barricades, reflectorized signs, signals, flashing lights, red lights, "danger" or "caution" or "street closed" signs, etc., and take all necessary precautions necessary for the protection of the work and the safety of the public. The Contractor shall also provide a watchman at all places where the work causes obstructions to normal traffic or constitutes in any way a hazard to the public.

S. Cleaning Up**:** The Contractor shall always keep the construction area clean from accumulation of waste material or rubbish, including storage areas. The Contractor shall remove any rubbish, tools, scaffolding, equipment and materials from and about the premises, which do not belong to the City, prior to completion of the work. The Contractor shall leave the work and premises, following the completion of work, in a clean and workmanlike condition satisfactory to the Project Manager or their representative.

T. Coordination of Details with the County Sheriff**:** Any traffic detour plan must be submitted by the Contractor for approval to the Engineer of Record, the Engineering Division of the Public Services Department and the Pinellas County Sheriff at least two (2) weeks prior to the implementation of said detour in order to provide adequate time for review. Detour plans must include all streets involved in the detour.

U. Maintaining Proper Drainage Flow**:** No drainage structure or paved waterway shall be blocked by the new pavement work. New pavement shall be feathered or tapered towards the inlet opening. This task is to be included as part of the paving operation and there shall be no separate payment for this work. Any debris entering the drainage structure during construction is to be removed by the Contractor.

V. Responsibility of the Contractor**:** The Contractor shall be entirely responsible and liable for all damage or injury as a result of his operations to all other adjacent public and private property, structures of any kind and appurtenances thereto met with during the progress of the work. The cost of protection, replacement in their original locations and conditions or payment of damages for injuries to such adjacent public and private property and structures affected by the work, whether or not shown on the drawings and the removal, relocation and reconstruction of such items called for on the drawings or specified shall be included in the various Contract Items and no separate payments shall be made thereof. Where such public and private property, structures of any kind and appurtenances thereto are not shown on the drawings and when, in the opinion of the Project Manager to avoid interference with the work, payment therefore will be made as provided for extra work in the Agreement. The Contractor is expressly advised that the protection of the buildings, structures, tanks, pipelines, and related work adjacent and in the vicinity of his operations, wherever they may be, is solely his responsibility.

W. Protection of Trees, Lawn & Sod**:** All trees, shrubs and sod shall be adequately protected by and in accordance with all ordinances governing the protection of the trees. No materials shall be placed so as to injure such trees, shrubs and sod. Trees, shrubs and sod destroyed by negligence of the Contractor or his employees shall be replaced by him with new stock of similar size and age, at its proper season and at the sole expense of the Contractor. Trees close to the work shall be protected against injury. The Contractor shall trim all branches and roots in the road that are necessary to complete the project and are liable to damage his operations, but in no case shall any tree be cut or removed without prior notification of the Project Manager. It is the Contractor's responsibility to inspect all roads that are to be milled and resurfaced. All injuries to bark, trunk, limbs, and roots of trees shall be repaired by dressing, cutting, and painting according to approved methods, using only approved tools and materials under the direction of City Staff. Lawn areas shall be left in good condition as before the starting of the work. Where sod has been removed shall be restored with new sod in a good workmanship manner approved by the resident or the Project Manager. The sod shall match existing grass and shall have no visible broad leaf weeds or foreign grasses. Water for the sod shall be supplied by the Contractor in sufficient quantities required to keep the grassed areas moist for a period of one month from the date of installation. The Contractor shall guarantee the satisfactory growth for a 90-day period.

X. Noise**:** The Contractor shall eliminate noise to as great an extent as practicable at all times. Air compressing equipment shall be equipped with silencers and the exhaust of all gasoline motors or other power equipment shall be provided with mufflers. In the vicinity of hospitals and schools, special care shall be used to avoid noise or other nuisances. The Contractor shall strictly observe all local regulations and ordinances covering noise.

Y. Access to Public Services**:** No materials used in the construction of the work shall be placed as to prevent free access to all fire hydrants, valves, manholes, driveways and roadways.

14. SUBSTITUTIONS

Whenever material or equipment are specified or described in the Contract documents by using the name of a proprietary item or the name of a particular supplier the naming of the item is intended to establish the type, function and quality required. Unless the name is followed by words indicating that no substitution is permitted, materials or equipment of other suppliers may be accepted by Project Manager if sufficient information is submitted by Contractor to allow Project Manager to determine that the material or equipment proposed is an approved alternate to that named. The procedure for review by the Project Manager will include the following as supplemented in the General Requirements. Requests for review of substitute items of material and equipment will not be accepted by Project Manager from anyone other than Contractor. If Contractor wishes to furnish or use a substitute item of material or equipment, Contractor shall make written application to Project Manager for acceptance thereof, certifying that the proposed substitute will perform adequately the functions and achieve the results called for by the general design, be similar and an approved alternate to that specified and be suited to the same use as that specified. The application will state that the evaluation and acceptance of the proposed substitute will not prejudice Contractor's achievement of Substantial Completion on time, whether or not acceptance of the substitute for use in the work will require a change in any of the contract documents (or in the provisions of any other direct contract with City for work on the Project) to adapt the design to the proposed work is subject to payment of any license fee or royalty. All variations of the proposed substitute from that specified will be identified in the application and available maintenance, repair and replacement service will be indicated. The application will also contain an itemized estimate of all costs that will result directly or indirectly from acceptance of such substitute, including costs of redesign and claims of other Contractors; affected by the resulting change, all of which shall be considered by Project Manager in evaluating the proposed substitute. The Project Manager may require Contractor to furnish at Contractor's expense additional data about the proposed substitute.

15. MINIMUM QUALIFICATIONS

The City has established minimum qualifications for Contractor expertise and experience regarding the subject project as follows:

A. The Contractor must provide a minimum of three (3) project references and may provide a maximum of five (5) project references for each of the five (5) criteria listed below.

B. Each project reference must have been successfully completed in the ten (10) years preceding the bid opening.

C. All criteria do not need to be satisfied by each submitted project reference, however, all criteria must have been satisfied two (2) times by the submitted project references.

D. Any project for which references are provided may have been self-performed with Contractor’s employees or performed by a subcontractor who is part of the Contractor’s team for this project.

E. The Contractor qualification requirements include the following:

1. Construction of site work including clearing, grubbing, and fine grading.
2. Construction of flexible and rigid pavement roadways, alleys, and trails.
3. Construction of sidewalk and ADA accessibility improvements.
4. Construction of stormwater utility upgrades.

5. Construction of signal, lighting, and intelligent transportation system (ITS) component upgrades.

[END OF PART I]

PART II: PROGRESS MEETINGS

1. **FREQUENCY**

Progress meetings will be held every other week or less, with the first meeting fourteen (14) days after the pre-construction meeting or fourteen (14) days or less after the date of the Notice to Proceed.

The City has the right to hold called meetings as required by the progress of the work.

2. **ATTENDANCE**

The following people should attend progress meetings, as applicable:

- Project Manager
- City Inspector Contractor
- Subcontractors as appropriate to the Agenda Suppliers as appropriate to the Agenda Others as appropriate

3. **PROGRESS SCHEDULE**

The Contractor shall submit a detailed schedule before work is to be started. It shall indicate the sequence of the work, the time of starting and completing each part.

4. **SUGGESTED AGENDA**

- Review approval of minutes of previous meetings. Review of work progress.

Field observations, problems, and conflicts. Problems which impede the construction schedule. Review of off-site fabrication, delivery schedules.

- Corrective measures and procedures to regain projected schedule, if necessary. Revisions to construction schedule.
- Progress schedule during succeeding work period. Coordination of schedules.
- Review submittal -- expedite as required. Maintenance of quality standards.
- Pending changes and substitutions. Shop drawing submittals.
- Review proposed changes for:
  Effect on construction schedule and on completion date. Effect on other contracts of the project.
  Other business

[END OF PART II]

***P*ART III: TECHNICAL SPECIFICATIONS**

1. GENERAL

Furnish all necessary labor, equipment, and materials to construct various types of public services infrastructure projects as outlined in Part I General Requirements, 1. Introduction.

Tasks may involve milling existing asphaltic concrete surfaces to specified depths. Excess milled material should be transported to an asphalt reprocessing plant. The streets specified should be surfaced with Superpave asphaltic concrete mix. Additionally, tasks include necessary adjustments or replacements of existing structures, traffic control, sweeping, cleanup, placement of painted and thermoplastic pavement markings, and installation of curb, gutter, and sidewalks.

2. MOBILIZATION

A. The Contractor is solely responsible for providing security for all materials stored on- site during the construction activities.
B. The Contractor shall provide ten (10) calendar days notification to the Engineer prior to initiating mobilization to the site and initiating work. The Contractor will also provide copies of all permits that have been obtained to the engineer prior to initiating work associated with such permits.
C. The Contractor shall restrict their operations to the designated work area and ensure that construction activities do not disrupt normal operational activities of the City's services.

D. The Contractor is responsible for visually inspecting the site to note obstructions or access difficulties.

E. The Contractor is responsible for providing and/or maintaining access to the work site to facilitate all construction, inspection and testing activities.

F. The contractor shall deliver/post notifications to affected citizens and business owners seven (7) calendar days prior to construction. A form of the notification must be approved by the City prior to distribution.

3. MILLING

A. Furnish all necessary labor, equipment and materials to mill pavements as specified, and haul the milled material to the reprocessing plant.

B. The methods used for milling shall meet all applicable portions of Section 327 - Milling of Existing Asphalt Pavement, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
C. All manhole castings and water valve boxes shall be adjusted and/or replaced by the Contractor, as specified, after milling is completed.

D. When the full street is required by these documents to be milled, the desired finished cross slope is to be 2%.

E. The unit price per square yard (SY) shall be full compensation for all work required to perform the milling, loading, hauling, sweeping, clean-up, and all incidentals necessary to complete the work specified in this section.

F. Milling of existing asphalt speed humps and speed tables is required as specified in the plans.

4. CONCRETE CURB AND GUTTER (INSTALLATION)

A. All Concrete Curb and Gutter work shall conform to the requirements of Section 520, "Concrete Gutter, Curb elements and Traffic Separator," of the FDOT Standard Specifications and placed in conformity with the lines, grades, dimensions and notes shown in the contract plans.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of the concrete being deposited against them. They shall be straight and free from warp or bends and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of a cross-section approved by the Project Manager and shall have a flat surface on top. The Contractor shall use flexible forms for all curb and gutter constructed on a radius.

C. Excavation shall be to the required depth, and the foundation material upon which these items are to be placed shall be compacted as specified in Section 120-9, "Compaction Requirements" of the FDOT Standard Specifications.

D. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated, and sufficient mortar brought to the surface. The top of the section shall be floated smooth, and its edges rounded to the radius shown on the plans. No concrete shall be placed during unfavorable weather conditions.

E. Except for machine placed concrete, at the option of the Contractor, joints may be formed by the use of dummy joints (either formed or sawed) or by the use of sheet metal templates. If sheet metal templates are used, they shall be at least as long as the depth of the curb section. They shall be set perpendicular to the top and face of the curb form and shall be held firmly in place during the placing of concrete. Templates shall remain in place until the concrete has set sufficiently to hold its shape, but shall be removed while the forms are still in place.

For machine placed concrete, unless an alternate method is approved by the Project Manager, contraction joints shall be sawed. The joints shall be sawed as soon as the concrete has hardened to the degree that excessive raveling will not occur and before uncontrolled shrinkage cracking begins.

Contraction joints shall be spaced at intervals of ten feet (10') except where a lesser interval is required for closure, but no section shall be less than four feet (4') in length. On medians and traffic separators, cuts shall align across from each other. Cuts shall also align with contraction joints of sidewalks adjacent to the curb.

Expansion joints shall be constructed at all structures, at all ends of curb returns, except that expansion joints shall not be constructed within twenty (20) feet of an island nose. They shall be located at intervals of 500 feet between other expansion joints or ends of a run. The expansion joint filler shall be ½ inch in width and shaped to the cross section of the curb.

F. The forms shall be removed within twenty-four (24) hours after the concrete has been placed, and minor defects then filled with mortar composed of one part of Portland cement and two parts of fine aggregate. Plastering will not be permitted on the face of the curb or the gutter. Any rejected curb and gutter shall be removed and replaced at no additional cost to the City. All exposed surfaces shall be given a brush finish while the concrete is still green. For any surface areas, however, which are too rough or where other surface defects make additional finishing necessary, the Project Manager may require that the curb be rubbed to a smooth

surface with a soft brick or wood block, with water used liberally. Also, if necessary further to provide a suitable surface, the Project Manager may require additional rubbing, using a thin grout or mortar, either of which additional rubbing shall be at no additional cost to the City.

G. When surface finishing is completed, the curb and gutter shall be cured per applicable paragraphs of Section 520-8, of the FDOT Standard Specifications.

H. After the concrete has set sufficiently, but not later than three (3) days after pouring, the spaces in front and back of the curb and gutter sections shall be refilled to the required elevation, with suitable material, adequately compacted. In sections where sidewalk is to abut the curb, the backfill shall be placed and compacted to a suitable depth for the placing of sidewalk forms. In all other sections of the work, the back of the curb shall be backfilled to the required elevation with suitable material, which shall be placed and thoroughly compacted in layers of not more than six inches (6") in thickness.

I. Where a base is to be constructed adjacent to a curb and gutter, the curb and gutter shall be properly backfilled and shall set for a period of not less than seven (7) days before any base material is placed against it.

J. The top and face of the finished curb and gutter shall be true and straight, and the top surface of curbs shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top or face of the curb or on the surface of gutters, the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

K. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per linear foot (LF) for constructing concrete curb, curb and gutter, or valley gutter, complete in place and accepted, and no additional compensation will be allowed therefore.

5. CONCRETE SIDEWALKS (INSTALLATION)

A. All Concrete Sidewalk work shall conform to the requirements of Section 522, "Concrete Sidewalks and Driveways", of the FDOT Standard Specifications and these Special Provisions and placed in conformity where so ordered by the Project Manager.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of concrete being deposited against them. They shall be straight, free from warp or bends, and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of cross-section approved by the Project Engineer and shall have a flat surface on top. The Contractor shall use flexible forms for all headers constructed on a radius.

C. Tree roots within the sidewalk area shall be removed to a minimum depth of one foot (1') below the specified subgrade surface. If a contractor must cut tree roots, sharp cuts shall be made. All roots greater than 2” shall be cut clean with a hand saw. The contractor shall hand dig near the roots and saw the roots, heavy mechanical equipment shall not be used. Broken roots shall be sawed 2” behind the ragged end. Roots smaller than 2” may be cut with a sharp-edged hand tool. Crushed or torn roots are more likely to allow decay. Sharply cut roots produce a flush of new roots helping the tree to recover from its injury. If tree roots larger than 6” must be cut, the Contractor shall inform the City Engineer or his representative prior to cutting for field direction. All boulders, organic material, soft clay, spongy material and any

other objectionable material shall be removed and replaced with material approved by the Engineer.

Before placing the forms for sidewalks, the surface upon which they are to be built shall be brought to the specified line, grade and elevation and uniformly compacted to a minimum 85 percent of AASHTO T-99 density. The materials shall be compacted at a moisture content such that the specified density can be uniformly attained. If necessary to attain the specified density, water shall be added to the material, or the moisture content shall be lowered by manipulation or allowing the material to dry, as is appropriate.

Fill areas including cut areas under the sidewalk which have been excavated more than six inches (6") below the bottom of sidewalk shall be compacted to a minimum of 95 percent of AASHTO T-99 density. The area to be compacted is defined as that area directly under the sidewalk and one foot (1') beyond each side of the sidewalk when right-of-way allows.

D. Transverse expansion joints shall be placed at intervals not exceeding eighty feet (80'), and at all places where a walk intersects or abuts a curb, driveway, building, other sidewalk or fixed objects. Expansion joints shall be constructed at each side of structures and at ends of curb returns, except that expansion joints shall not be constructed within twenty feet (20') of an island nose. Expansion joints shall be filled with ½ inch thick premolded joint filler conforming to the provisions in Section 932 of the Standard Specifications. The joint filler shall be shaped to the cross section of the sidewalk, shall extend from the surface to the subgrade, and shall be at right angles to the sidewalk surface.

   Contraction joints shall be sawed and shall be at intervals of four (4) to six (6) feet, or as shown on the plans. A slot approximately 3/16 inches wide and not less than 1 ½ inches deep shall be cut with a concrete saw after the concrete has set, and within twenty-four (24) hours of concrete being poured. Open type joints shall not be allowed.

E. Just prior to placing the concrete, the subgrade shall be moistened. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated and sufficient mortar brought to the surface. Thereafter, the surface shall be brought to a smooth even finish by means of a wooden float. No concrete shall be poured during unfavorable weather conditions.

F. The concrete shall be given a broom finish. The top of the finished sidewalk shall be true and straight, and the top surface of sidewalks shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top of the sidewalk the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

G. When surface finishing is completed, the sidewalk shall be cured per applicable paragraphs of Section 520-8, of the Standard Specifications. After concrete has set sufficiently, but no later than three (3) calendar days after pouring, the space alongside the sidewalk shall be backfilled, compacted and sodded or seeded as shown on the striping plans.

H. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per Square Yard for constructing sidewalks, complete in place and accepted, and no additional compensation will be allowed therefore.

6. LEVELING/RESURFACING

A. **Material:**

1. The material used for leveling shall be Superpave asphaltic concrete.

2. The material used for resurfacing shall be Superpave asphaltic concrete. Friction Course mixes may be used as specified by the City Project Manager.

B. **Construction Requirements:**

1. The leveling and resurfacing shall commence within three (3) working days after the milling of each street. The time limit for streets where castings or other water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve box has been adjusted or replaced.

2. The methods used for re-paving shall meet all applicable portions of Section 330 - Hot Mix Asphalt General Construction Requirements, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
3. The Contractor shall contact all utility and TV cable companies for location of their facilities. The exact location of their facilities, type of material used by the utility and TV cable, etc. shall be determined by the Contractor prior to any excavation work required by this Contract.

4. The Contractor shall be responsible for the protection of all pavements, sidewalks, and other improvements within the work area. All damage to such improvements, as a result of the Contractor's operations, beyond the limits of the work of pavement replacement as described herein, shall be repaired by the Contractor at the Contractor's expense.

5. Testing by City: Testing may be completed by an independent testing laboratory. If core borings are done to determine thickness and density, the Contractor is responsible for filling these holes in the pavement.

C. **Quality Control:**

1. The Contractor shall have a Quality Control Technician who has been certified by the State of Florida Department of Transportation as a Certified Asphalt Plant Technician, available at the asphalt plant at all times the Contractor is producing asphalt mix for use on this project.

2. The Contractor's quality control procedures, inspection and tests shall be documented, and that information shall be available for review by the Project Manager or his representative, throughout the course of the Contract.

3. The mix design shall meet the requirements of Section 334-3.2 for the type of Superpave asphalt indicated in the plans as set forth in Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. Friction course asphalt concrete must meet the requirements of Section 337 for the type of friction course indicated in the plans. Submit a Notarized Certification of Specification Compliance letter on company letterhead to the Engineer stating that all material produced and placed on the project was in substantial compliance with the specifications. The City may run independent tests during the project to determine the acceptability of the material.

7. UTILITY ADJUSTMENTS & REPLACEMENTS

A. **Adjusting Existing City Valve Boxes:**

1. The Contractor is to provide the necessary equipment to adjust the castings without damaging the existing structure. Adjustment would include being able to screw the top portion of the valve box up or down. Water valves that cannot be adjusted either up or down must be replaced under Section 6.2. If the structure is damaged, the Contractor is to replace the structure to its original condition at their cost.

2. The materials and construction methods for this work shall conform to applicable portions of Section 425 Inlets, Manholes and Junction Boxes, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.

3. The quantities to be paid for under this section shall be for the number of valve boxes, adjusted physically.

4. Structures, sections of structures, valve box sections or other items necessary for adjustment that are considered debris and that has been removed by the Contractor as part of the progress of work shall be removed from the project site by the Contractor at the end of each day's work. The Contractor is to remove all debris deposited in the structure as a result of the work performed.

B. **Castings:**

1. The Contractor shall notify the Project Manager or his representative on any questions regarding the prior adjustment or replacement of manhole frames or valve boxes.

2. Manhole frame and covers and valve boxes to be replaced are to be furnished by the Contractor.

3. Castings damaged by construction shall be replaced at no additional cost to the City of St Pete Beach.
4. All castings shall be adjusted and replaced in accordance with the manufacturers recommended requirements.

5. Adjusted or replaced castings shall be set at the grade of the proposed asphalt after compaction with not more than ¼" variation in 10 feet.

8. STRIPING AND MARKINGS

A. **Temporary Striping**: Temporary traffic stripes and markings will be required. Temporary markings shall be placed immediately after milling on any arterial/collector roads or within the immediate proximity of a school, and immediately after final asphalt on all roads. Before opening any re-paved area to traffic, temporary markings shall be applied as specified by the Project Manager. The paint used for this work shall be in accordance with the FDOT specification.

B. **Permanent Striping**: The Contractor shall place permanent traffic stripes and markings in accordance with reference points and alignment gathered by the Contractor prior to milling or overlay or in accordance with striping plans provided by the City of St Pete Beach. The Contractor shall use an Alkyd/Maleic thermoplastic compound and application methods meeting the requirements of Section 711 – Thermoplastic Pavement Markings, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. The thermoplastic compound shall be extruded on the pavement surface in a molten state by mechanical means with surface application of glass spheres, and upon cooling

to ambient pavement temperature shall produce an adherent pavement marking of the specified thickness and width and capable of resisting deformation.

C. A minimum of 21 days curing time after asphalt placement shall be allowed before the placement of any thermoplastic marking commences, with all thermoplastic markings to be completed within 28 days after asphalt placement.

D. The color of the thermoplastic shall be white, yellow, or blue as specified by the M.U.T.C.D.; and revisions thereof.

9. CLEANUP AND DUST CONTROL

A. The Contractor shall furnish and operate a minimum of one (1) mechanical sweeper for the purpose of removal of loose milled material. After milling and before resurfacing, the Contractor shall water the streets as necessary to prevent dust nuisance from his operations or from traffic.

B. Upon completion of the work on each street and before acceptance, the Contractor shall remove all surplus and discard materials and rubbish; shall restore in an acceptable manner all property, both public and private, which has been damaged during the prosecution of the work and shall leave each street in a neat and presentable condition throughout the entire length of the work under Contract. This shall include, but not be limited to the overspray of tack, and shall be completed within one (1) week after the resurfacing of each street.

C. Failure of the Contractor to comply with the Project Manager cleanup orders may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

D. 5% of the value of the work performed may be retained, should at the opinion of the City, restoration not be completed.

E. The cost of all work regarding Cleanup and Dust Control shall be included in the prices for other pay items, which are included in the Contract.

F. The Contractor shall reflect in the schedule, which shall be approved prior to construction, the time required for complete restoration. The Contractor shall strictly adhere to the schedule.

G. The Contractor shall take the necessary measures to prevent siltation and other construction related materials including tack coatings from entering storm inlet structures and manhole structures during the road repaving operation.

10. TRAFFIC CONTROL, STREET CLOSURES, DETOURS AND BARRICADES

A. The Contractor shall comply with all applicable portions of Section 102 – Maintenance of Traffic – Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision, and City requirements for traffic control.

B. The Contractor shall furnish all necessary barriers, lights, signs, and flag persons, to advise the public of detours and construction hazards. All flag persons on site shall be properly qualified.

C. The Contractor shall be responsible for compliance with additional public safety requirements, which may be ordered by the Project Manager or his authorized representative.

D. Failure of the Contractor to comply with the public safety requirements may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

E. The Contractor shall furnish and install, and upon completion of the work, promptly remove all signs and warning devices.

11. SODDING

A. **Description:** All sodding shall conform to the requirements of Section 570, FDOT Manual on Road and Bridge Construction, latest revision.

B. **Materials:**

1. **Sod:** Sod shall be Argentine Bahia as determined by the Project Engineer. Where sodding will adjoin, or be in sufficiently close proximity to, private lawns, other types of sod may be used if desired by the affected property owners and approved by the Project Engineer. The sod shall be taken up in commercial-size rectangles, preferably 12-inch by 24-inch or larger. Maximum allowable deviation from the standard widths and lengths shall be five percent (5%). Broken pads and torn or uneven ends will not be acceptable. The sod shall be sufficiently thick to secure a dense stand of live grass. The sod shall be live, fresh and uninjured, at the time of planting. It shall have a uniform soil thickness of three-fourths inch (3/4"), plus or minus one-fourth inch (1/4"), at the time of cutting. Measurement for thickness shall exclude top growth and thatch. The soil mat shall adhere firmly to the roots such that it will not break, crumble, or tear during handling and placing. No muck or heavy peat soil grown sod will be accepted. All sod shall be 97% free of weeds and other grasses. All sod shall comply with State and Federal laws with respect to inspection for plant diseases and insect infestation. An inspection certificate, required by law, may be requested by the Project Engineer for each shipment. All sod shall be placed as soon as possible after being dug and shall be shaded and kept moist from the time it is dug until it is planted. No sod which has been cut for more than 48 hours may be used unless specifically authorized by the Project Engineer.

2. **Commercial Fertilizer:** All commercial fertilizers shall comply with the State fertilizer laws. All fertilizers shall be uniform in composition, free flowing and suitable for application by mechanical spreader equipment. The chemical designation of the fertilizer shall be 12-8-8 or equivalent ratio. At least 50% of the phosphoric acid shall be from normal super phosphate or an equivalent source which will provide a minimum of two units of sulfur. The amount of sulfur shall be indicated on the quantitative analysis card attached to each bag or other container.

3. **Water:** The water may be obtained from any approved spring, pond, lake, stream or municipal water system. The water shall be free of excessive and harmful chemicals, acids, alkalies, or any substance which might be harmful to plant growth or obnoxious to traffic. Salt water shall not be used. The Contractor shall pay for all water used for the installation of sod.

C. **Construction Methods:**

1. **Soil Moisture:** Rough and fine grading shall be carefully executed to ensure that the final placed sod will conform to existing grades, free of depressions, “bird baths” or

bumps. The area on which sod is to be placed shall contain sufficient moisture for optimum results. During periods of high temperature and after all unevenness in the soil surface has been corrected, the soil shall be lightly irrigated immediately prior to laying the sod. Muddy soil shall not be created.

2. **Placing Sod:** The first row of sod shall be laid in a straight line with subsequent rows placed parallel to and tightly against each other. Lateral joints shall be staggered to promote more uniform growth and strength. Care shall be exercised to ensure that the sod is not stretched or overlapped and that all joints are butted tight in order to prevent voids which would cause air drying of the roots. The sod shall form a solid mass. The sod shall be firmly embedded by light tampering and rolling to ensure contact with the subgrade and to provide a smooth, even surface to eliminate voids under the root system making dry spots. The sod shall be staked on all slopes of 2:1 or steeper with pegs or similar material, driven through the sod blocks, six inches (6") into firm earth at suitable intervals.

3. **Watering:** The sod shall be watered with a fine spray immediately after placing, such that the underside of the new sod pad and soil immediately below the sod are thoroughly wet. The sod shall be kept in moist condition for the duration of the contract period (and in no case less than 4 weeks except in dry season it shall be 8 weeks). The moistened condition shall extend to at least to the full depth of the rooting zone. Water shall not be applied between the hours of 10:00 a.m. and 6:00 p.m.

D. **Maintenance:** The Contractor shall, at no additional expense to the City, maintain the sodded areas in a satisfactory condition until final acceptance of the project. Such maintenance shall include the filling, leveling, and repairing of any washed or eroded areas, as deemed necessary by the Project Engineer. The Project Engineer, at any time, may require resodding of any areas in which the establishment of the grass stand does not appear to be developing satisfactorily. The Contractor shall mow lawns as soon as there is enough top growth to cut with mower set at height of two inches (2") and shall repeat mowing as required throughout the duration of the project, to maintain such height. The Contractor shall not delay mowing until grass blades bend over and become matted and shall not mow when grass is wet.

E. **Measurement and Payment:** Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per square yard (SY) for furnishing, placing, maintaining and replacing sod, complete in place and accepted, and no additional compensation will be allowed therefore.

[END OF PART III]

SECTION 01425
FDOT STANDARDS REFERENCE

PART 1 GENERAL

1.01 Section Includes

Instruction on the use and applicability of FDOT standards on the project

1.02 Requirements

A. The Florida Department of Transportation, Standard Specifications for Road and Bridge Construction, latest non-metric edition ("Standard Specifications"), and Standard Plans for Road Construction, latest non-metric edition ("Standard Plans") are referenced herein as source documents for applicable technical specifications and construction details to be used in the construction of this project. The term “latest edition” refers to the latest edition implemented by FDOT and includes all FDOT implemented supplements at the time of bid advertisement.

B. Method of Measurement and Basis of Payment is to be in accordance with the Florida Department of Transportation Standard Specifications. Any item which is detailed in the Plans and for which material types, sizes and quality are also called out, the "Standard Plans" shall take preference over the plan detail unless otherwise directed by the Engineer.

C. Where the FDOT Standard Specifications use the reference "Department", replace "Department" with "Owner", except for when such reference is to Department Standards and evaluation criteria.

D. The Standard Plans are referenced herein as a source document for applicable construction items and details called for in the plans for which a specific plan detail is not provided. The Contractor shall construct the items called for in the plans in accordance with the "Standard Plans" unless otherwise defined or detailed in the plans or as directed by the Owner, Engineer or authorized representative.

E. The Standard Plans are available for download from the FDOT website at: https://www.fdot.gov/design/standardplans

F. In case of conflict, the Technical Specifications takes precedence over FDOT specifications for a particular construction requirement.

G. Copies of the latest implemented edition and implemented supplements of the Florida Department of Transportation Standard Specifications are available for download from the FDOT website at: https://www.fdot.gov/programmanagement/Implemented/SpecBooks

H. The Contractor shall inform the Owner and Engineer in writing of any specification that the Contractor feels is ambiguous or conflicting with other plan notes and details prior to the construction of the associated item. The Engineer will determine which information is to be used for construction. The Contractor is responsible for the removal and replacement of any item improperly constructed resulting from a misinterpretation of the specifications at no additional cost to the Owner.

PART 2 PRODUCTS - Not Used

PART 3 EXECUTION

3.01 General

The Contractor shall use Divisions Two (II) and Three (III) of the FDOT Specifications as they relate to methods of construction and material types and quality for the appropriate construction items contained within this project.

END OF SECTION

III. BID FORM

See attached Excel document.

IV. GENERAL CONTRACT TERMS

REQUEST FOR PROPOSALS
Civil On Call Construction Services

REQUEST FOR PROPOSAL SUMMARY
The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The "City" intends to **award multiple contracts** to vendors who can provide the best value for services. Vendors may submit proposals for all, some, or only one of the requested line items or categories. **It is not mandatory to submit a proposal for every item listed**. A bidder may bid on any, all, or none of the items. The "City" reserves the right to select multiple vendors to optimize cost-efficiency and capability across different segments of the project. Proposals will be evaluated based on capability, cost, and capacity to perform the specific line items requested.

PROPOSAL SUBMITTALS
Proposal documents must include a signed/notarized Contractor's Proposal Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit electronic proposals only. Bidders must submit electronically only through Bonfire platform. When bidding electronically, only one copy should be submitted.

Proposals shall include the following:

- A signed and notarized Proposer's Contract Proposal.
- Current proof of insurance certificate.
- A list of references and minimum qualifications as outlined in Section V.
- One copy of bid electronically submitted to Bonfire platform.

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http://www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

Proposers or persons wishing to submit a proposal on this project shall be licensed, and insured in accordance with the City's requirements

The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals, or accept any proposal or part thereof deemed to be in the best interests to the City of St. Pete Beach.

Electronic proposals must be submitted by **9:00 AM on April 08, 2026 (Deadline),** clearly marked as: **"Civil On Call Construction Services."**

PRE-PROPOSAL MEETING
An optional pre-proposal meeting will be held on **March 18, 2026 at 10:00 AM EST** via Microsoft Teams conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS
No oral interpretations will be made to any firms as to the meaning of the scope of work or any other

contract documents included in this **RFP.** All questions pertaining to the terms and conditions or scope of work of this Request for Proposal **(RFP)** must be sent in writing via email only to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 AM EST on March 25, 2026.** Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFP**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFP** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so. If the Proposer discovered the opportunity through the online platform (Bonfire), do not submit questions through these platforms. **Only questions emailed directly to the City Procurement Manager will be answered.**

BEGINNING DATE
The Proposer shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Proposer shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City.

COMPLETION OF WORK
The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

COSTS INCURRED BY PROPOSERS
All expenses involved with the preparation and submission of proposals to the City, or any work performed in connection therewith, shall be borne solely by the Proposers. No payment will be made for any responses received or for any other effort required of or made by; the Proposer's prior to contract commencement.

ORAL PRESENTATION
The City may require an oral presentation of the proposal at the Evaluation Committee's discretion. This could also include a formal interview of any and all members of the Proposer's contract management staff.

CONFLICT OF INTEREST
The Proposer represents that it presently has no interest and shall acquire no interest, either direct or indirect, which would conflict in any manner with the performance or services required hereunder, as provided for in FL Stat. 112.311. The Proposer further represents that no person having any interest shall be employed for said performance.

The Proposer shall promptly notify the City's representative, in writing, by certified mail, of all potential conflicts of interest for any prospective business association, interest, or other circumstance, which may influence or appear to influence the contractor's judgment or quality of services being provided hereunder. Such written notification shall identify the prospective business association, interest or circumstance, the nature of work that the Proposer may undertake and request an opinion of the city as to whether the association, interest or circumstance would, in the opinion of the City, constitute a conflict of interest if entered into by the Proposer. The City agrees to notify the Proposer of its opinion by certified mail within thirty days of receipt of notification by the Proposer.

LATE PROPOSAL OR MODIFICATIONS
Modifications in writing received prior to the time set for the proposal submittal will be accepted. Proposal modifications received after the time set for the proposal submittal will not be considered.

RELATED PARTIES AND MULTIPLE PROPOSALS

Where two (2) or more related parties each submit a proposal or multiple proposals are received from (1) Proposer, for any such contract, such proposals shall be judged non-responsive. Related parties mean Proposers or the principles thereof, which have a direct or indirect ownership interest in another Proposer for the same contract or in which a parent company or the principles thereof where one (1) Proposer has a direct ownership interest in another Proposer for the same contract.

RIGHT TO AUDIT
The City of St. Pete Beach reserves the privilege of auditing a Proposer's record as such records relate to purchases or work between the City and said Proposer. Records should be maintained for three years from contract date.

VARIANCE FROM STANDARD TERMS & CONDITIONS
All standard terms and conditions stated throughout the RFP apply to this contract except as specifically stated. This should be fully understood by Proposers prior to submitting a proposal.

ASSIGNMENT
The Proposer shall perform this contract. No assignment or subcontracting shall be allowed without prior written consent of the City. If a Proposer intends to subcontract a portion of this work, the Proposer must disclose that intent in the proposal. In the event of a corporate acquisition and/or merger, the Contractor shall provide written notice to the City within thirty (30) business days of Proposer's notice of such action or upon the occurrence of said action, whichever occurs first. The right to terminate this contract, which shall not be unreasonably exercised by the City shall include but not be limited to, instances in which a corporate acquisition and/or merger represent a conflict of interest or are contrary to any local, state, or federal laws. Action by the City awarding a proposal to a firm that has disclosed its intent to assign or subcontract in its response to the RFP, without exception shall constitute approval for purpose of this Agreement.

LOBBYING Lobbying of Evaluation Committee members, City employees, or elected officials regarding request for proposals, request for qualifications, bids or contracts, during the pendency of bid award or bid protest, by the bidder/proposer/protestor or any member of the bidder's/proposer's/protestor's staff, an agent of the bidder/proposer/protestor, or any person employed by any legal entity affiliated with representing an organization that is responding to the request for proposal, request for qualification, bid or contract, or has a pending bid protest is strictly prohibited either upon advertisement or on a date established by the City and shall be prohibited until either an award is final or the protest is finally resolved by the City Manager or Procurement Manager; provided, however, nothing herein shall prohibit a prospective bidder/proposer from contacting City departments to address situations such as clarification and/or questions related to the procurement process. For purposes of this provision, lobbying activities shall include but not be limited to, influencing or attempting to influence action or non-action in connection with any requests for proposal, request for qualification, bid or contract through direct or indirect oral or written communication or an attempt to obtain goodwill of persons and/or entities specified in this provision. Such actions may cause any request for proposal, request for qualification, bid or contract to be rejected.

ADDITIONAL REQUIREMENTS
The City reserves the right, by change order, to unilaterally add or delete locations/services, either collectively or individually, at the City's sole option, at any time after award has been made as may be deemed necessary or in the best interest of the City. In such case, the Proposer will be required to provide or reduce services to this contract in accordance with the terms, conditions, and specifications.

SERVICES AGREEMENT
A written agreement incorporating the RFP and the successful proposal will be prepared by the City, signed by the successful Proposer, and presented to the City Commission for approval and signature.

INTEGRITY OF REQUEST FOR PROPOSAL DOCUMENTS
Proposers shall use the original RFP forms provided within the RFP and enter information in the spaces where a response is requested. Proposers may use an attachment as an addendum to the RFP forms if sufficient space is not available on the original form for the Proposer to enter a complete response. Any modifications or alterations to the original RFP documents by the Proposer, whether intentional or otherwise, will constitute grounds for rejection of the RFP. Any such modifications or alterations a Proposer wishes to propose must clearly be stated in the Proposer's RFP response and presented in the form of an addendum to the original RFP documents.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in this Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the contract and requirements and shall determine acceptance of the work under this Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the contract terms in a fair and unbiased manner.
If a variation from any requirements is allowed, the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

EXAMINATION OF SITE
Proposer shall carefully examine project site and be familiar with the work required for the project, investigate all site conditions that may affect execution of work as detailed in the construction documents. Contact the City's Procurement Manager or their designee for changes or alterations before proceeding.

ASSURANCES
The responding Proposer shall provide a statement of assurance that the Proposer is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

ASSIGNMENT AND TRANSFER OF CONTRACT
The Proposer shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS
The Proposer shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PAYMENT
Payment shall be made to the Proposer for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

PERIOD OF PERFORMANCE
The target completion for the base Scope of Services is January 2027, corresponding to delivery of the Design-Build Readiness Package. The City reserves the right, at its sole discretion and subject to funding

availability, to amend this Agreement to extend the Consultant's services through final (100%) design. Any additional services shall be authorized by written amendment and negotiated in accordance with the Consultants' Competitive Negotiation Act (Section 287.055, Florida Statutes).

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Proposer will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Proposer without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Proposer's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Proposer to make a change in the Work, and if the City and the Proposer do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the Proposer shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Proposer believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, they shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Proposer first discovered the occurrence. The Proposer shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Proposer shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Proposer shall prepare proposals detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Proposer's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Proposer's proposals shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable proposal will not justify an increase in Contract Amount or Contract Time. Proposer agrees that it shall give the City access to any and all of Proposer's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Proposer for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Proposer shall be at his expense

without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Proposer or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Proposer proposals or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to be used shall be those used for the Proposer's costs, except that the term "Subcontractor" shall replace the term "Proposer," context permitting.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Proposer, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit.

In such case, the Proposer will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Proposer to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Proposer (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Proposer employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

PAYMENTS FOR WORK COMPLETED
All payments under this agreement shall comply with the requirements of Florida Statutes, Section 215.422, commonly referred to as the "Prompt Payment Law." This includes timely processing of invoices and adherence to statutory interest provisions for late payments. The Contractor shall submit detailed invoices for services rendered under this agreement. Each invoice must include: Purchase Order or Contract Number, Description of services provided, Dates of service, Total amount due. Payment will be made within 45 days of receipt of a proper invoice and acceptance of deliverables, as required by Florida law. If payment is not made within the statutory timeframe, interest penalties will apply in accordance with Section 215.422, Florida Statutes. Payments will be issued via electronic funds transfer (EFT) unless otherwise agreed in writing. Contractor must provide accurate banking information to facilitate EFT.

PAYMENTS WITHHELD
The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Proposer to make payments properly to Subcontractors or for labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Proposer

f) Failure of the Proposer to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS
Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Proposer, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such sums to the Proposer.

Before the approval of the final payment, the Proposer shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS
If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Proposer, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Proposer all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Proposer and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Proposer. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies

to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

LICENSES AND PERMITS

The Proposer shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the Proposer is responsible for non-compliance of all permit requirements, including all fines resulting from Proposer's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Proposer shall be responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the Proposer awarded the project, MUST also register their license with the City.

LABOR PROVISIONS

The Proposer and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed. The State of Florida prevailing wage law requires that the Proposer shall fully comply with all provisions contained in Section 215.19, "Schedule of Prevailing Wage Rates for Specified Public Construction." The wage rates set forth by such determination shall apply to this project.

INSURANCE

The Proposer shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Proposer's General Public Liability and Property Damage Insurance issued to the Proposer and protecting the Proposer from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Proposer or by any Subcontractor hired by the Proposer or anyone directly or indirectly employed by the Proposer or hired by the Proposer.

The successful Proposer shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Proposer or third party under the direction or control of the Proposer. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Proposer must furnish the City with Certificate of Insurance prior to commencement of work. An

approved Certificate of Insurance furnished by the Proposer's carrier to guarantee the Proposer being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Professional Liability Insurance $2,000,000 each occurrence.
- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY
The Proposer shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Proposer shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Proposer shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Proposer will provide security on off days and holidays. The Proposer shall be responsible for all charges incurred with such action.

The Proposer shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Proposer, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Proposer shall also protect adjacent property as required by law.

PROPOSAL REVIEW AND CONTRACT AWARD
Failure to submit all documents requested at the time of proposal may deem the Proposer's proposal ineligible for award. The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals. The contract shall be awarded by written notice to the responsible and responsive Contractor whose proposal is determined in writing to be the most advantageous to the City, taking into consideration the price and other criteria set forth in this request for proposals. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS
The laws of the State of Florida do apply to any purchase made under this Request for Proposal. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their proposal and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Proposer agrees to comply with all applicable portions of Fla. Stat. 448.095. Proposer must use the

U.S. Department of Homeland Security's E-Verify System, hhttps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Proposer shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Proposer with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Proposer shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Proposer must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Proposer's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Proposer may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and proposal costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statute by the Proposer, the Proposer may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all proposals, to waive irregularities and technicalities, and to request re-submission. If only one proposal is received by the proposal date and time listed, the proposal may or may not be rejected by the City depending upon proposal review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting proposals. The City reserves the right to award the contract to a responsible proposer submitting a responsible proposal, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, Proposers, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFP during any phase of the proposalding process. Failure to comply with the provision may result in disqualification of the Proposer, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFP shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE
Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION
The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS
The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience providing Task Work Order driven Civil On-Call Construction Services.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Civil On Call Construction Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Civil On Call Construction Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach
by: _____
(Print individual's name and title)

for: _____
(Print name of entity submitting sworn statement)

at: _____
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

_____
(FEIN)
or, if the entity has no FEIN, include the Social Security Number:

_____
(SSN)

by the individual signing this sworn statement:
_____ (Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VIII. NON-COLLUSION AFFADAVIT

STATE OF _____ COUNTY OF _____

I state that **I**_____ of _____,
(Name and Title) (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.
2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.
3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.
4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.
5. _____, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

	MATERIAL - #57 WASHED STONE	TN	1		$0.00
	MATERIAL - ASPHALT PAVING (1.5" THICK; TYPE S-3)	SY	1		$0.00
	MATERIAL - BAHIA SOD	SY	1		$0.00
	SUB-CONTRACTOR - WELDER WITH TRUCK	HR	1		$0.00
	SUB-CONTRACTOR - TRACTOR WITH 7' BUSH HOG	HR	1		$0.00

* Contractor Job Truck Mandatory Tools

	Tool	Minimum size	Quantity
1	Air compressor	20 CFM @ 90PSI	1
2	3/4" drive ratchet and socket set		1
3	1 inch drive air impact wrench		1
4	1 inch drive sockets	1-1/2" to 3"	1 each
5	Slug wrenches	1-1/2" to 3"	1
6	End wrenches	7/16" to 1-1/2"	2 each
7	Porta band saw w spare blades	4" opening	1
8	Sawzall w spare blades		1
9	Nylon slings 5,000 and 10,000 pound rated (vertical)	2" 2 ply/4" 2 ply	2 each
10	Grade 80 Chain 10,000 pound rated	1/2" X 10 ft	2
11	Clevis or Shackles 5 ton rated	5/8" alloy	4
12	Porta power 10 ton		1
13	Shovels- round and square point		3 each
14	Cutting torch set *see note*		1
15	Gas or diesel stick welder and accessories *see note*		1
16	Small diaphragm pump and accessories	2" suction	1
17	Tap and die set	1/2" to 2" NPT	1
18	Drill and bits for steel or ductile	1/2" to 2" NPT size	1 set
19	Pry bar	5 foot	1
20	Come along	2ton	2
21	Circular Saw and blades for cribbing/forms	7 1/2 inch	2
22	Generator 120/240 volt	3500 watt	1
23	Framing hammer and nails for forms		2
24	Screw gun and screws for forms and cribbing		1
25	Gas powered cutoff saw (K-12)	12inch	1
26	Chain saw for cribbing and for'ms	14 inch bar	1
27	Sledge hammers	4t/ and 6tl	1 each
28	Crew PPE to include Hard hat and gloves at minimum	as needed	per person

ADDENDUM 1

Civil On Call Construction Services

Issued 3/23/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Pre-bid Minutes
Questions and Answers

Optional - Pre-Bid Meeting Minutes
RFP: Civil On Call Construction Services
March 18, 2026
10:00 AM

Staff Members Present:
Sara Spain, Procurement Manager
John Taylor, Assistant Finance Director
Camden Mills, Public Services Director
Dejan Milosevic, Project Manager
Michael Weaver, Infrastructure Operations Manager
Brian Gelock, Public Services
Kenneth Kosbab, Public Services
Ariana Wilson-Romo, Exec. Assistant City Clerk's Office

Others Present:

Name	***Company***	***Contact***
Abbey Boyle	PCS Civil	abbeyb@pcscivilinc.com
Bruno Sequeira	BCS Construction Group	Did not provide.
George Pappas	Southern Road & Bridge LLC	gpappas@southernrb.com
Tristan Hine	PCS Civil	tristanh@pcscivilinc.com
Dave Reid	Ajax Paving Industries of FL LLC	flestimate@ajaxpaving.com
Zachariah Wachalec	David Nelson Construction Co.	zwachalec@nelson-consturction.com

The meeting was called to order at 10:02 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:
- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 11AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills stated that the City is seeking as-needed construction services for various capital projects and/or maintenance projects. Ms. Spain clarified that the City does anticipate awarding multiple vendors.

The following questions were asked:
Q: Contract terms? A: 3yr with options for two one-year renewals.
Q: Size project monetary-wise? A: The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M. An addendum with anticipated projects can be posted.

There were questions regarding how contractors are selected if unit line items were being submitted in advance. Mr. Mills and Ms. Spain will clarify the contract language via an addendum. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.
There being no additional questions, the meeting was adjourned at 10:16 AM.

Questions and Answers:

1. **Are there any plans available for the potential work needed? Or would you like us to provide the price for each line item on the bid form? – Plans are not yet available for the potential work needed. Please provide the unit price for each line item on the bid form that you're capable of performing or subcontracting.**
2. **On the bid form for the On-Call Civil Construction Services list, pay items 285701 through 285715, Optional Base Group 1 through Optional Base Group 15, are listed, but it does not specify which base option will be required. What base options are needed for each base group? – Base Groups 1-11: Graded aggregate based or crushed concrete, consisting of granitic material (minimum LBR 100). Base groups 12-15: Type B-12.5.**
3. **Prebid question: Contract Terms? 3 year with options for 2 one-year renewals.**
4. **Prebid question: Size project monetary-wise? The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M.**
5. **Prebid question: List of anticipated projects. See list below of anticipated projects. This list is not all inclusive of potential projects, other projects may be assigned as needed.**
    - **Citywide stormwater collection system repairs and replacements (estimated > $1,000,000)**
    - **Citywide traffic signage replacements (estimated <$250,000)**
    - **Citywide pavement markings (estimated <$250,000)**
    - **Public Services operations yard expansion (estimated >$250,000 and <$500,000)**
    - **Coquina Way cul-de-sac improvements (<$250,000)**
    - **Fisherman's park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Sunset park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Gulf Way roadway rehabilitation (estimated > $2,000,000)**
    - **Belle Vista mini park improvements (estimated <$250,000)**
    - **1st Ave fishing pier hurricane damage repair (estimated <$250,000)**
    - **7th Ave fishing dock hurricane damage repair (estimated <$250,000)**
6. **Prebid question: There were questions regarding how contractors are selected if unit line items were being submitted in advance. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested. – Refer to II. Statement of Work, Part I: General Requirements, G. Work Assignments.**
7. **Will we split up projects (e.g. Seawalls and Parks)? – Multiple vendors may be selected per project depending on scope of work and vendors capabilities. Vendors are encouraged to submit unit prices for line items that they can perform or subcontract.**

ADDENDUM 2

Civil On Call Construction Services

Issued 3/27/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Questions and Answers

Questions and Answers:

1. **What class should the Round and Other-Elip/Arch pipe culvert be, class 3 or 4?** **The Round and Other-Elip/Arch pipe culvert bid items are listed as optional material pipe culverts and are not intended to specify a particular pipe class (e.g., Class III or Class IV) at the bid stage. The required pipe material and structural class, if applicable, will be determined by the City for each specific task order based on the project design, loading conditions, and applicable Florida Department of Transportation Standard Specifications.**

2. **Do the U-End walls need to be precast or cast in place?** **U-end walls may be precast or cast-in-place, as appropriate for the specific task order. The required type will be identified in the plans or directed by the City/Engineer for each assignment.**

3. **Are any inlets planned to be cast in place?** **Inlets may be precast or cast-in-place depending on site conditions and design requirements. This will be defined on a task order basis.**

4. **Will any of the end walls listed on the bid form have runs of pipe passing through them? If so, how many runs and at what skew?** **Some end walls may include pipe penetrations; however, the number of runs, pipe sizes, and skew angles (if any) will be determined by the design for each individual task order and shown in the applicable plans.**

5. **Please clarify how contract work will be assigned. The Statement of Work, Part I, Section 1, item G (Work Assignments) states that the City will obtain quotes from the Contractors who have a multiple-award contract. The City will already have contract pricing for each Contractor in the multiple-award contract, what is the criteria for these quotes?** **In the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.**

6. **Statement of Work, Part I, Section 15 states that Contractors must provide references for 5 work types in item E. If the Contractor does not intend to submit pricing for a work type, must that work type still be included in the project references?** **No, bidders shall provide references for applicable work types.**

7. **Please clarify the Period of Performance in the General Contract Terms. This states base scope target completion of January 2027 while other parts of the RFP specify a three year contract.** **3-year contract with 2 options for 1-year extensions. Ongoing work may be required.**

8. **Will any bonding be required?** **Yes, 5% of total bid amount.**

3. **Are any inlets planned to be cast in place?** **Inlets may be precast or cast-in-place depending on site conditions and design requirements. This will be defined on a task order basis.**

4. **Will any of the end walls listed on the bid form have runs of pipe passing through them? If so, how many runs and at what skew?** **Some end walls may include pipe penetrations; however, the number of runs, pipe sizes, and skew angles (if any) will be determined by the design for each individual task order and shown in the applicable plans.**

5. **Please clarify how contract work will be assigned. The Statement of Work, Part I, Section 1, item G (Work Assignments) states that the City will obtain quotes from the Contractors who have a multiple-award contract. The City will already have contract pricing for each Contractor in the multiple-award contract, what is the criteria for these quotes?** **In the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.**

6. **Statement of Work, Part I, Section 15 states that Contractors must provide references for 5 work types in item E. If the Contractor does not intend to submit pricing for a work type, must that work type still be included in the project references?** **No, bidders shall provide references for applicable work types.**

7. **Please clarify the Period of Performance in the General Contract Terms. This states base scope target completion of January 2027 while other parts of the RFP specify a three year contract.** **3-year contract with 2 options for 1-year extensions. Ongoing work may be required.**

8. **Will any bonding be required?** **Yes, 5% of total bid amount.**

III. BID FORM

See attached Excel document.

Bid Form for City of St Pete Beach
On-Call Civil Construction Services
Request for Proposal

Specifications for the numbered pay items can be found in the current FDOT "Standard Specifications for Road and Bridge Construction".
Bid quantities are for comparison purposes only. This contract consists of various projects which are not yet defined and no quantities are guaranteed.

Pay Item No.	Item Description	Units	Est. Quantity	Unit Price	Amount
0101 1 (2501-5000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $2,501 TO $5,000	LS	1	$ 2,500.00	$2500.00
0101 1 (5501-25000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $5,001 TO $25,000	LS	1	$ 5,000.00	$5000.00
0101 1 (25001-50000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $25,001 TO $50,000	LS	1	$ 10,000.00	$10000.00
0101 1 (50001-150000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $50,001 TO $150,000	LS	1	$ 20,000.00	$20000.00
0101 1 (150001-250000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $150,001 TO $250,000	LS	1	$ 50,000.00	$50000.00
0101 1 (250001-350000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $250,001 TO $350,000	LS	1	$ 70,000.00	$70000.00
0101 1 (350001-500000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $350,001 to $500,000	LS	1	$ 100,000.00	$100000.00
0101 1 (500001+)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $500,001 or more	LS	1	$ 200,000.00	$200000.00
0101 1 (2501-5000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $2,501 TO $5,000	LS	1	$ 3,500.00	$3500.00
0101 1 (5501-25000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $5,001 TO $25,000	LS	1	$ 7,500.00	$7500.00
0101 1 (25001-50000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $25,001 TO $50,000	LS	1	$ 12,500.00	$12500.00
0101 1 (50001-150000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $50,001 TO $150,000	LS	1	$ 35,000.00	$35000.00
0101 1 (150001-250000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $150,001 TO $250,000	LS	1	$ 60,000.00	$60000.00
0102 1	MAINTENANCE OF TRAFFIC	Lump Sum (LS) cost to be assigned for each Task Order and shall not exceed 10% of the proposed construction cost.			
0102 3	COMMERCIAL MATERIAL FOR TEMPORARY DRIVEWAY MAINTENANCE	CY	50	$ 100.00	$5000.00
0102 14	TRAFFIC CONTROL OFFICER	HR	500	$ 135.00	$67500.00
0102 60	WORK ZONE SIGN	ED	6000	$ 0.50	$3000.00
0102 61	BUSINESS SIGN	EA	5	$ 200.00	$1000.00
0102 71 11	BARRIER WALL, TEMPORARY, F&I, CONCRETE	LF	200	$ 30.00	$6000.00
0102 71 13	BARRIER WALL, TEMPORARY, F&I, LOW PROFILE, CONCRETE	LF	200	$ 50.00	$10000.00
0102 71 14	BARRIER WALL, TEMPORARY, F&I, TYPE K	LF	200	$ 40.00	$8000.00
0102 71 21	BARRIER WALL, TEMPORARY, RELOCATE, CONCRETE	LF	200	$ 18.00	$3600.00
0102 71 23	BARRIER WALL, TEMPORARY, RELOCATE, LOW PROFILE, CONCRETE	LF	200	$ 18.00	$3600.00
0102 71 24	BARRIER WALL, TEMPORARY, RELOCATE, TYPE K	LF	200	$ 15.00	$3000.00

0102 73	TEMPORARY GUARDRAIL	LF	20	$ 100.00	$2000.00
0102 74 1	CHANNELIZING DEVICE- TYPES I, II, DI, VP, DRUM, OR LCD	ED	15000	$ 0.30	$4500.00
0102 74 2	CHANNELIZING DEVICE, TYPE III, 6'	ED	1000	$ 1.00	$1000.00
0102 74 7	CHANNELIZING DEVICE- PEDESTRIAN LCD (LONGITUDINAL CHANNELIZING DEVICE)	LF	1000	$ 3.50	$3500.00
0102 75 1	TEMPORARY SEPARATOR, F&I REMOVE	LF	500	$ 80.00	$40000.00
0102 75 2	TEMPORARY SEPARATOR, F&I REMAIN	LF	500	$ 80.00	$40000.00
0102 75 3	TEMPORARY SEPARATOR, INSTALL	LF	500	$ 80.00	$40000.00
0102 75 4	TEMPORARY SEPARATOR, RELOCATE	LF	500	$ 40.00	$20000.00
0102 75 5	TEMPORARY SEPARATOR, REMOVE	LF	500	$ 40.00	$20000.00
0102 76	ARROW BOARD / ADVANCE WARNING ARROW PANEL	ED	250	$ 25.00	$6250.00
0102 78	TEMPORARY RETROREFLECTIVE PAVEMENT MARKER	EA	50	$ 10.00	$500.00
0102 89 1	TEMPORARY CRASH CUSHION, REDIRECTIVE OPTION	LO	5	$ 2,000.00	$10000.00
0102 99	PORTABLE CHANGEABLE MESSAGE SIGN, TEMPORARY	ED	600	$ 50.00	$30000.00
0102 104	TEMPORARY SIGNALIZATION AND MAINTENANCE, INTERSECTION	ED	100	$ 50.00	$5000.00
0102 107 1	TEMPORARY TRAFFIC DETECTION AND MAINTENANCE, INTERSECTION	ED	100	$ 50.00	$5000.00
0102 150 1	PORTABLE REGULATORY SIGN	ED	50	$ 50.00	$2500.00
0102 150 2	RADAR SPEED DISPLAY UNIT	ED	50	$ 50.00	$2500.00

* Contractor Job Truck Mandatory Tools

	Tool	Minimum size	Quantity
1	Air compressor	20 CFM @ 90PSI	1
2	3/4" drive ratchet and socket set		1
3	1 inch drive air impact wrench		1
4	1 inch drive sockets	1-1/2" to 3"	1 each
5	Slug wrenches	1-1/2" to 3"	1
6	End wrenches	7/16" to 1-1/2"	2 each
7	Porta band saw w spare blades	4" opening	1
8	Sawzall w spare blades		1
9	Nylon slings 5,000 and 10,000 pound rated (vertical)	2" 2 ply/4" 2 ply	2 each
10	Grade 80 Chain 10,000 pound rated	1/2" X 10 ft	2
11	Clevis or Shackles 5 ton rated	5/8" alloy	4
12	Porta power 10 ton		1
13	Shovels- round and square point		3 each
14	Cutting torch set *see note*		1
15	Gas or diesel stick welder and accessories *see note*		1
16	Small diaphragm pump and accessories	2" suction	1
17	Tap and die set	1/2" to 2" NPT	1
18	Drill and bits for steel or ductile	1/2" to 2" NPT size	1 set
19	Pry bar	5 foot	1
20	Come along	2ton	2
21	Circular Saw and blades for cribbing/forms	7 1/2 inch	2
22	Generator 120/240 volt	3500 watt	1
23	Framing hammer and nails for forms		2
24	Screw gun and screws for forms and cribbing		1
25	Gas powered cutoff saw (K-12)	12inch	1
26	Chain saw for cribbing and for'ms	14 inch bar	1
27	Sledge hammers	4t/ and 6tl	1 each
28	Crew PPE to include Hard hat and gloves at minimum	as needed	per person

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

Ajax Paving
Industries of Florida, LLC

An Equal Opportunity Employer

One Ajax Drive • North Venice, FL 34275
Main: 941.486.3600

Ajax Paving Industries of Florida, LLC was established in 1981 (43 Years in Business) and is the precision paving specialist of Southwest Florida. Our Team of professionals are extremely knowledgeable in the specific materials, methodology and criteria for paving in Florida. Ajax's four area offices are located in Tampa, North Venice, Lake Wales and Fort Myers, and the company has eight state-of-the-art hot mix asphalt plants in Southwest Florida. Currently, Ajax employs approximately 485 professional, administrative and construction personnel and maintains an annual work volume of approximately $350M.

Ajax self-performs earthwork, storm drainage, concrete flatwork, maintenance of traffic operations, and asphalt paving projects. Ajax's corporate mission statement and key to Ajax's success is "To provide construction services and products which, when measured, exceed customers' expectations."

Currently, Ajax Paving Industries of Florida, LLC is Florida Department of Transportation (FDOT) prequalified in the following work classes:

- DRAINAGE
- FLEXIBLE PAVING
- GRADING
- GRASSING
- ELECTRICAL
- SEEDING AND SODDING
- GUARDRAIL
- HOT PLANT-MIXED BITUM. COURSES
- INTERMEDIATE BRIDGES
- MINOR BRIDGES
- PORTLAND CEMENT CONCRETE ROADWAY PAVING
- ROADWAY SIGNING
- SIDEWALK
- MILLING
- TRAFFIC SIGNALS
- UNDERGROUND UTILITIES (WATER & SEWER).

Organization Structure

Ajax Paving Industries of Florida, LLC will be the contracting entity for this contract. Ajax has been building infrastructure and transportation projects in Florida for the past 43 years and has a proven history of managing and delivering complex projects on time and within budget. Ajax is very experienced with the traditional design bid projects, DB delivery , specifications, quality control (QC) documentation requirements, and project administration needs and has consistently earned high marks for those efforts. Ajax currently owns eight Hot Mix Asphalt (HMA) plants. Ajax will self-perform MOT, embankment operations, drainage installation, concrete paving, and asphalt paving tasks.

Experience with Complex/ Fast Track Projects

Emergency and Design-Build projects are renowned for their expedited timelines, wherein design and permitting services play a pivotal role in the initial phases of all these contracts. With an vast portfolio of infrastructure projects, our expertise enables us to swiftly engage and initiate design and permitting services immediately upon contract execution.

Ajax was awarded post Hurricane Ian "phased" or progressive design-build contracts for emergency repair and permanent reconstruction work at the Sanibel Island Causeway Bridge and the Pine Island and Little Pine Island Bridges. Due to the nature and need of the work, these projects are on more expedited timelines than typical projects. Emergency repair work commenced on the Sanibel Island Causeway approach project mere days after Hurricane Ian made landfall in September 2022. The causeway bridge was opened 19 days after the storm, and design work for permanent shoring/repairs began immediately following the opening. Our team identified the time-sensitive environmental permits required and prepared first-phase work packages in order for construction to immediately begin. Subsequent work packages are continuously designed and constructed through the next 6 months.

Ajax is also managing the Pine Island (Matlatcha) Causeway repairs, as it was completely washed out by Hurricane Ian. As part of this project, the Little Pine Island Bridge will be completely replaced, with construction expected to be completed by Summer 2025. Ajax's flexibility, innovation and communication were key to delivering these phased DB projects totaling more than $80 million on fast tracked schedules.

Environmental Record

Ajax is committed to environmental stewardship and assigns a construction representative to each project to ensure compliance. Management staff are trained and certified in the National Pollutant Discharge Elimination System (NPDES) Compliance. In the last 10 years, Ajax has zero noncompliance violations for Erosion and Sedimentation Control Plans or permit mandates. Ajax scored 12 out of 12 in FDOT Category 7, Environmental Compliance, on similar projects. Our Team will seek opportunities to minimize the project's impact to the environment, by providing enhanced erosion control measures to protect adjacent wetlands. Environmental compliance will be the responsibility of our Construction Project Superintendent, Ralph Bridges, who will perform weekly environmental audits and discuss regulatory compliance with construction personnel at our weekly "toolbox talks" and progress meetings.

Subconsultant Relationships

As a leader in alternative delivery, Ajax has developed and continues to maintain close relationships with design consultants. Currently, Ajax has 15 on-going design build projects with 12 different consultants. This diversified approach allows Ajax to opportunity to strategically select the best consultant for the task. For example, Ajax selects local smaller firms for contracts under $10M in contract value. For more complex projects, Ajax will select larger statewide or national firm to deliver. Below is a list for active consultant relationships in alphabetical order:

American Structure Point
BCC, Inc
Burgess & Niple, Inc
CORE Engineering
D Squared Infrastructure (DBE)
Greenman- Peterson, Inc.
HDR, Inc
Kimley-Horn & Associates
Lighthouse Engineering (SBE)
Patel Greene & Associates (DBE)
RS&H, Inc.
Stantec
Transystems, Inc.
VHB, Inc.

WGI, Inc.
WSP, Inc

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience providing Task Work Order driven Civil On-Call Construction Services.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Civil On Call Construction Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Civil On Call Construction Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

   by: Christie Alvaro, Vice President of Estimating
   (Print individual's name and title)

   for: Ajax Paving Industries of Florida, LLC
   (Print name of entity submitting sworn statement)

   at: One Ajax Drive, North Venice FL, 34275
   (Business address)

   and (if applicable), its Federal Employer Identification Number (FEIN):

   26-1871966
   (FEIN)
   or, if the entity has no FEIN, include the Social Security Number:

   _____
   (SSN)

   by the individual signing this sworn statement:
   (Signature) Christie Alvaro 2008

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☑ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

STATE OF FLORIDA
COUNTY OF Sarasota

VIII. NON-COLLUSION AFFADAVIT

STATE OF Florida COUNTY OF Sarasota

I state that I Christie Alvaro (Name and Title) of Ajax Paving Industries of Florida, LLC (Name of Firm),

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. Ajax Paving Industries of Florida, LLC, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV – OFFICERS: Section 12. Power of Attorney.
Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII – Execution of Contracts: Section 5. Surety Bonds and Undertakings.
Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation – The President of the Company, acting pursuant to the Bylaws of the Company, authorizes Nathan J. Zangerle, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization – By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 8th day of April, 2026.

Certificate No: **8213450-013068**

KNOWN ALL PERSONS BY THESE PRESENTS: That The Ohio Casualty Insurance Company is a corporation duly organized under the laws of the State of New Hampshire, that Liberty Mutual Insurance Company is a corporation duly organized under the laws of the State of Massachusetts, and West American Insurance Company is a corporation duly organized under the laws of the State of Indiana (herein collectively called the "Companies"), pursuant to and by authority herein set forth, does hereby name, constitute and appoint, Nicholas Ashburn; Robert D. Heuer; Paul H. Hurley; Michael D. Lechner; Mark Madden; Richard McGregor; Holly Nichols; Jason Rogers

all of the city of Rochester state of MI each individually if there be more than one named, its true and lawful attorney-in-fact to make, execute, seal, acknowledge and deliver, for and on its behalf as surety and as its act and deed, any and all undertakings, bonds, recognizances and other surety obligations, in pursuance of these presents and shall be as binding upon the Companies as if they have been duly signed by the president and attested by the secretary of the Companies in their own proper persons.

IN WITNESS WHEREOF, this Power of Attorney has been subscribed by an authorized officer or official of the Companies and the corporate seals of the Companies have been affixed thereto this 25th day of March, 2025.

Liberty Mutual Insurance Company
The Ohio Casualty Insurance Company
West American Insurance Company

By: _____
Nathan J. Zangerle, Assistant Secretary

State of PENNSYLVANIA
County of MONTGOMERY ss

On this 25th day of March, 2025 before me personally appeared Nathan J. Zangerle, who acknowledged himself to be the Assistant Secretary of Liberty Mutual Insurance Company, The Ohio Casualty Company, and West American Insurance Company, and that he, as such, being authorized so to do, execute the foregoing instrument for the purposes therein contained by signing on behalf of the corporations by himself as a duly authorized officer.

IN WITNESS WHEREOF, I have hereunto subscribed my name and affixed my notarial seal at Plymouth Meeting, Pennsylvania, on the day and year first above written.

Commonwealth of Pennsylvania - Notary Seal
Teresa Pastella, Notary Public
Montgomery County
My commission expires March 28, 2029
Commission number 1126044
Member, Pennsylvania Association of Notaries

By: _____
Teresa Pastella, Notary Public

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV – OFFICERS: Section 12. Power of Attorney.
Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII – Execution of Contracts: Section 5. Surety Bonds and Undertakings.
Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation – The President of the Company, acting pursuant to the Bylaws of the Company, authorizes Nathan J. Zangerle, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization – By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 31st day of March, 2026.

Form **W-9**
(Rev. March 2024)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give form to the requester. Do not send to the IRS.

Before you begin. For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See *Specific Instructions* on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

Ajax Paving Industries of FL, LLC

2 Business name/disregarded entity name, if different from above.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☐ C corporation ☐ S corporation ☐ Partnership ☐ Trust/estate

☑ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) . . . . P

Note: Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions)

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any)

(Applies to accounts maintained outside the United States.)

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions . . . . . ☐

5 Address (number, street, and apt. or suite no.). See instructions.

One Ajax Drive

6 City, state, and ZIP code

North Venice, FL 34275

Requester's name and address (optional)

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–			–				

or

Employer identification number

2	6	–	1	8	7	1	9	6	6

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here | **Signature of U.S. person** [signature] **Date** 1/13/26

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

REVISED
RE: CERTIFICATE OF QUALIFICATION

The Department of Transportation has qualified your company for the type of work indicated below.

FDOT APPROVED WORK CLASSES:
DEBRIS REMOVAL (EMERGENCY), DRAINAGE, ELECTRICAL WORK, FENCING, FLEXIBLE PAVING, GRADING, GRASSING, SEEDING AND SODDING, GUARDRAIL, HOT PLANT-MIXED BITUM. COURSES, INTERMEDIATE BRIDGES, MINOR BRIDGES, PORTLAND CEMENT CONCRETE ROADWAY PAVING, ROADWAY SIGNING, SIDEWALK, TRAFFIC SIGNAL, MILLING, UNDERGROUND UTILITIES (WATER & SEWER).

Unless notified otherwise, this Certificate of Qualification will expire **6/30/2026.**

In accordance with Section 337.14(1), Florida Statutes, an application for qualification must be filed within (4) months of the ending date of the applicant's audited annual financial statements.

If the company's maximum capacity has been revised, it may be accessed by logging into the Contractor Prequalification Application System via the following link:
HTTPS://fdotwp1.dot.state.fl.us/ContractorPreQualification

Once logged in, select "View" for the most recently approved application, and then click the "Manage" and "Application Summary" tabs.

The company may apply for a Revised Certificate of Qualification at any time prior to the expiration date of this certificate according to Section 14-22.0041(3), Florida Administrative Code (F.A.C.), by accessing the most recently approved application as shown above and choosing "Update" instead of "View." If certification in additional classes of work is desired, documentation is needed to show that the company has performed such work.

All prequalified contractors are required by Section 14-22.006(3), F.A.C., to certify their work underway monthly in order to adjust maximum bidding capacity to available bidding capacity. You can find the link to this report at the website shown above.

Sincerely,

James E. Taylor II

James E. Taylor II, Prequalification Supervisor
Contracts Administration Office

CORPORATE SUBSTANCE ABUSE PROGRAM

STATEMENT OF POLICY

This Company has legal responsibility to comply with the United States Department of Transportation's (US DOT) regulations regarding the testing of Company employees. To accomplish that end, the Company cannot condone and will not tolerate any of the following behaviors by its employees:

A. Use of illicit drugs.
B. Abuse of legal drugs (prescription or over-the-counter).
C. Abuse of alcohol
D. Sale, purchase, transfer or use or possession of illegal drugs or prescription drugs obtained illegally.
E. Arrival for work under the influence of drugs or alcohol.

Should any of these above-mentioned behaviors be detected, the Company will terminate the employee.

The testing of an employee's urine for drugs is an effective mean to identify those in need of treatment or disciplinary action. However, the urine testing program is intended to supplement, not replace, other means of drugs or alcohol detection

EXHIBIT "D"

Conditional Federal/Grant-Funded Contract Addendum

(Place Conditional Federal/Grant-Funded Contract Addendum behind this page)

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

Federal/Grant Program: [insert]
Federal Awarding Agency: [insert]
Pass-Through Entity: [insert, if applicable]
Assistance Listing Number: [insert, if applicable]
Federal Award Identification Number: [insert, if applicable]
Award or Disaster Declaration Date: [insert, if applicable]
Project Number: [insert]
Special Award Conditions: [insert or attach]

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Authorize the City Manager to execute the Agreement with BCS Construction Group for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Action Request: Motion to authorize the City Manager to execute the Agreement with BCS Construction Group for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Strategic Objective: Reliable Infrastructure

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Proposals (RFP) for a task work order-driven Civil On-Call Construction Services contract. Five (5) responsive proposals were received on March 18, 2026. Following evaluation, the City's selection committee recommended award to Ajax Paving Industries of Florida LLC, BCS Construction Group, Cathcart Construction Company Florida LLC, PCS Civil LLC, and Southern Road and Bridge LLC

- Qualifications and Experience
- References and Past Performance
- Capacity to Perform the Work
- Cost

The contract provides not-to-exceed unit prices for labor, materials, equipment, tools, transportation, and incidentals necessary to perform civil construction services on an as-needed basis throughout the City. Projects may include roadway and intersection improvements, drainage upgrades, ADA improvements, sidewalk construction, alley improvements, signing and pavement markings, recreational trails, traffic signal improvements, and intelligent transportation system (ITS) infrastructure.

Work will be authorized by task order on an as-needed basis in an amount not to exceed annually appropriated funding. The initial contract term is three (3) years with the option for two (2) additional one (1) year renewals upon mutual agreement and annual appropriation of funds.

Approval of this agreement will provide the City with qualified contractors to perform civil infrastructure improvements in a timely and cost-effective manner, improve responsiveness to maintenance and capital project needs, and support implementation of the City's transportation, drainage, utility, and public infrastructure programs.

Funding:

301.5410.563000 Improvements Other Than Buildings (remaining balance $211,746.90)

301.5411.563000 Improvements Other Than Buildings (remaining balance $8,478,760.96)

301.5726.563000 Improvements Other Than Buildings (remaining balance $825,791.26)

Other CIP funding sources may be used based on the available annual budget.

1. BCS Construction Group Contract Signed

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Civil On-Call Construction Services

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and **BCS CONSTRUCTION GROUP** (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Bids, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its 06/23/2026, public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed the annual budgeted amount. Funding will be awarded by Task Orders.

b. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

c. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

d. Contractor must comply with any and all Federal, State, and local laws and regulations

now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

e. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.
   a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished

under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of (3) three years with (2) two, (1) one-year extensions from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement.

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured and providing coverage up through and including the final performance of any services provided

herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved, and any amount withheld is not subject to payment of interest by the City. The above provisions

will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:
    a. Standard Contract Addendum (Exhibit "A")
    b. Request for Bid/Proposal (Exhibit "B")
    c. Vendor Bid/Proposal (Exhibit "C")

d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:
BCS Construction Group
8130 66th Street N
Suite 10
Pinellas Park, FL 33781

As to City:

21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on

behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Contract Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this _____ day of _____, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and _____, hereinafter referred to as "Contractor", concerning that certain agreement dated the ____ day of _____, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian
cityclerk@stpetebeach.org

Phone: 727-363-9220
155 Corey Avenue
St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

I. INVITATION

The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The types of projects that may be assigned under this Contract shall include, but not be limited to:

- intersection/roadway improvements
- drainage upgrades and/or installations
- ADA upgrades and pedestrian/bicyclist improvements
- sidewalk installations and upgrades
- alley improvements
- median modifications
- signing and pavement markings
- recreational trails
- signal upgrades and installations
- intelligent transportation systems (ITS) components upgrades

II. STATEMENT OF WORK

PART I: GENERAL REQUIREMENTS

1. SPECIAL CONDITIONS

A. **Local Preference, Location Points and Tie Breakers**

Location preferences do not apply due to the fact that some task orders may be funded with state or federal dollars.

B. **Minority Business Enterprise Policy**

Minority Business Enterprise Evaluation Criteria do not apply due to the fact that some task orders may be funded with state or federal dollars.

C. **Scrutinized Companies**

Scrutinized Companies with activities in Sudan List or activities in the Iran Petroleum Energy Sector List do not apply due to the fact that some task orders may be funded with state or federal dollars.

D. **Bonding and Credit**

Contractor/Vendor shall provide a letter of bondability showing their maximum bonding capacity.

E. **Contract Term**

This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

F. **Contract Pricing**

Contract prices for equipment and/or service will remain firm through the first three (3) contract years. Sixty (60) days prior to the contract renewal date, Contractor/Vendor may request a price adjustment. The price adjustment and justification must be submitted in writing, and be approved by the City. Said price increase may not, under any circumstances, exceed three (3) percent of the Construction CPI. No retroactive contract price adjustments will be allowed. If the Contractor/Vendor fails to submit a price adjustment within the sixty (60) days prior to the contract renewal date, current contract pricing will continue for the contract renewal period.

G. **Work Assignments**

All work to be performed shall take the following into consideration prior to assignment of any work to any Contractor/Vendor, at the discretion of the Procurement Manager:

1. **Estimated Cost < $250,000.00:**

The City retains the right to select any Contractor/Vendor to whom a multiple-award contract has been made when the opportunity to submit a quote for any job whose estimated cost is less than Two Hundred & Fifty Thousand Dollars ($250,000.00).

2. **Estimated Cost > $250,000.00 and < $500,000.00:**

The City shall obtain three (3) quotes from any Contractor/Vendor to whom a multiple vendor award has been made, for those jobs whose estimated cost is greater than Two Hundred & Fifty Thousand Dollars ($250,000.00) and less than Five Hundred Thousand Dollars ($500,000.00).

3. **Estimated Cost > $500,000.00:**
   a. The City retains the right to separately and competitively bid any and all projects whose cost estimates are greater than Five Hundred Thousand Dollars ($500,000.00). The determination will be made by the City Procurement Manager.
   b. Projects that exceed Five Hundred Thousand Dollars ($500,000.00) may not be sub-divided into separate projects in order to circumvent such requirement.

4. **Reassignment of Work:**

The City retains the right and authority to reassign work to another Contractor/Vendor, at any time, for the following reasons:

a. The lowest Contractor/Vendor cannot comply with the specifications in cases of an emergency.
b. The lowest Contractor/Vendor cannot respond to the job requirements, at the time, due to scheduling conflicts, staffing considerations or other reasonable cause(s) for preventing their completion of the task as required.
c. The City shall have the option to solicit additional quotes, bids, or even professional opinion about a particular job when in its best interest and could engage the services of another company/Contractor/Vendor. This exception will always require advanced written notice and explanation by the requesting City Department to the Procurement Manager, for approval, before authorizing any contemplated work to be done. The receipt of the approved purchase order shall be understood that all work is to immediately begin on the project, per the project schedule and needs as identified by the City and as agreed upon by the Contractor/Vendor.

5. **Cumulative Work shall not exceed $4,000,000.00:**

The cost of all work completed by a Contractor/Vendor shall not exceed Four Million Dollars ($4,000,000.00) in a calendar year. If all costs are expected to exceed this threshold, these services will need to be separately re-bid through issuance of a new set of bid specifications.

H. **Quotes**

1. The City will request a quote if and when needed. Vendors participating in the contract shall have ten (10) business days from written notification to respond to quotes, unless waived by the Procurement Manager. If work is an emergency, as determined by the City, vendors shall have (24) hours from email or phone notification to respond to quotes.
2. A Task Order Form will be provided to awarded Contractor/Vendor. A properly executed Purchase Order shall be issued for the work assignment and shall have the Task Order Form and all related paperwork attached as backup. The Purchase Order shall indicate the start and end dates for the project.
3. If the Contractor/Vendor does not wish to issue a quote for or cannot meet the requirements of the project, inclusive of the time given in which to complete the job; the Contractor/Vendor shall complete the Work Order Form by noting "No Quote" on the form itself and by also providing an explanation as to why they are not submitting a quote.
4. Final costs for any individual project shall not exceed the original approved and total cost for such project by more than ten percent (10%). Any and all anticipated project cost increases are subject to advanced approval by the Procurement Manager.
5. Any Contractor/Vendor that fails to submit a quote successively three (3) times in a row may have their contract cancelled due to non-performance.

I. **Notice to Proceed (NTP)**

All task orders $250,000.00 or less will use the purchase order as the Notice to Proceed (NTP). The start date and date or the number of day to complete the project must be included on the purchase order. If the start date is left off the purchase order then the date of the purchase order approval will default as the NTP start date. Projects over $250,000.00 will have a formal NTP issued through the Purchasing Division. All task orders must be reviewed by the Purchasing Division before a purchase order or NTP is issued.

J. **Liquidated Damages**

Liquidated damages will be assessed to the Contractor/Vendor/vendor for each consecutive calendar day completion of the project or work is delayed. The amount of liquidated damages will be dependent on the cost of the task order and will be calculated using the chart below.

Estimated Project Cost Over	Estimated Project Cost But Less than	Daily Charge Per Calendar Day
$0.00	$50,000.00	$960.00
$50,000.00	$250,000.00	$965.00
$250,000.00	$500,000.00	$1,245.00
$500,000.00	$2,500,000.00	$1,665.00
$2,500,000.00	$5,000,000.00	$2,715.00

K. **Project Spreadsheet Submittal**

Contractor/Vendor must submit a formal spreadsheet using the process below.

1. List of completed projects to include:
   a. Relevant project experience includes construction and delivery methods relevant to the type of project to be constructed utilizing the CM/GC method (or performing as a General Contractor/Vendor on similar types and sizes of projects).
   b. Describe no more than ten (10) and no less than five (5) projects in order of most relevant to least relevant (similar type of construction with a contract dollar amount of $500,000.00 or less) which demonstrates the firm's capabilities to perform such projects.
   c. For each project, the following information should be provided:
      i. Project name
      ii. Project location
      iii. Dates during which services were performed
      iv. Physical description (e.g. square footage, key components, site area)
      v. Brief description of Project Services performed by CM/GC or GC Firm.
      vi. Owners Information:
         a. Contact person
         b. Telephone number
         c. Email
         d. Project name
         e. Owner reference
         f. Original Contract Price
      vii. Amount of Change Orders by:
         a. Your Company
         b. Consultant
         c. Client/Entity
      viii. Final Project Price
      ix. Proposer should include a table with this information layout as follows:

Entity Name and Project Name	Contact Person Phone Email	Begin Project Amount	Change Orders by CMR	Change Orders by Engineer	Change Orders by Entity	Final Cost of Projects	Original Days for Construction	Final Construction Days

2. Any outstanding accomplishments of the firm that relates to the specific services being sought.

3. Any Quality Assurance and Value Engineering Programs should also be included.

2. STANDARD SPECIFICATIONS

The Project shall be constructed in accordance with these specifications, the Pinellas County Engineering Standard Details and the Florida Department of Transportation "Standard Specifications for Road and Bridge Construction", Latest Edition.

3. GOVERNING DOCUMENTS

The Specifications and all supplementary documents are essential parts of the Contract, and a requirement occurring in one is as binding as though occurring in all. They are intended to be complimentary and to describe and provide for a complete project. In case of discrepancy, calculated dimensions will govern over scaled dimensions.

The Contractor shall take no advantage of any apparent error or omission in the specifications. If the Contractor discovers such an error or omission, they shall immediately notify the Project Manager. The Project Manager will then make such corrections and interpretations as may be deemed necessary for fulfilling the intent of the specifications.

4. COOPERATION WITH OTHERS

The Contractor shall cooperate with the owners of any underground or overhead utilities in their removal and rearrangement operations in order that these operations may progress in a reasonable manner and that service rendered by these parties will not be interrupted.

A. Permits

1. City ROW Use Permit: The Contractor will obtain a Right of Way Use Permit from the City Permits Division located at 155 Corey Avenue, Florida. There will be no fee for this permit.
2. Public Services will require shop drawings, schedule, and the location of staging areas at the pre-construction meeting. Where the Contractor wishes to use private property, he shall obtain permission from the owner in writing and submit a copy at the first meeting.
3. The Contractor will be responsible for the requirements of all permits. There may be FDOT permits required for this project.

5. LINES, GRADES AND CONSTRUCTION SURVEYING

The Contractor shall lay out the work from the benchmarks, grades, dimensions, points and lines noted on the working drawings, established at the site, or supplied by the Project Manager. All work of every description shall be laid out and checked by the Contractor who will be held solely responsible for its correctness, and the Contractor shall pay for all expenses in connection with this work. The Contractor shall request clarification from the Project Manager of any errors, inconsistencies or omissions which they may discover. It is the Contractor's responsibility to review every street prior to milling and paving, including the inspection of overhead tree limbs, overgrown grass on pavement, manholes and gate valves.

The work may be checked by the Project Manager, and in the event of a discrepancy, their decision shall be final. No special compensation will be made to the Contractor to defray costs of any work or delays occasioned by making surveys and measurements, tests, or inspections, but such costs shall be considered as having been included in the price stipulated for the several items of work to be done under this Contract.

All attempts shall be made to protect existing property corner monumentation. The monumentation must be identified and marked prior to construction to ensure its permanency. All survey monuments, property corners, and benchmarks, which may be disturbed during construction, shall be referenced and replaced by the Contractor. All monuments and benchmarks disturbed or destroyed by the Contractor or any of his forces through accident or negligence shall be replaced by a Florida Licensed Professional Land Surveyor at the Contractor's expense. All survey markings shall be brought to the attention of the Project Manager.

6. MAINTENANCE OF DETOURS

The Contractor shall repair, at his expense, all potholes and other localized failures on streets which are used as detour routes to facilitate construction operations.

7. REPLACEMENT OF TRAFFIC, STREET SIGNS, SIGNAL LOOPS AND MAILBOXES

The Contractor shall remove and re-erect all existing traffic, street signs and mailboxes within the project site at his own expense for those which must be moved or relocated to permit construction operations.

The Contractor shall notify the City prior to disturbing any traffic signal loops and the City will install new traffic signal loops under a separate contract.

8. USE OF PREMISES

The Contractor shall confine all apparatus to the roadway or right-of-way in which the work is being performed and will not unreasonably encumber these premises with such apparatus, materials, supplies, and equipment. The Contractor shall promptly remove and dispose of all debris resulting from his operations.

9. PROSECUTION OF WORK/ LIQUIDATED DAMAGES

The Contractor shall begin work on any project/road no later than fourteen (14) calendar days after receipt of the "Notice to Proceed"; and shall diligently prosecute the same to project completion prior to the expiration of the total number of calendar days determined necessary for the project, from the date of said "Notice to Proceed".
Failure to complete each project within the determined number of calendar days shall cause the Contractor to be subject to the provisions for Liquidated Damages. The Contractor shall pay to the City as fixed liquidated damages for each calendar day of delay until the work is complete or accepted, and the Contractor and their sureties, jointly and severally, shall be liable for the amount thereof:

A. For each Task Work Order issued, the City project manager will determine the required number of days for completion of all work as well as the amount for liquidated damages, as appropriate.

B. Liquidated Damages will be assessed in accordance with Part I, 2. Special Conditions, J. Liquidated Damages of these bid specifications.

** Please refer to City of St Pete Beach Terms and Conditions, “Liquidated Damages, Penalties and Non-Conformance to Contract”

10. CONSTRUCTION SCHEDULE

A. Work shall be performed on an “as needed” basis for a **three (3) year contract period**. Upon mutual consent, this agreement may be extended for **two (2) additional one (1) year periods**, subject to the same terms and conditions and available funding being in place. No guarantee of volume or quantity of work is intended.

B. At the direction of the City of St Pete Beach, the Contractor will not be allowed to proceed with the scheduled work until restoration of preceding work areas are restored to the satisfaction of the City of St Pete Beach. It is the intent of this project to:

1. Start paving each street no later than three (3) working days after milling each street. If the street has not been paved after three (3) working days, a fee equal to the daily amount for liquidated damages indicated in Item #2J (above) will be assessed until the street has been paved. The time limit for streets to be paved where sewer manhole castings or water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve boxes have been adjusted or replaced.

2. Complete restoration including temporary striping and clean-up, shall be finished in no more than five (5) working days after the completion of paving activity and as directed by the City.

3. No work shall be done during the week between the hours of 9:00 PM and 6:00 AM, or between the hours of 9:00 PM and 9:00 AM on weekends or holidays; except for emergency work by a public service utility or by other permit approved by the City.
4. Night work may be established by the Contractor as regular procedure by obtaining the written permission of the City. Such permission may be revoked at any time by the City, if the Contractor fails to maintain adequate equipment and supervision for the proper execution, control, and safety of the work at night.

C. Work may need to be performed under more urgent timeline at the direction of the City of St Pete Beach. The Contract bid form includes pay items for Emergency Mobilizations for such occurrences. The Contactor shall respond to Emergency Work Requests within 24 hours and should expect to mobilize in less than 72 hours.

11. CONTRACTOR'S ACCEPTANCE OF CONDITIONS

The provisions of this Contract shall control any inconsistent provisions contained in the specifications. All Drawings and Specifications have been read and carefully considered by the Contractor, who understands the same, and agrees to their sufficiency for the work to be done.

It is expressly agreed that under no circumstances, conditions or situations shall this Contract be more strongly construed against the City than against the Contractor and his Surety.

Any ambiguity or uncertainty in the Drawings or Specifications shall be interpreted and construed by the Project Manager, or their designee, and their decision shall be final and binding upon all parties.

It is distinctly understood and agreed that the passing, approval and/or acceptance of any part of the work or material by the City, the Project Manager, or by any agent or representative as in compliance with the terms of this Contract and/or of the Drawings and Specifications covering said work, shall not operate as a waiver by the City of strict compliance with the terms of this Contract, and/or the Drawings and Specifications covering said work; and the City may require the Contractor and/or his surety to repair, replace, restore and/or make to
comply strictly and in all things with this Contract and the Drawings and Specifications any and all of said work and/or materials which within a period of one year from and after the date of the passing, approval, and/or acceptance of such work or material, are found to be defective or to fail in any way to comply with this Contract or with the Drawings and Specifications.

This provision shall not apply to materials or equipment normally expected to deteriorate or wear out and become subject to normal repair and replacement before the condition is discovered. The Contractor shall not be required to do normal maintenance work under the guarantee provisions. Failure on the part of the Contractor and/or his surety, immediately after notice to either repair or replace any such defective materials and workmanship, shall entitle the City, if it sees fit, to replace or repair the same and recover the reasonable cost of such replacement and/or repair from the Contractor and/or his surety, who shall in any event be jointly and severally liable to the City for all damage, loss and expense caused to the City by Reason for the Contractor's breach of this Contract and/or his failure to comply strictly and in all things with this Contract and with the Drawings and specifications.

12. HAZARDOUS MATERIALS

The Contractor shall be responsible for the independent inspection and certification of the removal, transportation and disposal of all identified and all unidentified hazardous materials located within the project site.

13. JOB CONDITIONS

A. The Contractor is to provide the City with a working schedule prior to commencing the project. The City reserves the right to revise and/or adjust the schedule accordingly.

B. City Notification**:** At least 72 hours in advance of closing, or partially closing, any street, alley, or other public thoroughfare, the Contractor shall notify the Engineering Division of the Public Services Department, and immediately notify the same agencies of the reopening.

C. Customer Notification**:** The City of St Pete Beach residents occupying a home on the street to be milled and paved shall be notified seven (7) days before the construction of the street begins. This is completed by the following:

1. A door hanger notice will be provided by the Department of Public Services. It shall contain the reason for the construction, the overall length of time with dates, any problems that may be encountered and other important information regarding the project. The Contractor is responsible for the installation of the door hanger notices no later than seven (7) working days before the construction of the street begins.

2. The Contractor shall hand this notice to each resident. If the resident is not available, the Contractor is to place the door hanger on the doorknob. In certain sensitive areas, usually business areas and as requested by the Engineer, each customer may be asked to sign a signature sheet with their name, address, and signature. The original shall be given to the Department of Public Services before any construction commences.

D. Utility Emergency Access**:** All fire hydrants, valves, water meters and backflow assemblies shall be free of all construction material and equipment and in plain view for easy emergency access or necessary maintenance by the City crews.

E. Pedestrian or School Crossings**:** Where the work crosses or interferes with school or pedestrian crossings, extreme care shall be taken by the Contractor to insure the safety of the school children or other pedestrians.

F. Temporary Staging Areas**:** The Contractor shall obtain all temporary construction staging areas approvals required and shall not encroach onto private property unless a written agreement has been made between the property owner and the Contractor; or onto public property unless a written agreement has been made and approval by the Purchasing Division's designee has been received prior to using the land. The Contractor shall assume full responsibility for the protection and safekeeping of materials stored at the staging areas.

G. Erosion Control**:** Prior to construction, all efforts for siltation/erosion control will be taken, including the use of turbidity screens, hay bales, and sod replacement at the earliest possible time prior to and after excavation/grading. Sediment/erosion controls should be used around drainage structures and any areas to mitigate erosion on or off the project site. The Contractor is responsible for any removal of asphalt debris in manholes or drainage structures.

H. Road Hauling**:** The existing paved roads in the City shall be used for transporting material required for construction of the project. The Contractor should be aware that any road that is damaged during construction due to truck/equipment involvement would be the responsibility of the Contractor to correct. The Contractor shall contact the City for specific routes to be used during construction.

I. Water on Street**:** All water shall be removed, and the streets dry prior to paving. No paving shall take place during a rainstorm event.

J. Towing of Vehicles**:** The City will remove any cars parked in the way of the resurfacing project as long as proper notification has been given as stated under Section 13.c. (above) of the Scope of Work.

K. Clippings**:** Where grass, tree roots or other vegetation has grown over or above the edge of the asphalt, it shall be removed to the existing edge of asphalt by the Contractor prior to paving the street.

L. City Utilities**:** If work by the Contractor results in damage to City owned utilities; the Contractor shall repair the damage immediately at no cost to the City. If the Contractor does not respond immediately to repair the damaged utility, the City Utilities Department will make the repair and bill the Contractor for the costs incurred.

M. Dumpsters**:** The City will relocate all dumpsters in the way of this project. The Contractor is to provide written notice to the City forty-eight (48) hours in advance when said dumpsters need to be moved.

N. Disturbed Areas**:** All areas disturbed by the construction shall be restored to a condition at least equal to the pre-construction conditions or to what shall be approved by the Project Manager.

O. Security**:** The Contractor shall be responsible for the site security and shall determine whether full time watchmen will be required. The Contractor shall inspect the area daily and take whatever measures necessary to protect the safety of the public, workmen and materials both day and night.

P. Brick/Driveways**:** The Contractor shall be responsible for the tack coat not being spread to the brick crosswalks, brick intersections, brick speed tables, driveways or other similar areas due to the hauling of the asphalt. These areas shall be covered with sand or other City approved material. If tack appears on these items from the Contract, it shall be the responsibility of the Contractor to remove it.

Q. Interference with Others**:** The Contractor shall coordinate with Pinellas Suncoast Transit Authority or any public agency to notify the agency of any and all potential disruption in service. The Contractor shall not interfere with materials, appliances, or workmen of the City, Private Utility Companies, or any other contractor, who may be performing work at the same sites. All contractors and other parties involved shall have equal rights as far as practicable, to the use of all roads and grounds, except as otherwise provided by these specifications. The decision of the Project Manager shall govern in cases of disagreement between contractors or other parties regarding such use.

R. Public Safety**:** The Contractor shall provide, erect, and maintain continually, seven days per week and twenty-four hours per day, all necessary barricades, reflectorized signs, signals, flashing lights, red lights, "danger" or "caution" or "street closed" signs, etc., and take all necessary precautions necessary for the protection of the work and the safety of the public. The Contractor shall also provide a watchman at all places where the work causes obstructions to normal traffic or constitutes in any way a hazard to the public.

S. Cleaning Up**:** The Contractor shall always keep the construction area clean from accumulation of waste material or rubbish, including storage areas. The Contractor shall remove any rubbish, tools, scaffolding, equipment and materials from and about the premises, which do not belong to the City, prior to completion of the work. The Contractor shall leave the work and premises, following the completion of work, in a clean and workmanlike condition satisfactory to the Project Manager or their representative.

T. Coordination of Details with the County Sheriff**:** Any traffic detour plan must be submitted by the Contractor for approval to the Engineer of Record, the Engineering Division of the Public Services Department and the Pinellas County Sheriff at least two (2) weeks prior to the implementation of said detour in order to provide adequate time for review. Detour plans must include all streets involved in the detour.

U. Maintaining Proper Drainage Flow**:** No drainage structure or paved waterway shall be blocked by the new pavement work. New pavement shall be feathered or tapered towards the inlet opening. This task is to be included as part of the paving operation and there shall be no separate payment for this work. Any debris entering the drainage structure during construction is to be removed by the Contractor.

V. Responsibility of the Contractor**:** The Contractor shall be entirely responsible and liable for all damage or injury as a result of his operations to all other adjacent public and private property, structures of any kind and appurtenances thereto met with during the progress of the work. The cost of protection, replacement in their original locations and conditions or payment of damages for injuries to such adjacent public and private property and structures affected by the work, whether or not shown on the drawings and the removal, relocation and reconstruction of such items called for on the drawings or specified shall be included in the various Contract Items and no separate payments shall be made thereof. Where such public and private property, structures of any kind and appurtenances thereto are not shown on the drawings and when, in the opinion of the Project Manager to avoid interference with the work, payment therefore will be made as provided for extra work in the Agreement. The Contractor is expressly advised that the protection of the buildings, structures, tanks, pipelines, and related work adjacent and in the vicinity of his operations, wherever they may be, is solely his responsibility.

W. Protection of Trees, Lawn & Sod**:** All trees, shrubs and sod shall be adequately protected by and in accordance with all ordinances governing the protection of the trees. No materials shall be placed so as to injure such trees, shrubs and sod. Trees, shrubs and sod destroyed by negligence of the Contractor or his employees shall be replaced by him with new stock of similar size and age, at its proper season and at the sole expense of the Contractor. Trees close to the work shall be protected against injury. The Contractor shall trim all branches and roots in the road that are necessary to complete the project and are liable to damage his operations, but in no case shall any tree be cut or removed without prior notification of the Project Manager. It is the Contractor's responsibility to inspect all roads that are to be milled and resurfaced. All injuries to bark, trunk, limbs, and roots of trees shall be repaired by dressing, cutting, and painting according to approved methods, using only approved tools and materials under the direction of City Staff. Lawn areas shall be left in good condition as before the starting of the work. Where sod has been removed shall be restored with new sod in a good workmanship manner approved by the resident or the Project Manager. The sod shall match existing grass and shall have no visible broad leaf weeds or foreign grasses. Water for the sod shall be supplied by the Contractor in sufficient quantities required to keep the grassed areas moist for a period of one month from the date of installation. The Contractor shall guarantee the satisfactory growth for a 90-day period.

X. Noise**:** The Contractor shall eliminate noise to as great an extent as practicable at all times. Air compressing equipment shall be equipped with silencers and the exhaust of all gasoline motors or other power equipment shall be provided with mufflers. In the vicinity of hospitals and schools, special care shall be used to avoid noise or other nuisances. The Contractor shall strictly observe all local regulations and ordinances covering noise.

Y. Access to Public Services**:** No materials used in the construction of the work shall be placed as to prevent free access to all fire hydrants, valves, manholes, driveways and roadways.

14. SUBSTITUTIONS

Whenever material or equipment are specified or described in the Contract documents by using the name of a proprietary item or the name of a particular supplier the naming of the item is intended to establish the type, function and quality required. Unless the name is followed by words indicating that no substitution is permitted, materials or equipment of other suppliers may be accepted by Project Manager if sufficient information is submitted by Contractor to allow Project Manager to determine that the material or equipment proposed is an approved alternate to that named. The procedure for review by the Project Manager will include the following as supplemented in the General Requirements. Requests for review of substitute items of material and equipment will not be accepted by Project Manager from anyone other than Contractor. If Contractor wishes to furnish or use a substitute item of material or equipment, Contractor shall make written application to Project Manager for acceptance thereof, certifying that the proposed substitute will perform adequately the functions and achieve the results called for by the general design, be similar and an approved alternate to that specified and be suited to the same use as that specified. The application will state that the evaluation and acceptance of the proposed substitute will not prejudice Contractor's achievement of Substantial Completion on time, whether or not acceptance of the substitute for use in the work will require a change in any of the contract documents (or in the provisions of any other direct contract with City for work on the Project) to adapt the design to the proposed work is subject to payment of any license fee or royalty. All variations of the proposed substitute from that specified will be identified in the application and available maintenance, repair and replacement service will be indicated. The application will also contain an itemized estimate of all costs that will result directly or indirectly from acceptance of such substitute, including costs of redesign and claims of other Contractors; affected by the resulting change, all of which shall be considered by Project Manager in evaluating the proposed substitute. The Project Manager may require Contractor to furnish at Contractor's expense additional data about the proposed substitute.

15. MINIMUM QUALIFICATIONS

The City has established minimum qualifications for Contractor expertise and experience regarding the subject project as follows:

A. The Contractor must provide a minimum of three (3) project references and may provide a maximum of five (5) project references for each of the five (5) criteria listed below.

B. Each project reference must have been successfully completed in the ten (10) years preceding the bid opening.

C. All criteria do not need to be satisfied by each submitted project reference, however, all criteria must have been satisfied two (2) times by the submitted project references.

D. Any project for which references are provided may have been self-performed with Contractor’s employees or performed by a subcontractor who is part of the Contractor’s team for this project.

E. The Contractor qualification requirements include the following:

1. Construction of site work including clearing, grubbing, and fine grading.
2. Construction of flexible and rigid pavement roadways, alleys, and trails.
3. Construction of sidewalk and ADA accessibility improvements.
4. Construction of stormwater utility upgrades.

5. Construction of signal, lighting, and intelligent transportation system (ITS) component upgrades.

[END OF PART I]

PART II: PROGRESS MEETINGS

1. **FREQUENCY**

Progress meetings will be held every other week or less, with the first meeting fourteen (14) days after the pre-construction meeting or fourteen (14) days or less after the date of the Notice to Proceed.

The City has the right to hold called meetings as required by the progress of the work.

2. **ATTENDANCE**

The following people should attend progress meetings, as applicable:

- Project Manager
- City Inspector Contractor
- Subcontractors as appropriate to the Agenda Suppliers as appropriate to the Agenda Others as appropriate

3. **PROGRESS SCHEDULE**

The Contractor shall submit a detailed schedule before work is to be started. It shall indicate the sequence of the work, the time of starting and completing each part.

4. **SUGGESTED AGENDA**

- Review approval of minutes of previous meetings. Review of work progress.

Field observations, problems, and conflicts. Problems which impede the construction schedule. Review of off-site fabrication, delivery schedules.

- Corrective measures and procedures to regain projected schedule, if necessary. Revisions to construction schedule.
- Progress schedule during succeeding work period. Coordination of schedules.
- Review submittal -- expedite as required. Maintenance of quality standards.
- Pending changes and substitutions. Shop drawing submittals.
- Review proposed changes for:
  Effect on construction schedule and on completion date. Effect on other contracts of the project.
  Other business

[END OF PART II]

***P*ART III: TECHNICAL SPECIFICATIONS**

1. GENERAL

Furnish all necessary labor, equipment, and materials to construct various types of public services infrastructure projects as outlined in Part I General Requirements, 1. Introduction.

Tasks may involve milling existing asphaltic concrete surfaces to specified depths. Excess milled material should be transported to an asphalt reprocessing plant. The streets specified should be surfaced with Superpave asphaltic concrete mix. Additionally, tasks include necessary adjustments or replacements of existing structures, traffic control, sweeping, cleanup, placement of painted and thermoplastic pavement markings, and installation of curb, gutter, and sidewalks.

2. MOBILIZATION

A. The Contractor is solely responsible for providing security for all materials stored on- site during the construction activities.
B. The Contractor shall provide ten (10) calendar days notification to the Engineer prior to initiating mobilization to the site and initiating work. The Contractor will also provide copies of all permits that have been obtained to the engineer prior to initiating work associated with such permits.
C. The Contractor shall restrict their operations to the designated work area and ensure that construction activities do not disrupt normal operational activities of the City's services.

D. The Contractor is responsible for visually inspecting the site to note obstructions or access difficulties.

E. The Contractor is responsible for providing and/or maintaining access to the work site to facilitate all construction, inspection and testing activities.

F. The contractor shall deliver/post notifications to affected citizens and business owners seven (7) calendar days prior to construction. A form of the notification must be approved by the City prior to distribution.

3. MILLING

A. Furnish all necessary labor, equipment and materials to mill pavements as specified, and haul the milled material to the reprocessing plant.

B. The methods used for milling shall meet all applicable portions of Section 327 - Milling of Existing Asphalt Pavement, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
C. All manhole castings and water valve boxes shall be adjusted and/or replaced by the Contractor, as specified, after milling is completed.

D. When the full street is required by these documents to be milled, the desired finished cross slope is to be 2%.

E. The unit price per square yard (SY) shall be full compensation for all work required to perform the milling, loading, hauling, sweeping, clean-up, and all incidentals necessary to complete the work specified in this section.

F. Milling of existing asphalt speed humps and speed tables is required as specified in the plans.

4. CONCRETE CURB AND GUTTER (INSTALLATION)

A. All Concrete Curb and Gutter work shall conform to the requirements of Section 520, "Concrete Gutter, Curb elements and Traffic Separator," of the FDOT Standard Specifications and placed in conformity with the lines, grades, dimensions and notes shown in the contract plans.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of the concrete being deposited against them. They shall be straight and free from warp or bends and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of a cross-section approved by the Project Manager and shall have a flat surface on top. The Contractor shall use flexible forms for all curb and gutter constructed on a radius.

C. Excavation shall be to the required depth, and the foundation material upon which these items are to be placed shall be compacted as specified in Section 120-9, "Compaction Requirements" of the FDOT Standard Specifications.

D. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated, and sufficient mortar brought to the surface. The top of the section shall be floated smooth, and its edges rounded to the radius shown on the plans. No concrete shall be placed during unfavorable weather conditions.

E. Except for machine placed concrete, at the option of the Contractor, joints may be formed by the use of dummy joints (either formed or sawed) or by the use of sheet metal templates. If sheet metal templates are used, they shall be at least as long as the depth of the curb section. They shall be set perpendicular to the top and face of the curb form and shall be held firmly in place during the placing of concrete. Templates shall remain in place until the concrete has set sufficiently to hold its shape, but shall be removed while the forms are still in place.

For machine placed concrete, unless an alternate method is approved by the Project Manager, contraction joints shall be sawed. The joints shall be sawed as soon as the concrete has hardened to the degree that excessive raveling will not occur and before uncontrolled shrinkage cracking begins.

Contraction joints shall be spaced at intervals of ten feet (10') except where a lesser interval is required for closure, but no section shall be less than four feet (4') in length. On medians and traffic separators, cuts shall align across from each other. Cuts shall also align with contraction joints of sidewalks adjacent to the curb.

Expansion joints shall be constructed at all structures, at all ends of curb returns, except that expansion joints shall not be constructed within twenty (20) feet of an island nose. They shall be located at intervals of 500 feet between other expansion joints or ends of a run. The expansion joint filler shall be ½ inch in width and shaped to the cross section of the curb.

F. The forms shall be removed within twenty-four (24) hours after the concrete has been placed, and minor defects then filled with mortar composed of one part of Portland cement and two parts of fine aggregate. Plastering will not be permitted on the face of the curb or the gutter. Any rejected curb and gutter shall be removed and replaced at no additional cost to the City. All exposed surfaces shall be given a brush finish while the concrete is still green. For any surface areas, however, which are too rough or where other surface defects make additional finishing necessary, the Project Manager may require that the curb be rubbed to a smooth

surface with a soft brick or wood block, with water used liberally. Also, if necessary further to provide a suitable surface, the Project Manager may require additional rubbing, using a thin grout or mortar, either of which additional rubbing shall be at no additional cost to the City.

G. When surface finishing is completed, the curb and gutter shall be cured per applicable paragraphs of Section 520-8, of the FDOT Standard Specifications.

H. After the concrete has set sufficiently, but not later than three (3) days after pouring, the spaces in front and back of the curb and gutter sections shall be refilled to the required elevation, with suitable material, adequately compacted. In sections where sidewalk is to abut the curb, the backfill shall be placed and compacted to a suitable depth for the placing of sidewalk forms. In all other sections of the work, the back of the curb shall be backfilled to the required elevation with suitable material, which shall be placed and thoroughly compacted in layers of not more than six inches (6") in thickness.

I. Where a base is to be constructed adjacent to a curb and gutter, the curb and gutter shall be properly backfilled and shall set for a period of not less than seven (7) days before any base material is placed against it.

J. The top and face of the finished curb and gutter shall be true and straight, and the top surface of curbs shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top or face of the curb or on the surface of gutters, the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

K. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per linear foot (LF) for constructing concrete curb, curb and gutter, or valley gutter, complete in place and accepted, and no additional compensation will be allowed therefore.

5. CONCRETE SIDEWALKS (INSTALLATION)

A. All Concrete Sidewalk work shall conform to the requirements of Section 522, "Concrete Sidewalks and Driveways", of the FDOT Standard Specifications and these Special Provisions and placed in conformity where so ordered by the Project Manager.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of concrete being deposited against them. They shall be straight, free from warp or bends, and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of cross-section approved by the Project Engineer and shall have a flat surface on top. The Contractor shall use flexible forms for all headers constructed on a radius.

C. Tree roots within the sidewalk area shall be removed to a minimum depth of one foot (1') below the specified subgrade surface. If a contractor must cut tree roots, sharp cuts shall be made. All roots greater than 2” shall be cut clean with a hand saw. The contractor shall hand dig near the roots and saw the roots, heavy mechanical equipment shall not be used. Broken roots shall be sawed 2” behind the ragged end. Roots smaller than 2” may be cut with a sharp-edged hand tool. Crushed or torn roots are more likely to allow decay. Sharply cut roots produce a flush of new roots helping the tree to recover from its injury. If tree roots larger than 6” must be cut, the Contractor shall inform the City Engineer or his representative prior to cutting for field direction. All boulders, organic material, soft clay, spongy material and any

other objectionable material shall be removed and replaced with material approved by the Engineer.

Before placing the forms for sidewalks, the surface upon which they are to be built shall be brought to the specified line, grade and elevation and uniformly compacted to a minimum 85 percent of AASHTO T-99 density. The materials shall be compacted at a moisture content such that the specified density can be uniformly attained. If necessary to attain the specified density, water shall be added to the material, or the moisture content shall be lowered by manipulation or allowing the material to dry, as is appropriate.

Fill areas including cut areas under the sidewalk which have been excavated more than six inches (6") below the bottom of sidewalk shall be compacted to a minimum of 95 percent of AASHTO T-99 density. The area to be compacted is defined as that area directly under the sidewalk and one foot (1') beyond each side of the sidewalk when right-of-way allows.

D. Transverse expansion joints shall be placed at intervals not exceeding eighty feet (80'), and at all places where a walk intersects or abuts a curb, driveway, building, other sidewalk or fixed objects. Expansion joints shall be constructed at each side of structures and at ends of curb returns, except that expansion joints shall not be constructed within twenty feet (20') of an island nose. Expansion joints shall be filled with ½ inch thick premolded joint filler conforming to the provisions in Section 932 of the Standard Specifications. The joint filler shall be shaped to the cross section of the sidewalk, shall extend from the surface to the subgrade, and shall be at right angles to the sidewalk surface.

   Contraction joints shall be sawed and shall be at intervals of four (4) to six (6) feet, or as shown on the plans. A slot approximately 3/16 inches wide and not less than 1 ½ inches deep shall be cut with a concrete saw after the concrete has set, and within twenty-four (24) hours of concrete being poured. Open type joints shall not be allowed.

E. Just prior to placing the concrete, the subgrade shall be moistened. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated and sufficient mortar brought to the surface. Thereafter, the surface shall be brought to a smooth even finish by means of a wooden float. No concrete shall be poured during unfavorable weather conditions.

F. The concrete shall be given a broom finish. The top of the finished sidewalk shall be true and straight, and the top surface of sidewalks shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top of the sidewalk the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

G. When surface finishing is completed, the sidewalk shall be cured per applicable paragraphs of Section 520-8, of the Standard Specifications. After concrete has set sufficiently, but no later than three (3) calendar days after pouring, the space alongside the sidewalk shall be backfilled, compacted and sodded or seeded as shown on the striping plans.

H. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per Square Yard for constructing sidewalks, complete in place and accepted, and no additional compensation will be allowed therefore.

6. LEVELING/RESURFACING

A. **Material:**

1. The material used for leveling shall be Superpave asphaltic concrete.

2. The material used for resurfacing shall be Superpave asphaltic concrete. Friction Course mixes may be used as specified by the City Project Manager.

B. **Construction Requirements:**

1. The leveling and resurfacing shall commence within three (3) working days after the milling of each street. The time limit for streets where castings or other water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve box has been adjusted or replaced.

2. The methods used for re-paving shall meet all applicable portions of Section 330 - Hot Mix Asphalt General Construction Requirements, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
3. The Contractor shall contact all utility and TV cable companies for location of their facilities. The exact location of their facilities, type of material used by the utility and TV cable, etc. shall be determined by the Contractor prior to any excavation work required by this Contract.

4. The Contractor shall be responsible for the protection of all pavements, sidewalks, and other improvements within the work area. All damage to such improvements, as a result of the Contractor's operations, beyond the limits of the work of pavement replacement as described herein, shall be repaired by the Contractor at the Contractor's expense.

5. Testing by City: Testing may be completed by an independent testing laboratory. If core borings are done to determine thickness and density, the Contractor is responsible for filling these holes in the pavement.

C. **Quality Control:**

1. The Contractor shall have a Quality Control Technician who has been certified by the State of Florida Department of Transportation as a Certified Asphalt Plant Technician, available at the asphalt plant at all times the Contractor is producing asphalt mix for use on this project.

2. The Contractor's quality control procedures, inspection and tests shall be documented, and that information shall be available for review by the Project Manager or his representative, throughout the course of the Contract.

3. The mix design shall meet the requirements of Section 334-3.2 for the type of Superpave asphalt indicated in the plans as set forth in Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. Friction course asphalt concrete must meet the requirements of Section 337 for the type of friction course indicated in the plans. Submit a Notarized Certification of Specification Compliance letter on company letterhead to the Engineer stating that all material produced and placed on the project was in substantial compliance with the specifications. The City may run independent tests during the project to determine the acceptability of the material.

7. UTILITY ADJUSTMENTS & REPLACEMENTS

A. **Adjusting Existing City Valve Boxes:**

1. The Contractor is to provide the necessary equipment to adjust the castings without damaging the existing structure. Adjustment would include being able to screw the top portion of the valve box up or down. Water valves that cannot be adjusted either up or down must be replaced under Section 6.2. If the structure is damaged, the Contractor is to replace the structure to its original condition at their cost.

2. The materials and construction methods for this work shall conform to applicable portions of Section 425 Inlets, Manholes and Junction Boxes, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.

3. The quantities to be paid for under this section shall be for the number of valve boxes, adjusted physically.

4. Structures, sections of structures, valve box sections or other items necessary for adjustment that are considered debris and that has been removed by the Contractor as part of the progress of work shall be removed from the project site by the Contractor at the end of each day's work. The Contractor is to remove all debris deposited in the structure as a result of the work performed.

B. **Castings:**

1. The Contractor shall notify the Project Manager or his representative on any questions regarding the prior adjustment or replacement of manhole frames or valve boxes.

2. Manhole frame and covers and valve boxes to be replaced are to be furnished by the Contractor.

3. Castings damaged by construction shall be replaced at no additional cost to the City of St Pete Beach.
4. All castings shall be adjusted and replaced in accordance with the manufacturers recommended requirements.

5. Adjusted or replaced castings shall be set at the grade of the proposed asphalt after compaction with not more than ¼" variation in 10 feet.

8. STRIPING AND MARKINGS

A. **Temporary Striping**: Temporary traffic stripes and markings will be required. Temporary markings shall be placed immediately after milling on any arterial/collector roads or within the immediate proximity of a school, and immediately after final asphalt on all roads. Before opening any re-paved area to traffic, temporary markings shall be applied as specified by the Project Manager. The paint used for this work shall be in accordance with the FDOT specification.

B. **Permanent Striping**: The Contractor shall place permanent traffic stripes and markings in accordance with reference points and alignment gathered by the Contractor prior to milling or overlay or in accordance with striping plans provided by the City of St Pete Beach. The Contractor shall use an Alkyd/Maleic thermoplastic compound and application methods meeting the requirements of Section 711 – Thermoplastic Pavement Markings, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. The thermoplastic compound shall be extruded on the pavement surface in a molten state by mechanical means with surface application of glass spheres, and upon cooling

to ambient pavement temperature shall produce an adherent pavement marking of the specified thickness and width and capable of resisting deformation.

C. A minimum of 21 days curing time after asphalt placement shall be allowed before the placement of any thermoplastic marking commences, with all thermoplastic markings to be completed within 28 days after asphalt placement.

D. The color of the thermoplastic shall be white, yellow, or blue as specified by the M.U.T.C.D.; and revisions thereof.

9. CLEANUP AND DUST CONTROL

A. The Contractor shall furnish and operate a minimum of one (1) mechanical sweeper for the purpose of removal of loose milled material. After milling and before resurfacing, the Contractor shall water the streets as necessary to prevent dust nuisance from his operations or from traffic.

B. Upon completion of the work on each street and before acceptance, the Contractor shall remove all surplus and discard materials and rubbish; shall restore in an acceptable manner all property, both public and private, which has been damaged during the prosecution of the work and shall leave each street in a neat and presentable condition throughout the entire length of the work under Contract. This shall include, but not be limited to the overspray of tack, and shall be completed within one (1) week after the resurfacing of each street.

C. Failure of the Contractor to comply with the Project Manager cleanup orders may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

D. 5% of the value of the work performed may be retained, should at the opinion of the City, restoration not be completed.

E. The cost of all work regarding Cleanup and Dust Control shall be included in the prices for other pay items, which are included in the Contract.

F. The Contractor shall reflect in the schedule, which shall be approved prior to construction, the time required for complete restoration. The Contractor shall strictly adhere to the schedule.

G. The Contractor shall take the necessary measures to prevent siltation and other construction related materials including tack coatings from entering storm inlet structures and manhole structures during the road repaving operation.

10. TRAFFIC CONTROL, STREET CLOSURES, DETOURS AND BARRICADES

A. The Contractor shall comply with all applicable portions of Section 102 – Maintenance of Traffic – Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision, and City requirements for traffic control.

B. The Contractor shall furnish all necessary barriers, lights, signs, and flag persons, to advise the public of detours and construction hazards. All flag persons on site shall be properly qualified.

C. The Contractor shall be responsible for compliance with additional public safety requirements, which may be ordered by the Project Manager or his authorized representative.

D. Failure of the Contractor to comply with the public safety requirements may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

E. The Contractor shall furnish and install, and upon completion of the work, promptly remove all signs and warning devices.

11. SODDING

A. **Description:** All sodding shall conform to the requirements of Section 570, FDOT Manual on Road and Bridge Construction, latest revision.

B. **Materials:**

1. **Sod:** Sod shall be Argentine Bahia as determined by the Project Engineer. Where sodding will adjoin, or be in sufficiently close proximity to, private lawns, other types of sod may be used if desired by the affected property owners and approved by the Project Engineer. The sod shall be taken up in commercial-size rectangles, preferably 12-inch by 24-inch or larger. Maximum allowable deviation from the standard widths and lengths shall be five percent (5%). Broken pads and torn or uneven ends will not be acceptable. The sod shall be sufficiently thick to secure a dense stand of live grass. The sod shall be live, fresh and uninjured, at the time of planting. It shall have a uniform soil thickness of three-fourths inch (3/4"), plus or minus one-fourth inch (1/4"), at the time of cutting. Measurement for thickness shall exclude top growth and thatch. The soil mat shall adhere firmly to the roots such that it will not break, crumble, or tear during handling and placing. No muck or heavy peat soil grown sod will be accepted. All sod shall be 97% free of weeds and other grasses. All sod shall comply with State and Federal laws with respect to inspection for plant diseases and insect infestation. An inspection certificate, required by law, may be requested by the Project Engineer for each shipment. All sod shall be placed as soon as possible after being dug and shall be shaded and kept moist from the time it is dug until it is planted. No sod which has been cut for more than 48 hours may be used unless specifically authorized by the Project Engineer.

2. **Commercial Fertilizer:** All commercial fertilizers shall comply with the State fertilizer laws. All fertilizers shall be uniform in composition, free flowing and suitable for application by mechanical spreader equipment. The chemical designation of the fertilizer shall be 12-8-8 or equivalent ratio. At least 50% of the phosphoric acid shall be from normal super phosphate or an equivalent source which will provide a minimum of two units of sulfur. The amount of sulfur shall be indicated on the quantitative analysis card attached to each bag or other container.

3. **Water:** The water may be obtained from any approved spring, pond, lake, stream or municipal water system. The water shall be free of excessive and harmful chemicals, acids, alkalies, or any substance which might be harmful to plant growth or obnoxious to traffic. Salt water shall not be used. The Contractor shall pay for all water used for the installation of sod.

C. **Construction Methods:**

1. **Soil Moisture:** Rough and fine grading shall be carefully executed to ensure that the final placed sod will conform to existing grades, free of depressions, “bird baths” or

bumps. The area on which sod is to be placed shall contain sufficient moisture for optimum results. During periods of high temperature and after all unevenness in the soil surface has been corrected, the soil shall be lightly irrigated immediately prior to laying the sod. Muddy soil shall not be created.

2. **Placing Sod:** The first row of sod shall be laid in a straight line with subsequent rows placed parallel to and tightly against each other. Lateral joints shall be staggered to promote more uniform growth and strength. Care shall be exercised to ensure that the sod is not stretched or overlapped and that all joints are butted tight in order to prevent voids which would cause air drying of the roots. The sod shall form a solid mass. The sod shall be firmly embedded by light tampering and rolling to ensure contact with the subgrade and to provide a smooth, even surface to eliminate voids under the root system making dry spots. The sod shall be staked on all slopes of 2:1 or steeper with pegs or similar material, driven through the sod blocks, six inches (6") into firm earth at suitable intervals.

3. **Watering:** The sod shall be watered with a fine spray immediately after placing, such that the underside of the new sod pad and soil immediately below the sod are thoroughly wet. The sod shall be kept in moist condition for the duration of the contract period (and in no case less than 4 weeks except in dry season it shall be 8 weeks). The moistened condition shall extend to at least to the full depth of the rooting zone. Water shall not be applied between the hours of 10:00 a.m. and 6:00 p.m.

D. **Maintenance:** The Contractor shall, at no additional expense to the City, maintain the sodded areas in a satisfactory condition until final acceptance of the project. Such maintenance shall include the filling, leveling, and repairing of any washed or eroded areas, as deemed necessary by the Project Engineer. The Project Engineer, at any time, may require resodding of any areas in which the establishment of the grass stand does not appear to be developing satisfactorily. The Contractor shall mow lawns as soon as there is enough top growth to cut with mower set at height of two inches (2") and shall repeat mowing as required throughout the duration of the project, to maintain such height. The Contractor shall not delay mowing until grass blades bend over and become matted and shall not mow when grass is wet.

E. **Measurement and Payment:** Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per square yard (SY) for furnishing, placing, maintaining and replacing sod, complete in place and accepted, and no additional compensation will be allowed therefore.

[END OF PART III]

SECTION 01425
FDOT STANDARDS REFERENCE

PART 1 GENERAL

1.01 Section Includes

Instruction on the use and applicability of FDOT standards on the project

1.02 Requirements

A. The Florida Department of Transportation, Standard Specifications for Road and Bridge Construction, latest non-metric edition ("Standard Specifications"), and Standard Plans for Road Construction, latest non-metric edition ("Standard Plans") are referenced herein as source documents for applicable technical specifications and construction details to be used in the construction of this project. The term “latest edition” refers to the latest edition implemented by FDOT and includes all FDOT implemented supplements at the time of bid advertisement.

B. Method of Measurement and Basis of Payment is to be in accordance with the Florida Department of Transportation Standard Specifications. Any item which is detailed in the Plans and for which material types, sizes and quality are also called out, the "Standard Plans" shall take preference over the plan detail unless otherwise directed by the Engineer.

C. Where the FDOT Standard Specifications use the reference "Department", replace "Department" with "Owner", except for when such reference is to Department Standards and evaluation criteria.

D. The Standard Plans are referenced herein as a source document for applicable construction items and details called for in the plans for which a specific plan detail is not provided. The Contractor shall construct the items called for in the plans in accordance with the "Standard Plans" unless otherwise defined or detailed in the plans or as directed by the Owner, Engineer or authorized representative.

E. The Standard Plans are available for download from the FDOT website at: https://www.fdot.gov/design/standardplans

F. In case of conflict, the Technical Specifications takes precedence over FDOT specifications for a particular construction requirement.

G. Copies of the latest implemented edition and implemented supplements of the Florida Department of Transportation Standard Specifications are available for download from the FDOT website at: https://www.fdot.gov/programmanagement/Implemented/SpecBooks

H. The Contractor shall inform the Owner and Engineer in writing of any specification that the Contractor feels is ambiguous or conflicting with other plan notes and details prior to the construction of the associated item. The Engineer will determine which information is to be used for construction. The Contractor is responsible for the removal and replacement of any item improperly constructed resulting from a misinterpretation of the specifications at no additional cost to the Owner.

PART 2 PRODUCTS - Not Used

PART 3 EXECUTION

3.01 General

The Contractor shall use Divisions Two (II) and Three (III) of the FDOT Specifications as they relate to methods of construction and material types and quality for the appropriate construction items contained within this project.

END OF SECTION

III. BID FORM

See attached Excel document.

IV. GENERAL CONTRACT TERMS

REQUEST FOR PROPOSALS
Civil On Call Construction Services

REQUEST FOR PROPOSAL SUMMARY
The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The "City" intends to **award multiple contracts** to vendors who can provide the best value for services. Vendors may submit proposals for all, some, or only one of the requested line items or categories. **It is not mandatory to submit a proposal for every item listed**. A bidder may bid on any, all, or none of the items. The "City" reserves the right to select multiple vendors to optimize cost-efficiency and capability across different segments of the project. Proposals will be evaluated based on capability, cost, and capacity to perform the specific line items requested.

PROPOSAL SUBMITTALS
Proposal documents must include a signed/notarized Contractor's Proposal Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit electronic proposals only. Bidders must submit electronically only through Bonfire platform. When bidding electronically, only one copy should be submitted.

Proposals shall include the following:

- A signed and notarized Proposer's Contract Proposal.
- Current proof of insurance certificate.
- A list of references and minimum qualifications as outlined in Section V.
- One copy of bid electronically submitted to Bonfire platform.

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http://www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

Proposers or persons wishing to submit a proposal on this project shall be licensed, and insured in accordance with the City's requirements

The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals, or accept any proposal or part thereof deemed to be in the best interests to the City of St. Pete Beach.

Electronic proposals must be submitted by **9:00 AM on April 08, 2026 (Deadline),** clearly marked as: **"Civil On Call Construction Services."**

PRE-PROPOSAL MEETING
An optional pre-proposal meeting will be held on **March 18, 2026 at 10:00 AM EST** via Microsoft Teams conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS
No oral interpretations will be made to any firms as to the meaning of the scope of work or any other

contract documents included in this **RFP.** All questions pertaining to the terms and conditions or scope of work of this Request for Proposal **(RFP)** must be sent in writing via email only to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 AM EST on March 25, 2026.** Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFP**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFP** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so. If the Proposer discovered the opportunity through the online platform (Bonfire), do not submit questions through these platforms. **Only questions emailed directly to the City Procurement Manager will be answered.**

BEGINNING DATE
The Proposer shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Proposer shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City.

COMPLETION OF WORK
The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

COSTS INCURRED BY PROPOSERS
All expenses involved with the preparation and submission of proposals to the City, or any work performed in connection therewith, shall be borne solely by the Proposers. No payment will be made for any responses received or for any other effort required of or made by; the Proposer's prior to contract commencement.

ORAL PRESENTATION
The City may require an oral presentation of the proposal at the Evaluation Committee's discretion. This could also include a formal interview of any and all members of the Proposer's contract management staff.

CONFLICT OF INTEREST
The Proposer represents that it presently has no interest and shall acquire no interest, either direct or indirect, which would conflict in any manner with the performance or services required hereunder, as provided for in FL Stat. 112.311. The Proposer further represents that no person having any interest shall be employed for said performance.

The Proposer shall promptly notify the City's representative, in writing, by certified mail, of all potential conflicts of interest for any prospective business association, interest, or other circumstance, which may influence or appear to influence the contractor's judgment or quality of services being provided hereunder. Such written notification shall identify the prospective business association, interest or circumstance, the nature of work that the Proposer may undertake and request an opinion of the city as to whether the association, interest or circumstance would, in the opinion of the City, constitute a conflict of interest if entered into by the Proposer. The City agrees to notify the Proposer of its opinion by certified mail within thirty days of receipt of notification by the Proposer.

LATE PROPOSAL OR MODIFICATIONS
Modifications in writing received prior to the time set for the proposal submittal will be accepted. Proposal modifications received after the time set for the proposal submittal will not be considered.

RELATED PARTIES AND MULTIPLE PROPOSALS

Where two (2) or more related parties each submit a proposal or multiple proposals are received from (1) Proposer, for any such contract, such proposals shall be judged non-responsive. Related parties mean Proposers or the principles thereof, which have a direct or indirect ownership interest in another Proposer for the same contract or in which a parent company or the principles thereof where one (1) Proposer has a direct ownership interest in another Proposer for the same contract.

RIGHT TO AUDIT
The City of St. Pete Beach reserves the privilege of auditing a Proposer's record as such records relate to purchases or work between the City and said Proposer. Records should be maintained for three years from contract date.

VARIANCE FROM STANDARD TERMS & CONDITIONS
All standard terms and conditions stated throughout the RFP apply to this contract except as specifically stated. This should be fully understood by Proposers prior to submitting a proposal.

ASSIGNMENT
The Proposer shall perform this contract. No assignment or subcontracting shall be allowed without prior written consent of the City. If a Proposer intends to subcontract a portion of this work, the Proposer must disclose that intent in the proposal. In the event of a corporate acquisition and/or merger, the Contractor shall provide written notice to the City within thirty (30) business days of Proposer's notice of such action or upon the occurrence of said action, whichever occurs first. The right to terminate this contract, which shall not be unreasonably exercised by the City shall include but not be limited to, instances in which a corporate acquisition and/or merger represent a conflict of interest or are contrary to any local, state, or federal laws. Action by the City awarding a proposal to a firm that has disclosed its intent to assign or subcontract in its response to the RFP, without exception shall constitute approval for purpose of this Agreement.

LOBBYING Lobbying of Evaluation Committee members, City employees, or elected officials regarding request for proposals, request for qualifications, bids or contracts, during the pendency of bid award or bid protest, by the bidder/proposer/protestor or any member of the bidder's/proposer's/protestor's staff, an agent of the bidder/proposer/protestor, or any person employed by any legal entity affiliated with representing an organization that is responding to the request for proposal, request for qualification, bid or contract, or has a pending bid protest is strictly prohibited either upon advertisement or on a date established by the City and shall be prohibited until either an award is final or the protest is finally resolved by the City Manager or Procurement Manager; provided, however, nothing herein shall prohibit a prospective bidder/proposer from contacting City departments to address situations such as clarification and/or questions related to the procurement process. For purposes of this provision, lobbying activities shall include but not be limited to, influencing or attempting to influence action or non-action in connection with any requests for proposal, request for qualification, bid or contract through direct or indirect oral or written communication or an attempt to obtain goodwill of persons and/or entities specified in this provision. Such actions may cause any request for proposal, request for qualification, bid or contract to be rejected.

ADDITIONAL REQUIREMENTS
The City reserves the right, by change order, to unilaterally add or delete locations/services, either collectively or individually, at the City's sole option, at any time after award has been made as may be deemed necessary or in the best interest of the City. In such case, the Proposer will be required to provide or reduce services to this contract in accordance with the terms, conditions, and specifications.

SERVICES AGREEMENT
A written agreement incorporating the RFP and the successful proposal will be prepared by the City, signed by the successful Proposer, and presented to the City Commission for approval and signature.

INTEGRITY OF REQUEST FOR PROPOSAL DOCUMENTS
Proposers shall use the original RFP forms provided within the RFP and enter information in the spaces where a response is requested. Proposers may use an attachment as an addendum to the RFP forms if sufficient space is not available on the original form for the Proposer to enter a complete response. Any modifications or alterations to the original RFP documents by the Proposer, whether intentional or otherwise, will constitute grounds for rejection of the RFP. Any such modifications or alterations a Proposer wishes to propose must clearly be stated in the Proposer's RFP response and presented in the form of an addendum to the original RFP documents.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in this Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the contract and requirements and shall determine acceptance of the work under this Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the contract terms in a fair and unbiased manner.
If a variation from any requirements is allowed, the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

EXAMINATION OF SITE
Proposer shall carefully examine project site and be familiar with the work required for the project, investigate all site conditions that may affect execution of work as detailed in the construction documents. Contact the City's Procurement Manager or their designee for changes or alterations before proceeding.

ASSURANCES
The responding Proposer shall provide a statement of assurance that the Proposer is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

ASSIGNMENT AND TRANSFER OF CONTRACT
The Proposer shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS
The Proposer shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PAYMENT
Payment shall be made to the Proposer for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

PERIOD OF PERFORMANCE
The target completion for the base Scope of Services is January 2027, corresponding to delivery of the Design-Build Readiness Package. The City reserves the right, at its sole discretion and subject to funding

availability, to amend this Agreement to extend the Consultant's services through final (100%) design. Any additional services shall be authorized by written amendment and negotiated in accordance with the Consultants' Competitive Negotiation Act (Section 287.055, Florida Statutes).

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Proposer will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Proposer without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Proposer's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Proposer to make a change in the Work, and if the City and the Proposer do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the Proposer shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Proposer believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, they shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Proposer first discovered the occurrence. The Proposer shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Proposer shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Proposer shall prepare proposals detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Proposer's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Proposer's proposals shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable proposal will not justify an increase in Contract Amount or Contract Time. Proposer agrees that it shall give the City access to any and all of Proposer's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Proposer for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Proposer shall be at his expense

without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Proposer or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Proposer proposals or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to be used shall be those used for the Proposer's costs, except that the term "Subcontractor" shall replace the term "Proposer," context permitting.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Proposer, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit.

In such case, the Proposer will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Proposer to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Proposer (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Proposer employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

PAYMENTS FOR WORK COMPLETED
All payments under this agreement shall comply with the requirements of Florida Statutes, Section 215.422, commonly referred to as the "Prompt Payment Law." This includes timely processing of invoices and adherence to statutory interest provisions for late payments. The Contractor shall submit detailed invoices for services rendered under this agreement. Each invoice must include: Purchase Order or Contract Number, Description of services provided, Dates of service, Total amount due. Payment will be made within 45 days of receipt of a proper invoice and acceptance of deliverables, as required by Florida law. If payment is not made within the statutory timeframe, interest penalties will apply in accordance with Section 215.422, Florida Statutes. Payments will be issued via electronic funds transfer (EFT) unless otherwise agreed in writing. Contractor must provide accurate banking information to facilitate EFT.

PAYMENTS WITHHELD
The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Proposer to make payments properly to Subcontractors or for labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Proposer

f) Failure of the Proposer to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS
Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Proposer, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such sums to the Proposer.

Before the approval of the final payment, the Proposer shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS
If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Proposer, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Proposer all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Proposer and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Proposer. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies

to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

LICENSES AND PERMITS

The Proposer shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the Proposer is responsible for non-compliance of all permit requirements, including all fines resulting from Proposer's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Proposer shall be responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the Proposer awarded the project, MUST also register their license with the City.

LABOR PROVISIONS

The Proposer and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed. The State of Florida prevailing wage law requires that the Proposer shall fully comply with all provisions contained in Section 215.19, "Schedule of Prevailing Wage Rates for Specified Public Construction." The wage rates set forth by such determination shall apply to this project.

INSURANCE

The Proposer shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Proposer's General Public Liability and Property Damage Insurance issued to the Proposer and protecting the Proposer from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Proposer or by any Subcontractor hired by the Proposer or anyone directly or indirectly employed by the Proposer or hired by the Proposer.

The successful Proposer shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Proposer or third party under the direction or control of the Proposer. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Proposer must furnish the City with Certificate of Insurance prior to commencement of work. An

approved Certificate of Insurance furnished by the Proposer's carrier to guarantee the Proposer being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Professional Liability Insurance $2,000,000 each occurrence.
- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY
The Proposer shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Proposer shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Proposer shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Proposer will provide security on off days and holidays. The Proposer shall be responsible for all charges incurred with such action.

The Proposer shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Proposer, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Proposer shall also protect adjacent property as required by law.

PROPOSAL REVIEW AND CONTRACT AWARD
Failure to submit all documents requested at the time of proposal may deem the Proposer's proposal ineligible for award. The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals. The contract shall be awarded by written notice to the responsible and responsive Contractor whose proposal is determined in writing to be the most advantageous to the City, taking into consideration the price and other criteria set forth in this request for proposals. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS
The laws of the State of Florida do apply to any purchase made under this Request for Proposal. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their proposal and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Proposer agrees to comply with all applicable portions of Fla. Stat. 448.095. Proposer must use the

U.S. Department of Homeland Security's E-Verify System, hhttps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Proposer shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Proposer with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Proposer shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Proposer must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Proposer's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Proposer may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and proposal costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statute by the Proposer, the Proposer may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all proposals, to waive irregularities and technicalities, and to request re-submission. If only one proposal is received by the proposal date and time listed, the proposal may or may not be rejected by the City depending upon proposal review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting proposals. The City reserves the right to award the contract to a responsible proposer submitting a responsible proposal, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, Proposers, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFP during any phase of the proposalding process. Failure to comply with the provision may result in disqualification of the Proposer, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFP shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE
Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION
The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS
The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience providing Task Work Order driven Civil On-Call Construction Services.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Civil On Call Construction Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Civil On Call Construction Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach
by: _____
(Print individual's name and title)

for: _____
(Print name of entity submitting sworn statement)

at: _____
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

_____
(FEIN)
or, if the entity has no FEIN, include the Social Security Number:

_____
(SSN)

by the individual signing this sworn statement:
_____ (Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VIII. NON-COLLUSION AFFADAVIT

STATE OF _____ COUNTY OF _____

I state that **I**_____ of _____,
(Name and Title) (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.
2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.
3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.
4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.
5. _____, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

Bid Form for City of St Pete Beach
On-Call Civil Construction Services
Request for Proposal

Specifications for the numbered pay items can be found in the current FDOT "Standard Specifications for Road and Bridge Construction".
Bid quantities are for comparison purposes only. This contract consists of various projects which are not yet defined and no quantities are guaranteed.

Pay Item No.	Item Description	Units	Est. Quantity	Unit Price	Amount
0101 1 (2501-5000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $2,501 TO $5,000	LS	1		$0.00
0101 1 (5501-25000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $5,001 TO $25,000	LS	1		$0.00
0101 1 (25001-50000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $25,001 TO $50,000	LS	1		$0.00
0101 1 (50001-150000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $50,001 TO $150,000	LS	1		$0.00
0101 1 (150001-250000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $150,001 TO $250,000	LS	1		$0.00
0101 1 (250001-350000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $250,001 TO $350,000	LS	1		$0.00
0101 1 (350001-500000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $350,001 to $500,000	LS	1		$0.00
0101 1 (500001+)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $500,001 or more	LS	1		$0.00
0101 1 (2501-5000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $2,501 TO $5,000	LS	1		$0.00
0101 1 (5501-25000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $5,001 TO $25,000	LS	1		$0.00
0101 1 (25001-50000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $25,001 TO $50,000	LS	1		$0.00
0101 1 (50001-150000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $50,001 TO $150,000	LS	1		$0.00
0101 1 (150001-250000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $150,001 TO $250,000	LS	1		$0.00
0102 1	MAINTENANCE OF TRAFFIC	Lump Sum (LS) cost to be assigned for each Task Order and shall not exceed 10% of the proposed construction cost.			
0102 3	COMMERCIAL MATERIAL FOR TEMPORARY DRIVEWAY MAINTENANCE	CY	50		$0.00
0102 14	TRAFFIC CONTROL OFFICER	HR	500		$0.00
0102 60	WORK ZONE SIGN	ED	6000		$0.00
0102 61	BUSINESS SIGN	EA	5		$0.00
0102 71 11	BARRIER WALL, TEMPORARY, F&I, CONCRETE	LF	200		$0.00
0102 71 13	BARRIER WALL, TEMPORARY, F&I, LOW PROFILE, CONCRETE	LF	200		$0.00
0102 71 14	BARRIER WALL, TEMPORARY, F&I, TYPE K	LF	200		$0.00
0102 71 21	BARRIER WALL, TEMPORARY, RELOCATE, CONCRETE	LF	200		$0.00
0102 71 23	BARRIER WALL, TEMPORARY, RELOCATE, LOW PROFILE, CONCRETE	LF	200		$0.00
0102 71 24	BARRIER WALL, TEMPORARY, RELOCATE, TYPE K	LF	200		$0.00
0102 73	TEMPORARY GUARDRAIL	LF	20		$0.00

0102 74 1	CHANNELIZING DEVICE- TYPES I, II, DI, VP, DRUM, OR LCD	ED	15000		$0.00
0102 74 2	CHANNELIZING DEVICE, TYPE III, 6'	ED	1000		$0.00
0102 74 7	CHANNELIZING DEVICE- PEDESTRIAN LCD (LONGITUDINAL CHANNELIZING DEVICE)	LF	1000		$0.00
0102 75 1	TEMPORARY SEPARATOR, F&I REMOVE	LF	500		$0.00
0102 75 2	TEMPORARY SEPARATOR, F&I REMAIN	LF	500		$0.00
0102 75 3	TEMPORARY SEPARATOR, INSTALL	LF	500		$0.00
0102 75 4	TEMPORARY SEPARATOR, RELOCATE	LF	500		$0.00
0102 75 5	TEMPORARY SEPARATOR, REMOVE	LF	500		$0.00
0102 76	ARROW BOARD / ADVANCE WARNING ARROW PANEL	ED	250		$0.00
0102 78	TEMPORARY RETROREFLECTIVE PAVEMENT MARKER	EA	50		$0.00
0102 89 1	TEMPORARY CRASH CUSHION, REDIRECTIVE OPTION	LO	5		$0.00
0102 99	PORTABLE CHANGEABLE MESSAGE SIGN, TEMPORARY	ED	600		$0.00
0102 104	TEMPORARY SIGNALIZATION AND MAINTENANCE, INTERSECTION	ED	100		$0.00
0102 107 1	TEMPORARY TRAFFIC DETECTION AND MAINTENANCE, INTERSECTION	ED	100		$0.00
0102 150 1	PORTABLE REGULATORY SIGN	ED	50		$0.00
0102 150 2	RADAR SPEED DISPLAY UNIT	ED	50		$0.00
0102 911 1	PAVEMENT MARKING REMOVABLE TAPE, WHITE OR BLACK, SKIP	LF	500		$0.00
0102 911 2	PAVEMENT MARKING REMOVABLE TAPE, WHITE, BLACK, SOLID	LF	500		$0.00
0102 911 3	PAVEMENT MARKING REMOVABLE TAPE, WHITE OR BLACK, OTHER	SF	25		$0.00
0102 912 1	PAVT MARKING REMOVABLE TAPE, YELLOW, SKIP	LF	500		$0.00
0102 912 2	PAVEMENT MARKING REMOVABLE TAPE, YELLOW, SOLID	LF	500		$0.00
0102 912 3	PAVEMENT MARKING REMOVABLE TAPE, YELLOW, OTHER	SF	25		$0.00
0104 1	ARTIFICIAL COVERINGS /ROLLED EROSION CONTROL PRODUCTS	SY	150		$0.00
0104 10 3	SEDIMENT BARRIER	LF	5000		$0.00
0104 11	FLOATING TURBIDITY BARRIER	LF	100		$0.00
0104 12	STAKED TURBIDITY BARRIER- NYLON REINFORCED PVC	LF	100		$0.00
0104 13 1	STAKED SILT FENCE, TYPE III	LF	500		$0.00
0104 13 2	STAKED SILT FENCE, TYPE IV	LF	500		$0.00
0104 18	INLET PROTECTION SYSTEM	EA	100		$0.00

0107 1	LITTER REMOVAL	AC	10		$0.00
0107 2	MOWING	AC	10		$0.00
0110 2 1	CLEARING & GRUBBING	AC	10		$0.00
0110 3	REMOVAL OF EXISTING STRUCTURES/BRIDGES	SF	20		$0.00

* Contractor Job Truck Mandatory Tools

	Tool	Minimum size	Quantity
1	Air compressor	20 CFM @ 90PSI	1
2	3/4" drive ratchet and socket set		1
3	1 inch drive air impact wrench		1
4	1 inch drive sockets	1-1/2" to 3"	1 each
5	Slug wrenches	1-1/2" to 3"	1
6	End wrenches	7/16" to 1-1/2"	2 each
7	Porta band saw w spare blades	4" opening	1
8	Sawzall w spare blades		1
9	Nylon slings 5,000 and 10,000 pound rated (vertical)	2" 2 ply/4" 2 ply	2 each
10	Grade 80 Chain 10,000 pound rated	1/2" X 10 ft	2
11	Clevis or Shackles 5 ton rated	5/8" alloy	4
12	Porta power 10 ton		1
13	Shovels- round and square point		3 each
14	Cutting torch set *see note*		1
15	Gas or diesel stick welder and accessories *see note*		1
16	Small diaphragm pump and accessories	2" suction	1
17	Tap and die set	1/2" to 2" NPT	1
18	Drill and bits for steel or ductile	1/2" to 2" NPT size	1 set
19	Pry bar	5 foot	1
20	Come along	2ton	2
21	Circular Saw and blades for cribbing/forms	7 1/2 inch	2
22	Generator 120/240 volt	3500 watt	1
23	Framing hammer and nails for forms		2
24	Screw gun and screws for forms and cribbing		1
25	Gas powered cutoff saw (K-12)	12inch	1
26	Chain saw for cribbing and for'ms	14 inch bar	1
27	Sledge hammers	4t/ and 6tl	1 each
28	Crew PPE to include Hard hat and gloves at minimum	as needed	per person

ADDENDUM 1

Civil On Call Construction Services

Issued 3/23/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Pre-bid Minutes
Questions and Answers

Optional - Pre-Bid Meeting Minutes
RFP: Civil On Call Construction Services
March 18, 2026
10:00 AM

Staff Members Present:
Sara Spain, Procurement Manager
John Taylor, Assistant Finance Director
Camden Mills, Public Services Director
Dejan Milosevic, Project Manager
Michael Weaver, Infrastructure Operations Manager
Brian Gelock, Public Services
Kenneth Kosbab, Public Services
Ariana Wilson-Romo, Exec. Assistant City Clerk's Office

Others Present:

Name	***Company***	***Contact***
Abbey Boyle	PCS Civil	abbeyb@pcscivilinc.com
Bruno Sequeira	BCS Construction Group	Did not provide.
George Pappas	Southern Road & Bridge LLC	gpappas@southernrb.com
Tristan Hine	PCS Civil	tristanh@pcscivilinc.com
Dave Reid	Ajax Paving Industries of FL LLC	flestimate@ajaxpaving.com
Zachariah Wachalec	David Nelson Construction Co.	zwachalec@nelson-consturction.com

The meeting was called to order at 10:02 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:
- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 11AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills stated that the City is seeking as-needed construction services for various capital projects and/or maintenance projects. Ms. Spain clarified that the City does anticipate awarding multiple vendors.

The following questions were asked:
Q: Contract terms? A: 3yr with options for two one-year renewals.
Q: Size project monetary-wise? A: The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M. An addendum with anticipated projects can be posted.

There were questions regarding how contractors are selected if unit line items were being submitted in advance. Mr. Mills and Ms. Spain will clarify the contract language via an addendum. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.
There being no additional questions, the meeting was adjourned at 10:16 AM.

Questions and Answers:

1. **Are there any plans available for the potential work needed? Or would you like us to provide the price for each line item on the bid form? – Plans are not yet available for the potential work needed. Please provide the unit price for each line item on the bid form that you're capable of performing or subcontracting.**
2. **On the bid form for the On-Call Civil Construction Services list, pay items 285701 through 285715, Optional Base Group 1 through Optional Base Group 15, are listed, but it does not specify which base option will be required. What base options are needed for each base group? – Base Groups 1-11: Graded aggregate based or crushed concrete, consisting of granitic material (minimum LBR 100). Base groups 12-15: Type B-12.5.**
3. **Prebid question: Contract Terms? 3 year with options for 2 one-year renewals.**
4. **Prebid question: Size project monetary-wise? The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M.**
5. **Prebid question: List of anticipated projects. See list below of anticipated projects. This list is not all inclusive of potential projects, other projects may be assigned as needed.**
    - **Citywide stormwater collection system repairs and replacements (estimated > $1,000,000)**
    - **Citywide traffic signage replacements (estimated <$250,000)**
    - **Citywide pavement markings (estimated <$250,000)**
    - **Public Services operations yard expansion (estimated >$250,000 and <$500,000)**
    - **Coquina Way cul-de-sac improvements (<$250,000)**
    - **Fisherman's park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Sunset park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Gulf Way roadway rehabilitation (estimated > $2,000,000)**
    - **Belle Vista mini park improvements (estimated <$250,000)**
    - **1st Ave fishing pier hurricane damage repair (estimated <$250,000)**
    - **7th Ave fishing dock hurricane damage repair (estimated <$250,000)**
6. **Prebid question: There were questions regarding how contractors are selected if unit line items were being submitted in advance. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested. – Refer to II. Statement of Work, Part I: General Requirements, G. Work Assignments.**
7. **Will we split up projects (e.g. Seawalls and Parks)? – Multiple vendors may be selected per project depending on scope of work and vendors capabilities. Vendors are encouraged to submit unit prices for line items that they can perform or subcontract.**

Civil On Call Construction Services

Issued 3/27/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Questions and Answers

Questions and Answers:

1. **What class should the Round and Other-Elip/Arch pipe culvert be, class 3 or 4?** **The Round and Other-Elip/Arch pipe culvert bid items are listed as optional material pipe culverts and are not intended to specify a particular pipe class (e.g., Class III or Class IV) at the bid stage. The required pipe material and structural class, if applicable, will be determined by the City for each specific task order based on the project design, loading conditions, and applicable Florida Department of Transportation Standard Specifications.**

2. **Do the U-End walls need to be precast or cast in place?** **U-end walls may be precast or cast-in-place, as appropriate for the specific task order. The required type will be identified in the plans or directed by the City/Engineer for each assignment.**

3. **Are any inlets planned to be cast in place?** **Inlets may be precast or cast-in-place depending on site conditions and design requirements. This will be defined on a task order basis.**

4. **Will any of the end walls listed on the bid form have runs of pipe passing through them? If so, how many runs and at what skew?** **Some end walls may include pipe penetrations; however, the number of runs, pipe sizes, and skew angles (if any) will be determined by the design for each individual task order and shown in the applicable plans.**

5. **Please clarify how contract work will be assigned. The Statement of Work, Part I, Section 1, item G (Work Assignments) states that the City will obtain quotes from the Contractors who have a multiple-award contract. The City will already have contract pricing for each Contractor in the multiple-award contract, what is the criteria for these quotes?** **In the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.**

6. **Statement of Work, Part I, Section 15 states that Contractors must provide references for 5 work types in item E. If the Contractor does not intend to submit pricing for a work type, must that work type still be included in the project references?** **No, bidders shall provide references for applicable work types.**

7. **Please clarify the Period of Performance in the General Contract Terms. This states base scope target completion of January 2027 while other parts of the RFP specify a three year contract.** **3-year contract with 2 options for 1-year extensions. Ongoing work may be required.**

8. **Will any bonding be required?** **Yes, 5% of total bid amount.**

I. INVITATION

The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The types of projects that may be assigned under this Contract shall include, but not be limited to:

- intersection/roadway improvements
- drainage upgrades and/or installations
- ADA upgrades and pedestrian/bicyclist improvements
- sidewalk installations and upgrades
- alley improvements
- median modifications
- signing and pavement markings
- recreational trails
- signal upgrades and installations
- intelligent transportation systems (ITS) components upgrades

II. STATEMENT OF WORK

PART I: GENERAL REQUIREMENTS

1. SPECIAL CONDITIONS

A. **Local Preference, Location Points and Tie Breakers**

Location preferences do not apply due to the fact that some task orders may be funded with state or federal dollars.

B. **Minority Business Enterprise Policy**

Minority Business Enterprise Evaluation Criteria do not apply due to the fact that some task orders may be funded with state or federal dollars.

C. **Scrutinized Companies**

Scrutinized Companies with activities in Sudan List or activities in the Iran Petroleum Energy Sector List do not apply due to the fact that some task orders may be funded with state or federal dollars.

D. **Bonding and Credit**

Contractor/Vendor shall provide a letter of bondability showing their maximum bonding capacity.

E. **Contract Term**

This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

F. **Contract Pricing**

Contract prices for equipment and/or service will remain firm through the first three (3) contract years. Sixty (60) days prior to the contract renewal date, Contractor/Vendor may request a price adjustment. The price adjustment and justification must be submitted in writing, and be approved by the City. Said price increase may not, under any circumstances, exceed three (3) percent of the Construction CPI. No retroactive contract price adjustments will be allowed. If the Contractor/Vendor fails to submit a price adjustment within the sixty (60) days prior to the contract renewal date, current contract pricing will continue for the contract renewal period.

G. **Work Assignments**

All work to be performed shall take the following into consideration prior to assignment of any work to any Contractor/Vendor, at the discretion of the Procurement Manager:

1. **Estimated Cost < $250,000.00:**

The City retains the right to select any Contractor/Vendor to whom a multiple-award contract has been made when the opportunity to submit a quote for any job whose estimated cost is less than Two Hundred & Fifty Thousand Dollars ($250,000.00).

2. **Estimated Cost > $250,000.00 and < $500,000.00:**

The City shall obtain three (3) quotes from any Contractor/Vendor to whom a multiple vendor award has been made, for those jobs whose estimated cost is greater than Two Hundred & Fifty Thousand Dollars ($250,000.00) and less than Five Hundred Thousand Dollars ($500,000.00).

3. **Estimated Cost > $500,000.00:**
   a. The City retains the right to separately and competitively bid any and all projects whose cost estimates are greater than Five Hundred Thousand Dollars ($500,000.00). The determination will be made by the City Procurement Manager.
   b. Projects that exceed Five Hundred Thousand Dollars ($500,000.00) may not be sub-divided into separate projects in order to circumvent such requirement.

4. **Reassignment of Work:**

The City retains the right and authority to reassign work to another Contractor/Vendor, at any time, for the following reasons:

a. The lowest Contractor/Vendor cannot comply with the specifications in cases of an emergency.
b. The lowest Contractor/Vendor cannot respond to the job requirements, at the time, due to scheduling conflicts, staffing considerations or other reasonable cause(s) for preventing their completion of the task as required.
c. The City shall have the option to solicit additional quotes, bids, or even professional opinion about a particular job when in its best interest and could engage the services of another company/Contractor/Vendor. This exception will always require advanced written notice and explanation by the requesting City Department to the Procurement Manager, for approval, before authorizing any contemplated work to be done. The receipt of the approved purchase order shall be understood that all work is to immediately begin on the project, per the project schedule and needs as identified by the City and as agreed upon by the Contractor/Vendor.

5. **Cumulative Work shall not exceed $4,000,000.00:**

The cost of all work completed by a Contractor/Vendor shall not exceed Four Million Dollars ($4,000,000.00) in a calendar year. If all costs are expected to exceed this threshold, these services will need to be separately re-bid through issuance of a new set of bid specifications.

H. **Quotes**

1. The City will request a quote if and when needed. Vendors participating in the contract shall have ten (10) business days from written notification to respond to quotes, unless waived by the Procurement Manager. If work is an emergency, as determined by the City, vendors shall have (24) hours from email or phone notification to respond to quotes.
2. A Task Order Form will be provided to awarded Contractor/Vendor. A properly executed Purchase Order shall be issued for the work assignment and shall have the Task Order Form and all related paperwork attached as backup. The Purchase Order shall indicate the start and end dates for the project.
3. If the Contractor/Vendor does not wish to issue a quote for or cannot meet the requirements of the project, inclusive of the time given in which to complete the job; the Contractor/Vendor shall complete the Work Order Form by noting "No Quote" on the form itself and by also providing an explanation as to why they are not submitting a quote.
4. Final costs for any individual project shall not exceed the original approved and total cost for such project by more than ten percent (10%). Any and all anticipated project cost increases are subject to advanced approval by the Procurement Manager.
5. Any Contractor/Vendor that fails to submit a quote successively three (3) times in a row may have their contract cancelled due to non-performance.

I. **Notice to Proceed (NTP)**

All task orders $250,000.00 or less will use the purchase order as the Notice to Proceed (NTP). The start date and date or the number of day to complete the project must be included on the purchase order. If the start date is left off the purchase order then the date of the purchase order approval will default as the NTP start date. Projects over $250,000.00 will have a formal NTP issued through the Purchasing Division. All task orders must be reviewed by the Purchasing Division before a purchase order or NTP is issued.

J. **Liquidated Damages**

Liquidated damages will be assessed to the Contractor/Vendor/vendor for each consecutive calendar day completion of the project or work is delayed. The amount of liquidated damages will be dependent on the cost of the task order and will be calculated using the chart below.

Estimated Project Cost Over	Estimated Project Cost But Less than	Daily Charge Per Calendar Day
$0.00	$50,000.00	$960.00
$50,000.00	$250,000.00	$965.00
$250,000.00	$500,000.00	$1,245.00
$500,000.00	$2,500,000.00	$1,665.00
$2,500,000.00	$5,000,000.00	$2,715.00

K. **Project Spreadsheet Submittal**

Contractor/Vendor must submit a formal spreadsheet using the process below.

1. List of completed projects to include:
   a. Relevant project experience includes construction and delivery methods relevant to the type of project to be constructed utilizing the CM/GC method (or performing as a General Contractor/Vendor on similar types and sizes of projects).
   b. Describe no more than ten (10) and no less than five (5) projects in order of most relevant to least relevant (similar type of construction with a contract dollar amount of $500,000.00 or less) which demonstrates the firm's capabilities to perform such projects.
   c. For each project, the following information should be provided:
      i. Project name
      ii. Project location
      iii. Dates during which services were performed
      iv. Physical description (e.g. square footage, key components, site area)
      v. Brief description of Project Services performed by CM/GC or GC Firm.
      vi. Owners Information:
         a. Contact person
         b. Telephone number
         c. Email
         d. Project name
         e. Owner reference
         f. Original Contract Price
      vii. Amount of Change Orders by:
         a. Your Company
         b. Consultant
         c. Client/Entity
      viii. Final Project Price
      ix. Proposer should include a table with this information layout as follows:

Entity Name and Project Name	Contact Person Phone Email	Begin Project Amount	Change Orders by CMR	Change Orders by Engineer	Change Orders by Entity	Final Cost of Projects	Original Days for Construction	Final Construction Days

2. Any outstanding accomplishments of the firm that relates to the specific services being sought.

3. Any Quality Assurance and Value Engineering Programs should also be included.

2. STANDARD SPECIFICATIONS

The Project shall be constructed in accordance with these specifications, the Pinellas County Engineering Standard Details and the Florida Department of Transportation "Standard Specifications for Road and Bridge Construction", Latest Edition.

3. GOVERNING DOCUMENTS

The Specifications and all supplementary documents are essential parts of the Contract, and a requirement occurring in one is as binding as though occurring in all. They are intended to be complimentary and to describe and provide for a complete project. In case of discrepancy, calculated dimensions will govern over scaled dimensions.

The Contractor shall take no advantage of any apparent error or omission in the specifications. If the Contractor discovers such an error or omission, they shall immediately notify the Project Manager. The Project Manager will then make such corrections and interpretations as may be deemed necessary for fulfilling the intent of the specifications.

4. COOPERATION WITH OTHERS

The Contractor shall cooperate with the owners of any underground or overhead utilities in their removal and rearrangement operations in order that these operations may progress in a reasonable manner and that service rendered by these parties will not be interrupted.

A. Permits

1. City ROW Use Permit: The Contractor will obtain a Right of Way Use Permit from the City Permits Division located at 155 Corey Avenue, Florida. There will be no fee for this permit.
2. Public Services will require shop drawings, schedule, and the location of staging areas at the pre-construction meeting. Where the Contractor wishes to use private property, he shall obtain permission from the owner in writing and submit a copy at the first meeting.
3. The Contractor will be responsible for the requirements of all permits. There may be FDOT permits required for this project.

5. LINES, GRADES AND CONSTRUCTION SURVEYING

The Contractor shall lay out the work from the benchmarks, grades, dimensions, points and lines noted on the working drawings, established at the site, or supplied by the Project Manager. All work of every description shall be laid out and checked by the Contractor who will be held solely responsible for its correctness, and the Contractor shall pay for all expenses in connection with this work. The Contractor shall request clarification from the Project Manager of any errors, inconsistencies or omissions which they may discover. It is the Contractor's responsibility to review every street prior to milling and paving, including the inspection of overhead tree limbs, overgrown grass on pavement, manholes and gate valves.

The work may be checked by the Project Manager, and in the event of a discrepancy, their decision shall be final. No special compensation will be made to the Contractor to defray costs of any work or delays occasioned by making surveys and measurements, tests, or inspections, but such costs shall be considered as having been included in the price stipulated for the several items of work to be done under this Contract.

All attempts shall be made to protect existing property corner monumentation. The monumentation must be identified and marked prior to construction to ensure its permanency. All survey monuments, property corners, and benchmarks, which may be disturbed during construction, shall be referenced and replaced by the Contractor. All monuments and benchmarks disturbed or destroyed by the Contractor or any of his forces through accident or negligence shall be replaced by a Florida Licensed Professional Land Surveyor at the Contractor's expense. All survey markings shall be brought to the attention of the Project Manager.

6. MAINTENANCE OF DETOURS

The Contractor shall repair, at his expense, all potholes and other localized failures on streets which are used as detour routes to facilitate construction operations.

7. REPLACEMENT OF TRAFFIC, STREET SIGNS, SIGNAL LOOPS AND MAILBOXES

The Contractor shall remove and re-erect all existing traffic, street signs and mailboxes within the project site at his own expense for those which must be moved or relocated to permit construction operations.

The Contractor shall notify the City prior to disturbing any traffic signal loops and the City will install new traffic signal loops under a separate contract.

8. USE OF PREMISES

The Contractor shall confine all apparatus to the roadway or right-of-way in which the work is being performed and will not unreasonably encumber these premises with such apparatus, materials, supplies, and equipment. The Contractor shall promptly remove and dispose of all debris resulting from his operations.

9. PROSECUTION OF WORK/ LIQUIDATED DAMAGES

The Contractor shall begin work on any project/road no later than fourteen (14) calendar days after receipt of the "Notice to Proceed"; and shall diligently prosecute the same to project completion prior to the expiration of the total number of calendar days determined necessary for the project, from the date of said "Notice to Proceed".
Failure to complete each project within the determined number of calendar days shall cause the Contractor to be subject to the provisions for Liquidated Damages. The Contractor shall pay to the City as fixed liquidated damages for each calendar day of delay until the work is complete or accepted, and the Contractor and their sureties, jointly and severally, shall be liable for the amount thereof:

A. For each Task Work Order issued, the City project manager will determine the required number of days for completion of all work as well as the amount for liquidated damages, as appropriate.

B. Liquidated Damages will be assessed in accordance with Part I, 2. Special Conditions, J. Liquidated Damages of these bid specifications.

** Please refer to City of St Pete Beach Terms and Conditions, "Liquidated Damages, Penalties and Non-Conformance to Contract"

10. CONSTRUCTION SCHEDULE

A. Work shall be performed on an "as needed" basis for a **three (3) year contract period**. Upon mutual consent, this agreement may be extended for **two (2) additional one (1) year periods**, subject to the same terms and conditions and available funding being in place. No guarantee of volume or quantity of work is intended.

B. At the direction of the City of St Pete Beach, the Contractor will not be allowed to proceed with the scheduled work until restoration of preceding work areas are restored to the satisfaction of the City of St Pete Beach. It is the intent of this project to:

1. Start paving each street no later than three (3) working days after milling each street. If the street has not been paved after three (3) working days, a fee equal to the daily amount for liquidated damages indicated in Item #2J (above) will be assessed until the street has been paved. The time limit for streets to be paved where sewer manhole castings or water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve boxes have been adjusted or replaced.

2. Complete restoration including temporary striping and clean-up, shall be finished in no more than five (5) working days after the completion of paving activity and as directed by the City.

3. No work shall be done during the week between the hours of 9:00 PM and 6:00 AM, or between the hours of 9:00 PM and 9:00 AM on weekends or holidays; except for emergency work by a public service utility or by other permit approved by the City.
4. Night work may be established by the Contractor as regular procedure by obtaining the written permission of the City. Such permission may be revoked at any time by the City, if the Contractor fails to maintain adequate equipment and supervision for the proper execution, control, and safety of the work at night.

C. Work may need to be performed under more urgent timeline at the direction of the City of St Pete Beach. The Contract bid form includes pay items for Emergency Mobilizations for such occurrences. The Contactor shall respond to Emergency Work Requests within 24 hours and should expect to mobilize in less than 72 hours.

11. CONTRACTOR'S ACCEPTANCE OF CONDITIONS

The provisions of this Contract shall control any inconsistent provisions contained in the specifications. All Drawings and Specifications have been read and carefully considered by the Contractor, who understands the same, and agrees to their sufficiency for the work to be done.

It is expressly agreed that under no circumstances, conditions or situations shall this Contract be more strongly construed against the City than against the Contractor and his Surety.

Any ambiguity or uncertainty in the Drawings or Specifications shall be interpreted and construed by the Project Manager, or their designee, and their decision shall be final and binding upon all parties.

It is distinctly understood and agreed that the passing, approval and/or acceptance of any part of the work or material by the City, the Project Manager, or by any agent or representative as in compliance with the terms of this Contract and/or of the Drawings and Specifications covering said work, shall not operate as a waiver by the City of strict compliance with the terms of this Contract, and/or the Drawings and Specifications covering said work; and the City may require the Contractor and/or his surety to repair, replace, restore and/or make to
comply strictly and in all things with this Contract and the Drawings and Specifications any and all of said work and/or materials which within a period of one year from and after the date of the passing, approval, and/or acceptance of such work or material, are found to be defective or to fail in any way to comply with this Contract or with the Drawings and Specifications.

This provision shall not apply to materials or equipment normally expected to deteriorate or wear out and become subject to normal repair and replacement before the condition is discovered. The Contractor shall not be required to do normal maintenance work under the guarantee provisions. Failure on the part of the Contractor and/or his surety, immediately after notice to either repair or replace any such defective materials and workmanship, shall entitle the City, if it sees fit, to replace or repair the same and recover the reasonable cost of such replacement and/or repair from the Contractor and/or his surety, who shall in any event be jointly and severally liable to the City for all damage, loss and expense caused to the City by Reason for the Contractor's breach of this Contract and/or his failure to comply strictly and in all things with this Contract and with the Drawings and specifications.

12. HAZARDOUS MATERIALS

The Contractor shall be responsible for the independent inspection and certification of the removal, transportation and disposal of all identified and all unidentified hazardous materials located within the project site.

13. JOB CONDITIONS

A. The Contractor is to provide the City with a working schedule prior to commencing the project. The City reserves the right to revise and/or adjust the schedule accordingly.

B. City Notification: At least 72 hours in advance of closing, or partially closing, any street, alley, or other public thoroughfare, the Contractor shall notify the Engineering Division of the Public Services Department, and immediately notify the same agencies of the reopening.

C. Customer Notification: The City of St Pete Beach residents occupying a home on the street to be milled and paved shall be notified seven (7) days before the construction of the street begins. This is completed by the following:

1. A door hanger notice will be provided by the Department of Public Services. It shall contain the reason for the construction, the overall length of time with dates, any problems that may be encountered and other important information regarding the project. The Contractor is responsible for the installation of the door hanger notices no later than seven (7) working days before the construction of the street begins.

2. The Contractor shall hand this notice to each resident. If the resident is not available, the Contractor is to place the door hanger on the doorknob. In certain sensitive areas, usually business areas and as requested by the Engineer, each customer may be asked to sign a signature sheet with their name, address, and signature. The original shall be given to the Department of Public Services before any construction commences.

D. Utility Emergency Access: All fire hydrants, valves, water meters and backflow assemblies shall be free of all construction material and equipment and in plain view for easy emergency access or necessary maintenance by the City crews.

E. Pedestrian or School Crossings: Where the work crosses or interferes with school or pedestrian crossings, extreme care shall be taken by the Contractor to insure the safety of the school children or other pedestrians.

F. Temporary Staging Areas: The Contractor shall obtain all temporary construction staging areas approvals required and shall not encroach onto private property unless a written agreement has been made between the property owner and the Contractor; or onto public property unless a written agreement has been made and approval by the Purchasing Division's designee has been received prior to using the land. The Contractor shall assume full responsibility for the protection and safekeeping of materials stored at the staging areas.

G. Erosion Control: Prior to construction, all efforts for siltation/erosion control will be taken, including the use of turbidity screens, hay bales, and sod replacement at the earliest possible time prior to and after excavation/grading. Sediment/erosion controls should be used around drainage structures and any areas to mitigate erosion on or off the project site. The Contractor is responsible for any removal of asphalt debris in manholes or drainage structures.

H. Road Hauling: The existing paved roads in the City shall be used for transporting material required for construction of the project. The Contractor should be aware that any road that is damaged during construction due to truck/equipment involvement would be the responsibility of the Contractor to correct. The Contractor shall contact the City for specific routes to be used during construction.

I. Water on Street: All water shall be removed, and the streets dry prior to paving. No paving shall take place during a rainstorm event.

J. Towing of Vehicles: The City will remove any cars parked in the way of the resurfacing project as long as proper notification has been given as stated under Section 13.c. (above) of the Scope of Work.

K. Clippings: Where grass, tree roots or other vegetation has grown over or above the edge of the asphalt, it shall be removed to the existing edge of asphalt by the Contractor prior to paving the street.

L. City Utilities: If work by the Contractor results in damage to City owned utilities; the Contractor shall repair the damage immediately at no cost to the City. If the Contractor does not respond immediately to repair the damaged utility, the City Utilities Department will make the repair and bill the Contractor for the costs incurred.

M. Dumpsters: The City will relocate all dumpsters in the way of this project. The Contractor is to provide written notice to the City forty-eight (48) hours in advance when said dumpsters need to be moved.

N. Disturbed Areas: All areas disturbed by the construction shall be restored to a condition at least equal to the pre-construction conditions or to what shall be approved by the Project Manager.

O. Security: The Contractor shall be responsible for the site security and shall determine whether full time watchmen will be required. The Contractor shall inspect the area daily and take whatever measures necessary to protect the safety of the public, workmen and materials both day and night.

P. Brick/Driveways: The Contractor shall be responsible for the tack coat not being spread to the brick crosswalks, brick intersections, brick speed tables, driveways or other similar areas due to the hauling of the asphalt. These areas shall be covered with sand or other City approved material. If tack appears on these items from the Contract, it shall be the responsibility of the Contractor to remove it.

Q. Interference with Others: The Contractor shall coordinate with Pinellas Suncoast Transit Authority or any public agency to notify the agency of any and all potential disruption in service. The Contractor shall not interfere with materials, appliances, or workmen of the City, Private Utility Companies, or any other contractor, who may be performing work at the same sites. All contractors and other parties involved shall have equal rights as far as practicable, to the use of all roads and grounds, except as otherwise provided by these specifications. The decision of the Project Manager shall govern in cases of disagreement between contractors or other parties regarding such use.

R. Public Safety: The Contractor shall provide, erect, and maintain continually, seven days per week and twenty-four hours per day, all necessary barricades, reflectorized signs, signals, flashing lights, red lights, "danger" or "caution" or "street closed" signs, etc., and take all necessary precautions necessary for the protection of the work and the safety of the public. The Contractor shall also provide a watchman at all places where the work causes obstructions to normal traffic or constitutes in any way a hazard to the public.

S. Cleaning Up: The Contractor shall always keep the construction area clean from accumulation of waste material or rubbish, including storage areas. The Contractor shall remove any rubbish, tools, scaffolding, equipment and materials from and about the premises, which do not belong to the City, prior to completion of the work. The Contractor shall leave the work and premises, following the completion of work, in a clean and workmanlike condition satisfactory to the Project Manager or their representative.

T. Coordination of Details with the County Sheriff: Any traffic detour plan must be submitted by the Contractor for approval to the Engineer of Record, the Engineering Division of the Public Services Department and the Pinellas County Sheriff at least two (2) weeks prior to the implementation of said detour in order to provide adequate time for review. Detour plans must include all streets involved in the detour.

U. Maintaining Proper Drainage Flow: No drainage structure or paved waterway shall be blocked by the new pavement work. New pavement shall be feathered or tapered towards the inlet opening. This task is to be included as part of the paving operation and there shall be no separate payment for this work. Any debris entering the drainage structure during construction is to be removed by the Contractor.

V. Responsibility of the Contractor: The Contractor shall be entirely responsible and liable for all damage or injury as a result of his operations to all other adjacent public and private property, structures of any kind and appurtenances thereto met with during the progress of the work. The cost of protection, replacement in their original locations and conditions or payment of damages for injuries to such adjacent public and private property and structures affected by the work, whether or not shown on the drawings and the removal, relocation and reconstruction of such items called for on the drawings or specified shall be included in the various Contract Items and no separate payments shall be made thereof. Where such public and private property, structures of any kind and appurtenances thereto are not shown on the drawings and when, in the opinion of the Project Manager to avoid interference with the work, payment therefore will be made as provided for extra work in the Agreement. The Contractor is expressly advised that the protection of the buildings, structures, tanks, pipelines, and related work adjacent and in the vicinity of his operations, wherever they may be, is solely his responsibility.

W. Protection of Trees, Lawn & Sod: All trees, shrubs and sod shall be adequately protected by and in accordance with all ordinances governing the protection of the trees. No materials shall be placed so as to injure such trees, shrubs and sod. Trees, shrubs and sod destroyed by negligence of the Contractor or his employees shall be replaced by him with new stock of similar size and age, at its proper season and at the sole expense of the Contractor. Trees close to the work shall be protected against injury. The Contractor shall trim all branches and roots in the road that are necessary to complete the project and are liable to damage his operations, but in no case shall any tree be cut or removed without prior notification of the Project Manager. It is the Contractor's responsibility to inspect all roads that are to be milled and resurfaced. All injuries to bark, trunk, limbs, and roots of trees shall be repaired by dressing, cutting, and painting according to approved methods, using only approved tools and materials under the direction of City Staff. Lawn areas shall be left in good condition as before the starting of the work. Where sod has been removed shall be restored with new sod in a good workmanship manner approved by the resident or the Project Manager. The sod shall match existing grass and shall have no visible broad leaf weeds or foreign grasses. Water for the sod shall be supplied by the Contractor in sufficient quantities required to keep the grassed areas moist for a period of one month from the date of installation. The Contractor shall guarantee the satisfactory growth for a 90-day period.

X. Noise: The Contractor shall eliminate noise to as great an extent as practicable at all times. Air compressing equipment shall be equipped with silencers and the exhaust of all gasoline motors or other power equipment shall be provided with mufflers. In the vicinity of hospitals and schools, special care shall be used to avoid noise or other nuisances. The Contractor shall strictly observe all local regulations and ordinances covering noise.

Y. Access to Public Services: No materials used in the construction of the work shall be placed as to prevent free access to all fire hydrants, valves, manholes, driveways and roadways.

14. SUBSTITUTIONS

Whenever material or equipment are specified or described in the Contract documents by using the name of a proprietary item or the name of a particular supplier the naming of the item is intended to establish the type, function and quality required. Unless the name is followed by words indicating that no substitution is permitted, materials or equipment of other suppliers may be accepted by Project Manager if sufficient information is submitted by Contractor to allow Project Manager to determine that the material or equipment proposed is an approved alternate to that named. The procedure for review by the Project Manager will include the following as supplemented in the General Requirements. Requests for review of substitute items of material and equipment will not be accepted by Project Manager from anyone other than Contractor. If Contractor wishes to furnish or use a substitute item of material or equipment, Contractor shall make written application to Project Manager for acceptance thereof, certifying that the proposed substitute will perform adequately the functions and achieve the results called for by the general design, be similar and an approved alternate to that specified and be suited to the same use as that specified. The application will state that the evaluation and acceptance of the proposed substitute will not prejudice Contractor's achievement of Substantial Completion on time, whether or not acceptance of the substitute for use in the work will require a change in any of the contract documents (or in the provisions of any other direct contract with City for work on the Project) to adapt the design to the proposed work is subject to payment of any license fee or royalty. All variations of the proposed substitute from that specified will be identified in the application and available maintenance, repair and replacement service will be indicated. The application will also contain an itemized estimate of all costs that will result directly or indirectly from acceptance of such substitute, including costs of redesign and claims of other Contractors; affected by the resulting change, all of which shall be considered by Project Manager in evaluating the proposed substitute. The Project Manager may require Contractor to furnish at Contractor's expense additional data about the proposed substitute.

15. MINIMUM QUALIFICATIONS

The City has established minimum qualifications for Contractor expertise and experience regarding the subject project as follows:

A. The Contractor must provide a minimum of three (3) project references and may provide a maximum of five (5) project references for each of the five (5) criteria listed below.

B. Each project reference must have been successfully completed in the ten (10) years preceding the bid opening.

C. All criteria do not need to be satisfied by each submitted project reference, however, all criteria must have been satisfied two (2) times by the submitted project references.

D. Any project for which references are provided may have been self-performed with Contractor's employees or performed by a subcontractor who is part of the Contractor's team for this project.

E. The Contractor qualification requirements include the following:

1. Construction of site work including clearing, grubbing, and fine grading.
2. Construction of flexible and rigid pavement roadways, alleys, and trails.
3. Construction of sidewalk and ADA accessibility improvements.
4. Construction of stormwater utility upgrades.

5. Construction of signal, lighting, and intelligent transportation system (ITS) component upgrades.

[END OF PART I]

PART II: PROGRESS MEETINGS

1. FREQUENCY

Progress meetings will be held every other week or less, with the first meeting fourteen (14) days after the pre-construction meeting or fourteen (14) days or less after the date of the Notice to Proceed.

The City has the right to hold called meetings as required by the progress of the work.

2. ATTENDANCE

The following people should attend progress meetings, as applicable:

- Project Manager
- City Inspector Contractor
- Subcontractors as appropriate to the Agenda Suppliers as appropriate to the Agenda Others as appropriate

3. PROGRESS SCHEDULE

The Contractor shall submit a detailed schedule before work is to be started. It shall indicate the sequence of the work, the time of starting and completing each part.

4. SUGGESTED AGENDA

- Review approval of minutes of previous meetings. Review of work progress.

Field observations, problems, and conflicts. Problems which impede the construction schedule. Review of off-site fabrication, delivery schedules.

- Corrective measures and procedures to regain projected schedule, if necessary. Revisions to construction schedule.
- Progress schedule during succeeding work period. Coordination of schedules.
- Review submittal -- expedite as required. Maintenance of quality standards.
- Pending changes and substitutions. Shop drawing submittals.
- Review proposed changes for:
  Effect on construction schedule and on completion date. Effect on other contracts of the project.
  Other business

[END OF PART II]

PART III: TECHNICAL SPECIFICATIONS

1. GENERAL

Furnish all necessary labor, equipment, and materials to construct various types of public services infrastructure projects as outlined in Part I General Requirements, 1. Introduction.

Tasks may involve milling existing asphaltic concrete surfaces to specified depths. Excess milled material should be transported to an asphalt reprocessing plant. The streets specified should be surfaced with Superpave asphaltic concrete mix. Additionally, tasks include necessary adjustments or replacements of existing structures, traffic control, sweeping, cleanup, placement of painted and thermoplastic pavement markings, and installation of curb, gutter, and sidewalks.

2. MOBILIZATION

A. The Contractor is solely responsible for providing security for all materials stored on- site during the construction activities.
B. The Contractor shall provide ten (10) calendar days notification to the Engineer prior to initiating mobilization to the site and initiating work. The Contractor will also provide copies of all permits that have been obtained to the engineer prior to initiating work associated with such permits.
C. The Contractor shall restrict their operations to the designated work area and ensure that construction activities do not disrupt normal operational activities of the City's services.

D. The Contractor is responsible for visually inspecting the site to note obstructions or access difficulties.

E. The Contractor is responsible for providing and/or maintaining access to the work site to facilitate all construction, inspection and testing activities.

F. The contractor shall deliver/post notifications to affected citizens and business owners seven (7) calendar days prior to construction. A form of the notification must be approved by the City prior to distribution.

3. MILLING

A. Furnish all necessary labor, equipment and materials to mill pavements as specified, and haul the milled material to the reprocessing plant.

B. The methods used for milling shall meet all applicable portions of Section 327 - Milling of Existing Asphalt Pavement, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
C. All manhole castings and water valve boxes shall be adjusted and/or replaced by the Contractor, as specified, after milling is completed.

D. When the full street is required by these documents to be milled, the desired finished cross slope is to be 2%.

E. The unit price per square yard (SY) shall be full compensation for all work required to perform the milling, loading, hauling, sweeping, clean-up, and all incidentals necessary to complete the work specified in this section.

F. Milling of existing asphalt speed humps and speed tables is required as specified in the plans.

4. CONCRETE CURB AND GUTTER (INSTALLATION)

A. All Concrete Curb and Gutter work shall conform to the requirements of Section 520, "Concrete Gutter, Curb elements and Traffic Separator," of the FDOT Standard Specifications and placed in conformity with the lines, grades, dimensions and notes shown in the contract plans.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of the concrete being deposited against them. They shall be straight and free from warp or bends and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of a cross-section approved by the Project Manager and shall have a flat surface on top. The Contractor shall use flexible forms for all curb and gutter constructed on a radius.

C. Excavation shall be to the required depth, and the foundation material upon which these items are to be placed shall be compacted as specified in Section 120-9, "Compaction Requirements" of the FDOT Standard Specifications.

D. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated, and sufficient mortar brought to the surface. The top of the section shall be floated smooth, and its edges rounded to the radius shown on the plans. No concrete shall be placed during unfavorable weather conditions.

E. Except for machine placed concrete, at the option of the Contractor, joints may be formed by the use of dummy joints (either formed or sawed) or by the use of sheet metal templates. If sheet metal templates are used, they shall be at least as long as the depth of the curb section. They shall be set perpendicular to the top and face of the curb form and shall be held firmly in place during the placing of concrete. Templates shall remain in place until the concrete has set sufficiently to hold its shape, but shall be removed while the forms are still in place.

For machine placed concrete, unless an alternate method is approved by the Project Manager, contraction joints shall be sawed. The joints shall be sawed as soon as the concrete has hardened to the degree that excessive raveling will not occur and before uncontrolled shrinkage cracking begins.

Contraction joints shall be spaced at intervals of ten feet (10') except where a lesser interval is required for closure, but no section shall be less than four feet (4') in length. On medians and traffic separators, cuts shall align across from each other. Cuts shall also align with contraction joints of sidewalks adjacent to the curb.

Expansion joints shall be constructed at all structures, at all ends of curb returns, except that expansion joints shall not be constructed within twenty (20) feet of an island nose. They shall be located at intervals of 500 feet between other expansion joints or ends of a run. The expansion joint filler shall be ½ inch in width and shaped to the cross section of the curb.

F. The forms shall be removed within twenty-four (24) hours after the concrete has been placed, and minor defects then filled with mortar composed of one part of Portland cement and two parts of fine aggregate. Plastering will not be permitted on the face of the curb or the gutter. Any rejected curb and gutter shall be removed and replaced at no additional cost to the City. All exposed surfaces shall be given a brush finish while the concrete is still green. For any surface areas, however, which are too rough or where other surface defects make additional finishing necessary, the Project Manager may require that the curb be rubbed to a smooth

surface with a soft brick or wood block, with water used liberally. Also, if necessary further to provide a suitable surface, the Project Manager may require additional rubbing, using a thin grout or mortar, either of which additional rubbing shall be at no additional cost to the City.

G. When surface finishing is completed, the curb and gutter shall be cured per applicable paragraphs of Section 520-8, of the FDOT Standard Specifications.

H. After the concrete has set sufficiently, but not later than three (3) days after pouring, the spaces in front and back of the curb and gutter sections shall be refilled to the required elevation, with suitable material, adequately compacted. In sections where sidewalk is to abut the curb, the backfill shall be placed and compacted to a suitable depth for the placing of sidewalk forms. In all other sections of the work, the back of the curb shall be backfilled to the required elevation with suitable material, which shall be placed and thoroughly compacted in layers of not more than six inches (6") in thickness.

I. Where a base is to be constructed adjacent to a curb and gutter, the curb and gutter shall be properly backfilled and shall set for a period of not less than seven (7) days before any base material is placed against it.

J. The top and face of the finished curb and gutter shall be true and straight, and the top surface of curbs shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top or face of the curb or on the surface of gutters, the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

K. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per linear foot (LF) for constructing concrete curb, curb and gutter, or valley gutter, complete in place and accepted, and no additional compensation will be allowed therefore.

5. CONCRETE SIDEWALKS (INSTALLATION)

A. All Concrete Sidewalk work shall conform to the requirements of Section 522, "Concrete Sidewalks and Driveways", of the FDOT Standard Specifications and these Special Provisions and placed in conformity where so ordered by the Project Manager.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of concrete being deposited against them. They shall be straight, free from warp or bends, and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of cross-section approved by the Project Engineer and shall have a flat surface on top. The Contractor shall use flexible forms for all headers constructed on a radius.

C. Tree roots within the sidewalk area shall be removed to a minimum depth of one foot (1') below the specified subgrade surface. If a contractor must cut tree roots, sharp cuts shall be made. All roots greater than 2" shall be cut clean with a hand saw. The contractor shall hand dig near the roots and saw the roots, heavy mechanical equipment shall not be used. Broken roots shall be sawed 2" behind the ragged end. Roots smaller than 2" may be cut with a sharp-edged hand tool. Crushed or torn roots are more likely to allow decay. Sharply cut roots produce a flush of new roots helping the tree to recover from its injury. If tree roots larger than 6" must be cut, the Contractor shall inform the City Engineer or his representative prior to cutting for field direction. All boulders, organic material, soft clay, spongy material and any

other objectionable material shall be removed and replaced with material approved by the Engineer.

Before placing the forms for sidewalks, the surface upon which they are to be built shall be brought to the specified line, grade and elevation and uniformly compacted to a minimum 85 percent of AASHTO T-99 density. The materials shall be compacted at a moisture content such that the specified density can be uniformly attained. If necessary to attain the specified density, water shall be added to the material, or the moisture content shall be lowered by manipulation or allowing the material to dry, as is appropriate.

Fill areas including cut areas under the sidewalk which have been excavated more than six inches (6") below the bottom of sidewalk shall be compacted to a minimum of 95 percent of AASHTO T-99 density. The area to be compacted is defined as that area directly under the sidewalk and one foot (1') beyond each side of the sidewalk when right-of-way allows.

D. Transverse expansion joints shall be placed at intervals not exceeding eighty feet (80'), and at all places where a walk intersects or abuts a curb, driveway, building, other sidewalk or fixed objects. Expansion joints shall be constructed at each side of structures and at ends of curb returns, except that expansion joints shall not be constructed within twenty feet (20') of an island nose. Expansion joints shall be filled with ½ inch thick premolded joint filler conforming to the provisions in Section 932 of the Standard Specifications. The joint filler shall be shaped to the cross section of the sidewalk, shall extend from the surface to the subgrade, and shall be at right angles to the sidewalk surface.

Contraction joints shall be sawed and shall be at intervals of four (4) to six (6) feet, or as shown on the plans. A slot approximately 3/16 inches wide and not less than 1 ½ inches deep shall be cut with a concrete saw after the concrete has set, and within twenty-four (24) hours of concrete being poured. Open type joints shall not be allowed.

E. Just prior to placing the concrete, the subgrade shall be moistened. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated and sufficient mortar brought to the surface. Thereafter, the surface shall be brought to a smooth even finish by means of a wooden float. No concrete shall be poured during unfavorable weather conditions.

F. The concrete shall be given a broom finish. The top of the finished sidewalk shall be true and straight, and the top surface of sidewalks shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top of the sidewalk the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

G. When surface finishing is completed, the sidewalk shall be cured per applicable paragraphs of Section 520-8, of the Standard Specifications. After concrete has set sufficiently, but no later than three (3) calendar days after pouring, the space alongside the sidewalk shall be backfilled, compacted and sodded or seeded as shown on the striping plans.

H. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per Square Yard for constructing sidewalks, complete in place and accepted, and no additional compensation will be allowed therefore.

6. LEVELING/RESURFACING

A. Material:

1. The material used for leveling shall be Superpave asphaltic concrete.

2. The material used for resurfacing shall be Superpave asphaltic concrete. Friction Course mixes may be used as specified by the City Project Manager.

B. **Construction Requirements:**

1. The leveling and resurfacing shall commence within three (3) working days after the milling of each street. The time limit for streets where castings or other water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve box has been adjusted or replaced.

2. The methods used for re-paving shall meet all applicable portions of Section 330 - Hot Mix Asphalt General Construction Requirements, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
3. The Contractor shall contact all utility and TV cable companies for location of their facilities. The exact location of their facilities, type of material used by the utility and TV cable, etc. shall be determined by the Contractor prior to any excavation work required by this Contract.

4. The Contractor shall be responsible for the protection of all pavements, sidewalks, and other improvements within the work area. All damage to such improvements, as a result of the Contractor's operations, beyond the limits of the work of pavement replacement as described herein, shall be repaired by the Contractor at the Contractor's expense.

5. Testing by City: Testing may be completed by an independent testing laboratory. If core borings are done to determine thickness and density, the Contractor is responsible for filling these holes in the pavement.

C. **Quality Control:**

1. The Contractor shall have a Quality Control Technician who has been certified by the State of Florida Department of Transportation as a Certified Asphalt Plant Technician, available at the asphalt plant at all times the Contractor is producing asphalt mix for use on this project.

2. The Contractor's quality control procedures, inspection and tests shall be documented, and that information shall be available for review by the Project Manager or his representative, throughout the course of the Contract.

3. The mix design shall meet the requirements of Section 334-3.2 for the type of Superpave asphalt indicated in the plans as set forth in Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. Friction course asphalt concrete must meet the requirements of Section 337 for the type of friction course indicated in the plans. Submit a Notarized Certification of Specification Compliance letter on company letterhead to the Engineer stating that all material produced and placed on the project was in substantial compliance with the specifications. The City may run independent tests during the project to determine the acceptability of the material.

7. UTILITY ADJUSTMENTS & REPLACEMENTS

A. **Adjusting Existing City Valve Boxes:**

1. The Contractor is to provide the necessary equipment to adjust the castings without damaging the existing structure. Adjustment would include being able to screw the top portion of the valve box up or down. Water valves that cannot be adjusted either up or down must be replaced under Section 6.2. If the structure is damaged, the Contractor is to replace the structure to its original condition at their cost.

2. The materials and construction methods for this work shall conform to applicable portions of Section 425 Inlets, Manholes and Junction Boxes, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.

3. The quantities to be paid for under this section shall be for the number of valve boxes, adjusted physically.

4. Structures, sections of structures, valve box sections or other items necessary for adjustment that are considered debris and that has been removed by the Contractor as part of the progress of work shall be removed from the project site by the Contractor at the end of each day's work. The Contractor is to remove all debris deposited in the structure as a result of the work performed.

B. **Castings:**

1. The Contractor shall notify the Project Manager or his representative on any questions regarding the prior adjustment or replacement of manhole frames or valve boxes.

2. Manhole frame and covers and valve boxes to be replaced are to be furnished by the Contractor.

3. Castings damaged by construction shall be replaced at no additional cost to the City of St Pete Beach.
4. All castings shall be adjusted and replaced in accordance with the manufacturers recommended requirements.

5. Adjusted or replaced castings shall be set at the grade of the proposed asphalt after compaction with not more than ¼" variation in 10 feet.

8. STRIPING AND MARKINGS

A. **Temporary Striping**: Temporary traffic stripes and markings will be required. Temporary markings shall be placed immediately after milling on any arterial/collector roads or within the immediate proximity of a school, and immediately after final asphalt on all roads. Before opening any re-paved area to traffic, temporary markings shall be applied as specified by the Project Manager. The paint used for this work shall be in accordance with the FDOT specification.

B. **Permanent Striping**: The Contractor shall place permanent traffic stripes and markings in accordance with reference points and alignment gathered by the Contractor prior to milling or overlay or in accordance with striping plans provided by the City of St Pete Beach. The Contractor shall use an Alkyd/Maleic thermoplastic compound and application methods meeting the requirements of Section 711 – Thermoplastic Pavement Markings, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. The thermoplastic compound shall be extruded on the pavement surface in a molten state by mechanical means with surface application of glass spheres, and upon cooling

to ambient pavement temperature shall produce an adherent pavement marking of the specified thickness and width and capable of resisting deformation.

C. A minimum of 21 days curing time after asphalt placement shall be allowed before the placement of any thermoplastic marking commences, with all thermoplastic markings to be completed within 28 days after asphalt placement.

D. The color of the thermoplastic shall be white, yellow, or blue as specified by the M.U.T.C.D.; and revisions thereof.

9. CLEANUP AND DUST CONTROL

A. The Contractor shall furnish and operate a minimum of one (1) mechanical sweeper for the purpose of removal of loose milled material. After milling and before resurfacing, the Contractor shall water the streets as necessary to prevent dust nuisance from his operations or from traffic.

B. Upon completion of the work on each street and before acceptance, the Contractor shall remove all surplus and discard materials and rubbish; shall restore in an acceptable manner all property, both public and private, which has been damaged during the prosecution of the work and shall leave each street in a neat and presentable condition throughout the entire length of the work under Contract. This shall include, but not be limited to the overspray of tack, and shall be completed within one (1) week after the resurfacing of each street.

C. Failure of the Contractor to comply with the Project Manager cleanup orders may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

D. 5% of the value of the work performed may be retained, should at the opinion of the City, restoration not be completed.

E. The cost of all work regarding Cleanup and Dust Control shall be included in the prices for other pay items, which are included in the Contract.

F. The Contractor shall reflect in the schedule, which shall be approved prior to construction, the time required for complete restoration. The Contractor shall strictly adhere to the schedule.

G. The Contractor shall take the necessary measures to prevent siltation and other construction related materials including tack coatings from entering storm inlet structures and manhole structures during the road repaving operation.

10. TRAFFIC CONTROL, STREET CLOSURES, DETOURS AND BARRICADES

A. The Contractor shall comply with all applicable portions of Section 102 – Maintenance of Traffic – Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision, and City requirements for traffic control.

B. The Contractor shall furnish all necessary barriers, lights, signs, and flag persons, to advise the public of detours and construction hazards. All flag persons on site shall be properly qualified.

C. The Contractor shall be responsible for compliance with additional public safety requirements, which may be ordered by the Project Manager or his authorized representative.

D. Failure of the Contractor to comply with the public safety requirements may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

E. The Contractor shall furnish and install, and upon completion of the work, promptly remove all signs and warning devices.

11. SODDING

A. **Description:** All sodding shall conform to the requirements of Section 570, FDOT Manual on Road and Bridge Construction, latest revision.

B. **Materials:**

1. **Sod:** Sod shall be Argentine Bahia as determined by the Project Engineer. Where sodding will adjoin, or be in sufficiently close proximity to, private lawns, other types of sod may be used if desired by the affected property owners and approved by the Project Engineer. The sod shall be taken up in commercial-size rectangles, preferably 12-inch by 24-inch or larger. Maximum allowable deviation from the standard widths and lengths shall be five percent (5%). Broken pads and torn or uneven ends will not be acceptable. The sod shall be sufficiently thick to secure a dense stand of live grass. The sod shall be live, fresh and uninjured, at the time of planting. It shall have a uniform soil thickness of three-fourths inch (3/4"), plus or minus one-fourth inch (1/4"), at the time of cutting. Measurement for thickness shall exclude top growth and thatch. The soil mat shall adhere firmly to the roots such that it will not break, crumble, or tear during handling and placing. No muck or heavy peat soil grown sod will be accepted. All sod shall be 97% free of weeds and other grasses. All sod shall comply with State and Federal laws with respect to inspection for plant diseases and insect infestation. An inspection certificate, required by law, may be requested by the Project Engineer for each shipment. All sod shall be placed as soon as possible after being dug and shall be shaded and kept moist from the time it is dug until it is planted. No sod which has been cut for more than 48 hours may be used unless specifically authorized by the Project Engineer.

2. **Commercial Fertilizer:** All commercial fertilizers shall comply with the State fertilizer laws. All fertilizers shall be uniform in composition, free flowing and suitable for application by mechanical spreader equipment. The chemical designation of the fertilizer shall be 12-8-8 or equivalent ratio. At least 50% of the phosphoric acid shall be from normal super phosphate or an equivalent source which will provide a minimum of two units of sulfur. The amount of sulfur shall be indicated on the quantitative analysis card attached to each bag or other container.

3. **Water:** The water may be obtained from any approved spring, pond, lake, stream or municipal water system. The water shall be free of excessive and harmful chemicals, acids, alkalies, or any substance which might be harmful to plant growth or obnoxious to traffic. Salt water shall not be used. The Contractor shall pay for all water used for the installation of sod.

C. **Construction Methods:**

1. **Soil Moisture:** Rough and fine grading shall be carefully executed to ensure that the final placed sod will conform to existing grades, free of depressions, "bird baths" or

bumps. The area on which sod is to be placed shall contain sufficient moisture for optimum results. During periods of high temperature and after all unevenness in the soil surface has been corrected, the soil shall be lightly irrigated immediately prior to laying the sod. Muddy soil shall not be created.

2. **Placing Sod:** The first row of sod shall be laid in a straight line with subsequent rows placed parallel to and tightly against each other. Lateral joints shall be staggered to promote more uniform growth and strength. Care shall be exercised to ensure that the sod is not stretched or overlapped and that all joints are butted tight in order to prevent voids which would cause air drying of the roots. The sod shall form a solid mass. The sod shall be firmly embedded by light tampering and rolling to ensure contact with the subgrade and to provide a smooth, even surface to eliminate voids under the root system making dry spots. The sod shall be staked on all slopes of 2:1 or steeper with pegs or similar material, driven through the sod blocks, six inches (6") into firm earth at suitable intervals.

3. **Watering:** The sod shall be watered with a fine spray immediately after placing, such that the underside of the new sod pad and soil immediately below the sod are thoroughly wet. The sod shall be kept in moist condition for the duration of the contract period (and in no case less than 4 weeks except in dry season it shall be 8 weeks). The moistened condition shall extend to at least to the full depth of the rooting zone. Water shall not be applied between the hours of 10:00 a.m. and 6:00 p.m.

D. **Maintenance:** The Contractor shall, at no additional expense to the City, maintain the sodded areas in a satisfactory condition until final acceptance of the project. Such maintenance shall include the filling, leveling, and repairing of any washed or eroded areas, as deemed necessary by the Project Engineer. The Project Engineer, at any time, may require resodding of any areas in which the establishment of the grass stand does not appear to be developing satisfactorily. The Contractor shall mow lawns as soon as there is enough top growth to cut with mower set at height of two inches (2") and shall repeat mowing as required throughout the duration of the project, to maintain such height. The Contractor shall not delay mowing until grass blades bend over and become matted and shall not mow when grass is wet.

E. **Measurement and Payment:** Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per square yard (SY) for furnishing, placing, maintaining and replacing sod, complete in place and accepted, and no additional compensation will be allowed therefore.

[END OF PART III]

SECTION 01425
FDOT STANDARDS REFERENCE

PART 1 GENERAL

1.01 Section Includes

Instruction on the use and applicability of FDOT standards on the project

1.02 Requirements

A. The Florida Department of Transportation, Standard Specifications for Road and Bridge Construction, latest non-metric edition ("Standard Specifications"), and Standard Plans for Road Construction, latest non-metric edition ("Standard Plans") are referenced herein as source documents for applicable technical specifications and construction details to be used in the construction of this project. The term "latest edition" refers to the latest edition implemented by FDOT and includes all FDOT implemented supplements at the time of bid advertisement.

B. Method of Measurement and Basis of Payment is to be in accordance with the Florida Department of Transportation Standard Specifications. Any item which is detailed in the Plans and for which material types, sizes and quality are also called out, the "Standard Plans" shall take preference over the plan detail unless otherwise directed by the Engineer.

C. Where the FDOT Standard Specifications use the reference "Department", replace "Department" with "Owner", except for when such reference is to Department Standards and evaluation criteria.

D. The Standard Plans are referenced herein as a source document for applicable construction items and details called for in the plans for which a specific plan detail is not provided. The Contractor shall construct the items called for in the plans in accordance with the "Standard Plans" unless otherwise defined or detailed in the plans or as directed by the Owner, Engineer or authorized representative.

E. The Standard Plans are available for download from the FDOT website at: https://www.fdot.gov/design/standardplans

F. In case of conflict, the Technical Specifications takes precedence over FDOT specifications for a particular construction requirement.

G. Copies of the latest implemented edition and implemented supplements of the Florida Department of Transportation Standard Specifications are available for download from the FDOT website at: https://www.fdot.gov/programmanagement/Implemented/SpecBooks

H. The Contractor shall inform the Owner and Engineer in writing of any specification that the Contractor feels is ambiguous or conflicting with other plan notes and details prior to the construction of the associated item. The Engineer will determine which information is to be used for construction. The Contractor is responsible for the removal and replacement of any item improperly constructed resulting from a misinterpretation of the specifications at no additional cost to the Owner.

PART 2 PRODUCTS - Not Used

PART 3 EXECUTION

3.01 General

The Contractor shall use Divisions Two (II) and Three (III) of the FDOT Specifications as they relate to methods of construction and material types and quality for the appropriate construction items contained within this project.

END OF SECTION

III. BID FORM

See attached Excel document.

IV. GENERAL CONTRACT TERMS

REQUEST FOR PROPOSALS
Civil On Call Construction Services

REQUEST FOR PROPOSAL SUMMARY
The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The "City" intends to **award multiple contracts** to vendors who can provide the best value for services. Vendors may submit proposals for all, some, or only one of the requested line items or categories. **It is not mandatory to submit a proposal for every item listed.** A bidder may bid on any, all, or none of the items. The "City" reserves the right to select multiple vendors to optimize cost-efficiency and capability across different segments of the project. Proposals will be evaluated based on capability, cost, and capacity to perform the specific line items requested.

PROPOSAL SUBMITTALS
Proposal documents must include a signed/notarized Contractor's Proposal Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit electronic proposals only. Bidders must submit electronically only through Bonfire platform. When bidding electronically, only one copy should be submitted.

Proposals shall include the following:

- A signed and notarized Proposer's Contract Proposal.
- Current proof of insurance certificate.
- A list of references and minimum qualifications as outlined in Section V.
- One copy of bid electronically submitted to Bonfire platform.

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http://www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

Proposers or persons wishing to submit a proposal on this project shall be licensed, and insured in accordance with the City's requirements

The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals, or accept any proposal or part thereof deemed to be in the best interests to the City of St. Pete Beach.

Electronic proposals must be submitted by **9:00 AM on April 08, 2026 (Deadline),** clearly marked as: **"Civil On Call Construction Services."**

PRE-PROPOSAL MEETING
An optional pre-proposal meeting will be held on **March 18, 2026 at 10:00 AM EST** via Microsoft Teams conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS
No oral interpretations will be made to any firms as to the meaning of the scope of work or any other

contract documents included in this **RFP.** All questions pertaining to the terms and conditions or scope of work of this Request for Proposal **(RFP)** must be sent in writing via email only to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 AM EST on March 25, 2026.** Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFP**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFP** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so. If the Proposer discovered the opportunity through the online platform (Bonfire), do not submit questions through these platforms. **Only questions emailed directly to the City Procurement Manager will be answered.**

BEGINNING DATE
The Proposer shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Proposer shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City.

COMPLETION OF WORK
The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

COSTS INCURRED BY PROPOSERS
All expenses involved with the preparation and submission of proposals to the City, or any work performed in connection therewith, shall be borne solely by the Proposers. No payment will be made for any responses received or for any other effort required of or made by; the Proposer's prior to contract commencement.

ORAL PRESENTATION
The City may require an oral presentation of the proposal at the Evaluation Committee's discretion. This could also include a formal interview of any and all members of the Proposer's contract management staff.

CONFLICT OF INTEREST
The Proposer represents that it presently has no interest and shall acquire no interest, either direct or indirect, which would conflict in any manner with the performance or services required hereunder, as provided for in FL Stat. 112.311. The Proposer further represents that no person having any interest shall be employed for said performance.

The Proposer shall promptly notify the City's representative, in writing, by certified mail, of all potential conflicts of interest for any prospective business association, interest, or other circumstance, which may influence or appear to influence the contractor's judgment or quality of services being provided hereunder. Such written notification shall identify the prospective business association, interest or circumstance, the nature of work that the Proposer may undertake and request an opinion of the city as to whether the association, interest or circumstance would, in the opinion of the City, constitute a conflict of interest if entered into by the Proposer. The City agrees to notify the Proposer of its opinion by certified mail within thirty days of receipt of notification by the Proposer.

LATE PROPOSAL OR MODIFICATIONS
Modifications in writing received prior to the time set for the proposal submittal will be accepted. Proposal modifications received after the time set for the proposal submittal will not be considered.

RELATED PARTIES AND MULTIPLE PROPOSALS

Where two (2) or more related parties each submit a proposal or multiple proposals are received from (1) Proposer, for any such contract, such proposals shall be judged non-responsive. Related parties mean Proposers or the principles thereof, which have a direct or indirect ownership interest in another Proposer for the same contract or in which a parent company or the principles thereof where one (1) Proposer has a direct ownership interest in another Proposer for the same contract.

RIGHT TO AUDIT
The City of St. Pete Beach reserves the privilege of auditing a Proposer's record as such records relate to purchases or work between the City and said Proposer. Records should be maintained for three years from contract date.

VARIANCE FROM STANDARD TERMS & CONDITIONS
All standard terms and conditions stated throughout the RFP apply to this contract except as specifically stated. This should be fully understood by Proposers prior to submitting a proposal.

ASSIGNMENT
The Proposer shall perform this contract. No assignment or subcontracting shall be allowed without prior written consent of the City. If a Proposer intends to subcontract a portion of this work, the Proposer must disclose that intent in the proposal. In the event of a corporate acquisition and/or merger, the Contractor shall provide written notice to the City within thirty (30) business days of Proposer's notice of such action or upon the occurrence of said action, whichever occurs first. The right to terminate this contract, which shall not be unreasonably exercised by the City shall include but not be limited to, instances in which a corporate acquisition and/or merger represent a conflict of interest or are contrary to any local, state, or federal laws. Action by the City awarding a proposal to a firm that has disclosed its intent to assign or subcontract in its response to the RFP, without exception shall constitute approval for purpose of this Agreement.

LOBBYING Lobbying of Evaluation Committee members, City employees, or elected officials regarding request for proposals, request for qualifications, bids or contracts, during the pendency of bid award or bid protest, by the bidder/proposer/protestor or any member of the bidder's/proposer's/protestor's staff, an agent of the bidder/proposer/protestor, or any person employed by any legal entity affiliated with representing an organization that is responding to the request for proposal, request for qualification, bid or contract, or has a pending bid protest is strictly prohibited either upon advertisement or on a date established by the City and shall be prohibited until either an award is final or the protest is finally resolved by the City Manager or Procurement Manager; provided, however, nothing herein shall prohibit a prospective bidder/proposer from contacting City departments to address situations such as clarification and/or questions related to the procurement process. For purposes of this provision, lobbying activities shall include but not be limited to, influencing or attempting to influence action or non-action in connection with any requests for proposal, request for qualification, bid or contract through direct or indirect oral or written communication or an attempt to obtain goodwill of persons and/or entities specified in this provision. Such actions may cause any request for proposal, request for qualification, bid or contract to be rejected.

ADDITIONAL REQUIREMENTS
The City reserves the right, by change order, to unilaterally add or delete locations/services, either collectively or individually, at the City's sole option, at any time after award has been made as may be deemed necessary or in the best interest of the City. In such case, the Proposer will be required to provide or reduce services to this contract in accordance with the terms, conditions, and specifications.

SERVICES AGREEMENT
A written agreement incorporating the RFP and the successful proposal will be prepared by the City, signed by the successful Proposer, and presented to the City Commission for approval and signature.

INTEGRITY OF REQUEST FOR PROPOSAL DOCUMENTS
Proposers shall use the original RFP forms provided within the RFP and enter information in the spaces where a response is requested. Proposers may use an attachment as an addendum to the RFP forms if sufficient space is not available on the original form for the Proposer to enter a complete response. Any modifications or alterations to the original RFP documents by the Proposer, whether intentional or otherwise, will constitute grounds for rejection of the RFP. Any such modifications or alterations a Proposer wishes to propose must clearly be stated in the Proposer's RFP response and presented in the form of an addendum to the original RFP documents.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in this Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the contract and requirements and shall determine acceptance of the work under this Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the contract terms in a fair and unbiased manner.
If a variation from any requirements is allowed, the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

EXAMINATION OF SITE
Proposer shall carefully examine project site and be familiar with the work required for the project, investigate all site conditions that may affect execution of work as detailed in the construction documents. Contact the City's Procurement Manager or their designee for changes or alterations before proceeding.

ASSURANCES
The responding Proposer shall provide a statement of assurance that the Proposer is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

ASSIGNMENT AND TRANSFER OF CONTRACT
The Proposer shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS
The Proposer shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PAYMENT
Payment shall be made to the Proposer for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

PERIOD OF PERFORMANCE
The target completion for the base Scope of Services is January 2027, corresponding to delivery of the Design-Build Readiness Package. The City reserves the right, at its sole discretion and subject to funding

availability, to amend this Agreement to extend the Consultant's services through final (100%) design. Any additional services shall be authorized by written amendment and negotiated in accordance with the Consultants' Competitive Negotiation Act (Section 287.055, Florida Statutes).

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Proposer will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Proposer without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Proposer's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Proposer to make a change in the Work, and if the City and the Proposer do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the Proposer shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Proposer believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, they shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Proposer first discovered the occurrence. The Proposer shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Proposer shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Proposer shall prepare proposals detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Proposer's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Proposer's proposals shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable proposal will not justify an increase in Contract Amount or Contract Time. Proposer agrees that it shall give the City access to any and all of Proposer's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Proposer for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Proposer shall be at his expense

without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Proposer or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Proposer proposals or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to be used shall be those used for the Proposer's costs, except that the term "Subcontractor" shall replace the term "Proposer," context permitting.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Proposer, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit.

In such case, the Proposer will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Proposer to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Proposer (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Proposer employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

PAYMENTS FOR WORK COMPLETED
All payments under this agreement shall comply with the requirements of Florida Statutes, Section 215.422, commonly referred to as the "Prompt Payment Law." This includes timely processing of invoices and adherence to statutory interest provisions for late payments. The Contractor shall submit detailed invoices for services rendered under this agreement. Each invoice must include: Purchase Order or Contract Number, Description of services provided, Dates of service, Total amount due. Payment will be made within 45 days of receipt of a proper invoice and acceptance of deliverables, as required by Florida law. If payment is not made within the statutory timeframe, interest penalties will apply in accordance with Section 215.422, Florida Statutes. Payments will be issued via electronic funds transfer (EFT) unless otherwise agreed in writing. Contractor must provide accurate banking information to facilitate EFT.

PAYMENTS WITHHELD
The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Proposer to make payments properly to Subcontractors or for labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Proposer

f) Failure of the Proposer to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS
Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Proposer, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such sums to the Proposer.

Before the approval of the final payment, the Proposer shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS
If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Proposer, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Proposer all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Proposer and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Proposer. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies

to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

LICENSES AND PERMITS

The Proposer shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the Proposer is responsible for non-compliance of all permit requirements, including all fines resulting from Proposer's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Proposer shall be responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the Proposer awarded the project, MUST also register their license with the City.

LABOR PROVISIONS

The Proposer and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed. The State of Florida prevailing wage law requires that the Proposer shall fully comply with all provisions contained in Section 215.19, "Schedule of Prevailing Wage Rates for Specified Public Construction." The wage rates set forth by such determination shall apply to this project.

INSURANCE

The Proposer shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Proposer's General Public Liability and Property Damage Insurance issued to the Proposer and protecting the Proposer from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Proposer or by any Subcontractor hired by the Proposer or anyone directly or indirectly employed by the Proposer or hired by the Proposer.

The successful Proposer shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Proposer or third party under the direction or control of the Proposer. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Proposer must furnish the City with Certificate of Insurance prior to commencement of work. An

approved Certificate of Insurance furnished by the Proposer's carrier to guarantee the Proposer being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Professional Liability Insurance $2,000,000 each occurrence.
- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY
The Proposer shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Proposer shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Proposer shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Proposer will provide security on off days and holidays. The Proposer shall be responsible for all charges incurred with such action.

The Proposer shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Proposer, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Proposer shall also protect adjacent property as required by law.

PROPOSAL REVIEW AND CONTRACT AWARD
Failure to submit all documents requested at the time of proposal may deem the Proposer's proposal ineligible for award. The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals. The contract shall be awarded by written notice to the responsible and responsive Contractor whose proposal is determined in writing to be the most advantageous to the City, taking into consideration the price and other criteria set forth in this request for proposals. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS
The laws of the State of Florida do apply to any purchase made under this Request for Proposal. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their proposal and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Proposer agrees to comply with all applicable portions of Fla. Stat. 448.095. Proposer must use the

U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Proposer shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Proposer with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Proposer shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Proposer must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Proposer's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Proposer may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and proposal costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statute by the Proposer, the Proposer may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all proposals, to waive irregularities and technicalities, and to request re-submission. If only one proposal is received by the proposal date and time listed, the proposal may or may not be rejected by the City depending upon proposal review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting proposals. The City reserves the right to award the contract to a responsible proposer submitting a responsible proposal, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, Proposers, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFP during any phase of the proposalding process. Failure to comply with the provision may result in disqualification of the Proposer, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFP shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE
Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION
The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS
The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience providing Task Work Order driven Civil On-Call Construction Services.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Civil On Call Construction Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Civil On Call Construction Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach
by: Bruno C Sequeira, President
(Print individual's name and title)

for: BCS Construction Group LLC
(Print name of entity submitting sworn statement)

at: 8130 160th St N, Suite 10 Pinellas Park FL 33781
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):
84 - 3448810
(FEIN)
or, if the entity has no FEIN, include the Social Security Number:

(SSN)

by the individual signing this sworn statement:
(Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☑ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VIII. NON-COLLUSION AFFADAVIT

STATE OF Florida COUNTY OF Pinellas

I state that I Bruno C Sequeira of BCS Construction Group LLC
(Name and Title) President (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. _____, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

EXHIBIT "D"

Conditional Federal/Grant-Funded Contract Addendum

(Place Conditional Federal/Grant-Funded Contract Addendum behind this page)

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

Federal/Grant Program: [insert]
Federal Awarding Agency: [insert]
Pass-Through Entity: [insert, if applicable]
Assistance Listing Number: [insert, if applicable]
Federal Award Identification Number: [insert, if applicable]
Award or Disaster Declaration Date: [insert, if applicable]
Project Number: [insert]
Special Award Conditions: [insert or attach]

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Authorize the City Manager to execute the Agreement with Cathcart Construction Company Florida, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Action Request: Motion to authorize the City Manager to execute the Agreement with Cathcart Construction Company Florida, LLC for Civil On-Call Construction Services on an as-needed basis in an amount not to exceed annually appropriated funding.

Strategic Objective: Reliable Infrastructure

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Proposals (RFP) for a task work order-driven Civil On-Call Construction Services contract. Five (5) responsive proposals were received on March 18, 2026. Following evaluation, the City's selection committee recommended award to Ajax Paving Industries of Florida LLC, BCS Construction Group, Cathcart Construction Company Florida LLC, PCS Civil LLC, and Southern Road and Bridge LLC

- Qualifications and Experience
- References and Past Performance
- Capacity to Perform the Work
- Cost

The contract provides not-to-exceed unit prices for labor, materials, equipment, tools, transportation, and incidentals necessary to perform civil construction services on an as-needed basis throughout the City. Projects may include roadway and intersection improvements, drainage upgrades, ADA improvements, sidewalk construction, alley improvements, signing and pavement markings, recreational trails, traffic signal improvements, and

intelligent transportation system (ITS) infrastructure.

Work will be authorized by task order on an as-needed basis in an amount not to exceed annually appropriated funding. The initial contract term is three (3) years with the option for two (2) additional one (1) year renewals upon mutual agreement and annual appropriation of funds.

Approval of this agreement will provide the City with qualified contractors to perform civil infrastructure improvements in a timely and cost-effective manner, improve responsiveness to maintenance and capital project needs, and support implementation of the City's transportation, drainage, utility, and public infrastructure programs.

Funding:

301.5410.563000 Improvements Other Than Buildings (remaining balance $211,746.90)

301.5411.563000 Improvements Other Than Buildings (remaining balance $8,478,760.96)

301.5726.563000 Improvements Other Than Buildings (remaining balance $825,791.26)

Other CIP funding sources may be used based on the available annual budget

1. Cathcart Construction Company Contract Signed

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Civil On-Call Construction Services

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and **CATHCART CONSTRUCTION COMPANY-FLORIDA, LLC**. (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Bids, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its 06/23/2026 public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed the Annual Budgeted amount. Funding will be awarded by Task Orders.

b. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

c. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

d. Contractor must comply with any and all Federal, State, and local laws and regulations now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

e. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.

a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of (3) three years with (2) two, (1) one-year extensions from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement.

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured

and providing coverage up through and including the final performance of any services provided herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved,

and any amount withheld is not subject to payment of interest by the City. The above provisions will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:
    a. Standard Contract Addendum (Exhibit "A")
    b. Request for Bid/Proposal (Exhibit "B")

c. Vendor Bid/Proposal (Exhibit "C")
d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:
Cathcart Construction Company-Florida LLC
1056 Willa Springs Drive
Winter Springs Florida 32708

As to City:
City Manager
City of St. Pete Beach
155 Corey Avenue
St. Pete Beach, FL 33706

21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Contract Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this _____ day of _____, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and _____, hereinafter referred to as "Contractor", concerning that certain agreement dated the ____ day of _____, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian
cityclerk@stpetebeach.org

Phone: 727-363-9220
155 Corey Avenue
St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

I. INVITATION

The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The types of projects that may be assigned under this Contract shall include, but not be limited to:

- intersection/roadway improvements
- drainage upgrades and/or installations
- ADA upgrades and pedestrian/bicyclist improvements
- sidewalk installations and upgrades
- alley improvements
- median modifications
- signing and pavement markings
- recreational trails
- signal upgrades and installations
- intelligent transportation systems (ITS) components upgrades

II. STATEMENT OF WORK

PART I: GENERAL REQUIREMENTS

1. SPECIAL CONDITIONS

A. **Local Preference, Location Points and Tie Breakers**

Location preferences do not apply due to the fact that some task orders may be funded with state or federal dollars.

B. **Minority Business Enterprise Policy**

Minority Business Enterprise Evaluation Criteria do not apply due to the fact that some task orders may be funded with state or federal dollars.

C. **Scrutinized Companies**

Scrutinized Companies with activities in Sudan List or activities in the Iran Petroleum Energy Sector List do not apply due to the fact that some task orders may be funded with state or federal dollars.

D. **Bonding and Credit**

Contractor/Vendor shall provide a letter of bondability showing their maximum bonding capacity.

E. **Contract Term**

This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

F. **Contract Pricing**

Contract prices for equipment and/or service will remain firm through the first three (3) contract years. Sixty (60) days prior to the contract renewal date, Contractor/Vendor may request a price adjustment. The price adjustment and justification must be submitted in writing, and be approved by the City. Said price increase may not, under any circumstances, exceed three (3) percent of the Construction CPI. No retroactive contract price adjustments will be allowed. If the Contractor/Vendor fails to submit a price adjustment within the sixty (60) days prior to the contract renewal date, current contract pricing will continue for the contract renewal period.

G. **Work Assignments**

All work to be performed shall take the following into consideration prior to assignment of any work to any Contractor/Vendor, at the discretion of the Procurement Manager:

1. **Estimated Cost < $250,000.00:**

The City retains the right to select any Contractor/Vendor to whom a multiple-award contract has been made when the opportunity to submit a quote for any job whose estimated cost is less than Two Hundred & Fifty Thousand Dollars ($250,000.00).

2. **Estimated Cost > $250,000.00 and < $500,000.00:**

The City shall obtain three (3) quotes from any Contractor/Vendor to whom a multiple vendor award has been made, for those jobs whose estimated cost is greater than Two Hundred & Fifty Thousand Dollars ($250,000.00) and less than Five Hundred Thousand Dollars ($500,000.00).

3. **Estimated Cost > $500,000.00:**
   a. The City retains the right to separately and competitively bid any and all projects whose cost estimates are greater than Five Hundred Thousand Dollars ($500,000.00). The determination will be made by the City Procurement Manager.
   b. Projects that exceed Five Hundred Thousand Dollars ($500,000.00) may not be sub-divided into separate projects in order to circumvent such requirement.

4. **Reassignment of Work:**

The City retains the right and authority to reassign work to another Contractor/Vendor, at any time, for the following reasons:

a. The lowest Contractor/Vendor cannot comply with the specifications in cases of an emergency.
b. The lowest Contractor/Vendor cannot respond to the job requirements, at the time, due to scheduling conflicts, staffing considerations or other reasonable cause(s) for preventing their completion of the task as required.
c. The City shall have the option to solicit additional quotes, bids, or even professional opinion about a particular job when in its best interest and could engage the services of another company/Contractor/Vendor. This exception will always require advanced written notice and explanation by the requesting City Department to the Procurement Manager, for approval, before authorizing any contemplated work to be done. The receipt of the approved purchase order shall be understood that all work is to immediately begin on the project, per the project schedule and needs as identified by the City and as agreed upon by the Contractor/Vendor.

5. **Cumulative Work shall not exceed $4,000,000.00:**

The cost of all work completed by a Contractor/Vendor shall not exceed Four Million Dollars ($4,000,000.00) in a calendar year. If all costs are expected to exceed this threshold, these services will need to be separately re-bid through issuance of a new set of bid specifications.

H. **Quotes**

1. The City will request a quote if and when needed. Vendors participating in the contract shall have ten (10) business days from written notification to respond to quotes, unless waived by the Procurement Manager. If work is an emergency, as determined by the City, vendors shall have (24) hours from email or phone notification to respond to quotes.
2. A Task Order Form will be provided to awarded Contractor/Vendor. A properly executed Purchase Order shall be issued for the work assignment and shall have the Task Order Form and all related paperwork attached as backup. The Purchase Order shall indicate the start and end dates for the project.
3. If the Contractor/Vendor does not wish to issue a quote for or cannot meet the requirements of the project, inclusive of the time given in which to complete the job; the Contractor/Vendor shall complete the Work Order Form by noting "No Quote" on the form itself and by also providing an explanation as to why they are not submitting a quote.
4. Final costs for any individual project shall not exceed the original approved and total cost for such project by more than ten percent (10%). Any and all anticipated project cost increases are subject to advanced approval by the Procurement Manager.
5. Any Contractor/Vendor that fails to submit a quote successively three (3) times in a row may have their contract cancelled due to non-performance.

I. **Notice to Proceed (NTP)**

All task orders $250,000.00 or less will use the purchase order as the Notice to Proceed (NTP). The start date and date or the number of day to complete the project must be included on the purchase order. If the start date is left off the purchase order then the date of the purchase order approval will default as the NTP start date. Projects over $250,000.00 will have a formal NTP issued through the Purchasing Division. All task orders must be reviewed by the Purchasing Division before a purchase order or NTP is issued.

J. **Liquidated Damages**

Liquidated damages will be assessed to the Contractor/Vendor/vendor for each consecutive calendar day completion of the project or work is delayed. The amount of liquidated damages will be dependent on the cost of the task order and will be calculated using the chart below.

Estimated Project Cost Over	Estimated Project Cost But Less than	Daily Charge Per Calendar Day
$0.00	$50,000.00	$960.00
$50,000.00	$250,000.00	$965.00
$250,000.00	$500,000.00	$1,245.00
$500,000.00	$2,500,000.00	$1,665.00
$2,500,000.00	$5,000,000.00	$2,715.00

K. **Project Spreadsheet Submittal**

Contractor/Vendor must submit a formal spreadsheet using the process below.

1. List of completed projects to include:
   a. Relevant project experience includes construction and delivery methods relevant to the type of project to be constructed utilizing the CM/GC method (or performing as a General Contractor/Vendor on similar types and sizes of projects).
   b. Describe no more than ten (10) and no less than five (5) projects in order of most relevant to least relevant (similar type of construction with a contract dollar amount of $500,000.00 or less) which demonstrates the firm's capabilities to perform such projects.
   c. For each project, the following information should be provided:
      i. Project name
      ii. Project location
      iii. Dates during which services were performed
      iv. Physical description (e.g. square footage, key components, site area)
      v. Brief description of Project Services performed by CM/GC or GC Firm.
      vi. Owners Information:
         a. Contact person
         b. Telephone number
         c. Email
         d. Project name
         e. Owner reference
         f. Original Contract Price
      vii. Amount of Change Orders by:
         a. Your Company
         b. Consultant
         c. Client/Entity
      viii. Final Project Price
      ix. Proposer should include a table with this information layout as follows:

Entity Name and Project Name	Contact Person Phone Email	Begin Project Amount	Change Orders by CMR	Change Orders by Engineer	Change Orders by Entity	Final Cost of Projects	Original Days for Construction	Final Construction Days

2. Any outstanding accomplishments of the firm that relates to the specific services being sought.

3. Any Quality Assurance and Value Engineering Programs should also be included.

2. STANDARD SPECIFICATIONS

The Project shall be constructed in accordance with these specifications, the Pinellas County Engineering Standard Details and the Florida Department of Transportation "Standard Specifications for Road and Bridge Construction", Latest Edition.

3. GOVERNING DOCUMENTS

The Specifications and all supplementary documents are essential parts of the Contract, and a requirement occurring in one is as binding as though occurring in all. They are intended to be complimentary and to describe and provide for a complete project. In case of discrepancy, calculated dimensions will govern over scaled dimensions.

The Contractor shall take no advantage of any apparent error or omission in the specifications. If the Contractor discovers such an error or omission, they shall immediately notify the Project Manager. The Project Manager will then make such corrections and interpretations as may be deemed necessary for fulfilling the intent of the specifications.

4. COOPERATION WITH OTHERS

The Contractor shall cooperate with the owners of any underground or overhead utilities in their removal and rearrangement operations in order that these operations may progress in a reasonable manner and that service rendered by these parties will not be interrupted.

A. Permits

1. City ROW Use Permit: The Contractor will obtain a Right of Way Use Permit from the City Permits Division located at 155 Corey Avenue, Florida. There will be no fee for this permit.
2. Public Services will require shop drawings, schedule, and the location of staging areas at the pre-construction meeting. Where the Contractor wishes to use private property, he shall obtain permission from the owner in writing and submit a copy at the first meeting.
3. The Contractor will be responsible for the requirements of all permits. There may be FDOT permits required for this project.

5. LINES, GRADES AND CONSTRUCTION SURVEYING

The Contractor shall lay out the work from the benchmarks, grades, dimensions, points and lines noted on the working drawings, established at the site, or supplied by the Project Manager. All work of every description shall be laid out and checked by the Contractor who will be held solely responsible for its correctness, and the Contractor shall pay for all expenses in connection with this work. The Contractor shall request clarification from the Project Manager of any errors, inconsistencies or omissions which they may discover. It is the Contractor's responsibility to review every street prior to milling and paving, including the inspection of overhead tree limbs, overgrown grass on pavement, manholes and gate valves.

The work may be checked by the Project Manager, and in the event of a discrepancy, their decision shall be final. No special compensation will be made to the Contractor to defray costs of any work or delays occasioned by making surveys and measurements, tests, or inspections, but such costs shall be considered as having been included in the price stipulated for the several items of work to be done under this Contract.

All attempts shall be made to protect existing property corner monumentation. The monumentation must be identified and marked prior to construction to ensure its permanency. All survey monuments, property corners, and benchmarks, which may be disturbed during construction, shall be referenced and replaced by the Contractor. All monuments and benchmarks disturbed or destroyed by the Contractor or any of his forces through accident or negligence shall be replaced by a Florida Licensed Professional Land Surveyor at the Contractor's expense. All survey markings shall be brought to the attention of the Project Manager.

6. MAINTENANCE OF DETOURS

The Contractor shall repair, at his expense, all potholes and other localized failures on streets which are used as detour routes to facilitate construction operations.

7. REPLACEMENT OF TRAFFIC, STREET SIGNS, SIGNAL LOOPS AND MAILBOXES

The Contractor shall remove and re-erect all existing traffic, street signs and mailboxes within the project site at his own expense for those which must be moved or relocated to permit construction operations.

The Contractor shall notify the City prior to disturbing any traffic signal loops and the City will install new traffic signal loops under a separate contract.

8. USE OF PREMISES

The Contractor shall confine all apparatus to the roadway or right-of-way in which the work is being performed and will not unreasonably encumber these premises with such apparatus, materials, supplies, and equipment. The Contractor shall promptly remove and dispose of all debris resulting from his operations.

9. PROSECUTION OF WORK/ LIQUIDATED DAMAGES

The Contractor shall begin work on any project/road no later than fourteen (14) calendar days after receipt of the "Notice to Proceed"; and shall diligently prosecute the same to project completion prior to the expiration of the total number of calendar days determined necessary for the project, from the date of said "Notice to Proceed".
Failure to complete each project within the determined number of calendar days shall cause the Contractor to be subject to the provisions for Liquidated Damages. The Contractor shall pay to the City as fixed liquidated damages for each calendar day of delay until the work is complete or accepted, and the Contractor and their sureties, jointly and severally, shall be liable for the amount thereof:

A. For each Task Work Order issued, the City project manager will determine the required number of days for completion of all work as well as the amount for liquidated damages, as appropriate.

B. Liquidated Damages will be assessed in accordance with Part I, 2. Special Conditions, J. Liquidated Damages of these bid specifications.

** Please refer to City of St Pete Beach Terms and Conditions, “Liquidated Damages, Penalties and Non-Conformance to Contract”

10. CONSTRUCTION SCHEDULE

A. Work shall be performed on an “as needed” basis for a **three (3) year contract period**. Upon mutual consent, this agreement may be extended for **two (2) additional one (1) year periods**, subject to the same terms and conditions and available funding being in place. No guarantee of volume or quantity of work is intended.

B. At the direction of the City of St Pete Beach, the Contractor will not be allowed to proceed with the scheduled work until restoration of preceding work areas are restored to the satisfaction of the City of St Pete Beach. It is the intent of this project to:

1. Start paving each street no later than three (3) working days after milling each street. If the street has not been paved after three (3) working days, a fee equal to the daily amount for liquidated damages indicated in Item #2J (above) will be assessed until the street has been paved. The time limit for streets to be paved where sewer manhole castings or water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve boxes have been adjusted or replaced.

2. Complete restoration including temporary striping and clean-up, shall be finished in no more than five (5) working days after the completion of paving activity and as directed by the City.

3. No work shall be done during the week between the hours of 9:00 PM and 6:00 AM, or between the hours of 9:00 PM and 9:00 AM on weekends or holidays; except for emergency work by a public service utility or by other permit approved by the City.
4. Night work may be established by the Contractor as regular procedure by obtaining the written permission of the City. Such permission may be revoked at any time by the City, if the Contractor fails to maintain adequate equipment and supervision for the proper execution, control, and safety of the work at night.

C. Work may need to be performed under more urgent timeline at the direction of the City of St Pete Beach. The Contract bid form includes pay items for Emergency Mobilizations for such occurrences. The Contactor shall respond to Emergency Work Requests within 24 hours and should expect to mobilize in less than 72 hours.

11. CONTRACTOR'S ACCEPTANCE OF CONDITIONS

The provisions of this Contract shall control any inconsistent provisions contained in the specifications. All Drawings and Specifications have been read and carefully considered by the Contractor, who understands the same, and agrees to their sufficiency for the work to be done.

It is expressly agreed that under no circumstances, conditions or situations shall this Contract be more strongly construed against the City than against the Contractor and his Surety.

Any ambiguity or uncertainty in the Drawings or Specifications shall be interpreted and construed by the Project Manager, or their designee, and their decision shall be final and binding upon all parties.

It is distinctly understood and agreed that the passing, approval and/or acceptance of any part of the work or material by the City, the Project Manager, or by any agent or representative as in compliance with the terms of this Contract and/or of the Drawings and Specifications covering said work, shall not operate as a waiver by the City of strict compliance with the terms of this Contract, and/or the Drawings and Specifications covering said work; and the City may require the Contractor and/or his surety to repair, replace, restore and/or make to
comply strictly and in all things with this Contract and the Drawings and Specifications any and all of said work and/or materials which within a period of one year from and after the date of the passing, approval, and/or acceptance of such work or material, are found to be defective or to fail in any way to comply with this Contract or with the Drawings and Specifications.

This provision shall not apply to materials or equipment normally expected to deteriorate or wear out and become subject to normal repair and replacement before the condition is discovered. The Contractor shall not be required to do normal maintenance work under the guarantee provisions. Failure on the part of the Contractor and/or his surety, immediately after notice to either repair or replace any such defective materials and workmanship, shall entitle the City, if it sees fit, to replace or repair the same and recover the reasonable cost of such replacement and/or repair from the Contractor and/or his surety, who shall in any event be jointly and severally liable to the City for all damage, loss and expense caused to the City by Reason for the Contractor's breach of this Contract and/or his failure to comply strictly and in all things with this Contract and with the Drawings and specifications.

12. HAZARDOUS MATERIALS

The Contractor shall be responsible for the independent inspection and certification of the removal, transportation and disposal of all identified and all unidentified hazardous materials located within the project site.

13. JOB CONDITIONS

A. The Contractor is to provide the City with a working schedule prior to commencing the project. The City reserves the right to revise and/or adjust the schedule accordingly.

B. City Notification**:** At least 72 hours in advance of closing, or partially closing, any street, alley, or other public thoroughfare, the Contractor shall notify the Engineering Division of the Public Services Department, and immediately notify the same agencies of the reopening.

C. Customer Notification**:** The City of St Pete Beach residents occupying a home on the street to be milled and paved shall be notified seven (7) days before the construction of the street begins. This is completed by the following:

1. A door hanger notice will be provided by the Department of Public Services. It shall contain the reason for the construction, the overall length of time with dates, any problems that may be encountered and other important information regarding the project. The Contractor is responsible for the installation of the door hanger notices no later than seven (7) working days before the construction of the street begins.

2. The Contractor shall hand this notice to each resident. If the resident is not available, the Contractor is to place the door hanger on the doorknob. In certain sensitive areas, usually business areas and as requested by the Engineer, each customer may be asked to sign a signature sheet with their name, address, and signature. The original shall be given to the Department of Public Services before any construction commences.

D. Utility Emergency Access**:** All fire hydrants, valves, water meters and backflow assemblies shall be free of all construction material and equipment and in plain view for easy emergency access or necessary maintenance by the City crews.

E. Pedestrian or School Crossings**:** Where the work crosses or interferes with school or pedestrian crossings, extreme care shall be taken by the Contractor to insure the safety of the school children or other pedestrians.

F. Temporary Staging Areas**:** The Contractor shall obtain all temporary construction staging areas approvals required and shall not encroach onto private property unless a written agreement has been made between the property owner and the Contractor; or onto public property unless a written agreement has been made and approval by the Purchasing Division's designee has been received prior to using the land. The Contractor shall assume full responsibility for the protection and safekeeping of materials stored at the staging areas.

G. Erosion Control**:** Prior to construction, all efforts for siltation/erosion control will be taken, including the use of turbidity screens, hay bales, and sod replacement at the earliest possible time prior to and after excavation/grading. Sediment/erosion controls should be used around drainage structures and any areas to mitigate erosion on or off the project site. The Contractor is responsible for any removal of asphalt debris in manholes or drainage structures.

H. Road Hauling**:** The existing paved roads in the City shall be used for transporting material required for construction of the project. The Contractor should be aware that any road that is damaged during construction due to truck/equipment involvement would be the responsibility of the Contractor to correct. The Contractor shall contact the City for specific routes to be used during construction.

I. Water on Street**:** All water shall be removed, and the streets dry prior to paving. No paving shall take place during a rainstorm event.

J. Towing of Vehicles**:** The City will remove any cars parked in the way of the resurfacing project as long as proper notification has been given as stated under Section 13.c. (above) of the Scope of Work.

K. Clippings**:** Where grass, tree roots or other vegetation has grown over or above the edge of the asphalt, it shall be removed to the existing edge of asphalt by the Contractor prior to paving the street.

L. City Utilities**:** If work by the Contractor results in damage to City owned utilities; the Contractor shall repair the damage immediately at no cost to the City. If the Contractor does not respond immediately to repair the damaged utility, the City Utilities Department will make the repair and bill the Contractor for the costs incurred.

M. Dumpsters**:** The City will relocate all dumpsters in the way of this project. The Contractor is to provide written notice to the City forty-eight (48) hours in advance when said dumpsters need to be moved.

N. Disturbed Areas**:** All areas disturbed by the construction shall be restored to a condition at least equal to the pre-construction conditions or to what shall be approved by the Project Manager.

O. Security**:** The Contractor shall be responsible for the site security and shall determine whether full time watchmen will be required. The Contractor shall inspect the area daily and take whatever measures necessary to protect the safety of the public, workmen and materials both day and night.

P. Brick/Driveways**:** The Contractor shall be responsible for the tack coat not being spread to the brick crosswalks, brick intersections, brick speed tables, driveways or other similar areas due to the hauling of the asphalt. These areas shall be covered with sand or other City approved material. If tack appears on these items from the Contract, it shall be the responsibility of the Contractor to remove it.

Q. Interference with Others**:** The Contractor shall coordinate with Pinellas Suncoast Transit Authority or any public agency to notify the agency of any and all potential disruption in service. The Contractor shall not interfere with materials, appliances, or workmen of the City, Private Utility Companies, or any other contractor, who may be performing work at the same sites. All contractors and other parties involved shall have equal rights as far as practicable, to the use of all roads and grounds, except as otherwise provided by these specifications. The decision of the Project Manager shall govern in cases of disagreement between contractors or other parties regarding such use.

R. Public Safety**:** The Contractor shall provide, erect, and maintain continually, seven days per week and twenty-four hours per day, all necessary barricades, reflectorized signs, signals, flashing lights, red lights, "danger" or "caution" or "street closed" signs, etc., and take all necessary precautions necessary for the protection of the work and the safety of the public. The Contractor shall also provide a watchman at all places where the work causes obstructions to normal traffic or constitutes in any way a hazard to the public.

S. Cleaning Up**:** The Contractor shall always keep the construction area clean from accumulation of waste material or rubbish, including storage areas. The Contractor shall remove any rubbish, tools, scaffolding, equipment and materials from and about the premises, which do not belong to the City, prior to completion of the work. The Contractor shall leave the work and premises, following the completion of work, in a clean and workmanlike condition satisfactory to the Project Manager or their representative.

T. Coordination of Details with the County Sheriff**:** Any traffic detour plan must be submitted by the Contractor for approval to the Engineer of Record, the Engineering Division of the Public Services Department and the Pinellas County Sheriff at least two (2) weeks prior to the implementation of said detour in order to provide adequate time for review. Detour plans must include all streets involved in the detour.

U. Maintaining Proper Drainage Flow**:** No drainage structure or paved waterway shall be blocked by the new pavement work. New pavement shall be feathered or tapered towards the inlet opening. This task is to be included as part of the paving operation and there shall be no separate payment for this work. Any debris entering the drainage structure during construction is to be removed by the Contractor.

V. Responsibility of the Contractor**:** The Contractor shall be entirely responsible and liable for all damage or injury as a result of his operations to all other adjacent public and private property, structures of any kind and appurtenances thereto met with during the progress of the work. The cost of protection, replacement in their original locations and conditions or payment of damages for injuries to such adjacent public and private property and structures affected by the work, whether or not shown on the drawings and the removal, relocation and reconstruction of such items called for on the drawings or specified shall be included in the various Contract Items and no separate payments shall be made thereof. Where such public and private property, structures of any kind and appurtenances thereto are not shown on the drawings and when, in the opinion of the Project Manager to avoid interference with the work, payment therefore will be made as provided for extra work in the Agreement. The Contractor is expressly advised that the protection of the buildings, structures, tanks, pipelines, and related work adjacent and in the vicinity of his operations, wherever they may be, is solely his responsibility.

W. Protection of Trees, Lawn & Sod**:** All trees, shrubs and sod shall be adequately protected by and in accordance with all ordinances governing the protection of the trees. No materials shall be placed so as to injure such trees, shrubs and sod. Trees, shrubs and sod destroyed by negligence of the Contractor or his employees shall be replaced by him with new stock of similar size and age, at its proper season and at the sole expense of the Contractor. Trees close to the work shall be protected against injury. The Contractor shall trim all branches and roots in the road that are necessary to complete the project and are liable to damage his operations, but in no case shall any tree be cut or removed without prior notification of the Project Manager. It is the Contractor's responsibility to inspect all roads that are to be milled and resurfaced. All injuries to bark, trunk, limbs, and roots of trees shall be repaired by dressing, cutting, and painting according to approved methods, using only approved tools and materials under the direction of City Staff. Lawn areas shall be left in good condition as before the starting of the work. Where sod has been removed shall be restored with new sod in a good workmanship manner approved by the resident or the Project Manager. The sod shall match existing grass and shall have no visible broad leaf weeds or foreign grasses. Water for the sod shall be supplied by the Contractor in sufficient quantities required to keep the grassed areas moist for a period of one month from the date of installation. The Contractor shall guarantee the satisfactory growth for a 90-day period.

X. Noise**:** The Contractor shall eliminate noise to as great an extent as practicable at all times. Air compressing equipment shall be equipped with silencers and the exhaust of all gasoline motors or other power equipment shall be provided with mufflers. In the vicinity of hospitals and schools, special care shall be used to avoid noise or other nuisances. The Contractor shall strictly observe all local regulations and ordinances covering noise.

Y. Access to Public Services**:** No materials used in the construction of the work shall be placed as to prevent free access to all fire hydrants, valves, manholes, driveways and roadways.

14. SUBSTITUTIONS

Whenever material or equipment are specified or described in the Contract documents by using the name of a proprietary item or the name of a particular supplier the naming of the item is intended to establish the type, function and quality required. Unless the name is followed by words indicating that no substitution is permitted, materials or equipment of other suppliers may be accepted by Project Manager if sufficient information is submitted by Contractor to allow Project Manager to determine that the material or equipment proposed is an approved alternate to that named. The procedure for review by the Project Manager will include the following as supplemented in the General Requirements. Requests for review of substitute items of material and equipment will not be accepted by Project Manager from anyone other than Contractor. If Contractor wishes to furnish or use a substitute item of material or equipment, Contractor shall make written application to Project Manager for acceptance thereof, certifying that the proposed substitute will perform adequately the functions and achieve the results called for by the general design, be similar and an approved alternate to that specified and be suited to the same use as that specified. The application will state that the evaluation and acceptance of the proposed substitute will not prejudice Contractor's achievement of Substantial Completion on time, whether or not acceptance of the substitute for use in the work will require a change in any of the contract documents (or in the provisions of any other direct contract with City for work on the Project) to adapt the design to the proposed work is subject to payment of any license fee or royalty. All variations of the proposed substitute from that specified will be identified in the application and available maintenance, repair and replacement service will be indicated. The application will also contain an itemized estimate of all costs that will result directly or indirectly from acceptance of such substitute, including costs of redesign and claims of other Contractors; affected by the resulting change, all of which shall be considered by Project Manager in evaluating the proposed substitute. The Project Manager may require Contractor to furnish at Contractor's expense additional data about the proposed substitute.

15. MINIMUM QUALIFICATIONS

The City has established minimum qualifications for Contractor expertise and experience regarding the subject project as follows:

A. The Contractor must provide a minimum of three (3) project references and may provide a maximum of five (5) project references for each of the five (5) criteria listed below.

B. Each project reference must have been successfully completed in the ten (10) years preceding the bid opening.

C. All criteria do not need to be satisfied by each submitted project reference, however, all criteria must have been satisfied two (2) times by the submitted project references.

D. Any project for which references are provided may have been self-performed with Contractor’s employees or performed by a subcontractor who is part of the Contractor’s team for this project.

E. The Contractor qualification requirements include the following:

1. Construction of site work including clearing, grubbing, and fine grading.
2. Construction of flexible and rigid pavement roadways, alleys, and trails.
3. Construction of sidewalk and ADA accessibility improvements.
4. Construction of stormwater utility upgrades.

5. Construction of signal, lighting, and intelligent transportation system (ITS) component upgrades.

[END OF PART I]

PART II: PROGRESS MEETINGS

1. **FREQUENCY**

Progress meetings will be held every other week or less, with the first meeting fourteen (14) days after the pre-construction meeting or fourteen (14) days or less after the date of the Notice to Proceed.

The City has the right to hold called meetings as required by the progress of the work.

2. **ATTENDANCE**

The following people should attend progress meetings, as applicable:

- Project Manager
- City Inspector Contractor
- Subcontractors as appropriate to the Agenda Suppliers as appropriate to the Agenda Others as appropriate

3. **PROGRESS SCHEDULE**

The Contractor shall submit a detailed schedule before work is to be started. It shall indicate the sequence of the work, the time of starting and completing each part.

4. **SUGGESTED AGENDA**

- Review approval of minutes of previous meetings. Review of work progress.

Field observations, problems, and conflicts. Problems which impede the construction schedule. Review of off-site fabrication, delivery schedules.

- Corrective measures and procedures to regain projected schedule, if necessary. Revisions to construction schedule.
- Progress schedule during succeeding work period. Coordination of schedules.
- Review submittal -- expedite as required. Maintenance of quality standards.
- Pending changes and substitutions. Shop drawing submittals.
- Review proposed changes for:
  Effect on construction schedule and on completion date. Effect on other contracts of the project.
  Other business

[END OF PART II]

***P*ART III: TECHNICAL SPECIFICATIONS**

1. GENERAL

Furnish all necessary labor, equipment, and materials to construct various types of public services infrastructure projects as outlined in Part I General Requirements, 1. Introduction.

Tasks may involve milling existing asphaltic concrete surfaces to specified depths. Excess milled material should be transported to an asphalt reprocessing plant. The streets specified should be surfaced with Superpave asphaltic concrete mix. Additionally, tasks include necessary adjustments or replacements of existing structures, traffic control, sweeping, cleanup, placement of painted and thermoplastic pavement markings, and installation of curb, gutter, and sidewalks.

2. MOBILIZATION

A. The Contractor is solely responsible for providing security for all materials stored on- site during the construction activities.
B. The Contractor shall provide ten (10) calendar days notification to the Engineer prior to initiating mobilization to the site and initiating work. The Contractor will also provide copies of all permits that have been obtained to the engineer prior to initiating work associated with such permits.
C. The Contractor shall restrict their operations to the designated work area and ensure that construction activities do not disrupt normal operational activities of the City's services.

D. The Contractor is responsible for visually inspecting the site to note obstructions or access difficulties.

E. The Contractor is responsible for providing and/or maintaining access to the work site to facilitate all construction, inspection and testing activities.

F. The contractor shall deliver/post notifications to affected citizens and business owners seven (7) calendar days prior to construction. A form of the notification must be approved by the City prior to distribution.

3. MILLING

A. Furnish all necessary labor, equipment and materials to mill pavements as specified, and haul the milled material to the reprocessing plant.

B. The methods used for milling shall meet all applicable portions of Section 327 - Milling of Existing Asphalt Pavement, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
C. All manhole castings and water valve boxes shall be adjusted and/or replaced by the Contractor, as specified, after milling is completed.

D. When the full street is required by these documents to be milled, the desired finished cross slope is to be 2%.

E. The unit price per square yard (SY) shall be full compensation for all work required to perform the milling, loading, hauling, sweeping, clean-up, and all incidentals necessary to complete the work specified in this section.

F. Milling of existing asphalt speed humps and speed tables is required as specified in the plans.

4. CONCRETE CURB AND GUTTER (INSTALLATION)

A. All Concrete Curb and Gutter work shall conform to the requirements of Section 520, "Concrete Gutter, Curb elements and Traffic Separator," of the FDOT Standard Specifications and placed in conformity with the lines, grades, dimensions and notes shown in the contract plans.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of the concrete being deposited against them. They shall be straight and free from warp or bends and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of a cross-section approved by the Project Manager and shall have a flat surface on top. The Contractor shall use flexible forms for all curb and gutter constructed on a radius.

C. Excavation shall be to the required depth, and the foundation material upon which these items are to be placed shall be compacted as specified in Section 120-9, "Compaction Requirements" of the FDOT Standard Specifications.

D. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated, and sufficient mortar brought to the surface. The top of the section shall be floated smooth, and its edges rounded to the radius shown on the plans. No concrete shall be placed during unfavorable weather conditions.

E. Except for machine placed concrete, at the option of the Contractor, joints may be formed by the use of dummy joints (either formed or sawed) or by the use of sheet metal templates. If sheet metal templates are used, they shall be at least as long as the depth of the curb section. They shall be set perpendicular to the top and face of the curb form and shall be held firmly in place during the placing of concrete. Templates shall remain in place until the concrete has set sufficiently to hold its shape, but shall be removed while the forms are still in place.

For machine placed concrete, unless an alternate method is approved by the Project Manager, contraction joints shall be sawed. The joints shall be sawed as soon as the concrete has hardened to the degree that excessive raveling will not occur and before uncontrolled shrinkage cracking begins.

Contraction joints shall be spaced at intervals of ten feet (10') except where a lesser interval is required for closure, but no section shall be less than four feet (4') in length. On medians and traffic separators, cuts shall align across from each other. Cuts shall also align with contraction joints of sidewalks adjacent to the curb.

Expansion joints shall be constructed at all structures, at all ends of curb returns, except that expansion joints shall not be constructed within twenty (20) feet of an island nose. They shall be located at intervals of 500 feet between other expansion joints or ends of a run. The expansion joint filler shall be ½ inch in width and shaped to the cross section of the curb.

F. The forms shall be removed within twenty-four (24) hours after the concrete has been placed, and minor defects then filled with mortar composed of one part of Portland cement and two parts of fine aggregate. Plastering will not be permitted on the face of the curb or the gutter. Any rejected curb and gutter shall be removed and replaced at no additional cost to the City. All exposed surfaces shall be given a brush finish while the concrete is still green. For any surface areas, however, which are too rough or where other surface defects make additional finishing necessary, the Project Manager may require that the curb be rubbed to a smooth

surface with a soft brick or wood block, with water used liberally. Also, if necessary further to provide a suitable surface, the Project Manager may require additional rubbing, using a thin grout or mortar, either of which additional rubbing shall be at no additional cost to the City.

G. When surface finishing is completed, the curb and gutter shall be cured per applicable paragraphs of Section 520-8, of the FDOT Standard Specifications.

H. After the concrete has set sufficiently, but not later than three (3) days after pouring, the spaces in front and back of the curb and gutter sections shall be refilled to the required elevation, with suitable material, adequately compacted. In sections where sidewalk is to abut the curb, the backfill shall be placed and compacted to a suitable depth for the placing of sidewalk forms. In all other sections of the work, the back of the curb shall be backfilled to the required elevation with suitable material, which shall be placed and thoroughly compacted in layers of not more than six inches (6") in thickness.

I. Where a base is to be constructed adjacent to a curb and gutter, the curb and gutter shall be properly backfilled and shall set for a period of not less than seven (7) days before any base material is placed against it.

J. The top and face of the finished curb and gutter shall be true and straight, and the top surface of curbs shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top or face of the curb or on the surface of gutters, the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

K. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per linear foot (LF) for constructing concrete curb, curb and gutter, or valley gutter, complete in place and accepted, and no additional compensation will be allowed therefore.

5. CONCRETE SIDEWALKS (INSTALLATION)

A. All Concrete Sidewalk work shall conform to the requirements of Section 522, "Concrete Sidewalks and Driveways", of the FDOT Standard Specifications and these Special Provisions and placed in conformity where so ordered by the Project Manager.

B. Forms for this work shall be made of either wood or metal and shall have a depth at least equal to the Plan vertical dimensions for the depth of concrete being deposited against them. They shall be straight, free from warp or bends, and of sufficient strength and rigidity, when staked, to resist the pressure of the concrete without deviation from line and grade. If wooden forms are used, they shall be of cross-section approved by the Project Engineer and shall have a flat surface on top. The Contractor shall use flexible forms for all headers constructed on a radius.

C. Tree roots within the sidewalk area shall be removed to a minimum depth of one foot (1') below the specified subgrade surface. If a contractor must cut tree roots, sharp cuts shall be made. All roots greater than 2” shall be cut clean with a hand saw. The contractor shall hand dig near the roots and saw the roots, heavy mechanical equipment shall not be used. Broken roots shall be sawed 2” behind the ragged end. Roots smaller than 2” may be cut with a sharp-edged hand tool. Crushed or torn roots are more likely to allow decay. Sharply cut roots produce a flush of new roots helping the tree to recover from its injury. If tree roots larger than 6” must be cut, the Contractor shall inform the City Engineer or his representative prior to cutting for field direction. All boulders, organic material, soft clay, spongy material and any

other objectionable material shall be removed and replaced with material approved by the Engineer.

Before placing the forms for sidewalks, the surface upon which they are to be built shall be brought to the specified line, grade and elevation and uniformly compacted to a minimum 85 percent of AASHTO T-99 density. The materials shall be compacted at a moisture content such that the specified density can be uniformly attained. If necessary to attain the specified density, water shall be added to the material, or the moisture content shall be lowered by manipulation or allowing the material to dry, as is appropriate.

Fill areas including cut areas under the sidewalk which have been excavated more than six inches (6") below the bottom of sidewalk shall be compacted to a minimum of 95 percent of AASHTO T-99 density. The area to be compacted is defined as that area directly under the sidewalk and one foot (1') beyond each side of the sidewalk when right-of-way allows.

D. Transverse expansion joints shall be placed at intervals not exceeding eighty feet (80'), and at all places where a walk intersects or abuts a curb, driveway, building, other sidewalk or fixed objects. Expansion joints shall be constructed at each side of structures and at ends of curb returns, except that expansion joints shall not be constructed within twenty feet (20') of an island nose. Expansion joints shall be filled with ½ inch thick premolded joint filler conforming to the provisions in Section 932 of the Standard Specifications. The joint filler shall be shaped to the cross section of the sidewalk, shall extend from the surface to the subgrade, and shall be at right angles to the sidewalk surface.

   Contraction joints shall be sawed and shall be at intervals of four (4) to six (6) feet, or as shown on the plans. A slot approximately 3/16 inches wide and not less than 1 ½ inches deep shall be cut with a concrete saw after the concrete has set, and within twenty-four (24) hours of concrete being poured. Open type joints shall not be allowed.

E. Just prior to placing the concrete, the subgrade shall be moistened. The concrete shall be placed in the forms and tamped and spaded in place so that all honeycombs will be eliminated and sufficient mortar brought to the surface. Thereafter, the surface shall be brought to a smooth even finish by means of a wooden float. No concrete shall be poured during unfavorable weather conditions.

F. The concrete shall be given a broom finish. The top of the finished sidewalk shall be true and straight, and the top surface of sidewalks shall be uniform width, free from humps, sags, or other irregularities. When a straightedge ten feet (10') long is laid on the top of the sidewalk the surface shall not vary more than 0.01 foot from the edge of the straightedge, except at grade changes or curves.

G. When surface finishing is completed, the sidewalk shall be cured per applicable paragraphs of Section 520-8, of the Standard Specifications. After concrete has set sufficiently, but no later than three (3) calendar days after pouring, the space alongside the sidewalk shall be backfilled, compacted and sodded or seeded as shown on the striping plans.

H. Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per Square Yard for constructing sidewalks, complete in place and accepted, and no additional compensation will be allowed therefore.

6. LEVELING/RESURFACING

A. **Material:**

1. The material used for leveling shall be Superpave asphaltic concrete.

2. The material used for resurfacing shall be Superpave asphaltic concrete. Friction Course mixes may be used as specified by the City Project Manager.

B. **Construction Requirements:**

1. The leveling and resurfacing shall commence within three (3) working days after the milling of each street. The time limit for streets where castings or other water valve boxes need to be adjusted or replaced will be three (3) working days after the casting or water valve box has been adjusted or replaced.

2. The methods used for re-paving shall meet all applicable portions of Section 330 - Hot Mix Asphalt General Construction Requirements, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.
3. The Contractor shall contact all utility and TV cable companies for location of their facilities. The exact location of their facilities, type of material used by the utility and TV cable, etc. shall be determined by the Contractor prior to any excavation work required by this Contract.

4. The Contractor shall be responsible for the protection of all pavements, sidewalks, and other improvements within the work area. All damage to such improvements, as a result of the Contractor's operations, beyond the limits of the work of pavement replacement as described herein, shall be repaired by the Contractor at the Contractor's expense.

5. Testing by City: Testing may be completed by an independent testing laboratory. If core borings are done to determine thickness and density, the Contractor is responsible for filling these holes in the pavement.

C. **Quality Control:**

1. The Contractor shall have a Quality Control Technician who has been certified by the State of Florida Department of Transportation as a Certified Asphalt Plant Technician, available at the asphalt plant at all times the Contractor is producing asphalt mix for use on this project.

2. The Contractor's quality control procedures, inspection and tests shall be documented, and that information shall be available for review by the Project Manager or his representative, throughout the course of the Contract.

3. The mix design shall meet the requirements of Section 334-3.2 for the type of Superpave asphalt indicated in the plans as set forth in Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. Friction course asphalt concrete must meet the requirements of Section 337 for the type of friction course indicated in the plans. Submit a Notarized Certification of Specification Compliance letter on company letterhead to the Engineer stating that all material produced and placed on the project was in substantial compliance with the specifications. The City may run independent tests during the project to determine the acceptability of the material.

7. UTILITY ADJUSTMENTS & REPLACEMENTS

A. **Adjusting Existing City Valve Boxes:**

1. The Contractor is to provide the necessary equipment to adjust the castings without damaging the existing structure. Adjustment would include being able to screw the top portion of the valve box up or down. Water valves that cannot be adjusted either up or down must be replaced under Section 6.2. If the structure is damaged, the Contractor is to replace the structure to its original condition at their cost.

2. The materials and construction methods for this work shall conform to applicable portions of Section 425 Inlets, Manholes and Junction Boxes, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision.

3. The quantities to be paid for under this section shall be for the number of valve boxes, adjusted physically.

4. Structures, sections of structures, valve box sections or other items necessary for adjustment that are considered debris and that has been removed by the Contractor as part of the progress of work shall be removed from the project site by the Contractor at the end of each day's work. The Contractor is to remove all debris deposited in the structure as a result of the work performed.

B. **Castings:**

1. The Contractor shall notify the Project Manager or his representative on any questions regarding the prior adjustment or replacement of manhole frames or valve boxes.

2. Manhole frame and covers and valve boxes to be replaced are to be furnished by the Contractor.

3. Castings damaged by construction shall be replaced at no additional cost to the City of St Pete Beach.
4. All castings shall be adjusted and replaced in accordance with the manufacturers recommended requirements.

5. Adjusted or replaced castings shall be set at the grade of the proposed asphalt after compaction with not more than ¼" variation in 10 feet.

8. STRIPING AND MARKINGS

A. **Temporary Striping**: Temporary traffic stripes and markings will be required. Temporary markings shall be placed immediately after milling on any arterial/collector roads or within the immediate proximity of a school, and immediately after final asphalt on all roads. Before opening any re-paved area to traffic, temporary markings shall be applied as specified by the Project Manager. The paint used for this work shall be in accordance with the FDOT specification.

B. **Permanent Striping**: The Contractor shall place permanent traffic stripes and markings in accordance with reference points and alignment gathered by the Contractor prior to milling or overlay or in accordance with striping plans provided by the City of St Pete Beach. The Contractor shall use an Alkyd/Maleic thermoplastic compound and application methods meeting the requirements of Section 711 – Thermoplastic Pavement Markings, Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision. The thermoplastic compound shall be extruded on the pavement surface in a molten state by mechanical means with surface application of glass spheres, and upon cooling

to ambient pavement temperature shall produce an adherent pavement marking of the specified thickness and width and capable of resisting deformation.

C. A minimum of 21 days curing time after asphalt placement shall be allowed before the placement of any thermoplastic marking commences, with all thermoplastic markings to be completed within 28 days after asphalt placement.

D. The color of the thermoplastic shall be white, yellow, or blue as specified by the M.U.T.C.D.; and revisions thereof.

9. CLEANUP AND DUST CONTROL

A. The Contractor shall furnish and operate a minimum of one (1) mechanical sweeper for the purpose of removal of loose milled material. After milling and before resurfacing, the Contractor shall water the streets as necessary to prevent dust nuisance from his operations or from traffic.

B. Upon completion of the work on each street and before acceptance, the Contractor shall remove all surplus and discard materials and rubbish; shall restore in an acceptable manner all property, both public and private, which has been damaged during the prosecution of the work and shall leave each street in a neat and presentable condition throughout the entire length of the work under Contract. This shall include, but not be limited to the overspray of tack, and shall be completed within one (1) week after the resurfacing of each street.

C. Failure of the Contractor to comply with the Project Manager cleanup orders may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

D. 5% of the value of the work performed may be retained, should at the opinion of the City, restoration not be completed.

E. The cost of all work regarding Cleanup and Dust Control shall be included in the prices for other pay items, which are included in the Contract.

F. The Contractor shall reflect in the schedule, which shall be approved prior to construction, the time required for complete restoration. The Contractor shall strictly adhere to the schedule.

G. The Contractor shall take the necessary measures to prevent siltation and other construction related materials including tack coatings from entering storm inlet structures and manhole structures during the road repaving operation.

10. TRAFFIC CONTROL, STREET CLOSURES, DETOURS AND BARRICADES

A. The Contractor shall comply with all applicable portions of Section 102 – Maintenance of Traffic – Florida Department of Transportation Standard Specifications for Road and Bridge Construction, latest revision, and City requirements for traffic control.

B. The Contractor shall furnish all necessary barriers, lights, signs, and flag persons, to advise the public of detours and construction hazards. All flag persons on site shall be properly qualified.

C. The Contractor shall be responsible for compliance with additional public safety requirements, which may be ordered by the Project Manager or his authorized representative.

D. Failure of the Contractor to comply with the public safety requirements may result in an order to suspend work until the condition is corrected. No additional compensation will be allowed as a result of such suspension.

E. The Contractor shall furnish and install, and upon completion of the work, promptly remove all signs and warning devices.

11. SODDING

A. **Description:** All sodding shall conform to the requirements of Section 570, FDOT Manual on Road and Bridge Construction, latest revision.

B. **Materials:**

1. **Sod:** Sod shall be Argentine Bahia as determined by the Project Engineer. Where sodding will adjoin, or be in sufficiently close proximity to, private lawns, other types of sod may be used if desired by the affected property owners and approved by the Project Engineer. The sod shall be taken up in commercial-size rectangles, preferably 12-inch by 24-inch or larger. Maximum allowable deviation from the standard widths and lengths shall be five percent (5%). Broken pads and torn or uneven ends will not be acceptable. The sod shall be sufficiently thick to secure a dense stand of live grass. The sod shall be live, fresh and uninjured, at the time of planting. It shall have a uniform soil thickness of three-fourths inch (3/4"), plus or minus one-fourth inch (1/4"), at the time of cutting. Measurement for thickness shall exclude top growth and thatch. The soil mat shall adhere firmly to the roots such that it will not break, crumble, or tear during handling and placing. No muck or heavy peat soil grown sod will be accepted. All sod shall be 97% free of weeds and other grasses. All sod shall comply with State and Federal laws with respect to inspection for plant diseases and insect infestation. An inspection certificate, required by law, may be requested by the Project Engineer for each shipment. All sod shall be placed as soon as possible after being dug and shall be shaded and kept moist from the time it is dug until it is planted. No sod which has been cut for more than 48 hours may be used unless specifically authorized by the Project Engineer.

2. **Commercial Fertilizer:** All commercial fertilizers shall comply with the State fertilizer laws. All fertilizers shall be uniform in composition, free flowing and suitable for application by mechanical spreader equipment. The chemical designation of the fertilizer shall be 12-8-8 or equivalent ratio. At least 50% of the phosphoric acid shall be from normal super phosphate or an equivalent source which will provide a minimum of two units of sulfur. The amount of sulfur shall be indicated on the quantitative analysis card attached to each bag or other container.

3. **Water:** The water may be obtained from any approved spring, pond, lake, stream or municipal water system. The water shall be free of excessive and harmful chemicals, acids, alkalies, or any substance which might be harmful to plant growth or obnoxious to traffic. Salt water shall not be used. The Contractor shall pay for all water used for the installation of sod.

C. **Construction Methods:**

1. **Soil Moisture:** Rough and fine grading shall be carefully executed to ensure that the final placed sod will conform to existing grades, free of depressions, “bird baths” or

bumps. The area on which sod is to be placed shall contain sufficient moisture for optimum results. During periods of high temperature and after all unevenness in the soil surface has been corrected, the soil shall be lightly irrigated immediately prior to laying the sod. Muddy soil shall not be created.

2. **Placing Sod:** The first row of sod shall be laid in a straight line with subsequent rows placed parallel to and tightly against each other. Lateral joints shall be staggered to promote more uniform growth and strength. Care shall be exercised to ensure that the sod is not stretched or overlapped and that all joints are butted tight in order to prevent voids which would cause air drying of the roots. The sod shall form a solid mass. The sod shall be firmly embedded by light tampering and rolling to ensure contact with the subgrade and to provide a smooth, even surface to eliminate voids under the root system making dry spots. The sod shall be staked on all slopes of 2:1 or steeper with pegs or similar material, driven through the sod blocks, six inches (6") into firm earth at suitable intervals.

3. **Watering:** The sod shall be watered with a fine spray immediately after placing, such that the underside of the new sod pad and soil immediately below the sod are thoroughly wet. The sod shall be kept in moist condition for the duration of the contract period (and in no case less than 4 weeks except in dry season it shall be 8 weeks). The moistened condition shall extend to at least to the full depth of the rooting zone. Water shall not be applied between the hours of 10:00 a.m. and 6:00 p.m.

D. **Maintenance:** The Contractor shall, at no additional expense to the City, maintain the sodded areas in a satisfactory condition until final acceptance of the project. Such maintenance shall include the filling, leveling, and repairing of any washed or eroded areas, as deemed necessary by the Project Engineer. The Project Engineer, at any time, may require resodding of any areas in which the establishment of the grass stand does not appear to be developing satisfactorily. The Contractor shall mow lawns as soon as there is enough top growth to cut with mower set at height of two inches (2") and shall repeat mowing as required throughout the duration of the project, to maintain such height. The Contractor shall not delay mowing until grass blades bend over and become matted and shall not mow when grass is wet.

E. **Measurement and Payment:** Full compensation for conforming to the requirements of this Section shall be considered as included in the unit price paid per square yard (SY) for furnishing, placing, maintaining and replacing sod, complete in place and accepted, and no additional compensation will be allowed therefore.

[END OF PART III]

SECTION 01425
FDOT STANDARDS REFERENCE

PART 1 GENERAL

1.01 Section Includes

Instruction on the use and applicability of FDOT standards on the project

1.02 Requirements

A. The Florida Department of Transportation, Standard Specifications for Road and Bridge Construction, latest non-metric edition ("Standard Specifications"), and Standard Plans for Road Construction, latest non-metric edition ("Standard Plans") are referenced herein as source documents for applicable technical specifications and construction details to be used in the construction of this project. The term “latest edition” refers to the latest edition implemented by FDOT and includes all FDOT implemented supplements at the time of bid advertisement.

B. Method of Measurement and Basis of Payment is to be in accordance with the Florida Department of Transportation Standard Specifications. Any item which is detailed in the Plans and for which material types, sizes and quality are also called out, the "Standard Plans" shall take preference over the plan detail unless otherwise directed by the Engineer.

C. Where the FDOT Standard Specifications use the reference "Department", replace "Department" with "Owner", except for when such reference is to Department Standards and evaluation criteria.

D. The Standard Plans are referenced herein as a source document for applicable construction items and details called for in the plans for which a specific plan detail is not provided. The Contractor shall construct the items called for in the plans in accordance with the "Standard Plans" unless otherwise defined or detailed in the plans or as directed by the Owner, Engineer or authorized representative.

E. The Standard Plans are available for download from the FDOT website at: https://www.fdot.gov/design/standardplans

F. In case of conflict, the Technical Specifications takes precedence over FDOT specifications for a particular construction requirement.

G. Copies of the latest implemented edition and implemented supplements of the Florida Department of Transportation Standard Specifications are available for download from the FDOT website at: https://www.fdot.gov/programmanagement/Implemented/SpecBooks

H. The Contractor shall inform the Owner and Engineer in writing of any specification that the Contractor feels is ambiguous or conflicting with other plan notes and details prior to the construction of the associated item. The Engineer will determine which information is to be used for construction. The Contractor is responsible for the removal and replacement of any item improperly constructed resulting from a misinterpretation of the specifications at no additional cost to the Owner.

PART 2 PRODUCTS - Not Used

PART 3 EXECUTION

3.01 General

The Contractor shall use Divisions Two (II) and Three (III) of the FDOT Specifications as they relate to methods of construction and material types and quality for the appropriate construction items contained within this project.

END OF SECTION

III. BID FORM

See attached Excel document.

IV. GENERAL CONTRACT TERMS

REQUEST FOR PROPOSALS
Civil On Call Construction Services

REQUEST FOR PROPOSAL SUMMARY
The City of St Pete Beach has issued this Request for Proposal (RFP) to solicit competitive bids and proposals from Proposers for a Task Work Order driven Civil On-Call Construction Services Contract. The successful bidder shall provide all labor, materials, equipment, tools, consumables, transportation, and incidentals to provide Public Services capital improvement projects construction services on an 'as needed' basis for the City of St Pete Beach.

The "City" intends to **award multiple contracts** to vendors who can provide the best value for services. Vendors may submit proposals for all, some, or only one of the requested line items or categories. **It is not mandatory to submit a proposal for every item listed**. A bidder may bid on any, all, or none of the items. The "City" reserves the right to select multiple vendors to optimize cost-efficiency and capability across different segments of the project. Proposals will be evaluated based on capability, cost, and capacity to perform the specific line items requested.

PROPOSAL SUBMITTALS
Proposal documents must include a signed/notarized Contractor's Proposal Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit electronic proposals only. Bidders must submit electronically only through Bonfire platform. When bidding electronically, only one copy should be submitted.

Proposals shall include the following:

- A signed and notarized Proposer's Contract Proposal.
- Current proof of insurance certificate.
- A list of references and minimum qualifications as outlined in Section V.
- One copy of bid electronically submitted to Bonfire platform.

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http://www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

Proposers or persons wishing to submit a proposal on this project shall be licensed, and insured in accordance with the City's requirements

The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals, or accept any proposal or part thereof deemed to be in the best interests to the City of St. Pete Beach.

Electronic proposals must be submitted by **9:00 AM on April 08, 2026 (Deadline),** clearly marked as: **"Civil On Call Construction Services."**

PRE-PROPOSAL MEETING
An optional pre-proposal meeting will be held on **March 18, 2026 at 10:00 AM EST** via Microsoft Teams conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS
No oral interpretations will be made to any firms as to the meaning of the scope of work or any other

contract documents included in this **RFP.** All questions pertaining to the terms and conditions or scope of work of this Request for Proposal **(RFP)** must be sent in writing via email only to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 AM EST on March 25, 2026.** Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFP**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFP** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so. If the Proposer discovered the opportunity through the online platform (Bonfire), do not submit questions through these platforms. **Only questions emailed directly to the City Procurement Manager will be answered.**

BEGINNING DATE
The Proposer shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Proposer shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City.

COMPLETION OF WORK
The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". This will be a three (3) year initial contract with the option to be extended for two (2) additional one (1) year periods upon mutual consent of both parties. It is the intent of the City of St Pete Beach to award these services to more than one Contractor/Vendor.

COSTS INCURRED BY PROPOSERS
All expenses involved with the preparation and submission of proposals to the City, or any work performed in connection therewith, shall be borne solely by the Proposers. No payment will be made for any responses received or for any other effort required of or made by; the Proposer's prior to contract commencement.

ORAL PRESENTATION
The City may require an oral presentation of the proposal at the Evaluation Committee's discretion. This could also include a formal interview of any and all members of the Proposer's contract management staff.

CONFLICT OF INTEREST
The Proposer represents that it presently has no interest and shall acquire no interest, either direct or indirect, which would conflict in any manner with the performance or services required hereunder, as provided for in FL Stat. 112.311. The Proposer further represents that no person having any interest shall be employed for said performance.

The Proposer shall promptly notify the City's representative, in writing, by certified mail, of all potential conflicts of interest for any prospective business association, interest, or other circumstance, which may influence or appear to influence the contractor's judgment or quality of services being provided hereunder. Such written notification shall identify the prospective business association, interest or circumstance, the nature of work that the Proposer may undertake and request an opinion of the city as to whether the association, interest or circumstance would, in the opinion of the City, constitute a conflict of interest if entered into by the Proposer. The City agrees to notify the Proposer of its opinion by certified mail within thirty days of receipt of notification by the Proposer.

LATE PROPOSAL OR MODIFICATIONS
Modifications in writing received prior to the time set for the proposal submittal will be accepted. Proposal modifications received after the time set for the proposal submittal will not be considered.

RELATED PARTIES AND MULTIPLE PROPOSALS

Where two (2) or more related parties each submit a proposal or multiple proposals are received from (1) Proposer, for any such contract, such proposals shall be judged non-responsive. Related parties mean Proposers or the principles thereof, which have a direct or indirect ownership interest in another Proposer for the same contract or in which a parent company or the principles thereof where one (1) Proposer has a direct ownership interest in another Proposer for the same contract.

RIGHT TO AUDIT
The City of St. Pete Beach reserves the privilege of auditing a Proposer's record as such records relate to purchases or work between the City and said Proposer. Records should be maintained for three years from contract date.

VARIANCE FROM STANDARD TERMS & CONDITIONS
All standard terms and conditions stated throughout the RFP apply to this contract except as specifically stated. This should be fully understood by Proposers prior to submitting a proposal.

ASSIGNMENT
The Proposer shall perform this contract. No assignment or subcontracting shall be allowed without prior written consent of the City. If a Proposer intends to subcontract a portion of this work, the Proposer must disclose that intent in the proposal. In the event of a corporate acquisition and/or merger, the Contractor shall provide written notice to the City within thirty (30) business days of Proposer's notice of such action or upon the occurrence of said action, whichever occurs first. The right to terminate this contract, which shall not be unreasonably exercised by the City shall include but not be limited to, instances in which a corporate acquisition and/or merger represent a conflict of interest or are contrary to any local, state, or federal laws. Action by the City awarding a proposal to a firm that has disclosed its intent to assign or subcontract in its response to the RFP, without exception shall constitute approval for purpose of this Agreement.

LOBBYING Lobbying of Evaluation Committee members, City employees, or elected officials regarding request for proposals, request for qualifications, bids or contracts, during the pendency of bid award or bid protest, by the bidder/proposer/protestor or any member of the bidder's/proposer's/protestor's staff, an agent of the bidder/proposer/protestor, or any person employed by any legal entity affiliated with representing an organization that is responding to the request for proposal, request for qualification, bid or contract, or has a pending bid protest is strictly prohibited either upon advertisement or on a date established by the City and shall be prohibited until either an award is final or the protest is finally resolved by the City Manager or Procurement Manager; provided, however, nothing herein shall prohibit a prospective bidder/proposer from contacting City departments to address situations such as clarification and/or questions related to the procurement process. For purposes of this provision, lobbying activities shall include but not be limited to, influencing or attempting to influence action or non-action in connection with any requests for proposal, request for qualification, bid or contract through direct or indirect oral or written communication or an attempt to obtain goodwill of persons and/or entities specified in this provision. Such actions may cause any request for proposal, request for qualification, bid or contract to be rejected.

ADDITIONAL REQUIREMENTS
The City reserves the right, by change order, to unilaterally add or delete locations/services, either collectively or individually, at the City's sole option, at any time after award has been made as may be deemed necessary or in the best interest of the City. In such case, the Proposer will be required to provide or reduce services to this contract in accordance with the terms, conditions, and specifications.

SERVICES AGREEMENT
A written agreement incorporating the RFP and the successful proposal will be prepared by the City, signed by the successful Proposer, and presented to the City Commission for approval and signature.

INTEGRITY OF REQUEST FOR PROPOSAL DOCUMENTS
Proposers shall use the original RFP forms provided within the RFP and enter information in the spaces where a response is requested. Proposers may use an attachment as an addendum to the RFP forms if sufficient space is not available on the original form for the Proposer to enter a complete response. Any modifications or alterations to the original RFP documents by the Proposer, whether intentional or otherwise, will constitute grounds for rejection of the RFP. Any such modifications or alterations a Proposer wishes to propose must clearly be stated in the Proposer's RFP response and presented in the form of an addendum to the original RFP documents.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in this Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the contract and requirements and shall determine acceptance of the work under this Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the contract terms in a fair and unbiased manner.
If a variation from any requirements is allowed, the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

EXAMINATION OF SITE
Proposer shall carefully examine project site and be familiar with the work required for the project, investigate all site conditions that may affect execution of work as detailed in the construction documents. Contact the City's Procurement Manager or their designee for changes or alterations before proceeding.

ASSURANCES
The responding Proposer shall provide a statement of assurance that the Proposer is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

ASSIGNMENT AND TRANSFER OF CONTRACT
The Proposer shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS
The Proposer shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Proposer's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PAYMENT
Payment shall be made to the Proposer for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

PERIOD OF PERFORMANCE
The target completion for the base Scope of Services is January 2027, corresponding to delivery of the Design-Build Readiness Package. The City reserves the right, at its sole discretion and subject to funding

availability, to amend this Agreement to extend the Consultant's services through final (100%) design. Any additional services shall be authorized by written amendment and negotiated in accordance with the Consultants' Competitive Negotiation Act (Section 287.055, Florida Statutes).

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Proposer will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Proposer without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Proposer's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Proposer to make a change in the Work, and if the City and the Proposer do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the Proposer shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Proposer believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, they shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Proposer first discovered the occurrence. The Proposer shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Proposer shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Proposer shall prepare proposals detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Proposer's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Proposer's proposals shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable proposal will not justify an increase in Contract Amount or Contract Time. Proposer agrees that it shall give the City access to any and all of Proposer's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Proposer for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Proposer shall be at his expense

without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Proposer or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Proposer proposals or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to be used shall be those used for the Proposer's costs, except that the term "Subcontractor" shall replace the term "Proposer," context permitting.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Proposer, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit.

In such case, the Proposer will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Proposer to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Proposer (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Proposer employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

PAYMENTS FOR WORK COMPLETED
All payments under this agreement shall comply with the requirements of Florida Statutes, Section 215.422, commonly referred to as the "Prompt Payment Law." This includes timely processing of invoices and adherence to statutory interest provisions for late payments. The Contractor shall submit detailed invoices for services rendered under this agreement. Each invoice must include: Purchase Order or Contract Number, Description of services provided, Dates of service, Total amount due. Payment will be made within 45 days of receipt of a proper invoice and acceptance of deliverables, as required by Florida law. If payment is not made within the statutory timeframe, interest penalties will apply in accordance with Section 215.422, Florida Statutes. Payments will be issued via electronic funds transfer (EFT) unless otherwise agreed in writing. Contractor must provide accurate banking information to facilitate EFT.

PAYMENTS WITHHELD
The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Proposer to make payments properly to Subcontractors or for labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Proposer

f) Failure of the Proposer to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS
Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Proposer, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such sums to the Proposer.

Before the approval of the final payment, the Proposer shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS
If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Proposer, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Proposer all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Proposer and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE
The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Proposer. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies

to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

LICENSES AND PERMITS

The Proposer shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the Proposer is responsible for non-compliance of all permit requirements, including all fines resulting from Proposer's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Proposer shall be responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the Proposer awarded the project, MUST also register their license with the City.

LABOR PROVISIONS

The Proposer and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed. The State of Florida prevailing wage law requires that the Proposer shall fully comply with all provisions contained in Section 215.19, "Schedule of Prevailing Wage Rates for Specified Public Construction." The wage rates set forth by such determination shall apply to this project.

INSURANCE

The Proposer shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Proposer's General Public Liability and Property Damage Insurance issued to the Proposer and protecting the Proposer from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Proposer or by any Subcontractor hired by the Proposer or anyone directly or indirectly employed by the Proposer or hired by the Proposer.

The successful Proposer shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Proposer or third party under the direction or control of the Proposer. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Proposer must furnish the City with Certificate of Insurance prior to commencement of work. An

approved Certificate of Insurance furnished by the Proposer's carrier to guarantee the Proposer being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Professional Liability Insurance $2,000,000 each occurrence.
- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY
The Proposer shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Proposer shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Proposer shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Proposer will provide security on off days and holidays. The Proposer shall be responsible for all charges incurred with such action.

The Proposer shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Proposer, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Proposer shall also protect adjacent property as required by law.

PROPOSAL REVIEW AND CONTRACT AWARD
Failure to submit all documents requested at the time of proposal may deem the Proposer's proposal ineligible for award. The City of St. Pete Beach reserves the right to reject any or all proposals or parts of proposals. The contract shall be awarded by written notice to the responsible and responsive Contractor whose proposal is determined in writing to be the most advantageous to the City, taking into consideration the price and other criteria set forth in this request for proposals. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS
The laws of the State of Florida do apply to any purchase made under this Request for Proposal. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their proposal and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Proposer agrees to comply with all applicable portions of Fla. Stat. 448.095. Proposer must use the

U.S. Department of Homeland Security's E-Verify System, hhttps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Proposer shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Proposer with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Proposer shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Proposer must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Proposer's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Proposer may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and proposal costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statute by the Proposer, the Proposer may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all proposals, to waive irregularities and technicalities, and to request re-submission. If only one proposal is received by the proposal date and time listed, the proposal may or may not be rejected by the City depending upon proposal review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting proposals. The City reserves the right to award the contract to a responsible proposer submitting a responsible proposal, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, Proposers, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFP during any phase of the proposalding process. Failure to comply with the provision may result in disqualification of the Proposer, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFP shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE
Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION
The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS
The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

V. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional, business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization, telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the Proposer's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of Proposer to perform service and reserves the exclusive right to accept or reject any proposal as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience providing Task Work Order driven Civil On-Call Construction Services.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Civil On Call Construction Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Civil On Call Construction Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach
by: _____
(Print individual's name and title)

for: _____
(Print name of entity submitting sworn statement)

at: _____
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

_____
(FEIN)
or, if the entity has no FEIN, include the Social Security Number:

_____
(SSN)

by the individual signing this sworn statement:
_____ (Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VIII. NON-COLLUSION AFFADAVIT

STATE OF _____ COUNTY OF _____

I state that **I**_____ of _____,
(Name and Title) (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.
2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.
3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.
4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.
5. _____, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

* Contractor Job Truck Mandatory Tools

	Tool	Minimum size	Quantity
1	Air compressor	20 CFM @ 90PSI	1
2	3/4" drive ratchet and socket set		1
3	1 inch drive air impact wrench		1
4	1 inch drive sockets	1-1/2" to 3"	1 each
5	Slug wrenches	1-1/2" to 3"	1
6	End wrenches	7/16" to 1-1/2"	2 each
7	Porta band saw w spare blades	4" opening	1
8	Sawzall w spare blades		1
9	Nylon slings 5,000 and 10,000 pound rated (vertical)	2" 2 ply/4" 2 ply	2 each
10	Grade 80 Chain 10,000 pound rated	1/2" X 10 ft	2
11	Clevis or Shackles 5 ton rated	5/8" alloy	4
12	Porta power 10 ton		1
13	Shovels- round and square point		3 each
14	Cutting torch set *see note*		1
15	Gas or diesel stick welder and accessories *see note*		1
16	Small diaphragm pump and accessories	2" suction	1
17	Tap and die set	1/2" to 2" NPT	1
18	Drill and bits for steel or ductile	1/2" to 2" NPT size	1 set
19	Pry bar	5 foot	1
20	Come along	2ton	2
21	Circular Saw and blades for cribbing/forms	7 1/2 inch	2
22	Generator 120/240 volt	3500 watt	1
23	Framing hammer and nails for forms		2
24	Screw gun and screws for forms and cribbing		1
25	Gas powered cutoff saw (K-12)	12inch	1
26	Chain saw for cribbing and for'ms	14 inch bar	1
27	Sledge hammers	4t/ and 6tl	1 each
28	Crew PPE to include Hard hat and gloves at minimum	as needed	per person

ADDENDUM 1

Civil On Call Construction Services

Issued 3/23/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Pre-bid Minutes
Questions and Answers

Optional - Pre-Bid Meeting Minutes
RFP: Civil On Call Construction Services
March 18, 2026
10:00 AM

Staff Members Present:
Sara Spain, Procurement Manager
John Taylor, Assistant Finance Director
Camden Mills, Public Services Director
Dejan Milosevic, Project Manager
Michael Weaver, Infrastructure Operations Manager
Brian Gelock, Public Services
Kenneth Kosbab, Public Services
Ariana Wilson-Romo, Exec. Assistant City Clerk's Office

Others Present:

Name	***Company***	***Contact***
Abbey Boyle	PCS Civil	abbeyb@pcscivilinc.com
Bruno Sequeira	BCS Construction Group	Did not provide.
George Pappas	Southern Road & Bridge LLC	gpappas@southernrb.com
Tristan Hine	PCS Civil	tristanh@pcscivilinc.com
Dave Reid	Ajax Paving Industries of FL LLC	flestimate@ajaxpaving.com
Zachariah Wachalec	David Nelson Construction Co.	zwachalec@nelson-consturction.com

The meeting was called to order at 10:02 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:
- Receipt of questions due 3/25 at 10AM
- Bids due 4/8 by 9AM
- Bid opening 4/8 at 11AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Public Services Director Camden Mills stated that the City is seeking as-needed construction services for various capital projects and/or maintenance projects. Ms. Spain clarified that the City does anticipate awarding multiple vendors.

The following questions were asked:
Q: Contract terms? A: 3yr with options for two one-year renewals.
Q: Size project monetary-wise? A: The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M. An addendum with anticipated projects can be posted.

There were questions regarding how contractors are selected if unit line items were being submitted in advance. Mr. Mills and Ms. Spain will clarify the contract language via an addendum. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.
There being no additional questions, the meeting was adjourned at 10:16 AM.

Questions and Answers:

1. **Are there any plans available for the potential work needed? Or would you like us to provide the price for each line item on the bid form? – Plans are not yet available for the potential work needed. Please provide the unit price for each line item on the bid form that you're capable of performing or subcontracting.**
2. **On the bid form for the On-Call Civil Construction Services list, pay items 285701 through 285715, Optional Base Group 1 through Optional Base Group 15, are listed, but it does not specify which base option will be required. What base options are needed for each base group? – Base Groups 1-11: Graded aggregate based or crushed concrete, consisting of granitic material (minimum LBR 100). Base groups 12-15: Type B-12.5.**
3. **Prebid question: Contract Terms? 3 year with options for 2 one-year renewals.**
4. **Prebid question: Size project monetary-wise? The scope touches on what the dollar amounts would be. This contract would be used for anything under $4M.**
5. **Prebid question: List of anticipated projects. See list below of anticipated projects. This list is not all inclusive of potential projects, other projects may be assigned as needed.**
    - **Citywide stormwater collection system repairs and replacements (estimated > $1,000,000)**
    - **Citywide traffic signage replacements (estimated <$250,000)**
    - **Citywide pavement markings (estimated <$250,000)**
    - **Public Services operations yard expansion (estimated >$250,000 and <$500,000)**
    - **Coquina Way cul-de-sac improvements (<$250,000)**
    - **Fisherman's park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Sunset park hurricane damage rehabilitation (estimated >$250,000 and <$500,000)**
    - **Gulf Way roadway rehabilitation (estimated > $2,000,000)**
    - **Belle Vista mini park improvements (estimated <$250,000)**
    - **1st Ave fishing pier hurricane damage repair (estimated <$250,000)**
    - **7th Ave fishing dock hurricane damage repair (estimated <$250,000)**
6. **Prebid question: There were questions regarding how contractors are selected if unit line items were being submitted in advance. Ms. Spain added that in the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested. – Refer to II. Statement of Work, Part I: General Requirements, G. Work Assignments.**
7. **Will we split up projects (e.g. Seawalls and Parks)? – Multiple vendors may be selected per project depending on scope of work and vendors capabilities. Vendors are encouraged to submit unit prices for line items that they can perform or subcontract.**

ADDENDUM 2

Civil On Call Construction Services

Issued 3/27/2026

*Sealed bids must be received by **9:00 AM on 04/08/2026** electronically via Bonfire. Bids received after the deadline will not be accepted. They will be publicly opened and read at **11:00 AM on 04/08/2026**. All bidders are invited to attend this bid Opening.*

Addendum 1 includes:

Questions and Answers

Questions and Answers:

1. **What class should the Round and Other-Elip/Arch pipe culvert be, class 3 or 4?** **The Round and Other-Elip/Arch pipe culvert bid items are listed as optional material pipe culverts and are not intended to specify a particular pipe class (e.g., Class III or Class IV) at the bid stage. The required pipe material and structural class, if applicable, will be determined by the City for each specific task order based on the project design, loading conditions, and applicable Florida Department of Transportation Standard Specifications.**

2. **Do the U-End walls need to be precast or cast in place?** **U-end walls may be precast or cast-in-place, as appropriate for the specific task order. The required type will be identified in the plans or directed by the City/Engineer for each assignment.**

3. **Are any inlets planned to be cast in place?** **Inlets may be precast or cast-in-place depending on site conditions and design requirements. This will be defined on a task order basis.**

4. **Will any of the end walls listed on the bid form have runs of pipe passing through them? If so, how many runs and at what skew?** **Some end walls may include pipe penetrations; however, the number of runs, pipe sizes, and skew angles (if any) will be determined by the design for each individual task order and shown in the applicable plans.**

5. **Please clarify how contract work will be assigned. The Statement of Work, Part I, Section 1, item G (Work Assignments) states that the City will obtain quotes from the Contractors who have a multiple-award contract. The City will already have contract pricing for each Contractor in the multiple-award contract, what is the criteria for these quotes?** **In the general contract terms, it states that submissions will be evaluated on capability, cost, and capacity to perform the specific line items requested.**

6. **Statement of Work, Part I, Section 15 states that Contractors must provide references for 5 work types in item E. If the Contractor does not intend to submit pricing for a work type, must that work type still be included in the project references?** **No, bidders shall provide references for applicable work types.**

7. **Please clarify the Period of Performance in the General Contract Terms. This states base scope target completion of January 2027 while other parts of the RFP specify a three year contract.** **3-year contract with 2 options for 1-year extensions. Ongoing work may be required.**

8. **Will any bonding be required?** **Yes, 5% of total bid amount.**

Cathcart
Construction Company - Florida, LLC

A Safety Company That Builds Infrastructure Projects

1056 Willa Springs Dr, Winter Springs, FL, 32708
11738 Currie Ln, Largo, FL 33774
(407) 629-2900

Transmittal Letter:

Civil On Call Construction Services:

April 8th, 2026

Dear Sara Spain, Procurement Manager:

Cathcart Construction Company – Florida, LLC is pleased to submit the attached response to the bid for the above-referenced contract. We respectfully request your consideration as the City of Saint Pete Beach selects a trusted partner to support their on call construction services, both for new construction and for the maintenance, rehabilitation, and emergency response needs of existing systems. For over 34 years, Cathcart has built a strong reputation for delivering high-quality civil infrastructure solutions in Central Florida, where we are based, and across West Florida with our local office in Largo Florida. It would be a privilege to continue extending our services to your community in this capacity and aiding in the improvement of the city's infrastructure. We approach each partnership with long-term value in mind, ensuring our clients receive not just a contractor but a dedicated extension of their municipal team.

At Cathcart, our culture goes far beyond being customer-focused; we are passionately customer-obsessed. This principle drives our operations, from leadership to field personnel, and shapes the way we approach every project. Our commitment to client satisfaction is not just something we say; it's demonstrated through our track record. We consistently deliver infrastructure improvements on time, within budget, and with an uncompromising commitment to workplace safety. Our extensive capabilities include underground utility work, stormwater systems, lift stations, roadway and hardscape improvements, and rapid-response services. Whether under standard or emergency conditions, Cathcart has the personnel, equipment, and experience necessary to mobilize efficiently and complete any civil infrastructure construction contract the committee needs done with the utmost attention to detail.

We are proud to maintain ongoing contracts with a wide range of municipalities across Central Florida. This includes the cities of Altamonte Springs, Orlando, Winter Park,

Maitland, Sanford, Ocoee, Winter Garden, Oakland, and Wauchula, along with Seminole, Orange, Hillsborough, Osceola, and Hardee counties. These longstanding relationships speak to our responsiveness, technical capability, and the high level of trust we've earned. Our strategic locations in Orlando and Largo, Florida, allow us to respond quickly to the needs of the region, while our organizational structure supports seamless communication, proactive problem-solving, and agile project execution. We are a safety-first company that builds infrastructure, placing the well-being of our team, our partners, and the public at the center of everything we do.

Equally important to safety and performance is our steadfast promise: to deliver exactly what our clients want, when they want it, and for exactly what they expect to pay for it. Our hands-on leadership team works closely with a dedicated workforce to provide expert oversight, manage complex project timelines, and ensure quality at every phase. This integrated approach allows us to consistently exceed expectations and deliver long-term value. For your consideration, we have included references from several of our municipal partners who can speak directly about our professionalism, reliability, and results. We appreciate the opportunity to be considered for this important work and would be honored to support the City of Saint Pete Beach in building and maintaining the infrastructure your community deserves.

Mr. John Cathcart and I are authorized to make representations for Cathcart. For this contract, I will be your point of contact should you or any member of your staff require any additional information; my personal cell phone number is (407) 810-9614. Please do not hesitate to call me for any type of discussion. My e-mail address is mblanton@cathcartconstructioncompany.com.

Sincerely Yours,

Matt T. Blanton
President

VI. CONTRACTOR'S PROPOSAL SUBMITTAL

The company that is submitting a proposal declares that it has extensive experience providing Task Work Order driven Civil On-Call Construction Services.

The undersigned, as Proposer, hereby declares that the only person or persons interested in the Proposal as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Proposal or in the Agreement to be entered into; that this Proposal or Agreement is made without connection with any other person, company, or parties making a Proposal; and that it is in all respects fair and in good faith without collusion or fraud.

The Proposer further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of proposals; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Proposer proposes and agrees, if the Proposal is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Civil On Call Construction Services"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The successful Proposer shall be required to utilize the template Agreement in this Request for Proposals (RFP) and any questions regarding the Agreement must be addressed during the RFP process before submittal. The City reserves the right to respond or not respond to questions in the form of an addendum.

The Proposer proposes to furnish all materials, equipment, labor, and perform the work submitted in their proposal schedule for the City of St. Pete Beach **"Civil On Call Construction Services."**

VII. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach
by: Matt Blanton - President
(Print individual's name and title)

for: Cathcart Construction Company - Florida, LLC
(Print name of entity submitting sworn statement)

at: 1056 Willa Springs Dr, Winter Springs Florida, 32708
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

46-4740152
(FEIN)
or, if the entity has no FEIN, include the Social Security Number:

(SSN)

by the individual signing this sworn statement:
(Signature) Matt Blanton - President

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any proposal or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which proposals or applies to proposal on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☑ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

STATE OF FLORIDA
COUNTY OF Seminole

VIII. NON-COLLUSION AFFADAVIT

STATE OF Florida COUNTY OF Seminole

I state that I Matt Blanton - President (Name and Title) of Cathcart Construction Company - Florida, LLC (Name of Firm)

I am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. Cathcart Construction Company - Florida, LLC, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

Any singular reference to Contractor, Surety, Owner or other party shall be considered plural where applicable.

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

    - Final Budget - $2,497,830.00
    - Final Completion – November 2024
    - General Superintendent – Justin Williams

3) Walnut St Force Main – This project was a Force Main extension with 1980 LF of 14" HDPE directional drill and 2680 LF of 12" PVC open cut. The project utilized 10 gate valves, multiple fittings, and a 12" double line stop bypass to make connections. During the project the team was able to work with the owner to extend a directional drill under a roadway and signage for a community center to reduce the restoration cost and save money on the project.
    - Owner, Toho Water Authority, 951 Martin Luther King Blvd Kissimmee, FL 34741
        - Micah Smart, Engineer II (407) 483-3851 – Msmart@tohowater.com
    - Final Budget - $1,141,109.60
    - Completion – January - June 2023
    - General Superintendent – Justin Williams

4) Urick St Force Main Extension – This Project was a force main upgrade that replaced 3240 LF of 8" PVC and 4880 LF of 10" PVC via open cut. There was also 680 LF of 10" HDPE and 2120 LF of 12" HDPE installed via directional drill. 19 ARV we needed with the force main install. The restoration required asphalt roadway, concrete sidewalk, and concrete driveways. During the project there was the need to change an open cut portion of the project to a directional drill. This was to save multiple large oak trees that would have been needed to remove if the open cut process was done.

    - Final Budget $2,640,218.00
    - Completion – September 2022 - March 2023
    - General Superintendent – Joe Newton

5) Amanda ST Extension Construction – This project was a roadway extension that performed the installation 2434 LF of 4” PVC water main, 2525 LF of 8” PVC water main, 469 LF of 4” HDPE directional drilled watermain, over 100 new watermain services, and 5 fire hydrants. The sanitary sewer portion of the project consisted of 2097 LF of 8” sewer, 475 LF of 8” sewer, and 10 sewer manholes. The stormwater improvements consisted of 232 LF of 15” RCP, 1600 LF of 18” RCP, 1900 LF of 24” RCP, 17 curb inlets, 3 ditch bottom inlets, and 6 manholes. The road restoration involved 550 SY of brick pavers, 4325 LF of curbing, 5038 SY of 4” sidewalk, 295 CY of gravity wall, and 7686 SY of asphalt restoration.
    - Owner, City of Altamonte Springs, 225 Newburyport Avenue, Altamonte Springs FL 32701
        - Trey Sisk, Construction Manager (407) 571-8572 – tsisk@altamonte.org
    - Final Budget – $3,938,864.50

- Final Completion – January 2020 - June 2021
- General Superintendent – Joe Newton

Bid Form for City of St Pete Beach
On-Call Civil Construction Services
Request for Proposal

Specifications for the numbered pay items can be found in the current FDOT "Standard Specifications for Road and Bridge Construction".
Bid quantities are for comparison purposes only. This contract consists of various projects which are not yet defined and no quantities are guaranteed.

Pay Item No.	Item Description	Units	Est. Quantity	Unit Price	Amount
0101 1 (2501-5000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $2,501 TO $5,000	LS	5	$1000.00	$5000.00
0101 1 (5501-25000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $5,001 TO $25,000	LS	1	$2000.00	$2000.00
0101 1 (25001-50000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $25,001 TO $50,000	LS	1	$5000.00	$5000.00
0101 1 (50001-150000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $50,001 TO $150,000	LS	1	$12000.00	$12000.00
0101 1 (150001-250000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $150,001 TO $250,000	LS	1	$20000.00	$20000.00
0101 1 (250001-350000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $250,001 TO $350,000	LS	1	$30000.00	$30000.00
0101 1 (350001-500000)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $350,001 to $500,000	LS	1	$35000.00	$35000.00
0101 1 (500001+)	MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $500,001 or more	LS	1	$40000.00	$40000.00
0101 1 (2501-5000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $2,501 TO $5,000	LS	1	$1500.00	$1500.00
0101 1 (5501-25000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $5,001 TO $25,000	LS	1	$3000.00	$3000.00
0101 1 (25001-50000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $25,001 TO $50,000	LS	1	$7500.00	$7500.00
0101 1 (50001-150000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $50,001 TO $150,000	LS	1	$18000.00	$18000.00
0101 1 (150001-250000)	EMERGENCY MOBILIZATION (PER WORK ASSIGNMENT/LOCATION) - $150,001 TO $250,000	LS	1	$24000.00	$24000.00
0102 1	MAINTENANCE OF TRAFFIC	Lump Sum (LS) cost to be assigned for each Task Order and shall not exceed 10% of the proposed construction cost.			
0102 3	COMMERCIAL MATERIAL FOR TEMPORARY DRIVEWAY MAINTENANCE	CY	50	$210.00	$10500.00
0102 14	TRAFFIC CONTROL OFFICER	HR	500	$110.00	$55000.00

EXHIBIT "D"

Conditional Federal/Grant-Funded Contract Addendum

(Place Conditional Federal/Grant-Funded Contract Addendum behind this page)

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

Federal/Grant Program: [insert]
Federal Awarding Agency: [insert]
Pass-Through Entity: [insert, if applicable]
Assistance Listing Number: [insert, if applicable]
Federal Award Identification Number: [insert, if applicable]
Award or Disaster Declaration Date: [insert, if applicable]
Project Number: [insert]
Special Award Conditions: [insert or attach]

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Authorize the City Manager to execute the Contract with Marolf Environmental for the Pump & Lift Station Rehabilitations capital improvement project in the amount not to exceed $2,950,000.00.

Action Request: Motion to authorize the City Manager to execute the Contract with Marolf Environmental for the Pump & Lift Station Rehabilitations capital improvement project in the amount not to exceed $2,950,000.00.

Strategic Objective: Recovery, Resiliency & Sustainability

Date: June 23, 2026

Prepared By: Camden Mills, Public Services Director

Through: Frances Robustelli, City Manager

Summary of Issue: The City publicly advertised a Request for Bids (RFB) seeking qualified contractors to perform the Pump and Lift Stations Rehabilitation capital improvement project. Five (5) bids were received on May 6, 2026. Marolf Environmental was determined to be the lowest responsive and responsible bidder meeting all City qualification requirements.

The project includes rehabilitation of Wastewater Pump Stations 2 and 3, and Lift Stations 4, 5, 7, 9, 10, 11, 12, 13, 14, 15, and Stormwater Lift Station 35. Improvements generally consist of flow meter replacement, electrical and instrumentation upgrades, valve vault rehabilitation, wet well cleaning, force main appurtenance replacement, site restoration, and other associated infrastructure improvements.

In addition to the rehabilitation work, Lift Stations 4, 7, and 10 include flood mitigation improvements designed to improve system reliability before, during, and after storm events. These improvements include elevated electrical control equipment, elevated operator access platforms and stairs, standby backup generators with sound-attenuated enclosures and fuel tanks, and

architectural screening consisting of walls, fencing, and landscaping. Conditional Use Permits are required for these mitigation improvements. The Conditional Use Permit process will include public hearings and opportunities for public comment. Staff recommends approval of the construction contract at this time to allow work to proceed at the remaining project locations and to allow procurement of long-lead equipment. Construction of the Lift Station 4, 7 and Lift Station 10 mitigation improvements will remain subject to completion of the land development approval process.

The project supports the City's ongoing efforts to improve wastewater system reliability, reduce vulnerability to flooding and storm surge impacts, extend the useful life of critical infrastructure assets, and maintain compliance with regulatory requirements. Funding for the project is available within the Pump Stations Capital Improvement Program budget.

Funding:

401.5350.563001 Pump Stations

CIP Project 3003 – Pump & Lift Station Rehabilitations (remaining balance $3,088,712.20)

The contract amount of $2,950,000 is within the available project budget of $3,088,712.20, leaving approximately $138,712 available for contingencies and unforeseen conditions, or reallocation.

The actual bid costs have been submitted to insurance and FEMA for evaluation and funding support.

The City has requested $2,370,000 in grant funding from the Florida Department of Emergency Management through the Flood Mitigation Assistance Program for Lift Stations 4, 7, and 10 mitigation and rehabilitation.

1. Marolf Environmental Contract 1

CITY OF ST. PETE BEACH, FLORIDA
SERVICES AGREEMENT

Wastewater Lift Stations Rehabilitation

This is an Agreement (the "Agreement") entered into by and between the **CITY OF ST. PETE BEACH** (hereinafter "City") and **MAROLF ENVIRONMENTAL** (hereinafter "Contractor"). The City and Contractor together shall be referred to as the "parties."

WHEREAS, The City properly issued a Request for Bids, attached and incorporated hereto as Exhibit "B" and the City Commission authorized the selection of Contractor at its June 23, 2026, public hearing.

WHEREAS, City desires to purchase from Contractor the services described in this Agreement.

WHEREAS, Contractor is in the business of providing the services described herein, and has submitted an appropriate proposal to the City to provide the same.

WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Contractor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable considerations, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

1. Recitals. The foregoing recitals are true and correct and incorporated herein by reference.

2. Standard Contract Addendum. The attached Standard Contract Addendum, which contains all the Florida Statutorily required provisions applicable to this Agreement, is attached hereto as Exhibit "A" and its provisions modify and supplement this Agreement.

3. Scope of Services. The Contractor must perform all work for the City required by the contract documents as set forth below:

a. Contractor will furnish all labor, materials, and equipment necessary as indicated in the Request for Bids (Exhibit "B") in the amount of Not To Exceed $2,950,000.

b. Contractor will submit a detailed schedule within 30 days after preconstruction conference.

c. Contractor must supervise the workforce to ensure that all workers conduct themselves and perform their work in a safe and professional manner. Contractor must comply with all OSHA safety rules and regulations in the operation of equipment and in the performance of the work. Contractor must at all times have a competent field supervisor on the job site to enforce these policies and procedures at the Contractor's expense.

d. Contractor will provide the City with seventy-two (72) hours written notice prior to the beginning of work under this Agreement and prior to any schedule change with the exception of changes caused by inclement weather.

e. Contractor must comply with any and all Federal, State, and local laws and regulations now in effect, or hereinafter enacted during the term of this Agreement, which are applicable to the Contractor, its employees, agents or subcontractors, if any, with respect to the work and services described herein. The Contractor further warrants that there has been no violation of copyrights or patent rights either in the United States of America or in foreign countries in connection with the work of the contract.

f. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective. Contractor further warrants that all goods, materials and workmanship furnished, whether furnished by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted. Last, Contractor warrants all material and workmanship for a minimum of (1) year from date of project completion and acceptancy by the City. If within one (1) year after acceptance by the City, or within such larger period of time as may be prescribed by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor will, after receipt of a written notice from the City to do so, promptly correct the work.

4. Damages. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of $500 per day, for each day after the date set forth in paragraph 10, that Contractor has failed to properly and completely deliver all goods or provide all service specified herein. The Contractor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

5. Remedies.

   a. Damages. The City reserves the right to recover any ascertainable actual damages incurred as a result of the failure of the Contractor to perform in accordance with the requirements of this Agreement, or for losses sustained by the city resultant from the Contractor's failure to perform in accordance with the requirements of this Agreement.

   b. Correction of Work. If, in the judgment of the City, work provided by the Contractor does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, the city reserves the right to require that the Contractor correct all deficiencies in the work to bring the work into conformance without additional cost to the City, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. The City is the sole judge of non-conformance and the quality of workmanship.

6. Waiver of Liens. Prior to final payment of the Contract Sum, a final waiver of lien must be submitted by all suppliers, subcontractors, and/or Contractors who worked on the project that is the subject of this Agreement.

7. Warranties.

a. Warranty of Title. Contractor warrants to the City that all goods and materials furnished under the contract will be new unless otherwise specified and that Contractor possesses good, clear, and marketable title to said goods and there are no pending liens, claims, or encumbrances whatsoever against said goods. All work not conforming to these requirements, including substitutions not properly approved and authorized may be considered defective.

b. Warranty of Specifications. The Contractor warrants that all goods, materials, workmanship furnished, whether by the Contractor or its subcontractors and suppliers, will comply with the specifications, drawings and other descriptions supplied or adopted.

c. Warranty of Merchantability. The Contractor warrants all material and workmanship for a minimum of one (1) year from date of project completion and acceptance by the City. If within one (1) year after acceptance by the city, or within such larger period of time as may be described by law any of the work is found to be defective or not in accordance with the contract documents, the Contractor must after receipt of a written notice from the City to do so, promptly correct the work unless the City has previously given the Contractor a written acceptance of such condition.

8. Term. This Agreement will remain in effect for a period of one year from the Effective Date.

9. Effective date. The "Effective Date" of this Agreement shall be the date this Agreement has been executed by all parties.

10. Termination. This Agreement may be canceled by the City when:
   a. Sufficient funds are not available to continue its full and faithful performance to the Agreement.
   b. Sub-standard or non-performance of Agreement.
   c. The City wishes to terminate the Agreement at any time and for any reason, upon giving thirty (30) days prior written notice to the Contractor.

11. Fiscal Non-funding. If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel the Agreement immediately upon written notice to the Contractor.

12. Non-Exclusivity. Contractor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

13. Compensation. Upon Contractor's satisfactory full performance of the services or in accordance with the payment schedule provided in the attached proposal, City shall pay Contractor, as full consideration for services provided in this Agreement.

14. Insurance. To the extent that this Agreement requires Contractor to provide any services of any kind, Contractor and all of Contractor's subcontractors shall maintain public liability insurance in a combined single limit for bodily injury and property damage in the amount of not less than $1,000,000.00, satisfactory to the City Manager, naming the City as an additionally named insured

and providing coverage up through and including the final performance of any services provided herein. Contractor and all of Contractor's subcontractors shall maintain in full force and effect a policy of worker's compensation insurance for all of Contractor's employees in accordance with applicable state and federal law. Said insurance coverage shall include employer's liability with a single limit of $100,000.00 per accident or occurrence. Contractor shall present City with a certificate for all the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City.

The Contractor waives all rights against the City, its consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Contractor, Contractor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

15. Indemnification. In consideration of the payment of ten dollars as part of the compensation described herein, such sum being specifically found by Contractor to be sufficient consideration for this indemnification, Contractor shall indemnify, defend and hold the City harmless for itself, its past/present/future elected and appointed officials, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, liability or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not, and in connection with violations of copyrighted or trademarked materials used by Contractor, loss of life, bodily or personal injury, or property damage, including loss of use thereof, directly or indirectly caused by, resulting from, arising out of or occurring in connection with the operations of the Contractor or its officers, employees, agents, subcontractors, or independent Contractors, excepting only such loss of life, bodily or personal injury, or property damage solely attributable to the gross negligence or willful misconduct of the City or its elected or appointed officials and employees. In any and all claims against the City, or any of their agents or employees by any employee of the Contractor any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this paragraph is not limited in any way by any limitation in this amount or type of damages compensation or benefits payable by or for the Contractor or any subcontractor under Workers' Compensation Acts, Disability Benefit Acts or other Employee Benefit Acts. Nothing contained herein is intended nor may it be construed, to waive City's rights and immunities under the common law or Section 768.28, Florida Statutes, as amended from time to time; nor will anything included herein be construed as consent to be sued by any third parties in any matter arising out of this Agreement. To the extent considered necessary by the Contract Administrator and the City Attorney, any sums due Contractor under this Agreement may be retained by the City until all of the City's claims subject to this indemnification obligation have been settled or otherwise resolved,

and any amount withheld is not subject to payment of interest by the City. The above provisions will survive the termination or expiration of this Agreement and will pertain to any occurrence during the term of this Agreement, even though the claim may be made after the termination or expiration hereof.

16. Discriminatory Vendor List. Contractor hereby acknowledges its continuous duty to disclose to the City if the Contractor or any of its affiliates, as defined by Section 287.134 (1)(a), Florida Statutes, are placed on the Discriminatory Vendor List. Pursuant to Section 287-134 (2)(a), Florida Statutes: "An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to a public entity; may not submit a bid or proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity."

17. Independent Contractor. This Agreement does not create an employee/employer relationship between the parties. It is the intent of the parties that the Contractor is an independent contractor under this Agreement and not the City's employee for any purposes, including but not limited to, the application of the Fair Labor Standards Act minimum wage and overtime payments, Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provisions of the Internal Revenue Code, the State Worker's Compensation Act, and the State Unemployment Insurance law. The Contractor will retain sole and absolute discretion in the judgment of the manner and means of carrying out Contractor's activities and responsibilities hereunder provided, further that administrative procedures applicable to services rendered under this Agreement will be those of Contractor, which policies of Contractor will not conflict with City, State, or United States policies, rules, or regulations relating to the use of Contractor's funds provided for herein. The contractor agrees that it is a separate and independent enterprise from the City, that it had full opportunity to find other business, that it has made its own investment in it business, and that it will utilize a high level of skill necessary to perform the work. This Agreement must not be construed as creating any joint employment relationship between the Contractor and the City and the City will not be liable for any obligation incurred by Contractor, including but not limited to unpaid minimum wages and/or overtime premiums.

18. Audit Rights. The City reserves the right to audit the records of the Contractor for the commodities and/or serves provided under the contract at any time during the performance and term of the contract and for a period of five (5) years after completion and acceptance by the City. If required by the City, the Contractor agrees to submit to an audit by an independent certified public accountant selected by the City. The Contractor must allow the City to inspect, examine and review the records of the Contractor in relation to this Agreement at any an all times during normal business hours during the term of the Agreement.

19. Exhibits. The following Exhibits shall be attached, incorporated, and made a part of this Agreement:
    a. Standard Contract Addendum (Exhibit "A")
    b. Request for Bid/Proposal (Exhibit "B")

c. Vendor Bid/Proposal (Exhibit "C")
d. Conditional Federal/Grant-Funded Contract Addendum (Exhibit "D")

20. Notices. All notices sent pursuant to this Agreement shall be given in writing via certified mail or overnight courier and shall be delivered to the following addresses:

As to Contractor:
Marolf Environmental
4430 Erie Drive
New Port Richey, FL 34652

As to City:
City Manager
City of St. Pete Beach
155 Corey Avenue
St. Pete Beach, FL 33706

21. Conflicts and Severability. To the extent that any terms in the attached proposal conflict with the terms of this Agreement, the terms of this Agreement shall control and supersede such conflicting terms in the attached proposal, to the extent of such conflict. If any section, part of section, paragraph, clause, phrase, or word of this Agreement is declared invalid, the remaining provisions of this Agreement shall not be affected.

22. Amendments. This document and exhibits embody the entire Agreement of the parties. There are no promises, terms, conditions, or representations binding on either party hereto, other than those contained herein; and this document shall supersede all previous communications, representations, and/or agreements between the parties hereto, whether written or oral. This Agreement shall not be modified by any oral statement, communication, Agreement, course of conduct, or by anything other than a writing signed by the parties. This Agreement may be amended or modified only in writing signed by all parties hereto.

23. Jurisdiction, Venue, Attorney Fees. This Agreement shall be governed and construed according to the laws of Florida, and venue for any action arising herefrom shall be in Pinellas County, Florida. The prevailing party in any action to enforce or interpret this Agreement shall be entitled to reasonable attorney's fees incurred through all appellate proceedings.

24. Assignment. This Agreement shall be binding upon the parties, their successors, assigns, and legal representatives. Contractor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

25. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which so executed and delivered shall be deemed to be an original and all of which shall constitute one and the same instrument. Facsimile, documents executed, scanned and transmitted electronically and electronic signatures shall be deemed original signatures for purposes of this Agreement and all matters related thereto, with such facsimile, scanned and electronic signatures having the same legal effect as original signatures.

26. Authority. Contractor hereby acknowledges that the person executing this Agreement on

behalf of Contractor has the full authority to do so and to bind Contractor to the terms hereof.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year set forth below.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the Section 15 of the Standard Contract Addendum, Exhibit "A", and that the facts stated in it are true.

Standard Contract Addendum

(Place Standard Contract Addendum behind this page)

CITY OF ST. PETE BEACH, FLORIDA
STANDARD CONTRACT ADDENDUM

THIS STANDARD CONTRACT ADDENDUM is made and entered into this _____ day of _____, 2026, by and between the CITY OF ST. PETE BEACH, a Florida municipality, hereinafter referred to as the "City", and _____, hereinafter referred to as "Contractor", concerning that certain agreement dated the ____ day of _____, 2026 ("Agreement") and titled _____.

WITNESSETH:

WHEREAS, Section 119.0701, Fla. Stat., requires that certain public agency contracts must include certain statutorily required provisions concerning the contractor's compliance for Florida's Public Records Act; and

WHEREAS, Section 768.28, Fla. Stat., sets forth certain mandatory limitations on indemnification and liability for Florida public agencies; and

WHEREAS, Florida law requires that public agency contracts be subject to non-appropriation and thereby contingent upon appropriation during the public agency's statutorily mandated annual budget approval process; and

WHEREAS, Section 448.095, Fla. Stat., imposes certain obligations on public agencies with regard to the use of the E-Verify system by their contractors and subcontractors; and

WHEREAS, Section 287.133 and 287.135, Fla. Stat., provides restrictions on local governments contracting with companies that are on certain Scrutinized Companies lists or convicted vendor list; and

WHEREAS, additional terms required by Sections 282.3185(5) and (6) Fla. Stat. related to data management and Section 287.05701 Fla. Stat. related to social government and corporate activism are also added by virtue of this Addendum; and

WHEREAS, Section 286.101, Florida Statutes contains a list of "foreign countries of concern" including, the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolás Maduro, or the Syrian Arab Republic, including any agency of or any other entity under significant control of such "foreign country of concern". Any entity that does business with a state agency or political subdivision must disclose certain of their dealings with those "foreign countries of concern" to the Florida Department of Financial Services; and

WHEREAS, Section 787.06(13), Fla. Stat. provides that when a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an

officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in such statute;

NOW, THEREFORE, in consideration of the covenants set forth herein, the parties agree to this addendum as follows:

1. Amendment. This Addendum hereby amends and supplements the terms of the Agreement. In the event of a conflict between the terms of the Agreement and terms of the Addendum, the terms of the Addendum shall prevail.

2. Public Records Compliance. Contractor agrees that, to the extent that it may "act on behalf" of the City within the meaning of Section 119.0701(1)(a), Florida Statutes in providing its services under this Agreement, it shall:

(a) Keep and maintain public records required by the public agency to perform the service.

(b) Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

(d) Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

(e) Pursuant to Section 119.0701(2)(a), Fla. Stat., **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

Renee Rose
City Clerk/Public Records Custodian
cityclerk@stpetebeach.org

Phone: 727-363-9220
155 Corey Avenue
St. Pete Beach, FL 33706
Fax: 727-541-8040

3. Public Records Compliance Indemnification. Contractor agrees to indemnify and hold the City harmless against any and all claims, damage awards, and causes of action arising from the contractor's failure to comply with the public records disclosure requirements of Section 119.07(1), Florida Statutes, or by contractor's failure to maintain public records that are exempt or confidential and exempt from the public records disclosure requirements, including, but not limited to, any third party claims or awards for attorneys' fees and costs arising therefrom. Contractor authorizes the public agency to seek declaratory, injunctive, or other appropriate relief against Contractor in Pinellas County Circuit Court on an expedited basis to enforce the requirements of this section.

4. Compliance/Consistency with Section 768.28, Fla. Stat. Any indemnification or agreement to defend or hold harmless by City specified in the Agreement shall not be construed as a waiver of City's sovereign immunity, and shall be limited to such indemnification and liability limits consistent with the requirements of Section 768.28, Fla. Stat. and subject to the procedural requirements set forth therein. Any other purported indemnification by City in the Agreement in derogation hereof shall be void and of no force or effect.

5. Non-appropriation. City's performance and obligation to pay under this Agreement is contingent upon an appropriation during the City's annual budget approval process. If funds are not appropriated for a fiscal year, then the Contractor shall be notified as soon as is practical by memorandum from the City Manager or designee that funds have not been appropriated for continuation of the Agreement, and the Agreement shall expire at the end of the fiscal year for which funding has been appropriated. The termination of the Agreement at fiscal year end shall be without penalty or expense to the City subject to the City paying all invoices for services rendered during the period the Agreement was funded by appropriations.

6. E-Verify Compliance. By entering into this Agreement, the Contractor is obligated to comply with the provisions of Section 448.095, Fla. Stat. "Employment Eligibility," as amended from time to time. This includes but is not limited to register with and use the E-Verify System to verify the work authorization status of all newly hired employees, and requiring all subcontractors to provide an affidavit to Contractor attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. Contractor agrees to maintain a copy of such affidavit for the duration of this Agreement. Failure to comply with this paragraph will result in the termination of this Agreement as provided in Section 448.095, Fla. Stat., as amended and Contractor will not be awarded a public contract for at least one (1) year after the date on which the Agreement was terminated. Contractor will also be liable for any additional costs to the City as a result of the termination of this Agreement in accordance with this paragraph. Contractor affirmatively states, under penalty of perjury, that in accordance with Section 448.095, Fla. Stat., Contractor is registered with and uses the E-Verify system to verify the work authorization status of all newly hired employees, that in accordance with such statute, Contractor requires from each of its subcontractors an affidavit stating that the subcontractor does not employ, contract with, or

subcontract with an unauthorized alien, and that Contractor is otherwise in compliance with Sections 448.09 and 448.095, Fla. Stat.

7. Compliance/Consistency with Scrutinized Companies Provisions of Florida Statutes. Section 287.135(2)(a), Fla. Stat., prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Fla. Stat., or is engaged in a boycott of Israel. Section 287.135(2)(b), Fla. Stat., further prohibits a company from bidding on, submitting a proposal for, or entering into or renewing a contract for goods or services over one million dollars ($1,000,000) if, at the time of contracting or renewal, the company is on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, both created pursuant to section 215.473, Fla. Stat., or the company is engaged in business operations in Cuba or Syria. Contractor hereby certifies that Contractor is not listed on any of the following: (i) the Scrutinized Companies that Boycott Israel List, (ii) Scrutinized Companies with Activities in Sudan List, or (iii) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Contractor further hereby certifies that Contractor is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Contractor understands that pursuant to section 287.135, Fla. Stat., the submission of a false certification may subject Contractor to civil penalties, attorney's fees, and/or costs. Contractor further understands that any contract with City for goods or services of any amount may be terminated at the option of City if Contractor (i) is found to have submitted a false certification, (ii) has been placed on the Scrutinized Companies that Boycott Israel List, or (iii) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the contract is one million dollars ($1,000,000) or more, the contract may be terminated at the option of City if the company is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

8. Disclosure Requirements for "Foreign Countries of Concern". CONTRACTOR shall comply with the disclosure requirements set forth is Section 286.101 (3) (a), Fla. Stat., which requires "Any entity that applies to a state agency or political subdivision for a grant or proposes having a contract value of $100,000 or more shall disclose to the state agency or political subdivision any current or prior interest of, any contract with, or any grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift received from a "foreign country of concern" if such interest, contract, grant or gift has a value of $50,000 or more and such interest existed at any time or such contract, grant or gift was received or in force at any time during the previous five (5) years. Such disclosure shall contain the name and mailing address of the disclosing entity, the amount of the gift or the value of the interest disclosed, the applicable "foreign country of concern" and, if applicable the date of termination of the contract or interest, the date of receipt of the grant or gift and the name of the agent or controlled entity that is the source or interest holder. Within one (1) year before applying for any grant or proposing any contract, such entity must provide a copy of such disclosure to the Department of Financial Services". Pursuant to Section 286.101(7), Fla. Stat.: "In addition to any fine assessed under [section 286.101(7)(a), F.S.], a final order determining a third or subsequent violation by an entity other than a state agency or political subdivision shall automatically disqualify the entity from

eligibility for any grant or contract funded by a state agency or any political subdivision until such ineligibility is lifted by the Administration Commission for good cause."

9. Venue and Jurisdiction. Notwithstanding any of other provision to the contrary, this Agreement and the parties' actions under this Agreement shall be governed by and construed under the laws of the State of Florida, without reference to conflict of law principles. As a material condition of this Agreement, each Party hereby irrevocably and unconditionally: i) consents to submit and does submit to the jurisdiction of the Circuit Court in and for Pinellas County, Florida for any actions, suits or proceedings arising out of or relating to this Agreement. Both parties waive any right to file an action, suit or proceeding in Federal Court or remove any action, suit or proceeding to Federal Court.

10. Attorneys' Fees and Costs. Notwithstanding any of other provision to the contrary, if litigation ensues regarding this Agreement, each party hereto shall bear its own attorneys' fee and costs.

11. Public Entities Crime or Convicted Vendor List. Contractor agrees and assumes a continuous duty to disclose to the City if the Contractor or any of its affiliates as defined by Section 287.133(1)(a), Florida Statutes are placed on the Convicted Vendor List or the Antitrust Violator Vendor List maintained by the Florida Department of Management Services.

12. Data Management; Notice of Breach. Contractor shall cooperate with the City and provide timely incident reporting, response activities/fact gathering, public and agency notification, severity level assessment, after-action reports, etc., which the City must report in accordance with Sections 282.3185(5) & (6), Florida Statutes in the event of a data breach.

13. Environmental and Social Government and Corporate Activism. The City has not given preference or requested documentation from the Contractor based on Contractor's social, political or ideological interest. Contractor agrees to similarly not request documentation or give preference to any subcontractor based on the subcontractor's social, political or ideological interests.

14. Taxes. The City shall not be liable for any taxes and assessments imposed by a federal, state or local governmental agency to the extent that the City is exempt from same by Florida law, including but not limited to any sales or use tax.

15. No coercion for labor or services. The Contractor swears under penalty of perjury that the Contractor does not use coercion for labor or services as defined as follows:

"Coercion" means:

1. Using or threatening to use physical force against any person;
2. Restraining, isolating, or confining or threatening to restrain, isolate, or confine any person without lawful authority and against her or his will;
3. Using lending or other credit methods to establish a debt by any person when labor or services are pledged as a security for the debt, if the value of the labor or services as reasonably assessed is not applied toward the liquidation of the debt, the length and nature of the labor or services are not respectively limited and defined;

4. Destroying, concealing, removing, confiscating, withholding, or possessing any actual or purported passport, visa, or other immigration document, or any other actual or purported government identification document, of any person;

5. Causing or threatening to cause financial harm to any person;

6. Enticing or luring any person by fraud or deceit; or

7. Providing a controlled substance as outlined in Schedule I or Schedule II of Sec. 893.03, Fla. Stat. to any person for the purpose of exploitation of that person.

16. Force Majeure. The City reserves the right to suspend, modify or terminate this contract in the event of an act of god or act of man beyond the control of the parties, including but not limited to a hurricane, tropical storm, tornado, or other destructive weather event, flooding, pandemic, plague, war, armed conflict, domestic or foreign terrorism, riot, labor condition, state or federal governmental action, and catastrophic Internet disturbance, making performance inadvisable, economically impracticable, illegal, or impossible.

17. Additional Terms. Notwithstanding any of other provision to the contrary, the parties agree as follows:

A. None.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this instrument on the days and year indicated below and the signatories below to bind the parties set forth herein.

Under penalties of perjury, and pursuant to Sec. 92.525, Fla. Stat., Contractor declares that Contractor has read the foregoing Section 15 above and that the facts stated in it are true.

I. CONTRACTOR'S BID SUBMITTAL

The company that is submitting a bid declares that it has extensive experience in **Wastewater Lift Stations Rehabilitation.**

The undersigned, as Bidder, hereby declares that the only person or persons interested in the Bid as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Bid or in the Agreement to be entered into; that this Bid or Agreement is made without connection with any other person, company, or parties making a Bid; and that it is in all respects fair and in good faith without collusion or fraud.

The Bidder further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of bids; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Bidder proposes and agrees, if the Bid is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Wastewater Lift Stations Rehabilitation"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The Bidder proposes to furnish all materials, equipment, labor, and perform the work submitted in their bid schedule for the City of St. Pete Beach **" Wastewater Lift Stations Rehabilitation."**

III. GENERAL CONTRACT TERMS

REQUEST FOR BID

The City of St. Pete Beach is submitting this RFB for bids on the Wastewater Lift Stations Rehabilitation.

LOCATIONS

The City of St. Pete Beach is soliciting bids for Wastewater Lift Stations Rehabilitation within the City of St. Pete Beach. Access to the work sites shall be over streets, and walkways. Any damage to existing pavement surface and base or other surface improvements outside the Contract Pay Limits, attributable to the Contractor's activities, shall be restored to like-new condition by the Contractor at the Contractor's expense.

BID SUBMITTALS

Bid documents must include a signed/notarized Contractor's Bid Submittal, Bid Form, References, Contractor's license and insurance certificates, and Public Entity Criminal Affidavit. The Contractor shall submit one electronic bid via Bonfire.

BIDDER INFORMATION

The City is not responsible for any Addendums or other supplementary information that is not received due to non-submittal of the aforementioned information. Please refer back to the city website (http:// www.stpetebeach.org/news-and-links/city-projects.html) for additional project information as it becomes available. The City reserves the right to decide whether to answer addendums or not. The City is not required to provide any additional information.

PRE-BID MEETING

An optional pre-bid meeting will be held on **03/25/2026 at 11:00 AM EST** via Microsoft Teams Video conference/Teleconference. Please contact the City's Procurement Manager (purchasing@stpetebeach.org) for a meeting invitation and Microsoft Teams Meeting instructions.

WRITTEN REQUESTS FOR INTERPRETATIONS/CLARIFICATIONS

No oral interpretations will be made to any firms as to the meaning of the scope of work or any other contract documents included in this **RFB.** All questions pertaining to the terms and conditions or scope of work of this Request for Bid **(RFB)** must be sent in writing only via email to the City Procurement Manager (purchasing@stpetebeach.org) and shall be received no later than **10:00 EST on 04/01/2026**. Responses to questions may be handled as an Addendum if the response would provide clarification to the requirements of the **RFB**. All such Addenda shall become a part of the contract documents. The City will not be responsible for any other explanation or interpretation of the proposed **RFB** made or given prior to the award of the contract. The City will not respond to questions received after the specified deadline. The City reserves the right to respond to any and all questions but is not required to do so.

BID PACKAGES

Sealed bids will be accepted by the City until **04/18/2026** at **9:00 AM** EST (Deadline). No bids shall be accepted by the City after this deadline – NO EXCEPTIONS. Bid Packages must be electronically submitted via Bonfire Clearly marked as: "**Wastewater Lift Stations Rehabilitation**." If a link is needed for either site, please contact the Procurement Manager (purchasing@stpetebeach.org.) All Bidders are invited to attend this bid opening.

Please see Technical Specifications at the end of this document, VII. Specifications.

SCHEDULE

Maintenance, cleaning and inspection shall be scheduled per occurrence and may include the full asset inventory or a portion of that inventory for each cycle. Maintenance cycles are to be performed quarterly, or more frequently as-needed, based on City requirements.

Tidal check valve, manatee grate, and other miscellaneous outfall repairs shall be scheduled per occurrence, as-needed.

The Contractor must provide at least 72 hours' notice for scheduling changes. Emergency response for unscheduled maintenance requests must be available within 24 hours.

PERFORMANCE METRICS

The following performance metrics will be used to evaluate the Contractor's work:

- Timeliness of completing tasks as per the agreed schedule.
- Accuracy and thoroughness of written condition reports.
- Compliance with safety standards and regulations.
- Responsiveness to unscheduled maintenance requests.

All reports must be submitted in a digital format (PDF or Word) within ten (10) days of completing each maintenance cycle. Reports should include:

- Detailed descriptions of completed tasks.
- Photographic and video evidence.
- Identified issues and recommendations for future maintenance.

PENALTIES

Failure to adhere to the schedule or meet performance standards may result in penalties, including:

- 5% reduction in payment for delayed work (per day).
- Rework at Contractor's expense for substandard services.

EMERGENCY SERVICES

The Contractor must provide emergency maintenance services within 24 hours of the City's request. The bid form includes an emergency call-out fee to account for this service.

Once a contract is awarded, the selected vendor will be required to submit a detailed fee schedule outlining the main pay items for the project. This fee schedule will be reviewed at the pre-construction meeting and will be used to review pay applications and evaluate project progress.

DETAILED SPECIFICATIONS

LOCATIONS

The locations will cover the above listed addresses for the lift stations under "Scope of Work."

Standard work hours shall be from 7:30 AM until 6:00 PM, Monday through Saturday. No work shall take place on Sundays or on official City holidays without prior approval by the City Manager or designee at least 1 week prior to the scheduled work. A list of current official City holidays can be found on the City's Human Resources website at http://www.stpetebeach.org/hr/holidays.html. Contractor will coordinate scheduling of work with the City's Project Manager and City's Inspector.

ADDITIONAL WORK DETAILS

Contractors or persons wishing to bid on this project are licensed, bondable and insured in accordance to the City's requirements. The Contractor will furnish all necessary labor, materials, tools, equipment and supplies to complete the scope of work. Bid must also include all costs for licenses, permits, and any material disposal fees.

Bidders shall bring questions, discrepancies, omissions, conflicts or doubt as to meaning of any part of Contract Documents to the attention of the City of St Pete Beach Procurement Manager at least ten (10) business days before bid submittal deadline. Clarification of intent of Contract Documents, if necessary, shall be made available to bidders in the form of an Addendum. Failure to request clarification of interpretation of Contract Documents shall not relieve bidders of their responsibilities to perform the work.

The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids, or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach.

STATEMENT OF WORK

The Contractor shall furnish and pay the cost, including sales tax and all other applicable taxes, licenses, permits and fees, of all the necessary materials not furnished by the City and shall furnish and pay for all

the superintendence, labor, tools, equipment, transportation, and perform all the work required for the execution of all services listed in the Bidder's Proposal and Bid Form attached hereto and in strict accordance with the Plans, Specifications, and requirements of the City of St. Pete Beach which are attached hereto and made a part hereof, and any amendments thereto and such supplemental Plans and Specifications which may hereafter be approved.

BEGINNING DATE

The Contractor shall, within ten (10) business days after receipt of the Notice of Award and before commencement of any operations hereunder, execute the Agreement. Additionally, the Contractor shall, within twenty (20) business days after receipt of the Notice of Award, provide all required documentation to the City. The Contractor must commence construction activities within thirty (30) business days of NTP to prepare and procure materials. Any change to the start date or the work schedule included with this bid must be submitted in writing to and approved by the City Manager or designee.

COMPLETION OF WORK

The work will be completed on an as-needed basis. Each location that needs to be surveyed, repaired and/or worked on will constitute it's own "job". The contract will be for (3) three years from time of execution (Date of last signature) of the contract with (2) additional (1) one year extensions if agreed upon by the City and vendor. .

EXAMINATION OF SITE

Bidders may visit specific areas with advanced notice.

ASSURANCES

The responding Contractor shall provide a statement of assurance that the Contractor is not presently in violation of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida, and ordinances and regulations of the City of St. Pete Beach will apply.

TRAFFIC CONTROL AND STAGING AREA

Contractor shall include all costs associated with vehicular and pedestrian traffic control and maintenance during the project. Contractor shall be responsible for providing a staging area. The location of this area must be approved by the City Manager or designee. The Contractor will be required to control the area including any additional fencing or barricades and Contractor will be responsible for the restoration of this and all other staging areas provided by the City.

ASSIGNMENT AND TRANSFER OF CONTRACT

The Contractor shall not assign or transfer this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety, and any such assignment or transfer without such written consent shall be null and void.

SUBCONTRACTS

The Contractor shall not subcontract this Agreement or any part thereof or any interest therein without consent in writing of the City and the Contractor's Surety. Any Subcontractor approved by the City will be subject to the same standards and qualifications as stated in this Contract.

PERFORMANCE PAYMENT BOND

Not required for this contract.

LIQUIDATED DAMAGES

If the work embraced by this Contract is not completed on or before the date set for completion or any extension thereof, the actual damages for the delay will be impossible to determine and in lieu thereof, the Contractor shall pay to the City fixed, agreed, and liquidated damages in the amount of either Five-Hundred Dollars ($500) per day for each calendar day of delay until the work is satisfactorily completed.

PAYMENT

Payment shall be made to the Contractor for work performed under this Contract for the quantities of work as determined in accordance with Payments for Work Completed and Payments Withheld of this Contract. Payment for extra work will be made in accordance with the Changes in Work, Contract Amount, and Contract Time sections below.

CHANGES IN THE WORK

Without invalidating the Contract, the City may, at any time or from time to time, order additions, deletions or revisions in the work authorized by written Change Orders or directives. Upon receipt of a Change Order, the Contractor will proceed with the work involved. All such work shall be executed under the applicable conditions of the Contract documents. If any Change Order causes an increase or decrease in the Contract Amount or any extension or shortening of the Contract Time, an equitable adjustment will be made.

Additional Work performed by the Contractor without authorization of a Change Order will not entitle them to an increase in the Contract Amount or any extension of the Contract Time, except in the case of an emergency (subject to approval by City Manager or designee).

It is the Contractor's responsibility to notify their Surety of any changes affecting the general scope of the Work or change of the Contract Amount and the amount of the applicable bonds shall be adjusted accordingly, and an amended bond document furnished to the City. In the event the City directs the Contractor to make a change in the Work, and if the City and the Contractor do not arrive at a mutually acceptable increase or decrease in the Contract Amount, the contractor shall not use any such lack of mutual acceptance as a basis or cause to stop or otherwise delay the progress or the execution and completion of any of the work ordered, directed or required pursuant to the Contract Documents.

If the Contractor believes an event or situation has occurred which justifies a change in the Contract Amount or Contract Time, he shall deliver a written notice to the City Manager or designee. Each such written notice shall be delivered promptly and no later than fifteen (15) business days after the Contractor first discovered the occurrence. The Contractor shall be deemed to have waived the right to collect any and all costs incurred more than fifteen (15) business days prior to the date of delivery of the written notice and shall be deemed to have waived the right to seek an extension of the Contract Time with respect to any delay in the Progress Schedule which accrued more than fifteen (15) business days prior to the date of delivery of the written notice.

Any such notice shall include sufficient detail to explain the basis of entitlement to a claim for an adjustment to the Contract Amount of Contract Time. When requested by the City Manager or designee, the Contractor shall furnish any additional information and details as may be required to determine the facts or allegations involved, which shall be provided within fifteen (15) business days of the request unless a longer time period is allowed by the City Manager or designee.

The Contractor shall prepare bids detailing proposed adjustments to Contract Amount and/or Contract Time and submit them to the City Manager or designee within fifteen (15) business days of the City's issuance of a proposed Change Order or the Contractor's submitting a written notice of a change or claim for an adjustment to the Contract Amount or Contract Time. Contractor's bids shall be irrevocable for a period of at least sixty (60) business days after receipt by the City. Any delay in the submittal of a complete, adequate and acceptable bid will not justify an increase in Contract Amount or Contract Time. Contractor agrees that it shall give the City access to any and all of Contractor's and Subcontractors' books, records and other materials relating to proposed Change Orders and other claims for adjustment to Contract Amount or Contract Time.

CHANGE OF CONTRACT AMOUNT

The Contract Amount constitutes the total compensation payable to the Contractor for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Contractor shall be at his expense without change in the Contract Amount. The Contract Amount may only be changed by written Change Order issued by the City. Any claim for an increase in the Contract Amount shall be in writing and delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim.

All claims for adjustment in the Contract Amount shall be determined by the City Manager or designee. However, no claim for an adjustment to the Contract Amount will be considered for unforeseeable causes that were beyond the fault or negligence of the Contractor or his Subcontractors or supplier such as acts of God, floods, riots, etc. This restriction does not restrict submission of claims for additional Contract Time due to events of this nature. Any change in the Contract Amount shall be incorporated in a Change Order.

Contractor bids or claims shall cover all aspects of the Work involved and shall be fully documented and itemized as to all costs, quantities and charges for overhead and profit. Amounts for Subcontractors or Suppliers at any tier shall be similarly supported. When determining Subcontractors' costs, the methods to

be used shall be those used for the Contractor's costs, except that the term "Subcontractor" shall replace the term "Contractor," context permitting.

Changes in Contract Amount for extensions in Contract Time shall exclude costs that are unaffected or do not relate to the extension in Contract Time, such as: (a) operating costs of construction equipment assigned to the Work on a continuing basis, (b) operating costs and owned/rental costs of construction equipment (crane used for specific lifts, concrete pump used for specific pours, etc.), and (c) fully paid site facilities, tools, etc.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Amount where the Work involved is covered by unit prices contained in the Contract Documents shall be determined by application of unit prices to the quantities of the items involved. If the quantities originally contemplated are so changed in a proposed Change Order, that application of the Unit Prices to the quantities proposed will cause substantial inequity to the City or the Contractor, the applicable unit price(s) shall be equitably adjusted by mutual agreement.

If the value of work covered by a Change Order cannot be established or mutually agreed to utilizing previously established unit rates, the value shall be determined by the City on the basis of an estimate of the out-of-pocket cost and percentages that are acceptable to the City for overhead and profit. The out-of-pocket cost shall only include those direct costs which are needed to perform the work such as labor (including payroll taxes, fringe benefits, labor burden and workers' insurance), materials, equipment, and other incidental out-of-pocket construction costs directly involved in the work, including but not limited to small tools, expendables and material costs but shall not include project management or project supervisory costs unless the Change Order includes an increase in the Contract time.

In such case, the Contractor will submit in the form prescribed by the City an itemized cost breakdown together with supporting data.

The amount of credit to be allowed by the Contractor to the City for any such change which results in a net decrease in cost, will be the amount of the actual net decrease as determined by the City. When both additions and credits are involved in any one change, the combined overhead and profit shall be figured on the basis of the net increase, if any.

To be eligible for consideration, the Contractor's written claim for a change in the Contract price, including claim(s) from sub-contractors, shall include an itemized cost breakdown with supporting data as described below:

A. For labor: Provide written documentation from the Contractor and Subcontractors or others as appropriate in the form of a detailed breakdown by each labor classification involved indicating the number of hours of Work involved and the hourly payroll rate applicable to each to substantiate the basis and amount of the direct labor cost. The direct labor cost may be increased to provide an allowance for indirect payroll costs (labor burden), such as payroll taxes, fringe benefits, and workers insurance after all premium discounts, rebates and other appropriate reductions have been taken.

B. For material, supplies, equipment, furnishings, etc., to be installed or included in the Work: Provide written documentation from the Contractor and Subcontractors, suppliers, etc., to substantiate the basis and amount of the various cost items involved. Material costs shall reflect the Contractor's reasonably anticipated net actual cost after consideration of trade discounts and volume rebates.

C. For construction equipment: Provide written documentation in the form of a detailed breakdown by each construction equipment category, indicating the applicable unit rates (i.e., dollar amount per hour, dollar amount per day etc.,) and the number of hours, days, etc. to substantiate the basis and amount of the construction equipment out-of-pocket costs.

CHANGE OF CONTRACT TIME

The Contract Time may only be changed by written Change Order. Any claim for an extension in the Contract Time shall be in writing and include an analysis of the Progress Schedule as further described in the Specifications and shall be delivered to the City Manager or designee within fifteen (15) business days of the occurrence of the event giving rise to the claim. All claims for adjustment in the Contract Time shall be determined by the City Manager or designee. Any change in the Contract Time resulting from any such claim shall be incorporated in a Change Order. The Contract Time may be extended for an amount equal to time lost due to unforeseeable causes beyond the control of the Contractor (and his Subcontractors and Suppliers) if he makes a claim therefrom. Such delays shall include, but not be restricted to, acts or neglect by any separate Contractor employed by the City; fires; floods; labor disputes; epidemics; or acts of God.

All time limits stated in the Contract Documents are of the essence to the Contract. The stated time limits are agreed to be adequate to complete the work, including the procurement, manufacture and delivery of all material and equipment required, and account for any and all potential impact, delays, disruptions and costs that may be expected.

CITY'S RIGHT TO DIRECT PURCHASE

The City has reserved the right to purchase certain items and materials for this project directly in an effort to save applicable sales tax in compliance with Florida Law.

The City will issue purchase orders directly to the vendors supplying the equipment being directly purchased by the City for this project. Each Purchase Order will be accompanied by the City's Certificate of Exemption and a Certificate of Entitlement. All direct purchase vendor invoices will be issued to the City of St. Pete Beach, and the City will issue payment to each direct purchase vendor from City funds. The City will take title to the equipment at time of delivery from the vendor and will issue a separate Certificate of Entitlement for each purchase order.

The Contractor shall assist the City with receipt of materials furnished by the City in accordance with these Special Provisions including, but not limited to, verifying correct quantities, verifying documents of orders in a timely manner, providing and obtaining all warranties and guarantees required by the Contract Documents, assist with inspection of the goods at the time of delivery and notify the City immediately of any deficiencies noted. It is understood that the owner assumes the risk of damage or loss during the time that the building materials are physically stored at the job site prior to their installation or incorporation into the project. The Contractor shall coordinate with the City regarding the delivery schedules, sequence of delivery, loading orientation, and other arrangements normally required by the Contractor for the particular material furnished.

As City Furnished Materials are delivered to the job site and accepted by the City, the City shall notify the Contractor who will assist the City to visually inspect all shipments from the suppliers. The City will approve the vendor's invoice for material delivered upon adequate inspection and recommendation of the Contractor. The City shall assure that each delivery of City Furnished Materials is accompanied by documentation adequate to identify the Purchase Order against which the purchase is made and Contract Documents including but not limited to Contract, Plans, Specifications, and approved Shop Drawings. This documentation may consist of a delivery ticket, bill of lading and an invoice from the supplier conforming

to the Purchase Order together with such additional information as the City may deem necessary.

PAYMENTS FOR WORK COMPLETED

Partial payments will be made as the work progresses (if applicable) at the end of each calendar month, or as soon thereafter as practicable on estimates made by the City Manager or designee and as approved by the City, provided that the Contractor is performing the overall job in a diligent manner. In making partial payments, there shall be retained five percent (5%) on the amount of each estimate until final completion and acceptance of all work covered by the Contract. Upon completion and acceptance of the work, the City Manager or designee shall issue a certificate that the work has been completed and accepted by them under the conditions of the Contract and shall make and approve the final estimate of the work. The entire balance found to be due the Contractor, including that retained by the City, should be paid to the Contractor. Such payment shall be conditioned, however, upon the submission by the Contractor of evidence satisfactory to the City that all claims for labor, material, and any other outstanding indebtedness in connection with the Contract have been paid. Such payment shall also be conditioned upon approval and acceptance of the construction and improvements by the City.

If after the work has been substantially completed, full completion thereof is materially delayed through no fault of the Contractor and the City Manager or designee so certifies, the City shall upon the Certificate of the City Manager or designee, and without terminating the Contract make payment for the balance due for that portion of the work fully completed and accepted. Such payment shall be made under the terms and conditions governing final payment, except that it shall not constitute a waiver of claim. If such delay occurs and payment is made under this clause, the Contractor shall nevertheless be prepared to complete the work in a timely manner upon the remedy or removal of such delay, and shall be bound under this Contract for the completion of such work unless this Contract is otherwise terminated. All payments will be made in accordance with the Local Government Prompt Payment Act, Chapter 218, Florida Statutes.

PAYMENTS WITHHELD

The City Manager or designee may withhold, or, on account of subsequently discovered evidence, nullify the whole or part of any estimate to such extent as may be necessary to protect the City from loss on account of:

a) Defective work not remedied

b) Claims and/or liens filed or reasonable evidence indicating probable filing of claims

c) Failure of the Contractor to make payments properly to Subcontractors or for material or labor

d) A reasonable doubt that the Contract can be completed for the balance then unpaid

e) Damage to another Contractor

f) Failure of the Contractor to keep their work progressing in accordance with their time schedule

FINAL PAYMENTS

Upon the completion and acceptance of the work, the City Manager or designee shall issue a certificate that designates that the whole work provided for in this Contract has been completed and accepted by him under the conditions and the terms thereof and shall make the final estimate of the work. After issuance of the certificate, the entire balance found to be due the Contractor, including said retained percentage by the City in accordance with existing state laws as may be retained lawfully by said City, shall pay excepting such

sums to the Contractor.

Before the approval of the final payment, the Contractor shall submit evidence satisfactory to the City that states that all payrolls, materials, bills and outstanding indebtedness in connection with this Contract have been paid.

LIENS

If at any time there shall be evidence of any lien or claim for which the City might become liable and which is chargeable to the Contractor, the City shall have the right to retain out of any payment then due or thereafter to become due, an amount sufficient for complete indemnification against such lien or claim. In the event the City has already paid to the Contractor all sums due under this contract or the balance remaining unpaid is insufficient to protect the City, the Contractor and his Surety shall be liable to the City for any loss so sustained.

RESPONSIBILITY OF THE CITY MANAGER OR DESIGNEE

The term "City Manager or designee" wherever used in the Contract shall be the City of St. Pete Beach or its duly authorized representative. Notices of any change in the City Manager or designee shall be given in writing by the City to the Contractor. The City Manager or designee shall have full authority to interpret the Plans and Specifications and shall determine the amount, quality, and acceptance of the work and supplies to be paid for under the Contract and every question relative to the fulfillment of the terms and provisions therein. It shall be the duty of the City Manager or designee to enforce the Plans and Specifications in a fair and unbiased manner. If a variation from any requirements is allowed the City Manager or designee shall grant the same in writing with the reasons for his action outlined, and such action will not invalidate or change the Contract in any other manner.

INTENT OF PLANS AND SPECIFICATIONS

The Contractor shall keep on the job a copy of the Plans and Specifications and shall at any time give the City Manager or designee access thereto. Anything mentioned in the Specifications and not shown on the Plans or shown on the Plans and not mentioned in the Specifications, shall be of like effect as if shown or mentioned in both. The Contractor shall not take advantage of any errors, discrepancies or omissions that may exist in the Plans and Specifications but shall immediately call them to the attention of the City Manager or designee whose interpretation or correction thereof shall be conclusive. Should a conflict occur between the General Specifications and any Supplemental Specifications and/or Plans, the latter shall govern.

LICENSES AND PERMITS

The Contractor shall obtain and pay for all necessary City licenses and work permits and shall faithfully comply with all laws, ordinances and regulations, (Federal, State or local) which may be applicable to the operations to be conducted hereunder, except for those permits obtained by the City. Notwithstanding the provisions above, the contractor is responsible for non-compliance of all permit requirements, including all fines resulting from Contractor's non-compliance of said requirements.

Chapter II, Section II-4, "Registration of Licenses Obtained From Other Municipalities:" "Persons, partnerships, corporations, or other business entities doing business with the City who are not required to obtain a City occupational license, but who must have either a State or County or Municipal occupational license from another municipality, shall register such occupational license with St. Pete Beach Community Development Department. The City may charge a fee for such registration." The Contractor shall be

responsible for obtaining all City, County, State and Federal permits required by those government agencies and must provide documentation of receipt of those permits prior to project commencement. This shall include a notice to commence work letter and the applicable fee, if required. Any sub-contractor hired by the contractor awarded the project, MUST also register their license with the City.

SUPERINTENDENCE

The Contractor shall constantly superintend all the work embraced in this Contract in person or by a responsible agent who shall have in writing, full authority to act for them and to carry out all the instructions given by the City Manager or designee.

LABOR PROVISIONS

The Contractor and his Subcontractors shall discharge, whenever ordered to do so by the City Manager or designee, any employee who is disorderly or whose conduct in the opinion of the City Manager or designee is detrimental to the prosecution of the work. No person whose age or physical condition is such as to make this employment dangerous to his/her health and safety or to the health and safety of others shall be employed on the work, and in no event shall any persons under the age of sixteen (16) years be employed.

INSURANCE

The Contractor shall procure and maintain at his/her own expense, during the life of the Contract, liability insurance as hereinafter specified. All such insurance shall be subject to the approval of the City for adequacy of protection and shall include a provision preventing cancellation without twenty (20) business days prior notice to the City in writing. The City shall be included as an additional insured on all liability insurance. The liability insurance required is as follows: Contractor's General Public Liability and Property Damage Insurance issued to the Contractor and protecting the Contractor from all claims for personal injury, including death, and all claims for destruction of or damage to property, arising out of or in connection with any operations under this Contract, whether such operations be by the Contractor or by any Subcontractor hired by the Contractor or anyone directly or indirectly employed by the Contractor or hired by the Contractor.

The successful Contractor shall supply and maintain insurance which defends, indemnifies and holds harmless the City of St. Pete Beach, its officers, employees and agents from and against any and all liability, damage claims, demands, costs, judgments, fees, attorney's fees or loss arising directly out of acts or omissions hereunder by the Contractor or third party under the direction or control of the Contractor. Such general and excess liability coverage shall be primary to any other coverage carried by the City of St Pete Beach. Contractor must furnish the City with Certificate of Insurance prior to commencement of work. An approved Certificate of Insurance furnished by the Contractor's carrier to guarantee the Contractor being insured with the City of St Pete Beach must be named as a certificate holder for this contract. The following minimum coverage:

- Commercial General Liability Insurance $1,000,000.00.
- Comprehensive General Liability Insurance of $1,000,000.00 each occurrence.
- Personal Injury for $1,000,000.00 each occurrence.
- Automobile Liability $1,000,000.00.
- General Workers Compensation Insurance as required by Florida law.
- Longshore Harbor Workers Compensation Insurance

PROTECTION OF WORK AND PROPERTY

The Contractor shall continuously maintain adequate protection of all their work and materials from damage or theft and shall protect the City's property and all adjacent property from injury or loss arising in connection with activities under their Contract. The Contractor shall make good any such damage, injury, or loss, except such as may be caused by agents or employees of the City.

The Contractor shall take, use, provide, and maintain all necessary precautions, safeguards, and protection to prevent accidents, or injury to persons or property on, about, or adjacent to the site of the work. Should the situation arise that physical security is needed the Contractor will provide security on off days and holidays. The Contractor shall be responsible for all charges incurred with such action.

The Contractor shall post danger signs warning against any hazards created by the work being done under their Contract. They shall designate a responsible member of their organization on the work, whose duty shall be the prevention of accidents, and the name of the person so designated shall be reported to the City Manager or designee and City in writing. In an emergency affecting the safety of life, or of the work or adjoining property, the Contractor, without special instruction or authorization from the City Manager or designee, or City, is hereby permitted to act, at their own discretion, to prevent such threatened loss or injury, and they must take such action if so instructed or authorized by the City Manager or designee. The Contractor shall also protect adjacent property as required by law.

PARKING

The Contractor shall arrange with City Manager or designee for temporary parking areas to accommodate construction personnel and construction equipment. Note that limited parking spaces are available in the City of St. Pete Beach. The Contractor will be asked to coordinate with the City's representative on site on a regular basis to minimize the impact on residents and visitors.

TRANSPORTATION, HANDLING AND STORAGE

The Contractor shall transport, handle, protect and store products in accordance with manufacturer's instructions and all environmental regulatory agencies.

VEHICLES

Business vehicles shall be identified on both sides with the name of the company.

ENVIRONMENTAL PROTECTION

It shall be the Contractor's responsibility to implement construction methods, best management practices, and erosion control methods that avoid water pollution as required by the State of Florida Department of Environmental Protection (FDEP), City of St. Pete Beach, and Pinellas County. Any Contractors in violation of the City of St. Pete Beach Regulations, Pinellas County Regulations, Florida Department of Environmental Protection Regulations, or any other regulatory agency regulations shall be the sole responsibility of the Contractor. The Contractor shall hold harmless the City of St. Pete Beach and the City Manager or designee from any fines and litigation resulting from the Contractor's actions. The Contractor shall pay all attorneys' fees, fines, penalties and any other such expenses resulting from the Contractor's actions. The Contractor shall provide all necessary measures to prevent any materials whatsoever from entering the waterway except for those materials, which are shown, on the plans as completed structures. The Contractor shall provide MSDS sheets to the City Manager or designee on all applicable materials before applying those materials. The Contractor shall secure the necessary education, certifications,

licenses and permits required by state and local agencies to operate and manage a construction site, including but not limited to, FDEP requirements related to Coastal Construction Control Line. The Contractor shall abide by all rules and regulations set forth and required by the City of St. Pete Beach's MS4 NPDES Permit.

TIMELY DEMAND FOR STAKES AND INSTRUCTIONS

The Contractor shall provide reasonable and necessary materials, opportunities, and assistance for setting stakes and making measurements, including the furnishing of a rodman, or a chainman at intermittent times during the construction period. They shall not proceed until they have received such stakes and instructions as may be necessary as the work progresses. The work shall be done in strict conformity with such stakes and instructions. The Contractor shall carefully preserve benchmarks, reference points and stakes, and in case of willful or careless destruction, they will be charged with the resulting expense and shall be responsible for any mistakes that may be caused by their unnecessary loss or disturbance.

WORKMANSHIP

The Contractor acknowledges that they have satisfied themselves as to the nature and location of the work; the general and local conditions including but not restricted to those bearing upon transportation, disposal, handling and storage of materials; availability of labor, water, electric power, roads; and uncertainties of weather, surface conditions, subsurface conditions, tides or similar physical conditions at the site, the character of equipment and facilities required to prosecute the work. Any failure by the Contractor to acquaint themselves with any aspect of the work or with any of the applicable conditions shall not relieve the Contractor from the responsibility to successfully perform the work under the Contract Documents, nor shall it be considered the basis for any claim for additional time or compensation.

UTILITIES

The Contractor shall anticipate all underground obstructions such as water lines, gas lines, sewer lines, utility lines, or any other public or private facilities and debris. In all cases where existing utility lines may be interfered with by the work, the Contractor shall give a minimum of thirty-six (36) hours' notice to the owners of such utilities, to permit them to relocate the lines prior to construction. No extra payment shall be allowed for the removal, replacement, repair or possible increased cost caused by underground obstructions. The location of existing structures and utilities provided in the plans are approximate only. Any damage to existing structures to remain or work of any kind shall be repaired or restored promptly by, and at the expense of the Contractor.

The Contractor shall at all times protect all desirable trees, plants, curbs, sidewalks, irrigation components, and structures not requiring removal to accomplish the work, whether or not they are shown on the plans. The Contractor must contact the City to obtain tree removal permits for the removal of any tree not identified for removal in the Project Plans.

In matters of restoration, all materials, construction, and workmanship shall be acceptable to, and approved by the City of St. Pete Beach and the City Manager or designee. No changes in size, shape, configuration, location, materials, or construction shall be made without prior written authorization from the City Manager or designee. Any demolition debris and other debris shall be hauled offsite and properly disposed of by the Contractor and shall be inclusive to the prices as stated in the BID SCHEDULE, unless otherwise stipulated as part of the project to remain.

No interruption of ingress and egress to private property shall be made unless the Contractor has made prior arrangements acceptable to the owner of the affected property. The City Manager or designee shall

notify affected residents/property owners of impending activity or inconvenience via door hanger.

The Contractor shall provide all traffic control devices utilized during construction and meet the requirements set forth in the Florida State Department of Transportation "Manual on Traffic Control and Safe Practices for Street and Highway Construction, Maintenance, and Utility Operations."

CLEANING UP

Upon completion or termination of the work the Contractor shall, as directed by the City Manager or designee, remove from the vicinity of the work all equipment and temporary structures, waste materials and rubbish resulting from his operations, leaving the premises in a neat and presentable condition. All debris generated by the Contractor will be removed before leaving the area. All areas will be raked to remove smaller debris. All surrounding sidewalks, parking lots and roadways will be cleared of any dust or debris generated by the Contractor. In the event of their failure to do so, the City at the expense of the Contractor may do the same, and their Surety shall be responsible.

DEFECTIVE WORK OR MATERIAL

The Contractor shall promptly remove from the premises all work and materials condemned by the City Manager or designee as failing to conform to the Contract, whether incorporated or not, and the Contractor shall promptly replace and re-execute his own work in accordance with the Contract and without expense to the City and shall bear the expense of making good all work of other Contractors destroyed or damaged by such removal or replacement.

If the Contractor does not remove such condemned work or materials within a reasonable time after notice, the City may remove them and store the materials at the expense of the Contractor. If the Contractor does not pay the expense of such removal within ten (10) business days' time thereafter, the City may, upon thirty (30) business days written notice sell such materials at auction or at private sale and shall account for the net proceeds thereof after deducting all the costs and expenses that should have been borne by the Contractor.

DISPUTE RESOLUTION

The Contract shall be construed under Florida law. The parties agree that all controversies, claims and other matters in question between the parties arising out of or relating to this Contract or its breach shall be resolved through mediation. Upon notice of any party to the Contract of a dispute, question or controversy, the parties shall agree to the appointment of a qualified mediator. A qualified mediator is a person who has received at least forty (40) hours of mediation training and has actual experience as a mediator in resolving contract disputes. If the dispute, question or controversy is not resolved through mediation within sixty (60) business days of a notice of the dispute between the parties, the City reserves the right to seek resolution through court action.

INDEMNIFICATION

In consideration of the payment of ten dollars ($10.00) as part of the above purchase price, Contractor shall indemnify, defend, and hold harmless the City, its officers and employees, from liabilities, damages, losses and costs, including but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the responding firm and any persons employed or utilized by the responding firm in the performance of the Contract.

GENERAL WARRANTY

Neither the final certificate nor any provision in the Contract Documents nor partial or entire occupancy of the premises by the City shall constitute an acceptance of work not done in accordance with the Contract Documents or relieve the Contractor of liability in respect to any express warranties or responsibility for faulty materials or workmanship. The Contractor shall remedy any defects in the work and pay for any damage to other work resulting therefrom that shall appear within a period of eighteen (18) months from the date of final acceptance of the work, unless a longer period is specified. The City shall give notice of observed defects with reasonable promptness.

LAND OF CITY, USE OF, BY CONTRACTOR

The City shall provide the land upon which the work under this Contract is to be done, and will, so far as is convenient, permit the Contractor to use as much of the land as is required for the erection of temporary construction facilities and storage of materials, together with the right of access to same, but beyond this, the Contractor shall provide, at his/her cost and expense, any additional land required. It will be the responsibility of the Contractor to repair or restore to the satisfaction of the City, at their own expense, any damage to land used for the above stated activities or any other activities approved by the City.

OTHER WORK

Wherever work being done by the City or by other Contractors is contiguous to work covered by this Contract, the respective rights of the various interests involved shall be established by the City Manager or designee to secure the completion of the various portions of the work in general harmony.

OTHER CONTRACTS

The City may award other Contracts. The Contractor shall fully cooperate with such other Contractors and carefully fit his/her own work to that provided under other Contracts, as may be with the performance of work by any other Contractor or City.

COOPERATIVE PURCHASING

Pursuant to their own governing laws and subject to the agreement of the Contractor, governmental entities may make purchases under the terms and conditions contained in the executed Contract, if agreed to by Contractor. Such purchases are independent of the Contract between the City and the Contractor, and the City is not a party to these transactions. Agencies seeking to make purchases under this Contract are required to follow the requirements of Rule 60A-1.045(5), F.A.C.

DELAYS AND EXTENSION OF TIME

If the Contractor should be delayed at any time in the progress of the work by an act or neglect of the City or the City Manager or designee, or of any employee of either, or by any separate Contractor employed by the City, or by changes ordered in the work, or by strike, lockouts, fire, unusual delay in transportation, unavoidable casualties, or any cases beyond the Contractor's control, or by delay authorized by the City Manager or designee, or by any cause which the City Manager or designee shall decide to justify the delay, then the time of completion shall be extended for such reasonable time as the City Manager or designee may decide. No such extension shall be made for a delay that occurs more than five (5) business days before a claim is made in writing to the City Manager or designee. In the case of a continued cause of delay, only

one (1) claim is necessary. This section does not exclude the recovery of damages for delay by either party under other provisions in the Contract Documents.

CITY'S RIGHT TO TAKE OVER THE WORK

If the Contractor shall be adjudged bankrupt, or if they should make a general assignment for the benefit of its creditors, or if a receiver should be appointed to take over their affairs, or if they should fail to prosecute their work with due diligence and carry the work forward in accordance with its' work schedule and the time limits set forth in the Contract Documents, or if they should fail to substantially perform one or more of the provisions of the Contact Documents to be performed by them, the City may serve written notice on the Contractor and the Surety on its' performance bond, stating the City's intention to exercise one of the remedies hereinafter set forth and the grounds upon which the City bases its right to exercise such remedy. In any event, unless the matter complained of is satisfactorily cleared within ten (10) business days after the service of such notice, the City may, without prejudice to any other right or remedy exercise one of such remedies at once; having first obtained a certificate from the City Manager or designee that such sufficient cause exists to justify such action.

The City may terminate the services of the Contractor, which termination shall take effect immediately upon service of notice thereof on the Contractor and their Surety, whereupon the Surety shall have the right to take over and perform the Contract. If the Surety does not commence performance of the Contract within ten (10) ten days after service of the notice of termination, the City may itself take over the work, take possession of and use all materials, tools, equipment, and appliances on the premises and prosecute the work to completion by such means as it shall deem best. In the event of such termination of their service, the Contractor shall not be entitled to any further payment under their Contract until the work is completed and accepted. If the City takes over the work and the unpaid Contract balance exceeds the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the excess unpaid Contract balance shall be paid to the Contractor. If the City takes over the work and the unpaid Contract balance does not exceed the cost of completing the work, including compensation for damages or expenses incurred by the City through the default of the Contractor, the Contractor and his Surety shall pay the difference to the City. The City Manager or designee shall certify such cost, expenses, and damages.

The City may take control of the work and either make good the deficiencies of the Contractor itself or direct the activities of the Contractor in doing so, employing such additional help as the City deems advisable. In such event, the City shall be entitled to collect from the Contractor and his Surety, or to deduct from any payment then or thereafter due the Contractor, the costs incurred by it through the default of the Contractor, provided the City Manager or designee approves the amount thus charged to the Contractor.

The City may require the Surety on the Contractor's bond to take control of the work at once and see to it that all deficiencies of the Contractor are made good with due diligence. As between the City and the Surety, the entire cost of making good such deficiencies shall be borne by the Surety. If the Surety takes over the work, either upon termination of the services of the Contractor or upon instructions from the City to do so, the provisions of the Contract Documents shall govern in respect to the work done by the Surety, the Surety being substituted for the Contractor as to such provisions, including provisions as to the payment for the work and provisions of this section as to the right of the City to do the work itself or to take control of the work.

RIGHT OF OCCUPANCY

The City shall have the right, if necessary, to take possession of and to use any completed or partially completed portions of the work, if such use be approved by the City Manager or designee even if the time for completing the entire work or such portions of the work has not expired and even if the work has not been finally accepted. Such possession and use shall not constitute an acceptance of such possession and use if it materially interferes with the Contractor's operations. The City shall also have the right to enter the premises with the Contractor for the purpose of doing work not covered by its Contract.

ACCEPTANCE

Final inspection and acceptance of the work shall be made for the City by the City Manager or designee. Such inspection shall be made as soon as practical after the Contractor has notified the City in writing that the work is ready for such inspection.

WAIVER

It is expressly understood and agreed that any waiver granted by the City Manager or designee of any term, provision, or covenants of the Contract shall not constitute a precedent or breach of the same or any other terms, provisions, or covenants of the Contract. Neither the acceptance of the work by the City nor the payment of all or any part of the sum due the Contractor hereunder shall constitute a waiver by the City of any claim which the City may have against the Contractor or Surety under this Contract or otherwise.

INSPECTION

The City Manager or designee and his representative shall, at all times, have access to the work during its construction and shall be furnished with every reasonable facility for ascertaining that the stock and materials used and employed, and the workmanship, are in accordance with the requirements and intentions of the Plans. All work done and all materials furnished shall be subject to their inspection and approval by the City Manager or his designee. If any work should be covered up without approval or consent of City Manager or designee, it must, if required by the City Manager or designee, be uncovered for examination at the Contractor's expense.

The City Manager or designee may order re-examination of questioned work and if so ordered, the Contractor must uncover the work. If such work were found in accordance with the Contract Documents, the City shall pay the cost of re-examination and replacement. If such work be found not in accordance with the Contract Documents, the Contractor shall pay such costs unless they show that the defect in the work was caused by another Contractor, and in that event, the City shall pay such cost.

The inspection of the work shall not relieve the Contractor of any of their obligations to fulfill their Contract as prescribed, and defective work shall be made good and unsuitable materials shall be rejected, notwithstanding that such defective work and materials have been previously overlooked and accepted on estimates for payment. All work shall be tested to the satisfaction of the City Manager or designee before acceptance.

BID REVIEW AND CONTRACT AWARD

Failure to submit all documents requested at the time of bid may deem the Contractor's bid ineligible for award. The City of St. Pete Beach reserves the right to reject any or all bids or parts of bids or accept any bid or part thereof deemed to be in the best interests to the City of St. Pete Beach. The City shall be the sole final judge of qualifications of the bidder to perform service and reserves the exclusive right to accept or reject any bids as it deems to be in the best interests of the City. The City may waive any informality.

LOCAL, STATE AND FEDERAL COMPLAINCE REQUIREMENTS

The laws of the State of Florida do apply to any purchase made under this Request for Bid. Proposers shall comply with all local, state, and federal directives, orders and laws as applicable to their bid and subsequent contracts include but not limited to Equal Employment Opportunity, Minority Business Enterprise, and OSHA as applicable to this contract.

Compliance with Fla. Stat. 448.095:

- Contractor agrees to comply with all applicable portions of Fla. Stat. 448.095. Contractor must use the U.S. Department of Homeland Security's E-Verify System, hhtps://e-verify.uscis.gov/emp, to verify the employment eligibility of all employees hired on or after January 1, 2021 during the term of this Agreement.

- Subcontractors (i) Contractor shall also require all subcontractors performing work under this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement. (ii) Subcontractors shall provide Contractor with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095 (iii) Contractor shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

- Contractor must provide evidence of compliance with Fla. Stat. 448.05 by January 1, 2021. Evidence may consist of, but is not limited to, providing notice of Contractor's E-Verify number.

- Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Contractor may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and rebidding costs (if necessary). Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statue by the Contractor, the Contractor may not be awarded a public agreement for a period of 1 year after date of termination.

RESERVES THE RIGHT

The City reserves the right to accept or reject any and/or all bids, to waive irregularities and technicalities, and to request re-submission. If only one bid is received by the bid date and time listed, the bid may or may not be rejected by the City depending upon bid review and the needs of the City.

The City reserves the right to select a firm with or without additional interviews and may decide to select any of the firms submitting bids. The City reserves the right to award the contract to a responsible proposer submitting a responsible bid, with a resulting negotiated agreement which is most advantageous and in the best interest of the City.

Proposers, bidders, their agents, and associates shall not contact or solicit any City Commission member, City employee, or official regarding this RFB during any phase of the bidding process. Failure to comply with the provision may result in disqualification of the bidder, at the option of the City. Only that individual listed, or an approved designee, as the contact person for this RFB shall be contacted.

SUBMITTAL WITHDRAWAL

After submittals are opened, corrections or modifications to submittals are not permitted, but a responding firm may be permitted to withdraw an erroneous submittal prior to the award by the City Commission, if the following is established:

- That the responding firm acted in good faith in submitting the submittal;
- That in preparing the submittal there was an error of such magnitude that enforcement of the submittal would work severe hardship upon the respondent;
- That the error was not the result of gross negligence or willful inattention on the part of the respondent;
- That the error was discovered and communicated to the City within twenty-four (24) hours of submittal opening, along with a request for permission to withdraw the submittal; or
- The responding firm submits documentation and an explanation of how the error was made.

CONE OF SILENCE

Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

TERMINATION

The resulting contract may be canceled by the City when:

- Sufficient funds are not available to continue its full and faithful performance of this contract.
- There is sub-standard or non-performance of contract.
- The City wishes to terminate at any time and for any reason, upon giving thirty (30) days prior written notice to the other party.

The resulting contract may be canceled by either party in the event of substantial failure to perform in accordance with the terms by the other party through no fault of the terminating party.

FISCAL NON-FUNDING

If funds for the requested services described herein are not appropriated via the annual budget adoption process, the City reserves the right to cancel this Agreement immediately upon written notice to the vendor.

PROJECT RECORDS

The awarded firm shall maintain auditable records concerning the procurement to account for all receipts and expenditures, and to document compliance with the Contract. These records shall be kept in accordance with generally accepted accounting methods, and the City of St. Pete Beach reserves the right to determine the record-keeping method in the event of non-conformity. These records shall be maintained for three (3) years after final payment has been made and shall be readily available to City personnel with reasonable notice, and to other persons in accordance with the Florida Public Disclosure Statutes. Additionally, the awarded firm shall abide by and comply with Florida Statutes regarding public records. Specifically, the firm shall be aware of the provisions found in Section 119.0701, Florida Statutes.

Upon completion of the project, all reports, studies, recommendations, forms, and other project specific information will need to be submitted in paper and in an electronic file format (.PDF, .JPEG) on CD or USB storage device.

IV. REFERENCES & MINIMUM QUALIFICATIONS

Provide at least three (3) or more professional business references with which you have contracted to provide similar services in the past five (5) years. Include the name of the person, its organization and telephone number, fax number, and e-mail address. Include any governmental agencies, with the same contact and descriptive information for which you have provided similar service within the past five (5) years.

Provide a brief description of the history and capabilities of the firm. Describe the types of projects or services the firm performs/has performed and the dollar value of each. Provide information regarding your firm's ability to complete this project. Demonstrate that the firm's personnel have experience with similar projects.

Identify all unresolved and ongoing claims and disputes against your firm in excess of $500,000. Include any claims against the principals of your firm or any claims your company may have against a third party. Provide a history of litigation, including the outcomes, for the past five (5) years.

The responding firm shall provide a statement of assurance that the firm is not presently in violations of any statutes or regulatory rules that might have an impact on the firm's operations. All applicable laws and regulations of the State of Florida and ordinances and regulations of the City of St. Pete Beach will apply.

Provide the overall bonding capacity for the company and provide a history of any claims against the bidder's previous bonds for the past five (5) years.

The City shall be the sole final judge of qualifications of bidder to perform service and reserves the exclusive right to accept or reject any bid as it deems to be in the best interests of the City. The City reserves the right to make such investigation, as it deems necessary, to determine the ability of any proposer to perform the work or service requested. Failure to comply with the requirements of this section may be grounds for rejecting a response.

V. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

by: _____
(Print individual's name and title)

for: _____
(Print name of entity submitting sworn statement)

at: _____
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

_____
(FEIN)

or, if the entity has no FEIN, include the Social Security Number:

_____
(SSN)

by the individual signing this sworn statement:

_____
(Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any bid or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who

knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☐ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VI. NON-COLLUSION AFFADAVIT

STATE OF _____

COUNTY OF _____

I state that I_____of_____,

(Name and Title) (Name of Firm)

am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.
2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.
3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.
4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.
5. _____, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

SECTION 1 - GENERAL

1.01 LOCATION OF THE WORK SITE AND ACCESS

Access to the work sites shall be over streets, and walkways. Any damage to existing pavement surface and base or other surface improvements outside the Contract Pay Limits, attributable to the Contractor's activities, shall be restored to like-new condition by the Contractor at the Contractor's expense.

The nearest addresses for the lift station rehabilitations are shown below:

Lift Station #	Nearest Address:
LS #4	1901 Pass-a-Grille Way, St. Pete Beach, FL 33706
LS #5	600 Pass-a-Grille Way, St. Pete Beach, FL 33706

SW LS #35	208 Pass-a-Grille Way, St. Pete Beach, FL 33706

1.02 SCOPE OF WORK

The Contractor shall furnish all labor, superintendence, materials, power, light, heat, fuel, water, tools, appliances, equipment, supplies, shop drawings, working drawings and other means of construction necessary or proper for performing and completing the work. The Contractor is responsible for obtaining all required permits necessary for the work, including all applications and review fees, other than those permits which may have already been obtained. The Contractor shall perform and complete the work in a speedy and efficient manner consistent with safety of life and property and to the satisfaction of the City, and in strict accordance with the Contract Documents. The Contractor shall repair or restore all structures and property damaged or disturbed during performance of the work.

The cost of incidental work described in this General Section, for which there are no specific Contract Items, shall be considered as part of the general cost of doing the work and shall be included in the prices for the various Contract Items. No additional payment will be made.

The Contractor shall be solely responsible for the means and methods of construction and the adequacy of his workmanship, materials and equipment.

1.03 PROJECT SUMMARY

The Contractor shall furnish all labor, material, equipment and incidentals necessary for rehabilitation of lift stations #4, 5, 9, 10, 11, 12, 13, 14, 15, and storm water lift station 35 including, but not limited to, temporary by-pass pumping, dewatering, gravity main connections, testing, site restoration, maintenance of traffic, and construction of elevated platforms including site fencing and access gates, water services, gravity main, manholes, air release valves, and appurtenances, pump replacement, cleaning of existing valve vaults and wet wells, and lift station control panel replacements. The work shall also include furnishing all labor, material, and equipment necessary for site restoration including but not limited to fill replacement, landscaping, irrigation, grading, clearing and grubbing, pavement repair and replacement, pavement striping, and concrete curb installation.

1.04 CONTRACT DRAWINGS AND SPECIFICATIONS

Where the Contract Drawings and Specifications are not in agreement, the Contract Drawings shall govern. The Contractor shall furnish all labor, equipment, and materials to construct the Project and all miscellaneous and appurtenant work complete in place as specifically described and included under said each Contract Pay Item as shown, specified, or directed by the Engineer in accordance with the obvious or expressed intent of the Contract.

The Technical Specifications for the Project that reference FDOT-SSRBC (Florida Department of Transportation - Standard Specifications for Road and Bridge Construction) pertain to the most recent edition at the date of issuance of these Specifications.

1.04.01 COPIES FURNISHED TO CONTRACTOR

The Contractor shall furnish each of the subcontractors, manufacturers, and material men such copies of the Contract Documents as may be required for their work. Additional copies of the Contract Drawings and Specifications, when requested, may be furnished to the Contractor at cost of reproduction.

1.04.02 SUPPLEMNTARY DRAWINGS

When, in the opinion of the City, it becomes necessary to explain more fully the work to be done or to illustrate the work further or to show any changes which may be required, drawings known as Supplementary Drawings, with specifications pertaining thereto, will be prepared by the Engineer and the City and provided to the Contractor.

1.04.03 CONTRACTOR TO CHECK CONTRACT DRAWINGS AND DATA

The Contractor shall verify all dimensions, quantities and details shown on the Contract Drawings, Supplementary Drawings, Schedules, Specifications or other data received from the City or the Engineer and shall notify the City and Engineer of all errors, omissions, conflicts, and discrepancies found therein. Failure to discover or correct errors, conflicts or discrepancies shall not relieve the Contractor of full responsibility for unsatisfactory work, faulty construction or improper operation resulting therefrom nor from rectifying such conditions at the Contractor's own expense. The Contractor shall assume

all responsibility for the making of estimates of the size, kind, and quality of materials and equipment included in work to be done under the Contract with approval by the City.

1.05 FIELD ENGINEERING

The Contractor shall establish and provide all vertical and horizontal control points for this Project including benchmarks. The Contractor shall provide the field layout surveying necessary to properly construct the work as indicated on the Contract Drawings.

All field layout surveying shall be performed under the supervision of a Professional Land Surveyor (Chapter 472, Florida Statutes). The Contractor shall submit the name and registration number of Surveyor as directed by the Engineer. The Engineer reserves the right to check all survey staking and to require adjustments or re-staking by the Contractor in the event that conflicts, or errors are detected.

Water pressure pipelines that are 8-inch or less diameter shall be installed with the required cover using horizontal control stakes provided by the Contractor. Storm drains, sanitary sewers, sanitary pressure pipelines, and water pressure pipelines greater than 8-inch diameter shall be installed using an approved method for line and grade control. Methods for line and grade control shall be submitted to the Engineer for review and acceptance, as specified for shop drawings. Sketches shall be provided by the Contractor showing vertical adjustment necessary for pressure pipelines to adequately clear storm drains and other utilities, unless otherwise shown on the Contract Drawings.

1.06 SAFEGUARDING SURVEY MARKS

The Contractor shall safeguard all existing property monuments, benchmarks, and other survey marks adjacent to and within the Project limits and shall bear the cost of re-establishing them if disturbed or destroyed.

1.07 INSPECTION AUTHORITY

The City or Engineer has ultimate responsibility for contract administration and inspection for this Project. The City or Engineer may assign field inspection responsibilities to a Design Professional and/or City Inspector. Each step of construction is subject to review and acceptance by the City or Engineer prior to proceeding with a subsequent step.

During the progress of the Work and up to the date of final acceptance, the Contractor shall at all times afford representatives of the City, the County, the State, the Department of Environmental Protection, the Department of Transportation, the Department of Labor, or any other agency with jurisdiction, every reasonable, safe, and proper facility for observation of the work done or being done at the site, and also the manufacture or preparation of materials and equipment at the place of such manufacture or preparation.

The Project line of authority will be presented at the Preconstruction Conference.

1.08 PROJECT SCHEDULE

The Contractor shall submit an electronic version in PDF form within 30 days following the Preconstruction Conference.
Scheduling and progress reporting shall be accomplished using a bar chart to provide a clear and concise comparison of progress.

1.09 MATERIALS AND EQUIPMENT

All materials, appliances, and types of construction shall be in accordance with the Technical Specifications and shall, in no event, be less than that necessary to conform to the requirements of any applicable laws, ordinances, and codes.

All materials and equipment to be incorporated into the Work shall be new, unused, and correctly designed. They shall be of standard first grade quality, produced by expert workmen, and be intended for the use for which they are offered. Materials or equipment which, in the opinion of the Engineer, are inferior or of a lower grade than indicated, specified, or required, will not be accepted.

Projects funded by the State Revolving Fund must comply with the requirements of the American Iron and Steel Requirement unless otherwise specified in the Contract Documents and approved by the Engineer.

1.10 MANUFACTURER

The names of proposed manufacturers, manufacturers' representatives, suppliers, and dealers who are to furnish materials, equipment, or other fittings, shall be submitted by the Contractor to the Engineer for review and acceptance. Such acceptance must be obtained before Shop Drawings will be accepted for review. All transactions with the manufacturer and subcontractors shall be through the Contractor.
Any two or more pieces of material or equipment of the same kind, type, or classification and being used for identical types of service, shall be made by the same manufacturer.

Projects funded by the State Revolving Fund must comply with the requirements of the American Iron and Steel Requirement unless otherwise specified in the Contract Documents and approved by the Engineer.

1.11 SAMPLES

The Contractor shall, when required, submit to the Engineer for review and acceptance, typical samples of material and appliances. The samples shall be properly identified by tags and shall be submitted sufficiently in advance of the time when they are to be incorporated into the Work so that rejections thereof will not cause delay. A letter of transmittal from the Contractor requesting approval shall accompany all such samples.

1.12 EQUIVALENT QUALITY

In the Contract Documents, whenever an article, material, apparatus, equipment, or process is called for by trade name or by name of a patentee, manufacturer, or dealer, or by reference to

catalog of a manufacturer or dealer, it shall be understood as intending to mean and specify the article, material, apparatus, equipment, or process designated, or any equal thereto in quality, finish, design, efficiency, and durability, and equally serviceable for the purposes for which it is intended.

Whenever material or equipment is submitted for review as being equal to that specified, the submittal shall include sufficient information and data to demonstrate that the material or equipment conforms to the Contract requirements. The decision as to whether such material or equipment is equal to that specified shall be made by the Engineer.

Upon rejection of any material or equipment submitted as the equivalent of that specifically named in the Contract, the Contractor shall immediately proceed to furnish the designated material or equipment.

Neither the acceptance by the Engineer of alternate material or equipment as being equivalent to that specified, nor the furnishing of the material or equipment specified, shall in any way relieve the Contractor of responsibility for failure of the material or equipment, due to faulty design, material, or workmanship, to perform the functions required of them by the Contract Documents.

1.13 MATERIAL AND EQUIPMENT DELIVERY AND STORAGE

The Contractor shall deliver materials in ample quantities to ensure the most speedy and uninterrupted progress of the work to complete the work within the allotted time. The Contractor shall also coordinate deliveries to avoid delay in, or impediment of, the progress of the work of any related contractor. The Contractor shall provide space for storage of materials and equipment.

Pipe strung along roads and rights-of-way shall be placed in a manner that will not endanger or restrict pedestrian or vehicular traffic. Pipe strings shall not be allowed outside right-of-way limits.

1.14 SERVICE OF MANUFACTURER'S REPRESENTATIVE

The Contract amount shall include but is not limited to the cost of furnishing a competent and experienced representative of the equipment manufacturer who shall assist the Contractor, when required, to install, adjust, test, and place in operation the equipment in conformity with the Contract Documents. After the equipment is placed in operation, the representative shall make all adjustments and tests required by the Engineer to prove that the installed equipment is in proper and satisfactory operating condition. The representative shall instruct personnel as may be designated by the Engineer in the proper operation and maintenance of such equipment.

1.15 CONTAMINANTS CONTAINMENT/DISPOSITION

Prior to the installation of well points for dewatering, the Contractor shall visually inspect the work area for indications of existing ground water monitoring, wells, or metal caps at grade. The Contractor shall review the work area for monitoring wells or abandoned fuel tanks and shall notify the Engineer in writing if any of the above items exist.

During dewatering activities, contractor to test water for contaminants before discharge. If the water is odorous, contaminated, or discolored (excluding tannic acid or iron), the Contractor shall stop the dewatering activities and shall notify the Engineer in writing of such, and request direction.

When work activities encounter or expose any abnormal condition that may indicate the existence of a hazardous or toxic waste, work activities shall stop in the vicinity of the abnormal condition and the Contractor shall notify the Engineer immediately. The presence of tanks or barrels; discolored earth, metal, wood, or groundwater; visible fumes; abnormal odors; excessively hot earth; smoke; or other conditions that appear abnormal, may be signs of hazardous or toxic wastes and shall be treated with extraordinary caution.

Every effort shall be made by the Contractor to minimize the spread of any hazardous or toxic waste into uncontaminated areas.

The Contractor's operations shall not resume until directed in writing by the Engineer.

Disposition of the hazardous or toxic waste will be made in accordance with the requirements and regulations of any City, County, State, or Federal agency having jurisdiction.

1.16 PREVENTION, CONTROL, AND ABATEMENT OF EROSION AND WATER POLLUTION

The Contractor shall be responsible for prevention, control, and abatement of erosion, siltation, and water pollution resulting from construction of the Project until final acceptance of the Project.

The Contractor shall implement all appropriate turbidity management practices at the point of discharge into a storm sewer, gutter, or other conveyance to ensure that state water quality standards are not violated at the point where the storm drain, gutter, or other conveyance discharges into a surface water.

All necessary provisions shall be taken to ensure compliance with the water quality standards of the State of Florida. Attention is called to Chapter 62-302, Florida Administrative Code, and in particular, the requirements that turbidity shall not exceed 29 NTUs above background level. Adequate silt containment procedures and equipment shall be used to control turbidity, at no additional cost to the City.

1.17 MAINTENANCE OF STORM DRAINAGE SYSTEM

The Contractor shall be responsible at all times to maintain the operation of existing stormwater facilities, or, when existing stormwater facilities are removed, to provide equivalent capacity alternate forms of stormwater removal adequate to prevent upstream flooding in excess of existing conditions. This responsibility shall include but is not limited to the installation of temporary connections, bypass pumping, or other temporary means necessary until the new drainage system is fully operational.

1.18 SPILL OR DISCHARGE OF WASTEWATER OR RECLAIMED WATER

The discharge of wastewater or effluent (reclaimed water) into waters of the State and/or into canals, ditches, and ponds that are connected to waters of the State is prohibited. Any spill or

discharge of wastewater or reclaimed water shall be immediately reported to the Engineer, the City's Project Manager, and the City's Emergency Dispatch Center. Contact information will be provided for all necessary City personnel and the Engineer at the Preconstruction Conference. In the event of a spill or discharge, the Contractor shall immediately control, contain, and stop the spill or discharge and shall repair any damage to the City's facilities.

The Contractor shall be responsible for any penalties and costs charged to the City by the FDEP and for all costs incurred by the City as a result of the Contractor's actions or as a result of the Contractor's negligence. The fines, and anticipated costs, which may be incurred by the City as a result of the Contractor's actions or negligence, shall be paid to the City within 30 days, or the costs incurred will be deducted from the total Contract amount.

1.19 SEQUENCE OF OPERATION

1.19.01 PIPELINE WORK

It is the intent of the City that all pipeline work associated with the Project be installed to completion in a timely and orderly manner to minimize inconvenience to the Public. Pipe and pipe materials shall not be stored or strung in residential areas more than 3 weeks in advance of pipe installation unless otherwise approved by the Engineer.

The Contractor shall include in the Project Schedule a Sequence of Operations including, but not limited to, the following components:

A. Pipe and pipe material storage
B. Bypassing Pumping
C. Backfilling
D. Testing and repairs
E. Surface Restoration and Cleanup

1.19.02 PUMP/LIFT STATION WORK

It is essential that any Project work conducted at Pump/Lift Station sites be sequenced to minimize obstruction of normal daily operations of the Pump/Lift Station.

The Contractor shall include in the Project Schedule a Sequence of Operations including, but not limited to, the following components:

A. Equipment and material storage
B. Bypassing Pumping
C. Testing and repairs
D. Surface Restoration and Cleanup

1.19.03 MISCELLANEOUS

Utility Companies may be present on the work site adjusting their facilities and installing new facilities. The Contractor's work shall be scheduled in such a manner as to minimize conflicts with various utility companies.

The Contractor shall clean up the site for each phase of work in accordance with the Contract Documents and confine work and personnel to designated areas in accordance with the Specifications. Before proceeding to a subsequent phase of work, unless otherwise approved by the Engineer.

1.19.04 NO TIME EXTENSION

If the Engineer orders construction, or a phase of construction, to be stopped due to the Contractor's neglect to adhere to the Sequence of Operations as outlined herein, the Stop Work Order shall not constitute a basis for extension of time.

1.20 WORK IN STREETS AND HIGHWAYS

All work within streets and highways shall be subject to the regulations and requirements of the City of St. Pete Beach, FDOT, and all other agencies with jurisdiction of the streets and highways in the work limits.

Methods and materials of construction used in restoration within such streets and highways shall conform to the requirements, inspection, and acceptance of the duly authorized representatives of the appropriate agency having jurisdiction. Restoration Work shall include but not be limited to: removal and replacement of pavement, sidewalk, curb, and gutter; replacement of storm sewer facilities; excavation and backfilling; and storage of materials and equipment.

1.21 WORK IN PRIVATE PROPERTY

The Contractor shall not trespass upon or in any way disturb private property without first obtaining written permission from the City to do so. In the event that, in the opinion of the Contractor, obtaining a temporary construction easement outside the limits of the right-of-way, of City-owned property, or of the easement(s) obtained by the City is necessary or desirable, it shall be the sole responsibility of the Contractor to obtain such easement from the owner of the property. If such easement is obtained by the Contractor, it shall contain provision to hold the City harmless from any operations of the Contractor within the easement limits. The Contractor shall not conduct construction operations on private property outside the limits of the right-of-way, of City-owned property, or of the easement(s) obtained by the City unless a copy of the Temporary Construction Easement Agreement is filed with the Engineer. It shall be the Contractor's responsibility to work equipment around poles, trees, or other obstructions and to do so at his own expense. The Contractor shall ensure all employees have a badge or visible identification during any time that they on the project site or within private property. This identification must be worn so that it is readily recognized and readable to the public.

Upon completion of work in easements, the Contractor shall, at no additional expense, restore the property, including all fences or other structures disturbed by his operations, to the full satisfaction of the City and shall obtain from the City a written release stating that restoration has been satisfactorily made. A copy of the completed written release shall be furnished to the City prior to payment. All items within the street right-of-way or sewer easement shall be removed, or removed and replaced, or restored as directed by the City.

1.22 PERMITS

Construction projects performed for the City will require licenses and permits in the same manner as private construction projects within the City.

The Contractor shall secure, at his expense, all licenses and permits, and shall comply with all applicable laws, regulations, and codes as required by the State of Florida and/or the City of St. Pete Beach whether performed by the Contractor or by others. The Contractor must be registered to complete such work within Pinellas County.

1.23 FIELD OFFICE AND APPURTENANT STRUCTURES

No field office or appurtenant structures by the Contractor, any subcontractor, or any material supplier, will be allowed on the Project site.

Space on City property or rights-of-way proposed to be used for storage and a field office for the Contractor shall be approved by the Engineer prior to installation providing such uses will not interfere in any manner with the construction of the work or the operation of existing facilities.

1.24 CONTRACTOR'S SIGN

No sign by the Contractor, any subcontractor, or any material supplier, will be allowed on the Project site.

1.25 MOBILIZATION

Mobilization shall include but is not limited to all preparatory work and operations necessary to begin the Project, including moving of personnel, equipment, traffic control, and all else necessary to commence work. The cost of bonds, insurance, shop drawings, and preconstruction expenses shall also be included.

If a separate Pay Item is included for mobilization, payment will be as specified for that Pay Item. If no Pay Item is included, costs for mobilization shall be included with the costs for the major Work items included in the Proposal.

1.26 WATER PURCHASE

Water used in connection with this Project must be coordinated with Pinellas County. Reclaimed water used in connection with this Project must be coordinated with the City.

1.27 TRAFFIC CONTROL

The Contractor shall provide required traffic controls under City observation. The Contractor shall notify the City's Project Manager a minimum of 2 working days prior to any construction affecting traffic flow. A Maintenance of Traffic plan drawing shall be submitted for review by the Engineer prior to each lane closure or opening during construction. All traffic control devices utilized during construction shall be provided by the Contractor and meet the requirements set forth in the latest revision of U.S. Department of Transportation Federal Highway Administration's "Manual on

Uniform Traffic Control Devices for Streets and Highways" and the Florida State Department of Transportation's "Standard Plans for Road and Bridge Construction." Failure or refusal, on the part of the Contractor, to install, maintain and/or position traffic control devices promptly, fully, and in an acceptable manner, shall be sufficient cause for the City, after 24-hour notice, to perform the traffic control with its own organization, or to contract with any other individual, firm, or corporation to perform the required traffic control. All costs and expenses incurred thereby shall be charged against the defaulting Contractor, and the amount thereof deducted from any money due, or which may become due him, or shall be charged against the Contract Bond. Any Work performed as described by this paragraph, shall not relieve the Contractor in any way of his responsibility for the Work performed by him.

Traffic shall be performed so that vehicular traffic shall be maintained on with at least one 10-foot wide lane in each direction at all times. An acceptable detour route shall be developed by the Contractor to redirect traffic when and where necessary, with the approval of the Transportation Special Events Division. Temporary lanes shall be constructed with a minimum 1-inch thick asphaltic concrete surface over a 6-inch thick limerock base compacted to 98% of the maximum density in accordance with AASHTO T-180.

Failure of the Contractor to comply with any of the above traffic control requirements may result in issuance of a stop work order until the violation is corrected.

All maintenance of traffic in the FDOT right-of-way shall be in accordance with FDOT requirements.

1.28 TREE PROTECTION

Particular care shall be taken by the Contractor to protect trees during construction by erecting approved barricades to prevent unnecessary damage to trunk and roots during construction. Such barriers shall protect the area within the dripline.

The Contractor shall prune all branches that interfere with construction in accordance with American Forestry Association Standards. Roots over 2-inch diameter shall be preserved wherever possible. If root pruning is required, roots shall be cut cleanly.

Temporary soil deposits, concrete block, concrete wash, or solvents shall not be placed within the dripline. The grade within the dripline shall be preserved. If adjacent grade is altered, protective measures such as those described in the Florida State Division of Forestry "Tree Protection Manual for Builders and Developers" shall be constructed to protect the tree(s) from deleterious effects of the grade change.

1.29 TREE REMOVAL AND REPLACEMENT

The Contractor shall obtain any necessary tree removal permit, shall furnish and replace trees as required, and shall perform this Work in a manner conforming to all applicable provisions of said regulations or permit.

The cost of tree removal and obtaining the tree removal permits shall be included in the cost of the appropriate associated Contract Pay Item under which the Work is to be performed. The Contractor shall remove trees as required and approved by the Engineer whether or not said trees are shown

on the Contract Drawings. Trees that must be removed, except for Australian pine, Brazilian pepper, punk, and other exempt species, shall be replaced as directed. Replacement trees shall be of native species at least 8-feet tall and at least 3-inch caliper diameter.

1.30 UTILITIES

Prior to construction, the Contractor shall familiarize himself with the location of all existing utilities and facilities within the Project Site. The Contractor must take the necessary precautions for the protection of any utility encountered on the Project or the restoration of any utility damaged during the work.

If excavation is required, The Contractor shall notify, at least 48 hours before breaking ground, all public or private service corporations having wire, poles, pipes, conduit, manholes, or other structures that may be affected by this operation, including all structures which are affected and not shown on these plans. Utility companies shall be contacted by calling the utility notification center "Sunshine 811" at 1-800-432-4770. Owners which are not members of the state's One Call service must be called directly. The City will furnish to the Contractor the available records of City utilities. The Contractor shall locate and mark all City utilities for his reference and for use by utility companies. The Contractor shall act as the City's agent for locating and marking City underground utilities within the Project limits, in accordance with the Florida Underground Facilities Damage Prevention and Safety Act (FS 556).

In all cases where existing utility lines may be interfered with by the work, the Contractor shall give a minimum of 48 hours' notice (excluding Saturdays, Sundays, and legal holidays) to the owners of such utilities to permit them to relocate the lines prior to construction. Existing utilities have been shown on the Contract Drawings insofar as information is reasonably available. However, it will be the Contractor's responsibility to preserve all existing utilities whether shown on the Contract Drawings or not. All maintenance, repair, and replacement of existing utilities shall be in accordance with the rules and regulations of the various utility companies having jurisdiction. All existing storm sewers, driveway drains, surface drainpipes and other property, removed or damaged during construction shall be repaired and reconnected by the Contractor as directed by the City at no additional cost to the City.

1.31 NEIGHBORHOOD NOTIFICATION

Not less than 7 days prior to the commencement of Work in the right-of-way, the Contractor shall notify all residents and businesses along the construction route with a printed door hanger notice indicating the scheduled date of construction, the type of construction, and the Contractor's and Superintendent's contact information. The door hanger text and a list of residents and businesses to which the notification has been delivered shall be compiled and submitted to the Engineer prior to the Contractor commencing Work.

1.32 SHOP, FIELD, AND LABORATORY TESTING

The Engineer may require testing by certified personnel of certain materials to be incorporated in the Work, such as: soils density, pavement, concrete pipe and appurtenances, and welds.

In the event any such testing is required by the Engineer; a detailed description will be found in

these Technical Specifications concerned with the specific item of Work.

Where reference is made for design mixes, tests of materials, or work performed, or where in the opinion of the Engineer, tests are required to ascertain compliance with the Specifications, the Contractor shall have such tests made by an approved testing laboratory. No additional payment will be made for these tests.

1.33 SALVAGED MATERIALS

The Contractor shall not proceed with demolition of existing materials or equipment without review and acceptance from the Engineer for the method of disposal.

All materials which are not returned to the City yard shall be disposed in an approved disposal site. The Engineer may request confirmation of the site's approval for disposal of the specific materials.

Salvaged materials shall be loaded on Contractor trucks and returned to the Public Services yard at 7581 Boca Ciega Drive, St. Pete Beach, Florida. The City will designate the specific location at the yard for placement of salvaged materials by the Contractor.

The following materials shall be removed and returned by the Contractor: pumps and pump rails, and all other materials as directed by the Engineer.

1.34 PRECONSTRUCTION VIDEO

The Contractor shall provide continuous color audio-video recording of the entire proposed work areas/construction areas prior to construction to serve as a record of pre-construction conditions. Audio-video recording must be supplemented with digital color photographs for areas which require details not ascertainable on the recording. The Preconstruction Video shall be delivered to the Engineer on nonreturnable USB compatible flash drives. The USB drive shall be new and thus shall not have been used for any previous recording.

The proposed work/construction area shall include, but not be limited to, all areas used for construction of the proposed improvements, temporary construction, stockpile areas, staging and storage areas, and entry and exit points used by equipment, delivery vehicles, service vehicles, and other vehicles used for transport of labor, equipment, and materials to the job site.

The preconstruction audio-video recording shall be of professional quality that will clearly log an accurate visual description of existing conditions. Any portion of the digital recording that is determined by the Owner or Engineer to be not acceptable in the documentation of the existing condition shall be re-filmed at no additional cost to the Owner.

The general requirements of the Preconstruction Video are as follows:

A. The recordings shall contain coverage of all surface features located within the construction area and plus access routes used to reach the construction area. The recording shall include all surface conditions supported by appropriate audio description.

B. The surface features documented in the recordings shall include, but not be limited to, all driveways, sidewalk, curb, gutter, buildings, walls, storage sheds, swales, culverts, headwalls, landscaping, trees, shrubbery, pull boxes, valve boxes, concrete pads, power poles, mailboxes, and fences.

C. The recordings shall also document the existence or nonexistence of any faults, fractures, or defects, and existing man-made material such as debris, construction stockpiles, trash, and fuel containers.

D. The audio and video portions of the recording shall maintain viewer orientation. To this end, overall establishing views and visual displays of all visible house and building addresses shall be utilized. In easements where the proposed construction location will not be readily apparent in the recorded video, highly visible yellow flags shall be placed in such a fashion as to clearly indicate the proposed centerline of construction.

E. When video recording on private property, the Contractor shall give the Owner sufficient prior notice of such entry so that property owners may be advised of, and their permission obtained for, the Work.

F. All video recording shall be done during regular business hours, unless otherwise specified by the private property owner or the Engineer. The Contractor shall enter and leave private property in a professional and orderly, workmanlike manner.

G. Each video recording shall have a simultaneous recorded audio recording. This audio recording, exclusively containing the commentary of the camera operator, shall assist in viewer orientation and in any needed identification, differentiation, clarification, or objective description of the feature being shown in the video portion of the recording. The audio recording also shall be free from any conversations between the camera operator and any other production technicians.

H. The total video recording system and the procedures employed in its use shall be such as to produce a finished product that will fulfill the technical requirements of the project. The digital portion of the recording shall produce bright, sharp, clear pictures with accurate colors and shall be free from distortion, tearing, rolls or any other form of picture imperfection. The audio portion of the recording shall produce the commentary of the camera operator with proper volume, clarity, and be free from distortion. The recording system shall utilize EIA standard video and RGB compatible video.

I. All video recordings shall be labeled and shall be properly identified by video number, Project title, and date(s) of the recording.

J. Each video shall have a log of that video's contents. The log shall describe the various segments of coverage contained on that video in terms of the names of streets or easements, coverage beginning and end, directions of coverage, and video unit counter numbers.

1.35 SITE MANAGEMENT

The Contractor shall prepare and maintain site management logs throughout construction that documents completion of maintenance activities such as dust control, setup and MOT checks, street sweeping, etc. At a minimum, these logs shall include the date, action taken, approximate location (if the construction area changes through the duration of the project), time of day, and initials of staff involved. Dust control measures shall be recorded daily in the morning and afternoon, MOT shall be recorded daily in the morning, afternoon, and end of day, and street sweeping will be logged once per day.

Site management logs shall be submitted to the City and the Engineer on a bi-weekly basis unless otherwise requested, and in accordance with **Section 3** of these Technical Specifications.

END OF SECTION

SECTION 2 - PAY ITEM DESCRIPTIONS

2.01 SCOPE

The scope of this section of the Contract Documents is to further define the items included in each Pay Item in the Bid Form section of the Contract Documents. Payment will be made based on the specified items included in the description in this section for each Pay Item.

All contract prices included in the Bid Form section will be full compensation for all shop drawings, working drawings, labor, materials, tools, equipment, and incidentals necessary to complete the construction as shown on the Contract Drawings and/or as specified in the Contract Documents to be performed under this Contract. Actual quantities of each item bid on a unit price basis will be determined upon completion of the construction in the manner set up for each item in this section of the Specifications. Payment for all items listed in the Bid Form will constitute full compensation for all work shown and/or specified to be performed under this Contract.

2.02 ESTIMATED QUANTITIES

The quantities shown are approximate and are given only as a basis of calculation upon which the award of the Contract is to be made. The City does not assume any responsibility for the final quantities, nor shall the Contractor claim misunderstanding because of such estimate of quantities. Final payment will be made only for satisfactorily completed quantity of each item.

2.03 WORK OUTSIDE AUTHORIZED LIMITS

No payment will be made for work constructed outside the authorized limits of work.

2.04 MEASUREMENT STANDARDS

Unless otherwise specified for the particular items involved, all measurements of distance shall be taken horizontally or vertically.

2.05 AREA MEASUREMENTS

In the measurement of items to be paid for on the basis of area of finished work, the lengths and/or widths to be used in the calculations shall be the final dimensions measured along the surface of the completed work within the neat lines shown or designated.

2.06 LUMP SUM ITEMS

Where payment for items is shown to be paid for on a lump sum basis, no separate payment will be made for any item of work required to complete the lump sum items. Lump sum contracts shall be complete, tested and fully operable prior to request for final payment. Contractor may be required to provide a break-down of the lump sum totals.

2.07 PAY ITEM DESCRIPTIONS

Separate payment will be made for the items of work described herein and listed on the Bid Form. Any related work not specifically listed but required for satisfactory completion of the work shall be considered to be included in the scope of the appropriate listed work items.

No separate payment will be made for the incidental items not included in the Pay Item descriptions. The cost to complete such work shall be included in the applicable Pay Item unit cost. Final payments shall not be requested by the Contractor or made by the City until as-built (record) drawings have been submitted and approved by the City. Incidental items include, but are not limited to:

1. Shop Drawings, Working Drawings.
2. Clearing, grubbing and grading except as hereinafter specified.
3. Trench excavation, including necessary pavement removal and rock removal, except as otherwise specified.
4. Dewatering and disposal of surplus water.
5. Structural fill, backfill, and grading.
6. Replacement of unpaved roadways, and shrubbery plots.
7. Foundation and borrow materials, except as hereinafter specified.
8. Testing and placing system in operation.
9. Any material and equipment required to be installed and utilized for the tests.
10. Pipe, structures, pavement replacement, driveways and/or appurtenances included within the limits of lump sum work, unless otherwise shown.
11. Maintaining the existing quality of service during construction.
12. Appurtenant work as required for a complete and operable system.
13. Seeding and hydro mulching.
14. As-built Record Drawings, clean up, and miscellaneous work.

PAY ITEM NO. 1 – MOBILIZATION

Mobilization shall be the preparatory work and operations in mobilizing for beginning work on the project, including, but not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to the project site, and for the establishment of temporary offices, storage buildings, staging areas, maintaining traffic, safety equipment and first aid supplies, sanitary and other facilities, and installation of tree protection measures as required by the Contract Documents and applicable laws and regulations. The costs of submittals, bonds, required insurance, permits and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Demobilization shall be the work of removing temporary facilities from the site, cleanup and restoration. Mobilization/Demobilization shall be limited to a maximum of ten percent (10%) of the total Bid Price.

Payment for mobilization/demobilization will be made on an incremental basis in accordance with the following:

Percent of Original Contract Amount:	Percent Allowable Payment of Mobilization/Demobilization Pay Item Price:
5	25
10	35
25	45
50	50
75	75
100	100

These payments will be subject to the standard retainage provided in the Contract. Payment of the retainage will be made after completion of the work and demobilization.

PAY ITEM NO. 2 – MAINTENANCE OF TRAFFIC

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for all maintenance of traffic, including coordination with the City and FDOT, and all equipment and labor necessary to comply with the FDOT Standard Plans Index 102 Series for Maintenance of Traffic.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 3 – EROSION AND SEDIMENT CONTROL

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for erosion and sediment control.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 4 – BYPASS PUMPING

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for all by-pass pumping. Cost includes all equipment and labor necessary to successfully bypass during construction in compliance with the Contract Documents.

Measurement for periodic payments for this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 5 – PROJECT RECORD DOCUMENTS (AS-BUILT DRAWINGS AND O&M MANUALS)

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for as-built record drawings or any other required certifications to put proposed system in service and operation and maintenance manuals for all proposed equipment. All items are subject to approval by the Engineer.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 6 – CLEANING EXISTING VALVE VAULT INCLUDING REMOVAL OF DEBRIS AND SAND BLASTING AND RECOATING OF EXISTING FITTINGS

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for cleaning of existing valve vault including the removal of any debris and sand blasting and recoating of existing fittings. Sand blasting and recoating existing fittings includes removal, cleaning, surface preparation, exterior coating, and reinstalling the fitting in accordance with the Construction Drawings and Specifications. Payment includes any and all items necessary to complete work and shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM – ELECTRICAL EQUIPMENT RACK

Payment for all work included in this Pay Item shall represent full compensation in accordance with the lump sum price bid for furnishing and installing the listed electrical equipment including stainless steel unistrut rack, electric meter in aluminum enclosure, main disconnect, automatic transfer switch, pump control panel including VFDs as shown, junction box, relocation of existing SCADA panel, conduit, wiring, ground ring, and connection to existing electrical service. This Bid Item shall also include installation of all control panel components, installing pump motor leads, testing of power and control wiring to each submersible pump, and all other materials and equipment necessary for a complete and fully operable system, including testing and start-up, as shown on the Contract Documents.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM	DESCRIPTION	UNITS
7	ELECTRICAL EQUIPMENT RACK INCLUDING PUMP CONTROL PANEL (5 HP - 7.5 HP), METER, MAIN DISCONNECT, AUTOMATIC TRANSFER SWITCH, JUNCTION BOX, AND RELOCATION OF SCADA PANEL	LS
8	ELECTRICAL EQUIPMENT RACK INCLUDING PUMP CONTROL PANEL (12 HP WITH VFD), METER, MAIN DISCONNECT, AUTOMATIC TRANSFER SWITCH, JUNCTION BOX, AND RELOCATION OF SCADA PANEL	LS

PAY ITEM NO. 9 – ELEVATED PLATFORM

Payment for all work included in this Bid Item will be made at the applicable Contract lump sum price for furnishing and installing the elevated platform as shown on the Contract Drawings and as described in the Specifications. This Bid Item shall include the foundation, top concrete slab, columns, beams, stairs, stairs slab, and aluminum railings, placed and installed as shown on the Contract Documents. This Bid Item includes steel reinforcement and all associated work. Payment shall represent full compensation for all labor, materials, and equipment for mixing, placing, forming, finishing, and curing of the concrete, any required excavation, including rock as necessary, bedding, backfill, compaction, dewatering, sheeting, testing, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 10 – BACKUP GENERATOR, ENCLOSURE, AND SUB-BASE FUEL TANK

Payment for all work included in this Bid Item will be made on a lump sum basis and will include the direct cost for furnishing and installing the backup diesel generator, enclosure, and sub-base fuel tank, in accordance with Construction Drawings and Specifications. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 11 – SITE LIGHTING

Payment for all work included in this Bid Item will be made at the applicable Contract lump sum price for furnishing and installing site lighting as shown on the Contract Drawings and as described in the Specifications. This Bid Item shall include the lighting foundation, conduit, grounding wire, aluminum pole with hand hole, and LED site light placed and installed as shown on the Contract Documents. This Bid Item includes concrete reinforcement and all associated work. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 12 – 6 FEET TALL VINYL PRIVACY FENCE

Payment for all work included under this Pay Item will be made at the Contract unit bid per linear foot for the purchase and installation of the 6-feet vinyl privacy site fence in accordance with the Construction Drawings and Specifications. Payment includes any required excavation, including rock as necessary, bedding, backfill, dewatering, sheeting, and any and all other items necessary to complete work. Measurement will be based on the actual number of linear footage of vinyl fence furnished, installed, and approved. Payment shall represent full compensation for all labor, materials, equipment, and incidental items necessary to complete the work.

PAY ITEM NO. 13 – 6 FEET TALL, 4 FEET WIDE VINYL PRIVACY ACCESS GATE

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sim price bid for furnishing and installing of the 6 feet tall, 4 feet wide vinyl privacy access gate in accordance with the Construction Drawings. Payment includes any required excavation, including rock as necessary, bedding, backfill, dewatering, sheeting, and any and all other items necessary to complete work.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 14 – CURB INSTALLATION

Payment for all work included under this Pay Item will be made at the Contract unit price bid per linear foot for furnishing and placing curb as shown on the Drawings and listed in the Bid Form. Measurement will be per actual number of linear feet of curbing installed. Payment shall represent full compensation for all labor, material and equipment for compacting subgrade, forming, furnishing, placing the concrete, and finishing as specified and all incidentals necessary for completion of this Pay Item, in accordance with Specifications.

PAY ITEM NO. 15 – POTABLE WATER SERVICE AND HOSE BIB RELOCATION

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for the proposed connection to existing water main, relocation of existing water service line including but not limited to excavation, including rock, dewatering, sheeting, bedding and backfill, compaction, testing, detectable warning tape, locator wire, and installation of the proposed hose bib assembly and piping, as shown in the Construction Drawings. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the

approved Schedule of Values, to be supplied by the Contractor In accordance with the Contract Documents.

PAY ITEM NO. 16 – DEMOLITION

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for, including but not limited to the demolition of landscaping including trees, control panel, asphalt, manhole, curb, air release valve, concrete pad, air release valve cabinet, piping, and site fencing as shown on the contract documents. Payment includes disposal and any required excavation, including rock as necessary, bedding, backfill, dewatering, sheeting, and any and all other items necessary to complete work. Any equipment in working condition shall be salvaged as requested by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM – ELECTRICAL I&C

Payment for all work included in this Pay Item shall represent full compensation in accordance with the lump sum price bid for furnishing and installing the listed pump control panel replacements including removal of the existing panel, installation of pump control panel with generator receptacle, modifications to the existing electrical equipment rack including but not limited to raceways, concrete posts, and concrete pad as necessary for the proposed pump control panel. This Bid Item shall include installation of all control panel components, installing conduit and pump motor leads, testing of power and control wiring to each submersible pump, and all other materials and equipment necessary for complete a complete a fully operable system, including testing and start-up, all as shown on the Contract Documents.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM	DESCRIPTION	UNITS
17	ELECTRICAL I&C (5 HP – 7.5 HP PUMP CONTROL PANEL REPLACEMENT)	LS
18	ELECTRICAL I&C (35 HP PUMP CONTROL PANEL REPLACEMENT, WITH SOFT STARTER)	LS

PAY ITEM NO. 19 – CLEAN WETWELL INCLUDING SAND/DEBRIS PUMP OUT

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for existing wet well cleaning. Existing wet wells shall be cleaned in accordance with the Construction Drawings. Payment includes any and all items necessary to complete work. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 20 – 2" S.S. AIR RELEASE VALVE (ABOVE GROUND)

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price for installation of a 2" stainless steel air release valve including air release valve body, concrete pad, underdrain, piping, valve, and connection to existing force main. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 21 – FORCE MAIN DETECTABLE WARNING TAPE

Payment for all work included in this Pay Item shall be made at the applicable Contract unit price bid per the schedule of prices for furnishing and installing force main detectable warning tape as shown in the Contract Documents and listed on the Bid Form.

Measurement and Payment shall be made for the actual length of detectable warning tape installed, approved, certified, and placed into operation and will represent full compensation for all labor, materials and equipment required to complete these Pay Items, including but not limited to excavation, including rock, dewatering, sheeting, bedding and backfill, compaction, coordination with other utilities that are disturbed during construction, protection of existing facilities and structures, and all other incidentals for complete installation. No additional compensation shall be made for excavation below the bottom of the pipe, rock removal, bedding and backfill material, or for repair of any trench settlement. No additional compensation shall be made for extensive dewatering.

PAY ITEM NO. 22 – 6 FEET TALL, 12 FEET WIDE VINYL PRIVACY DOUBLE GATE

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sim price bid for the purchase and installation of the 12-feet vinyl double door swinging access gate in accordance with the Construction Drawings and Specifications. Payment includes any required excavation, including rock as necessary, bedding,

backfill, dewatering, sheeting, and any and all other items necessary to complete work.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 23 – RECLAIMED WATER SERVICE AND HOSE BIB RELOCATION

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for the proposed connection to existing water main, relocation of existing water service line including but not limited to excavation, including rock, dewatering, sheeting, bedding and backfill, compaction, testing, detectable warning tape, locator wire, and installation of the proposed hose bib assembly and piping, as shown in the Construction Drawings. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor In accordance with the Contract Documents.

PAY ITEM NO. 24 – SHELL RESTORATION

Payment for all work included in these Bid Items will be made at the applicable Contract unit price bid per cubic yard of shell restoration as listed on the Bid Form. Density for backfill compaction shall be 95% per AASHTO T-180 density. Measurement of restoration will be per the actual number of cubic yards installed. Contractor shall match existing shell/rock material. Payment shall represent full compensation for all labor, materials and equipment for compacting subgrade, furnishing and installing the shell/rock, including all incidentals necessary to complete the restoration as shown on the Contract Drawings and included in the Specifications, all ready for approval and acceptance by the City.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 3 - SUBMITTALS

3.01 GENERAL

When used in the Contract Documents, the term "Shop Drawings" shall be considered to mean Contractor's plans for material and equipment which become an integral part of the Project. These drawings shall be complete and detailed. Shop Drawings shall consist of fabrication, drawings, setting drawings, schedule drawings, manufacturer's scale drawings and wiring and control diagrams. Cuts, catalogs, pamphlets, descriptive literature and performance and test data, shall be considered only as supportive to required Shop Drawings as defined above.

Data on materials and equipment shall include, without limitation, materials and equipment lists, catalog sheets, cuts, performance curves, diagrams, materials of construction and similar descriptive material. Materials and equipment lists shall give, for each item thereon, the name and location of the supplier or manufacturer, trade name, catalog reference, size, finish and all other pertinent data. Submittal distribution will be by electronic submittal as coordinated during the Preconstruction Conference.

3.02 CONTRACTOR RESPONSIBILITIES

The Contractor shall submit to the City and Engineer for review and acceptance: working drawings, shop drawings, test reports and data on materials and equipment, and material samples (hereinafter in this section called samples) as are required for the proper control of work, including, but not limited to those working drawings, shop drawings, data and samples for materials and equipment specified elsewhere in the Specifications and in the Contract Drawings.

Drawings and schedules shall be checked and coordinated with the work of all trades involved before they are submitted for review by the City and the Engineer and shall bear the Contractor's stamp of approval and original signature as evidence of such checking and coordination. Drawings or schedules submitted without this stamp of approval and original signature shall be returned to the Contractor for resubmission.

If drawings show variations from Contract requirements because of standard shop practice or for other reasons, the Contractor shall describe such variations in his letter of transmittal. If acceptable, proper adjustment in the contract shall be implemented where appropriate. If the Contractor fails to describe such variations, he shall not be relieved of the responsibility of executing the work in accordance with the Contract, even though such drawings have been reviewed.

For all mechanical and electrical equipment furnished, the Contractor shall provide a list including the equipment name and address and telephone number of the manufacturer's representative and service company so that service and/or spare parts can be readily obtained.

All manufacturers or equipment suppliers who proposed to furnish equipment or products shall submit an installation list to the City along with the required shop drawings. The installation list shall include at least five installations where identical equipment has been installed and have been in operation for a period of at least one (1) year.
No materials or equipment shall be ordered, fabricated or shipped or any work performed until the Engineer reviews and returns to the Contractor the submittals as acceptable according to the

submittal review codes in Section 3.04.

3.03 SUBMITTAL NUMBERING

When submitting shop drawings or samples, utilize a unique numbering system of the Contractors choice. Subsequent resubmittals of a revised submittal shall be denoted with a letter, A-Z, indicating the resubmission of the same drawing (i.e. A=2nd submission, B=3rd submission, C=4th submission, etc.).
An example of a submittal numbering would be as follows: Submittal No. 5A - HDPE Pipe 6.03

1. 5A is the second submission of the 5th shop drawing submitted for the project
2. HDPE Pipe is the subject of the submittal
3. 6.05 is the Specification Section for HDPE Pressure Pipe

3.04 SUBMITTAL REVIEW

Submittals shall be transmitted in sufficient time to allow the Engineer at least twenty (20) working days for review and processing. The review of shop drawings, data and samples will be for general conformance with the design concept and Contract Documents. An acceptance of a submittal shall be interpreted to mean that the Engineer has no specific objections to the submitted material, subject to conformance with the Contract Drawings and Specifications. This is not to be construed as permitting any departure from the Contract requirements, relieving the Contractor of responsibility for any errors, including details, dimensions, and materials, or approving departures from details furnished by the City, except as otherwise provided herein.

Submittals will be returned to the Contractor under one (1) of the following codes:

A. "NO EXCEPTIONS TAKEN" is assigned when there are no notations or comments on the submittal. When returned under this code the Contractor may release the equipment and/or material for manufacture.
B. "CORRECTIONS NOTED". This code is assigned when a confirmation of the notations and comments IS NOT required by the Contractor. The Contractor may release the equipment or material for manufacture; however, all notations and comments must be incorporated into the final product.
C. "REVISE AND RESUBMIT". This code is assigned when notations and comments are extensive enough to require a resubmittal of the package. The Contractor may release the equipment or material for manufacture; however, all notations and comments must be incorporated into the final product. This resubmittal is to address all comments, omissions and non-conforming items that were noted. Resubmittal is to be received by the Engineer within 15 Calendar Days of the date of the Engineer's transmittal requiring the resubmittal.
D. “REJECTED" is assigned when the submittal does not meet the intent of the Contract Documents. The Contractor must resubmit the entire package revised to bring the submittal into conformance. It may be necessary to resubmit using a different manufacturer/vendor to meet the Contract Documents.
E. “Filed as Received” is assigned when the submittal is for informational purposes only. No review or comments will be provided by the Engineer.

END OF SECTION

SECTION 4 – AS-BUILT DRAWINGS

4.01 MINIMUM AS-BUILT DRAWING STANDARDS FOR ALL AS-BUILT DRAWINGS

For all elements of construction, As-Built Drawings shall be submitted to at least the level of detail in the contract documents. It is anticipated that the original contract documents shall serve as at least a background for all record information. Original drawings in CAD format may be requested by the City.

Project data points shall contain both horizontal and vertical data relative to the FL Florida State Plane, West Zone, US Foot. Vertical datum is NAVD 1983. All elevations shall be in feet and inches, referenced to NAVD 1988. Each sheet of the As-Built Drawings shall have the title "AS-BUILT DRAWING" printed in large bold lettering near the title block and a date corresponding to the date the as-built drawing was issued. As-Built Drawings notes, and information shall be bold or italics to identify them as As-Built information.

4.02 AS-BUILT DRAWINGS PREPARATION

The As-Built Drawings shall show the name, address, and phone number of the Contractor. Each drawing shall be certified by a responsible representative of the Contractor and dated. As-built information shall be recorded currently with construction progress and work shall not be concealed until required information is recorded. Properly prepared As-Built Drawings shall be certified by a Professional Engineer or Surveyor registered to the state of Florida, employed by the Contractor.

The As-Built Drawings shall at a minimum legibly include the following:

A. All underground piping with elevations and dimensions. Changes to piping location. Horizontal and vertical locations of underground utilities and appurtenances referenced to permanent surface improvements. Actual installed pipe material, size, class, etc.

B. Locations of drainage ditches, swales, water lines and force mains shall be shown every 200 feet (measured along the centerline). Dimensions at these locations shall indicate distance from centerline of right-of-way to the facility.

C. All horizontal locations, if not in the right-of-way, must relate to easement.

D. Field changes of dimension and detail.

E. Changes made by Field Order or by Change Order.

F. Details not on original Contract Drawings.

G. Equipment and piping relocations.

H. Locations of all valves, air release valves, fire hydrants, manholes, water and sewer services, water and force main fittings, underdrain cleanouts, catch basins, junction boxes and any other structures located in the right-of-way or easement, shall be located by

elevation and by station and offset based on intersection P.I.'s and centerline of right-of-way. For facilities located on private roads, the dimensioning shall be from centerline of paving or another readily visible baseline.

I. Elevations shall be provided for all manhole rim and inverts; junction box rim and inverts; catch basin rim and inverts; and baffle, weir and invert elevations in control structures. Elevations shall also be provided at the PVI's and at every other lot line or 200 feet, whichever is less, of drainage swales and ditches. Benchmarks and elevation datum shall be indicated.

J. Slopes for pipes and ditches shall be recalculated, based on actual field measured distances, elevations, pipe sizes, and type shown. Cross section of drainage ditches and swales shall be verified.

K. Centerline of roads shall be tied to right-of-way lines. Elevation of roadway centerline shall be given at PVI's and at all intersections.

L. As-Built Drawings shall show bearings and distances for all right-of-way and easement lines, and property corners.

M. Sidewalks, fences, and walls, if installed at the time of initial as-built drawing submittal, shall be located every 200 feet or alternate lot lines, whichever is closer. Dimensions shall include distance from the right-of-way line and the back of curb and lot line or easement line.

N. Allowable tolerance shall be ± 6.0 inches for horizontal dimensions. Vertical dimensions such as the difference in elevations between manhole inverts shall have an allowable tolerance of ± 1/8 inch per 50 feet (or part thereof) of horizontal distance up to a maximum tolerance of ± 2 inch.

Specifications and Addenda shall be legibly marked to record manufacturer, trade name, catalog number and supplier of each product and item of equipment actually installed and changes made by Field Order or by Change Order.

4.02.01 REQUIREMENTS FOR RECLAIMED WATER MAINS AND FORCE MAINS

In addition to that specified above, the following information shall be provided on the As-Built Drawings.

A. Location (vertical and any horizontal) at intervals not to exceed two hundred (200) feet and at all locations where the direction changes by more than ten (10) degrees.

B. Pipe size, material, and dimension ratio.

C. Location of air release valve.

D. Detailed location of valves (horizonal).

E. Elevations shall be provided on the top of operating nuts for all water and force main valves.

F. Reclaimed water service connection location based on distance from main line and property line for each designed meter.

G. Horizontal Directional Drilling (HDD) locations and elevations shall be shown on the As-Built Drawings. The beginning, ending, and surface locations shall be indicated as well as the horizontal and vertical location at least every 25 linear feet along the pipe as provided in the HDD Contractor's certified report and bore log.

All top of pipe elevations shall be accompanied by a finished grade elevation at the same location. Horizontal location of the pipe shall be defined using ties to back of curb and nearest property corner, property line or permanent control point.

4.02.02 REQUIREMENTS FOR GRAVITY SEWER

In addition to that specified above, the following information shall be provided on the As-Built Drawings.

A. Manhole rim and invert elevations (include pipe inverts).

B. Manhole horizontal location (i.e. dimension from right-of-way line or permanent control point.)

C. Service laterals located from the nearest downstream manhole. These dimensions shall be provided by on-site inspections or televising of the sewer following installation.

D. Distance between manholes.

Size and material of all pipe.

4.02.03 REQUIREMENTS FOR WASTEWATER PUMP/LIFT STATIONS

In addition to that specified above, the following information shall be provided on the As-Built Drawings.

A. Location ties back to back of curb and nearest property corner or permanent control point.

B. Wet well invert elevations.

C. Pipe invert elevations.

D. Valve vault inverts.

E. Top of slab elevations.

F. Pump make and model, horsepower, impellor size, design point.

G. Operating set point elevations

4.03 AS-BUILT DRAWINGS SUBMITTAL

Prior to substantial completion and prior to starting the bacteria testing of water lines, Contractor shall deliver electronic As-Built Documents and As-Built Drawings to the City and the Engineer for review. If there are any required changes or additions, these shall be completed and resubmitted for review. Signed and sealed As-Built Documents and As-Built Drawings shall be submitted prior to final pay application to the City and the Engineer, both electronically and in hard copy paper format. Up to six (6) copies shall be provided at the City's request.

The Contractor shall employ a Professional Engineer or Surveyor registered in the State of Florida to verify survey data and properly prepare As-Built Drawings. As-Built Drawings shall be certified by the professional(s) (Engineer or Surveyor licensed in Florida), as stipulated by the Land Development Ordinance and submitted in electronic format and up to six (6) hardcopies signed and sealed by a Florida registered surveyor and mapper.

AutoCAD drawings shall be in DWG or DXF form. All fonts, line types, shape files, external references, or other pertinent information used in the drawing and not normally included in AutoCAD shall be included on the media with a text file or attached noted as to its relevance and use.

Accompany submittal with transmittal letter, containing:

A. Date.
B. Project title.
C. Contractor's name and address.
D. Title and number of each As-Built Document.
E. Signature of Contractor or his authorized representative.

Note: The data required to properly prepare these As-Built Drawings shall be obtained at the site, at no cost to the City by the responsible design professional or his/her duly appointed representative. The appointed representative shall be a qualified employee of the responsible design professional or a qualified inspector retained by the responsible design professional on a project-by-project basis.

END OF SECTION

SECTION 5 - CONCRETE, MASONRY, AND REINFORCING STEEL

5.01 GENERAL

The Work in this section includes furnishing, placing, finishing, and curing all reinforced and plain concrete, prestressed concrete, reinforcing steel, welded wire fabric, brick, masonry block, mortar, and related work. Brick used for paving and hexagon block used for sidewalks are not included in this section.

5.02 PORTLAND CEMENT CONCRETE

Portland cement concrete shall conform to the applicable requirements of the FDOT-SSRBC Sections 346, 347, and 921.

Class IV concrete shall be used for all concrete in contact with, or over, salt or brackish water.

Concrete used for structures in contact with sewage shall be mixed from Type II Portland cement containing the lowest calcium thiosulfate available as specified in AASHTO M 85.

Concrete shall meet the following minimum 28-day compressive strength:

Miscellaneous concrete (thrust blocks, pipe encasement, etc.)	2,500 psi
Concrete curb/gutter/sidewalk/pavement	3,000 psi
Cast-in-place/precast structures	4,000 psi
Prestressed structures	5,000 psi

5.03 REINFORCING STEEL

Reinforcing steel shall conform to ASTM A 615, Grade 60 deformed bars and to the applicable requirements of FDOT-SSRBC Sections 415 and 931.

Reinforcing steel shall not be coated, except as specifically specified on the Contract Drawings.

All welded wire fabric shall conform to ASTM A 497 (deformed) or ASTM A 185 (plain) and to the applicable requirements of FDOT-SSRBC Article 415-6.

5.04 FIBROUS CONCRETE REINFORCEMENT

Fibrous concrete reinforcement may be used, where shown or approved, in lieu of welded wire fabric for shrinkage and thermal contraction/expansion in concrete pavement, driveway, and sidewalk.

Fibrous concrete reinforcement shall conform to ASTM C 1116, ASTM C 94, and ASTM E 119-83.

Fibrous concrete reinforcement shall be 100 percent virgin polypropylene fibrillated material mixed with concrete at a minimum of 1.5 pounds per cubic yard of concrete.

5.05 PLACEMENT OF REINFORCEMENT

Reinforcing steel placement shall conform to the applicable requirements of FDOT-SSRBC Articles 350-7 and 415-5.

The following minimum concrete cover shall be provided for all reinforcement:

Concrete cast against and permanently exposed to earth	3-inch
Concrete exposed to earth or weather	
Primary reinforcement	2-inch
Stirrups, ties, and spirals	1 1/2-inch
Concrete deck slabs, top and bottom	2-inch
Concrete not exposed to earth or weather	
Primary reinforcement	1 1/2-inch
Stirrups, ties, and spirals	1-inch

For bundled bars, the minimum concrete cover shall be equal to the equivalent diameter of the bundle, but need not be greater than 2-inch, except against and permanently exposed to earth, in which case the minimum cover shall be 3-inch.

Minimum concrete cover shall be increased in corrosive environment areas.

5.06 PLACEMENT OF CONCRETE

Placement of Portland cement concrete shall conform to the applicable requirements of FDOT-SSRBC Article 400-7.

Unless specific permission is granted prior to each occurrence, no concrete shall be delivered to the job site before 7:30 a.m. or after 4:30 p.m. No concrete shall be placed until the reinforcing steel placement has been inspected and approved by the Engineer.

5.07 CURING OF CONCRETE

Curing of Portland cement concrete shall conform to the applicable requirements of FDOT-SSRBC Article 520-8.

5.08 FINISHING OF CONCRETE

Finishing of Portland cement concrete shall conform to the applicable requirements of FDOT-SSRBC Article 400-15.

5.09 CONCRETE BRICK

Concrete brick for use in drainage structures and where shown on the Contract Drawings shall be approximately 3 5/8-inch by 7 5/8-inch by 2 1/4-inch in size and shall conform to ASTM C 55, Grade N-II or S-II.

5.10 CLAY BRICK

Brick shall be sound, hard, and uniformly burned regular and uniform in shape and size or compact texture and conforming to ASTM C 32, "Specification for Sewer and Manhole Brick (Made from Clay or Shale) Grade MS or MM."

5.11 MASONRY BLOCK

Load bearing units shall be hollow or solid, as shown on the Contract Drawings, and shall conform to ASTM C 90, Type I, 8-inch by 16-inch or 4-inch by 16-inch nominal face dimension.

Non-load bearing units shall conform to ASTM C 129, Type I, 8-inch by 16-inch or 4-inch by 16-inch nominal face dimension.

Horizontal continuous joint reinforcement shall be provided at every other joint. Reinforcement shall be a minimum of #9 gage steel, Grade 50. Wire shall be hot-dip galvanized, conforming to ASTM A 153, Class B-2 (1.5 ounce per square foot of wire surface) for zinc coating after prefabrication into units. Mortar coverage shall be not less than 5/8-inch on joint faces exposed to exterior, and not less than 1/2-inch elsewhere.

5.12 MORTAR

Mortar shall consist of a mixture of cementitious materials, aggregate, and water. All proportions shall be by volume and/or weight. Masonry cement shall conform to ASTM C 91 and C 270. Fine aggregate and Portland cement shall conform to the applicable requirements of FDOT-SSRBC Sections 902 and 921 respectively. Mortar shall have a minimum compressive strength of 1,500 psi.

5.13 GROUT

Grout shall be identical to mortar in all respects.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 5A – ALUMINUM GRATING AND STAIRS

5A.01 GENERAL

5A.01.01 Work Included

The work under this section includes fabrication and erection of various aluminum items including aluminum frames, bracing, stairs, gratings and supports.

5A.01.02 Quality Assurance

A. Standards: Unless otherwise specified, all materials, workmanship and practices shall conform to the following Standards:

   a. Florida Building Code, Current Edition

   b. Aluminum Design Manual, Current Edition, by the Aluminum Association.

B. Qualifications: Fabrication and erection shall be by a qualified fabricator and erector approved by the Engineer. Preparation of shop drawings shall not begin until the fabricator and erector have been approved.

5A.01.03 Regulatory Requirements

A. Aluminum fabrication materials shall meet the requirements of the following ASTM Standards and Specifications, unless otherwise specified:

   a. Aluminum (Extruded Shapes), 6061-T6 (Alum. alloy)

   b. Aluminum (Extruded Pipe), 6061-T6 (Alum. alloy)

   c. Aluminum Bar Structural, 6061-T6 (Alum. alloy)

   d. Aluminum Grating, 6063-T6 (Alum. alloy)

   e. Stainless Steel Bolts, Fasteners AISI, Type 316

   f. Stainless Steel Plate and Sheet, Wire AISI, Type 316

   g. Welding Rods for Aluminum, AWS D1.2 Spec. for Welding (Alum.)

B. Comply with the provisions of the following standards except as otherwise shown or specified.

   a. Aluminum Design Manual, Current Edition, Specification for Aluminum Structures.

   b. ASTM B308 / B308M, Standard Specification for Aluminum-Alloy 6061-T6 Standard Structural Profiles

c. ASTM B221, Standard Specification for Aluminum and Aluminum-Alloy Extruded Bars, Rods, Wire, Profiles, and Tubes

d. ASTM B429, Standard Specification for Aluminum-Alloy Extruded Structural Pipe and Tube

e. AWS code for welding in building construction.

5A.01.04 Submittals

A. Shop Drawings, signed and sealed by a Florida registered Professional Engineer, shall include descriptive information as required to fully describe the aluminum components to be erected. Shop Drawings shall conform to AA recommendations and specifications and shall show all holes, etc., required for other Work. Include complete details showing all members and their connections, anchor bolt layouts, schedules for fabrication procedures, and diagrams showing the sequence of erection. Submittals shall include, but not be limited to the following:

a. Complete Information and Dimensions

b. Sequences of Erection

c. Mill Certificates

d. Connection Calculations - Calculations, signed and sealed by a Florida registered professional engineer, shall include design assumptions, manual calculations, computer printouts, and any other information required to evaluate the connection designs. Fabrication shall not be approved until the submission has been approved. Submittals shall in accordance with the requirements set forth in Section 3.

5A.02 PRODUCTS

5A.02.01 Materials

A. Standard Shapes, Bars & Plates:

a. ASTM B 209 - Alloy 6061-T6

b. ASTM B 308 - Alloy 6061-T6

B. Standard Threaded Fasteners:

a. Nuts, bolts and washers shall be 316 stainless steel.

C. Welding Electrodes: 4043 filter metal.

5A.02.02 ALUMINUM GRATING

A. For 3-foot or less spans: 1-1/2 inch deep serrated I-bars (alloy 6063-T6) spaced at 1-3/16-inch center-to-center shall be capable of supporting at least 681 PSF uniform load with no more than 0.207-inch deflection and at least 1021 pounds per foot of width concentrated load at midspan with no more than 0.166-inch deflection. Grating shall have end plates so that all I-bars are supported on all sides of grating panel.

B. For 4-foot or less spans: 1-1/2 inch deep serrated I-bars (alloy 6063-T6) spaced at 1-3/16-inch center-to-center shall be capable of supporting at least 383 PSF uniform load with no more than 0.369-inch deflection and at least 766 pounds per foot of width concentrated load at midspan with no more than 0.295-inch deflection. Grating shall have end plates so that all I-bars are supported on all sides of grating panel.

C. For 5-foot or less spans: 2 inch deep serrated I-bars (alloy 6063-T6) spaced at 1-3/16-inch center-to-center shall be capable of supporting at least 429 PSF uniform load with no more than 0.436-inch deflection and at least 1339 pounds per foot of width concentrated load at midspan with no more than 0.312-inch deflection. Grating shall have end plates so that all I-bars are supported on all sides of grating panel

D. For 6-foot or less spans: 2-1/2 inch deep serrated I-bars (alloy 6063-T6) spaced at 1-3/16-inch centers shall be capable of supporting at least 460-pound uniform load at a deflection of no more than 0.506-inch and 1379 pounds of concentrated load at midspan with a deflection of no more than 0.405-inch. Grating shall have end plates so that all I-bars are supported on all sides of the grating panel.

E. Gratings shall be fastened at 24-inch centers along each supported edge, with a minimum of four aluminum fasteners with stainless steel hardware per panel in accordance with the manufacturer's recommendations.

F. Aluminum grating shall have a mil finish, acidic detergent cleaned.

G. Band all grating openings.

H. Grating spans in excess of 6 feet are not permitted. When the required spans exceed 6 feet, the Contractor shall provide intermediate aluminum supports subject to the Engineer’s approval.

I. Finishes: Where aluminum is in contact with dissimilar metals or concrete it shall be protected with two coats (8 mils/coat DFT) coal tar epoxy.

J. Where the contact of dissimilar metals may cause electrolysis or where aluminum will contact concrete, mortar or plaster, the contact surface of the metals shall be separated using not less than one coat of Zinc chromate primer and one heavy coat of aluminum pigmented asphalt paint on each surface; or where deemed necessary by the Engineer, not less than one course of asphalt saturated cotton

fabric cemented to both metals with flashing cement, shall be used. Finished works shall be cleaned and excess cement removed.

5A.02.03 ALUMINUM STAIR TREADS

A. Serrated I-bars (alloy 6063-T6) spaced at 1-3/16-inch center to center shall be capable of supporting at least 100 PSF uniform load with no more than 0.25-inch deflection and at least 200 pounds per foot of width concentrated load at midspan with no more than 0.25 inch deflection over a 3 foot span.

B. Treads shall have anti-slip, cast abrasive safety nosings and shall have a mil finish, acidic detergent cleaned.

C. Fasten treads to safely support rated live load capacity in accordance with manufacturer's recommendations.

D. Isolate all aluminum from steel supports with neoprene gasket material.

5A.02.04 MISCELLANEOUS ALUMINUM FABRICATIONS

A. Unless otherwise indicated on the drawings, aluminum sheet metal fabrications shall be welded and 1/4-inch thick, minimum. Fasteners, where required, shall be 316 SS.

B. Miscellaneous aluminum shapes and plates shall be fabricated as shown. Furnish all miscellaneous aluminum shown, but not otherwise detailed. Structural shapes and extruded items shall conform to the detail dimensions on the Drawings within the tolerances published by the American Aluminum Association.

5A.03 EXECUTION

5A.03.01 FABRICATION

A. Fabrication shall be in accordance with the specified standards. Splices not indicated on the drawings will not be permitted.

B. Surface Treatment: Treatment is required where indicated on the drawings.

C. All miscellaneous metal work shall be formed true to detail, with clean, straight, sharply defined profiles and smooth surfaces of uniform color and texture and free from defects impairing strength or durability.

D. Connections and accessories shall be of sufficient strength to safely withstand stresses and strains to which they will be subjected. Steel accessories and connection to steel or cast iron shall be steel, unless otherwise specified. Threaded connections shall be made so that the threads are concealed by fitting.

E. Welded joints shall be rigid and continuously welded or spot welded as specified or shown. The face of welds shall be dressed flush and smooth. Exposed joints shall be close fitting and jointed where least conspicuous.

F. Welding of parts shall be in accordance with the Standard Code of Arc and Gas Welding in Building Construction of the AWS and shall only be done where shown, specified, or permitted by the Owner. All welding shall be done only by welders certified as to their ability to perform welding in accordance with the requirements of the AWS Code. Component parts of built-up members to be welded shall be adequately supported and clamped or held by other adequate means to hold the parts in proper relation for welding.

G. All aluminum finish exposed surfaces shall have manufacturer's standard mill finish.

5A.03.02 ERECTION

A. Erection shall be in accordance with the specified standards and as indicated on the drawings.

B. No painting required, unless otherwise noted.

C. Welding: Welding of aluminum shall be performed by the Gas Metal Arc (MIG) or Gas Tungsten ARC (TIG) process, per AWS Welding handbook. All welding shall be performed by an AWS certified welder.

5A.03.03 PREPARATION

A. Clean and strip primed steel and aluminum items to bare metal where site welding is required.

5A.03.04 INSTALLATION

A. Install all furnished items embedded in concrete or other masonry. Items to be attached to concrete or masonry after such work is completed shall be installed in accordance with the details shown. All dimensions shall be verified at the site before fabrication is started.

B. Where aluminum is embedded in concrete, apply a heavy coat of approved bitumastic troweling mastic in accordance with the manufacturer's instructions prior to installation.

C. Where aluminum contacts masonry, concrete, or grout, coat the contact surface of the aluminum with one coat of zinc chromate primer and a heavy coat of bituminous paint.

D. Where aluminum contacts a dissimilar metal, apply a heavy brush coat of zinc-chromate primer and provide a 1/32-inch neoprene gasket between the aluminum and the dissimilar metal.

E. Install items plumb and level, accurately fitted, free from distortion or defects.

F. Allow for erection loads, and for sufficient temporary bracing to maintain true alignment until completion of erection and installation of permanent attachments.

G. Field weld components indicated on shop drawings.

H. Perform field welding in accordance with AWS D1.2/D1.2M.

I. Obtain Engineer approval prior to site cutting or making adjustments not scheduled.

J. Verify that supports and anchors are correctly positioned.

K. Verify that opening sizes and dimensional variations are acceptable to suit grading, railing, and stair tolerances.

5A.03.05 TOLERANCES

A. Conform to ANSI/NAAMM MBG 531-00 for bar grating.

B. Maximum space between sections: ¼ inch.

C. Maximum variation from top surface plane of sections: ¼ inch.

D. Perform cutting, drilling, flashing and fitting required for installation of metal fabrications. Set the work accurately, provide temporary bracing and anchors in formwork for items to be built into masonry and concrete. Field weld joints, do not shop weld because of size limitations.

END OF SECTION

SECTION 5B – PIPE AND TUBE RAILINGS

5A.01 GENERAL

5A.01.01 Coordination

A. Coordinate installation of anchorages for railings. Furnish setting drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors, that are to be embedded in concrete or masonry. Deliver such items to Project site in time for installation.

B. Schedule installation so wall attachments are made only to completed walls. Do not support railings temporarily by any means that do not satisfy structural performance requirements.

5A.01.02 Action Submittals

A. Product Data: For the following:

   a. Manufacturer's product lines of mechanically connected railings.

   b. Railing brackets.

   c. Grout, anchoring cement, and paint products.

B. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.

C. Delegated-Design Submittal: For railings, including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

5A.01.03 Information Submittals

A. Qualification Data: For testing agency.

B. Welding certificates.

C. Mill Certificates: Signed by manufacturers of stainless-steel products certifying that products furnished comply with requirements.

D. Paint Compatibility Certificates: From manufacturers of topcoats applied over shop primers certifying that shop primers are compatible with topcoats.

E. Product Test Reports: For pipe and tube railings, for tests performed by a qualified testing agency, according to ASTM E894 and ASTM E935.

F. Evaluation Reports: For post-installed anchors, from ICC-ES.

5A.01.04 Quality Assurance

A. Welding Qualifications: Qualify procedures and personnel according to the following:

   a. AWS D1.2/D1.2M, "Structural Welding Code - Aluminum."

5A.01.05 Delivery, Storage, and Handling

A. Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

5A.01.06 Field Conditions

A. Field Measurements: Verify actual locations of walls and other construction contiguous with metal fabrications by field measurements before fabrication.

5A.02 PRODUCTS

5A.02.01 Performance Requirements

A. Delegated Design: Engage a qualified professional engineer, to design railings, including attachment to building construction.

B. Structural Performance: Railings, including attachment to building construction, shall withstand the effects of gravity loads and the following loads and stresses within limits and under conditions indicated:

   a. Handrails and Top Rails of Guards:

      i. Uniform load of 50 lbf/ ft. applied in any direction.

      ii. Concentrated load of 200 lbf applied in any direction.

      iii. Uniform and concentrated loads need not be assumed to act concurrently.

C. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.

   a. Temperature Change: 120 deg F ambient; 180 deg F, material surfaces.

5A.02.02 Metals, General

A. Metal Surfaces, General: Provide materials with smooth surfaces, without seam marks, roller marks, rolled trade names, stains, discolorations, or blemishes.

B. Brackets, Flanges, and Anchors: Cast or formed metal of same type of material and finish as supported rails unless otherwise indicated.

5A.02.03 Aluminum

A. Posts: 1.90-inch O.D., Schedule 80, Alloy 6063-T6, at 6-feet on center maximum. The railing height shall be as required to meet code, but not less than 42- inches.

B. Rails: 1.90-inch O.D., Schedule 40, Alloy 6063-T6. The number and spacing of ails required shall be as required to meet Code, but not less than 3 for horizontal rails and 2 for inclined rails.

C. Kick Plates: 1/4-inch by 4-inch continuous plate, Alloy 6063-T52. Kick plate supports and shape shall be at sufficient frequency and construction for the installed kick plates to be completely rigid.

D. Base Plates: Alloy 6063-T52.

E. Brackets: Fully welded construction to fasten posts to walkway stringers. Where brackets are attached inside the web of a channel and vertical posts are used, the handrail shall be attached to the posts with adjustable standoffs to allow the railing to be directly over channel flange.

5A.02.04 Fasteners

A. General: Provide the following:

a. Aluminum Railings: Type 316 stainless-steel fasteners.

B. Fasteners for Interconnecting Railing Components:

b. Provide concealed fasteners for interconnecting railing components and for attaching them to other work, unless otherwise indicated.

C. Post-Installed Anchors: Torque-controlled expansion anchors or chemical anchors capable of sustaining, without failure, a load equal to 4 times the load imposed when installed in concrete, as determined by testing according to ASTM E488/E488M, conducted by a qualified independent testing agency.

c. Material for Exterior Locations and Where Stainless Steel Is Indicated: Alloy Group 2 stainless-steel bolts, ASTM F593, and nuts, ASTM F594.

5A.02.05 Miscellaneous Materials

A. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.

a. For aluminum railings, provide type and alloy as recommended by producer of metal to be welded and as required for color match, strength, and compatibility in fabricated items and that which matches the existing railing on site.

B. Nonshrink, Nonmetallic Grout: Factory-packaged, non-staining, noncorrosive, nongaseous grout complying with ASTM C1107/C1107M. Provide grout specifically recommended by manufacturer for interior and exterior applications.

C. Anchoring Cement: Factory-packaged, nonshrink, non-staining, hydraulic-controlled expansion cement formulation for mixing with water at Project site to create pourable anchoring, patching, and grouting compound.

   b. Water-Resistant Product: provide formulation that is resistant to erosion from water exposure without needing protection by a sealer or waterproof coating and that is recommended by manufacturer for exterior use.

5A.02.06 Fabrication

A. General: Fabricate railings to comply with requirements indicated for design, dimensions, member sizes and spacing, details, finish, and anchorage, but not less than that required to support structural loads.

B. Shop-assemble railings to greatest extent possible to minimize field splicing and assembly. Disassemble units only as necessary for shipping and handling limitations. Clearly mark units for reassembly and coordinated installation. Use connections that maintain structural value of joined pieces.

C. Cut, drill, and punch metals cleanly and accurately. Remove burrs and ease edges to a radius of approximately 1/32 inch unless otherwise indicated. Remove sharp or rough areas on exposed surfaces.

D. Form work true to line and level with accurate angles and surfaces.

E. Fabricate connections that are exposed to weather in a manner that excludes water. Provide weep holes where water may accumulate.

F. Cut, reinforce, drill, and tap as indicated to receive finish hardware, screws, and similar items.

G. Connections: Fabricate railings with welded connections unless otherwise indicated.

H. Welded Connections for Aluminum Pipe: Fabricate railings to interconnect members with concealed internal welds that eliminate surface grinding, using manufacturer's standard system of sleeve and socket fittings.

I. Nonwelded Connections: Connect members with concealed mechanical fasteners and fittings. Fabricate members and fittings to produce flush, smooth, rigid, hairline joints.

J. Close exposed ends of railing members with prefabricated end fittings.

K. Provide wall returns at ends of wall-mounted handrails unless otherwise indicated. Close ends of returns unless clearance between end of rail and wall is 1/4 inch or less.

L. Brackets, Flanges, Fittings, and Anchors: Provide wall brackets, flanges, miscellaneous fittings, and anchors to interconnect railing members to other work unless otherwise indicated.

M. Provide inserts and other anchorage devices for connecting railings to concrete or masonry work. Fabricate anchorage devices capable of withstanding loads imposed by railings. Coordinate anchorage devices with supporting structure.

N. Toe Boards: Provide toe boards at railings around openings and at edge of open-sided floors and platforms. Fabricate to dimensions and details indicated.

5A.02.07 Aluminum Finishes

A. Appearance of Finished Work: Variations in appearance of abutting or adjacent pieces are acceptable if they are within one-half of the range of approved Samples. Noticeable variations in the same piece are unacceptable. Variations in appearance of other components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.

B. Clear Anodized Finish: AAMA 611, AA-M12C22A31.

5A.03 EXECUTION

5A.03.01 Installation, General

A. Fit exposed connections together to form tight, hairline joints.

B. Perform cutting, drilling, and fitting required for installing railings. Set railings accurately in location, alignment, and elevation; measured from established lines and levels and free of rack.

   a. Do not weld, cut, or abrade surfaces of railing components that are coated or finished after fabrication and that are intended for field connection by mechanical or other means without further cutting or fitting.

   b. Set posts plumb within a tolerance of 1/16 inch in 3 feet .

   c. Align rails so variations from level for horizontal members and variations from parallel with rake of steps and ramps for sloping members do not exceed 1/4 inch in 12 feet

C. Control of Corrosion: Prevent galvanic action and other forms of corrosion by insulating metals and other materials from direct contact with incompatible materials.

   a. Coat, with a heavy coat of bituminous paint, concealed surfaces of aluminum that are in contact with grout, concrete, masonry, wood, or dissimilar metals.

D. Adjust railings before anchoring to ensure matching alignment at abutting joints.

E. Fastening to In-Place Construction: Use anchorage devices and fasteners where necessary for securing railings and for properly transferring loads to in-place construction.

5A.03.02 Railing Connections

A. Nonwelded Connections: Use mechanical or adhesive joints for permanently connecting railing components. Seal recessed holes of exposed locking screws using plastic cement filler colored to match finish of railings.

B. Welded Connections: Use fully welded joints for permanently connecting railing components. Comply with requirements for welded connections in "Fabrication" Article whether welding is performed in the shop or in the field.

5A.03.03 Anchoring Posts

A. Use metal sleeves preset and anchored into concrete for installing posts. After posts are inserted into sleeves, fill annular space between post and sleeve with nonshrink, nonmetallic grout mixed and placed to comply with anchoring material manufacturer's written instructions.

B. Form or core-drill holes not less than 5 inches deep and 3/4 inch larger than OD of post for installing posts in concrete. Clean holes of loose material, insert posts, and fill annular space between post and concrete with nonshrink, nonmetallic grout, mixed and placed to comply with anchoring material manufacturer's written instructions.

C. Leave anchorage joint exposed with 1/8-inch buildup, sloped away from post.

D. Anchor posts to metal surfaces with oval flanges, angle type, or floor type as required by conditions, connected to posts and to metal supporting members as follows:

   a. For aluminum pipe railings, attach posts using fittings designed and engineered for this purpose.

E. Install removable railing sections, where indicated, in slip-fit metal sockets cast in concrete.

5A.03.04 Attaching Railings

A. Anchor railing ends at walls with round flanges anchored to wall construction and welded to railing ends or connected to railing ends using nonwelded connections.

B. Anchor railing ends to metal surfaces with flanges bolted to metal surfaces and welded to railing ends.

C. Attach railings to wall with wall brackets. Locate brackets as indicated or, if not indicated, at spacing required to support structural loads.

D. Secure wall brackets and railing end flanges to building construction as follows:

   a. For concrete and solid masonry anchorage, use drilled-in expansion shields and hanger or lag bolts.

5A.03.05 Protection

A. Protect finishes of railings from damage during construction period with temporary protective coverings approved by railing manufacturer. Remove protective coverings at time of Substantial Completion.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 6 – EXCAVATION AND BACKFILL

6.01 GENERAL

The Work in this section includes furnishing all labor, materials, tools, and equipment for excavation and backfill of roadways, sidewalks, curbs, driveways, pipelines, and structures. The Work also includes removing and disposing of leftover material and furnishing and placing off-site fill.

Bidders shall examine the site of the Work, make their own additional soil borings and tests, and make their own determination of the character of materials and the conditions to be encountered on the Work; their Bid shall be based upon their own investigation.

6.02 TRENCH SAFETY

The Contractor shall be responsible for maintaining safety at each excavation. The Contractor shall adhere to the Florida Trench Safety Act (FS 90-96), OSHA trench excavation safety standards (29 CFR, Subpart P, 1926.650), and OSHA trench excavation shielding, sloping, or sheeting requirements. Inspections required by OSHA trench excavation safety standards shall be provided by the Contractor's "competent person," as defined by OSHA 29 CF, Subpart P, 1926. The Contractor's "competent person" shall be identified at the Preconstruction Conference.

The Contractor certifies by submitting the bid and subsequently executing this Contract, that all trench excavation done within his control shall be accomplished in strict adherence with OSHA trench safety standards, the Florida Trench Safety Act, and public safety.

The Contractor also agrees to produce or obtain, prior to award of the subcontracts, identical certification from subcontractors who will perform trench excavation, and to retain such certification for at least 3 years following Final Acceptance.

The Contractor shall consider all available geotechnical information when designing the trench excavation safety system. If sufficient geotechnical information is not available, the Contractor may obtain such to support the requirements set forth above, at no additional cost to the City.

6.03 WORK IN WETLANDS, MANGROVES, AND PRESERVATION AREAS

Strict adherence to all permits is required. Damage to wetlands, periodically wet areas, mangroves, and preservation areas is prohibited. Any such damage by the Contractor shall be duly rectified at no additional cost to the City and as approved by the regulatory agencies.

6.04 CLEARING AND GRUBBING

All clearing and grubbing Work shall conform to all applicable requirements of FDOT-SSRBC Section 110 "Clearing and Grubbing" except as modified herein.

The Contractor shall remove only those trees and bushes necessary to complete the specified Work. Not all the trees and bushes have been located or shown on the Contract Drawings. The

Contractor shall flag those trees and bushes to be removed. All other trees and bushes shall be protected per Specifications.

All roots, stumps, and other debris shall be removed to a depth not less than 12 inches below a bearing surface. The disturbed surface shall be backfilled, graded, and compacted as specified.

No tree or bush shall be removed without the review and acceptance of the Engineer. The Contractor shall obtain all necessary City or County permits for each tree to be removed. Tree removal shall conform to the provisions of the Specifications.

6.05 ROADWAY EXCAVATION

The extent of excavation shall be as shown on the Contract Drawings or otherwise approved by the City and shall include roadway excavation and/or filling and grading, together with the removal of trees, bushes, existing asphalt, concrete, or other material, as required to facilitate construction and restoration as directed by the City.

All excavation Work shall conform to all applicable requirements of FDOT-SSRBC Section 120 “Excavation and Embankment” except as modified herein.

6.06 TRENCH EXCAVATION

Mechanical excavation shall be terminated at least 2 inches above the proposed pipe bed and trench bottom, then shaped and compacted so as to provide uniform bearing on the barrel of the pipe. Particular care shall be taken to recess the bottom of the trench at the bell of the pipe to relieve the bell of all load.

A minimum trench width shall be maintained, allowing room for the jointing and proper compaction of the backfill. If material is encountered that is unsuitable in the opinion of the Engineer, it shall be removed by the Contractor and replaced with acceptable material compacted in place as specified. In the event the Contractor excavates below the elevation required without approval, the Contractor shall backfill with approved materials compacted to obtain a suitable trench bottom, all to the satisfaction of the Engineer and at no additional cost to the City.

The amount of open trench shall be limited so that no more than 100 feet of open trench in advance of the backfilling operation will remain at the end of that working day. All open trench shall be protected by the Contractor with barriers, warning devices, and traffic control devices, which shall be kept in the correct position, properly directed, anchored when required, and clearly visible at all times. The barriers, warning devices, and traffic control devices shall be suitably lighted at all times when vehicular traffic lights are required.

6.07 STRUCTURE EXCAVATION

Excavation shall be of the size and depth required for construction of structures and their foundations. Unsuitable material encountered shall be removed to the depth required to obtain sound foundation material or as ordered by the Engineer. Over-excavated areas shall be filled with approved backfill material compacted as specified, at no additional cost to the City.

Unsuitable existing soil shall be removed and replaced with compacted material, as approved by the Engineer and as specified in the subsection herein headed "Excavation of Unsuitable Material."

6.08 EXCAVATION OF UNSUITABLE MATERIAL

Unsuitable material shall include rock, concrete, and boulders. Unsuitable soft material shall include logs, muck, other soft soils, organic soils, and other soils as specified or as ordered by the Engineer to be unsuitable.

All excavation of unsuitable material shall conform to all applicable requirements of FDOT-SSRBC Section 120 “Excavation and Embankment” except as modified herein.

Unsuitable material encountered below or within the roadway stabilized subgrade, the trench bottom, or a structure bottom, shall be removed by the Contractor to the limits established by the Engineer and disposed of from the Work area at an approved disposal area. Unsuitable material shall be replaced with approved material and compacted as specified.

No additional payment will be made for backfill material obtained from any source and used to replace any unsuitable material except as otherwise specified.

6.09 SHEETING, SHIELDING, AND SLOPING

All excavations shall be properly sheeted, shielded, or sloped to the required slope to furnish safe working conditions, to prevent shifting of material, to prevent damage to structures or other Work, and to avoid delay to the Work, all in accordance with applicable safety and health regulations. The minimum sheeting and shielding for trench excavations shall meet the general trenching requirements of the Florida Trench Safety Act and OSHA standards.

The sheeting and shielding shall be of adequate strength and quantity for the purpose intended. Any sheeting extending below the level of above the top of pipeline shall be cut off as ordered by the Engineer and left in place. In addition, the Engineer may order the Contractor to cut off and leave in place any sheeting, shielding, or other approved support where required to protect construction, property, or existing facilities or utilities.

Damages resulting in the installation or removal of sheet piling shall be rectified by the Contractor at no additional cost to the City.

6.10 DEWATERING

A. All pipeline and appurtenances shall be laid entirely in a dry trench. All foundations and structure walls shall be constructed or installed in a dry excavation.

B. Before commencing any excavation at the site of the Work, the Contractor shall submit to the Engineer for review, the methods, equipment, and arrangement of facilities proposed for dewatering and disposal of water at the site and of all water entering any excavation or other part of the Work from any source whatsoever.

C. Water discharged from dewatering equipment shall be carried into surface drainage facilities except water quality treatment systems and shall not be discharged into sanitary sewer lines. The Contractor shall prevent water from puddling in streets or on private properties. The depositing of dirt in storm drains and ditches and staining of existing facilities shall not be permitted.

D. Adequate standby facilities shall be provided to ensure that the excavation will be kept dry in the event of power failure or mechanical breakdown. Facilities for the removal and disposal of water shall be of sufficient capacity to keep the excavation dry under all circumstances with one-half of the facilities out of service. If well points are used, provision shall be made for removing and resetting individual well points without taking the system of which they are a part out of service.

E. The City reserves the right to require the Contractor to replace noisy equipment in order to keep disturbance to a minimum.

F. The cost of dewatering and disposal of water shall be included in the unit quantity for each appropriate item bid.

G. Refer to the Specifications for requirements concerning encountered groundwater contaminates.

6.11 BORROW MATERIAL

Any borrow excavation Work shall consist of the excavation and satisfactory utilization of material from areas provided by the Contractor when necessary material is not available from the normal excavation or grading operations. This Work shall conform to FDOT-SSRBC Section 120 “Excavation and Embankment” except as modified herein.

If additional fill material is required, it shall be City approved material supplied and compacted by the Contractor. All compaction under roadway, alley, driveway, curb, walk, or other improved surface shall be to a density as specified in the Contract Documents. Unless otherwise directed by the City, all material not required for construction shall be removed from the premises and disposed of by the Contractor.

6.12 BEDDING MATERIAL

A. Where shown, ordered, or required, the Contractor shall place bedding material prior to placing pipelines, structures, or slabs. Bedding material may be either excavated approved native sand, concrete sand, gravel, or reclaimed concrete.

B. Off-site bedding material shall be sand or gravel. Sand bedding material shall be a clean concrete sand of uniform gradation between sieve sizes No. 4 and No. 50. All particles shall pass a 3/8-inch sieve and no particles shall pass a No. 100 sieve.

C. Gravel bedding material shall meet the requirements of ASTM C33 and shall be coarse aggregate, DOT Size No. 67 (3/4-inch to No. 4) or approved equal.

D. Reclaimed concrete bedding material shall be graded to meet the size requirements as specified for gravel bedding.

E. Bedding material, where required, shall be placed in lifts and compacted in a manner to achieve the specified density as specified and/or as shown.

F. If gravel bedding is used, an impermeable groundwater barrier shall be placed at 100-foot intervals in the gravel bedding. The impermeable groundwater barrier shall consist of a 10 mil sheet of polyethylene covering the full cross sectional area of the gravel, embedded 6 inches into the trench sides and bottom, and extending to the top of the gravel. The barrier shall be offset a minimum of 2 feet from any culvert or pipe joint. Ends and splice points shall be lapped a minimum of 12 inches.

6.13 STRUCTURAL SLAB BEDDING

Structural slabs for manhole bases, footings, and similar structures shall be placed on approved compacted bedding material and leveled as specified and/or as shown.

6.14 BACKFILL MATERIAL

Backfill material shall consist of earth, loam, sandy clay, sand, gravel, soft shale, or other materials, free from organic materials, large clods of earth, or stones. Backfill material shall be either soil classification A-1, A-2 or A-3, per AASHTO M-145, and shall be free of organic matter, lumps of clay or marl, muck, compressible materials, and rock exceeding 2.5 inches in diameter. Broken concrete, masonry, rubble or other similar materials shall not be used as backfill.

6.15 BACKFILL COMPACTION

All backfill shall be compacted as specified herein and shall meet the following minimum density as determined by the AASHTO T-180 method for backfill outside the right-of-way and in City streets, and by the AASHTO T-99 method if in County or FDOT right-of-way.

AASHTO T-180 Method C or D will be used for stabilized subgrade and base compaction tests, and Method A or B will be used for backfill testing, or as directed by the Engineer or jurisdiction.

	T-180	T-99
Roadway stabilized subgrade	98%	N/A*
Roadway base	98%	N/A*
Curb base	98%	N/A
Sidewalk and driveway base	98%	N/A
Pipe bedding	98%	100%
Pipe backfill - under pavement	98%	100%
Pipe backfill - under grass	95%	100%
Structure base slabs	100%	N/A
Structure backfill	98%	N/A

*Roadway stabilized subgrade and base material shall meet LBR requirements as specified in the Contract Documents.

6.16 BACKFILLING OF TRENCH

Backfilling shall be accomplished with suitable material and shall commence only after the pipelines have been laid and tentatively accepted by the City. The space between the pipe and the sides of the trench shall be packed full by hand-shoveled earth free from lumps or debris.

The backfill material shall be placed in 6-inch lifts and compacted, using approved tampers to the required compaction, to a point 12 inches over the top of the pipe. The remaining backfill (under areas other than roadways) shall be placed in uniform lifts not greater than 12 inches thick (or less as approved for mechanical equipment available) and tamped to the required compaction. Backfill under roadways shall be compacted in 6-inch lifts.

Where trenches are improperly backfilled, or where settlement occurs, the trenches shall be reopened to the depth required for proper compaction, refilled and compacted, and the surface restored to the grade and compaction, mounded over and smoothed off.

6.17 BACKFILLING STRUCTURES

Backfill around structures shall be of suitable job-excavated material, suitable off-site fill material, or other material approved by the Engineer. Such backfill shall extend from the bottom of the excavation or top of bedding to the bottom of pavement base course, the bottom of the subgrade for lawns or lawn replacement, the top of the existing ground surface, or to such other grades as may be shown or required.

The backfill shall be placed in uniform lifts not greater than 12 inches thick, and thoroughly compacted in place.

6.18 BACKFILLING UNDER ROADWAYS

Backfill placed under roadways and other paved surfaces shall be compacted in 6-inch lifts and thoroughly compacted in place, with suitable equipment as specified herein.

6.19 DISPOSING OF LEFTOVER MATERIAL

The Contractor shall bring the surface to the same level as existed prior to the excavation. All leftover material shall be hauled from the site and disposed of by the Contractor. Leftover material shall not be stored in or along rights-of-way or easements.

6.20 ADJACENT FACILITIES

The Contractor shall be responsible for the protection, removal, and replacement of all adjacent structures, utilities, trees, shrubbery, curbs, culverts, headwalls, fences, signs, and other miscellaneous structures encountered during the course of the Work.

6.21 TEMPORARY SUPPORTS

Temporary supports for 16-inch and larger pressure and gravity pipes shall be designed by the Contractor and submitted to the City as required by Specifications. Temporary supports that include a structural beam, or other such member(s), shall be designed, signed and sealed by a Professional Engineer.

6.22 FLOWABLE FILL

Where shown on the Contract Drawings, or where ordered by the Engineer, the Contractor shall backfill a void area or an excavation with flowable fill. Flowable fill may be shown, or ordered, to fill abandoned pipes, abandoned underground steel storage tanks, trench backfill, washout area under structural slabs or behind walls, or other similar locations.

Flowable fill shall be produced and delivered to the site. Placing of flowable fill shall be by chute, pumping, or other approved methods. Flowable fill shall be placed to the designated fill line without vibration. The Contractor shall take all necessary precautions to prevent any damage caused by hydraulic pressure of the fill during placement prior to hardening. Flowable fill shall not be used for pipe bedding and backfill in the zone from the bottom of a pipe to 12 inches above the top of pipe.

Flowable fill shall consist of materials conforming to FDOT-SSRBC Sections as follows:

Cement (Type I or II)	Section 921	“Portland Cement and Blended Cement”
Fly ash (Type F)	Section 929	“Supplementary Cementitious Materials”
Fine aggregate (sand)	Section 902	“Fine Aggregate”
Water	Section 923	“Water for Concrete”

The Contractor shall submit a proposed design mix that will produce a flowable fill meeting the strength requirements specified herein, using the following materials:

	Pounds per cubic yard
Cement (Type I or II)	50 - 200
Fly ash (Type F)	0 - 2,000
Fine aggregate (sand)	2,500 - 3,000
Water	325 - 550
Note: 6-inch to 10-inch slump	

Flowable fill material shall be proportioned to produce a 28-day compressive strength approximately as follows:

	Pounds per square inch
Pipe trench backfill	50 - 150
Fill abandoned pipes or tanks	30 - 150
Under slabs, behind walls	300 - 1000
Note: Density in place 115 to 145 pounds per cubic foot.	

Not more than 60 minutes shall elapse between the start of moist mixing and the placement of the flowable fill.

Flowable fill placed on slopes shall have a reduced slump with a reduction in water and shall be able to be shaped as required.

The Contractor shall place the flowable fill in such a manner as to eliminate all cavities.

Flowable fill shall not be placed in salt water. When within a tidal area, the flowable fill shall be placed immediately after the salt water has receded.

When flowable fill is used adjacent to ductile iron pipe, the pipe shall be polyethylene encased.

END OF SECTION

SECTION 7 - SURFACE RESTORATION

7.01 GENERAL

The Work in this section includes restoring and maintaining pavements and pavement bases, curbing, sidewalks, driveways, and grass surfaces that are disturbed, damaged, or destroyed during the course of the Work under this Contract.

The quality of workmanship and materials used in the restoration shall produce a surface equal to or better than the condition before the Work began.

Prior to restoration, the Contractor shall saw cut and remove all existing pavement within 2 feet of the edge of the excavation, or within such widths as may be ordered by the Engineer.

Compaction of soil and base materials shall be tested using the AASHTO T 180 method.

Surface restoration workmanship and materials shall conform to the applicable sections of the FDOT-SSRBC.

All dirt areas disturbed shall be restored with sod, unless otherwise specified.

7.02 ROADWAY RESTORATION

Where the installation of pipe or structures occurs within an existing roadway, the limits of excavation shall be saw cut leaving a straight and square edge. The upper portion of the trench backfill shall be replaced with a compacted shell, crushed (reclaimed) concrete, or limerock base as shown on the Contract Drawings, and paved to match the surrounding surface. Replacement base material shall be the same as the existing base. Roadway restoration shall conform to the detail for shown in the Contract Drawings.

7.03 TEMPORARY PAVEMENT

Immediately upon completion of backfilling, the pavement surfaces damaged or destroyed shall be temporarily restored by placing a shell (FDOT-SSRBC Section 911), crushed (reclaimed) concrete (FDOT-SSRBC Section 204 applicable sections), or limerock (FDOT-SSRBC Section 911) base on the backfilled, compacted subgrade, and an adequate temporary asphaltic patch as shown or as approved by the Engineer. Shell crushed (reclaimed) concrete, or limerock shall be used as a base for all bituminous pavements.

Temporary work shall be maintained in a suitable and safe condition for traffic until the permanent pavement is laid or until final acceptance of the Work.

7.04 SHELL BASE

Shell base shall be constructed on the prepared subgrade to not less than 98 percent of maximum density, in accordance with the requirements of FDOT-SSRBC Section 200. The minimum compacted thickness of shell base shall conform to the detail shown on the Contract Drawings.

7.05 LIMEROCK BASE

Limerock base shall be constructed on the prepared subgrade to not less than 98 percent of maximum density, in accordance with the requirements of FDOT-SSRBC Section 911. The minimum compacted thickness of limerock base shall conform to the detail shown on the Contract Drawings.

7.06 CRUSHED (RECLAIMED) CONCRETE BASE

Crushed (reclaimed) concrete base shall be constructed on the prepared subgrade to not less than 98 percent of maximum density, in accordance with the requirements of FDOT-SSRBC Section 204. The minimum compacted thickness of crushed (reclaimed) concrete base shall conform to detail shown on the Contract Drawings.

The minimum limerock bearing ratio (LBR) value shall be 150.

7.07 ASPHALTIC CONCRETE PAVEMENT

A prime coat shall be applied to the prepared base in accordance with FDOT-SSRBC Section 300 prior to permanent asphaltic concrete pavement.

Unless specified elsewhere, all permanent asphaltic concrete pavement replacement shall be constructed in accordance with the requirements of FDOT-SSRBC Sections 320, 330, 334, and 337. Surface types and compacted thickness shall conform to the detail shown on the Contract Drawings.

7.08 BRICK PAVEMENT

Construction of brick pavement shall follow the details as shown on the Contract Drawings and City standard practice using City standard paving brick or red clay brick conforming to ASTM C 32, Grade SS with City standard dimensions.

Brick street abutting asphalt pavement shall have a minimum 6-inch-wide flush Type A Header Curb.

7.09 CURB AND GUTTER

All permanent restoration of street curb, or curb and gutter, shall be of the same type and thickness as the curb, or curb and gutter, which abuts. The grade of the restored curb, or curb and gutter, shall conform to the grade of the existing adjacent curb, or curb and gutter, so that positive drainage is maintained.

7.10 CONCRETE SIDEWALK

The restoration and construction of concrete sidewalks shall conform to applicable requirements of FDOT-SSRBC Section 522 and the Contract Drawings and shall be constructed where shown on the Contract Drawings and directed by the City. Sidewalk expansion joints with bituminous filler shall be installed at a maximum of 50-foot intervals on center and struck joints shall be spaced equidistant with walk width (joints wider than 6 feet shall be spaced as directed by the City). Where new construction is to be tied into existing facilities, the old material is to be removed back to the nearest construction joint, or sawcut to a straight line as directed by the City or Engineer. The soil under sidewalks and driveways shall be compacted to 98 percent of the maximum density.

New sidewalks shall be 4 inches thick. Concrete pour for walk construction shall be made only on dampened subgrade. A soft broom finish shall be given the walk surface as directed by the Engineer.

Sidewalks crossing driveways shall be constructed according to the Specifications for concrete driveways.

Curb ramps for physically handicapped shall be constructed at all locations where sidewalks cross the curb or where directed by the Engineer. Those existing sidewalks which are removed to accomplish associated work as a part of this Project shall be replaced with a curb ramp when the sidewalk crosses the curb. The cost of curb ramps shall be included in the appropriate proposal item for sidewalk restoration.

Where sidewalks are replaced, the replacement shall be the full width of the walk and the minimum length shall be 60 inches. Restoration of adjacent lawn is incidental to sidewalk replacement and no separate payment will be made therefore.

7.11 HEXAGON BLOCK SIDEWALK

The restoration and construction of hexagon block sidewalks shall conform to the details shown on the Contract Drawings and City standard practice using City standard hexagon blocks.

The soil under sidewalks and driveways shall be compacted to 98 percent of the maximum density. New hexagon block sidewalks shall be 2 inches thick.

Curb ramps for physically handicapped shall be constructed at all locations where sidewalks cross the curb, or where directed by the City or Engineer. Those existing sidewalks which are removed to accomplish associated work as a part of this Project shall be replaced with a curb ramp when the sidewalk crosses the curb. The cost of curb ramps shall be included in the appropriate Pay Item for sidewalk restoration.

Where sidewalks are replaced, the replacement shall be the full width of the walk. Restoration of adjacent grass is incidental to sidewalk replacement and no separate payment will be made therefore.

7.12 DRIVEWAY AND PARKING LOT

Except as otherwise specified, all permanent restoration of base and surface of driveways, parking aprons, and sidewalks shall match the materials, thicknesses, elevations, lines, and grades of the existing construction, all to the Engineer's satisfaction. Patching of Portland cement driveway areas will not be allowed between joints or dummy joints.

For areas where streets are to be paved, or where more than 50 percent of the driveway apron is disturbed, concrete or brick driveways shall be replaced in kind. All other driveways, including shell and dirt, shall be restored with an asphalt concrete surface from the street to the property line or front of sidewalk, as directed by the City or Engineer.

All base compaction under driveways shall be to a minimum density of 98 percent of the maximum density.

7.13 DRIVEWAY - ASPHALT

Residential asphalt driveway restoration shall include 1-inch thick asphaltic concrete surface over 2 inches of compacted sand-asphalt hot mix base, or 5 inches of compacted limerock or shell base.

Commercial asphalt driveway restoration shall be constructed of 1-inch thick asphaltic concrete surface over 8 inches of limerock base compacted in 2 lifts.

7.14 DRIVEWAY - CONCRETE

The restoration and construction of concrete driveways shall conform to applicable requirements of FDOT-SSRBC Section 522 and the Contract Drawings and shall be constructed where shown on the Contract Drawings and directed by the City or Engineer.

Residential concrete driveway restoration shall be 5 inches thick and shall include placing a single layer of 6-inch by 6-inch wire mesh (WWF 6 x 6 - W1.4 x W1.4).

Commercial concrete driveways shall be 6 inches thick with a double layer of 6-inch by 6-inch wire mesh (WWF 6 x 6 - W1.4 x W1.4).

7.15 DRIVEWAY - PEAGRAVEL

Where less than 50 percent of the driveway apron is disturbed, pea gravel driveways shall be restored to match the existing driveway. Pea gravel driveway restoration shall include asphalt treated shell base 5 inches thick after compaction to a minimum density of 98 percent of the maximum.

7.16 DRIVEWAY - SHELL

Where less than 50 percent of the driveway apron is disturbed, shell driveways shall be restored to match the existing driveway. Shell driveway restoration shall be 5 inches thick after compaction to a minimum density of 98 percent.

7.17 GRASS

7.17.01 Sodding

Sod shall be planted as soon as practical after paving, pipeline, or other work has been completed. Sodding shall always be used over seeding.

All work and materials shall meet the applicable requirements FDOT-SSRBC Section 570 (Sodding).

Sodding shall be done as directed by the Engineer, using only material which, in the opinion of the Engineer, is healthy and free of weeds, and (unless specified otherwise by the Engineer) of the same variety predominating at time of removal. Sod may be St. Augustine, Bahia, or other varieties as selected by the Engineer.

Sod shall be planted within 72 hours of being cut. Only moist, green sod having a virile root system may be planted. Sod shall be cut into adjacent sod to provide a smooth surface, and "top dressed" where necessary. Sod shall be rolled or tamped after planting to provide a uniform and consistent grade.

7.17.02 Grass Maintenance

The Contractor shall properly water and otherwise maintain all seeded and sodded areas for a minimum of 60 consecutive calendar days after completion of sodding operations. After the 60 days, and upon receipt of written request from the Contractor, the Engineer will inspect the areas for acceptance by the City. Any area that is washed or eroded, fails to show a uniform stand of healthy, vigorous grassing, or does not appear to be otherwise developing satisfactorily, shall be re-sodded and maintained until suitable for acceptance by the Engineer.

In the event that the stand of grass is found to be contaminated by weeds or other undesirable growth, the Contractor will be required to effectively eliminate such undesirable growth at his own expense.

7.18 EXPANSION JOINT MATERIAL

Expansion joint material for concrete pavement surfaces, including sidewalks and driveways, shall be the bituminous strip type, 1/2-inch thick, and shall conform to applicable requirements of FDOT-SSRBC Section 932.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 8 – PAINTING

8.01 GENERAL

Painting materials for each system shall be manufactured by one manufacturer. Painting materials not obtainable from the prime manufacturer shall be obtained from a second source recommended by the prime manufacturer for compatibility. All products furnished shall meet current Federal Regulations for lead, mercury and other heavy metals, as well as current VOC air quality regulations. Products of the following acceptable manufacturers may be used on this project, except where noted otherwise.

A. Ameron – Corrosion Control Division
B. Devoe & Raynolds Company
C. Indurall
D. KopCoat –RPM
E. MAB Paints
F. PPG Industries, Inc.
G. Rust-Oleum Corporation
H. Sherwin-Williams
I. Tnemec Company, Inc.

The Contractor shall paint or provide a protective coating for all interior and exterior wood and metal surfaces, all interior masonry, valves, and all submerged piping and other metal, whether specifically called for or not. In addition, all exposed piping shall be painted and further identified in accordance with other sections of these specifications. Because of their very nature, some areas or items do not require specific painting or coating for protection or appearance. The following generally do not require painting or coating unless specifically noted otherwise or required by manufacture, color coding, insulation from dissimilar metals, insulation from concrete or cement products, or architectural considerations:

A. Non-Ferrous Alloys:

Aluminum
Monel
Stainless Steel

B. Corrosion Resistant Metals:

Chromium Plated Steel
Weathering Steel
Galvanized Steel

C. Non-Metallic Materials:

Exterior Brick

	Concrete
	Glass
	Plastic &FRP
	PVC
	Porcelain
Pre-Finished Manufactured Items:	Cabinets
	Louvers
	Motor Control Centers
	Panels
	Signs and Nameplates
	Switchgear
	Switchboards
	Transformers
	Tile

D. Electrical Conduits Attached to Unpainted Surfaces.

E. Insulation and Insulation Jackets.

All exposed piping and conduit within the fence enclosure shall be color-coded in accordance with the following Color Coding Schedule:

A.	Electric	Gray
B.	Gas, Oil, Dangerous Materials	Red
C.	Telephone, Telegraph, Television, Communications	Safety Alert Orange
D.	Potable Water	Safety Blue
E.	Treated Sewage	Safety Green

Other paint colors will be selected by the Engineer

All materials shall be pure and first quality. Materials listed shall be the standard for each such type of material. Primers and finish coats shall be compatible and of the same manufacture where possible. Emulsion and alkyd paints shall contain a mildewcide, and both the paint and mildewcide shall conform to OSHA and Federal requirements, including Fed. Spec. TT-P-19.

8.02 PAINTING SCHEDULES AND SYSTEMS

Painting and coating of surfaces shall conform to the following schedules and systems, unless otherwise specified or shown on the drawings:

A. Schedule A: System 1 – Exposed exterior structural and miscellaneous steel, piping, equipment to include all stainless steel and carbon steel electrical control cabinets non-submerged, not exposed to corrosion, splash, fumes or immersion conditions.

1. Prime: One sprayed coat of a combination of a two-part epoxy primer, gray, of 3.0 mils, minimum dry film thickness as by Devoe Paints, Tru-Glaze Epoxy Primer Nos. 12735 and 12702 (ratio 19:1) or equal. If shop coat is damaged, re-prime bare areas in the field. The exterior of electrical cabinets, in stainless steel, shall be sand-blasted and spray-primed per the paint manufacturer's instructions.

2. Finish: Two coats of "hanging moss green" (Devoe Paints FX-70), Semi-Gloss Advanced Technology Acrylic Resin of 1.5 to 2.0 mils, dry thickness as Exterior Waterborne Semi-Gloss Enamel #83XX by Devoe Paints, or equal. Coats to be applied by spray painting in the shop.

B. Schedule B: System 2 – Piping and pumping equipment – submerged or non-submerged, exposed to spray, splash or corrosive atmosphere, excluding chains and sprockets, and stainless steel bracing in the wetwell:

1. Prime: One coat chemical resistant red iron oxide, based on a polyamide cured epoxy resin, minimum of 3.0-5.0 mils dry film thickness as by Devoe Paints, Devron 201. If shop coat is damaged, re-prime bare areas in the field.

2. Finish: Two coats of polyamide cured, epoxy resin coating, minimum of 4.0-6.0 mils dry film thickness per coat as by Devoe Paints, Devron 224HS-color, moss green as required above.

C. Schedule C: System 3 – Non-Potable water exposed concrete surfaces inside valve vaults, meter vaults, and sanitary sewer manholes.

1. Coal Tar Epoxy (Non-Potable Only)

Must be recoated within four days at 75deg F. Higher temperature will shorten recoat time.

Surface Preparation: Brush-Off Blast Cleaning

1st Coat: 46-413 Tneme Tar	8.0 - 10.0 mils
2nd Coat: 46-413 Tneme Tar	8.0 - 10.0 mils

8.03 EXECUTION

All painting shall be done by skilled and experienced craftsmen and shall be of highest quality workmanship. Application of materials shall be done only on properly prepared surfaces as herein specified.

Before commencing work, the painter shall make certain that surfaces to be covered are in good condition. Should the painter find such surfaces not to be totally acceptable for covering, he shall report such fact to the Engineer. The application of paint shall be held as acceptance of the surfaces and working conditions and the painter will be held responsible for the results reasonably expected from the materials and processes specified.
Hardware, hardware accessories, machined surfaces, nameplates giving manufacturer's data, cover plates, grease fittings, lighting fixtures and similar items in contact with painted surfaces and

not to be painted shall be removed, masked, or otherwise protected prior to surface preparation and painting operations so they remain clean and free from paint.

Ferrous metals (not shop primed) shall be sandblasted per SSPC-SP6 to remove mill scale and rust. Ferrous surfaces to be submerged or exposed to spray, splash, fumes or corrosive atmosphere shall be sandblasted to near-white metal blast cleaning according to SSPC-SP 10. Brush blast or clean other metals as appropriate to provide suitable surface. Surface profile as obtained from sandblasting shall be recommended by the coating manufacturer. All metal surfaces shall be completely degreased by solvent cleaning in compliance with SSPC-SP 1.

Galvanized surfaces shall be cleaned of dirt, grease and other foreign substances and solvent cleaned. Surfaces shall be pro-treated with one coat of proprietary acid bound resinous or crystalline zinc phosphate preparation, used in accordance with the manufacturer's directions.

Remove glaze, of florescence, dirt, loose particles and grease (and existing paint, if applicable) from concrete receiving masonry paint. Fill all cracks, cut out defective joints and repaint.

In addition to the above listed surface preparations, all dirt, rust, scale, splinters, loose particles, disintegrated paint grease, oil and other deleterious substances shall be removed from all surfaces that are to be coated.

Work shall be done only under favorable weather conditions and as recommended by paint supplier. Exterior painting shall be done only in dry weather. Any surface coating damaged by moisture or rain shall be removed and redone as directed by the Engineer. Coatings shall be mixed, thinned, tinted and applied in accordance with the manufacturer's recommendations. The Contractor shall tint or match colors as selected by the Owner. A sample shall be applied on the job for review and approval before work is actually done. No thinners shall be used except those specifically mentioned and only in such quantity as directed by the manufacturer's instructions. If thinning is used, sufficient additional coat shall be applied to assure the required dry film thickness is achieved.

The manufacturer's recommended thinner or cleanup solvent shall be used for all cleanup. Application by brush, spray, airless spray or roller shall be as recommend by the manufacturer for optimum performance and appearance. Paint shall be applied in a neat manner with finished surface free of runs, sags, ridges, laps and brush marks.

Each coat shall be applied in a manner that will produce an even film of uniform and proper thickness, and no variation in sheen or color. Where more than one coat of paint is specified, each coat shall be sufficiently tinted to result in a perceptible difference in shades of the various coats of paints so that the application of subsequent coats can be properly and uniformly spread and inspected. Provision shall be made to allow thorough drying between coats as recommended by the manufacturer before the next coat is applied, and paint used in successive field coats shall be produced by the same manufacturer.

Seal coats shall be used over bitumen-coated surfaces as applicable. Plastic pipe shall be painted in accordance with the pipe manufacturer's recommendations. Pipes, shoot metal ducts and other metal items which are to be installed in inaccessible locations shall be painted prior to installation.

Pumps, motors, machinery, equipment, electrical panels and other manufactured items shall have

surfaces prepared, primed and coating in accordance with the recommendations of the manufacturer, and be given at least one touch-up coat with the intermediate coat material and one compete finish cost in the field.

The prime and intermediate coats for the various coating systems shall be as specified earlier and shall be compatible with the field coat or coats. Paint used in the first field coat over shop painted or previously painted surfaces shall cause no wrinkling, lifting or other damage to underlying paint.

All completed surfaces will be checked by the Engineer, and the Contractor shall provide the necessary properly calibrated gages. All non-ferrous surfaces shall be checked for number of coats and thickness by use of a Tooke gage. All ferrous surfaces shall be checked for film thickness by use of Elcometer or Micro-Test magnetic dry film gauge properly calibrated. All defects shall be corrected to the satisfaction of the Engineer.

All paint brushed, splattered, spilled, or splashed on any surface not specified to be painted shall be removed. Upon completion of the painting work, the Owner shall be furnished one (1) gallon of each type and color of finish paint for touching up at no additional cost. Paint container labels, in addition to other required information, shall have location of color and type marked thereon.

Surfaces to be painted shall be inspected before any paint materials are applied, and after preparation has been completed.

Painted surfaces shall be inspected between coats, prior to application of next coat of painting material. Failure to get acceptance between coats will nullify credits for coats previously applied.

All paint shall be delivered to the job site in unopened original containers.

All paint not intended for the job shall be removed from the job site.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 9 - PIPING MATERIALS: DUCTILE IRON PIPE AND FITTINGS

9.01 GENERAL

The Work in this section includes furnishing all ductile iron pipe, fittings, joints, and appurtenant materials. All castings furnished shall have been cast in the United States of America unless complete certification is furnished in accordance with the latest edition of ANSI/AWWA C 110.

Standards referenced in this section are the latest revision of the following specifications:

ANSI/AWWA C104	"Cement Mortar Lining for Ductile-Iron Pipe and Fittings for Water"
ANSI/AWWA C110	"Ductile-Iron and Gray Iron Fittings, 3-Inch through 48-Inch, for Water and Other Liquids"
ANSI/AWWA C111	"Rubber-Gasket Joints for Ductile-Iron and Pressure Pipe and Fittings"
ANSI/AWWA C115	"Flanged Ductile-Iron Pipe with Threaded Flanges"
ANSI/AWWA C150	"Thickness Design of Ductile-Iron Pipe"
ANSI/AWWA C151	"Ductile-Iron Pipe, Centrifugally Cast, for Water or Other Liquids"
ANSI/AWWA C153	"Ductile-Iron Compact Fittings, 3-Inch through 24-Inch, for Water and Other Liquids"
ASTM D 1248	"Polyethylene Plastics Molding and Extrusion Materials"

9.02 PIPE

9.02.01 GENERAL

All ductile iron pipe shall be designed in accordance with ANSI/AWWA C150. Pipe shall be minimum pressure class as follows:

Size	Pressure Class
3-inch through 18-inch	350
20-inch through 24-inch	300
30-inch through 48-inch	200

For threaded flanged pipe the minimum thickness shall be the nominal thickness as shown on Table 15.1 of ANSI/AWWA C115.

Thickness shall be designed for a flat-bottom trench backfill lightly consolidated to centerline of pipe. Pipe shall be manufactured in accordance with ANSI/AWWA C151.

The pressure rating, metal thickness class, net weight of pipe (without lining) length of pipe, name of manufacturer, "DI" or "DUCTILE," and country where cast, shall be clearly marked on each length of pipe.

The Contractor shall take extreme care when handling pipe and fittings to ensure the interior lining does not get damaged during construction. Lined pipe and fittings must be handled only

from the outside of the pipe and fittings. No forks, chains, straps, hooks, etc. shall be placed inside the pipe and fittings for lifting, positioning, or laying. The pipe shall not be dropped or unloaded by rolling.

Care should be taken not to let the pipe strike sharp objects while swinging or being off loaded. Ductile iron pipe should never be placed on grade by use of hydraulic pressure from an excavator bucket or by banging with heavy hammers.

9.02.02 LINING

A. **Potable Water Lines and Reclaimed Water Lines**: Ductile iron pipe and fittings for use in potable and reclaimed water lines shall be cement mortar lined. Cement lining shall conform to ANSI/AWWA C104, and seal coated with approved bituminous seal coat in accordance with ANSI/AWWA C151. Seal coating shall be UL listed or NSF approved for use in potable water mains.

B. **Sanitary Force Mains and Gravity Sanitary Pipe**: Ductile iron pipe and fittings for sanitary sewer force mains and gravity sewer pipe shall be polyethylene, polyurethane, or epoxy lined.

   Epoxy lining shall be 40 mil minimum thickness (multi-pass process) and shall be Protecto 401 Ceramic Epoxy, as manufactured by the Protecto Division of Vulcan Painters, Inc., or approved equal.

   Polyethylene lining shall be factory furnished with a fusion bonded polyethylene liner of 60 mil minimum thickness conforming to ASTM D1248, such as Polybond Plus as furnished by American Cast Iron Pipe Co. or approved equal.

   Polyurethane lining shall be factory applied conforming to Corropipe, as manufactured by Madison Chemical Industries, Inc., or an approved equal. Material shall be applied in conformance with the manufacturer's recommendation and shall be a 40-mil final dry film thickness.

   For any lining method, to ensure a holiday-free lining, documentation must be provided, prior to shipment, showing each section of lined pipe has passed holiday testing at the time of production per ASTM G62. The lining shall have a minimum three (3) year warranty covering failure of the lining and bond failure between liner and pipe.

C. **Storm Drain Gravity Pipe**: Ductile iron pipe and fittings for storm drain gravity pipe shall be epoxy lined as per sanitary pipe or cement mortar lined as per water pipe, at the Contractor's option.

9.03 FITTINGS

Ductile iron fittings shall conform to ANSI/AWWA C110 or ANSI/AWWA C153.

Fittings shall be suitable for a minimum water pressure plus water hammer as follows:

Size	Type	Pressure Rating
3-inch through 12-inch	DI	350
14-inch through 24-inch	DI	350
30-inch through 48-inch	DI	250

Fittings shall be coated outside with petroleum asphaltic coating, 1 mil minimum thickness.

Fittings shall be lined as specified herein headed "4.02 Pipe."

Anchor couplings equal to McWayne Clow F-1211 for fire hydrant assemblies may be substituted with an anchoring tee equal to Catalog No. A-10180 locked hydrant tee as manufactured by American Ductile Iron Pipe Co. or hydrant tee with rotatable MJ gland as manufactured by U.S. Pipe Co. in place of the MJ tee and anchor coupling as shown, at the Contractor's option.

9.04 JOINTS - BURIED PIPE AND FITTINGS

Joints for ductile iron pipe and fittings shall conform to ANSI/AWWA C111, except as otherwise specified. All pipe and fittings shall be furnished complete with joint accessories necessary for installation conforming to ANSI/AWWA C111. No additional payment will be made for joint accessories, including retainer glands, unless otherwise specified.

The Contractor shall furnish and install all necessary materials, equipment, and appurtenances required to complete the work.

A. **Unrestrained Joints**: Joints for unrestrained pipe shall be push-on joint. Joints for fittings, when installed with unrestrained pipe, shall be mechanical joint with DI retainer glands, as specified herein for restrained joints.

B. **Restrained Joints**: All joints in restrained pipe systems shall be of the same type (pipe and fittings), except valves shall be mechanical joint with DI retainer glands as specified.

1. **12-inch and Smaller**: Joints for restrained pipe and fittings, 12-inch and smaller, shall be one of the following:

a. Push-on restrained joint utilizing a retainer ring, equal to U.S. Pipe TR Flex. It shall be UL listed, FM approved, or shall be certified by an approved laboratory that the restrained joint will not separate at the specified test pressure.

b. Push-on restrained joint using a locking type gasket, equal to Field-Lok, as manufactured by U.S. Pipe and Foundry, Inc. It shall be UL listed, FM approved, or shall be certified by an approved laboratory that the restrained joint will not separate at the specified test pressure.

c. Mechanical joint with DI retainer glands shall be furnished with retainer glands equal to Series 1100 Megalug, as manufactured by EBAA Iron Inc., Stargrip 3000 as manufactured by Star Pipe Products, or DI MJ Gripper Gland as manufactured by

U.S. Pipe and Foundry Co. for use with ductile iron pipe. All retainer glands shall be UL listed, FM approved, or shall be certified for 350 psi pressure rating with a 2:1 safety factor.

2. **Larger than 12-inch**: Joints for restrained pipe and fittings larger than 12-inch shall be as follows:

   a. Restrained pipe joints shall be modified push-on restrained joint, equal to U.S. Pipe TR Flex, and shall be UL listed or FM approved.

   b. Fittings joints shall be equal to U.S. Pipe TR Flex or shall be mechanical joint with DI retainer glands. Retainer glands shall be equal to Series 1100 Megalug or Stargrip 3000 for 16-inch and larger pipe. All retainer glands shall be UL listed, FM approved, or certified for 350 psi pressure rating (for 16-inch) and 250 psi pressure rating (for larger than 16-inch) with a 2:1 safety factor.

   c. Valve joints shall be mechanical joint with DI retainer glands as specified herein for larger than 12-inch fittings joints.

9.05 JOINTS - EXPOSED PIPE AND FITTINGS

Joints for exposed ductile iron pipe and fittings shall be restrained, except as otherwise noted on the Contract Drawings. Joints for exposed pipe in plants and in vaults shall be flanged where noted on the Contract Drawings.

Joints for exposed pipe and fittings 12-inch and smaller shall be modified push-on restrained joint using a retainer ring, or modified push-on joint using a locking type gasket, as specified herein headed "9.04 Joints - Buried Pipe and Fittings."

Joints for exposed pipe and fittings larger than 12-inch shall be modified push-on restrained joint using a retainer ring as specified herein headed "9.04 Joints - Buried Pipe and Fittings."

9.06 DETECTION

Pipe shall have 3-inch detectable metallic tape of the proper color placed directly above the pipe and 12-inch below finished grade or 6-inch detectable tape between 12-inch and 24-inch below finished grade.

Pipe shall also have tracer wire installed along the pipe alignment. The tracer wire to be used shall be a solid, 10-gauge, high strength, copper clad steel wire with a polyethylene jacket of appropriate color manufactured by Copperhead Industries or approved equal.

9.07 ZINC/EPOXY/FLUOROPOLYMER PROTECTIVE COATING

Joints and Pipe exposed to extreme coastal environments including, but not limited to, aerial ocean crossings shall have this system or an approved equal applied as a protective coating.

Surface Preparation: SSPC-SP6/NACE No.3 Commercial Blast Cleaning with a minimum 1.5 mil angular anchor profile.

Tnemec	Coating Thickness
Primer: Series 90-97 Tneme-Zinc	2.5 - 3.5 mils
2nd Coat: Series 66HS Hi-Build Epoxoline	3.0 - 6.0 mils
3rd Coat: Series 700 Hydroflon	2.0 - 3.0 mils

Total Dry Film Thickness: 7.5 - 12.5 mils

Minimum Dry Film Thickness: 9.5 mils

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 10 - PIPING MATERIALS: PVC PRESSURE PIPE

10.01 GENERAL

The Work in this section includes furnishing all Polyvinyl Chloride (PVC) pressure pipe and fittings. PVC pressure pipe includes all PVC pressure pipe 2-inch through 36-inch.

Standards referenced in this Section are the latest revision of the following specifications:

ANSI/AWWA C900-16	"Polyvinyl Chloride (PVC) Pressure Pipe and Fabricated Fittings, 4 In. Through 60 In."
ANSI/AWWA C110	"Ductile-Iron and Gray-Iron Fittings, 3-Inch through 48-Inch for Water"
ANSI/AWWA C111	"Rubber-Gasket Joints for Ductile-Iron Pressure Pipe and Fittings"
ANSI/AWWA C153	"Ductile-Iron and Gray-Iron Fittings, 3-Inch through 48-Inch for Water"
ASTM D 1784	"Standard Specification for Rigid Poly (Vinyl Chloride) (PVC) Compounds and Chlorinated Poly (Vinyl Chloride) (CPVC) Compounds"
ASTM D 1785	"Standard Specification for Poly (Vinyl Chloride) (PVC) Plastic Pipe, Schedules 40, 80, and 120
ASTM D 2241	"Standard Specification for Poly (Vinyl Chloride) (PVC) Pressure-Rated Pipe (SDR Series)"
ASTM D 3139	"Standard Specification for Joints for Plastic Pressure Pipes Using Flexible Elastomeric Seals"

10.02 PIPE

A. **Two-inch Pipes**: All 2-inch PVC pipe shall meet ASTM D 1784 specification for rigid PVC compounds and ASTM D 2241 specification for PVC plastic pipe. PVC pipe shall be suitable for use at maximum hydrostatic working pressure of 160 psi at 73°F. Pipe shall have a standard dimension ratio (SDR) 26 and bear the NSF Seal for potable water pipe.

B. **4-inch Through 36-inch Pipes**: PVC pressure pipe 4-inch through 36-inch shall meet the requirements of ANSI/AWWA C900-16, with outside diameter dimensions of ductile iron pipe. All 4-inch through 36-inch PVC pressure pipe shall be Class 235 and DR18.

C. **UV Resistant PVC Pipe**: All PVC piping exposed to sunlight shall contain titanium dioxide for UV resistance, and shall conform to ASTM D 1784 and ASTM D 1785 (IPS). The Contractor shall submit the manufacturer's certificate of conformance to the City. Pipe shall be marked with manufacturer's identification.

10.03 FITTINGS

A. **Two-inch Pipes**: Gasketed joint standard dimension ratio (SDR) 21 PVC or galvanized steel fittings shall be used with all 2-inch PVC pipe. PVC adapters, Harco as manufactured by the Harrinton Corporation or approved equal, shall be used for jointing to 2-inch gate valves, galvanized fittings, and existing threaded pipe.

B. **Four-inch Through 36-inch Pipes**

1. **Molded PVC Pressure Fittings**: Fittings for 4-inch through 8-inch sanitary sewer pressure pipe shall be molded PVC pressure fittings, unless DI fittings are directed by the Engineer. Molded PVC fittings shall meet the requirements of ANSI/AWWA C900-16 and shall be Harco Class 150 as manufactured by the Harrington Corporation, or approved equal, as directed by the Engineer.

2. **DI Fittings**: Fittings for pipe larger than 8-inch shall be DI, mechanical joint. DI fittings for 4-inch through 36-inch PVC pressure pipe shall conform to ANSI/AWWA C110 or C153 and shall conform to the Technical Specifications section headed "Piping Materials: Ductile Iron Pipe and Fittings."

C. Where flanged fittings are shown, specified, or directed by the Engineer, adapter flanges shall be used on plain end PVC pipe. Adapter flanges shall be suitable for PVC pipe and be equal to Uni-Flange Series 900 as manufactured by Ford/Uni-Flange, Wabash, Indiana.

10.04 JOINTS

Pipe joints shall be plain end, rubber gasket push-on joints, unless otherwise shown. Push-on joints shall meet the requirements of ASTM D 3139.

Joints to DI fittings shall be rubber gasket mechanical joints with retainer glands, unless otherwise shown. All retainer glands shall be UL listed or FM approved. The retainer glands shall be installed in accordance with the manufacturer's recommendations.

Mechanical joints shall meet the requirements of ANSI/AWWA C111.

10.05 DETECTION

Pipe shall have 3-inch detectable metallic tape of the proper color placed directly above the pipe and 12-inch below finished grade or 6-inch detectable tape between 12-inch and 24-inch below finished grade.

Pipe shall also have tracer wire installed along the pipe alignment. The tracer wire to be used shall be a solid, 10-gauge, high strength, copper clad steel wire with a polyethylene jacket of appropriate color manufactured by Copperhead Industries or approved equal.

10.06 MARKINGS AND COLOR CODING

In addition to the standard markings required by ANSI/AWWA C900-16, the letters NSF denoting National Sanitation Foundation approval shall be included in the marking system, on each pipe length and fitting.

PVC pipe shall be manufactured of solid color as specified, or white with continuous colored ink lettering. The applicable color codes, with light color stabilant, are as follows:

Pipe Use	Color Coding
Potable Water	Safety Blue
Sanitary Sewer	Safety Green
Reclaimed Water	Safety Purple

UV resistant PVC pipe shall be solid color as specified above, or white with colored lettering as specified above.

10.07 HARNESSING

Ductile iron fittings with mechanical joints used with PVC pipe that require harnessing, shall be provided with ductile iron retainer glands such as Series 2000 PV Megalug as manufactured by EBAA Iron Inc., Stargrip 4000 as manufactured by Star Pipe Products, or approved equal.

PVC push-on joints for pipe in casings, for joints to PVC pressure fittings, or where shown, shall be harnessed using a ductile iron retainer for push-on joint PVC pipe, such as Series 1600 as manufactured by EBAA Iron Inc., Series 1100 as manufactured by Star Pipe Products, or approved equal.

10.08 INSPECTION AND TESTING

All pipelines shall remain undisturbed for 24 hours to develop complete strength at all joints. All pipelines shall be subjected to a hydrostatic pressure and leak test per the Specifications.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 12 - PRESSURE PIPE CONSTRUCTION

12.01 GENERAL

The Work in this section includes construction of potable water mains, reclaimed water mains, sanitary force mains, and appurtenances.

Pressure pipelines are to be constructed at locations shown on the Contract Drawings. The City reserves the right to make minor changes in grade and/or alignments as the Work progresses.

Piping materials for pressure pipe installations shall be as follows:

Potable Water Main		
PVC Pipe	2-inch	
DI Pipe	6-inch and larger	
HDPE Pipe	2-inch and larger	ASTM D3350 meeting PE 3408 code designation
Galvanized Pipe	2-inch blow-off assemblies, 2-inch connections, 2-inch short tunneling, and 2-inch short relocations	
Fittings	2-inch PVC pipe:	PVC with gasketed joint
	2-inch galvanized pipe	Galvanized steel with threaded joint
	6-inch and larger pipe	Ductile Iron (DI) with push-on or mechanical joint

Sanitary Force Main		
PVC Pipe	4-inch through 36-inch:	ANSI/AWWA C900-16
DI Pipe	14-inch and larger pipe:	ANSI/AWWA C151
HDPE Pipe	2-inch and larger	ASTM D3350 meeting PE 3408 code designation
PVC Fittings	4-inch through 48-inch pipe:	DI with push-on or mechanical joint
DI Fittings	4-inch and larger pipe:	DI with push-on or mechanical joint
HDPE Fittings	2-inch and larger pipe:	ASTM D3350 meeting PE4710 code designation or DI with HDPE mechanical joint adapter

All existing water services shall be kept in service during the construction of water mains and the preparation of new service connections. Water meters requiring disconnection by the Contractor to accomplish the Work shall be promptly restored to service by the Contractor. The Contractor shall give a minimum of 24 hours prior written notice to all affected water customers of the intended service interruption.

All pipe, fittings, and appurtenances shall be furnished by the Contractor and be transported, delivered, and installed by the Contractor in accordance with the requirements of the subsection

headed "Laying and Jointing Pipelines."

All pipelines shall be tested in accordance with the requirements of the subsection headed "Testing and Disinfection of Pressure Pipelines: Pressure Test."

All potable water and reclaimed water pipelines shall be disinfected before they are put into service as specified in the subsection headed "Testing and Disinfection of Pressure Pipelines: Disinfection."

As-built drawings shall be submitted to the Engineer prior to acceptance of the Work and prior to commencement of the warranty period.

Standards referenced in this Section are the latest revision of the following specifications:

ANSI/AWWA C105	"Polyethylene Encasement for Ductile-Iron Piping for Water and Other Liquids"
ANSI/AWWA C110	"Ductile-Iron and Gray-Iron Fittings, 3-Inch through 48-Inch
ANSI/AWWA C111	"Rubber-Gasket Joints for Ductile-Iron Pressure Pipe and Fittings"
ANSI/AWWA C504	"Rubber-Seated Butterfly Valves"
ANSI/AWWA C509	"Resilient-Seated Gate Valves for Water and Sewerage Systems"
ANSI/AWWA C515	“Reduced Wall, Resilient-Seated Gate Valves for Water Supply Service”
ANSI/AWWA C550	"Protective Epoxy Interior Coating for Valves and Hydrants"
ANSI/AWWA C600	"Installation of Ductile-Iron Water Mains and Their Appurtenances"
ANSI/AWWA C605	"Underground Installation of PVC Pressure Pipe and Fittings for Water"
ANSI/AWWA C651	"Disinfecting Water Mains"
ANSI/AWWA C800	"Underground Service Line Valves and Fittings"
ANSI/AWWA C900-16	"Polyvinyl Chloride (PVC) Pressure Pipe and Fabricated Fittings, 4 In. Through 60 In."
ANSI/AWWA C901	"Polyethylene (PE) Pressure Pipe and Tubing, 1/2-Inch through 3-Inch for Water Service"
ANSI/AWWA C906	"Polyvinyl Chloride (PVC) Pressure Pipe and Fittings 4-Inch through 63-Inch, for Water Distribution and Transmission"
ANSI/AWWA C901	"Polyethylene (PE) Pressure Pipe and Tubing, 1/2-Inch through

3-Inch for Water Service"

ASTM A 126	“Specification for Gray Iron Castings for Valves, Flanges, and Pipe Fittings”
ASTM D 429	"Test Methods for Rubber Property - Adhesion to Rigid Substrates"
ASTM D 3139	"Standard Specification for Joints for Plastic Pressure Pipes using Flexible Elastomeric Seals"

12.02 DATA TO BE SUBMITTED

The Contractor shall submit shop drawings in accordance with the Specifications.

Pipe
Valves
Joints and joint accessories
Fittings
Specials and accessories
Special linings and coatings
Water service materials

12.03 MATERIALS

All pressure pipe materials shall be in accordance with the applicable requirements of the Technical Specifications sections headed:

DIP “Piping Materials: Ductile Iron Pipe and Fittings”
PVC “Piping Materials: PVC Pressure Pipe”
HDPE “Piping Materials: HDPE Pressure Pipe”

All pressure pipe materials (pipe, fittings, valves, valve boxes, tapping valves and sleeves, precast thrust blocks, blow-offs, house services, etc.) except fire hydrants, shall be furnished by the Contractor. All pressure pipe fittings and valves shall be cast and manufactured in the United States of America unless complete certification is furnished in accordance with ANSI/AWWA C110.

All materials furnished shall be new. Materials not specified herein or on the Contract Drawings shall conform to AWWA Standards and Industry Standards.

Piping, concrete, masonry, and all other materials shall conform to those materials as specified in the appropriate Technical Specifications sections for those materials. Specific pressure pipe and appurtenances materials shall conform to the following specifications:

12.03.01 2-INCH DIAMETER PIPE

1. Steel pipe shall be standard galvanized steel, Schedule 40, furnished in 21-foot lengths with both ends threaded.

2. All 2-inch steel fittings shall have screw type joints.

3. Pipe thread compound shall not be used. Threads shall be wrapped with teflon joint tape, non-hardening, Mil. Spec. T27730A. Cutting oils shall be dark, non-toxic, and equal to cutting oil manufactured by the Rigid Tool Company. The Contractor shall take caution not to allow cutting oil inside the pipe and shall remove all cuttings. Cutting oils shall be UL listed or NSF approved for use in potable water systems.

4. PVC pressure pipe to be used in the potable water system shall be Safety Blue in color or white with Safety Blue identification tape or color coded approved ink lettering as specified. PVC pressure pipe to be used in the reclaimed water system shall be Safety Purple in color or white with Safety Purple identification tape or approved color-coded ink lettering as specified.

   PVC pipe shall conform to the Technical Specifications section headed "Piping Materials - PVC Pressure Pipe."

5. HDPE pressure pipe shall conform to the Technical Specifications section headed, “Piping Materials – HDPE Pressure Pipe.”

12.03.02 VALVES - GENERAL

1. Valves shall be iron body, bronze mounted, and have joint ends as shown or specified. Valves shall have O-ring seals, unless otherwise specified.

2. A standard 2-inch square AWWA operating nut shall be provided on each valve. Valves shall have non-rising stems and shall open when the nut is turned counterclockwise. Each nut shall be marked with an arrow.

3. All valves of the same type shall be from the same manufacturer. Parts of valves of the same type and size shall be interchangeable. Unless otherwise specified, all valves shall be designed for a cold water working pressure of 150 psi.

4. All valves shall be furnished complete with gaskets, bolts, nuts, and glands necessary for installation.

5. All valves larger than 2-inch shall have restrained rubber gasketed compression joints, or mechanical joints with retainer glands, conforming to ANSI/AWWA C111, at the Contractor's option unless otherwise noted.

6. Valves used for sanitary force mains shall be the same as those used in other pressure pipe applications, unless otherwise specified.

7. Upon request, the valve manufacturer shall provide an affidavit of compliance, proof of design testing, and proof of production testing.

12.04 CONNECTIONS TO EXISTING MAINS

The Contractor shall connect the new pressure pipelines to the existing pressure pipelines at

locations as shown on the Contract Drawings and as specified. The Engineer shall be notified at least 2 working days prior to making connections. The time at which the connections are to be made and the manner of making the connections shall be subject to review and acceptance by the Engineer.

The connections to the existing pressure pipeline shall be made to minimize the time during which the existing pressure pipeline will be out of service. The Contractor shall utilize the necessary number of crews and types of equipment and shall work the necessary hours to ensure completion of the connections within the time specified.

12.05 CONSTRUCTION OPERATIONS

Pressure pipelines shall be installed in open trenches, except when another method, such as jacking, boring, or tunneling, is shown on the Contract Drawings, specified, or ordered. Jetting shall not be allowed under roadway, alley, or driveway.

Pipe and fittings shall not be strung in residential areas more than 3 weeks in advance of pipelaying, unless otherwise approved by the Engineer. The Contractor shall install pipelines, pressure test, disinfect, and restore the ground surface in pipeline segments of 3,500 linear feet or less, except as otherwise approved by the Engineer. The new segment of pipelaying shall not start until restoration has commenced on the previous segment, or as approved by the Engineer.

Pipeline segments shall be pressure tested and disinfected after pipelaying is complete, to minimize inconvenience to the Public, except as otherwise approved by the Engineer.

No excavation shall be left open over a weekend. All pavement openings shall be completely repaired as specified in the Technical Specifications section headed "Surface Restoration" within 7 days of opening, or a temporary asphaltic pavement patch placed and maintained daily.

Where shown on the Contract Drawings or where directed by the Engineer, the Contractor shall remove existing pipelines which are shown to be abandoned. Any such pipe, fitting, etc., shall be removed after the new pipeline (replacing the existing line) is accepted and put into service by the City. Removed pipe and appurtenances 6 inches or larger which are described elsewhere or deemed by the Engineer to be reusable shall be delivered to the City by the Contractor. All material not deemed reusable shall become the Contractor's property and shall be removed from the site by the Contractor. No additional payment will be made for salvaging pipe and fittings.

Short tunneling of pressure pipe shall be constructed as required to protect trees, shrubs, and existing surface or subsurface utilities and structures. Short tunnels shall be constructed to the lengths shown on the Contract Drawings, specified, or directed by the Engineer.

Existing fences shall be restored by the Contractor and shall be finished and installed so that the restoration is equal to or better than the original. Only those portions of original fencing or materials there from, that the Engineer approves for re-use, shall be used by the Contractor in fence restoration. All other materials, including lumber, paint, wood preservative, concrete, and metal products shall be furnished by the Contractor.

The cost of protecting, replacing, relocating, and maintaining (including using hay bales) storm and

sanitary sewerage facilities shall be included in the various unit price Pay Items, and no separate payment will be made therefore unless otherwise specified in other Pay Items.

12.06 LAYING AND JOINTING PRESSURE PIPELINES

All pressure pipeline installation shall comply with applicable standards of ANSI/AWWA C600, C605, and C906, and with these Specifications.

Mechanical joint fittings and valves installed in sections of unrestrained pipe, and in blow-offs, shall be installed using ductile iron retainer glands, as set forth in the Technical Specifications section headed "Piping Materials: Ductile Iron Pipe."

PVC push-on fittings for pressure pipelines shall conform to the Technical Specifications section headed "Piping Materials: PVC Pressure Pipe."

Laying and jointing of HDPE pressure pipe shall conform to the Technical Specifications section headed “Piping Materials: HDPE Pressure Pipe.”

Excavation and backfill shall conform to the Technical Specifications section headed "Excavation and Backfill."

In lieu of jacking and boring or pushing of pipe up to 4-inch in diameter, the Contractor may use a soft bore directional drilling process as provided by Flow Mole Corporation or approved equal.

Cover for all pressure pipeline Work, if not shown on the Contract Drawings, shall be not less than:

	2-inch and 4-inch	**6-inch and larger**
Under roadways and alleys:	36 inches	36 inches
Under grass and sidewalks:	24 inches	30 inches

Unless otherwise noted on the Contract Drawings or in other sections of this Specification, the pressure pipeline shall be handled and installed in strict accordance with the manufacturer's instructions and with the applicable AWWA Standards. If a conflict exists between the manufacturer's instructions and the AWWA Standards, the manufacturer's instructions shall govern.

Any defective material shall be removed from the job site immediately. Should a defect be discovered after the item has been placed in the trench, the replacement will be at the Contractor's expense. Materials shall be stored along installation routes in a manner acceptable to the Engineer or as described elsewhere in the Specifications.

Polyethylene wrapping shall be installed on ductile iron pipe and appurtenances where shown on the Contract Drawings or where ordered by the Engineer.

Polyethylene encasement materials and installation shall meet the applicable requirements of ANSI/AWWA C105. Care shall be taken while backfilling to prevent puncturing, tearing, or otherwise damaging the polyethylene wrapping.

The Contractor shall use every precaution during construction to protect the pressure pipeline against the entry of non-potable water, dirt, wood, small animals, and any other foreign material that would hinder or contaminate the operation of the pipeline. Where the groundwater elevation is above the bottom of the trench, the Contractor shall provide suitable dewatering equipment.

All dewatering shall meet the requirements set forth in the Technical Specifications section headed "Excavation and Backfill."

Watertight plugs of an approved type shall be installed in the ends of all pipe, fittings, and valves during 24-hour or longer periods when installation is not in progress, or as required to prevent ditch water, sand, etc. from entering the pipe.

Concrete thrust blocks of the proper size and type shall be furnished and installed at all locations where a change in the pipe alignment exceeds 7 degrees or dead ends, unless Contract Drawings show that adjacent pipe, in excess of 2 bells each direction, shall be restrained. Concrete thrust blocks used on 12-inch and larger mains shall be poured in place. Precast thrust blocks may be used on mains less than 12-inch in diameter. Thrust block concrete shall conform to the Technical Specifications section headed "Concrete, Masonry, and Reinforcing Steel."

Boring, soft boring, and jacking work other than new services shall strictly conform to all applicable stipulations of the State of Florida Department of Transportation Utility Accommodation Manual, unless otherwise specified. Softbore shall utilize a guided boring system, equal to FlowMole or DirectLine.

12.06.01 Expose Existing Pressure Pipeline and Record Elevation

The Contractor shall expose the existing pressure pipelines prior to the construction stake-out to determine the station, offset, and elevation, before actual construction begins. The Contract Drawings may be modified by the Engineer, as necessary, to accommodate the pressure pipelines which must remain.

12.06.02 Conflict Adjustment of Existing Pressure Pipelines

In some locations existing pressure pipelines intended to remain in service may need to be adjusted horizontally or vertically to avoid conflicts with the proposed storm drains, sanitary sewers, roadway base, manholes, inlets, or other proposed improvements. The conflict may not be shown on the Contract Drawings.

In the event that a conflict is encountered and confirmed by the Engineer, the adjustment to alleviate the conflict shall be constructed in accordance with the applicable "Obstruction Detail" or as ordered by the Engineer.

12.06.03 Pipe Joints

1. **Standard Mechanical Joints**: In making mechanical joints, the pipe shall be centered in the bells. The surfaces of ductile iron pipe with which the rubber gasket comes in contact shall be thoroughly brushed with a wire brush just prior to assembly of the joint. The surfaces of PVC pipe shall be wiped clean with a cloth and soapy water. A pipe lubricant

shall be brushed over the gasket just prior to installation. The gasket and gland shall be placed in position, the bolts inserted, and the nuts tightened finger tight. The nuts shall be tightened by means of a torque wrench, or as approved by the City, in such a manner that the gland shall be brought up evenly into the joint. The following range of bolt torques shall be applied:

Bolt Size (inch dia.)	Range of Torque (foot lbs.)
5/8	45 - 60
3/4	75 - 90
1	70 - 100

If effective sealing is not obtained at a maximum torque listed above, the joint shall be disassembled and reassembled after thorough cleaning.

2. **DI Pipe Push-On Joints**: In making up the push-on rubber gasket joint, the gasket seat in the socket shall be thoroughly brushed with a wire brush and the gasket shall be wiped with a clean cloth. The gasket shall be placed in the socket with the large round end entering first so that the groove fits over the bend in the seat. A thin film of approved lubricant shall then be applied to the inside surface of the gasket that will come in contact with the entering pipe. The plain end of the pipe to be entered shall be thoroughly brushed with a wire brush and placed in alignment with the bell of the pipe to which it is to be joined. Ends of cut pipe shall be ground to a smooth bevel edge before inserting in bell. The joint shall be made up by exerting sufficient force on the entering pipe so that its plain end is moved past the gasket until it makes contact with the base of the socket.

   Backhoe buckets or excavation equipment are not to be applied directly to the pipe.

3. **PVC Pipe Push-On Joints**: Procedures for the making of PVC pipe push-on joints shall be similar in nature to those set forth in the preceding paragraph (except the bell shall be wiped with a clean cloth). Procedures shall strictly follow the manufacturer's printed instruction for the making of joints. In a like manner, all other PVC pipeline Work shall be performed in accordance with the manufacturer's recommendations.

4. **Restrained Joints**: Ductile iron mechanical joint pipe, fittings, and valves 12-inch and smaller that require restraint shall be installed using ductile iron retainer glands, as specified. The glands shall be installed in accordance with the manufacturer's recommendations. Glands using a frangible bolt for setting the restraining devices shall be tightened with standard wrenches.

   Glands using standard bolts for setting the restraining devices shall be tightened with a torque wrench. The assembly shall be given 2 heavy coats of a bituminous coating after installation.

   Restrained push-on joint pipe, fittings, and valves, where shown on the Contract Drawings, shall be with a restraining gland or restraining gasket, as specified.

Pipe, fittings, and valve joints shall be restrained at locations shown on the Contract Drawings, or as specified. In addition, all other fittings and valves shall be installed using a ductile iron retainer gland.

The following shall apply to various restrained joint/pipe size type:

Pipe Size (Inches)	Restrained Joint Type
2	No restrained joint allowed
4 through 12	Mechanical joint/retainer glands Tyton Pipe/Loc Fast Gasket, or equal
16 and larger	Mechanical joint/retainer glands TR Flex, or equal, pipe valves and fittings

12.06.04 Color Coding

Prior to backfilling, all pressure pipelines shall be identified with color coding. The applicable color codes, with light color stabilant, are:

Pipe Use	Color Coding
Potable Water	Safety Blue
Sanitary Sewer	Safety Green
Reclaimed Water	Safety Purple

1. **Coding on the Pipe**: HDPE and PVC pipe shall be colored at the point of manufacture. If black or white pipe must be used, pipe shall have City approved color coded ink lettering stamped on the pipe or shall be continuously taped with plastic adhesive tape using the color coding as stated above. Plastic adhesive tape shall be applied as follows:

   Black and white 2-inch and 4-inch pipe -- continuously taped at top center.

   Black and white 6-inch and larger pipe -- continuously taped at "10, 12, and 2 o'clock." Ductile iron pipe shall be continuously painted along the top one-third of the pipe with a 2-part high build epoxy-polyamide paint or approved equal. The paint shall be dry prior to the pipe being installed.

   Ductile iron pipe wrapped in color coded polyethylene wrapping is not required to be painted.

2. **Coding above the Pipe**: Pipe shall have 3-inch detectable metallic tape of the proper color placed directly above the pipe and 12-inch below finished grade or 6-inch detectable tape between 12-inch and 24-inch below finished grade.

12.06.05 Valves and Valve Boxes

Valves shall be installed in a closed position, free from all distortion and strain, and left in satisfactory operating condition. Valves shall be tested in place by the Contractor, as far as practicable, and any defects in valves or connections shall be corrected to the satisfaction of the Engineer.

Tapping sleeves shall be pressure tested prior to making the tap.

Valve boxes with stay-put cover shall be vertical and concentric with the valve stem. Any valve box which is moved from its original position, preventing the operation of the valve stem, shall be satisfactorily reset by the Contractor at his expense.

Please see the Specifications for additional information for Valves.

12.06.06 Connections (Tie-ins) and Shutdowns

The Contractor shall furnish all labor and equipment necessary for the connection of approved pipelines to the existing system and the shutdown, removal or disconnection and plugging of existing pipelines as indicated on the Contract Drawings or as directed by the Engineer.

This may be required in instances where existing pipelines are to be abandoned or where a short segment of existing pipeline must be cut out and adjusted either vertically or horizontally to avoid a conflict with a proposed storm drain or storm drain structure, sanitary sewer, or other proposed improvement.

The Contractor shall make all taps and tie-ins required, under the direct observation of the Engineer.

12.07 PIPELINE CLEANING

The cleaning of the pipeline shall be done by the controlled and pressurized passage of a polyurethane pig of varying dimensions, coatings and densities as determined by the City through the piping system.

A series of pigs shall be entered into the system at a point as near to the beginning as is logistically and mechanically feasible.

A launching assembly shall be used as the entrance point for the pig. This assembly shall allow for the following:

1. The entering of pigs into the system by providing the means to induce flow from an external source, independent of the flows and pressures immediately available from the system, on the back of the pig to develop sufficient pressure to force the pig through the system.
2. A means to control and regulate the flow.
3. A means to monitor the flows and pressures.
4. A means to connect and disconnect from the system without any disruption to the operation of the system.

The pig shall be removed or discharged from the system at a point as near to the end as is logistically and mechanically feasible.

The contractor shall be responsible for the retrieval of the pig at the discharge point. This may include setting a trap that will not disrupt normal flow and operations but will capture the pig and any

debris. A retrieval assembly may also be used but said assembly shall be able to connect and disconnect from the system without any disruption to the operation of the system.

Alternative launching and retrieval methods shall be done with the prior approval of the City.

Any pig that cannot progress through the piping system shall be located by the contractor and removed by excavation of the pipe to remove the blockage. All pipe repairs shall be the responsibility of the contractor and shall be performed with as little disruption to the system as possible.

Any increase in pressure that cannot be accounted for, i.e. fittings or valves or additional cleaning runs, shall be investigated, per the Engineers' review and acceptance, by locating the pig at the beginning of the increased pressure and excavating to determine the cause of the pressure increase. All pipe repairs shall be the responsibility of the contractor and shall be performed with as little disruption to the system as possible.

Final flushing of the cleansed lines shall be performed after the last successful run of the pig as determined by the City. The contractor shall be responsible for all applicable flushing and disinfection requirements for potable water lines.

The contractor shall maintain and provide a report at the end of the cleaning procedure containing the following:

1. The pressures in the pipe during the pigging procedure.
2. Any inline problems encountered during the procedure including all excavations with detailed locations, reason for the excavation and any corrective measures taken to the pipeline.
3. A record of the pigs used, their sizes, styles and other pertinent information regarding what materials were used during the cleaning.
4. An analysis of the condition of the pipeline before and after the cleaning procedure.

12.08 TESTING AND DISINFECTION OF PRESSURE PIPELINES

All new pressure pipelines shall be subjected to a water pressure test between valves. In order to expedite the restoration of certain surface facilities, it may be required that individual sections between valves be tested as soon as the valves are installed. Disinfection shall be accomplished after the pressure test requirements have been met for the entire segment of pressure pipe.

The Contractor shall furnish all labor, materials, equipment, and chemicals to perform the required pressure tests and disinfection. All testing and disinfection will be subject to City inspection. All new valves shall be operated by the Contractor. However, all tie-in valves to the existing water system shall only be operated with the approval of, and in the presence of, the City, and shall be scheduled to be performed during the standard work hours of City staff, unless otherwise approved by the Engineer.

All existing valves shall be operated by the City or by the Contractor under the direct supervision of the City.

Testing and disinfection of pressure pipelines shall be completed per Flushing, Testing, and Disinfection section.

12.09 SURFACE RESTORATION AND MISCELLANEOUS

All surfaces disturbed by the Contractor shall be restored to their original condition in conformance to the Technical Specifications sections headed "Surface Restoration".

Sanitary sewers and laterals which cross a new potable water pipeline with less than 18 inches clear vertical separation, shall be replaced with 20 linear feet of ductile iron pipe, PVC pressure pipe (ANSI/AWWA C900-16), or SDR26 gravity pipe centered on the new pipeline, or as ordered by the Engineer.

Sanitary sewers and/or laterals which conflict with the new pipeline or are damaged by pipeline construction shall be reconstructed with ductile iron pipe, PVC pressure pipe (ANSI/AWWA C900-16), or SDR26 gravity pipe, as ordered by the Engineer.

Each valve box in an unpaved area shall have an 18-inch by 18-inch by 4-inch concrete pad. Pad shall be 1 inch above grade, and sod shall be so placed to maintain this 1 inch.

END OF SECTION

SECTION 15 - FLUSHING, TESTING AND DISINFECTION

15.01 WORK INCLUDED

A. Flushing, Pressure Testing, and Disinfection of systems including, but not limited to, the pipelines shown in the Contract Documents.

B. Contractor shall furnish all necessary pumps, hoses, piping, fittings, meters, gauges, chemicals and labor to conduct specified testing.

C. Testing shall be repeated at the Contractor's expense until satisfactory results are achieved.

15.02 REFERENCES

A. AWWA C651 - Standard for Disinfecting Water Mains.

B. UNI-B-6 - Recommended Practice for Low-Pressure Air Testing of Installed Sewer Pipe

C. ASTM F1417 - Standard Test Method for Installation Acceptance of Plastic Gravity Sewer Lines Using Low-Pressure Air

D. AWWA C600 – Standards for Installation of Ductile-Iron Water Mains and Their Appurtenances.

E. AWWA C605 - Standard for Underground Installation of Polyvinyl Chloride (PVC) Pressure Pipe and Fittings for Water.

F. ASTM 2164 - Standard Practice for Field Leak Testing of Polyethylene (PE) and Crosslinked Polyethylene (PEX) Pressure Piping Systems Using Hydrostatic Pressure

15.03 SUBMITTALS

A. Test Reports: Indicate results comparative to specified requirements. Submit two (2) copies of test results to Engineer in accordance with Submittal specifications.

B. Final approval of the bacterial samples shall be received from the Florida Department of Environmental Protection prior to the time that the system is placed into operation. Sampling procedures shall be done in accordance with FDEP requirements.

C. Bacteriological sampling locations shall meet FDEP requirements and be taken where shown on the drawings and as directed by the Engineer at no additional cost to Owner. Costs for all bacteriological testing shall be borne by the Contractor.

15.04 QUALITY ASSURANCE

A. Perform Work in accordance with these specifications, applicable utility provider standards, and the applicable reference standards listed in Section 1.03 above.

15.05 REGULATORY REQUIREMENTS

A. Conform to applicable FDEP requirements for performing the work of this Section.

15.06 DISINFECTION CHEMICALS

A. Chemicals: The disinfecting agent shall be sodium hypochlorite solution ANSI/AWWA B303 or liquid chlorine ANSI/AWWA B301. Dry hypochlorite, similar to "HTH" or equal may also be used as the disinfecting agent. Bleach or Clorox is not acceptable.

15.07 FLUSHING AND PRESSURE TESTING - PIPING

The Contractor shall furnish and install suitable temporary testing plugs or caps for the water lines, all necessary pressure pumps, hose, pipe connections, meters, gauges and other similar equipment, and all labor required, all without additional compensation for conducting pressure and leakage tests and flushing of the new water lines. Flushing and pressure testing shall be conducted in the following order:

A. After all piping lines have been installed and before pressure testing and final connections to equipment, each run of pipe shall be thoroughly flushed so as to remove all debris and foreign matter from the piping and equipment. Clean and flush all piping using potable water. Cleaning and Flushing shall be achieved by pigging with two (2) polyurethane foam pigs as manufactured by Girard Poly-Pig Inc. or "an approved equal". For watermain installation, the Contractor must ensure that there will be no contaminated water re-entering the main where the pig is flushed out, or it will be re-pigged at the Contractor's expense. Each pig will run through the line prior to running the second pig. On short runs (100 feet or less), or small lines (less than 4"), cleaning shall be accomplished by flushing with a minimum velocity of 2.5 feet per second. Contractor shall furnish and install required pig launch and exit assemblies. Non-abrasive pigs shall be employed. Flushed water may be discharged to the closest public catch basins and be coordinated with the City. Contractor to provide means of discharging water to catch basins at Contractor's expense.

B. Pressure and leakage tests shall be conducted in the presence of the Engineer, or his representative. All pressure mains, fittings, water services, and appurtenances shall undergo pressure and leakage tests. The Contractor will provide all necessary apparatus including a suitable pressure gage, pump, measuring device, piping connections and fittings and the necessary labor to conduct the test. Leakage is defined as the quantity of water added to the pipe being tested during the test period. The Contractor shall submit to the Engineer the testing pattern he proposes to follow prior to testing for the Engineer's approval. The Contractor shall not test more than 1,500 feet of pipe in a single test without approval from the Engineer.

C. In preparation for pressure testing the following parameters must be followed:

1. All air must be vented from the pipeline prior to pressurization. This may be accomplished with the use of the air relief valves or corporation stop valves, vent piping in the testing hardware or end caps, or any other method which adequately allows air to escape the pipeline at all high points. Venting may also be

accomplished by 'flushing' the pipeline in accordance with the parameters and procedures as described in AWWA C600/C605.

2. The pipeline must be fully restrained prior to pressurization. This includes complete installation of all mechanical restraints per the restraint manufacturer's guidelines, whether permanent or temporary to the final installation. This also includes the installation and curing of any and all required thrust blocking. All appurtenances included in the pressure test, including valves, blow-offs, and air-relief valves shall be checked for proper installation and restraint prior to beginning the test.
3. Temporary pipeline alignments that are being tested, such as those that are partially installed in their permanent location shall be configured to minimize the amount of potentially trapped air in the pipeline.

15.07.01 PRESSURE TESTING DUCTILE IRON AND PVC PIPING SYSTEMS:

1. The test pressure for piping constructed of ductile iron and PVC pipe shall be a minimum of 150 psi and this pressure shall be maintained for a period of not less than two hours. Tests shall be made between valves and as far as practicable and as approved by the Engineer. Potable water from the distribution system shall be used. Pressure shall not vary more than five (5) psi for piping during the test periods or as approved by the Engineer. Additionally, allowable leakage shall be computed on the basis of AWWA C-600, C-605 where practical.
2. All leaks evident at the surface shall be uncovered and repaired regardless of the total leakage as indicated by the test, and all pipes, valves and fittings and other materials found defective under the test shall be removed and replaced at the Contractor's expense. Tests shall be repeated until leakage has been reduced below the allowable amount.
3. Should, in the judgment of the Engineer, it not be practical to follow the foregoing procedures exactly for any reason, modifications in the procedure shall be made as approved by the Engineer and the City.

15.07.02 PRESSURE TESTING HDPE PIPING SYSTEMS:

1. The HDPE pipe installed by the directional drill method shall be pressure tested after the entire length is installed.

2. The test pressure for all piping systems shall be a minimum of 150 psi and this pressure shall be maintained for a period of two hours. Testing procedure shall be in accordance with ASTM F2164 and generally as follows.

    a. Take safety precautions as required and as specified in ASTM F2164.
    b. Completely fill pipe with clean water and remove all air from pipe to be tested.
    c. Allow water in pipe to equalize to a common temperature with surrounding ground/groundwater for 24 hours
    d. With air removed and temperature equalized, gradually bring pipe being tested to test pressure plus 10 psi. If test pressure cannot be achieved, discontinue testing and correct fault.

e. Add make-up liquid as required to maintain test pressure plus 10 psi over a 4 hour period.
f. Test Phase - Immediately following the end of the 4 hour period, reduce pressure by 10 psi and monitor pressure for 1 hour. Do not increase pressure or add make up water.
g. Pass/Fail Criteria - If no leakage is observed, and pressure during the test phase remains steady (within 5% of the test pressure) for the 1 hour test phase period, a passing test is indicated.
h. Retesting – If retesting is necessary, depressurize the test section in accordance with ASTM F2164 and correct any faults. Do not attempt to correct any faults while the system is under pressure.
i. Allow the test section to "relax" for at least 8 hours before re-pressurizing. After the relaxation period, repeat the initial expansion and test phases as described above.
j. All leaks shall be repaired regardless of the total leakage as indicated by the test, and all pipes, valves and fittings and other materials found defective under the test shall be removed and re placed at the Contractor's expense. Tests shall be repeated until leakage has been reduced below the allowable amount.
k. All visible leaks shall be repaired regardless of the total leakage as indicated by the test, and all pipes, valves and fittings and other materials found defective under the test shall be removed and replaced at the Contractor's expense. Tests shall be repeated until leakage has been reduced below the allowable amount.
l. Should, in the judgment of the Engineer, it not be practical to follow the foregoing procedures exactly for any reason, modifications in the procedure shall be made as approved by the Engineer. In any event, the Contractor shall be responsible for the ultimate tightness of the watermain within the preceding requirements.

15.07.03 PRESSURE TESTING FUSIBLE PVC SYSTEMS:

1. Fusible PVC pipe installed by the directional drill method shall be pressure tested after the entire length is installed.

2. The test pressure for the water piping constructed fusible PVC pipe shall be a minimum of 150 psi. This pressure shall be maintained for a period of not less than two hours. Tests shall be made between valves and as far as practicable and as approved by the Engineer. Potable water from the distribution system shall be used. Pressure shall not vary more than five (5) psi for piping during the test periods or as approved by the Engineer. Additionally, allowable leakage shall be computed on the basis of AWWA C-600, C-605 where practical.

3. All leaks evident at the surface shall be uncovered and repaired regardless of the total leakage as indicated by the test, and all pipes, valves and fittings and other materials found defective under the test shall be removed and replaced at the Contractor's expense. Tests shall be repeated until leakage has been reduced below the allowable amount.

4. Should, in the judgment of the Engineer, it not be practical to follow the foregoing procedures exactly for any reason, modifications in the procedure shall be made as approved by the Engineer and the City. In any event, the Contractor shall be responsible for the ultimate water tightness of the piping within the preceding requirements

15.07.04 LEAKAGE TESTING FOR NON-PRESSURE PIPING

A. Gravity sanitary sewers need to be tested for leakage.

B. Gravity sanitary sewer leakage testing may include appropriate water or low pressure air testing. The leakage outward or inward (exfiltration or infiltration) shall not exceed 25 gallons per inch of pipe diameter per mile per day for any section of the system. An exfiltration or infiltration test shall be performed with a minimum positive head of two feet. The air test, if used, shall be conducted in accordance with one of the following Standards:

1. ASTM F1417
2. UNI-B-6

C. The testing method selected shall properly consider the existing groundwater elevations during the test.

15.07.05 DEFLECTION TESTING FOR NON-PRESSURE PIPING

D. After completion of the backfill, the engineer or owner may require that a deflection test be performed.

E. Deflection tests should be conducted using a go/no-go mandrel. The mandrel's outside dimension shall be sized to permit no more than 7.5 percent deflection. The percent deflection shall be established from the base inside diameter of the pipe. If the internal beading of the fused joints for the pipe is not required to be removed, the mandrel shall account for this clearance as well. The mandrel shall be approved by the owner or engineer prior to use. Lines that permit safe entry may allow other deflection test options, such as direct measurements.

15.08 DISINFECTION FOR WATER MAIN INSTALLATION

A. The Contractor shall furnish and install suitable temporary connections to the piping, all necessary pressure pumps, hose, pipe connections, meters, gauges and other similar equipment, and all labor required, all without additional compensation for the disinfection of all required potable water piping systems. Disinfection shall be in accordance with the City. If no standards exist, disinfection shall be conducted on the following systems in the following manner:

1. All relocated and new potable water and private fire line piping.

B. Conform to AWWA Standards and as modified herein.

C. Maintain disinfectant for a minimum of 8 hours in such a manner that the entire system will be filled with water containing a minimum chlorine concentration of 50 ppm at any point.

D. After the disinfecting agents have been permitted to remain for the specified contact periods, the water lines, and valves shall be thoroughly flushed with water until the residual chlorine tests are less than 4 PPM in each instance. The determination of the amount of residual chlorine in the system shall be made at such points and in accord with standard tests by means of a standard orthotolodine test set.

E. Replace permanent system devices removed for disinfection.

15.09 BACTERIOLOGICAL SAMPLING FOR WATER MAIN INSTALLATION

A. It shall be the responsibility of the Contractor under this contract to perform the bacteriological testing required by the Florida Department of Environmental Protection and the City to obtain clearance of all piping. The Contractor shall be responsible to disinfect and repeat testing as needed until clearance is obtained for all required systems. The Contractor shall be responsible to pay for additional water needed if the bacteriological testing must be repeated.

B. The piping requires two (2) passing consecutive daily samples taken from the locations called out on the plans or as determined by the Engineer. The samples shall be taken concurrently at all the respective sample point locations.

C. Sampling must be coordinated with Engineer and other construction activities so as to minimize re-sampling.

D. Contractor shall submit schedule for bacteriological testing and pressure tests.

E. The Contractor shall incur all costs needed to provide bacteriological clearance of the piping systems.

F. If repeated tests of such samples show the presence of coliform organisms, the disinfection shall be repeated until tests indicate an absence of contamination.

15.10 QUALITY CONTROL

A. The laboratory and personnel collecting bacteriological samples shall be Florida State certified in accordance with FDEP requirements.

15.11 CONNECTIONS TO EXISTING MAINS

A. The Contractor shall make connections to existing mains as shown on the drawings only after the new mains have passed their pressure and leakage test and completed the disinfection and bacteriological clearance procedures as required.

END OF SECTION

SECTION 16 - SANITARY SEWER BYPASS PUMPING

16.01 SCOPE OF WORK

The Contractor shall furnish all labor, materials, equipment and incidentals required to maintain existing and anticipated flows within the affected portion of the collection system throughout the construction period.

16.02 PUBLIC IMPACTS

The contractor shall not create a public nuisance due to excessive noise or dust, nor impact the public with flooding of adjacent lands, discharge of raw sewage, or release of other potential hazards, nor shall he encroach on or limit access to adjacent lands. No extra charge may be made for increased costs to the contractor due to any of the above.

16.03 SUBMITTALS

The Contractor shall, within 30 days of the date of the Notice to Proceed, submit to the Project Manager a detailed Bypass Pumping Plan for each site by-pass pumping will be needed. The Bypass Pumping Plan shall address all measures and systems to prevent a sanitary sewer overflow (SSO) as defined by the EPA. The Plan shall include as a minimum:

A. Working drawings and sketches showing work location, pump location, piping layout & routing. Show all proposed encroachment and access impacts on adjacent properties or facilities.
B. Pump, control, alarm and pipe specifications or catalog cuts. Detailed sketch of controls and alarm system.
C. Power requirements and details on methods to provide by-pass power or fueling.
D. Calculation and determination of response times to prevent an SSO after a high-water alarm.
E. Procedures to be taken in case of power, pump, or piping failures; including contact names and numbers for emergency notifications.
F. Frequency and specific responsibility for monitoring pump operation, fuel levels, pump maintenance and entire length of piping.

16.04 EQUIPMENT

A. Pumps:

1. By-pass pumping system shall consist of at least a primary pump and a backup pump. Each pump shall have a minimum pumping capacity of 150% of the anticipated peak flows. When bypassing a pump station, 150% of the lift station capacity (G.P.M. & T.D.H) shall be provided.
2. Pumps shall be low noise or sound attenuated. The noise level at any operating condition, in any direction, shall not exceed 70dBA at a distance of twenty-three (23) feet (7 meters) from the pump and/or power source.

B. Controls:

The by-pass pump system shall be equipped with automatic controls and an alarm system. The automatic controls will automatically start the backup pump in the event of a high-water condition or failure of the primary pump. The alarm system will immediately notify the Contractor of a pump failure or high-water condition.

C. Pipe:

Pipe shall be of adequate size and capacity to match the pumps. Pipe type and materials will depend on the particulars of the site conditions and shall be detailed in the Bypass Pumping Plan. Contractor will provide all connections.

16.05 SITE CONDITIONS

Site conditions will vary by site. Contractor is responsible to determine and address requirements such as traffic control, excavation, connections & fittings, impacts on access to adjacent properties, routing and support of by-pass piping, etc., in the Bypass Pumping Plan.

16.06 ON-SITE MONITORING

A. The Contractor shall have personnel experienced with the pumps and controls on site within the calculated response time to prevent an SSO after a high-water alarm.

B. During by-pass operations, the Contractor shall have posted on site with the permit, a copy of the approved Plan and the name and 24-hour contact number of the primary response person, the job site superintendent, and the construction company owner.

16.07 OPERATIONS

A. The Contractor is responsible for securing and providing power, fuel, site security, traffic control and all other supplies, materials and permits required for the by-pass pumping.

B. Contractor shall demonstrate automatic pump switching and alarm system to the satisfaction of the City of St. Pete Beach, prior to beginning by-pass pumping.

Satisfactory demonstration shall be documented by the engineer's, PM's or the City's dated signature on the posted copy of the approved Bypass Pumping Plan.

16.08 DAMAGE RESTORATION & REMEDIATION

A. The Contractor shall be responsible for any pre-pump notifications, all restoration of pre-pump conditions and any damage caused by by-pass operations.

B. Should there be an SSO caused by or as a direct result of the by-pass pumping, the contractor is responsible for all immediate & long term response, notifications, clean up, mitigation, etc. Copies of all written response plans, notifications, documentation, mitigation plans, etc., shall be submitted to the City.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 17 - VALVES AND APPURTENANCES

17.01 GENERAL

17.01.01 SCOPE OF WORK

The Contractor shall furnish all labor, materials, equipment and incidentals required and install complete and ready for operation all valves and appurtenances as shown on the Contract Drawings and as specified herein.

All valves and appurtenances shall be of the size shown on the Contract Drawings and, to the extent possible, all equipment of the same type on the Project shall be from one manufacturer.

All valves and appurtenances shall have the name of the manufacturer and the working pressure for which they are designed cast in raised letters upon some appropriate part of the body.

All valves shall have a factory applied, fusion bonded epoxy coating on interior and exterior unless noted otherwise in the Contract Drawings or the Specifications.

All bolts, nuts, washers, and other trim hardware shall be 316 stainless steel hardware must be 316 SS unless otherwise noted and reviewed by the Engineer.

The equipment shall include, but not be limited to, the following:

1. Gate Valves (Sec. 17.03)
2. Pressure Sustaining and Check Valves (Sec. 17.04)
3. Ball Valves for PVC Pipe (Sec. 17.05)
4. Butterfly Valves (Sec. 17.06)
5. Plug Valves (Sec. 17.07)
6. Valve Actuators (Sec. 17.08)
7. Air Release Valves (Sec. 17.09)
8. Valves Boxes (Sec. 17.10)
9. Corporation Cocks (Sec. 17.11)
10. Flange Adapter Couplings (Sec. 17.12)
11. Flexible Couplings (Sec. 17.13)
12. Hose Bibs (Sec. 17.14)
13. Check Valves (Sec. 17.15)
14. Hydrants (Sec. 17.16)
15. Tapping Sleeves and Tapping Valves (Sec. 17.17)

17.01.02 DESCRIPTION OF SYSTEMS

All of the equipment and materials specified herein are intended to be standard for use in controlling the flow of potable water, reclaim water, wastewater, etc., depending on the applications.

17.01.03 QUALIFICATIONS

All of the types of valves and appurtenances shall be products of well-established reputable firms who are fully experienced and qualified in the manufacture of the particular equipment to be furnished. The equipment shall be designed, constructed and installed in accordance with the best practices and methods and shall comply with these Specifications as applicable. Valves shall be as covered under mechanical devices in Section 8 of ANSI/NSF Standard 61.

17.01.04 SUBMITTALS

Submittals shall conform to the following:

A. Submit to the City within 30 days after execution of the contract a list of materials to be furnished, the names of the suppliers and the date of delivery of materials to the site.

B. Complete shop drawings of all valves and appurtenances shall be submitted to the City and Engineer for review and acceptance in accordance with the Specifications.

17.02 TOOLS

Special tools, if required for normal operation and maintenance shall be supplied with the equipment.

17.03 GATE VALVES

Gate Valves shall conform to the following:

A. All buried valves shall have cast or ductile iron three (3) piece valve bodies.

B. Where indicated on the Contract Drawings or necessary due to locations, size, or inaccessibility, chain wheel operators shall be furnished with the valves. Such operators shall be designed with adequate strength for the valves with which they are supplied and provide for easy operation of the valve. Chains for valve operators shall be galvanized.

C. Where required, gate valves shall be provided with a box cast in a concrete slab and a box cover. Length of box shall include slab thickness. Box cover opening shall be for valve stem and nut. Valve wrenches and extension stems shall be provided by the manufacturer to actuate the valves. The floor box and cover shall be equal to those manufactured by Rodney Hunt Machine Company, Orange, Massachusetts, Clow, DeZurik or approved equal.

D. Gate valves with 3inch-20inch diameters shall be resilient seated, manufactured to meet or exceed the requirements of AWWA C509 or C515 and UL/FM of latest revision and in accordance with the following specifications. Valves shall have an unobstructed waterway equal to or greater than the full nominal diameter of the valve.

E. Wrench nut shall be provided for operating the valve.

F. Valves shall be suitable for an operating pressure of 200 psi and shall be tested in accordance with AWWA C509 or C515. Mueller, Kennedy, M&H, and Clow are acceptable valves.

G. All exterior bonnet bolts, nuts and studs shall be 316 stainless steel.

17.04 PRESSURE SUSTAINING AND CHECK VALVE

Pressure sustaining and check valves shall conform to the following:

A. Pressure sustaining and check valve shall be pilot operated diaphragm actuated valve with cast iron body, bronze trim, and 125-pound flanged ends. The valve shall be hydraulically operated, diaphragm type globe valve. The main valve shall have a single removable seat and a resilient disc, of rectangular cross section, surrounded on three and a half sides. The stainless-steel stem shall be fully guided at both ends by a bearing in the valve cover, and an integral bearing in the valve seat. It shall be sleeved at both ends with delrin. No external packing glands are permitted and there shall be no pistons operating the main valve or any controls. The valve shall be equipped with isolation cocks to service the pilot system while permitting flow if necessary. Main valve and all pilot controls shall be manufactured in the United States of America. Valve shall be single chamber type, with seat cut to 5 degrees taper.

B. Valve shall maintain a minimum (adjustable) upstream pressure to a preset (adjustable) maximum. The pilot system shall consist of two direct acting, adjustable, spring loaded diaphragm valves.

C. Valve shall be cast iron (ASTM A48) with main valve trim of brass (QQB-B-626) and bronze (ASTM B61). The pilot control valves shall be cast brass (ASTM B62) with 303 stainless steel trim. All ferrous surfaces inside and outside shall have a 2-part epoxy coating. Valve shall be similar in all respects to CLA-VAL Company, Model 692G-01ABKG, as manufactured by CLA-VAL Company, Winter Park, Florida, or similar pressure sustaining and check valve as manufactured by Golden Alderson; or approved equal.

17.05 BALL VALVES FOR PVC PIPE

Ball valves shall conform to the following:

A. Ball valves for PVC pipe shall be of PVC Type 1 with union, socket, threaded or flanged ends as required. Ball valves shall be full port, full flow, all plastic construction, 150 psi rated with Teflon seat seals and T-handles. PVC ball valves shall be as manufactured by Celanese Piping Systems, Inc., Wallace and Tiernan, Inc., Plastiline, Inc., or approved equal.

B. All valves shall be mounted in such a position that valve position indicators are plainly visible when standing on the floor.

17.06 BUTTERFLY VALVES

Butterfly valves shall conform to the following:

A. Butterfly valves shall conform to the AWWA Standard Specifications for Rubber Seated Butterfly Valves, Designated C504, except as hereinafter specified. Valves, except as specified hereinafter, shall be Class 150A or B, except that valves furnished downstream of the high service pumps shall be Class 250 and equal to those manufactured by Henry Pratt Company, DeZurik, Mueller, or approved equal. M&H/Kennedy/Clow are not generally approved equals. Ductile iron conforming to ASTM A536, Grade 65-45-12 shall be provided for all Class 250 valves. All valves shall be leak tested at 200 psi.

B. The face-to-face dimensions of flanged end valves shall be in accordance with Table 1 of above mentioned AWWA Specification for short-body valve. Adequate two-way thrust bearings shall be provided. Flange drilling shall be in accordance with ANSI B16.1.

C. Valve seats shall be an EPDM elastomer. Valve seats 24 inches and larger shall be field adjustable and replaceable without dismounting operator disc or shaft and without removing the valve from the line. All retaining segments and adjusting devices shall be of corrosion resistant material with stainless Nylock screws and be capable of the 1/8-inch adjustment. Valves 20 inches and smaller shall have bonded or mechanically restrained seats as outlined in AWWA C 504. Where the EPDM seat is mounted on the valve body, the mating edge of the valve disc shall be 18-8 stainless steel or Nickel-Chrome, 80-20%. Where the EPDM seat is mounted on the valve disc, the valve body shall be fitted with an 18-8 stainless steel seat offset from the shaft, mechanically restrained and covering 360 degrees of the peripheral opening or seating surface.

D. The valve body shall be constructed of ductile iron or close grain cast iron per ASTM A126, Class B with integrally cast hubs for shaft bearing housings of the through boss-type. Butterfly valves of the "wafer" or "spool" type will not be accepted.

E. The valve shaft shall be turned, ground, and polished constructed of 18-8, ASTM A-276, Type 304 stainless steel and designed for both torsional and shearing stresses when the valve is operated under its greatest dynamic or seating torque. Shaft shall be of either a one-piece unit extending full size through the valve disc and valve bearing or it may be of a stub shaft design. Shaft bearings shall be Teflon or nylon, self-lubricated type.

F. All valves shall be subject to hydrostatic and leakage tests at the point of manufacture. The hydrostatic test for Class 250 valves shall be performed with an internal hydrostatic pressure equal to 500 psi applied to the inside of the valve body of each valve for a period of five minutes. During the hydrostatic test, there shall be no leakage through the metal, the end joints or the valve shaft seal. The leakage test for the Class 250 valves shall be performed at a differential pressure of 230 psi and against both sides of the valve. No adjustment of the valve disc shall be necessary after pressure test for normal

operation of valve. The Class 150 valves shall be tested in conformance with AWWA C-504.

G. In general, the butterfly valve operators shall conform to the requirements of Section 3.8 of the AWWA Standard Specifications for Rubber Seated Butterfly Valves, Designation C504, insofar as applicable, and as herein specified.

H. Gearing for the operators shall be totally enclosed in a gear case in accordance with paragraph 3.8.3 of the above mentioned AWWA Standard Specification.

I. Operators shall be capable of seating and unseating the disc against the full design pressure of velocity, as specified for each class, into a dry system downstream and shall transmit a minimum torque to the valve. Operators shall be rigidly attached to the valve body.

J. The manufacturer shall certify that the required tests on the various materials and on the completed valves have been satisfactory and that the valves conform with all requirements of this Specification and the AWWA standard.

K. Where indicated on the Contract Drawings, extension stems, floor stands, couplings, stem guides, and floor boxes as required shall be furnished and installed.

17.07 PLUG VALVES

Plug valves shall conform to the following:

A. All plug valves shall be eccentric plug valves capable of sustaining 150 psi in either direction without leaking.

Exception: Single direction plug valves may be used if it is clearly demonstrated they will never be required to resist pressure in both directions either in service or during pipe line testing.

B. Plug valves shall be tested in accordance with current AWWA Standard C-504-80 Section 5. Each valve shall be performance tested in accordance with paragraph 5.2 and shall be given a leakage test and hydrostatic test as described in paragraphs 5.3 and 5.4. Plug valves shall be Kennedy, Dezurik, or approved equal.

C. Plug valves shall be of the non-lubricated eccentric type with resilient faced plugs and shall be furnished with end connections as shown on the Contract Drawings. Flanged valves shall be faced and drilled to the ANSI 150 lb. standard. Mechanical joint ends shall be to the AWWA Standard C111-72. Bell ends shall be to the AWWA Standard C100-55 Class B. Screwed ends shall be to the NPT standard.

D. Plug valve bodies shall be of ASTM A126 Class B Semi-steel, 31,000 psi tensile strength minimum in compliance with AWWA Standard C507-73, Section 5.1 and AWWA Standard C504-70 Section 6.4. Port areas for valves 20-inches and smaller shall

be full port 100 percent of full pipe area. Valves 24-inch and larger shall have a minimum port area between 80 and 100 percent of full nominal pipe area. All exposed nuts, bolts, springs, washers, etc. shall be 316 stainless steel. Resilient plug facings shall be of Hycar or Neoprene.

E. Plug valves shall be furnished with permanently lubricated stainless steel or oil-impregnated bronze upper and lower plug stem bushings. These bearings shall comply with current AWWA Standards.

17.08 VALVE ACTUATORS

17.08.01 GENERAL

A. All valve actuators shall conform to Section 3.8 of the AWWA Standard Specification and shall be either manual or motor operated.

B. Actuators shall be capable of seating and unseating the disc against the full design pressure and velocity, as specified for each class, into a dry system downstream, and shall transmit a minimum torque to the valve. Actuators shall be rigidly attached to the valve body.

C. Butterfly valve actuators shall conform to the requirements of Section 3.8 of the AWWA Standard specifications for Rubber Seated Butterfly Valves, Designated C504, insofar as applicable and as herein specified.

17.08.02 MANUAL ACTUATORS

A. Manual actuators shall have permanently lubricated, totally enclosed gearing with handwheel and gear ratio sized on the basis of actual line pressure and velocities. Actuators shall be equipped with handwheel, position indicator, and mechanical stop-limiting locking devices to prevent over travel of the disc in the open and closed positions. They shall turn counter-clockwise to open valves. Manual actuators shall be of the traveling nut, self-locking type and shall be designed to hold the valve in any intermediate position between fully open and fully closed without creeping or fluttering. Actuators shall be fully enclosed and designed to produce the specified torque with a maximum pull of 80 pounds on the handwheel or chainwheel. Actuator components shall withstand an input of 450 foot pounds for 30-inch and smaller and 300 foot pounds for larger than 30-inch size valves at extreme actuator positions without damage. Valves located above grade shall have handwheel and position indicator, and valves located below grade shall be equipped with a 2-inch square AWWA operating nut located at ground level and cast-iron extension type valve box. Valve actuators shall conform to AWWA C504, latest revision.

17.08.03 MOTOR ACTUATORS (MODULATING)

A. The motor actuated valve controller shall include the motor, actuator unit gearing,

limit switch gearing, limit switches, position transmitter which shall transmit a 4-20 mA DC signal, control power transformer, electronic controller which will position the valve based on a remote 4-20 milliamp signal, torque switches, bored and key-wayed drive sleeve for non-rising stem valves, declutch lever and auxiliary handwheel as a self-contained unit.

B. The motor shall be specifically designed for valve actuator service using 480-volt, 60 Hertz, three phase power as shown, on the electrical drawings. The motor shall be sized to provide an output torque and shall be the totally enclosed, non-ventilated type. The power gearing shall consist of helical gears fabricated from heat treated alloy steel forming the first stage of reduction. The second reduction stage shall be a single stage worm gear. The worm shall be of alloy steel with carburized threads hardened and ground for high efficiency. The worm gear shall be of high tensile strength bronze with hobbed teeth. All power gearing shall be grease lubricated. Ball or roller bearings shall be used throughout. Preference will be given to units having a minimum number of gears and moving parts. Spur gear reduction shall be provided as required.

C. Limit switches and gearing shall be an integral part of the valve control. The limit switch gearing shall be made of bronze and shall be grease lubricated, intermittent type and totally enclosed to prevent dirt and foreign matter from entering the gear train. Limit switches shall be of the adjustable type capable of being adjusted to trip at any point between fully opened valve and fully closed valve.

D. The speed of the actuator shall be the responsibility of the system supplier with regard to hydraulic requirements and response compatibility with other components within the control loop. Each valve controller shall be provided with a minimum of two rotor type gear limit switches, one for opening and one for closing. The rotor type gear limit switch shall have two normally open and two normally closed contacts per rotor. Gear limit switches must be geared to the driving mechanism and in step at all times whether in motor or manual operation. Provision shall be made for two additional rotors as described above, each to have two normally open and two normally closed contacts. Each valve controller shall be equipped with a double torque switch. The torque switch shall be adjustable and will be responsive to load encountered in either direction of travel. It shall operate during the complete cycle without auxiliary relays or devices to protect the valve, should excessive load be met by obstructions in either direction of travel. The torque switch shall be provided with double-pole contacts.

E. A permanently mounted handwheel shall be provided for manual operation. The handwheel shall not rotate during electric operations but must be responsive to manual operation at all times except when being electrically operated. The motor shall not rotate during hand operation nor shall a fused motor prevent manual operation. When in manual operating position, the unit will remain in this position until motor is energized at which time the valve operator will automatically return to electric operation and shall remain in motor position until handwheel operation

is desired. This movement from motor operation to handwheel operation shall be accomplished by a positive declutching lever which will disengage the motor and motor gearing mechanically, but not electrically. Hand operation must be reasonably fast. It shall be impossible to place the unit in manual operation when the motor is running. The gear limit switches and torque switches shall be housed in a single easily accessible compartment integral with the power compartment of the valve control. All wiring shall be accessible through this compartment. Stepping motor drives will not be acceptable.

F. The motor with its control module must be capable of continuously modulating over its entire range without interruption by heat protection devices. The system, including the operator and control module must be able to function, without override protection of any kind, down to zero dead zone.

G. All units shall have strip heaters in both the motor and limit switch compartments.

H. The actuator shall be equipped with open-stop-close push buttons, an auto-manual selector switch, and indicating lights, all mounted on the actuator or on a separate locally mounted power control station.

I. The electronics for the electric operator shall be protected against temporary submergence.

J. Actuators shall be Limitorque L120 with Modutronic Control System containing a position transmitter with a 4-20MA output signal or equal.

17.08.04 MOTOR ACTUATORS (OPEN-CLOSE)

A. The electronic motor-driven valve actuator shall include the motor, actuator gearing, limit switch gearing, limit switches, torque switches, fully machined drive sleeve, declutch lever, and auxiliary handwheel as a self-contained unit.

B. The motor shall be specifically designed for valve actuator service and shall be of high torque totally enclosed, nonventilated construction, with motor leads brought into the limit switch compartment without having external piping or conduit box.

a) The motor shall be of sufficient size to open or close the valve against maximum differential pressure when voltage to motor terminals is 10% above or below nominal voltage.
b) The motor shall be prelubricated and all bearings shall be of the anti-friction type.

C. The power gearing shall consist of helical gears fabricated from heat treated steel and worm gearing. The worm shall be carburized and hardened alloy steel with the threads ground after heat treating. The worm gear shall be of alloy bronze accurately cut with a hobbing machine. All power gearing shall be grease lubricated. Ball or roller bearings shall be used throughout.

D. Limit switches and gearing shall be an integral part of the valve actuator. The switches shall be of the adjustable rotor type capable of being adjusted to trip at any point between fully opened valve and fully closed valve. Each valve controller shall be provided with a minimum of two rotor type gear limit switches, one for opening and one for closing (influent valves require additional contacts to allow stopping at an intermediate position). The rotor type gear limit switch shall have two normally open and two normally closed contacts per toro. Additional switches shall be provided if shown on the control and/or instrumentation diagrams. Limit switches shall be geared to the driving mechanism and in step at all times whether in motor or manual operation. Each valve actuator shall be equipped with a double torque switch. The torque switch shall be adjustable and will be responsive to load encountered in either direction of travel. It shall operate during the complete cycle without auxiliary relays or devices to protect the valve should excessive load be met by obstructions in either direction of travel. Travel and thrusts shall be independent of wear in valve disc or seat rings.

E. A permanently mounted handwheel shall be provided for manual operation. The handwheel shall not rotate during electric operation except when being electrically operated. The motor shall not rotate during hand operation, nor shall a fused motor prevent manual operation. When in manual operating position, the unit will remain in this position until motor is energized at which time the valve actuator will automatically return to electric operation and shall remain in motor position until handwheel operation is desired. Movement from motor operation to handwheel operation shall be accomplished by a positive declutching lever which will disengage the motor and motor gearing mechanically, but not electrically. Hand operation must be reasonably fast. It shall be impossible to place the unit in manual operation when the motor is running.

F. Valve actuators shall be equipped with an integral reversing controller and three phase overload relays, Open-Stop-Close push buttons, local-remote-manual selector switch, control circuit transformer, three-phase thermal overload relays and two pilot lights in a NEMA 4X enclosure. In addition to the above, a close coupled air circuit breaker or disconnect switch shall be mounted and wired to the valve input power terminals for the purpose of disconnecting all underground phase conductors.

G. The valve actuator shall be capable of being controlled locally or remotely via a selector switch integral with the actuator. In addition, an auxiliary dry contact shall be provided for remote position feedback.

H. Valve A.C. motors shall be designed for operation on a 480 volt, 3-phase service. Valve control circuit shall operate from a fuse protected 120-volt power supply.

I. Motor operators shall be as manufactured by Limitorque Corporation, Type L120 or approved equal.

17.09 AIR RELEASE VALVES

The air release valves for use in water or force mains shall be installed as shown on the Contract Drawings. The valves shall have a 316 stainless steel body and cover, 316 stainless steel float, plug, seat ring, and internal mechanism, bronze water diffuser, Buna-N or Viton seat, and 316 stainless steel trim and hardware. The fittings shall be threaded. Back flushing attachments shall be included. The air release valves shall be Figure 942 or 942F as manufactured by VAG/GA Industries or approved equal.

17.10 VALVE BOXES

Valve Boxes shall conform to the following:

A. Buried valves shall have cast-iron three-piece valve boxes or HDPE adjustable valve boxes. Cast iron valve boxes shall be provided with suitable heavy bonnets and shall extend to such elevation at or slightly above the finished grade surface as directed by the City. The barrel shall be two-piece, screw type, having a 5 1/4-inch shaft. The upper section shall have a flange at the bottom with sufficient bearing area to prevent settling and shall be complete with cast iron covers. Covers shall have WATER, SEWER, or RECLAIM, as applicable, cast into the top. Lids will be painted “safety” blue for potable, purple for reclaimed, and green for sanitary sewer.

B. All valves shall have actuating nuts extended to within four (4) feet of the top of the valve box. All valve extensions will have a centering guide plate two (2) inches maximum below the actuating nut. The valve extension shall be fastened to the existing nut with a set screw. Valve boxes shall be provided with a concrete base and a valve nameplate engraved with lettering 1/8-inch deep as shown on the Contract Drawings.

C. HDPE adjustable valve boxes shall be one complete assembled unit composed of the valve box and extension stem. All moving parts of the extension stem shall be enclosed in a housing to prevent contact with the soil. Valve box assembly shall be adjustable to accommodate variable trench depths.

D. The entire assembly shall be made of heavy wall high density polyethylene. All exterior components shall be joined with 316 stainless steel screws. The valve box top section shall be adaptable to fit inside a valve box upper section.

E. The stem assembly shall be of a telescoping design that allows for variable adjustment length. The stem material shall be of plated steel square tubing. The stem assembly shall have a built-in device that keeps the stem assembly from disengaging at its fully extended length. The extension stem must be torque tested to 1000 foot pounds. Covers shall have WATER, SEWER or RECLAIMED clearly and permanently impressed into the top surface.

17.11 CORPORATION COCKS

Corporation cocks for connections to cast-iron, ductile iron or steel piping shall be all brass or bronze suitable for 180 psi operating pressure and similar to Mueller Co. H-10046 or approved

equal by Clow Corp. and shall be of sizes required and/or noted on the Contract Drawings.

17.12 FLANGE ADAPTER COUPLINGS

Flange adapter couplings shall be of the size and pressure rating required for each installation and shall be suitable for use on either cast iron or ductile iron pipe. They shall be similar or approved equal to Dresser Company, Style 128. All couplings shall have a sufficient number of factory installed anchor studs to meet or exceed a minimum test pressure rating of 230 psi minimum.

17.13 FLEXIBLE COUPLINGS

A. Flexible couplings shall be either the split type or the sleeve type as shown on the Contract Drawings.

B. Split type coupling shall be used with all interior piping and with exterior piping noted on the Contract Drawings. The couplings shall be mechanical type for radius groove piping. The couplings shall mechanically engage and lock grooved pipe ends in a positive couple and allow for angular deflection and contracting and expansion.

C. Couplings shall consist of malleable iron, ASTM Specification A47, Grade 32510 housing clamps in two or more parts, a single chlorinated butyl composition sealing gasket with a "C" shaped cross-section and internal sealing lips projecting diagonally inward, and two or more oval track head type bolts with hexagonal heavy nuts conforming to ASTM Specification A 183 and A194 to assemble the housing clamps. Bolts and nuts shall be316 stainless steel.

D. Victualic type couplings and fittings may be used in lieu of flanged joints. Pipes shall be radius grooved as specified for use with the Victaulic couplings. Flanged adapter connections at fittings, valves, and equipment shall be Victaulic Vic Flange Style 741, equal by Gustin-Bacon Group, Division of Certain-Teed Products, Kansas City, Kansas, or approved equal.

E. Sleeve type couplings shall be used with all buried piping. The couplings shall be of steel and shall be Dresser Style 38 or 40, as shown on the Contract Drawings, or equal. The coupling shall be provided with 316 stainless steel bolts and nuts unless indicated otherwise.

F. All couplings shall be furnished with the pipe stop removed.

G. Couplings shall be provided with gaskets of a composition suitable for exposure to the liquid within the pipe.

H. If the Contractor decides to use victaulic couplings in lieu of flanged joints, he shall be responsible for supplying supports for the joints.

17.14 HOSE BIBS

Hose bibs shall be 3/4-inch or 1-inch brass, polished chromium plated brass, with vacuum breaker as noted on the Contract Drawings.

17.15 CHECK VALVES

A. Check valves for cast iron and ductile iron pipe lines shall be swing type and shall meet the material requirements of AWWA Specification C508. The valves shall be iron body, bronze mounted, single disc, 175 psi working water pressure and nonshock. Valves shall be as manufactured by Mueller, Clow, Kennedy, or M&H. Valves 8-inch and larger shall be air cushioned to reduce valve slam.

B. When there is no flow through the line, the disc shall hang lightly against its seat in practically a vertical position. When open, the disc shall swing clear of the waterway.

C. Check valves shall have bronze seat and body rings, extended bronze or 316 stainless steel hinge pins and 316 stainless steel nuts on the bolts of bolted covers. The interior and exterior of the valve body shall have a factory applied fusion bonded or 10 mil 2-part epoxy coating (Protecto 401 or approved equal).

D. Valves shall be so constructed that disc and body seat may easily be removed and replaced without removing the valve from the line. Valves shall be fitted with an extended hinge arm with outside lever and weight. The hinge arm and weight, along with hardware, shall be suitable for use in a corrosive environment.

17.16 HYDRANTS

Hydrants shall be provided and installed as required by Pinellas County Utility Specifications.

17.17 TAPPING SLEEVES AND TAPPING VALVES

Tapping valves shall meet the requirement of AWWA C500. The valves shall be flanged, shall be mechanical joint outlet with non-rising stem, designed for vertical burial and shall open left or counterclockwise. Stuffing boxes shall be the "O-ring" type. Operating nut shall be AWWA Standard 2-inch square for valves 2-inch and up. The valves shall be provided with an overload seat to permit the use of full size cutters. Gaskets shall cover the entire area of flange surfaces and shall be supplied with EPDM wedges up to 30-inch diameter.

Tapping sleeves and saddles shall seal to the pipe by the use of a confined "O" ring gasket and shall be able to withstand a pressure test of 180 psi for water lines or 150 psi for sewer force mains for one hour with no leakage in accordance with AWWA C110, latest edition. A 316 stainless steel 3/4-inch NPT test plug shall be provided for pressure testing. All hardware joining the two halves shall be 316 stainless steel and shall be included with the sleeve or saddle. Tapping sleeves and saddle straps shall be made of 316 stainless steel.

17.18 INSTALLATION

A. All valves and appurtenances shall be installed in the location shown, true to alignment and rigidly supported. Any damage occurring to the above items before they are installed shall be repaired to the satisfaction of the City.

B. After installation, all valves and appurtenances shall be tested at least two hours at the working pressure corresponding to the class of pipe, unless a different test pressure is specified. If any joint proves to be defective, it shall be repaired to the satisfaction of the City.

C. Install all floor boxes, brackets, extension rods, guides, the various types of operators and appurtenances as shown on the Contract Drawings that are in masonry floors or walls, and install concrete inserts for hangers and supports as soon as forms are erected and before concrete is poured. Before setting these items, the Contractor shall check all Contract Documents which have a direct bearing on their location and he shall be responsible for the proper location of these valves and appurtenances during the construction of the structures.

D. Pipe for use with flexible couplings shall have plain ends as specified in the respective pipe sections.

E. Flanged joints shall be made with 316 stainless steel bolts, nuts and washers. Mechanical joints shall be made with 316 stainless steel bolts and nuts. All exposed bolts shall be painted the same color as the pipe. All buried bolts and nuts shall be heavily coated with two (2) coats of bituminous paint comparable to Inertol No. 66 Special Heavy.

F. Prior to assembly of split couplings, the grooves as well as other parts shall be thoroughly cleaned. The ends of the pipes and outside of the gaskets shall be moderately coated with petroleum jelly, cup grease, soft soap or graphite paste, and the gasket shall be slipped over one pipe end. After the other pipe has been brought to the correct position, the gasket shall be centered properly over the pipe ends with the lips against the pipes. The housing sections then shall be placed. After the bolts have been inserted, the nuts shall be tightened until the housing sections are firmly in contact, metal-to-metal, without excessive bolt tension.

G. Prior to the installation of sleeve-type couplings, the pipe ends shall be cleaned thoroughly for a distance of 8-inch. Soapy water may be used as a gasket lubricant. A follower and gasket, in that order, shall be slipped over each pipe to a distance of 6-inches from the end.

H. Valve boxes with concrete bases shall be installed as shown on the Contract Drawings. Mechanical joints shall be made in the standard manner. Valve stems shall be vertical in all cases. Place cast iron box over each stem with base bearing on compacted fill and the top flush with final grade. Boxes shall have sufficient bracing to maintain alignment during backfilling. Knobs on cover shall be parallel to pipe. Remove any sand or undesirable fill from valve box.

17.19 SHOP PAINTING

Ferrous surfaces of valves and appurtenances shall receive a coating of rust-inhibitive primer. All pipe connection openings shall be capped to prevent the entry of foreign matter prior to installation.

17.20 FIELD PAINTING

All metal valves and appurtenances specified herein and exposed to view shall be painted according to the Specifications. All above ground potable water main valves shall be painted safety blue.

17.21 INSPECTION AND TESTING

Completed pipe shall be subjected to hydrostatic pressure test for two hours at 180 psi for water and 150 psi for sewer force mains. All leaks shall be repaired and lines retested as approved by the City. Prior to testing, the pipelines shall be supported in an approved manner to prevent movement during tests.

END OF SECTION

SECTION 25 – PUMP STATION CONTROLS

25.01 SCOPE OF WORK

A. Furnish all labor, materials, equipment and incidentals required for a complete electrical system as hereinafter specified and shown on the Contract Drawings.

25.02 SERVICE AND METERING

A. Permanent electrical service and metering will be provided at each Pump Station. Coordinate all work required with Duke Energy.

25.03 CODES

A. All material and installation shall be in accordance with the latest edition of the National Electrical Code (N.E.C.), and NFPA 70 code articles that are applicable to the minimum electrical installation requirements for sewer lift stations.

25.04 GENERAL

A. The materials used in all systems shall be new, unused and as hereinafter specified. All materials where not specified shall be of the very best of their respective kinds. Samples of materials or Manufacturer's specifications shall be submitted for review and acceptance as required by the Engineer.

B. Materials and equipment used shall be Underwriters Laboratories, Inc. listed and conform with applicable standards of NEMA and ANSI.

C. Electrical equipment shall, at all times during construction, be adequately protected against mechanical injury or damage by water. Electrical equipment shall not be stored out-of-doors. Electrical equipment shall be stored in dry permanent shelters. If any apparatus has been damaged, such damage shall be repaired by the CONTRACTOR at his expense. If any apparatus has been subject to possible injury by water, it shall be thoroughly dried out and put through such special tests as directed by the Engineer, at the cost and expense of the CONTRACTOR, or shall be replaced by the CONTRACTOR at his own expense.

25.05 MISCELLANEOUS EQUIPMENT

A. Boxes and Fittings:

1. NEMA 4X boxes shall be used outdoors or in "wet" locations. Construction shall be 316 stainless steel.

2. Conduit hubs shall be used for all outdoor conduit terminations and shall be as manufactured by Meyers Electric Products, Inc., Raco Div., Appleton Electric Co., or approved equal.

3. Conduit sealing bushings shall be Coruse Hinds type EYS or approved equal.

4. All panels shall be protected from internal corrosion by the use of corrosion – inhibiting vapor capsules, Northern Instruments Model Zerust VC, Hoffman Model A-HCI, or equal.

25.06 PUMP CONTROL SYSTEM

A. PANEL CONSTRUCTION:

1. The electrical control equipment shall be mounted within a NEMA Type 4X, dead front enclosure, constructed of not less than #14 gauge stainless steel (316 gauge). The enclosure shall be equipped with an inner aluminum door and shall incorporate a removable back panel on which control components shall be mounted. Back panel shall be secured to enclosure with collar studs. Outer panel door shall be equipped with door stop. Panel shall have lockable, 3-point latching system.

B. PUMP CONTROL CABINET COMPONENTS

1. Enclosure: Enclosure shall be NEMA 4X by Hoffman or approved equivalent with a heavy-duty padlock hasp. Enclosure shall be 316 Stainless Steel.

2. Inner Safety Door: Panel shall include one aluminum inner safety door, 12 gauge nominal thickness (minimum) with 3/4-inch, 90 degree break bend on all edges for rigidity; full length aluminum hinge; positive twist lock handle; safety latch to keep door open during maintenance.

3. Provide and install 120V LED cabinet light, Hoffman LEDA1S35. Provide custom mounting brackets as required. Provide Hoffman connector kit LEDA20C and tie to limit switch installed in panel.

C. PUMP STATION CONTROL/MONITORING EQUIPMENT

1. The Lift Stations shall be monitored and controlled via a SCADA Control Cabinet. This cabinet shall be provided, installed and programmed by others. The CONTRACTOR shall be responsible for providing the conduit and conductors required for 120V AC circuits, 24V DC circuits and 4-20mA signals as indicated on the Contract Drawings. The CONTRACTOR shall coordinate all work, terminations and other details with the SCADA Control Cabinet provider.

D SURGE PROTECTION DEVICE

1. A Surge Protection Device (SPD) meeting the requirements of ANSI Standard C-62.41 (latest revision) shall be provided.

2. The Surge Protection Device (SPD) shall be 120/240V, 3Ø, 4-wire. ASCO model # 430240HP10ACSJ10.

F. CONTROL RELAYS

1. Control Relays: All relays shall meet the following:

   a. Compact, general-purpose, plug-in type.

   b. Socket mounted.

   c. Contacts rated for not less than 10 amperes at 120V.

   d. Square-D Class 8501, Type R, miniature plug-in with relay base. Poles and coil voltages vary, refer to contract drawings.

F. PHASE MONITOR RELAY

1. An integral 240 VAC three-phase monitor shall be provided in the pump control cabinet. The phase monitor shall detect loss of phase, phase reversal, low phase and high phase faults. All phase monitor adjustments shall be adjustable. Phase monitor relay shall be Diversified Electronics cat# SLA-230-ALE.

G. CIRCUIT BREAKERS

1. Main and Motor Circuit Breakers: The panel shall include main and motor circuit breakers sized as shown. The breakers shall be mounted on the subpanel with handle through the inner door. The main and motor circuit breakers shall be products of Square-D, HGL or HJL as indicated.

H. MOTOR STARTERS

1. Pump starters shall consist of across-the-line motor starters or Variable Frequency Drives (VFD's).

2. Across-the-line motor starters shall be provided with remotely resettable and adjustable electronic overload relays.

3. Variable Frequency Drives shall be Yaskawa IQPump1000 series or approved equal.

I. ELECTRICAL WIRING

1. Panel (or site) lighting, receptacles, heaters, controls, telemetry and fans on separate branch circuits.

2. Branch circuit breakers shall be Square-D FAL12015 and FAL12020 as applicable.

i. Power wiring shall be 600 volt, type THWN stranded copper, No. 12 AWG size, for 120V service.

ii. Discrete 24V DC signal wiring shall be 600-volt type THWN stranded copper, sized for the current carried, but not smaller than No. 14 AWG.

iii. Analog signal wiring shall be stranded copper in twisted shield pairs, no smaller than No. 16 AWG, Belden 8719.

iv. Panel wiring shall be routed within 1” x 1” panduits.

v. Hinge wiring shall be secured at each end with the bend portion protected by a plastic sleeve.

vi. Analog or DC wiring shall be separated from any AC power or control wiring by at least six inches.

vii. Each wire shall be uniquely identified using plastic, snap-on numbered tags.

viii. Terminal blocks shall be provided for all field wiring entering the panel. The greater of 8 or 15% spare terminal blocks shall be provided. Terminal blocks shall be Allen-Bradley 1492-W10.

viii. No more than one wire per screw and yoke termination.

J. PANEL MOUNTED DEVICES

1. 3-Position Selector Switches. Units shall meet the following:

a. Heavy-duty, oil-tight, industrial type push buttons rated for NEMA 4X service.

b. Contacts rated for 120-volt ac service at 10 amperes continuous.

c. Number of positions and contact arrangements as required.

d. Factory-engraved legend plate indicating function.

e. Panel mounting accommodating panel thickness between 1/16 to ¼ inch.

f. Operator: black flush head.

g. 3-position, maintained, pump hand/off/auto switch. Square-D Class 9001, KS43FB with contacts as required.

2. Duplex receptacles shall be Ground Fault Interrupting (GFI) type, Hubbell model number GFR5352IA or equal.

3. Elapsed time meter. Cramer 635G.

4. MINI CAS II Unit:

a. MINI CAS II supervisory relay to be provided by pump manufacturer.

5. Alarm System :

a. The pump control cabinet shall include a vapor-proof red light mounted on the exterior of the cabinet as shown on the Contract Drawings for alarm visual indication.

6. Ventilation system:

a. Fans, exhaust grills, filter, etc. shall be as specified on the Contract Drawings.

K. SPARES AND EXPENDABLES

1. Provide the following spare parts:

a. Five (5) spare relays of each type provided.
b. Provide the following expendables:

i. Two-year supply of corrosion inhibitor capsules

ii. Six (6) spare fuses.

L. Operating Controls and Instruments:

1. All operating controls and instruments shall be securely mounted on the control compartment door. All controls and instruments shall be clearly labeled to indicate function.

M. Miscellaneous Equipment:

1. All panels shall be protected from internal corrosion by the use of corrosion – inhibiting vapor capsules, Northern Instruments Model Zerust VC, Hoffman Model A-HCI, or equal.

N. Installation:

1. Unless otherwise noted on the Contract Drawings, top of cabinets shall be mounted six feet above grade, properly aligned and adequately supported independently of the connecting raceways.

2. All wiring in the control panel shall be neatly formed, grouped, and identified to provide a neat and orderly appearance.

3. All nameplates shall be properly secured.

25.07 RADAR LEVEL TRANSDUCER

A. The level sensor for monitoring the sewage level in the wet well shall consist of a pulsed radar level sensor. The cable shall be connected directly to the signal input terminals in the SCADA Control Cabinet with no intervening junction box or calibration device required. The device shall require a 10-30 VDC low voltage power supply. The output shall be a standard 4-20 MADC control signal, factory set proportional to the selected fixed range of the transducer.

B. The radar level sensor shall be E+H FMR10 with Flooding Protection Tube accessory.

25.08 FLOAT SWITCHES

A. Levels shall be sensed by polypropylene weighted floats. The floats shall be heavy-duty type, with hermitically sealed non-mercury switch inside each float. Weights shall be 20 ounces minimum. The floats shall be secured at the top of the wetwell via a stainless steel wall mount bracket designed specifically for float installation.

25.09 CONDUIT INSTALLATION

A. Where conduits enter or leave all outlet boxes, cabinets safety switches, tap boxes, motor controllers, etc., threaded hubs shall be used. Bushings 1-inch and larger shall be of an approved insulated type. Unless otherwise indicated, conduit 2-inches shall be supported at intervals not exceeding ten (10) feet.

B. During construction, all installed raceways shall be temporarily plugged or otherwise protected from the entrance of moisture, dirt, trash, plaster, moisture, etc., through neglect of the CONTRACTOR to so protect them, shall be replaced by the CONTRACTOR without additional expense to the Owner. No kinked, clogged or deformed raceways will be permitted on the job. Raceways shall be cut to proper length so that ends will fit accurately in the outlets. Where raceways cross building expansion joints, a suitable raceway expansion fitting shall be used.

C. Size of raceway shall not be less than NEC requirements, but in no case shall be less than indicated on the Contract Drawings. Combining of circuits, other than detailed, will not be permitted. The CONTRACTOR shall install larger size raceways than detailed where there is excessive length of unbroken run or excessive number of bends.

D. Bends in metallic raceways shall be made while "cold" and in no case shall the raceways be heated. Raceways shall not be bent through more than 90º. The radius of bends shall not be less than six (6) times the internal diameter of the raceway. Not more than four (4) (equivalent 90º) bends will be permitted between outlets, the bends at the outlets being counted.

E. Raceways shall be properly aligned, grouped and supported. Exposed raceways shall be installed at the right angles to or parallel to the principal structural members. Concealed raceways, unless otherwise indicated, may take the most direct route between outlets. Raceways shall be firmly held in place. Raceways shall run to avoid trapping wherever possible. Where areas are indicated for future openings, foundations, etc., all raceways shall be run around such areas. The CONTRACTOR shall provide necessary inserts in poured concrete areas and shall furnish and install all necessary sleeves through walls, floors and roofs for passage of raceways. Sleeves through roofs and/or exterior walls shall be properly sealed by the CONTRACTOR against entrance of moisture, etc., into the building. Where necessary repairs to the building structure using material in no way inferior to that originally installed and using labor skilled in the trades involved.

25.10 CONDUCTORS

A. Splices, taps and attachments of fittings and lugs shall be electrically and mechanically secure. Approved solderless lugs and connectors shall be sued for all conductors with 2-bolt type being used for sized No. 4/0 and larger. There shall be plenty of slack cable in boxes, outlets and cabinets to ensure that there is no binding at the bushings. All lugs shall be of the correct sizes for the conductor in order to fit the conductor into a lug.

B. Splices or joints to other than lugs or terminals shall not be allowed.

25.11 GROUNDING

A. The entire electrical system shall be completely and effectively grounded as required by the NEC and as specified hereinafter.

B. All metallic raceways shall be mechanically and electrically secure at all joints and at all boxes, cabinets, fittings and equipment. Metallic raceways entering the motor control center control panels or other electrical boxes shall be grounded to the appropriate ground bus. All metallic raceways shall be electrically continuous throughout the entire conduit system. Bond wires shall be used in exterior concrete pull boxes.

25.12 SUPPORTS

A. The CONTRACTOR shall furnish and install all necessary supports for properly mounting all electrical equipment and raceways. Such supports shall be fabricated and installed in a neat and workmanlike manner, and care shall be taken that at no time shall any portion of the building structure be overloaded. Should the building structure sustain damage through carelessness or through failure of the CONTRACTOR to properly support and install the electrical equipment, the CONTRACTOR shall bear all costs involved in repairing or replacing such installation.

B. All supports exposed to the weather shall be stainless steel. Provide plastic caps on all unistrut ends.

25.13 TESTS AND CHECKS

A. The following minimum tests and checks shall be made prior to the termination of any field wiring.

1. Megger terminals and buses after disconnecting devices sensitive to megger voltage.

2. A 1,000V DC megger shall be used for these tests.

3. The first test shall be made with main circuit breaker closed and all remaining breakers open. A second test shall be made with all circuit breakers closed.

4. The test results shall be recorded and forwarded to the Engineer for his review. Minimum megger readings shall be 500 megohms in both tests.

B. The following shall be done before energizing any equipment or control panel.

1. Remove all current transformer shunts after completing the secondary circuit.

3. Vacuum clean all interior equipment.

25.14 SPARE PARTS

A. Spare parts shall be furnished to permit convenient and quick service restoration upon failure of a particular unit.

B. The spare parts shall be packed in a manner suitable for long-term storage and shall be adequately protected against corrosion, humidity, and temperature.

25.15 WARRANTY

A. Warranty - The SYSTEM SUPPLIER shall warrant all hardware and software provided under this contract against all defects in material and workmanship for a period of one year. The system supplier shall warrant the telemetry software to be free of defects for as long as it is operational in the city. The SYSTEM SUPPLIER shall also provide free updates to this software for the life of the system. The function modules utilized in the remote terminal units shall carry an additional two-year return-to-factory warranty. The two-year return-to-factory warranty shall also cover damage due to lightning.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 – ELECTRICAL

GENERAL

26.01 SCOPE OF WORK

A. Furnish all labor, materials, equipment and incidentals required for complete electrical system as hereinafter specified and shown on the Contract Drawings.

B. The work, apparatus and materials, which shall be furnished under these Specifications and accompanying Drawings, shall include all items listed hereinafter and/or shown on the Drawings. Certain equipment, which will require wiring thereto and/or complete installation, is indicated. All materials necessary for the complete installation shall be furnished and installed by the CONTRACTOR to provide complete power, lighting, instrumentation, wiring and control systems as indicated on the Drawings and/or as specified herein.

C. The CONTRACTOR shall furnish and install the necessary cables, protective devices, conductors, supports, raceways, exterior electrical system, etc., to serve lighting loads and miscellaneous electrical loads as indicated on the Drawings and/or as specified. The CONTRACTOR shall install any control panel provided under this or any other sections on the specifications.

D. The work shall include complete testing of all equipment and wiring at the completion of the work and making any minor connection changes or adjustments necessary for the proper functioning of the system and equipment. All workmanship shall be of the highest quality; sub-standard work will be rejected.

E. For process instrumentation furnish and install all conduit, wire and interconnections between primary elements, transmitters, local indicators and receivers.

F. It is the intent of these Specifications that the electrical system shall be suitable in every way for the service required. All material and all work, which may be reasonably implied as being incidental to the work of this Section, shall be furnished at no extra cost.

26.02 SERVICE AND METERING

A. Permanent electrical service and metering will be provided at each Pump Station. Coordinate all work required with Duke Energy.

26.03 CODES, INSPECTION AND FEES

A. All material and installation shall be in accordance with the 2014 edition of the National Electrical Code (N.E.C.), and NFPA 70 code articles that are applicable to the minimum electrical installation requirements for sewer lift stations.

B. Pay all fees required for permits and inspections.

26.04 TESTS

A. Test all systems and repair or replace all defective work. Make all necessary adjustments to the systems and instruct OWNER's personnel in the proper operation of the systems.

B. The following minimum tests and checks shall be made prior to the energizing of electrical equipment. Test shall be by the CONTRACTOR and a certified test report shall be submitted providing all test results and stating that the equipment meets and operates in accordance with the Manufacturer's and job specifications, and that equipment and installation conforms to all applicable Standards and Specifications:

1. Test all 600-volt wire insulation with a megohm meter after installation. Make tests at not less than 1000 volts. Submit a written test report of the results to the engineer.
2. Mechanical inspection of all circuit breakers to assure proper operation.

C. The Engineer shall be notified forty-eight (48) hours before tests are made to enable the Owner to have designated personnel present.

26.05 CUTTING AND PATCHING

A. All cutting and patching shall be done in a thoroughly workmanlike manner.

26.06 INTERPRETATION OF DRAWINGS

A. The Drawings are not intended to show exact locations of conduit runs.

B. All three-phase circuits shall be run in separate conduits unless otherwise shown on the Drawings.

C. Unless otherwise approved by the Engineer, conduit shown exposed shall be installed exposed; conduit shown concealed shall be installed concealed.

D. Where circuits are shown as "home-runs," all necessary fittings and boxes shall be provided for a complete raceway installation.

E. The CONTRACTOR shall harmonize the work of the different trades so that interferences between conduits, piping, equipment, architectural and structural work will be avoided. All necessary offsets shall be furnished so as to take up a minimum space and all such offsets, fittings, etc., required to accomplish this shall be furnished and installed by the CONTRACTOR without additional expense to the Owner. In case interference develops, the Owner's authorized representative is to decide which equipment, piping, etc., must be relocated, regardless of which was installed first.

F. The locations of equipment, fixtures, outlets, and similar devices shown on the Drawings are approximate only. Exact locations shall be as approved by the Engineer during

construction. Obtain in the field all information relevant to the placing of electrical work and in case of any interference with other work, proceed as directed by the Engineer and furnish all labor and materials necessary to complete the work in an approved manner.

G. Circuit layouts shown are not intended to show the number of fittings, or other installation details. Furnish all labor and materials necessary to install and place in satisfactory operation all power, lighting, and other electrical systems shown. Additional circuits shall be installed wherever needed to conform to the specific requirements of the equipment.

H. The ratings of motors and other electrically operated devices together with the size shown for their branch circuit conductors and conduits are approximate only and are indicative of the probable power requirements insofar as they can be determined in advance of the purchase of equipment.

I. All connections to equipment shall be made as shown, specified and directed and in accordance with the approved shop drawings, regardless of the number of conductors shown on the Electrical Drawings.

26.07 RECORD DRAWINGS

A. As the work progresses, legibly record all field changes on a set of project Contract Drawings. When the project is complete, furnish a complete set of reproducible "As-built" drawings for the Project Record Documents.

26.08 COMPONENT INTERCONNECTIONS

A. Component equipment furnished under this Specification will not be furnished as integrated systems.

B. Analyze all systems components and their shop drawings; identify all terminals and prepare drawings or wiring tables necessary for component interconnection.

26.09 SHOP DRAWINGS

A. As specified under other Sections, shop drawings shall be submitted for review and acceptance for all materials, equipment, apparatus, and other items as required by the Engineer.

B. Shop drawings shall be submitted for the following equipment:

1. Pump Control Cabinet
2. Disconnects
3. Circuit Breakers
4. Variable Frequency Drives
5. Surge Protection Device
6. Junction Boxes

7. Wire & cable
8. Conduit

C. The Manufacturer's name and product designation and catalog cutsheets shall be submitted for the following material:

1. Conduit
2. Boxes and fittings

D. Prior to submittal by the CONTRACTOR, all shop drawings shall be checked for accuracy and contract requirements. Shop drawings shall bear the date checked and shall be accompanied by a statement that the shop drawings have been examined for conformity to Specifications and Drawings. This statement shall also list all discrepancies with the Specifications and Drawings. Shop drawings not so checked and noted shall be returned.

E. The Engineer's check shall be only for conformance with the design concept of the project and compliance with the Specifications and Drawings. The responsibility of, or the necessity of, furnishing materials and workmanship required by the Specifications and Drawings, which may not be indicated on the shop drawings, is included under the work of this Section.

F. The responsibility for all dimensions to be confirmed and correlated at the job site and for coordination of this work with the work of all other trades is also included under the work of this Section.

G. No material shall be ordered or shop work started until the Engineer's review and acceptance of shop drawings has been given.

26.10 ELECTRICAL IDENTIFICATION

SUMMARY

A. Section Includes:

1. Nameplates.
2. Labels.
3. Wire markers.
4. Conduit markers.
5. Stencils.
6. Underground Warning Tape.
7. Lockout Devices.

NAMEPLATES

A. Product Description: Laminated three-layer plastic with engraved white letters on black background color.

B. Letter Size:
   1. 1/8 inch high letters for identifying individual equipment and loads.

   2. 1/4 inch high letters for identifying grouped equipment and loads.

C. Minimum nameplate thickness: 1/8 inch.

LABELS

D. Labels: Embossed adhesive tape, with 3/16 inch white letters on black background.

WIRE MARKERS

E. Description: Cloth tape, split sleeve, or tubing type wire markers.

F. Legend:
   1. Power and Lighting Circuits: Branch circuit or feeder number.

   2. Control Circuits: Control wire number as indicated on shop drawings.

CONDUIT AND RACEWAY MARKERS

G. Description: Stencils.

H. Color:
   1. Medium Voltage System: Black lettering on white background.

I. Legend:
   1. Medium Voltage System: HIGH VOLTAGE.

STENCILS

J. Stencils: With clean cut symbols and letters of following size:
   1. Up to 2 inches Outside Diameter of Raceway: 1/2 inch high letters.

   2. 2-1/2 to 6 inches Outside Diameter of Raceway: 1 inch high letters.

K. Stencil Paint: As specified in other sections of specifications, semi-gloss enamel, colors.

UNDERGROUND WARNING TAPE

L. Description: 6 inch wide plastic tape, colored red with suitable warning legend describing buried electrical lines.

LOCKOUT DEVICES

M. Lockout Hasps:

1. Anodized aluminum hasp with erasable label surface; size minimum 7-1/4 x 3 inches.

PREPARATION

N. Degrease and clean surfaces to receive adhesive for identification materials.

O. Prepare surfaces in accordance with Division 9 for stencil painting.

INSTALLATION

P. Install identifying devices after completion of painting.

Q. Nameplate Installation:

1. Install nameplate parallel to equipment lines.

2. Install nameplate for each electrical distribution and control equipment enclosure with corrosive-resistant mechanical fasteners, or adhesive.

3. Install nameplates for each control panel and major control components located outside panel with corrosive-resistant mechanical fasteners, or adhesive.

4. Secure nameplate to equipment front using screws or adhesive.

5. Secure nameplate to inside surface of door on recessed panelboard in finished locations.

6. Install nameplates for the following:

a. Pump Control Panel.

b. SCADA Control Cabinet.

c. Disconnect Switches.

Label Installation:

1. Install label parallel to equipment lines.

2. Install label for identification of individual control device stations, and wall switches where their purpose is not readily obvious.

3. Install labels for permanent adhesion and seal with clear lacquer.

Wire Marker Installation:

1. Install wire marker for each conductor at panelboard gutters, pull boxes, outlet and junction boxes, and each load connection.

2. Mark data cabling at each end. Install additional marking at accessible locations along the cable run.

3. Install labels at data outlets identifying patch panel and port designation.

Raceway Marker Installation:

1. Install raceway marker for each raceway longer than 6 feet.

2. Raceway Marker Spacing: 20 feet on center.

3. Raceway Painting: Identify conduit using field painting in accordance with Division 9.

Stencil Installation:

1. Apply stencil painting in accordance with Division 9.

Underground Warning Tape Installation:

1. Install underground warning tape along length of each underground conduit, raceway, or cable 12 inches below finished grade, directly above buried conduit, raceway, or cable.

26.11 RACEWAYS AND FITTINGS

GENERAL

SCOPE OF WORK

A. All aboveground, exterior conduit shall be rigid aluminum. All conduit installed in slabs or below grade shall be rigid non-metallic heavy wall conduit. Minimum conduit size in floor slabs, walls, or below grade shall be ¾-inch.

PRODUCTS

MATERIALS

A. Rigid Non-metallic Conduit and Fittings : Rigid non-metallic conduit and fittings of heavy wall polyvinyl chloride (PVC) meeting ASTM Specification D 1785, approved by UL for the specific purpose, may be used in locations not prohibited by the NEC Section 347-3. When equipment grounding is required by Article 250 of the NEC, a separate grounding conductor shall be installed in the conduit. Installation methods of rigid non-metallic conduit shall conform to Section 347-5 through 347-15 of the NEC. Supports shall be in accordance with Table 347-8.

B. Rigid Aluminum Conduit and Fittings : All electric aluminum conduit and fittings shall conform ANSI C80.5. Rigid aluminum conduit shall not be used for concealed work. The use of dissimilar metals shall be avoided throughout the system. Installation methods of metallic conduit shall be in accordance with Sections 348-4 through 348-13 of the NEC.

C. Flexible Non-Metallic Conduit: As indicated or necessary, equipment shall be connected with liquid-tight flexible non-metallic conduit of the size required for the conductors to the equipment. Liquid-tight flexible non-metallic conduit shall be UL, type UA. It shall be installed in such a manner that liquids tend to run off the surface and not drain toward the fittings. Sufficient slack shall be provided to reduce the effects of vibration. Where the fittings are brought into an enclosure with a knock-out, a gasket assembly consisting of an O-ring and retainer shall be installed. These fittings shall be nylon insulated-throat type. Conduit shall be galvanized, PVC covered and shall be constructed to provide a continuous metallic bond. It shall be equal to that manufactured by Appleton “Sealtite”.

EXECUTION

INSTALLATION:

A. Conduit shall be concealed unless otherwise shown. Exposed conduit shall run parallel or perpendicular to building planes. Concealed conduits shall be run in a direct line with long sweep bends and offsets. Conduit shall be continuous and installed in such a manner that the system shall be electrically continuous throughout. Conduit ends shall be capped during construction. The ends of all conduits shall be carefully reamed free from burrs after threading and before installation. All cuts shall be made square. All joints shall be made up tight. Care shall be taken to see that all light and power conduit runs form a permanent and continuous ground connection point.

B. The Contractor shall permanently and effectively ground service neutral and all raceways, devices, and utilized equipment in accordance with the requirements of the NEC, and as shown or required. All grounding electrodes shall have rigid clamp jaws and be UL listed for the application. A separate ground wire shall be provided in all lighting and power raceways.

C. Conduit stubs shall be located to conform to location of connection boxes on motors and/or other equipment served. Traps in conduit runs shall be avoided. Device boxes in concrete shall be set true and packed as necessary to exclude concrete during placement.

D. Final connections from the end of the conduit run to equipment or controls for both interior and exterior work shall be made by means of liquid-tight flexible conduit. The length of these sections of flexible conduit shall not exceed 36 inches in length.

E. Conductors shall be installed in a workmanlike manner. Damage to insulation or a reduction of the wire size when pulled into the conduit shall be avoided.

F. All areas of the project are considered to be wet locations and construction within these areas shall be moisture and weather resistant. Work below grade, on grade, or beneath slabs shall be waterproof.

G. Electrical work shall not rest upon, be supported by or hung from ductwork, piping or equipment. Adequate supports shall be provided to assure that this is achieved.

H. Boxes, conduit, hangers, panels, etc., shall be fastened to steel by machine bolts and nuts, and by expansion bolts in concrete. Wood or composition plugs shall not be used.

I. Buried conduit shall be installed so as to assure a watertight system. Turns and bends shall be made using watertight fittings or field-made bends. Trenchwork for installation of conduits and equipment underground shall conform to applicable sections of these specifications. Locations for buried conduit shall be carefully plotted to avoid conflict with other installations. Unless otherwise noted, all buried electrical installations shall be installed at least 24-inches below finished grade.

J. Where installations pass through walls, slabs, or other structures, all cutting shall be accomplished without damage to the structure. Boring and cutting shall be done with proper equipment and without delivering excessive vibration or shock to the structure.

26.12 WIRES AND CABLES

GENERAL

SCOPE

A. This section includes the furnishing, installation, and connection of all low voltage and power wiring. This shall include all wires and cables utilized for controls. Conductors specified for low voltage controls shall be coordinated with and approved by equipment manufacturers.

B. Control wiring specified herein shall be installed and connected by the Electrical Contractor to perform the functions specified in other sections of these specifications.

C. REFERENCE STANDARDS:

The following specifications and standards, except as hereinafter modified, are incorporated herein by reference and form a part of this specification to the extent indicated by the references thereto. Except where a specific date is given, the issue in effect (including amendments, addenda, revisions, supplements, and errata) on the date of Invitation for Bids shall be applicable. In text such specifications and standards are referred to by basic designation only.

1. Federal Specifications (Fed. Spec.)
   J-C-30A(1) - Cable and Wire Electrical (Power, Fixed Installation)
   HH-I-595C - Insulation Tape, Electrical, Pressure Sensitive Adhesive, Plastic

2. National Fire Protection Association (NFPA) Publications:
   No. 70 - National Electrical Code (NEC) WIRES AND CABLES

3. Underwriter's Laboratories, Inc (UL) Publications:
   No. 83 - Thermoplastic – Insulated Wires
   No. 493 - Thermoplastic – Insulated Underground Feeder and Branch Circuit Cables
   No. 486 - Wire Connectors and Soldering Lugs

PRODUCTS

MATERIALS

A. Conductors for 4-20mA signals and where twisted, shielded conductors are shown on the Contract Drawings shall have :

1. 2 conductor, #16 tinned copper conductors.

2. Polyethylene insulation material.

3. Aluminum foil-polyesther tape with shorting fold

4. Shall be Belden Part Number 8719 or equal as determined by the engineer.

B. Conductors for MiniCAS II sensor signals and where twisted, shielded conductors are shown on the Contract Drawings shall have :

1. 2 conductor, #16 tinned copper conductors.

2. Polyethylene insulation material.

3. Aluminum foil-polyesther tape with shorting fold

4. Shall be Belden Part Number 8719 or equal as determined by the engineer.

C. Power Conductors shall consist of annealed copper wire having a minimum of 98% conductivity and shall be sized and insulated or isolated in accordance with the NEC for the current and voltage of the individual circuit. All conductors, unless specifically noted, shall have type “THWN”, 75 degrees f, 600 Volt insulation.

D. Joints shall be made with mechanical connectors and insulated with two layers of Scotch No. 33 or Slipnot No. 3201 tape.

E. All splices for conductors #12 through #6 AWG solid or stranded shall be made with “Scotchlock” spring connectors or the pressure wire type. For wire sizes larger than #6, splices shall be made with “OZ” type “XW” or “XTP” as appropriate to the splice being installed. Equal fittings of Burndy and Penn Union may be used. Tape shall be equal to Scotch No. 33 or Slipnot NO. 3201 over splice and filler tape on splices shall be equal to “Scotchfill”.

F. Flexible cords and cables shall be of the size and number of conductors as indicated on Contract Drawings. Cords shall comply with the requirements of Article 400 of the NEC.

G. Contractor shall coordinate the requirements for flow meter signal converter cable with the respective equipment manufacturers.

EXECUTION

INSTALLATION

A. All conductors shall be coded throughout, using different colors for phases, white for neutral (white with other color stripe for neutral of a different voltage system) and green for ground. The same color code for a particular phase or part of a circuit shall be run with the same conductor throughout the job. Colors used for each voltage system shall be different. Conductors No. 8 AWG and larger may be black in color but shall be identified with colored tape in all outlet, junction or pull boxes and at the terminals of the equipment.

Phase	120/240V, 3PH, System
A	Black
B	Orange
C	Blue

Neutral	White
Ground	Green

B. All wires in cabinets, boxes, panels, pull and junction boxes shall be trained neatly and tied.

C. All wires and cables, larger than No. 12 AWG, shall be continuous from origin to destination without splices unless written permission is given by the ENGINEER.

D. Conductors shall be sized in accordance with NEC requirements. No conductor shall be smaller than No. 12 AWG, except control and signal circuit conductors which may be No. 14 AWG, unless otherwise specified on the Contract Drawings.

TERMINATIONS AND SPLICES

A. Power Conductors: Terminations shall be die type or set screw type pressure connectors as specified. Splices (where allowed) shall be die type compression connector and waterproof with heat shrink boot or epoxy filling.

B. Control Conductors: Termination on saddle-type terminals shall be wired directly with a maximum of two conductors per termination. Termination on screw type terminals shall be made with a maximum of two spade connectors. Splices (where allowed) shall be made with insulated compression type connectors. Heat shrink boots shall be utilized for all outdoor splices.

C. Instrumentation Signal Conductors: Terminations permitted shall be typical of control conductors. Splices are allowed at instrumentation terminal boxes only.

D. Except where otherwise approved by the Engineer no splices will be allowed in manholes, handholes or other below grade located boxes.

E. Splices shall not be made in control devices (i.e., pressure switches, flow switches, etc.), conduit bodies, etc.

26.13 MAIN DISCONNECT

GENERAL

SYSTEM DESCRIPTION

A. All disconnecting means shall meet the requirements of the NEC.

PRODUCTS

ACCESSORIES

A. Main Disconnect: Fused switch shall be heavy-duty type “HD”. The blades of switches shall be quick-make, quick-break operating type. All lugs the switch shall be equal to Burdy’s solderless quick lugs or shall be compression type. Switch shall be 3-pole and shall have fuse sizes as indicated on the Contract Drawings. Enclosure shall be NEMA 4X stainless steel. The switch shall conform to NEMA Standards and shall be UL listed. Switches shall be equal to General Electric, Square-D, or Cutler-Hammer.

B. Main disconnect shall have a solid neutral, ground lug and shall be listed for use as service entrance equipment.

EXECUTION

INSTALLATION

A. Install disconnect as recommended by the manufacturer, required by Code, and as shown on the Contract Drawings.

26.14 SUPPORTING DEVICES

GENERAL

WORK INCLUDED

A. Conduit supports.

B. Channel supports for equipment.

REFERENCE STANDARDS

A. National Electrical Code

PRODUCTS

CONDUIT SUPPORTS

A. Single Runs: Galvanized conduit straps or ring bolt type hangers with specialty spring clips. Plumbers perforated straps or wire will not be acceptable.

B. Multiple Runs: Conduit rack with 25 percent spare capacity.

C. Vertical Runs: Channel support with conduit fittings.

CHANNEL SUPPORTS

A. Stainless steel channel sections shall be rolled from AISI 1008 commercial grade steel and be in conformance with ASTM A 240.

B. The cross sectional width dimension of the channel shall be a minimum of 1-5/8-inch. The depth will be as required to satisfy the load requirements. Channel with 1-5/8-inch depth or greater shall be rolled from manufacturer's standard 12 gauge steel. Channel smaller than 1½-inch may be manufacturer's standard 14 gauge steel.

C. Attachment holes, when required, shall be factory punched on hole centers equal to the channel cross sectional width dimension and shall be a maximum of 9/16-inch in diameter.

D. Channel attachment nuts shall be designed to prelocate in the channel and provide a bearing surface on the turned down lips while making positive contact with the side walls of the channel.

E. Straps for the support of conduit shall be designed such that the attachment nut is captivated on the shoulder of the strap when tightened, and the attachment bolt shall allow tightening by either a screwdriver or wrench.

F. All nuts, bolts, straps, threaded rod and miscellaneous hardware shall be stainless steel.

G. When tested in accordance with ASTM B117-73 procedure, there shall be no sign of red rust after 1,000 hours of testing. Certified test results to support this must be submitted upon request.

ANCHOR METHODS

A. Hollow Masonary: Toggle bolts, spider type expansion anchors, or tapcons.

B. Solid Masonary: Lead expansion anchors, preset inserts, or tapcons.

C. Metal Surfaces: machine screws, bolts, welded studs, or beam type clamps on steel joints.

D. Wood Surfaces: Wood Screws

E. Concrete Surfaces: Self-drilling anchors, power-driven studs, expansion bolts, or tapcons.

F. See Contract Drawings for special mounting and installation.

EXECUTION

INSTALLATION

A. Layout to maintain headroom, neat mechanical appearance, and to support equipment loads required.

B. Verify exact mounting and installation requirements with the Owner's representative prior to installation.

26.15 GROUNDING

GENERAL

SCOPE OF WORK

A. Furnish and install a complete grounding system in strict accordance with Article 250 of the National Electrical Code and as hereinafter specified and shown on the Contract Drawings.

PRODUCTS

MATERIALS

A. Ground rods: Ground rods shall be Copperclad steel 3/4-inch x 20 foot. Ground rods shall be Copperweld or be an approved equal product.

EXECUTION

GENERAL

A. Grounding electrodes shall be driven as required. Where rock is encountered, grounding plates may be used in lieu of grounding rods.

B. All equipment enclosures, motor and transformer frames, conduits systems, cable armor, exposed structural steel and similar items shall be grounded.

C. Exposed connections shall be made by means of approved grounding clamps. Exposed connections between different metals shall be sealed with No-Oxide Paint Grade A or approved equal. All buried connections shall be made by welding process equal to Cadweld.

D. All underground conductors shall be laid slack and where exposed to mechanical injury shall be protected by pipes or other substantial guards. If guards are iron pipe or other magnetic material, conductors shall be electrically connected to both ends of the guard.

E. The Contractor shall exercise care to insure good ground continuity, in particular between the conduit system and equipment frames and enclosures. Where necessary, jumper wires shall be installed.

F. Provide grounding test wells where indicated on the Contract Drawings.

TESTS

A. The Contractor shall test the ground resistance of the system. All test equipment shall be

provided by the Contractor and approved by the Engineer. Dry season resistance of the system shall not exceed 2 ohms. If such resistance cannot be obtained with the system as shown, the Contractor shall provide additional grounding as directed by the Engineer, without additional payment. The Contractor shall submit all grounding system test results to the Engineer for review.

26.16 VARIABLE FREQUENCY DRIVES

SUMMARY

A. Section Includes: Requirements for providing, installing and testing the 240-volt variable frequency drives. Provide drives in individual free standing enclosures, as shown. Furnish harmonic studies as specified.

REFERENCES

A. Codes and standards referred to in this Section are:

1. NEMA ICS 1 - General Standards for Industrial Control and Systems
2. NEMA ICS 2 - Industrial Control and Systems Controllers, Contactors and Overload Relays Not More than 2000 Volts AC or 750 Volts DC.
3. NEMA ICS 3 - Industrial Control and Systems Factory Built Assemblies
4. NEMA ICS 7 - Industrial Control and Systems: Adjustable Speed Drives
5. NEMA ICS 7.1 - Safety Standards for Construction and Guide for Selection, Installation and Operation of Adjustable Speed Drive Systems
6. NEMA 250 - Enclosures for Electrical Equipment
7. NFPA 70 - National Electrical Code
8. IEEE 85 - Test Procedure for Airborne Sound Measurements on Rotating Electric Machinery
9. IEEE 519 - IEEE Recommended Practices and Requirements for Harmonic Control in Electrical Power Systems
10. UL 845 - Motor Control Centers

SYSTEM DESCRIPTION

A. Design Requirements:

1. Provide variable frequency drives to vary the speed of NEMA standard, 3-phase, 240-volt, induction motors and driven equipment by varying the frequency and voltage applied to the motors.

2. Provide variable frequency drives that fit in the space shown. Units exceeding the dimensions shown will not be acceptable.

3. Provide variable frequency drives that automatically restart when power is restored after a power outage. Provide control logic so the drive is allowed to restart when power is restored.

B. Rated Output Power: Provide adjustable frequency drives with an output that is at least 3 percent greater than the driven motor's full nameplate rating.

C. Torque Output: Provide variable torque or constant torque output drives as required by driven equipment.

D. 6-Pulse Drive Technology: Provide adjustable frequency drives serving motors 75 HP or smaller utilizing 6-pulse drive technology.

E. Performance Requirements: Provide adjustable frequency drives to meet the following requirements of IEEE 519:

1. Total harmonic distortion THD (Voltage): Maximum of five percent for general distribution systems as measured at the point of common coupling.

2. Total current harmonic distortion: Not to exceed the values in Table 10.3, Current Distortion Limits for General Distribution Systems (120 V through 69000 V) of IEEE-519 at the point of common coupling.

3. Capacitor traps for controlling harmonics that require tuning to the power system are not acceptable.

4. Operate at a minimum efficiency of 95 percent at rated load.

5. Operate from a 240-volt, 3-phase, 60-hertz supply with a voltage variation of plus 10-percent or minus 20-percent and a frequency variation of plus or minus 2-hertz.

6. Input power factor: Maintain a 95 percent minimum power factor over a 20 to 100 percent speed range.

7. Operate an induction motor as specified, including a high-efficiency, high-power factor, premium-duty motor, with no detriment to motor life.

8. ADJUST THE VFD CARRIER FREQUENCY TO STRIKE A COMPROMISE BETWEEN MOTOR NOISE AND INSULATION STRESS.

9. Operate under the following ambient conditions:

   a. Ambient Temperature: 0 to 50 degrees C
   b. Humidity: 0 to 95 percent

SUBMITTALS

A. General: Furnish all submittals, including the following, as specified in the Specific/General Provisions.

B. Product Data and Information: Furnish catalog data including rating and descriptive literature of all components and systems.

C. Shop Drawings: Furnish the following shop drawings customized for the project:

1. Bill of materials including manufacturers name and catalog number

2. Outline drawings showing dimensions, arrangement, elevations, identification of components and nameplate schedule for all units

3. Interconnection wiring diagrams

4. Individual schematic control diagrams for each unit

5. One line diagrams

6. Obtain and enter full performance data for all motors shown

7. Certification that the variable frequency drives are compatible with the motors and the equipment loads to be driven

D. Quality Control: Furnish test reports, certificates of inspection and manufacturer's instructions.

E. Operations and Maintenance Manuals: Furnish operations and maintenance manuals as specified in the Specific/General Provisions.

QUALITY ASSURANCE

A. Standards: Provide all variable frequency drives manufactured in accordance with referenced standards.

B. UL Label: Provide a UL Inc. Label or certification of listing by C.S.A. or other recognized testing organization for each adjustable frequency drive.

C. Codes: Manufacture and install each adjustable frequency drive in accordance with the NEC and local codes.

DELIVERY, STORAGE, AND HANDLING

A. General: Deliver, store and handle all products and materials as specified in the Specific/General Provisions.

B. Shipping and Packing: Rigidly brace and protect against weather, damage, and undue strain, all structures, equipment and materials.

C. Storage and Protection: Furnish clean storage facilities for all equipment delivered but not installed. Provide conditioned air for storage facilities in accordance with the equipment manufacturer's recommendations.

D. Spare Parts: Furnish spare parts at the same time as pertaining equipment. Deliver the spare parts to the City after completion of the work.

SPARE PARTS

A. General: Furnish the following spare parts per each group of similar sized units.

1. All parts recommended by the manufacturer in published literature as spare parts. As a minimum, provide the following:

a. Six (6) each of each type of fuse used.

b. One (1) of complete variable frequency drive for City of St. Pete Beach replacement inventory.

B. Packaging: Package spare parts in containers bearing labels and identify all spare parts for reordering. Deliver spare parts in original factory packages.

PRODUCTS

MANUFACTURERS

A. Acceptable Manufacturers: Acceptable manufacturers are listed below. Other manufacturers are not acceptable.

1. Yaskawa

MODEL

A. Acceptable Model: 2A0040FAA. Other models are not acceptable.

DESIGN

A. Converter Section: Provide input section that converts 240-volts, 60-hertz, 3-phase input to a fixed dc voltage using diodes, bridged rectifiers or SCR's.

B. Filter Sections: Provide dc link reactor and filter capacitors as required.

C. Inverter Section: Provide variable frequency drive inverter section that converts the fixed dc voltage to an adjustable frequency output utilizing a pulse-width modulation inverter. Maintain constant volts per hertz ratio on the output with voltage boost for startup as required.

D. Digital Control Devices: Provide a digital operator keypad located on the front door of the Pump Control Panel to allow setting of all programmable parameters and the following control functions:

1. Speed control settings
2. Speed meter with hertz and 0-100 percent scales
3. Output ammeter
4. Diagnostics package with fault indication and reset push button

E. Control Features: Provide a control system for each drive that allows the following functions:

1. Remote, isolated 4-20 ma speed control input
2. Isolated 4-20 ma speed output
3. Alarm outputs
4. ON/OFF status output
5. Additional features and controls as specified with the driven equipment

F. Internal Control Adjustments: Include the following control adjustments for each drive:

1. Acceleration time, 4 to 60 seconds
2. Deceleration time, 4 to 60 seconds
3. Minimum speed limit
4. Maximum speed limit
5. Inverter current limit
6. Supply undervoltage trip

G. Protection Features: Provide the following drive protection features:

1. Input line current limiting fuses rated 200,000 rms symmetrical amperes short circuit current.

2. Electronic overcurrent protection for instantaneous overload

3. AC input line undervoltage protection, adjustable from 60-100 percent nominal voltage with time delay adjustment and low speed override.

4. Over frequency protection

5. Phase loss protection

6. DC overvoltage protection

7. Logic supply voltage low level protection

8. Line-to-line and line-to-ground output short circuit protection

9. Line-to-line and line-to-ground surge arresters sized for 480-volt 3-phase grounded wye system

10. Overload capability of 110% of the motor FLA based on the NEC ratings for 60 seconds

11. Control circuit fuses

12. Overtemperature protection

13. Diagnostics module to indicate protection trip conditions

COMPONENTS

A. Power Solid State Components: Provide power solid state switching components with a one minute current rating greater than 110 percent of rated current for variable torque drives or 150 percent of rated current for constant torque drives.

B. Printed Circuit Boards: Apply a clear conformal coating of acrylic to all printed circuit boards.

WIRING:

A. General: Provide internal wiring with stranded switchboard wire having 600-volt rated, flame-resistant, type SIS insulation. Use No. 14 AWG wire for control interconnections. Provide power connections as required for the service.

B. Wire Marker: Provide wire markers at each end of all wires.

C. Wiring to Door Mounted Devices: Where wiring connections are made to equipment mounted on hinged doors, provide connections with extra flexible wires suitably cabled together and cleated.

D. Terminal Blocks: Provide wiring of all control connections to all external connections through individual, positive-latch, pull-apart type control terminal blocks rated 600-volts. Locate terminal blocks for front access.

E. Terminal for External Connections: Provide sufficient terminals for all devices external to the adjustable frequency drive.

SOURCE QUALITY CONTROL

A. Shop Test: Shop test each variable frequency drive in accordance with IEEE and NEMA standards, including high potential tests and other standard tests for that particular class of equipment. Notify the City fourteen (14) days prior to start of factory testing so that the City, at his option, may witness the testing.

1. After final assembly, test each variable frequency drive at full load with application of line-to-line and line-to-ground bolted faults and show that the adjustable frequency drive trips electronically without device failure.

2. After all tests have been performed, burn-in each adjustable frequency drive for 40 hours at 100 percent inductive or motor load.

3. After the burn-in cycle is complete, subject each adjustable frequency drive to a 30 minute cycling motor load test before inspection and shipping.

B. Operational Tests: After the equipment has been completely assembled, perform operational test to determine operating conditions and circuit continuity. Provide pushbuttons and selector switches to simulate all control input contacts and indicating lights to indicate all control outputs. Provide a 4-20ma signal generator to simulate analog signals.

EXECUTION

INSTALLATION

A. General: Install all equipment in accordance with the manufacturer's recommendations and approved shop drawings.

B. Protective Adjustments: Set all circuit breakers per the approved short circuit and coordination study.

C. Operational Adjustments: Set all operational devices for proper system operation.

D. Cable Connections: Terminate and label all field wiring per approved drawings.

FIELD QUALITY CONTROL

A. Inspections: Inspect, adjust and check the installation for physical alignment, cable terminations and ventilation.

B. Tests: Perform the following field tests:

1. Close and open each circuit breaker to test operation

2. When site conditions permit, energize and de-energize each equipment item served by each drive, testing the complete control sequence of each item including acceleration and deceleration over complete operating range.

3. Operate each variable frequency drive with driven equipment at full load and test for hot spots.

4. Test Reports: Furnish detailed test reports of all tests indicating test performed, discrepancies found, and corrective action taken.

C. Manufacturer's Field Services Representative: Provide the services of a factory-trained service engineer, specifically trained on the variable frequency equipment to assist in installation, start-up, testing, calibration, placing into operation and provide training as specified in the Specific/General Provisions.

1. Provide a service engineer when each drive is placed into operation.

2. Provide a service engineer at the jobsite as often as necessary until all problems are corrected and the equipment installation and operation are satisfactory.

3. Following completion of installation and field testing provide training for 6 employees of the City in the proper operation, troubleshooting and maintenance of the equipment as outlined below. All training will be at the City's facilities at a time agreeable to the City:

a. Operational Training: A minimum of two 4-hour sessions combining both classroom and hands-on instruction, excluding travel time.

b. Maintenance Training: A minimum of two 4-hour sessions combining both classroom and hands-on instruction, excluding travel time.

26.17 WARRANTY

A. Provide a warranty for all the electrical equipment in accordance with the requirements of other Sections. Under no circumstances shall the warranty be for less than one year starting from substantial completion.

26.18 TESTS AND INSPECTIONS

GENERAL

SCOPE OF WORK

A. The CONTRACTOR shall arrange for all inspections required by the local authority having jurisdiction. Approval of the installation by any such local authority shall not relieve the CONTRACTOR of any portion of his responsibility for adequate performance of the completed installation.

SUBMITTALS

A. The CONTRACTOR shall furnish at least two copies of test records to the ENGINEER. At the completion of all tests specified herein and any others required to make operational all equipment, all records shall be viewed by the CONTRACTOR, then transmitted directly to the ENGINEER. All prints shall be corrected and verified for corrections of in-field changes by the CONTACTOR prior to submittal.

PREPARATION

A. After completion and prior to being energized, the electrical installation shall be tested to the extent necessary to demonstrate that all systems are complete and ready for operation. The CONTRACTOR shall notify the ENGINEER and the OWNER for the final inspection prior to energizing the system.

B. The CONTRACTOR shall furnish all necessary test equipment to satisfactorily perform all tests specified herein or required by applicable codes and standards.

TESTING

A. The CONTRACTOR shall test all wire, cable, equipment, and systems installed or connected under the Agreement to assure proper installation, settings, connection, and functioning in accordance with the Contract Drawings, Specifications and the manufacturer's recommendations.

B. When conducting tests the CONTRACTOR shall:

1. Include all tests and inspections recommended by the equipment manufacturer and applicable Codes and Standards.

2. Include any additional tests required by the ENGINEER that he deems necessary because of field conditions to determine that equipment, material, and systems meet the requirements of the Specifications.

3. Maintain in quadruplicate a written record of all tests showing date, personnel conducting tests, equipment or material tested, tests performed, manufacturer and serial number of testing equipment and results.

C. Tests to be accomplished as a minimum are as follows:

1. Control Panels: provide temporary power source to all control circuits and check for proper operation prior to energizing equipment served.

2. Wires and Cables:

a. High-potential test shall be conducted on all service entrance conductors. The insulation resistance between conductors and also between conductors and ground shall be measured.

b. All other cables and wires shall be checked for continuity and shall be determined to be free of grounds prior to energizing.

3. Motor Test: Motor rotation will be checked by momentary energizing of motor. Correction of rotation shall be made by changing leads on the motor. Motors shall only be energized in the presence of a representative of the OWNER.

4. Check phase rotation on all bussing. Phasing shall be A-B-C, left to right, top to bottom, front to rear, as viewed from the front.

D. CONTRACTOR shall be responsible for any damage to equipment or material due to improper test procedures or test apparatus handling and shall replace or restore to original condition any damaged equipment or material.

E. CONTRACTOR shall furnish and use safety devices such as rubber gloves and blankets, protective screens, barriers, and danger signs to adequately protect and warn all personnel in the vicinity of the tests.

DEMONSTRATION OF COMPLETED ELECTRICAL SYSTEMS

A. Upon the completion of the installation and testing, the CONTRACTOR shall demonstrate and familiarize representatives of the OWNER with the system.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 30

DIESEL ENGINE DRIVEN GENERATOR WITH WEATHERPROOF ENCLOSURE

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. Furnish all labor, materials, equipment and incidentals required to install, put into operation, and field test the weatherproof diesel engine driven generator unit and appurtenances as shown on the Drawings and specified herein.

B. These Specifications are intended to give a general description of what is required, but do not cover all details which will vary in accordance with the requirements of the equipment as offered. It is, however, intended to cover the furnishing, the shop testing, and delivery and complete installation and field testing, of all materials, equipment and appurtenances for the complete units as herein specified, whether specifically mentioned in these Specifications or not.

C. For the unit there shall be furnished and installed all necessary and desirable accessory equipment and auxiliaries whether specifically mentioned in these Specifications or not. This installation shall incorporate the highest standards for the type of service shown on the Drawings. The CONTRACTOR is responsible for field testing of the entire installation and instruction of the regular operating personnel in the care, operation and maintenance of all equipment.

1.02 DESCRIPTION OF SYSTEM

A. The engine-generator set shall be mounted as shown on the Drawings and shall be arranged for automatic starting and stopping, and load transfer upon failure of the normal source of power. The unit controls shall provide for automatic exercising on a weekly basis.

1.03 QUALIFICATIONS

A. The proposed generator shall be a Caterpillar Package. Caterpillar generators are Standardized equipment and “or equal” generators will not be considered.

B. It is the intent of this specification to secure a generator system that have been prototype tested, factory built, production tested, site tested and of the latest commercial design, together with all accessories necessary for a complete installation as shown on the plans and drawings, and specifications herein. The equipment supplied and installed shall meet the requirements of the NEC, along with all applicable local codes and regulations. All equipment shall be new, of current production of a national firm which manufactures the engine/generators and controls, and assembles the generator systems as a matched unit so that there is one-source responsibility for warranty, parts, and service through a local representative with factory-trained servicemen.

C. Due to limited physical dimensions available at the site the unit must have the exact

physical dimensions as follows:

1. Generator set and sound attenuated enclosure – 167 inches long by 48.5 inches wide by 93 inches tall.

D. The unit shall be shipped to the jobsite by an authorized engine dealer having a parts and service facility within a 50 mile radius of the jobsite. In addition, and in order not to penalize the OWNER for unnecessary or prolonged periods of time for service or repairs to the emergency system, the bidding generator set supplier must have no less than eighty percent (80%) of all engine replacement parts locally available at all times. Certified proof of this requirement shall be furnished to the ENGINEER upon request.

E. All materials and parts comprising the unit shall be new and unused, of current manufacture, and of the highest grade, free from all defects or imperfections. Workmanship shall conform to the best modern practices. Only new and current models will be considered. The units offered under these Specifications shall be the product of a firm regularly engaged in the production of engine-generator equipment and shall meet the requirements of the Specifications set forth herein. Major exceptions to Specifications will be considered sufficient cause for rejection of the machines.

F. The generator set shall be listed to UL 2200.

G. The Engine/Generator Unit shall be as follows:

1. Engine/generator unit shall be a Caterpillar C2.2 diesel generator, 30KW. The unit shall operate at 240V, 0.8 power factor.

1.04 SUBMITTALS

A. Submittals shall include prototype test certification and specification sheets showing all standard and optional accessories to be supplied, schematic wiring diagrams, dimension drawings, and interconnection diagrams identifying by terminal number each required for interconnection between the generator set and the transfer switch included elsewhere in these specifications.

B. The successful bidder shall submit to the ENGINEER for review in accordance with other sections, complete sets of installation drawings, schematics, and wiring diagrams which shall show details of installation and connections to the work of other Sections, including foundation drawings showing location and size of foundation bolts for the pad type vibration isolators and brochures covering each item of equipment.

C. In the event that it is impossible to conform with certain details of the Specifications due to different manufacturing techniques, describe completely all nonconforming aspects.

D. The submittal data for each engine/generator set and sound attenuated, weatherproof enclosure shall include, but not necessarily be limited to, the following:

1. Installation drawings showing plan and elevations of the complete generator unit; foundation plan; exhaust silencer; starting battery; battery charger; and sound attenuated, weatherproof enclosure.

2. Engine Data:

a. Manufacturer
b. Model
c. Number of cylinders
d. RPM
e. Bore x stroke
f. BMEP at full rated load
g. Make and model and descriptive literature of electric governor
h. Fuel consumption rate curves at various loads
i. Engine continuous pump drive duty rating (without fan) HP
j. Gross engine horsepower to produce generator standby rating (including fan and all parasitic loads) HP

3. Generator Data :

a. Manufacturer
b. Model
c. Rated KVA
d. Rated SKVA
e. Rated KW
f. Voltage
g. Temperature rise above 40° C ambient
   i) Stator by thermometer
   ii) Field by resistance
   iii) Class of insulation

h. Generator efficiency, including excitation losses, at 80% power factor
   i) Full load
   ii) ¾ load
   iii) ½ load

4. Generator Unit Control Data:

a. Actual electrical diagrams including schematic diagrams, and interconnection wiring diagrams for all equipment to be provided. Standard preprinted sheets are not acceptable.

b. Legends for all devices on all diagrams.

c. Sequence of operation explanations for all portions of all schematic wiring diagrams.

5. Engine/Generator Unit and Sound Attenuated, Weatherproof Enclosure: Dimensional data shall be given for each Engine/Generator set and for the weatherproof enclosure.

a. Weight of skid mounted unit
b. Overall length
c. Overall width
d. Overall height
e. Exhaust pipe size
f. CFM of air required for combustion and ventilation
g. Heat rejected to jacket water and lubricating oil - BTU/hr.

h. Heat rejected to room by engine and generator - BTU/hr.
i. Weatherproof enclosure details and certification of manufacturing method per specifications.
j. Data on all miscellaneous items supplied.
h. The generator enclosure and subbase diesel tank submittal shall include wind load calculations and anchorage calculations. All calculations shall be in accordance with the Florida Building Code (FBC).

6. Furnish the number of copies required of the MANUFACTURER'S certified shop test record of the complete engine driven generator unit.

7. Warranty information.

8. Submit to the ENGINEER operating and maintenance data.

9. Submit to the ENGINEER the equipment MANUFACTURER'S Certificate of Installation, Testing, and Instruction.

10. Submit to the ENGINEER the written warranty as required below.

1.05 TESTING:

A. To assure that the equipment has been designed and built to the highest reliability and quality standards, the manufacturer and local representative shall be responsible for three separate tests: design prototype tests, final production tests, and site tests.

B. Design Prototype Tests: Components of the system such as the engine/generator set and accessories shall not be subjected to prototype tests since the tests are potentially damaging. Rather, similar design prototypes and preproduction models, which will not be sold, shall have been used for the following tests. Prototype test programs shall include the requirements of NFPA 110 and the following:

1. Maximum power (KW).

2. Maximum motor starting (KVA) instantaneous voltage dip.

3. Alternator temperature rise by embedded thermocouple and by resistance method per NEMA MG1-2240 and 16.40.

4. Governor speed regulation under steady-state and transient conditions.

5. Voltage regulation and generator transient response.

6. Fuel consumption at 1/4, ½, 3/4, and full load.

7. Harmonic analysis, voltage waveform deviation, and telephone influence factor.

8. Three-phase short circuit tests.

9. Alternator cooling air flow.

10. Torsional analysis testing to verify that the generator set is free of harmful torsional stresses.

11. Endurance testing.

C. Final Production Tests: Each generator set shall be tested under varying loads with guards and exhaust system in place. Tests shall include:

1. Single-step load pickup.

2. Transient and steady-state governing.

3. Safety shutdown device testing.

4. Voltage regulation.

5. Rated power.

6. Maximum power.

7. Upon request, arrangements to either witness this test will be made, or a certified test record will be sent prior to shipment.

1.06 SPECIAL TOOLS AND SPARE PARTS

A. Furnish one (1) set of all special tools required for normal operation and maintenance of the equipment being furnished. Furnish suitable steel tool chests complete with locks and duplicate keys.

B. The MANUFACTURER shall furnish two (2) complete spare replacement sets of all filter elements required for each generator unit supplied.

C. The MANUFACTURER shall furnish one (1) complete set of belts required for each generator unit supplied.

PART 2 - PRODUCTS

2.01 RATINGS

A. The standby rating of the generator sets shall not exceed the MANUFACTURER's published prime rating by more than 10%. The gross engine horsepower required to produce the standby ratings shall not exceed the MANUFACTURER's published continuous duty rating by more than 150 percent. Continuous duty rating shall be as defined in BS649 or DIN6270 but in no case shall it exceed the MANUFACTURER's published continuous duty rating for the engines as used in continuous rated pump drive applications. The gross engine horsepower required for the generator set standby ratings described above shall include all parasitic demands such as generator inefficiencies, fuel pumps, water pumps, radiator fan (for fan cooled models) and all accessories necessary to the unit's proper operation while operating at rated load and at a rotative speed not to exceed 1800 rpm.

B. The diesel engine driven generator set shall be capable of producing the specified standby KW rating for continuous electrical service during interruption of the normal utility source and shall be certified to this effect by the MANUFACTURER for the actual unit supplied.

C. The Diesel Engine/Generator Units shall be 30kW (240 volts, 3-Phase, 4-wire, 60 Hertz) at 0.8 power factor with fan.

2.02 ENGINES

A. The engine shall be full compression ignition, four cycle, single acting, solid injection engine, either vertical or "V" type. Speed shall not exceed 1800 revolutions per minute at normal full load operation. Multi block engines are not allowed. The engine governor shall be electronic type with a +/- 0.5 percent accuracy.

B. The engine shall be capable of satisfactory performance on No. 2 fuel oil (ASTM Designation D396). Diesel engines requiring a premium fuel will not be considered.

C. The engine shall be capable of operating at light loads for extended periods of time and shall provide a means to reduce carbonization. Periodic cleaning of exhaust ports shall not be required.

D. The engine shall be equipped with fuel filters, lube oil filters, intake air filters, lube oil cooler, fuel transfer pump, fuel priming pump, service meter, engine driven water pump, and unit mounted instruments. Unit mounted instruments shall include a fuel pressure gauge, water temperature gauge, and lubrication oil pressure gauge. The engine shall be provided with low oil pressure, high water temperature, low coolant level and overspeed safety shutdowns of the manual reset type. Additional instruments and safety shutdowns shall be provided as noted herein.

E. Injection pumps and injection valves shall be a type not requiring adjustment in service and shall be of a design allowing quick replacement by ordinary mechanics without special diesel experience. The engine shall have an individual mechanical injection pump and injection valve for each cylinder, any one of which may be removed and replaced from parts stock. Fuel injection pumps shall be positive action, constant-stroke pumps, activated by a cam driven by gears from the engine crankshaft. Fuel lines between injection pumps and valves shall be of heavy seamless tubing.

F. The fuel system shall be equipped with fuel filters having replaceable elements. Filter elements shall be easily removable from their housing for replacing without breaking any fuel line connections, or disturbing the fuel pump, or any other part of the engine. All fuel filters shall be conveniently located in one accessible housing, ahead of the injection pumps so that the fuel will have been thoroughly filtered before it reaches the pump. No screens or filters requiring cleaning or replacement shall be used in the injection pump or injection valve assemblies. The engine shall be equipped with a built-in gear-type, engine-driven fuel transfer pump, capable of supplying fuel through the filters to the injection pump at constant pressure.

G. In addition to the standard fuel filters provided by the engine MANUFACTURER, there shall also be installed a primary fuel filter and a water separator in the fuel inlet line to the engine.

H. The engine shall have a gear-type lubricating oil pump for supplying oil under pressure to main bearings, crank pin bearings, pistons, piston pins, timing gears, camshaft bearings, valve rocker

mechanism and governor. Effective lubricating oil filters shall be provided and so located and connected that all oil being circulated is continuously filtered and cleaned. Filters shall be accessible, easily removed and cleaned and shall be equipped with a spring-loaded by-pass valve as an insurance against stopping of lubricating oil circulation in the event the filters become clogged. The engines shall have a suitable water cooled lubricating oil cooler.

I. The engine shall be provided with one or more engine mounted dry type air cleaners of sufficient capacity to protect effectively the working parts of the engine from dust and grit.

J. During the initial start of the engine, a system shall be provided to pre-lube at low idle speed. When the internal oil pressure reaches a predetermined safe value, the engine will then increase to generator set operation speed.

K. Mounting: The unit shall be mounted on a structural steel sub-base and shall be provided with pad type vibration isolators.

L. The engine shall be EPA Tier 2 certified.

2.03 COOLING SYSTEMS

A. The engine shall be furnished with a unit mounted radiator-type cooling system having sufficient capacity for cooling the engine when the diesel generator set is delivering full rated load in an ambient temperature not to exceed 110 degrees F. The engines shall be provided with a thermostatic valve placed in the jacket water outlet between the engine and the cooling source. This valve shall maintain the proper jacket water temperature under all load conditions. Total air restriction from the radiator shall not exceed 0.5 inches of water at both inlet and outlet. A flexible connecting section shall be provided between the radiator and discharge louver frame.

B. Closed circuit jacket water system shall be treated with a rust inhibiter as recommended by the engine MANUFACTURER.

C. The expansion tank of the radiator shall be fitted with a low water level switch and wired into the safety shutdown system of the unit.

2.04 GENERATOR, EXCITER AND ACCESSORIES

A. Rating: The generator's KW ratings shall be as indicated in these specifications, 0.8 p.f., 1800 RPM, 3 phase, 4-wire, 60 Hertz, 240 volts, 12 leads, with a maximum temperature rise of 130 degrees C (both armature and field) by resistance at full rated load in ambient air of 40 degrees C. The generator shall conform to NEMA Standard MG-1.

B. Performance: The instantaneous voltage dip shall not exceed 15 percent of rated voltage when any load is applied. Recovery of stable operation shall occur within 5 seconds. Steady state modulation shall not exceed + ½ percent.

C. Construction:

1. The generator and exciter shall be dripproof, with split sleeve, or ball race bearings. A shaft-mounted brushless exciter shall be a part of the assembly. The stator cores shall

be built up of high grade silicon steel laminations precision punched, and individually insulated. Armature lamination followers and frame ribs shall be welded integral with the frames for support of the stator core. A directional blower shall be mounted on the unit to draw cooling air from the exciter and over the rotor poles and through louvered openings on the opposite end.

2. The exciter shall be a shaft driven PMG pilot exciter feeding the main's exciter, fast response type, with a rotating 3-phase full-wave bridge. The exciters shall have a low time constant and large capacity to minimize voltage transients under severe load changes.

3. The alternator shall be salient-pole, brushless, 12-lead reconnectable, self-ventilated of drip-proof construction with amortisseur rotor windings and skewed stator for smooth voltage waveform. The insulation shall meet the NEMA standard (MG1-33.40) for Class H and be insulated with epoxy varnish to be fungus resistant per MIL 1-24092. Temperature rise of the rotors and stators shall be limited to 130° C. The excitation systems shall be of brushless construction controlled by a solid-state voltage regulator capable of maintaining voltage within +/- 0.25% at any constant load from 0% to 100% of rating. The regulators must be isolated to prevent tracking when connected to SCR loads, and provide individual adjustments for voltage range, stability and volts-per-hertz operations; and be protected from the environment by conformal coating.

4. Generator rotor poles shall be built up of individually insulated silicon steel punchings. Poles shall be wound and bonded with high strength epoxy resin. Cage connections to the amortisseur rings shall be brazed for strong construction and permanent electrical characteristics. Each pole shall be securely bolted to the rotor shaft with bolts sized for the centrifugal forces on the rotor. Generator windings shall be braced for full line to ground fault currents, with solidly grounded neutral system.

D. Accessories and Attachments

1. Low Voltage Terminal Boxes: The generators shall have separate AC and DC low voltage terminal boxes with suitably numbered terminal strip for required connections.

2. Engine Water Heater: Thermostatically controlled and sized to maintain the manufacturer's recommended engine coolant temperature to meet start-up requirements of NFPA-99 and NFPA-110, Level 1. Power supply shall be 240 volts single phase.

3. Anti-condensation heater: Sized to prevent the accumulation of moisture or dampness in the alternator windings. Power supply shall be 120 volts single phase.

E. Generator Associated Controls:

1. Voltage Regulator:

i) The generator MANUFACTURER shall furnish a hermetically sealed, silicon controlled rectifier type voltage regulator employing a zener reference with a +1 percent regulation for the generator. The regulators shall include 3-phase voltage sensing, automatic short circuit protection and shall include automatic

underfrequency protection to allow the generator to operate at no load at less than synchronous speed for engine start-up and shutdown procedures. Switches and/or fuses shall not be used to provide this protection. An over-voltage sensing module with manual reset shall be furnished with the regulator. A volts per Hz., sensing module shall be provided as part of the regulation system.

ii) A voltage adjustment rheostat for 5 percent voltage adjustment on the unit shall be provided.

iv) High voltage step-down potential transformers shall be provided for the voltage regulator power input and sensing circuits if required.

2. Sustained Short Circuit: A permanent magnetic exciter shall be provided on the unit for sustaining a current of 300 percent during a short circuit, permitting the generator breaker to trip on overload. To prevent possible overheating of the armature windings, appropriate relaying shall be supplied to limit the fault to ten seconds.

2.05 SOUND ATTENUATED, WEATHER-PROTECTIVE ENCLOSURE

A. The intent of this Specification is to provide the OWNER with sound attenuated, weatherproof type generator set enclosures complete in every detail and requiring no additional in-field modifications or assembly, except where specifically allows by these Specifications. The enclosure is to be accurately dimensioned so as to be in compliance with the National Electrical Code (NEC), and the National Fire Protection Association (NFPA) for clearance of all specified items included therein, and all applicable fire codes for a structure and application of this type.

B. The enclosure shall conform to the following construction and design criteria as set forth.

1. Rigidity wind test equal to 150 MPH
2. Roof load equal to 75 lbs. per sq. ft.
3. Rain test equal to 4" per hour
4. Designed to Florida Building Code (FBC) and be provided with a Florida Department of Community Affairs Modular Building Insignia
5. Four (4) copies of drawings signed and sealed by a Florida Professional Engineer.
6. Note: An impact rated enclosure will be required.

C. Enclosure shall consist of a roof, two (2) sidewalls, two (2) end walls, and be manufactured of formed aluminum components. The enclosure is to be provided with a means for securely attaching the entire structure to the base/fuel tank as specified within.

D. Sidewalls and end walls shall be of formed 0.125 marine grade aluminum (the roof shall be 0.080”). The roof is to be bolted to both side and end walls to form a complete weather and wind resistance assembly.

E. Wall framing shall be incorporated in the panels by forming an open back box structure. Skin material shall be minimum thickness .080” 3003 grade aluminum. Enclosure shall have a baked on powder-coat finish for maximum corrosion resistance. Exterior skin panels shall be integral to the wall

structure and not separate pieces riveted onto framing members. Wall panels shall be no wider than 36" each and shall be removable without the use of special tools. Wall and roof panels shall be designed so that field replacement can be accomplished without disassembly of the entire structure if damage should occur.

F. A minimum of sixteen colors shall be available for enclosure exterior. Standard enclosure exterior color is WHITE unless otherwise specified.

G. Roof assembly shall be cambered to aid in rainwater runoff. Roof applications assemblies are to be mechanically fastened to the vertical wall sections. Glued or crimped roofs shall not be allowed nor considered as an acceptable alternative.

H. Air handling shall be as follows: Air will enter the enclosure through a Hood, Plenum or Sound Attenuated Louvers/Baffles, as determined by the specific application and shall allow for the airflow demand for proper cooling to generator set package. The cooling air Inlet system shall prevent water intrusion into the enclosure with the generator set operating at full rated load while allowing for a maximum air restriction of less than 0.30" H2O. Radiator Discharge shall be

through a gravity operated extruded aluminum backdraft type damper and into a vertical discharge plenum or hood. Discharge plenum/hood shall discharge air upward and be provided with a means to positively drain any and all water entering the discharge device. Air discharge devices shall in no event restrict airflow by more than 0.25" H2O. To ensure adequate airflow for cooling and combustion the static restriction over the entire system shall not exceed 0.50" H2O. Both Intake and Discharge hoods and plenums shall be provided with removable bird/rodent screening to prevent the entrance of debris, birds, rodents and other vermin.

I. All interior sidewalls shall contain non-asbestos thermal acoustic insulation with fire retardant properties. The insulation shall be completely covered by mill finish 0.050" perforated aluminum lining secured to the enclosure interior.

J. Four-point lifting provisions shall be provided and have sufficient capacity suitable for rigging the entire Enclosure assembly.

K. A minimum of two (2) single access doors shall be provided. Doors shall be manufactured of the same material as enclosure. Doors shall be fully gasketed to form a weather tight perimeter seal. Door hinges shall be full length stainless steel piano type and shall be attached with stainless steel hardware. Door handles shall be of a corrosion resistant material and shall provide for a lockable, secure entry point into the enclosure. Doors shall be insulated with no less insulation than is provided in the enclosure walls for sound attenuation.

L. Enclosure manufacturer shall provide all necessary hardware to internally mount the exhaust silencer(s) specified herein. Silencer mounting hardware shall maintain the weatherproof integrity of the enclosure system. If the silencer is mounted internally it should discharge upward into the radiator discharge plenum or hood where possible, otherwise the enclosure manufacturer shall provide an aluminum rain collar and rain dress shield. Rain Collar and Dress Shield shall be manufactured of aluminum or stainless steel and designed as a circular fabricated part that does not require hole indexing by the installing contractor during site installation.

M. As a minimum the enclosure shall provide an average 35db(A) sound reduction as measured at

one meter, five feet above grade level under free field conditions to allow for a maximum of 75db(A) at 5 meters from the enclosure.

N. Enclosure must bear the Florida Department of Community Affairs Modular Building Insignia.

O. The enclosure shop drawing submittal shall include wind load and anchorage calculations in accordance with the latest FBC.

P. Electrical Package:

1. Lights to be controlled by 3-way switches located at each of the doors.

2. Coolant Heater

3. Anti-condensation heater

4. Engine Starting Battery Charger

5. Emergency Stop Pushbutton : Provide a NEMA 4X SS, Red, Mushroom-head emergency pushbutton that will immediately stop the generator upon activation. Provide a placard above the pushbutton to read “Generator Emergency Shut Down”. Refer to drawings for pushbutton and placard location and details.

Q. Due to limited physical space available at the site, the unit must have the physical dimensions as follows:

1. Entire assembly of enclosure and sub base diesel fuel tank shall not exceed 167 inches in length. The assembly shall not exceed 48.5 inches in width.

2.06 EXHAUST SYSTEMS

A. Exhaust Silencers - A critical type, side inlet, end outlet, Miratech or equivalent silencer and a flexible stainless steel exhaust fitting properly sized shall be furnished and installed according to the MANUFACTURER's recommendation. Mounting shall be provided by the CONTRACTOR as required. The silencers shall be mounted so that its weight is not supported by the engine nor will exhaust system growth due to thermal expansion be imposed on the engine. Exhaust pipe size shall be sufficient to ensure that exhaust back pressure does not exceed the maximum limitations specified by the engine MANUFACTURER. So called "spiral" or truck mufflers are disallowed and will not be considered as equal to the industrial quality silencers specified above.

B. The silencers shall be fitted with a tail pipe extension and rain cap to prevent the entrance of rainwater.

C. Rain Skirt - At the point where the exhaust pipe flexible tubing penetrates the roof of the enclosure, a suitable "rain skirt" and collar shall be provided by the MANUFACTURER. It shall be designed to prevent the entrance of rain and allow for expansion and vibration of the exhaust piping without chafing or stress to the exhaust system. This detail must appear on the drawings submitted for approval.

2.07 AUTOMATIC STARTING SYSTEM

A. Starting Motor - A DC electric starting system with positive engagement shall be furnished. The motor voltage shall be 12 volts.

B. Automatic Control - Fully automatic engine start-stop controls in the generator control panels shall be provided. Controls shall provide shutdown for low oil pressure, high water temperature, overspeed, overcrank, and loss of engine coolant. Alarms for approaching high water temperature and impending low oil pressure shall also be included. Controls shall include a 30-second single cranking cycle limit with lockout or a cyclic crank system with lockout and overcrank protection.

C. Batteries - A lead-acid storage battery set of the diesel starting type shall be provided. Battery voltage shall be 12 volts, and the battery set shall be rated no less than 90 ampere hours. Necessary cables and clamps shall be provided.

D. Battery Trays - battery trays shall be provided for the batteries and shall conform to NEC 480-7(b). It shall be constructed of fiberglass and so treated as to be resistant to deterioration by battery electrolyte. Further, construction shall be such that any spillage or boil-over of battery electrolyte shall be contained within the tray to prevent a direct path to ground.

E. Battery Chargers - A current-limiting, automatic 12 volt DC charger shall be furnished to automatically recharge batteries. Charger shall float at 2.17 volts per cell and equalize at 2.33 volts per cell. It shall include overload protection, silicon diode full wave rectifiers, voltage surge suppressor, DC ammeter, DC voltmeter, and fused AC input. AC input voltage shall be 120 volts, single phase. Amperage output shall be no less than ten (10) amperes. Chargers shall be wall mounting type in NEMA 1 enclosure, and U.L. listed as an industrial control panel. The chargers shall be as manufactured by SENS per NFPA 110 and U.L. 508. The chargers shall be mounted and wired within the enclosure for the generator set by enclosure manufacturer.

2.08 MAIN LINE CIRCUIT BREAKER

A. Type - Main line, 600 volt, 80% rated, molded case circuit breaker mounted upon and sized to the output of the generator shall be installed as a load circuit interrupting and protection device. It shall operate both manually for normal switching functions and automatically during overload and short circuit conditions.

B. The trip unit for each pole shall have elements providing inverse time delay during overload conditions and instantaneous magnetic tripping for short circuit protection. The circuit breaker shall meet standards established by Underwriters Laboratories, National Electric Manufacturers Association, and National Electrical Code.

C. Generator exciter field circuit breakers do not meet the above electrical standards and are unacceptable for line protection.

D. Circuit breaker shall have battery voltage operated shunt trip wired to safety shutdowns to open the breaker in the event of engine failure.

E. The rating of the circuit breakers shall allow the starting of full generator SKVA.

H. The circuit breaker enclosure, together with all specified circuit breakers, shall be designed for the specific generator set specified and be equipped with rear copper stabs, or load cable lugs and be finish painted to match the generator set.

2.09 GENERATOR CONTROL PANELS

A. Type - A generator-mounted, NEMA 1 type, vibration isolated, 14-gauge steel control panel shall be provided for the generator set.

B. Control panel shall be Caterpillar standard offering.

C. Regulation of NFPA 110 Level 2 shall apply for instrumentation, alarm and shutdown. The instrumentation panel shall include, but not necessarily be limited to:

1. Gages for engine: digital or analog gages with ± 2% full scale accuracy :

   a. Oil Pressure
   b. Engine Coolant Temperature
   c. Voltmeter for DC Battery

2. Gages for generator: digital or analog gages with ± 2% full scale accuracy :

   a. AC Ammeter : Dual range
   b. AC Voltmeter : Dual range
   c. Frequency Meter : Range of 45-65 Hz.

3. Elapsed Time Meter.

4. 0-3000 RPM Tachometer - digital or analog gage with ± 2% full scale accuracy.

5. A seven position phase selector switch with – OFF position to show meter display of current and voltage of each generator phase. This selector switch may be manual or push-button.

6. A power source with circuit protection – 12 or 24 VDC.

7. An AC interlock to prevent starter re-engagement with engine running.

8. DC circuit protection.

10. Eight (8) individual fault indicator lights for:

   a. Overcrank Shutdown – Red
   b. Overspeed shutdown – Red
   c. High Coolant Temperature – Red
   d. Low Engine Oil Pressure – Red
   e. High Engine Coolant Temperatire Prealarm – Yellow
   f. Low Engine Oil Pressure Prealarm – Yellow
   g. Low Fuel – Yellow

h. Run – Green

D. Switches and Controls

1. Rheostat for adjusting output voltage of the generator to ± 5% of nominal voltage.

2. Over voltage protection shutdown switch.

3. Emergency stop switch mounted on control panel.

4. Engine start switch – with Run, Off, Reset, Automatic positions.

5. Five minute engine cool down timer.

6. Cyclic cranking switch.

E. Dry contacts for remote generator running indication, remote generator fail indication and cranking battery low voltage indication wired to terminal strips. Refer to drawings for required conduit/conductors.

F. All electrical penetrations in any enclosure shall be properly sealed from the weather.

G. Digital or solid state meters or metering devices shall be acceptable as a substitute for the electromechanical devices specified.

H. Engraved, screw-on type nameplates will identify each function indicated without abbreviation of function description. So-called international symbols will not be acceptable substitutes for this mandatory requirement.

I. Timing Functions - All control panel timing functions shall be accomplished by metal encased, solid-state, plug-in timing relays with 2PDT output contacts rated for ten (10) amperes. All solid-state time delay relays shall be reverse polarity protected and shall not function or be damaged by the application of improper polarity. Open printed circuit board type time delay circuits will not be accepted.

J. Control Relays - All control relays shall be the 3PDT plug-in type with .187QC blade terminals rated for (10) amperes. Each relay shall be equipped with a manual push to operate check button, L.E.D. or neon visual indicator, and see-thru dust cover for contact inspection and protection. Exposed contact and octal base plug-in relays are not acceptable.

K. Relay Sockets - All relay sockets shall be of the molded thermoplastic type, suitable for snap mounting on standard D.I.N. rail. Relay sockets will have wire clamp type terminals for secure wire connections, and one (1) piece bus bar connectors between the actual relay blade and wire clamp terminal. Relay sockets shall be rated for fifteen (15) amperes at 300V. Printed circuit board type relay sockets and relay sockets with push-on quick connect terminals are not acceptable.

2.10 GENERATOR FUEL SYSTEM

A. UL 142, FDEP Sub Base Fuel Tank as follows:

1. Sub base diesel storage tank sized to provide a minimum of approximately 48 hours of runtime between refueling at full load.

2. 3/16” Mild Steel Secondary Tank.

3. Rupture Basin with FDEP Approved Leak Detection Switch (Madison M-7000 EQ#682).

4. Diesel Tank Level transmitter with 4-20mA output.

5. Mechanical Fuel Level Gauge (Visible at Fill Point).

6. Supply and Return Connections.

7. 2” Fill with Lockable Cap with FDEP spill containment.

8. Normal and Emergency Vent Fittings Installed Per UL 2085.

9. Low Level Fuel Alarm Switch (FPI LS1001 EQ#817). Set at 40% remaining capacity wired to Control Panel Terminal Strip.

10. High Level Fuel Alarm Switch (FPI LS1001 EQ#817). Set at 90% tank capacity wired to Control Panel Terminal Strip. Provide local red alarm light and local audible alarm to indicate high level during fueling

11. Cable Stub Up Opening Under Circuit Breaker.

12. Generator Mounting Pads.

13. Mounting provisions shall allow for a minimum 2” airspace between concrete slab and secondary tank to facilitate inspection and maintenance of tank bottom. Designs that do not incorporate spacing between the tank bottom and the concrete pad will not be accepted.

14. 2 Lifting Points per Side (4 Total) for Lifting Generator Set, Enclosure and Tank (Empty).

15. Tank coated with Two Part Epoxy Primer and painted Gloss Black.

16. Tank shall be provided with steps welded to the side of diesel tank to accommodate access to the interior of the enclosure.

17. Tank sealed and shipped under vacuum per Florida Administrative Code Chapter 62-762 and NFPA30.

18. Tank shall be manufactured by Phoenix Products of Jacksonville, Florida. Alternate manufacturers must provide submittal data to the OWNER and ENGINEER for approval no less than fourteen (14) calendar days prior to bid date in order to be considered. Submission of equipment does not guarantee approval. Submittals deemed unsatisfactory upon initial review will not be allowed to be modified and/or resubmitted

after initial review.

PART 3 - EXECUTION

3.01 GENERATOR SET FIELD QUALITY CONTROL

A. A factory authorized service representative of the product supplied, shall inspect all field assembled and installed components and make any necessary corrections to insure proper equipment operation. Any cost associated with this procedure shall be born by the contractor.

3.02 GENERATOR SET TRAINING AND DEMONSTRATION

A. A factory representative of the product shall provide the City's maintenance personnel with a thorough period of instruction and hands-on session regarding the operation, trouble shooting and maintenance of all components of the product. Typical training period : one hour.

B. At least seven business days of notice shall be given by the Contractor to the City for delivery, installation, testing training and demonstration of the product.

3.03 GENERATOR TESTING

A. The engine-generator sets shall be given the MANUFACTURER'S standard factory load test prior to shipment.

B. Prior to final acceptance of the generator set, all equipment furnished under this Section shall be field tested per NFPA 110 to show it is free of any defects and the generator set can operate satisfactorily under full load test using resistance type load banks (brine tanks not acceptable). Test shall be for four (4) continuous hours. Any defects which become evident at this time shall be corrected before acceptance.

B. An all-in-place static alignment check of all rotating components shall be made prior to first start-up, after unit is secured in place and all final connections are made.

D. Site Tests: An installation check, start-up and load test shall be performed by the manufacturer's local representative. The Engineer, regular operators, and the maintenance staff shall be notified of the time and date of the site test. The tests shall include:

1. Fuel, lubricating oil, an antifreeze shall be checked for conformity to the manufacturer's recommendations, under the environmental conditions present and expected.

2. Accessories that normally function while the set is standing by shall be checked prior to cranking the engine. These shall include: coolant heater, battery charger, anti-condensation heater, annunciator, etc.

3. Start-up under test mode to check for exhaust leaks, path of exhaust gases outside the building, cooling air flow, movement during starting and stopping, vibration during running, normal and emergency line-to-line voltage, and phase rotation.

4. Automatic start-up by means of simulated power outage to test remote-automatic

starting, transfer of the load, and automatic shutdown. Prior to this test, all transfer switch timers shall be adjusted for proper system coordination.

5. External load bank tests shall be performed with the following criteria:

   i) One (1) hour at 25% load
   ii) One (1) hour at 50% load
   iii) One (1) hour at 75% load
   iv) One (1) hour at 100% load

   Engine coolant temperature, oil pressure, and battery charge level along with generator voltage, amperes, and frequency shall be monitored throughout the load bank tests and a written report shall be provided to the OWNER and ENGINEER for record purposes. If, for any reason, any of the one hour load bank tests are interrupted, the associated test shall be repeated.

E. A final alignment check and/or adjustment shall be made successful completion of the load bank tests.

3.04 GENERATOR SET SPARE PARTS

A. The spare parts shall include, but not necessarily be limited to the following:

1. Six (6) Fuses of each type and size used.
2. One (1) Oil, air and fuel filter.
3. One (1) set of belts.
4. One (1) of each special tool or device, if any, required to maintain the generator set and included equipment.

3.05 WARRANTY

A. Equipment furnished under this Section shall be guaranteed against defective parts and workmanship under terms of the MANUFACTURER'S and dealer's warranty. But, in no event, shall it be for a period of less than five (5) years and 2,500 operating hours from date of acceptance of the system by the city of Tampa and shall include labor, parts and travel time for

necessary repairs at the job site. Submittal data received without written warranties as specified will be rejected in their entirety.

END OF SECTION

SECTION 16050

ELECTRICAL - GENERAL PROVISIONS

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. Furnish all labor, materials, equipment and incidentals required for complete electrical system for the City of St. Pete Beach's Lift Station Rehabilitation as hereinafter specified and shown on the Drawings.

B. The work, apparatus and materials, which shall be furnished under these Specifications and accompanying Drawings, shall include all items listed hereinafter and/or shown on the Drawings. Certain equipment, which will require wiring thereto and/or complete installation, is indicated. All materials necessary for the complete installation shall be furnished and installed by the CONTRACTOR to provide complete power, lighting, instrumentation, wiring and control systems as indicated on the Drawings and/or as specified herein.

C. The CONTRACTOR shall furnish and install the necessary cables, protective devices, conductors, supports, raceways, exterior electrical system, etc., to serve lighting loads and miscellaneous electrical loads as indicated on the Drawings and/or as specified. The CONTRACTOR shall install any control panel provided under this or any other sections on the specifications.

D. The work shall include complete testing of all equipment and wiring at the completion of the work and making any minor connection changes or adjustments necessary for the proper functioning of the system and equipment. All workmanship shall be of the highest quality; sub-standard work will be rejected.

E. For process instrumentation furnish and install all conduit, wire and interconnections between primary elements, transmitters, local indicators and receivers.

F. It is the intent of these Specifications that the electrical system shall be suitable in every way for the service required. All material and all work, which may be reasonably implied as being incidental to the work of this Section, shall be furnished at no extra cost.

1.02 CODES, INSPECTION AND FEES

A. All material and installation shall be in accordance with the latest edition of the National Electrical Code and all applicable national, local and state codes, laws and ordinances.

B. Pay all fees required for permits and inspections.

1.03 TESTS

A. Test all systems and repair or replace all defective work. Make all necessary adjustments to the systems and instruct OWNER's personnel in the proper operation of the systems.

B. The following minimum tests and checks shall be made prior to the energizing of electrical equipment. Test shall be by the CONTRACTOR and a certified test report shall be submitted providing all test results and stating that the equipment meets and operates in accordance with the Manufacturer's and job specifications, and that equipment and installation conforms to all applicable Standards and Specifications:

1. Test all 600-volt wire insulation with a megohm meter after installation. Make tests at not less than 1000 volts. Submit a written test report of the results to the engineer.
2. Mechanical inspection of all circuit breakers to assure proper operation.

C. The Engineer shall be notified forty-eight (48) hours before tests are made to enable the Owner to have designated personnel present.

1.04 CUTTING AND PATCHING

A. All cutting and patching shall be done in a thoroughly workmanlike manner.

1.05 INTERPRETATION OF DRAWINGS

A. The Drawings are not intended to show exact locations of conduit runs.

B. All three-phase circuits shall be run in separate conduits unless otherwise shown on the Drawings.

C. Unless otherwise approved by the Engineer, conduit shown exposed shall be installed exposed; conduit shown concealed shall be installed concealed.

D. Where circuits are shown as "home-runs," all necessary fittings and boxes shall be provided for a complete raceway installation.

E. The CONTRACTOR shall harmonize the work of the different trades so that interferences between conduits, piping, equipment, architectural and structural work will be avoided. All necessary offsets shall be furnished so as to take up a minimum space and all such offsets, fittings, etc., required to accomplish this shall be furnished and installed by the CONTRACTOR without additional expense to the Owner. In case interference develops, the Owner's authorized representative is to decide which equipment, piping, etc., must be relocated, regardless of which was installed first.

F. The locations of equipment, fixtures, outlets, and similar devices shown on the Drawings are approximate only. Exact locations shall be as approved by the Engineer during construction. Obtain in the field all information relevant to the placing of electrical work and in case of any interference with other work, proceed as directed by the Engineer and furnish all labor and materials necessary to complete the work in an approved manner.

G. Circuit layouts shown are not intended to show the number of fittings, or other installation details. Furnish all labor and materials necessary to install and place in satisfactory operation all power, lighting, and other electrical systems shown. Additional circuits shall be installed wherever needed to conform to the specific requirements of the equipment.

H. The ratings of motors and other electrically operated devices together with the size shown for their branch circuit conductors and conduits are approximate only and are indicative of the probable power requirements insofar as they can be determined in advance of the purchase of equipment.

I. All connections to equipment shall be made as shown, specified and directed and in accordance with the approved shop drawings, regardless of the number of conductors shown on the Electrical Drawings.

1.06 RECORD DRAWINGS

A. As the work progresses, legibly record all field changes on a set of project Contract Drawings. When the project is complete, furnish a complete set of reproducible "As-built" drawings for the Project Record Documents.

1.07 COMPONENT INTERCONNECTIONS

A. Component equipment furnished under this Specification will not be furnished as integrated systems.

B. Analyze all systems components and their shop drawings; identify all terminals and prepare drawings or wiring tables necessary for component interconnection.

1.09. WARRANTY

A. Provide a warranty for all the electrical equipment in accordance with the requirements of other Sections. Under no circumstances shall the warranty be for less than one year starting from substantial completion.

PART 2 – PRODUCTS (Not Used)

PART 3 – EXECUTION (Not Used)

END OF SECTION

SECTION 16075

ELECTRICAL IDENTIFICATION

PART 1 - GENERAL

1.01 SUMMARY

A. Section Includes:

1. Nameplates.
2. Labels.
3. Wire markers.
4. Lockout Devices.

1.02 CLOSEOUT SUBMITTALS

A. Project Record Documents: Record actual locations of tagged devices; include tag numbers.

1.03 DELIVERY, STORAGE, AND HANDLING

A. Division 1 - Product Requirements: Requirements for transporting, handling, storing, and protecting products.

B. Accept identification products on site in original containers. Inspect for damage.

C. Accept materials on site in original factory packaging, labeled with manufacturer's identification, including product density and thickness.

D. Protect insulation from weather and construction traffic, dirt, water, chemical, and mechanical damage, by storing in original wrapping.

1.04 ENVIRONMENTAL REQUIREMENTS

A. Division 1 - Product Requirements: Environmental conditions affecting products on site.

B. Install labels and nameplates only when ambient temperature and humidity conditions for adhesive are within range recommended by manufacturer.

PART 2 - PRODUCTS

2.01 NAMEPLATES

A. Product Description: Laminated three-layer plastic with engraved white letters on black background color.

B. Letter Size:

1. 1/8 inch high letters for identifying individual equipment and loads.
2. 1/4 inch high letters for identifying grouped equipment and loads.

C. Minimum nameplate thickness: 1/8 inch.

1.05 LABELS

A. Labels: Embossed adhesive tape, with 3/16 inch white letters on black background.

1.06 WIRE MARKERS

A. Description: Cloth tape, split sleeve, or tubing type wire markers.

B. Legend:

1. Power and Lighting Circuits: Branch circuit or feeder number.
2. Control Circuits: Control wire number as indicated on shop drawings.

1.07 LOCKOUT DEVICES

A. Lockout Hasps:

1. Anodized aluminum hasp with erasable label surface; size minimum 7-1/4 x 3 inches.

PART 3 – EXECUTION

3.01 PREPARATION

A. Degrease and clean surfaces to receive adhesive for identification materials.

3.02 INSTALLATION

A. Nameplate Installation:

1. Install nameplate parallel to equipment lines.
2. Install nameplate for each electrical distribution and control equipment enclosure with corrosive-resistant mechanical fasteners, or adhesive.
3. Install nameplates for each control panel and major control components located outside panel with corrosive-resistant mechanical fasteners, or adhesive.
4. Secure nameplate to equipment front using screws or adhesive.
5. Secure nameplate to inside surface of door on recessed panelboard in finished locations.
6. Install nameplates for the following:

a. Data Flow Systems Control Panel.
b. Service Entrance Disconnect.
c. Devices as indicated on the drawings.

B. Wire Marker Installation:
   1. Install wire marker for each conductor at panelboard gutters, pull boxes, outlet and junction boxes, and each load connection.
   2. Mark data cabling at each end. Install additional marking at accessible locations along the cable run.
   3. Install labels at data outlets identifying patch panel and port designation.

END OF SECTION

SECTION 16120

CONDUIT AND CONDUCTORS

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. Furnish all labor, materials, equipment and incidentals required for complete electrical system for the City of St. Pete Beach's Lift Station Rehabilitation project, as hereinafter specified and shown on the Drawings.

1.02 CODES

A. All material and installation shall be in accordance with the latest edition of the National Electrical Code (N.E.C.), and NFPA 70 code articles that are applicable to the minimum electrical installation requirements for sewer lift stations.

PART 2 - PRODUCTS

2.01 GENERAL

A. The materials used in all systems shall be new, unused and as hereinafter specified. All materials where not specified shall be of the very best of their respective kinds. Samples of materials or Manufacturer's specifications shall be submitted for approval as required by the Engineer.

B. Materials and equipment used shall be Underwriters Laboratories, Inc. listed and conform with applicable standards of NEMA and ANSI.

C. Electrical equipment shall, at all times during construction, be adequately protected against mechanical injury or damage by water. Electrical equipment shall not be stored out-of-doors. Electrical equipment shall be stored in dry permanent shelters. If any apparatus has been damaged, such damage shall be repaired by the CONTRACTOR at his expense. If any apparatus has been subject to possible injury by water, it shall be thoroughly dried out and put through such special tests as directed by the Engineer, at the cost and expense of the CONTRACTOR, or shall be replaced by the CONTRACTOR at his own expense.

2.02 RACEWAYS AND FITTINGS

A. All raceways installed above ground shall be Rigid Aluminum Conduit (RAC).

B. Raceways installed below grade shall be PVC schedule 40 conduit.

C. Where conduit is cut, the inside edge shall be reamed smooth to prevent injury to conductors.

2.03 CONDUCTORS

A. Conductors shall be copper. Power circuits shall have 600 volt insulation (Underwriters' approved Type THWN). Conductors shall be color coded in accordance with the NEC.

B. All motor controls, remote indicating lights, alarm circuits and metering loops shall be wired with #14 stranded copper conductors. Insulation shall be THWN. An overall PVC jacket shall be provided for multi-conductor cables where required by the drawings.

C. All shielded instrumentation cable shall be 2/C#16 shielded with 600 volt insulation and PVC outer jacket, Belden 8719

2.04 MISCELLANEOUS EQUIPMENT

A. Boxes and Fittings:

1. NEMA 4X boxes shall be used outdoors or in "wet" locations. Construction shall be 316 stainless steel.

2. Conduit hubs shall be used for all outdoor conduit terminations and shall be as manufactured by Meyers Electric Products, Inc., Raco Div., Appleton Electric Co., or approved equal.

PART 3 - EXECUTION

3.01 CONDUIT INSTALLATION

A. Where conduits enter or leave all outlet boxes, cabinets safety switches, tap boxes, motor controllers, etc., threaded hubs shall be used. Bushings 1-inch and larger shall be of an approved insulated type. Unless otherwise indicated, conduit 2-inches shall be supported at intervals not exceeding ten (10) feet.

B. During construction, all installed raceways shall be temporarily plugged or otherwise protected from the entrance of moisture, dirt, trash, plaster, moisture, etc., through neglect of the CONTRACTOR to so protect them, shall be replaced by the CONTRACTOR without additional expense to the Owner. No kinked, clogged or deformed raceways will be permitted on the job. Raceways shall be cut to proper length so that ends will fit accurately in the outlets. Where raceways cross building expansion joints, a suitable raceway expansion fitting shall be used.

C. Size of raceway shall not be less than NEC requirements, but in no case shall be less than indicated on the Drawings. Combining of circuits, other than detailed, will not be permitted. The CONTRACTOR shall install larger size raceways than detailed where there is excessive length of unbroken run or excessive number of bends.

D. Bends in metallic raceways shall be made while "cold" and in no case shall the raceways be heated. Raceways shall not be bent through more than 90º. The radius of bends shall not be less than six (6) times the internal diameter of the raceway. Not more than

four (4) (equivalent 90º) bends will be permitted between outlets, the bends at the outlets being counted.

E. Raceways shall be properly aligned, grouped and supported. Exposed raceways shall be installed at the right angles to or parallel to the principal structural members. Concealed raceways, unless otherwise indicated, may take the most direct route between outlets. Raceways shall be firmly held in place. Raceways shall run to avoid trapping wherever possible. Where areas are indicated for future openings, foundations, etc., all raceways shall be run around such areas. The CONTRACTOR shall provide necessary inserts in poured concrete areas and shall furnish and install all necessary sleeves through walls, floors and roofs for passage of raceways. Sleeves through roofs and/or exterior walls shall be properly sealed by the CONTRACTOR against entrance of moisture, etc., into the building. Where necessary repairs to the building structure using material in no way inferior to that originally installed and using labor skilled in the trades involved.

3.02 CONDUCTORS

A. Splices, taps and attachments of fittings and lugs shall be electrically and mechanically secure. Approved solderless lugs and connectors shall be used for all conductors with 2-bolt type being used for sized No. 4/0 and larger. There shall be plenty of slack cable in boxes, outlets and cabinets to insure that there is no binding at the bushings. All lugs shall be of the correct sizes for the conductor in order to fit the conductor into a lug. Taping of joints shall be either with Scotch electrical tape or varnished cambric tape and friction tape to secure insulation strength equal to that of the conductors joined.

B. Splices or joints with friction tape outer covering in conductors of size No. 4 AWG or larger shall have three (3) coats of suitable insulating varnish point applied over tape. Conductors shall be color coded in accordance with NEC.

3.03 GROUNDING

A. The entire electrical system shall be completely and effectively grounded as required by the NEC and as specified hereinafter.

B. All metallic raceways shall be mechanically and electrically secure at all joints and at all boxes, cabinets, fittings and equipment. Metallic raceways entering the motor control center control panels or other electrical boxes shall be grounded to the appropriate ground bus. All metallic raceways shall be electrically continuous throughout the entire conduit system. Bond wires shall be used in exterior concrete pull boxes.

3.04 SUPPORTS

A. The CONTRACTOR shall furnish and install all necessary supports for properly mounting all electrical equipment and raceways. Such supports shall be fabricated and installed in a neat and workmanlike manner, and care shall be taken that at no time shall any portion of the building structure be overloaded. Should the building structure sustain damage through carelessness or through failure of the CONTRACTOR to properly support and install the electrical equipment, the CONTRACTOR shall bear all costs involved in repairing or replacing such installation.

B. All steel shapes exposed to the weather shall be galvanized after all cutting, drilling, and/or welding is done. All shop connections shall be welded or riveted and all field connections shall be bolted on all outdoor structures. Where the field cutting or drilling of

galvanized steel is necessary, the CONTRACTOR shall apply one (1) coat of priming paint and one (1) finish coat of aluminum and oil paint.

C. All conduit support systems (unistrut or equivalent), support system hardware (nuts, bolts, etc.) and conduit clamps shall be 316 stainless steel.

3.05 TESTS AND CHECKS

A. The following minimum tests and checks shall be made prior to the termination of any field wiring.

1. Megger terminals and buses after disconnecting devices sensitive to megger voltage.
2. A 1,000V DC megger shall be used for these tests.
3. The first test shall be made with main circuit breaker closed and all remaining breakers open. A second test shall be made with all circuit breakers closed.
4. The test results shall be recorded and forwarded to the Engineer for his review. Minimum megger readings shall be 100 megohms in both tests.

B. The following shall be done before energizing any motor control center or control panel.

1. Remove all current transformer shunts after completing the secondary circuit.
2. Install overload relay heaters based on actual motor nameplate current.
3. Vacuum clean all interior equipment.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 16140

WIRING DEVICES

PART 1 GENERAL

1.01 SUMMARY

A. Section Includes: Requirements for providing, wiring devices and appurtenances as indicated, in accordance with the Contract Documents.

1.02 REFERENCES

A. Codes and standards referred to in this Section are:

1. Fed Spec WC 596 - Electrical Power Connector, Plug, Receptacle and Cable Outlet
2. Fed Spec WS 896 - Toggle and Lock, Flush Mounted Switches
3. CSA C22.2-182.1 - Industrial-type, Special-Use Attachment Plugs, Receptacles and Connectors
4. UL 20 - General - Use Snap Switches
5. UL 498 - Attachment Plugs and Receptacles
6. UL 508 - Industrial Control Equipment
7. UL 894 - Switches for Use in Hazardous (Classified) Locations
8. UL 1010 - Receptacle-Plug Combinations for Use in Hazardous (Classified) Locations
9. UL 1682 - Plugs, Receptacles, and Cable Connectors of the Pin and Sleeve Type
10. UL 1686 - Standard for Pin and Sleeve Configurations

1.03 SUBMITTALS

A. General: Furnish all submittals, including the following, as specified elsewhere.

1.04 DELIVERY, STORAGE AND HANDLING

A. General: Deliver, store and handle all products and materials as specified the Specific/General Provisions.

PART 2 PRODUCTS

2.01 MANUFACTURERS

A. Standard of Quality and General Configuration: Use of manufacturer's name and model or catalog number is for the purpose of establishing the desired quality and configuration.

B. Configuration and Rating: Provide NEMA specification grade wiring devices in the type, color, configuration and electrical rating for the service indicated.

C. Symbols: See the electrical symbol list shown for identification of all device types.

D. Acceptable Manufacturers: Acceptable manufacturers are listed below. Other manufacturers of equivalent products may be submitted for review.

1. Hubbell Inc. Wiring Device/Kellems Division
2. Pass and Seymour
3. Cooper Wiring Devices
4. Leviton
5. Appleton Electric Company
6. Crouse-Hinds Company
7. Thomas & Betts

2.02 LIGHTING TOGGLE SWITCHES

A. General: Provide toggle switches of specification grade rated 20- amperes, 120-277 volts ac conforming to Fed. Spec. WS 896 and UL Standard 20. Manufacture switches with back and side wired binding screw type terminals, one piece spring contact arm and terminal plate with silver alloy contacts, one piece steel mounting strap with an assured grounding clip, thermoset body color coded

for identification by amperage and a brown toggle. Provide ivory toggles in finished areas.

B. Types:

DESCRIPTION	HUBBELL CAT. NO.
Single pole	HBL1221
Three way	HBL1223

2.04 CONVENIENCE RECEPTACLES

A. General: Provide specification grade convenience receptacles conforming to Fed. Spec. WC 596 UL listed, with nylon impact resistant face, one piece metal wrap around mounting strap with assured grounding clip, back and side wired binding screw type

terminals, brass power contacts and a heavy duty heat stabilized thermoset plastic base. Provide brown devices in unfinished areas and ivory devices in finished areas unless otherwise specified.

B. TYPES:

DESCRIPTION	RATING	COLOR	HUBBELL CAT. NO.
Duplex	NEMA 5-20R 20A, 125V, 2P, 3W	Ivory	HBL5362I

2.05 BOXES

A. Outlet Boxes: Provide outlet boxes in accordance with the requirements specified in Section 26 05 33.

2.07 PLATES AND COVERS

A. General: Provide covers and plates for the various areas as follows:

1. Outdoor Areas:

a. Provide weatherproof, gasketed, covers.

1. Indoor Areas:

a. Provide aluminum plates.

PART 3 EXECUTION

3.01 INSTALLATION

A. General: Install all wiring devices in accordance with manufacturer's recommendations and approved shop drawings.

B. Toggle Switches: Install toggle switches applicable for the area environment for switching lighting or other branch circuit loads.

C. Receptacles: Install receptacles applicable for the area environment.

D. Grounding: Ground all devices in accordance with the requirements specified in Section 16450.

END OF SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 16190

SUPPORTING DEVICES

PART 1 – GENERAL

1.01 WORK INCLUDED

A. Conduit supports.

B. Channel supports for equipment.

1.02 REFERENCE STANDARDS

A. National Electrical Code

PART 2 - PRODUCTS

2.01 CONDUIT SUPPORTS

A. Single Runs: Aluminum conduit clamps. Plumbers perforated straps or wire will not be acceptable.

B. Multiple Runs: Conduit rack with 25 percent spare capacity.

C. Vertical Runs: Channel support with conduit fittings.

2.02 CHANNEL SUPPORTS

A. Channel sections shall be 316 stainless steel.

B. The cross sectional width dimension of the channel shall be a minimum of 1-5/8-inch. The depth will be as required to satisfy the load requirements. Channel with 1-5/8-inch depth or greater shall be standard 12 gauge stainless steel.

C. Attachment holes, when required, shall be factory punched on hole centers equal to the channel cross sectional width dimension and shall be a maximum of 9/16-inch in diameter.

D. Channel attachment nuts shall be designed to prelocate in the channel and provide a bearing surface on the turned down lips while making positive contact with the side walls of the channel.

E. Straps for the support of conduit shall be designed such that the attachment nut is captivated on the shoulder of the strap when tightened, and the attachment bolt shall allow tightening by either a screwdriver or wrench.

F. All nuts, bolts, straps, threaded rod and edges of punched holes shall be protected with the same finish as the channel.

G. When tested in accordance with ASTM B117-73 procedure, there shall be no sign of red rust after 1,000 hours of testing. Certified test results to support this must be submitted upon request.

2.03 ANCHOR METHODS

A. Hollow Masonary: Toggle bolts or tapcons.

B. Solid Masonary: Tapcons.

C. Metal Surfaces: machine screws, bolts, welded studs, or beam type clamps on steel joints.

D. Wood Surfaces: Wood Screws

E. Concrete Surfaces: Tapcons.

PART 3 - EXECUTION

3.01 INSTALLATION

A. Layout to maintain headroom, neat mechanical appearance, and to support equipment loads required.

B. Verify exact mounting and installation requirements with the Owner's representative prior to installation.

END OF SECTION

SECTION 16450

GROUNDING SYSTEM

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. Furnish and install a complete grounding system in strict accordance with Article 250 of the National Electrical Code and as hereinafter specified and shown on the Drawings.

1.02 RELATED WORK

A. Wire and conduit shall be as specified under Section 16120.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Ground rods: Ground rods shall be Copperclad steel 3/4-inch x 20 foot. Ground rods shall be Copperweld or be an approved equal product.

PART 3 - EXECUTION

3.01 GENERAL

A. Grounding electrodes shall be driven as required. Where rock is encountered, grounding plates may be used in lieu of grounding rods.

B. All equipment enclosures, motor and transformer frames, conduits systems, cable armor, exposed structural steel and similar items shall be grounded.

C. All connections shall be made by welding process equal to Cadweld.

E. All underground conductors shall be laid slack and where exposed to mechanical injury shall be protected by pipes or other substantial guards. If guards are iron pipe or other magnetic material, conductors shall be electrically connected to both ends of the guard.

F. The Contractor shall exercise care to insure good ground continuity, in particular between the conduit system and equipment frames and enclosures. Where necessary, jumper wires shall be installed.

3.02 TESTS

A. The Contractor shall test the ground resistance of the system. All test equipment shall be provided by the Contractor and approved by the Engineer. Dry season resistance of the system shall not exceed 2 ohms. If such resistance cannot be obtained with the system as shown, the Contractor shall provide additional grounding as directed by the Engineer, without additional payment. The Contractor shall submit all grounding system test results to the Engineer for review.

SECTION 16495

AUTOMATIC TRANSFER SWITCH

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. Furnish and install automatic transfer switch (ATS) with four (3) poles, solid neutral, rated for 150 amperes, 240Volts, withstand and close-on ratings of 22,000 RMS symmetrical amperes minimum. Automatic transfer switch shall consist of an inherently double throw power transfer switch mechanism and a microprocessor controller to provide automatic operation. Transfer switch and controller shall be the products of the same manufacturer. Transfer switch shall be delayed transition type. Conductors for Normal Power shall connect at the top of the ATS. Conductors for Emergency Power shall connect at the bottom of the ATS.

1.02 CODES AND STANDARDS

The automatic transfer switches and controls shall conform to the requirements of:

A. UL 1008 - Standard for Transfer Switch Equipment

B. CSA certified to CSA 22.2 No. 178 – 1978 Automatic Transfer Switches

C. IEC 60947-6-1 Low-voltage Switchgear and Controlgear; Multifunction equipment; Automatic Transfer Switching Equipment

D. NFPA 70 - National Electrical Code

E. NFPA 99 - Essential Electrical Systems for Health Care Facilities

F. NFPA 110 - Emergency and Standby Power Systems

G. IEEE Standard 446 - IEEE Recommended Practice for Emergency and Standby Power Systems for Commercial and Industrial Applications

H. NEMA Standard ICS10-1993 (formerly ICS2-447) - AC Automatic Transfer Switches

I. UL 508 Industrial Control Equipment

1.03 ACCEPTABLE MANUFACTURERS

Automatic transfer switch shall be ASCO 300 Series.

PART 2 - PRODUCTS

2.01 MECHANICALLY HELD TRANSFER SWITCH

A. The transfer switch shall be electrically operated and mechanically held. The electrical operator shall be a momentarily energized, single-solenoid mechanism. Main operators which include overcurrent disconnect devices, linear motors or gears shall not be acceptable. The switch shall be mechanically interlocked to ensure only two possible positions, normal or emergency.

B. All transfer switch sizes shall use only one type of main operator for ease of maintenance and commonality of parts.

C. The switch shall be positively locked and unaffected by momentary outages, so that contact pressure is maintained at a constant value and contact temperature rise is minimized for maximum reliability and operating life.

D. All main contacts shall be silver composition. Switches rated 800 amperes and above shall have segmented, blow-on construction for high withstand and close-on capability and be protected by separate arcing contacts.

E. Inspection of all contacts shall be possible from the front of the switch without disassembly of operating linkages and without disconnection of power conductors. Switches rated 800 amps and higher shall have front removable and replaceable contacts. All stationary and moveable contacts shall be replaceable without removing power conductors and/or bus bars.

F. Designs utilizing components of molded-case circuit breakers, contactors, or parts thereof, which are not intended for continuous duty, repetitive switching or transfer between two active power sources are not acceptable.

G. The neutral conductors must be solid as indicated in this specification.

H. Contractor to provide a fully rated ground bus with AL-CU lugs as required.

2.02 MICROPROCESSOR CONTROLLER

A. The controller's sensing and logic shall be provided by a single built-in microprocessor for maximum reliability, minimum maintenance, and the ability to communicate serially through an optional serial communication module.

B. A single controller shall provide twelve selectable nominal voltages for maximum application flexibility and minimal spare part requirements. Voltage sensing shall be true RMS type and shall be accurate to ± 1% of nominal voltage. Frequency sensing shall be accurate to ± 0.2%. The panel shall be capable of operating over a temperature range of -20 to +60 degrees C and storage from -55 to +85 degrees C.

C. The controller shall be connected to the transfer switch by an interconnecting wiring harness. The harness shall include a keyed disconnect plug to enable the controller to be disconnected from the transfer switch for routine maintenance. Sensing and control logic shall be provided on multi-layer printed circuit boards. Interfacing relays shall be industrial grade plug-in type with dust covers. The panel shall be enclosed with a protective cover and be mounted separately from the transfer switch unit for safety and

ease of maintenance. The protective cover shall include a built-in pocket for storage of the operator's manuals.

D. All customer connections shall be wired to a common terminal block to simplify field-wiring connections.

E. The controller shall meet or exceed the requirements for Electromagnetic Compatibility (EMC) as follows:

1.	EN 55011:1991	Emission standard - Group 1, Class A
2.	EN 50082-2:1995	Generic immunity standard, from which:
3.	EN 61000-4-2:1995	Electrostatic discharge (ESD) immunity
4.	ENV 50140:1993	Radiated Electro-Magnetic field immunity
5.	EN 61000-4-4:1995	Electrical fast transient (EFT) immunity
6.	EN 61000-4-5:1995	Surge transient immunity
7.	EN 61000-4-6:1996	Conducted Radio-Frequency field immunity

2.03 ENCLOSURE

A. The ATS shall be mounted in a NEMA 4X 316 stainless steel wall-mounted enclosure.

PART 3 - OPERATION

3.01 CONTROLLER DISPLAY AND KEYPAD

A. A four line, 20 character LCD display and keypad shall be an integral part of the controller for viewing all available data and setting desired operational parameters. Operational parameters shall also be available for viewing and limited control through the serial communications input port. The following parameters shall only be adjustable via DIP switches on the controlller:

1. Nominal line voltage and frequency
2. Single or three phase sensing
3. Operating parameter protection
4. Transfer operating mode configuration (Open transition, Closed transition, or Delayed transition)

All instructions and controller settings shall be easily accessible, readable and accomplished without the use of codes, calculations, or instruction manuals.

3.02 VOLTAGE, FREQUENCY AND PHASE ROTATION SENSING

A. Voltage and frequency on both the normal and emergency sources (as noted below) shall be continuously monitored, with the following pickup, dropout, and trip setting capabilities

(values shown as % of nominal unless otherwise specified):

Parameter	Sources	Dropout / Trip	Pickup / Reset
Undervoltage	N&E,3ϕ	70 to 98%	85 to 100%
Overvoltage	N&E,3ϕ	102 to 115%	2% below trip
Underfrequency	N&E	85 to 98%	90 to 100%
Overfrequency	N&E	102 to 110%	2% below trip
Voltage unbalance	N&E	5 to 20%	1% below dropout

B. Repetitive accuracy of all settings shall be within ± 0.5% over an operating temperature range of -20°C to 60°C.

C. Voltage and frequency settings shall be field adjustable in 1% increments either locally with the display and keypad or remotely via serial communications port access.

D. The controller shall be capable (when activated by the keypad or through the serial port) of sensing the phase rotation of both the normal and emergency sources. The source shall be considered unacceptable if the phase rotation is not the preferred rotation selected (ABC or CBA).

E. Source status screens shall be provided for both normal & emergency to provide digital readout of voltage on all 3 phases, frequency, and phase rotation.

F. The controller shall include a user selectable algorithm to prevent repeated transfer cycling to a source on an installation which experiences primary side, single phase failures on a Grounded Wye – Grounded Wye transformer which regenerates voltage when unloaded. The algorithm shall also inhibit retransfer to the normal (utility) source upon detection of a single phasing condition until a dedicated timer expires, the alternate source fails, or the normal source fails completely and is restored during this time delay period. The time delays associated with this feature shall be adjustable by the user through the controller keypad and LCD.

3.03 TIME DELAYS

A. An adjustable time delay of 0 to 6 seconds shall be provided to override momentary normal source outages and delay all transfer and engine starting signals. Capability shall be provided to extend this time delay to 60 minutes by providing an external 24 VDC power supply.

B. A time delay shall be provided on transfer to emergency, adjustable from 0 to 60 minutes, for controlled timing of transfer of loads to emergency.

C. Two time delay modes (which are independently adjustable) shall be provided on re-transfer to normal. One time delay shall be for actual normal power failures and the other for the test mode function. The time delays shall be adjustable from 0 to 60 minutes. Time delay shall be automatically bypassed if the emergency source fails and the normal source is acceptable.

D. A time delay shall be provided on shut down of engine generator for cool down, adjustable from 0 to 60 minutes.

E. A time delay activated output signal shall also be provided to drive an external relay(s) for selective load disconnect control. The controller shall have the ability to activate an adjustable 0 to 5 minute time delay in any of the following modes:

1. Prior to transfer only.
2. Prior to and after transfer.
3. Normal to emergency only.
4. Emergency to normal only.
5. Normal to emergency and emergency to normal.
6. All transfer conditions or only when both sources are available.

F. All time delays shall be adjustable in 1 second increments, except the extended parallel time, which shall be adjustable in .01 second increments.

G. All time delays shall be adjustable by using the LCD display and keypad or with a remote device connected to the serial communications port.

3.04 ADDITIONAL FEATURES

A. A three position momentary-type test switch shall be provided for the *test / automatic / reset* modes. The test position will simulate a normal source failure. The reset position shall bypass the time delays on either transfer to emergency or retransfer to normal.

B. A SPDT contact, rated 5 amps at 30 VDC, shall be provided for a low-voltage engine start signal. The start signal shall prevent dry cranking of the engine by requiring the generator set to reach proper output, and run for the duration of the cool down setting, regardless of whether the normal source restores before the load is transferred.

C. Auxiliary contacts, rated 10 amps, 250 VAC shall be provided consisting of one contact, closed when the ATS is connected to the normal source and one contact closed, when the ATS is connected to the emergency source.

D. LED indicating lights (16 mm industrial grade, type 12) shall be provided; one to indicate when the ATS is connected to the normal source (green) and one to indicate when the ATS is connected to the emergency source (red).

E. LED indicating lights (16 mm industrial grade, type 12) shall be provided and energized by controller outputs. The lights shall provide true source availability of the normal and emergency sources, as determined by the voltage sensing trip and reset settings for each source.

The following features shall be built-in to the controller, but capable of being activated through keypad programming or the serial port only when required by the user:

F. Provide the ability to select “commit/no commit to transfer” to determine whether the load should be transferred to the emergency generator if the normal source restores before

the generator is ready to accept the load.

G. The controller shall be capable of accepting a normally open contact that will allow the transfer switch to function in a non-automatic mode using an external control device.

H. Engine Exerciser - The controller shall provide an internal engine exerciser. The engine exerciser shall allow the user to program up to seven different exercise routines. For each routine, the user shall be able to:

1. Enable or disable the routine.

2. Enable or disable transfer of the load during routine.

3. Set the start time, .
   - time of day
   - day of week
   - week of month (1st, 2nd, 3rd, 4th, alternate or every)

4. Set the duration of the run.

At the end of the specified duration the switch shall transfer the load back to normal and run the generator for the specified cool down period. A 10-year life battery that supplies power to the real time clock in the event of a power loss will maintain all time and date information.

The following feature shall be built - into the controller, but capable of being activated through keypad programming or the communications interface port.

Note: The transfer switch will operate in a non-automatic mode with this feature activated.

I. Terminals shall be provided for a remote contact which opens to signal the ATS to transfer to emergency and for remote contacts which open to inhibit transfer to emergency and/or retransfer to normal. Both of these inhibit signals can be activated through the keypad or serial port.

J. System Status - The controller LCD display shall include a “System Status” screen which shall be readily accessible from any point in the menu by depressing the “ESC” key a maximum of two times. This screen shall display a clear description of the active operating sequence and switch position. For example,

Normal Failed
Load on Normal
TD Normal to Emerg
2min15s

Controllers that require multiple screens to determine system status or display “coded” system status messages, which must be explained by references in the operator’s manual, are not permissible.

K. Self Diagnostics - The controller shall contain a diagnostic screen for the purpose of detecting system errors. This screen shall provide information on the status input signals

to the controller which may be preventing load transfer commands from being completed..

L. Data Logging – The controller shall have the ability to log data and to maintain the last 99 events, even in the event of total power loss. The following events shall be time and date stamped and maintained in a non-volatile memory:`1

1. Event Logging

1. Data and time and reason for transfer normal to emergency.
2. Data and time and reason for transfer emergency to normal.
3. Data and time and reason for engine start.
4. Data and time engine stopped.
5. Data and time emergency source available.
6. Data and time emergency source not available.

2. Statistical Data

1. Total number of transfers.
2. Total number of transfers due to source failure.
3. Total number of days controller is energized.
4. Total number of hours both normal and emergency sources are available.

PART 4 - ADDITIONAL REQUIREMENTS

4.01 WITHSTAND AND CLOSING RATINGS

A. The withstand and closing ratings of the ATS, with any overcurrent device shall be 22,000 RMS symmetrical amperes minimum.

B. The ATS shall be UL listed in accordance with UL 1008 and be labeled in accordance with that standard's 0.025 and 0.05 second, time based ratings. ATSs which are not tested and labeled with time based ratings and have series, or specific breaker ratings only, are not acceptable.

4.02 TESTS AND CERTIFICATION

A. The complete ATS shall be factory tested to ensure proper operation of the individual components and correct overall sequence of operation and to ensure that the operating transfer time, voltage, frequency and time delay settings are in compliance with the specification requirements.

B. The ATS manufacturer shall be certified to ISO 9001:2008 International Quality Standard and the manufacturer shall have third party certification verifying quality assurance in design/development, production, installation and servicing in accordance with ISO 9001:2008

4.03 SERVICE REPRESENTATION

A. The ATS manufacturer shall maintain a national service organization of company-

employed personnel located throughout the contiguous United States. The service center's personnel must be factory trained and must be on call 24 hours a day, 365 days a year.

B. The manufacturer shall maintain records of each switch, by serial number, for a minimum of 20 years.

148404108 PUMP AND LIFT STATION REHABILITATIONS DECEMBER 2025 100% DESIGN PLANS G-01 - COVER SHEET

GENERAL

1. CONTRACTOR SHALL CONTACT MR. CAMDEN MILLS, (727)-363-9254 TO COORDINATE LIFT STATION SHUT DOWN AND STARTUP.
2. CONTRACTOR MUST MAINTAIN SOUND LEVELS BELOW THE LIMITATIONS SET IN ARTICLE IV SECTION 46-132 OF THE CITY OF ST. PETE BEACH'S CODE OF ORDINANCES.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MEETING ALL CONDITIONS AND REQUIREMENTS OF ALL PERMITS AND ALL GOVERNING FEDERAL, STATE, AND LOCAL AGENCIES. THE CONTRACTOR SHALL OBTAIN AND PAY FOR ALL REQUIRED PERMITS THAT ARE NOT PROVIDED IN THE BID DOCUMENTS, AT NO ADDITIONAL COST TO THE OWNER.
4. THE INFORMATION PROVIDED IN THESE PLANS IS SOLELY TO ASSIST THE CONTRACTOR IN ASSESSING THE NATURE AND EXTENT OF THE CONDITIONS WHICH MAY BE ENCOUNTERED DURING THE COURSE OF WORK. ALL CONTRACTORS ARE DIRECTED, PRIOR TO BIDDING, TO CONDUCT WHATEVER INVESTIGATION THEY MAY DEEM NECESSARY TO ARRIVE AT THEIR OWN CONCLUSIONS REGARDING THE ACTUAL CONDITIONS THAT WILL BE ENCOUNTERED, AND UPON WHICH THEIR BIDS WILL BE BASED.
5. THE CONTRACTOR SHALL REVIEW AND VERIFY ALL DIMENSIONS ON THE PLANS AND REVIEW ALL FIELD CONDITIONS THAT MAY AFFECT CONSTRUCTION. SHOULD DISCREPANCIES OCCUR, THE CONTRACTOR SHALL NOTIFY THE ENGINEER TO OBTAIN THE ENGINEER'S CLARIFICATION BEFORE COMMENCING WITH CONSTRUCTION. NO FIELD CHANGES OR DEVIATIONS FROM DESIGN ARE TO BE MADE WITHOUT PRIOR APPROVAL OF THE OWNER AND NOTIFICATION TO THE ENGINEER.
6. AT LEAST 2 FULL BUSINESS DAYS PRIOR TO ANY EXCAVATION, THE CONTRACTOR SHALL CONTACT SUNSHINE STATE ONE CALL OF FLORIDA AT 1-800-432-4770 OR THE NATIONAL 811 ONE CALL NUMBER WHEN APPLICABLE FOR UTILITY LOCATIONS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING WITH ALL UTILITIES FOR THE POSSIBLE RELOCATION OR THE TEMPORARY MOVEMENT OF ANY EXISTING UTILITIES WITHIN THE RIGHTS-OF-WAY.
7. THE CONTRACTOR SHALL INCLUDE IN HIS BID:BY-PASS PUMPING FACILITIES, PUMPS, FITTINGS, LABOR, ETC. AS NECESSARY, BASED ON METHOD AND SEQUENCE OF CONSTRUCTION TO COMPLETE ALL WORK WHILE MAINTAINING SEWER SERVICE OPERATIONS AT ALL TIMES.
8. THE CONTRACTOR SHALL PROVIDE THE OWNER AND ENGINEER A DETAILED BYPASS PLAN FOR APPROVAL PRIOR TO BEGINNING CONSTRUCTION.
9. THE CONTRACTOR SHALL PROVIDE THE OWNER WITH A DETAILED CONSTRUCTION PHASING PLAN FOR APPROVAL, PRIOR TO BEGINNING CONSTRUCTION.
10. THE CONTRACTOR SHALL PROVIDE THE OWNER AND ENGINEER A DETAILED HURRICANE PREPAREDNESS PLAN FOR APPROVAL PRIOR TO BEGINNING CONSTRUCTION.
11. THE CONTRACTOR SHALL FURNISH SHOP DRAWINGS TO THE ENGINEER FOR REVIEW OF ALL PIPE CONNECTIONS, TRANSITIONS, AND SPECIAL APPURTENANCES PRIOR TO FABRICATION OR DELIVERY TO THE JOB SITE.

SAFETY

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COMPLIANCE WITH THE FLORIDA TRENCH SAFETY ACT, 90-96, LAWS OF FLORIDA EFFECTIVE OCTOBER 1, 1990 AND THE OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION EXCAVATION SAFETY STANDARDS, 29 CFR 1926.650, SUBPART P, AS AMENDED. THE CONTRACTOR SHALL INCLUDE IN THE TOTAL BID PRICE ALL COSTS FOR COMPLIANCE WITH THESE REGULATIONS.
2. THE CONTRACTOR SHALL USE SHEET PILING, SHEETING, BRACING, ETC., AS REQUIRED IN ALL EXCAVATION AREAS AND CONFORM TO ALL OSHA REQUIREMENTS.
3. THE CONTRACTOR SHALL USE ALL NECESSARY SAFETY PRECAUTIONS TO AVOID CONTACT WITH OVERHEAD AND UNDERGROUND UTILITIES, POWER LINES, ETC.
4. THESE DRAWINGS DO NOT INCLUDE NECESSARY COMPONENTS FOR CONSTRUCTION SAFETY. THIS EXCLUSION DOES NOT ALLEVIATE THE CONTRACTOR FOR PROVIDING A CONTINUOUS SAFE WORKSPACE.

ENVIRONMENTAL

1. THE CONTRACTOR SHALL PROVIDE AND INSTALL ALL NECESSARY STORM WATER, EROSION, AND SEDIMENTATION CONTROL MEASURES IN ACCORDANCE WITH THE FDEP "FLORIDA STORM WATER, EROSION AND SEDIMENTATION CONTROL INSPECTOR'S MANUAL". IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO CONTROL AND PREVENT EROSION AND TRANSPORT OF SEDIMENT TO SURFACE DRAINS AND TO DITCHES DURING CONSTRUCTION.
2. STOCKPILES SHALL BE PROTECTED AT ALL TIMES BY ON-SITE DRAINAGE CONTROLS WHICH PREVENT EROSION OF THE STOCKPILED MATERIAL. CONTROL OF DUST FROM SUCH STOCKPILES IS REQUIRED, DEPENDING UPON THEIR LOCATION AND THE EXPECTED LENGTH OF TIME THE STOCKPILES WILL BE PRESENT. IN NO CASE SHALL ANY STOCKPILED MATERIAL REMAIN AFTER THIRTY (30) CALENDAR DAYS.
3. STORM WATER INLETS IN THE VICINITY OF THE PROJECT SHALL BE PROTECTED BY SEDIMENT TRAPS SUCH AS SECURED HAY BALES, SOD, STONE, ETC., WHICH SHALL BE MAINTAINED AND MODIFIED AS REQUIRED BY CONSTRUCTION PROGRESS, AND WHICH MUST BE APPROVED BY THE ENGINEER BEFORE INSTALLATION. THIS WILL BE MAINTAINED TO PREVENT DEGRADATION OF THE WATERS OF THE COUNTY AND STATE.
4. SEDIMENT BASINS AND TRAPS, PERIMETER BERMS, SEDIMENT BARRIERS, VEGETATIVE BUFFERS, AND OTHER MEASURES INTENDED TO TRAP SEDIMENT AND/OR PREVENT THE TRANSPORT OF SEDIMENT ONTO ADJACENT PROPERTIES, OR INTO EXISTING BODIES OF WATER, MUST BE INSTALLED, CONSTRUCTED, OR IN THE CASE OF VEGETATIVE BUFFERS, PROTECTED FROM DISTURBANCE, AS A FIRST STEP IN THE LAND ALTERATION PROCESS. SUCH SYSTEMS SHALL BE FULLY OPERATIVE BEFORE ANY OTHER DISTURBANCE OF THE SITE BEGINS. EARTHEN STRUCTURES INCLUDING BUT NOT LIMITED TO BERMS, EARTH FILTERS, DAMS OR DIKES SHALL BE STABILIZED AND PROTECTED FROM DRAINAGE DAMAGE OR EROSION WITHIN ONE (1) WEEK OF INSTALLATION.
5. ALL SWALES, DITCHES, AND CHANNELS LEADING FROM THE SITE SHALL BE PROTECTED FROM SILTATION AND EROSION DURING CONSTRUCTION AND BE SODDED WITHIN THREE (3) DAYS OF EXCAVATION.
6. SOIL DISPLACED BY CONSTRUCTION WILL BE REMOVED. EROSION CONTROL SHALL BE IMPLEMENTED IN AREAS WHICH ARE CONSIDERED ENVIRONMENTALLY SENSITIVE. EROSION CONTROL SYSTEMS SHALL BE REQUIRED FOR ALL WORK WITHIN JURISDICTIONAL AREAS. THESE SYSTEMS MAY INCLUDE STAKED HAY BALES, SILT SCREENS, FILTER FABRIC, AND TURBIDITY SCREENS.
7. ALL EROSION AND POLLUTION CONTROL DEVICES SHALL BE CHECKED REGULARLY, ESPECIALLY AFTER EACH RAINFALL AND SHALL BE CLEANED OUT AND/OR REPAIRED AS REQUIRED.
8. THE CONTRACTOR SHALL NOT ENTER UPON OR IN ANY WAY ALTER WETLAND AREAS THAT MAY BE ON OR NEAR THE CONSTRUCTION SITE. ALL WORK IN THE VICINITY OF OPEN WATER AND/OR WETLANDS IS TO BE PERFORMED IN COMPLIANCE WITH THE ENVIRONMENTAL REGULATIONS AND/OR PERMITS FOR THE SITE. THE CONTRACTOR WILL BE RESPONSIBLE FOR ANY FINES RESULTING FROM HIS VIOLATION OF ANY REGULATIONS OR PERMIT CONDITIONS.
9. CONTRACTOR SHALL PROVIDE PROTECTIVE MATTING, FUEL CONTAINMENT AND ALL OTHER MATERIALS, EQUIPMENT AND LABOR TO PROTECT THE STAGING AREA DURING CONSTRUCTION.
10. CONTRACTOR SHALL, PRIOR TO BEGINNING CONSTRUCTION, SUBMIT A "FUELING SPILL PREVENTION PLAN" THAT SHALL CLEARLY INDICATE HOW FUEL SPILLS WILL BE PREVENTED WHEN FUELING BOTH WITHIN AND OUTSIDE OF THE STAGING AREA.

RIGHT-OF-WAY

1. ALL CONSTRUCTION ACTIVITIES SHALL BE LIMITED TO WITHIN THE CITY OF ST. PETE BEACH RIGHT-OF-WAY AND/OR EASEMENTS SHOWN ON THE DRAWINGS.
2. THE CONTRACTOR SHALL EMPLOY A LAND SURVEYOR REGISTERED IN THE STATE OF FLORIDA TO REFERENCE AND RESTORE PROPERTY CORNER MONUMENTS, PINS, AND LANDMARKS THAT MAY BE DISTURBED BY CONSTRUCTION AT NO ADDITIONAL COST TO THE OWNER.
3. THE CONTRACTOR, PRIOR TO CONSTRUCTION AND RESTRICTING ANY TRAFFIC, MUST OBTAIN A RIGHTS-OF-WAY USE PERMIT AND A TRAFFIC CONTROL PLAN. THE CONTRACTOR SHALL OBTAIN ALL REQUIRED PERMITS FROM OTHER GOVERNMENTAL AGENCIES HAVING RELEVANT JURISDICTION. ALL MAINTENANCE AND PROTECTION OF TRAFFIC SHALL BE IN ACCORDANCE WITH THE APPLICABLE REQUIREMENTS OF THE CURRENT FLORIDA DEPARTMENT OF TRANSPORTATION "MANUAL OF TRAFFIC CONTROL AND SAFE PRACTICES". A TRAFFIC CONTROL PLAN SHALL BE SUPPLIED BY THE CONTRACTOR AT THE PRE-CONSTRUCTION MEETING.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPLACING ALL DAMAGED STORM WATER STRUCTURES, PIPING, ENTRANCE PIPE AND HEADWALLS WHETHER SHOWN ON THE PLANS OR NOT. THE HEADWALLS SHALL BE REPLACED IN ACCORDANCE WITH F.D.O.T. STANDARDS.
5. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO ESTABLISH IN THE FIELD THE RIGHT-OF-WAY LINES, BASE LINES, BENCH MARKS (ELEV.), CENTER LINES, AND STATIONING AS REQUIRED TO CONSTRUCT THIS PROJECT.
6. THE CONTRACTOR SHALL COORDINATE THE CUTTING OF DRIVEWAYS WITH THE PROPERTY OWNER PRIOR TO CUT. ALL DRIVEWAYS WILL BE IN PASSABLE CONDITION AT THE END OF THE WORK DAY AND FULLY RESTORED.
7. A RIGHT OF ENTRY AGREEMENT SHALL BE OBTAINED BY THE PROJECT MANAGER FROM THE PROPERTY OWNER BEFORE ANY DRIVEWAY CONSTRUCTION WORK IS DONE OUTSIDE OF THE RIGHT-OF-WAY OR EASEMENT.

UTILITIES

1. LOCATIONS, ELEVATIONS AND DIMENSIONS OF EXISTING UTILITIES, STRUCTURES AND OTHER FEATURES ARE SHOWN TO THE BEST INFORMATION AVAILABLE AT THE TIME OF PREPARATION OF THESE PLANS BUT DO NOT PURPORT TO BE ABSOLUTELY CORRECT. THERE MAY BE OTHER IMPROVEMENTS, UTILITIES, ETC. WHICH ARE WITHIN THE PROJECT AREA AND WHICH HAVE NOT BEEN LOCATED OR IDENTIFIED, MAY NOT BE IN THE EXACT LOCATION SHOWN OR RELOCATED SINCE THE PREPARATION OF THESE PLANS. THE CONTRACTOR SHALL VERIFY, PRIOR TO CONSTRUCTION, THE LOCATIONS, ELEVATIONS AND DIMENSIONS OF ALL EXISTING UTILITIES STRUCTURES AND OTHER FEATURES (WHETHER OR NOT SHOWN ON THE PLANS) THAT MAY EFFECT HIS WORK. ALL EXISTING UTILITIES TO BE EXTENDED, CROSSED OR CONNECTION POINTS SHALL BE EXPOSED PRIOR TO CONSTRUCTION TO VERIFY LOCATION AND ELEVATION. ANY DISCREPANCIES OR CONFLICTS FOUND SHALL BE BROUGHT TO THE ENGINEER'S ATTENTION FOR RESOLUTION.
2. THE CONTRACTOR SHALL PROTECT ALL EXISTING STRUCTURES, WATER AND SEWER LINES, STORM DRAINS, UTILITIES, DRIVEWAYS, SIDEWALKS, SIGNS, MAIL BOXES, FENCES, TREES, LANDSCAPING, AND ANY OTHER IMPROVEMENT OR FACILITY IN THE CONSTRUCTION AREA. THE CONTRACTOR SHALL REPAIR AND/OR REPLACE ANY DAMAGED ITEM DUE TO HIS CONSTRUCTION ACTIVITIES TO EQUAL OR BETTER THAN PRE-CONSTRUCTION CONDITIONS AT NO ADDITIONAL COST TO THE OWNER.
3. THE CONTRACTOR SHALL USE APPROPRIATE TECHNIQUES, AS APPROVED, RECOMMENDED OR OFFERED BY DUKE ENERGY TO PREVENT UNDERMINING OF POWER POLES DURING CONSTRUCTION. IF HOLDING OF POWER POLES IS RECOMMENDED OR REQUIRED BY THE UTILITY, THE CONTRACTOR SHALL COORDINATE THIS ACTIVITY WITH THE UTILITY AND BEAR ALL RELATED COSTS.
4. ANY TEMPORARY SHUTDOWNS FOR MODIFICATIONS OF EXISTING UTILITY SYSTEMS THAT MUST REMAIN IN SERVICE DURING CONSTRUCTIONS SHALL BE KEPT TO A MINIMUM AND SHALL BE COORDINATED WITH AND APPROVED BY THE CITY OF ST. PETE BEACH UTILITY OPERATIONS DEPARTMENT IN ACCORDANCE WITH THE CONTRACT DOCUMENTS. IT IS NOTED THAT TEMPORARY SHUTDOWNS MAY BE RESTRICTED TO CERTAIN HOURS AT ANY TIME OF THE DAY OR NIGHT AND WILL BE COMPLETED AT NO ADDITIONAL COST TO THE OWNER.
5. FOR WORK BEING DONE ON EXISTING SANITARY SEWER LINES, THE CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTAINING THE FLOW OF ALL SEWAGE DURING CONSTRUCTION, WHICH MAY REQUIRE BY-PASS PUMPING AND/OR PUMPER TRUCKS. THE CONTRACTOR SHALL SUBMIT A DETAILED BY-PASS PUMPING PLAN.
6. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING WITH THE JURISDICTIONAL BODIES AND UTILITY COMPANIES LISTED ON THE COVER SHEET OF THIS PLAN SET.

RESTORATION

1. ALL RESTORATION WORK PERFORMED THROUGHOUT THE PROJECT SHALL CONFORM TO EXISTING LINES AND GRADES UNLESS SHOWN OTHERWISE.
2. ALL DISTURBED GRASSED AREAS SHALL BE SODDED OR SEEDED UNLESS OTHERWISE INDICATED, THE TYPE OF SOD USED TO REPLACE OWNER MAINTAINED AREAS IN RIGHT-OF-WAY SHALL BE COORDINATED WITH THE PROPERTY OWNER.
3. ALL CONCRETE THRUST BLOCKS INSTALLED FOR TESTING PURPOSES AND NOT REQUIRED FOR THE OPERATION OF THE PIPELINE SHALL BE REMOVED AND DISPOSED OF BY THE CONTRACTOR, PRIOR TO FINAL ACCEPTANCE, AT NO ADDITIONAL COST TO THE OWNER.
4. ASPHALT DRIVES THAT ARE CUT SHALL BE RESTORED PER SPECIFICATIONS AND/OR DETAILS
5. WHENEVER A PERMANENT ROADWAY SURFACE IS NOT PLACED IMMEDIATELY AFTER BACKFILLING AND COMPACTION OF THE NEWLY INSTALLED PIPE LINE IN AREAS WHERE TRAFFIC MUST PASS, THE CONTRACTOR SHALL INSTALL A TEMPORARY SURFACE CONSISTING OF NINE INCHES OF COMPACTED LIME ROCK BASE AND A COAT OF ASPHALT EMULSION. PERMANENT ROADWAY REPAIR SHALL BE PERFORMED A MAXIMUM OF TWENTY-ONE CALENDAR DAYS AFTER THE INITIAL OPEN CUTTING.
6. RESTORATION OF CURBS, DRIVEWAYS, SIDEWALKS, AND PLACEMENT OF SOD SHALL BE COMPLETED WITHIN FORTY-FIVE CALENDAR DAYS OF INITIAL DISTURBANCE, OR TWENTY-ONE CALENDAR DAYS OF SUBSTANTIAL COMPLETION, WHICHEVER OCCURS FIRST.
7. ALL EXISTING FENCES DISTURBED DURING CONSTRUCTION SHALL BE REPAIRED OR REPLACED AND REINSTALLED BY THE CONTRACTOR AT NO ADDITIONAL COST TO THE OWNER UNLESS SHOWN TO BE REMOVED ON CONSTRUCTION PLANS.

CONSTRUCTION

1. THE EXHAUST SYSTEM OF ALL GASOLINE AND DIESEL ENGINES SHALL BE EQUIPPED WITH MUFFLERS THAT MEET THE EQUIPMENT MANUFACTURERS REQUIREMENTS FOR NOISE SUPPRESSION. THE CONTRACTOR SHALL INSTALL NOISE ABATEMENT BAFFLES POSITIONED TO BREAK LINE-OF-SITE FROM THE NOISE SOURCE TO AFFECTED RESIDENCES, AS APPROVED BY THE ENGINEER.
2. NO MATERIAL SHALL BE STOCKPILED IN ROADWAYS. ALL DIRT AND DEBRIS SHALL BE REMOVED FROM THE JOB SITE DAILY. ROADS SHALL BE SWEPT DAILY AS PART OF DAILY CLEAN UP.
3. THE CONTRACTOR IS TO CONTROL ALL FUGITIVE DUST ORIGINATING ON THIS PROJECT BY WATERING OR OTHER METHODS AS REQUIRED.
4. INGRESS AND EGRESS TO ALL THE PROPERTIES IN THE CONSTRUCTION AREA SHALL BE MAINTAINED AT ALL TIMES.
5. PRIOR APPROVAL WILL BE REQUIRED FOR REMOVAL OF ANY TREE WITHIN THE CONSTRUCTION AREA.
6. THE CONTRACTOR SHALL PROVIDE ALL DEWATERING EQUIPMENT NECESSARY TO KEEP ALL EXCAVATIONS DRY. DEWATERING IS REQUIRED TO 18" BELOW TRENCH BOTTOM.
7. ALL PIPING AND FITTINGS USED ON THIS PROJECT SHALL BE AS NOTED ON THE PLANS AND IN THE CONTRACT DOCUMENT AND SHALL BE INSTALLED TO THE LINES AND GRADES SHOWN ON THE PLANS AND PROFILES.
8. ALL PIPE AND FITTINGS SHALL BE INSTALLED AS RECOMMENDED BY THE MANUFACTURER AND ALL PIPE JOINTS SHALL BE RESTRAINED.
9. ALL FITTINGS FOR PRESSURE CLASS-RATED PIPE SHALL BE RESTRAINED DUCTILE IRON & POLY WRAPPED. RESTRAINED LENGTHS OF PIPE SHALL ADHERE TO THE REQUIREMENTS AS SHOWN ON THE DETAIL SHEETS.
10. WHERE IT IS NECESSARY TO DEFLECT PIPE EITHER HORIZONTALLY OR VERTICALLY, PIPE DEFLECTION SHALL NOT EXCEED 75% OF THE MANUFACTURER'S MAXIMUM ALLOWABLE RECOMMENDED DEFLECTION.
11. ALL ROCKS OR STONES LARGER THAN SIX INCH DIAMETER SHALL BE REMOVED FROM THE BACKFILL MATERIAL. BACKFILL MATERIAL PLACED WITHIN ONE FOOT OF PIPING AND APPURTENANCES SHALL NOT CONTAIN ANY STONES LARGER THAN TWO INCH DIAMETER.
12. ALL NEW PIPE LINES SHALL BE PIG CLEANED (4" AND LARGER), FLUSHED, PRESSURE TESTED AND CERTIFIED PRIOR TO TIE-INS TO EXISTING FACILITIES. THE CONTRACTOR WILL BE ALLOWED TO USE TEMPORARY PLUGS FOR PIG CLEANING AND PRESSURE TESTING.
13. ALL TEST POINT PIPING SHALL BE CUT LOOSE FROM THE CORPORATION STOP AND COMPLETELY REMOVED AND DISPOSED OF BY THE CONTRACTOR PRIOR TO FINAL ACCEPTANCE. A CORPORATION STOP PLUG SHALL BE INSTALLED AND THE CORPORATION STOP SHALL REMAIN IN PLACE.
14. ALL EXISTING MAINS THAT ARE BEING REPLACED SHALL BE ABANDONED IN PLACE UPON ACCEPTANCE AND ACTIVATION OF THE NEW MAINS. ABANDONED MAINS SHALL BE CUT, FILLED WITH GROUT, AND CAPPED.
15. FIELD CONDITIONS MAY NECESSITATE MINOR ALIGNMENT AND GRADE DEVIATION OF THE PROPOSED UTILITIES TO AVOID OBSTACLES, AS ORDERED BY THE ENGINEER.

TRAFFIC CONTROL NOTES

1. TRAFFIC SHALL BE MAINTAINED IN ACCORDANCE WITH FDOT STANDARD PLANS INDEX 102 FOR MAINTENANCE OF TRAFFIC. DEVIATIONS FROM THE FDOT STANDARD PLANS INDEX REQUIRE A SIGNED AND SEALED MOT PLAN BE PROVIDED BY THE CONTRACTOR PRIOR TO BEGINNING CONSTRUCTION.
2. CONTRACTOR TO COORDINATE MOT FOR ALL CONCURRENT PROJECTS IN CONSTRUCTION WITHIN THE PROJECT AREA TO ENSURE CONFLICTS BETWEEN OVERLAPPING MOT PLANS DO NOT OCCUR.
3. CONTRACTOR TO COORDINATE WITH PINELLAS COUNTY SHERIFF'S OFFICE TO REDUCE UNLAWFUL USE OF ROADWAY DURING CONSTRUCTION.
4. ALL EXISTING PAVEMENT MARKINGS OUTSIDE THE CONSTRUCTION LIMITS THAT HAVE BEEN ALTERED BECAUSE OF CONSTRUCTION OPERATIONS SHALL BE REPLACED UPON THE COMPLETION OF THE PROJECT AT THE CONTRACTORS EXPENSE.
5. PEDESTRIANS, BICYCLES, AND WHEELCHAIRS:
   AT THE END OF EACH WORKDAY OR WHENEVER THE WORK ZONE BECOMES INACTIVE, ANY DROP-OFF ADJACENT TO A SIDEWALK SHALL BE BACKFILLED AT A SLOPE NOT TO EXCEED 1:4, OR SHALL BE PROTECTED IN ACCORDANCE WITH STANDARD PLANS INDEX 102 FOR MAINTENANCE OF TRAFFIC.
6. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE IMMEDIATE REMOVAL OF STORMWATER FROM THE ROADWAYS UTILIZED FOR TRAFFIC CONTROL IN A MANNER APPROVED BY THE ENGINEER.
7. ONE PORTABLE VARIABLE MESSAGE SIGN SHALL BE USED IN ADVANCE OF EACH LANE CLOSURE. THE FOLLOWING ARE SUGGESTED MESSAGES TO USE IN THE APPROPRIATE SITUATIONS:
   MESSAGE 1
   "RIGHT" OR "CENTER" OR "LEFT"
   "LANE" OR "LANE" OR "LANE"
   "CLOSED" OR "CLOSED" OR "CLOSED"
8. AT THE END OF EACH WORKING DAY'S ACTIVITY, TEMPORARY PAVEMENT MARKINGS AND TEMPORARY RPM'S SHALL BE INSTALLED PRIOR TO OPENING THE LANES UP FOR TRAFFIC.
9. ALL PAVEMENT MARKINGS, SIGNS, MARKERS, CHANNELIZATION REQUIRED TO PHASE WORK OR SHIFT TRAFFIC, SHALL UTILIZE STANDARD PLAN INDICES FOR PLACEMENT.
10. THE CONTRACTOR SHALL RESTRICT THE OPERATIONS SO THAT THE FIRST LIFT OF ASPHALT IS PLACED ON THE SAME DAY THAT THE LANES ARE MILLED, BEFORE OPENING THE LANES TO TRAFFIC. INSTALL TEMPORARY PAVEMENT MARKINGS AFTER THE FIRST LIFT AND PRIOR TO OPENING.
11. THE CONTRACTOR IS RESPONSIBLE TO RETIME THE TRAFFIC SIGNALS WITHIN THE PROJECT LIMITS (INCLUDING LIMITS OF WORK ZONE TRAFFIC CONTROL) THAT ARE POTENTIALLY AFFECTED DURING VARIOUS PHASES OF CONSTRUCTION.

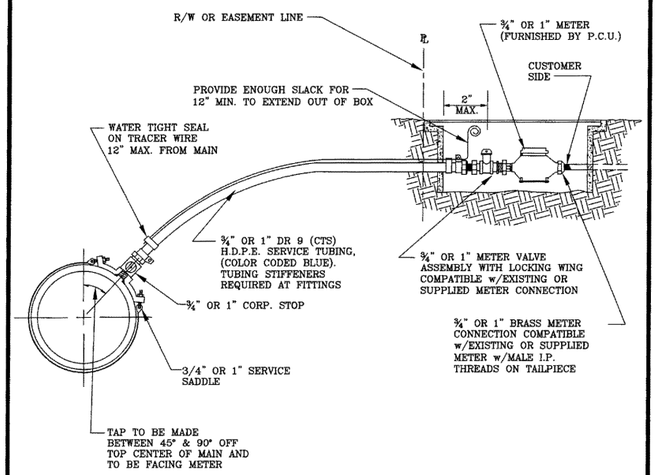
SCHEDULE

STAGE NO.	MATERIALS
1	BEDDING: WHERE DIRECTED, REPLACE EXISTING MATERIAL WITH 4" TO 6" OF GRANULAR MATERIAL. THE GRANULAR MATERIAL MAY BE ANY OF THE FOLLOWING: CLEAN NATIVE SAND, CONCRETE SAND, GRAVEL, OR RECLAIMED CONCRETE. SEE NOTE 1, BELOW. BOX CULVERTS SHALL HAVE MANDATORY STONE BEDDING PER SPECIFICATIONS.
2	PIPE BEDDING/HAUNCHING: NATIVE SAND IN 6" LIFTS, WHERE DIRECTED, REPLACE EXISTING MATERIAL WITH CLEAN CONSTRUCTION SAND, OR GRAVEL. SEE NOTE 2, BELOW
3	INITIAL BACKFILL: NATIVE SAND IN 6" LIFTS. WHERE DIRECTED, REPLACE EXISTING MATERIAL WITH CLEAN CONSTRUCTION SAND, SEE NOTE 2, BELOW
4	TRENCH BACKFILL: NATIVE SAND IN LIFTS AS LISTED BELOW– WHERE DIRECTED, REPLACE EXISTING MATERIAL WITH CLEAN CONSTRUCTION SAND. PAVED ROADWAYS, PAVED DRIVEWAYS, AND PAVED ALLEYS IN 6" LIFTS UNPAVED ROADWAYS, UNPAVED DRIVEWAYS, UNPAVED ALLEYS, AND SIDEWALKS IN 6" LIFTS SOD, OR MULCHED SURFACES IN 12" LIFTS
5	SURFACE RESTORATION: AS SHOWN BELOW. ALSO SEE NOTES BELOW FOR OTHER STANDARD DETAIL REFERENCES.



PRESSURE PIPE	X	STORM DRAIN–RCP, ERCP, B/C	X	OTHER PIPE/CONDUIT	X
4"	12"	UPTO 18"	12"	UPTO 5"	(2) OR (3)
6"	12"	21" TO 36"	18"	6" TO 18"	12"
8"	12"	42" TO 72"	24"	21" TO 36"	18"
12"	12"	BEYOND 72"	(2) OR (3)	42" TO 72"	24"

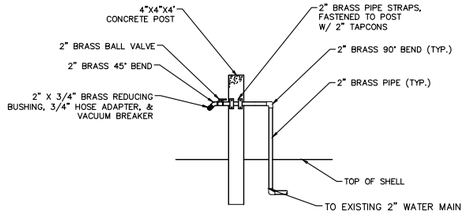
RECLAIMED SERVICE DETAIL
N.T.S. 3 D-01

TYPICAL PLAN VIEW

NOTES:
1. NON–CONFORMANCE WITH THE ITEMS LISTED OR SHOWN ON THIS DETAIL MAY RESULT IN A "STOP WORK"
2. THE PURPOSE OF THIS DETAIL IS TO ASSIST THE DEVELOPER, BUILDER, AND/OR CONTRACTOR TO MEET THE MINIMUM REQUIREMENTS OF THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT ISSUED TO THE CITY OF ST. PETERSBURG.
3. THIS DETAIL IS APPLICABLE FOR ALL CONSTRUCTION SITES AS DESCRIBED ABOVE OF LESS THAN ONE (1) ACRE; THOSE SITES GREATER THAN ONE (1) ACRE ALSO MUST OBTAIN COVERAGE UNDER AN NPDES
4. THE SILT BARRIER SHALL BE INSTALLED ONE FOOT INSIDE THE PROPERTY LINE OR TWO FEET FROM THE SIDEWALK AS SHOWN ABOVE. FOR SILT BARRIER REQUIREMENTS AND INSTALLATION REQUIREMENTS, SEE STANDARD DETAIL–STAKED SILT BARRIER; DRAWING NO. S40–92.
5. INSPECT AND MAINTAIN ALL EROSION CONTROL DEVICES DAILY AND/OR AFTER A RAINFALL.
6. FOR CURB INLET FILTER REQUIREMENTS, SEE STANDARD DETAIL–CURB INLET FILTER FOR EROSION CONTROL AT CATCH BASIN; DWG. NO. S40–93, OR FOR HAY BALE REQUIREMENTS, SEE STANDARD DETAIL–HAY BALES FOR EROSION CONTROL AT CATCH BASIN; DWG. NO. S40–94.
7. EXISTING GRASS VEGETATION SHALL BE MAINTAINED AT A 10 INCH HEIGHT OR LESS, AS PER CITY CODE, CHAPTER 16; SECTIONS 16–1070 THRU 1076.
8. ALL SOIL EROSION CONTROL DEVICES MUST REMAIN IN PLACE UNTIL NEW VEGETATION IS ESTABLISHED. ALL DISTURBED AREAS SHALL BE SODDED AFTER FINAL GRADING.
9. TEMPORARY AGGREGATE ENTRANCE SHALL BE A MINIMUM 6" THICK OF STANDARD GRADATION SIZE #1 OR #2 RANGE AS PER FDOT SECTION 901, AND SHALL BE COMPACTED. AGGREGATE SHALL BE QUARTZ OR CRUSHED GRANITE. LIMEROCK, DOLOMITE OR SANDSTONE SHALL NOT BE ACCEPTABLE.
10. IF THERE IS NO EXISTING DRIVEWAY OR AN ALTERNATE INGRESS/EGRESS IS TO BE USED DURING CONSTRUCTION, THE METHOD OF ACCESS SHALL CONFORM TO THE "TEMPORARY AGGREGATE ENTRANCE" AS DESCRIBED ABOVE. IF THE AGGREGATE IS DEEMED UNSAFE, THE ALTERNATE INGRESS/EGRESS SHALL BE CONSTRUCTED OF 1" ASPHALTIC CONCRETE OVER 6" OF COMPACTED LIMEROCK BASE.
11. REGULARLY REMOVE COLLECTED SEDIMENT AND DEBRIS FROM THE SILT BARRIERS AND GUTTER FLOW LINE.
12. FOR ALL SAND AND SOIL STOCKPILES DUST/EROSION CONTROL MEASURES SHALL BE IMPLEMENTED.
13. KEEP CONSTRUCTION SITE LITTER/DEBRIS, AND LEAKING CONTAINERS IN ORDERLY CONTAINMENT AREAS.
14. SWEEP ENTRANCE AND ADJACENT ROADWAY WEEKLY TO KEEP FREE OF CONSTRUCTION DEBRIS.
15. SWEEP PAVED SURFACES ONLY. DO NOT WASH DOWN UNTIL SITE IS FINISHED.
16. SINGLE FAMILY INFILL LOTS MAY REQUIRE SILT FENCE AS ORDERED OR DIRECTED BY THE CITY BUILDING OFFICIAL.

SITE DEVELOPMENT AND CONSTRUCTION STAGING SITE EROSION CONTROL DETAIL
N.T.S. 6 D-01



LOCATION OF PUBLIC WATER SYSYEM MAINS IN ACCORDANCE WITH F.A.C. RULE 62-555.314

Other Pipe	Horizontal Separation	Crossings (1)	Joint Spacing @ Crossings (Full Joint Centered)
Storm Sewer, Stormwater Force Main, Reclaimed Water (2)	Water Main 3 ft. minimum	Water Main 12 inches is the minimum, except for storm sewer, then 6 inches is the minimum and 12 inches is preferred	Alternate 3 ft. minimum Water Main
Vacuum Sanitary Sewer	Water Main 10 ft. preferred 3 ft. minimum	Water Main 12 inches preferred 6 inches minimum	Alternate 3 ft. minimum Water Main
Gravity or Pressure Sanitary Sewer, Sanitary Sewer Force Main, Reclaimed Water (4)	Water Main 10 ft. preferred 6 ft. minimum (3)	Water Main 12 inches is the minimum, except for gravity sewer, then 6 inches is the minimum and 12 inches is preferred	Alternate 6 ft. minimum Water Main
On-Site Sewage Treatment & Disposal System	10 ft. minimum	---	---

(1) Water main should cross above other pipe. When water main must be below other pipe, the minimum separation is 12 inches.
(2) Reclaimed water regulated under Part III of Chapter 62-610, F.A.C.
(3) 3 ft. for gravity sanitary sewer where the bottom of the water main is laid at least 6 inches above the top of the gravity sanitary sewer.
(4) Reclaimed water not regulated under Part III of Chapter 62-610, F.A.C.

Disclaimer – This document is provided for your convenience only. Please refer to F.A.C. Rule 62-555.314 for additional construction requirements.

PROJECT NO. 148404108

SHEET NUMBER D-02

GENERAL NOTES

1. THESE NOTES ARE NOT INTENDED TO REPLACE THE PROJECT SPECIFICATIONS OR CONSTRUCTION DRAWING NOTES & DETAILS. IN CASE OF CONFLICT BETWEEN THE REQUIREMENTS OF THE SPECIFICATIONS/CONSTRUCTION DRAWINGS AND THESE NOTES, THE MORE STRINGENT REQUIREMENT SHALL APPLY.
2. THE GOVERNING CODE FOR THIS PROJECT IS THE FLORIDA BUILDING CODE, EIGHTH EDITION (2023).
3. THE CONTRACT DOCUMENTS HAVE MADE NO INTENT TO GIVE SPECIFIC INSTRUCTIONS CONCERNINC THE MEANS, METHODS, TECHNIQUES, SEQUENCES, PROCEDURES AND ASSIGNMENT OF WORK.
4. THE CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR SUPERVISING AND DIRECTING THE WORK. TO THE BEST OF OUR KNOWLEDGE, THE DRAWINGS AND SPECIFICATIONS COMPLY WITH THE APPLICABLE REQUIREMENTS OF THE GOVERNING BUILDING CODE.
5. CONSTRUCTION SHALL COMPLY WITH REQUIREMENTS OF THE GOVERNING BUILDING CODE AND ALL OTHER APPLICABLE FEDERAL, STATE AND LOCAL CODES, STANDARDS, REGULATIONS AND LAWS.
6. THE STRUCTURAL DRAWINCS ARE TO BE USED IN CONJUNCTION WITH THOSE OF THE OTHER TRADES. IF A CONFLICT EXISTS, THE MORE STRINGENT REQUIREMENT SHALL APPLY.
7. CONTRACTOR SHALL VISIT EACH SITE AND BE FAMILIAR WITH THE PROPOSED WORK. TAKE FIELD MEASUREMENTS AND VERIFY ALL FIELD CONDITIONS, AND REPORT ANY DISCREPANCIES TO THE ENGINEER PRIOR TO CONSTRUCTION.
8. CONTRACTOR SHALL REVIEW ALL CONTRACT DOCUMENTS, DIMENSIONS AND SITE CONDITIONS AND COORDINATE WITH FIELD DIMENSIONS AND PROJECT SHOP DRAWINGS PRIOR TO CONSTRUCTION. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS GIVEN ON STRUCTURAL DRAWINGS RELATING TO GRID LINES, COLUMN AND WALL LOCATIONS, STRUCTURAL AND FINISHED FLOOR ELEVATIONS, MEMBER SIZES, ETC, WITH THE DRAWINGS OF OTHER TRADES BEFORE STARTING ANY WORK. REPORT ANY DISCREPANCIES VERBALLY AND IN WRITING IMMEDIATELY TO ENGINEER PRIOR TO PROCEEDING WITH WORK. WORK SHALL NOT COMMENCE UNTIL THE DISCREPANCIES ARE RESOLVED. DO NOT CHANGE SIZE OR DIMENSIONS OF STRUCTURAL MEMBERS WITHOUT WRITTEN INSTRUCTIONS FROM THE PROJECT ENGINEER OF RECORD.
9. DISCREPANCIES, OMISSIONS OR VARIATIONS NOTED ON THE DRAWINGS OR IN THE SPECIFICATIONS DISCOVERED DURING AND AFTER THE BIDDING PERIOD SHALL BE IMMEDIATELY COMMUNICATED IN WRITING TO THE ENGINEER.
10. CONTRACTOR SHALL PROTECT EXISTING FACILITIES, STRUCTURES AND UTILITY LINES FROM DAMAGE AND SHALL PROTECT HIS WORK, ADJACENT PROPERTY AND THE PUBLIC. CONTRACTOR IS SOLELY RESPONSIBLE FOR JOB SITE SAFETY, CONSTRUCTION PROCEDURES AND DAMAGE OR INJURY DUE TO HIS ACT OR NEGLECT.
11. CONTRACTOR SHALL SUITABLY DOCUMENT EXISTING CONDITIONS PRIOR TO COMMENCEMENT OF THE WORK, AND SHALL RESTORE ALL DAMAGED OR DISTURBED AREAS TO MEET OR EXCEED ORIGINAL SITE CONDITIONS TO THE OWNER'S SATISFACTION.
12. DO NOT REPRODUCE THE STRUCTURAL DRAWINGS FOR USE AS ERECTION, PLACING, FABRICATION OR SHOP DRAWINGS.
13. SCALING OF DRAWINGS SHALL NOT BE USED TO OBTAIN OR VERIFY ANY DIMENSION SHOWN ON THE DRAWINGS. THE CONTRACTOR SHALL REFER TO THE ENGINEER FOR INSTRUCTION FOR ANY DIMENSION NOT GIVEN ON DRAWINGS.
14. SEE DRAWINGS OF OTHER TRADES FOR SIZE AND LOCATION OF POSSIBLE ADDITIONAL OPENINGS IN STRUCTURES NOT SHOWN IN STRUCTURAL DRAWINGS.
15. DETAILS LABELED "TYPICAL DETAILS" ON THE DRAWINGS APPLY TO ALL SITUATIONS THAT ARE THE SAME OR SIMILAR TO THOSE SPECIFICALLY DETAILED. SUCH DETAILS APPLY WHETHER OR NOT THEY ARE KEYED IN AT EACH LOCATION. QUESTIONS REGARDING APPLICABILITY OF TYPICAL DETAILS SHALL BE RESOLVED BY THE ENGINEER.
16. CONTRACTOR SHALL PROVIDE 48 HOURS MINIMUM ADVANCE NOTICE TO ENGINEER FOR ALL REQUIRED FIELD REVIEWS.
17. CONTRACTOR SHALL COORDINATE WITH OWNER ALL ITEMS TO BE CONTRACTED, SUPPLIED OR INSTALLED BY OWNER.
18. CONTRACTOR IS RESPONSIBLE FOR ALL BUILDING, PERMIT, REVIEW, LICENSE AND DEVELOPMENT FEES REQUIRED TO COMPLETE THE PROJECT.
19. CONTRACTOR SHALL ASSEMBLE AND INSTALL MATERIALS AND PRODUCTS IN STRICT ACCORDANCE WITH THE MANUFACTURER'S INSTRUCTIONS AND WITH INDUSTRY/ASSOCI ATION STANDARDS.
20. MATERIALS OR WORK DESCRIBED IN WORDS WHICH HAVE A WELL- KNOWN TECHNICAL TRADE MEANING SHALL BE HELD TO REFER TO THE RECOGNIZED STANDARD. ALL MATERIALS SHALL BE NEW, U. O.N.
21. PROVIDE FIRE STOPPERS AND SEAL ALL PIPE AND CONDUIT PENETRATIONS THROUGH FIRE RATED FLOORS, WALLS AND CEILINGS IN ORDER TO PREVENT THE PASSAGE OF SMOKE OR FIRE. ALL SEALANTS AND RELATED PRODUCTS SHALL COMPLY WITH THE MINIMUM FIRE RATED REQUIREMENTS FOR THE FLOORS, WALLS AND CEILINGS. ONLY NON - COMBUSTIBLE MATERIALS SHALL BE USED AT PENETRATIONS.
22. MINOR DEVIATIONS FROM THE DESIGN LAYOUT ARE ANTICIPATED AND SHALL BE CONSIDERED AS PART OF THE WORK, HOWEVER, NO CHANGES THAT ALTER THE CHARACTER INTENT OF THE DESIGN WILL BE MADE WITHOUT A CHANGE ORDER..

UTILITES

1. CONTRACTOR SHALL LOCATE IN THE FIELD ALL UTILITIES OCCURRING WITHIN THE LIMITS OF EXCAVATION.
2. CONTRACTOR SHALL CALL SUNSHINE STATE ONE CALL OF FLORIDA, INC. (1—800—432—4770) AT LEAST 48 HOURS BEFORE COMMENCEMENT OF ANY EXCAVATION OPERATIONS ON SITE.
3. DATA CONCERNING TYPE AND LOCATION OF UNDERGROUND AND OTHER UTILITIES IS NOT GUARANTEED TO BE ACCURATE OR ALL-INCLUSIVE. THE CONTRACTOR IS RESPONSIBLE FOR MAKING HIS OWN DETERMINATIONS AS TO THE TYPE AND LOCATION OF UNDER GROUND AND OTHER UTILITIES AS MAY BE NECESSARY TO AVOID DAMAGE THERETO.

DOCUMENTS AND LIMITATIONS

1. THE DRAWINGS, CALCULATIONS, AND REPRODUCTIONS RELATING TO THE STRUCTURAL PART OF THE PROJECT ARE INSTRUMENTS OF SERVICE TO BE USED FOR THIS PROJECT ONLY.
2. IT IS UNDERSTOOD THAT THE ENGINEER MAKES NO WARRANTY, EITHER EXPRESSED OR IMPLIED, AS TO THE FINDINGS, DESIGNS, RECOMMENDATIONS, SPECIFICATIONS, OR PROFESSIONAL ADVICE EXCEPT THAT THESE INSTRUMENTS OF SERVICE HAVE BEEN PREPARED IN ACCORDANCE WITH CURRENT GENERALLY ACCEPTED PROFESSIONAL ENGINEERING PRACTICES.

SHOP DRAWINGS AND OTHER SUBMITTALS

1. REVIEW OF SUBMITTALS BY THE ENGINEER IS FOR GENERAL CONFORMANCE WITH THE DESIGN CONCEPT AS PRESENTED BY THE CONTRACT DOCUMENTS. NO DETAILED CHECK OF QUANTITIES OR DIMENSIONS WILL BE MADE. ONLY THOSE SUBMITTALS REQUIRED TO BE SUBMITTED WILL BE REVIEWED. ALL OTHERS WILL BE RETURNED WITHOUT REVIEW.
2. ALL SUBMITTALS HALL BE ACCOMPANIED BY A LETTER OF TRANSMITTAL. CONTRACTOR'S SUBMITTAL NUMBER SHALL BE INDICATED ON TRANSMITTAL. DO NOT COMBINE DIFFERENT SUBMITTALS ON THE SAME TRANSMITTAL. SUBMIT SHOP DRAWINGS IN A TIMELY MANNER, CONSISTENT WITH THE ABOVE, AND PRIOR TO FABRICATION, INSTALLATION OR COMMENCEMENT OF THE WORK. ALLOW UP TO 10 WORKING DAYS FOR ENGINEER TO REVIEW AND RETURN SHOP DRAWINGS. NUMBER OF COPIES OF EACH SUBMITTED SHOP DRAWING SHALL BE SUFFICIENT FOR ENGINEER TO RETAIN 2 COPIES.
3. ALL SUBMITTALS MUST BEAR EVIDENCE OF CONTRACTOR'S REVIEW (INCLUDIMG COMPANY STAMP AND DATED SIGNATURE OF REVIEWER) AND MUST BE APPROVED OR APPROVED AS NOTED BY HIM PRIOR TO SUBMITTING TO THE ENGINEER.
4. ALL CHANGES AND ADDITIONS MADE ON RESUBMITTALS MUST BE CLEARLY FLAGGED AND NOTED. THE PURPOSE OF THE RESUBMITTALS MUST BE CLEARLY NOTED ON THE LETTER OF TRANSMITTAL. ENGINEER REVIEW WILL BE LIMITED TO THOSE ITEMS CAUSING THE RESUBMITTAL.
5. DO NOT REPRODUCE THE STRUCTURAL DRAWINGS FOR USE AS ERECTION, PLACING OR FABRICATION DRAWINGS.
6. SUBMITTALS NOT MEETING THE ABOVE CRITERIA OR SUBMITTED AFTER FABRICATION WILL NOT BE REVIEWED.
7. SUBMITTALS:
   AS A MINIMUM, THE FOLLOWING SHALL BE SUBMITTED, AS APPLICABLE, TO THE ENGINEER FOR REVIEW AND COMPLIANCE WITH THE INTENT OF THE CONTRACT DOCUMENTS PRIOR TO FABRICATION, INSTALLATION, OR COMMENCEMENT OF THE WORK:
   A. CONCRETE, MORTAR AND GROUT MIX DESIGNS, INCLUDING ADMIXTURE DATA SHEETS.
   B. BILL OF REINFORCING AND LAYOUT.
   C. MISCELLANEOUS METAL FABRICATIONS.
   D. HANDRAIL, GUARDRAIL AND STAIR DETAILS, INCLUDING SUPPORT MEMBERS CONNECTIONS, AND CALCULATIONS
8. WELDER CERTIFICATIONS FOR ALL WELDERS SHALL BE SUBMITTED. CERTIFICATIONS MUST HAVE BEEN ISSUED WITHIN 3 YEARS PRIOR TO PERFORMING WORK ON THE PROJECT.
9. REQUESTS FOR SUBSTITUTIONS SHALL BE SUBMITTED IN WRITING TO THE ENGINEER FOR REVIEW. SUBMIT 3 COPIES OF ALL PRODUCT DATA AND CUT SHEETS AS NECESSARY TO SHOW COMPLIANCE WITH THE PROJECT REQUIREMENTS. CONTRACTOR SHALL BEAR THE BURDEN OF OBTAINING AUTHORIZATION FOR USE OF ITEMS TO BE SUBSTITUTED. ENGINEER'S DECISION REGARDING SUBSTITUTION SHALL BE FINAL.
10. FOR ADDITIONAL CRITERIA APPLICABLE TO SUBMITTALS REQUIRING ENGINEERING INPUT BY A DELEGATED ENGINEER, SEE BELOW.

DESIGN LOADS

1. SEE INDIVIDUAL PLAN SHEETS FOR DESIGN CRITERIA APPLICABLE TO SPECIFIC SITE COMPONENTS.
2. LOADS SHALL MEET THE MINIMUM DESIGN REQUIREMENTS SET FORTH IN THE FLORIDA BUILDING CODE, EIGHTH EDITION (2023), UNLESS A MORE STRINGENT REQUIREMENT IS INDICATED.
3. FILL HEIGHTS AS SHOWN ON THE PLANS.
4. SEE THIS SHEET FOR SPECIFIC DESIGN LOADS.
5. IT IS THE CONTRACTOR'S RESPONSIBILITY TO PROVIDE FOR SUPPORTING OF CONSTRUCTION LOADS THAT EXCEED THE ABOVE LOADINGS.

FOUNDATIONS/SLAB ON GRADE

1. A REPORT OF GEOTECHNICAL EXPLORATION HAS BEEN PREPARED FOR THIS PROJECT BY ARDAMAN & ASSOCIATES, INC., FILE NO. 25-9711, DATED MARCH 11, 2025.
2. FOUNDATION CONSTRUCTION, SITE PREPARATION AND SOIL PREPARATION BELOW FOUNDATION SHALL BE PERFORMED IN ACCORDANCE WITH REPORT OF GEOTECHNICAL EXPLORATION.
3. FOUNDATIONS SHALL BE SUPPORTED ON COMPACTED MATERIAL WITH A MINIMUM GROSS SOIL BEARING CAPACITY OF 2000 PSF, U.O.N. THE MODULUS OF VERTICAL SUBGRADE REACTION (K) FOR THE SLAB BEARING SOILS IS ASSUMED TO BE ON THE ORDER OF 100 PSI PER INCH OF VERTICAL DEFLECTION (PCI).
4. THE CONTRACTOR SHALL NOTIFY THE ENGINEER IMMEDIATELY OF ANY EXISTING FOUNDATION CONDITIONS OR DETAILS THAT ARE IN CONFLICT WITH THOSE INDICATED AND SHOWN ON THE DRAWINGS.
5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION, SHORING, UNDERPINNING, AND ISOLATION, ETC. OF ALL EXISTING FOUNDATION CONDITIONS AS REQUIRED TO PREVENT ANY DISTURBANCE TO EXISTING FOUNDATION CONDITIONS AS A RESULT OF THE WORK.
6. ANCHOR BOLTS SIDE SLEEVES AND OTHER EMBEDDED ITEMS ARE TO BE PLACED IN ACCORDANCE WITH THE CONTRACT DOCUMENTS.
7. TO HELP CONTROL SHRINKAGE CRACKS, AT SLAB ON GRADE PENETRATIONS COMPRISED OF BOX— OUTS AND CLOSELY SPACED OR BUNDLED CONDUITS, PIPES, ETC., PROVIDE DIAGONAL #4 BARS ABOUT PERIMETER OF PENETRATION AREA IN ADDITION TO TYPICAL SLAB REINFORCEMENT. ORIENT BARS NORMAL TO ANTICIPATED PATH OF CRACK FORMATION. BAR ENDS SHALL EXTEND 12 INCHES MINIMUM BEYOND OVERLAPS WITH ADJACENT BARS. PROVIDE 2 INCH CLEAR COVER TO TOP SURFACE OF SLAB.
8. CHAIR WELDED WIRE FABRIC (WWF) AND REINFORCING BARS DURING CONCRETE PLACEMENT TO ENSURE PROPER POSITION IN SLAB. CHAIRS SHALL BE OF NON-CORROSIVE MATERIAL INCLUDING, BUT NOT LIMITED TO, FIBER GLASS, PLASTIC, AND CONCRETE BLOCK.
9. FLOOR AND FOUNDATION SLAB SHALL BE WET CURED FOR A MINIMUM OF 7 DAYS PRIOR TO FURTHER CONSTRUCTION.
10. CRACK CONTROL JOINTS SHALL BE SAWCUT IN ACCORDANCE WITH ACI 301 AND ACI 302. COMPLETE SAWCUTTING WITHIN 12 HOURS AFTER CONCRETE PLACEMENT.
11. UNLESS OTHERWISE NOTED, PLACE CRACK CONTROL JOINTS AT 20 FEET MAX. SPACING SO AS TO LIMIT SURFACE AREA BETWEEN JOINTS TO 400 SQ. FT., AND SUCH THAT THE LENGTH — TO— WIDTH RATIO IS LESS THAN 1.5.
12. PLACE CRACK CONTROL JOINTS AT 10 FEET MAX. SPACING FOR SIDEWALKS AND/OR WALKWAYS, SUCH THAT THE LENGTH — TO— WIDTH RATIO IS LESS THAN 1.5.
13. SEE 'REINFORCED CONCRETE" NOTES FOR ADDITIONAL INFORMATION PERTAINING TO CONCRETE AND REINFORCEMENT.

DESIGN:
FLORIDA BUILDING CODE, EIGHTH EDITION (2023)

WIND LOADS - PER ASCE 7-22:

WIND SPEED (ULTIMATE)	160 MPH
RISK CATEGORY	III
EXPOSURE	D

DEAD LOAD:

EMPTY WEIGHT OF GENERATOR ASSEMBLY	3,434 LBS

LIVE LOAD:

GRATING AND CATWALK	100 PSF
STAIRS	100 PSF
PLATFORM LIVE LOADS	100 PSF
FUEL OF GENERATOR ASSEMBLY	1,270 LBS.

FLOOD LOAD:
SEE LIFT STATION ELEVATION TABLE
ON SHEET S1.1

DEFLECTION LIMIT FOR GRATING AND WALKWAYS = 0.25"

SUBMITTALS REQUIRING ENGINEERING INPUT BY DELEGATED (SPECIALTY) ENGINEER

1. DELEGATED ENGINEER:
   A. DEFINITION — A FLORIDA PROFESSIONAL ENGINEER WHO UNDERTAKES A SPECIALTY SERVICE AND PROVIDES SERVICES OR CREATIVE WORK (DELEGATED ENCINEERING DOCUMENT) REGARDING A PORTION OF THE ENGINEERING PROJECT. THE DELEGATED ENGINEER IS THE ENGINEER OF RECORD FOR THAT PORTION OF THE ENGINEERING PROJECT.
   B. SHALL BE: (1) AN INDEPENDENT CONSULTANT, (2) AN EMPLOYEE OR OFFICER OF AN ENTITY SUPPLYING COMPONENTS TO A FABRICATOR OR CONTRACTOR, SO LONG AS THE ENGINEER ACTS AS AN INDEPENDENT CONSULTANT OR THROUGH A DULY QUALIFIED ENGINEERING CORPORATION, OR (3) AN EMPLOYEE OR OFFICER OF A FABRICATOR OR CONTRACTOR, SO LONG AS THE ENGINEER ACTS AS AN INDEPENDENT CONSULTANT OR THROUCH A DULY QUALIFIED ENCINEERIN C CORPORATION.
2. SUBMITTALS FOR CUSTOM DESIGNED, MANUFACTURED OR FABRICATED LOAD - CARRYING ITEMS AND CUSTOM FABRICATED ITEMS WHICH ARE REQUIRED BY CODES OR STANDARDS TO RESIST FORCES AND STRESSES, INCLUDING THEIR CONNECTIONS, ANCHORAGES AND ATTACHMENTS REQUIRE A DELEGATED ENGINEER.
3. AS A MINIMUM, THE FOLLOWING SYSTEMS AND COMPONENTS REQUIRE FABRICATION AND ERECTION DRAWINGS WITH INPUT BY A DELEGATED ENGINEER:
   A. REDESIGN OF ANY STRUCTURAL ELEMENTS OR CONNECTIONS.
   B. TEMPORARY SHORING.
   C. HANDRAILS, GUARDRAILS, CATWALK /WALKWAYS, AND STAIRS.
4. FOR EACH CATEGORY OF SUBMITTALS REQUIRING INPUT FROM A DELEGATED ENGINEER, THE CONTRACTOR SHALL ATTACH TO THE FIRST SUBMITTAL A SIGNED AND SEALED LETTER FROM THE RESPONSIBLE DELEGATED ENGINEER STATING "I CERTIFY THAT THE DESIGN AND DRAFTING OF THE SHOP DRAWINGS WHICH ARE SIGNED AND SEALED BY ME WERE PREPARED UNDER MY DIRECT SUPERVISION AND CONTROL, AND TO THE BEST OF MY KNOWLED BE, THE SHOP DRAWINGS COMPLY WITH THE APPLICABLE MINIMUM BUILDING CODES AND THE CONTRACT DOCUMENTS."
5. SUBMITTALS SHALL CLEARLY IDENTIFY THE SPECIFIC PROJECT AND APPLICABLE CODES, LIST THE DESIGN CRITERIA, AND SHOW ALL DETAILS AND PLANS NECESSARY FOR PROPER FABRICATION AND INSTALLATION. CALCULATIONS AND SHOP DRAWINGS SHALL IDENTIFY SPECIFIC PRODUCTS UTILIZED. GENERIC PRODUCTS WILL NOT BE ACCEPTED.
6. SHOP DRAWINGS AND CALCULATIONS REQUIRE THE SEAL, DATE AND SIGNATURE OF THE DELEGATED ENGINEER. COMPUTER PRINTOUTS ARE AN ACCEPTABLE SUBSTITUTE FOR MANUAL COMPUTATIONS PROVIDED THEY ARE ACCOMPANIED BY SUFFICIENT DESCRIPTIVE INFORMATION TO PERMIT THEIR PROPER EVALUATION. SUCH DESCRIPTIVE INFORMATION SHALL BEAR THE IMPRESSED SEAL AND SIGNATURE OF THE DELEGATED ENGINEER AS AN INDICATION THAT HE HAS ACCEPTED RESPONSIBILITY FOR THE RESULTS.
7. CALCULATIONS ARE THE SOLE RESPONSIBILITY OF THE DELEGATED ENGINEER. CALCULATIONS ARE SUBMITTED TO THE ENGINEER FOR HIS RECORDS.
8. CATALOG INFORMATION ON STANDARD PRODUCTS (i. e. °'CUT SHEETS") DOES NOT REQUIRE THE SEAL OF A DELEGATED ENGINEER.
9. REVIEW BY THE PROJECT ENGINEER OF RECORD OF SUBMITTALS IS LIMITED TO VERIFYING THE FOLLOWING:
   A. THAT THE SPECIFIED STRUCTURAL SUBMITTALS HAVE BEEN FURNISHED.
   B. THAT THE STRUCTURAL SUBMITTALS HAVE BEEN SIGNED AND SEALED BY THE DELEGATED ENGINEER.
   C. THAT THE DELEGATED ENGINEER HAS UNDERSTOOD THE DESIGN INTENT AND HAS USED THE SPECIFIED STRUCTURAL CRITERIA. (NO DETAILED CHECK OF CALCULATIONS WILL BE MADE.)
   D. THAT THE CONFIGURATION SET FORTH IN THE STRUCTURAL SUBMITTALS IS CONSISTENT WITH THE CONTRACT DOCUMENTS. (N 0 DETAILED CHECK OF DIMENSION S OR QUANTITIES WILL BE MADE.)
10. SUBMITTALS NOT MEETING THE ABOVE CRITERIA, OR SUBMITTED AFTER FABRICATION, WILL NOT BE REVIEWED.

STRUCTURAL GENERAL NOTES

CITY OF ST. PETE BEACH
PUMP & LIFT STATION
REHABILITATIONS
PID# PS26-401-608-00
FLORIDA
PINELLAS COUNTY

DATE:
NOVEMBER 2025

PROJECT NO.
148404108

SHEET NUMBER
S-0.1

K:\STP_Civil\148404 - City of St. Pete Beach\108 - Lift Station Rehabilitation (LS 4, 5, 7, 9, 10, 11, 12, 13, 14, 15, 16 and SW LS 35)\CADD\Revit\LS 4, 7, 10\Structural\148404108 - LS Rehab Structural.rvt

WELDED WIRE FABRIC (WWF)

1. WWF SHALL BE IN ACCORDANCE WITH ASTM A185, PLAIN (SMOOTH) TYPE, IN FLAT SHEETS.
2. ALL WWF SHALL BE ACCURATELY PLACED, RIGIDLY SUPPORTED AND FIRMLY TIED IN PLACE WITH BAR SUPPORTS AND SPACERS. DO NOT PLACE WWF ON GRADE AND SUBSEQUENTLY RAISE INTO POSITION DURING CONCRETE PLACEMENT.
3. FOR SLABS ON GRADE, EXTEND WWF TO WITHIN 2 INCHES OF THE CONCRETE EDGE.
4. LAP EDGES AND ENDS OF WWF SHEETS A MINIMUM OF ONE MESH SPACING PLUS 2 INCHES.
5. LOCATE WWF 2 INCHES BELOW THE TOP SURFACE OF THE SLAB.
6. SEE "SLABS ON GRADE" NOTES ABOVE FOR ADDITIONAL REINFORCEMENT REQUIRED AT SLAB PENTRATIONS.

FORM WORK AND SHORING

1. PROVIDE, AS A PACKAGE, SHORING DRAWINGS PREPARED BY OR UNDER THE DIRECT SUPERVISION OF A DELEGATED ENGINEER.
2. FORMS SHALL CONFORM TO THE SHAPE, LINES AND DIMENSIONS OF THE MEMBERS AS CALLED FOR IN THE PLANS, AND SHALL BE SUBSTANTIAL AND SUFFICIENTLY TIGHT TO PREVENT LEAKAGE OF MORTAR. THEY SHALL BE PROPERLY BRACED OR TIED TOGETHER SO AS TO MAINTAIN POSITION AND SHAPE.
3. DESIGN FORMS AND SHORES FOR HORIZONTAL CONCRETE MEMBERS FOR ALL IMPOSED DEAD AND LIVE LOADS, BUT NOT LESS THAN DEAD LOAD (INCLUDING FILL HEIGHTS IF APPLICABLE) PLUS AASHTO HS20— 44 TRUCK CONSTRUCTION LIVE LOAD, WHERE APPLICABLE. DESIGN WOOD SHORES WITH A SAFETY FACTOR OF 3, AND METAL SHORES WITH A SAFETY FACTOR OF 2.
4. REMOVAL OF FORMWORK IS THE SOLE RESPONSIBILITY OF THE CONTRACTOR, HOWEVER FORMS SHALL NOT BE REMOVED LESS THAN 24 HOURS AFTER CONCRETE PLACEMENT. REMOVE FORMS IN SUCH A MANNER AS TO INSURE JOB SAFETY AND TO PREVENT DAMAGE TO AND CREEP DEFLECTION OF THE STRUCTURE.
5. THE SHORING IS TO BE INSPECTED BY THE DELEGATED ENGINEER OR HIS AUTHORIZED REPRESENTATIVE. PRIOR TO EACH CONCRETE POUR, HE SHALL SUBMIT A WRITTEN INSPECTION REPORT TO THE SPECIAL INSPECTOR AND CONTRACTOR STATING THAT THE WORK IS IN GENERAL COMPLIANCE WITH THE SHORING DRAWINGS. THE FIELD REPORTS SHALL BE SIGNED BY THE INDIVIDUAL CONDUCTING THE INSPECTION. COPIES OF THE FIELD REPORTS SHALL BE SUBMITTED EVERY WEEK TO THE ENGINEER, SPECIAL INSPECTOR AND BUILDING OFFICIAL UNDER A COVER LETTER SIGNED, SEALED AND DATED BY THE DELEGATED ENGINEER.
6. THE SHORING REPORT SHALL CONTAIN, AS A MINIMUM, THE FOLLOWING:
   A. NAME AND LOCATION OF PROJECT, NAME OF DELEGATED ENGINEER AND FIELD REPRESENTATIVE, PERMIT NUMBER, DATE, TIME OF DAY, WORKING CONDITIONS (INCLUDING WEATHER AND TEMPERATURE).
   B. ITEMS REQUIRING CORRECTIONS.
   C. ACCEPTED DEVIATIONS FROM SHORING DRAWINGS.
   D. AREAS ACCEPTED AND RELEASED FOR CONCRETE POURS.
7. AS SOON AS FORMS ARE REMOVED, ALL IRREGULAR PROJECTIONS SHALL BE CHIPPED OFF FLUSH WITH THE CONCRETE SURFACES. ALL VOIDS OR HONEYCOMBING SHALL BE POINTED UP WITH GROUT AND TROWELED FLUSH WITH THE CONCRETE SURFACE. ALL FORM TIES SHALL BE REMOVED TO A DEPTH OF 1-1/2 INCHES MINIMUM AND GROUTED FLUSH WITH THE CONCRETE SURFACE.

CLEAN —UP

1. THE CONTRACTOR SHALL AT ALL TIMES KEEP THE SITE FREE FROM ACCUMULATION OF WASTE MATERIALS OR RUBBISH CAUSED BY HIS EMPLOYEES.
2. CONTRACTOR SHALL VISUALLY INSPECT INTERIOR AND EXTERIOR SURFACES AND REMOVE ALL TRACES OF SOIL, WASTE MATERIALS, SMUDGES, STAINS, SPLASHED MATERIAL, PAINT DROPPINGS AND OTHER FOREIGN MATTER PRIOR TO COMPLETION OF THE WORK.

RECORD DRAWINGS

1. CONTRACTOR SHALL PREPARE AND MAINTAIN CURRENT A SET OF REDLINED DRAWINGS SHOWING ALL DEVIATIONS AND CHANGES MADE TO THE CONSTRUCTION DRAWINGS
2. DRAWINGS SHALL BE MADE AVAILABLE TO THE ENGINEER FOR REVIEW UPON REQUEST AT ANY TIME DURING THE COURSE OF THE PROJECT.
3. CONTRACTOR SHALL SUBMIT THE ORIGINAL DRAWINGS TO THE ENGINEER WITHIN ONE WEEK FROM THE DATE OF FINAL COMPLETION, AND PRIOR TO OWNER'S ACCEPTANCE OF CONTRACTOR'S FINAL IN VOICE.
4. SUBMITTED DRAWINGS WILL REMAIN THE PROPERTY OF THE ENGINEER.

BID ITEMS

1. PAYMENT FOR ALL INCIDENTALS IS TO BE INCLUDED IN THE PRICE BID FOR CONTRACT ITEMS.
2. COST FOR REMOVAL AND DISPOSAL OF VARIOUS MATERIALS, WHERE REQUIRED, SHALL BE INCLUDED IN THE PRICE BID FOR CONTRACT ITEMS.

ALUMINUM

1. ALUMINUM FABRICATION SHALL BE IN CONFORMANCE WITH THE ALUMINUM ASSOCIATION, INC. "SPECIFICATIONS FOR ALUMINUM STRUCTURES" (LATEST EDITION).
2. UNLESS NOTED OTHERWISE, MATERIALS SHALL BE:
   A. PLATE & SHEET — ASTM B 209; 6061— T6, 6061— T651 ALLOY.
   B. EXTRUDED SHAPES — ASTM B221; 6061— T6, 6061— T651 ALLOY. PIPE SECTIONS ARE SCHEDULE 40 U.N.0..
   C. CASTINGS — ASTM B108; 214 ALLOY.
3. ALUMINUM SHALL BE SEPARATED FROM DIRECT CONTACT WITH OTHER MATERIALS (STEEL, CONCRETE, ETC.) BY PRESSURE SENSITIVE TAPE, BITUMASTIC COATING, OR OTHER PROTECTIVE METHOD SUBMITTED BY THE CONTRACTOR AND APPROVED BY THE OWNER'S CONSTRUCTION REPRESENTATIVE.
4. WELDING ALUMINUM SHALL CONFORM TO AWS D1.2 & AWS A5.10 AND THE REQUIREMENTS OF THE ALUMINUM ASSOCIATIONS "ALUMINUM DESIGN MANUAL" (LATEST EDITION) TABLE 7.1—1 FOR WELD FILLERS FOR WROUGHT ALLOYS.
5. REFERENCE PROJECT SPECIFICATIONS FOR HANDRAIL & GUARDRAIL REQUIREMENTS.
6. FASTENERS: UNLESS NOTED OTHERWISE, ALL FASTENERS SHALL BE TYPE 316 STAINLESS STEEL MEETING THE REQUIREMENTS OF ASTM F593 OR ASTM A193 FOR BOLTS AND ASTM F594 OR ASTM A194 FOR NUTS.

REINFORCING STEEL

1. REINFORCING STEEL SHALL BE OF DOMESTIC MANUFACTURE AND IN ACCORDANCE WITH ASTM A615 WITH SUPPLEMENT, GRADE 60; MINIMUM WORKING STRESS OF 24, 000 PSI.
2. TOLERANCES FOR REINFORCING BAR FABRICATION SHALL CONFORM TO THE CURRENT CRSI MANUAL OF STANDARD PRACTICE.
3. ALL REINFORCING STEEL SHALL BE UNCOATED (BLACK) DEFORMED BARS AND SHALL BE FREE FROM LOOSE RUST, SCALE OR OTHER COATINGS.
4. ALL REINFORCING STEEL SHALL BE ACCURATELY PLACED, RIGIDLY SUPPORTED AND FIRMLY TIED IN PLACE WITH BAR SUPPORTS AND SPACERS. VERIFY THAT PLACEMENT OF REINFORCING STEEL WILL NOT CONFLICT WITH SUBSEQUENT INSTALLATION OF ANCHOR BOLTS, FASTENERS OR FIELD — DRILLED COMPONENTS.
5. UNLESS OTHERWISE NOTED, LAP BOTTOM STEEL OVER STRUCTURAL SUPPORTS AND TOP STEEL AT MIDSPAN.
6. ALL LAP LENGTHS SHALL BE IN ACCORDANCE WITH ACI 318 AND CRSI STANDARD PRACTICES LATEST EDITIONS, U.O.N.
7. HOOK DISCONTINUOUS ENDS OF ALL TOP BARS AND ALL BARS IN WALLS U.O.N.
8. ACI STANDARD HOOKS SHALL BE USED AS A MINIMUM, U. O.N.
9. ALL DIMENSIONS PERTAINING TO LOCATION OF REINFORCING BARS ARE TO CENTERLINE OF BARS EXCEPT WHERE THE CLEAR DIMENSION IS SHOWN TO FACE OF CONCRETE.
10. SUBMIT SHOP DRAWINGS TO ENGINEER FOR REVIEW PRIOR TO FABRICATING REINFORCING STEEL. DO NOT REPRODUCE THE STRUCTURAL DRAWINGS FOR USE AS PLACING DRAWINGS OR SHOP DRAWINGS.
11. PROVIDE CONSTRUCTION JOINTS IN ACCORDANCE WITH ACI 318 AND SUBMIT DRAWINGS SHOWING LOCATIONS AND DIRECTION OF POUR FOR ENGINEER'S REVIEW. PROVIDE KEYWAYS, WATERSTOPS AND ADEQUATE DOWELS AT ALL CONSTRUCTION JOINTS IN ACCORDANCE WITH THE STRUCTURAL DRAWINGS.
12. PROVIDE REINFORCING STEEL ERECTOR WITH A SET OF STRUCTURAL DRAWINGS FOR FIELD USE. INSPECT REINFORCING STEEL PLACEMENT FROM SHOP DRAWINGS.

REINFORCED CONCRETE

1. ALL CONCRETE MATERIALS, PLACING AND HANDLING SHALL BE IN ACCORDANCE WITH AMERICAN CONCRETE INSTITUTE PUBLICATIONS ACI 301, ACI 318 - LATEST EDITIONS.
2. CURING OF CONCRETE SHALL BE IN STRICT ACCORDANCE WITH ACI 301 PROVISIONS.
3. ALL STRUCTURAL CONCRETE SHALL HAVE A MINIMUM 28-DAY COMPRESSIVE STRENGTH OF OF 4000 PSI (MAX. W/CM=0.40).
4. USE NORMAL WEIGHT CONCRETE (135 PCF MIN.) FOR ALL STRUCTURAL MEMBERS. DO NOT USE CALCIUM CHLORIDE IN ANY CONCRETE.
5. PROVIDE A 4 INCH SLUMP WITH A TOLERANCE OF +/- 1 INCH. FOR WALLS 8 INCHES OR LESS IN THICKNESS, PROVIDE 5 INCH SLUMP WITH A TOLERANCE OF + 1/2 INCH AND -1 INCH.
6. IF CONCRETE IS PUMPED, SLUMP MAY BE INCREASED TO 6 INCHES AT THE TRUCK, PROVIDED THE SLUMP SPECIFIED ABOVE IS MAINTAINED AT THE DISCHARGE END. USE A MINIMUM 4 INCH PUMP. FOR PUMPED CONCRETE, TAKE CONCRETE SAMPLES FOR SLUMP TEST AT END OF TRUCK CHUTE AND AT DISCHARGE END OF HOSE, AND TAKE SAMPLES FOR CYLINDER TESTING AT DISCHARGE END OF HOSE.
7. WATER SHALL NOT BE ADDED TO CONCRETE AT THE JOBSITE UNLESS SPECIFIC AUTHORIZATION IS INDICATED ON THE DELIVERY TICKET. NOTIFY ENGINEER OF TOTAL QUANTITY OF WATER ADDED TO ANY TRUCK. REPEAT NECESSARY TESTING IF WATER IS ADDED AFTER INITIAL SAMPLING.
8. COARSE AGGREGATE SHALL CONFORM TO ASTM C33. PEAROCK AGGREGATE SHALL NOT BE USED.
9. ALL ANCHOR BOLTS SHALL BE ACCURATELY SET WITHIN A TOLERANCE OF +/- 1/16 INCH IN BOTH ELEVATION AND LOCATION.
10. ALL CONCRETE SHALL BE PLACED IN THE DRY. ALL FORMS SHALL BE FREE OF STANDING WATER.
11. ALL CONCRETE SHALL BE VIBRATED IN PLACE IN ACCORDANCE WITH ACI RECOMMENDED PRACTICES. NO PLACING OF CONCRETE WILL BE COMMENCED UNLESS THERE ARE A MINIMUM OF TWO OPERABLE CONCRETE VIBRATORS ON THE JOB SITE.
12. CONCRETE COVER OVER REINFORCING STEEL SHALL BE AS FOLLOWS, U.O.N.:
    A. CONCRETE CAST AGAINST EARTH OR EXPOSED TO LIQUID: 3 IN.
    B. ALL OTHER CONCRETE: 2 IN.
13. PROVIDE 3/4 INCH CHAMFERS ON ALL EXPOSED EDGES, EXCEPT AS OTHERWISE NOTED.
14. FORM TIES AND REINFORCING BAR SUPPORTS SHALL BE OF NON — CORROSIVE MATERIAL INCLUDING, BUT NOT LIMITED TO, FIBER GLASS, PLASTIC, AND CONCRETE BLOCK. BAR SUPPORTS PLACED ATOP VAPOR BARRIERS SHALL BE CONCRETE BLOCK.
15. ANY TIES, STRAPS OR OTHER METALLIC FORMWORK ITEMS SHALL BE REMOVED TO A DEPTH OF 1—1/2 INCHES MINIMUM BELOW FINISHED CONCRETE SURFACE. CONCRETE SHALL BE REPAIRED IN ACCORDANCE WITH ACI 301.
16. CONCRETE FINISHES:
    A. FORMED SURFACES SHALL RECEIVE A SMOOTH — FORM FINISH IN ACCORDANCE WITH ACI 301. OFFSET BETWEEN ADJACENT PIECES OF FORMWORK FACING MATERIAL SHALL NOT EXCEED "CLASS A" TOLERANCE REQUIREMENTS OF ACI 117 (i.e. 1/8 INCH MAX. OFFSET).
    B. SLAB SURFACES SHALL RECEIVE A TROWELED FINISH IN ACCORDANCE WITH ACI 301. FINISH TOLERANCES SHALL BE IN ACCORDANCE WITH "VERY FLAT" CLASSIFICATION REQUIREMENTS OF ACI 117 (i.e. 1/8 INCH MAX. IN 10 FEET).
    C. WHERE A NONSLIP FINISH IS REQUIRED (WALKWAY SURFACES), GIVE THE SURFACE A BROOM FINISH OR DRY— SHAKE APPLICATION OF FINELY CRUSHED ABRASIVE PARTICLES.
17. COORDINATE SIZE, TYPE AND LOCATION OF ALL PENETRATIONS, CONDUIT, CHAMFERS AND EMBEDDED ITEMS PRIOR TO CONCRETE PLACEMENT.
18. DO NOT IMPOSE SERVICE LOADS ON CONCRETE ELEMENTS UNTIL THE CONCRETE HAS REACHED ITS SPECIFIED MINIMUM COMPRESSIVE STRENGTH.
19. ALL GROUT FOR BASE PLATES SHALL BE HIGH STRENGTH NON — SHRINK, NON— METALLIC.
20. CONTRACTOR SHALL SUBMIT A CONSTRUCTION JOINT PLAN FOR THE ENGINEER'S REVIEW PRIOR TO CONSTRUCTION.

SCALE: 1/2" = 1'-0"

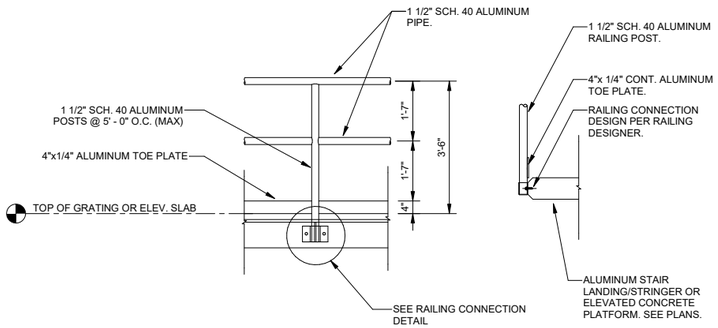
8 S-1.2 STAIR LANDING CONNECTION TO PLATFORM

SCALE: 1" = 1'-0"



NOTE: 1. DESIGN STAIRS, LANDING, RAILING AND HANDRAILS IN ACCORDANCE WITH THE CURRENT EDITION OF THE FLORIDA BUILDING CODE.
2. REFER TO LIFT STATION ELEVATION TABLE ON SHEET S1.1 FOR ELEVATIONS AND PLATFORM HEIGHT.
3. STAIR MANUFACTURER TO FIELD VERIFY EXISTING GRADE ELEVATION PRIOR TO FABRICATION AND CONSTRUCTION.

9 S-1.2 STAIR STRINGER CONNECTION AND POST CONNECTION TO FOUNDATION

SCALE: 1" = 1'-0"

DESIGN SPECIFICATIONS FOR FACTORY-INDUSTRIAL RAILING APPLICATIONS

1. RAILING SHALL BE DESIGNED IN ACCORDANCE WITH THE CURRENT EDITION OF THE FLORIDA BUILDING CODE.
2. THE MANUFACTURER SHALL SUBMIT CALCULATIONS SIGNED AND SEALED BY A FLORIDA REGISTERED PROFESSIONAL ENGINEER FOR REVIEW.
3. POST SPACING SHALL BE A MAXIMUM OF 5' - 0". POSTS AND RAILINGS SHALL BE A MINIMUM OF 1 1/2" SCH. 40 ALUMINUM PIPE, ALLOY 6063-T6, ASTM-B-429 OR ASTM-B-221. THE RAILING MANUFACTURER SHALL SHOW THAT THEIR POSTS ARE OF ADEQUATE STRENGTH TO MEET THE LOADING REQUIREMENTS. IF THE MANUFACTURER'S POSTS ARE NOT OF ADEQUATE STRENGTH, THE MANUFACTURER MAY REDUCE POST SPACING, OR ADD REINFORCING DOWEL, OR DO BOTH TO MEET LOADING REQUIREMENTS.
4. POSTS SHALL NOT INTERRUPT CONTINUATION OF THE TOP RAIL AT ANY POINT ALONG THE RAILING, INCLUDING CORNERS AND END TERMINATIONS (OSHA 191023). THE TOP SURFACE OF THE TOP RAILING SHALL BE SMOOTH AND UNINTERRUPTED BY PROJECTING FITTINGS.
5. THE MIDRAIL AT A CORNER RETURN SHALL BE ABLE TO WITHSTAND A 200 LB. LOAD WITHOUT LOOSENING. THE MANUFACTURER IS TO DETERMINE THIS DIMENSIONS FOR THEIR SYSTEM.
6. TOE PLATE SHALL CONFORM TO OSHA STANDARDS. TOE PLATE SHALL BE A MINIMUM OF 4" HIGH AND SHALL BE AN EXTRUSION THAT ATTACHES TO THE POSTS TO ALLOW FOR EXPANSION AND CONTRACTION BETWEEN POSTS. TOE PLATES SHALL BE SET 1/4" ABOVE THE WALKING SURFACE. TOE PLATES SHALL BE PROVIDED ON RAILINGS AS REQUIRED BY OSHA AND/OR AS SHOWN ON DRAWINGS.
7. FIELD WELDING OF THE ALUMINUM RAILING IS NOT ALLOWED.

GENERAL ELECTRICAL NOTES

1. THE COMPLETED INSTALLATION SHALL CONFORM TO ALL APPLICABLE FEDERAL, STATE AND LOCAL CODE ORDINANCES AND REGULATIONS. CONTRACTOR SHALL OBTAIN NECESSARY PERMITS AND INSPECTIONS REQUIRED BY THE AUTHORITIES HAVING JURISDICTION. ALL WORK SHALL BE DONE IN A NEAT, WORKMANLIKE, FINISHED AND SAFE MANNER, ACCORDING TO THE LATEST PUBLISHED N.E.C.A. STANDARDS OF INSTALLATION, UNDER COMPETENT SUPERVISION. INSTALL GROUNDING AS REQUIRED BY THE CODE(S).
2. VISIT THE SITE PRIOR TO BIDDING TO BECOME FAMILIAR WITH EXISTING CONDITIONS AND ALL OTHER FACTORS WHICH MAY AFFECT THE EXECUTION OF THIS WORK. INCLUDE ALL RELATED COSTS IN THE INITIAL BID PROPOSAL.
3. ALL MATERIALS SHALL BE NEW AND OF THE BEST QUALITY, MANUFACTURED IN ACCORDANCE WITH NEMA, ANSI, U.L. OR OTHER APPLICABLE STANDARDS. THE USE OF MANUFACTURER'S NAMES, MODELS, AND NUMBERS IS INTENDED TO ESTABLISH STYLE, QUALITY, APPEARANCE, USEFULNESS AND BID PRICE. PROPOSED SUBSTITUTIONS SHALL BE SUBMITTED IN WRITING AND REVIEWED BY THE ENGINEER BEFORE ORDERING.
4. PROTECT ALL ELECTRICAL MATERIAL AND EQUIPMENT INSTALLED AGAINST DAMAGE BY OTHER TRADES, WEATHER CONDITIONS OR ANY OTHER CAUSES. EQUIPMENT FOUND DAMAGED OR IN OTHER THAN NEW CONDITION WILL BE REJECTED AS DEFECTIVE.
5. LEAVE THE SITE CLEAN, REMOVE ALL DEBRIS, EMPTY CARTONS, TOOLS, CONDUIT, WIRE SCRAPS AND ALL MISCELLANEOUS SPARE EQUIPMENT AND MATERIALS USED IN THE WORK DURING CONSTRUCTION. ALL COMPONENTS SHALL BE FREE OF DUST, GRIT AND FOREIGN MATERIALS, LEFT AS NEW BEFORE FINAL ACCEPTANCE OF WORK.
6. ALL NEW EQUIPMENT AND WIRING IS SHOWN FULL TONE. EXISTING EQUIPMENT IS SHOWN IN HALF TONE.
7. CONTRACTOR SHALL FURNISH AND INSTALL A SEPARATE INSULATED GROUND CONDUCTOR IN ALL CONDUITS. ALL GROUND CONDUCTORS SHALL BE #12 AWG UNLESS NOTED OTHERWISE ON THE DRAWINGS.
8. CONTRACTOR SHALL COORDINATE THE EXACT LOCATION OF ALL UNDERGROUND CONDUITS AND DUCT BANKS TO AVOID INTERFERENCES WITH UNDERGROUND PIPING AND UTILITIES.
9. ALL CONDUIT, HANDHOLES, MANHOLES AND OTHER COMPONENTS IN THE BURIED ELECTRICAL SYSTEM SHALL BE LISTED FOR DIRECT BURIAL.
10. ALL CONDUIT PENETRATIONS THROUGH CONCRETE STRUCTURES SHALL BE INSTALLED THROUGH SLEEVED PENETRATIONS WITH MODULAR SEALS.
11. CONTRACTOR SHALL PROVIDE AND INSTALL 1250LB PULL TAPE IN ALL EMPTY CONDUITS.
12. ALL SAFETY SWITCHES AND OTHER DISTRIBUTION AND CONTROL ELECTRICAL EQUIPMENT SHALL BE U.L. LISTED AND RATED FOR HEAVY DUTY SERVICE.
13. ALL FASTENERS AND MOUNTING HARDWARE USED FOR THE INSTALLATION OF ELECTRICAL ITEMS SHALL BE 316 STAINLESS STEEL.
14. ALL ELECTRICAL EQUIPMENT, CONDUIT, WIRING, BOXES, ETC. SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW PRIOR TO ORDERING. THE SUBMITTALS SHALL BE NEATLY GROUPED AND ORGANIZED. PERTINENT INFORMATION SHALL BE HIGHLIGHTED, AND THE SPECIFIC PRODUCT SHALL BE IDENTIFIED. ALL SUBMITTALS SHALL BE COMPLETE, AND PRESENTED IN ONE PACKAGE. THE SUBMITTAL SHALL INCLUDE A COMPLETE LIST OF THE EQUIPMENT AND MATERIALS, INCLUDING THE MANUFACTURER'S NAME, PRODUCT SPECIFICATION, DESCRIPTIVE DATA, TECHNICAL LITERATURE, PERFORMANCE CHARTS, CATALOG CUTS, INSTALLATION INSTRUCTIONS, AND SPARE PART RECOMMENDATIONS FOR EACH DIFFERENT ITEM OF THE EQUIPMENT SPECIFIED.
15. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO ORGANIZE THEIR WORK, SO THAT A COMPLETE ELECTRICAL, INSTRUMENTATION, AND CONTROL SYSTEM FOR THE FACILITY WILL BE PROVIDED, AND WILL BE SUPPORTED BY ACCURATE SHOP AND RECORD DRAWINGS, AND O & M MANUALS.

ELEVATED ELECTRICAL EQUIPMENT RACK - VFD

CITY OF ST. PETE BEACH
PUMP & LIFT STATION REHABILITATIONS
PID# PS26-401-608-00
PINELLAS COUNY FLORIDA

DATE: DECEMBER 2025

PROJECT NO. 148404108

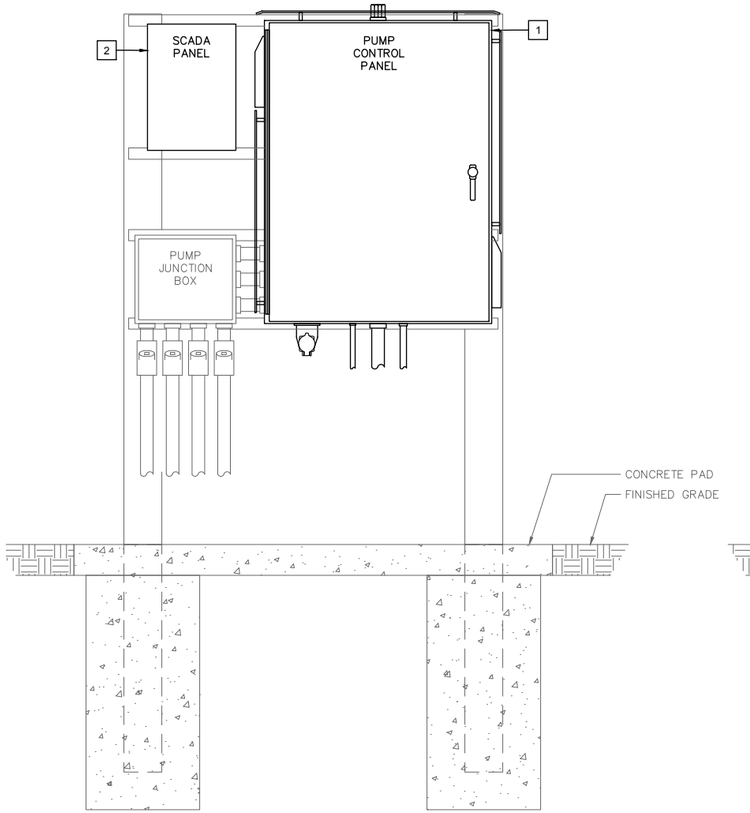
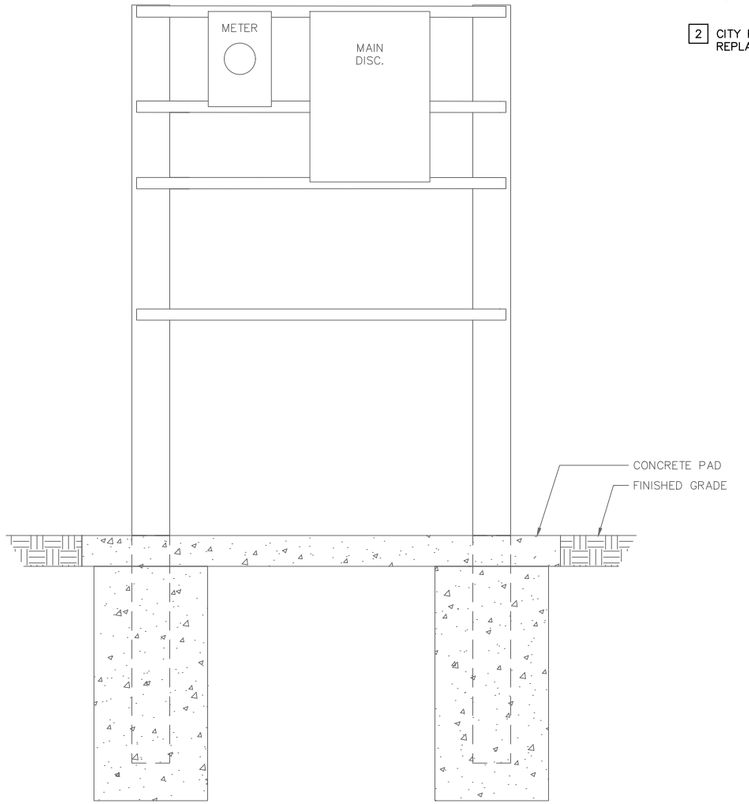
SHEET NUMBER E-24



GENERAL NOTES:

1. INSTALL CONDUITS AND CONDUCTORS FOR SERVICE AND EQUIPMENT GROUND AS REUQIRED BY APPLICABLE CODES AND SPECIFICATIONS.
2. REUSE EXISTING CONDUIT TO THE FULLEST EXTENT POSSIBLE.
3. CONDUITS SHOWN ARE REPRESENTATIVE ONLY. CONTRACTOR SHALL DETERMINE CONDUIT LOCATION AND ROUTING.
4. SEE ONE-LINE DIAGRAM ON SHEET E-17 FOR ADDITIONAL CONDUIT AND WIRING.



KEY NOTES:

1 REPLACE EXISTING PUMP CONTROL PANEL. SEE SHEETS E-35 THROUGH E-39 FOR PUMP CONTROL PANEL LAYOUT AND WIRING DIAGRAMS.

2 CITY PROVIDED AND INSTALLED SCADA PANEL AND ANTENNA. COORDINATE REPLACEMENT WITH THE CITY.

ADDENDUM 1

Wastewater Lift Stations Rehabilitation

Issued 3/30/2026

*Sealed bids must be received by **9:00 AM on 04/15/2026** electronically via Bonfire. They will be publicly opened and read at **11:00 AM EST on 04/15/2026**. All bidders are invited to attend this bid opening. Bids received after the deadline will not be accepted.*

Addendum 1 includes:
Corrected date of Bid Packages deadline from 4/18/2026 to 4/15/2026 – reference BID PACKAGES under III. GENERAL CONTRACT TERMS.

BID PACKAGES
Sealed bids will be accepted by the City until 04/15/2026 at 9:00 AM EST (Deadline). No bids shall be accepted by the City after this deadline – NO EXCEPTIONS. Bid Packages must be electronically submitted via Bonfire Clearly marked as: "Wastewater Lift Stations Rehabilitation." If a link is needed for either site, please contact the Procurement Manager (purchasing@stpetebeach.org.) All Bidders are invited to attend this bid opening.

Prebid Minutes
Questions and Answers

Optional - Pre-Bid Meeting Minutes
RFB: Wastewater Lift Stations Rehabilitation
March 25, 2026
11:00 AM

Staff Members Present:
Sara Spain, Procurement Manager
Ariana Wilson-Romo, Exec. Assistant City Clerk's Office
John Taylor, Assistant Finance Director
Shawn Clark, Public Services
Dejan Milosevic, Project Manager Public Services

Others Present:

Name	***Company***	***Contact***
Mike Ritcher	US Water Services	mritcher@uswatercorp.net
Brad Young	Custom Pump and Controls	b.young@custompump.com
Ryan Kievit	Technical Sales Corporation	ryan@tsctampa.com
Nia Tulloch	Atlantic Pipe Services	ntulloch@atlanticpipe.us
Amanda Gonzalez	Kimley Horn	Amanda.gonzalez@kimley-horn.com
Brandon Alderman	Kimley Horn	Brandon.alderman@kimley-horn.com
Sawyer Hill	Elite Industrial Painting Inc	sawyer@eipainting.com

The meeting was called to order at 11:02 AM.

All attendees were present via Teams.

Ms. Spain briefly reviewed important dates and times which are as follows:

- Receipt of questions due 4/1 at 10AM
- Bids due 4/15 by 9AM
- Bid opening 4/15 at 11AM

She requested that any questions be submitted in writing to purchasing@stpetebeach.org. Questions will be answered via an addendum that will be posted to the City website and Bonfire.

Shawn Clark summarized that this project is covering some of the lift station panels that got damaged during the hurricanes. There are about 9 or 10 of them total, with work ranging from straight panel replacements to complete rehabs of stations and adding generators in automatic transmissions or transfer switches for power.

Ms. Spain clarified that this is a request for bid, this project will be awarded to the lowest bidder.

The following questions were asked:
Q: Regarding the coding stroke, is it just for the valve bulb fittings, any gigs? A: Nothing more than a couple of plug valves and trick valves.
Q: Regarding the coding, are we just painting the piping inside the vault or coating the concrete also? A: Just the piping.
Q: Preferred SCADA provider? A: The City is currently bidding this however, the City is currently using Ellis Automated.
Q: Is the City supplying the radar transmitters? A: If needed the City can supply.
Q: Does the City have a panel provider? A: No, not at this time.

Q: Does the City have a preferred fence color for the vinyl fencing? A: No, but likely a white, almond, or stone.
Q: Staging area? A: Room may be tight but an area can be found to utilize.
Q: Lift station 4, the palm trees and shrubs will need to be removed. Will those be replaced? A: Removed and disposed of.
Q: Lift station 4 and 10, pump courts will have to be extended. Will new pumps be brought in or will the City be sending them off to get quartz put on? A: Will be answered via an addendum.
Q: Will a demo permit for the concrete demo be needed? Will permitting be through the City or through Pinellas? A: Will confirm with the permitting department, but believe all will be permitted through the City.

There being no additional questions, the meeting was adjourned at 11:13 AM.

Questions and Answers

Prebid Q: Regarding the valve vault, is it just for the valve bulb fittings, any guages? A: Nothing more than a couple of plug valves for bypass and check valves. There are typically two pressure gauges as well.

Prebid Q: Regarding the coating, are we just painting the piping inside the vault or coating the concrete also? A: Just the piping.

Prebid Q: Is the concrete in the vault getting coated? A: No, just the valves and fittings.

Prebid Q: Preferred SCADA provider? A: The City is currently bidding this however, the City is currently using Ellis Automated.

Prebid Q: Who will be setting up the SCADA? A: The City contractor will.

Prebid Q: Is the City supplying the radar transmitters? Who is responsible for supplying the radar transmitter? A: If needed the City can supply.

Prebid Q: Does the City have a panel provider? A: No, not at this time.

Prebid Q: Does the City have a preferred fence color for the vinyl fencing? 6ft Vinyl fence preferred color? A: Please bid white.

Prebid Q: Staging area? A: Room may be tight but an area can be found to utilize.

Prebid Q: Lift station 4, the palm trees and shrubs will need to be removed. Will those be replaced? A: The palms and shrubs are to be removed and disposed of.

Prebid Q: Lift station 4 and 10, pump cords will have to be extended. Will new pumps be brought in or will the City be sending them off to get added length put on? L/S 04 and L/S 10 pump cords will need to be lengthened, who will be responsible or will the City supply new pumps? A: City will be sending pumps off to get cords lengthened, if needed.

Prebid Q: Will a demo permit for the concrete demo be needed? Will permitting be through the City or through Pinellas? Permits needed and where to apply for? A: Demo permit will be needed. Permitting will be through the City. Apply on City website.

155 Corey Avenue
St. Pete Beach, FL 33706-1839
www.stpetebeach.org

ADDENDUM 3

Wastewater Lift Stations Rehabilitation

Issued 4/9/2026

*Sealed bids must be received by **9:00 AM on 04/15/2026** electronically via Bonfire. They will be publicly opened and read at **11:00 AM on 04/15/2026.** All bidders are invited to attend this bid opening. Bids received after the deadline will not be accepted.*

Addendum 3 includes:

Questions and Answers
Lift Stations Exhibits

Questions and Answers

1. Does this project have any minority requirements/goals? NO
2. Does this project have any Davis Bacon requirements ? NO
3. Does this project have any Build by America requirements? NO
4. Does this project require a full time on site superintendent ? Contractor discretion
5. Does this project require an engineers field office? Field office is not required
6. Does this project have an engineers estimate? An engineering estimate was not included as part of this project
7. Please confirm the allowed work hours for this project. See 8th page of bid package under DETAILED SPECIFICATIONS
8. Does the City have a bypass plan? Does the City know the existing flow calcs at each station? Per specification Section 16 – Sanitary Sewer Bypass Pumping 16.03 The Contractor shall, within 30 days of the date of the Notice to Proceed, submit to the Project Manager a detailed Bypass Pumping Plan for each site by-pass pumping will be needed. City of St. Pete Beach Lift Station Exhibit are attached. Lift Station Exhibits provide design points for each Lift Station. Per specification Section 16 – Sanitary Sewer Bypass Pumping 16.04A By-pass pumping system shall consist of at least a primary pump and a backup pump. Each pump shall have a minimum pumping capacity of 150% of the anticipated peak flows. When bypassing a pump station, 150% of the lift station capacity (G.P.M. & T.D.H) shall be provided.
9. Please clarify if their is a specific rehab coating allowed. Contractor to reference Specifications Section 9 – Piping Material: Ductile Iron Piping and Fittings 9.07 Zinc/Epoxy/Fluoropolymer Protective Coatings
10. Would the City be open to accepting a Hot Dipped Galvanized platform, stairs & railing in lieu of aluminum ? The project shall be bid per plans
11. Does the City require a bid bond for this project? If so, what percent and shall we use a standard AIA form? No bid bond required
12. Please confirm which forms need to be included in the bid proposal. Contractor's Bid Submittal, Bid Form, References, Public Entity Criminal Affidavit, Non-Collusion Affidavit
13. Are all existing pumps flygt? Yes

ADDENDUM 4

Wastewater Lift Stations Rehabilitation

Issued 4/10/2026

*Note that this Addendum **DOES** change the bid due date and time as stated in the above referenced RFB. Sealed bids must be received by **9:00 AM on 05/06/2026** electronically via Bonfire. They will be publicly opened and read at **11:00 AM on 05/06/2026.** All bidders are invited to attend this bid opening. Bids received after the deadline will not be accepted.*

Addendum 4 includes:

1. Extension of bid due date to **9:00 AM ET on 05/06/2026**
2. Future addition to Scope: The City will be publishing another addendum the week of 04/20/2026 to add Lift Station 7 to the bid.

Wastewater Lift Stations Rehabilitation

Issued 4/24/2026

*Sealed bids must be received by **9:00 AM on 05/06/2026** electronically via Bonfire. They will be publicly opened and read at **11:00 AM on 05/06/2026.** All bidders are invited to attend this bid opening. Bids received after the deadline will not be accepted.*

Addendum 5 includes:

1. The overall summary of changes
2. Updated Bid Form
3. Lift Station 7 Rehab Plans including landscaping and irrigation
4. Modified Electrical Sheets
5. Added flow meter replacement sheets for Pump Stations 2 and 3
6. Updated Pay Item Descriptions

1. Overall Summary of Changes (behind this page)

City of St. Pete Beach

Lift Station Rehabilitation (LS 4, 5, 7, 9, 10, 11, 12, 13, 14, 15, 16 and SW LS 35)

Addendum #5

Summary of Changes

A. **The following plan sheets have been revised in per the City's request to modify electrical improvements:**

- **Revised: E-03, E-05, E-07, E-09, E-11, E-13, E-15, E-17, E-19, E-21, E-28, E-29, E-32, E-33, E-36, E-37, & E-38**

B. **The following plan sheets have been added/revised perthe City's request to include Lift Station 07 Improvements into the scope of work:**

- **Added: LS-7-01, LS-7-02, LS-7-03, L-01, L-02, L-03, IR-01, IR-02, IR-03**
- **Revised: S-1.1**

C. **The following plan sheets have been revised in accordance with the City's request to include Pump Station 2 and Pump Station 3 flow meter replacements into the scope of work:**

- **Added: PS2-1, PS3-1**

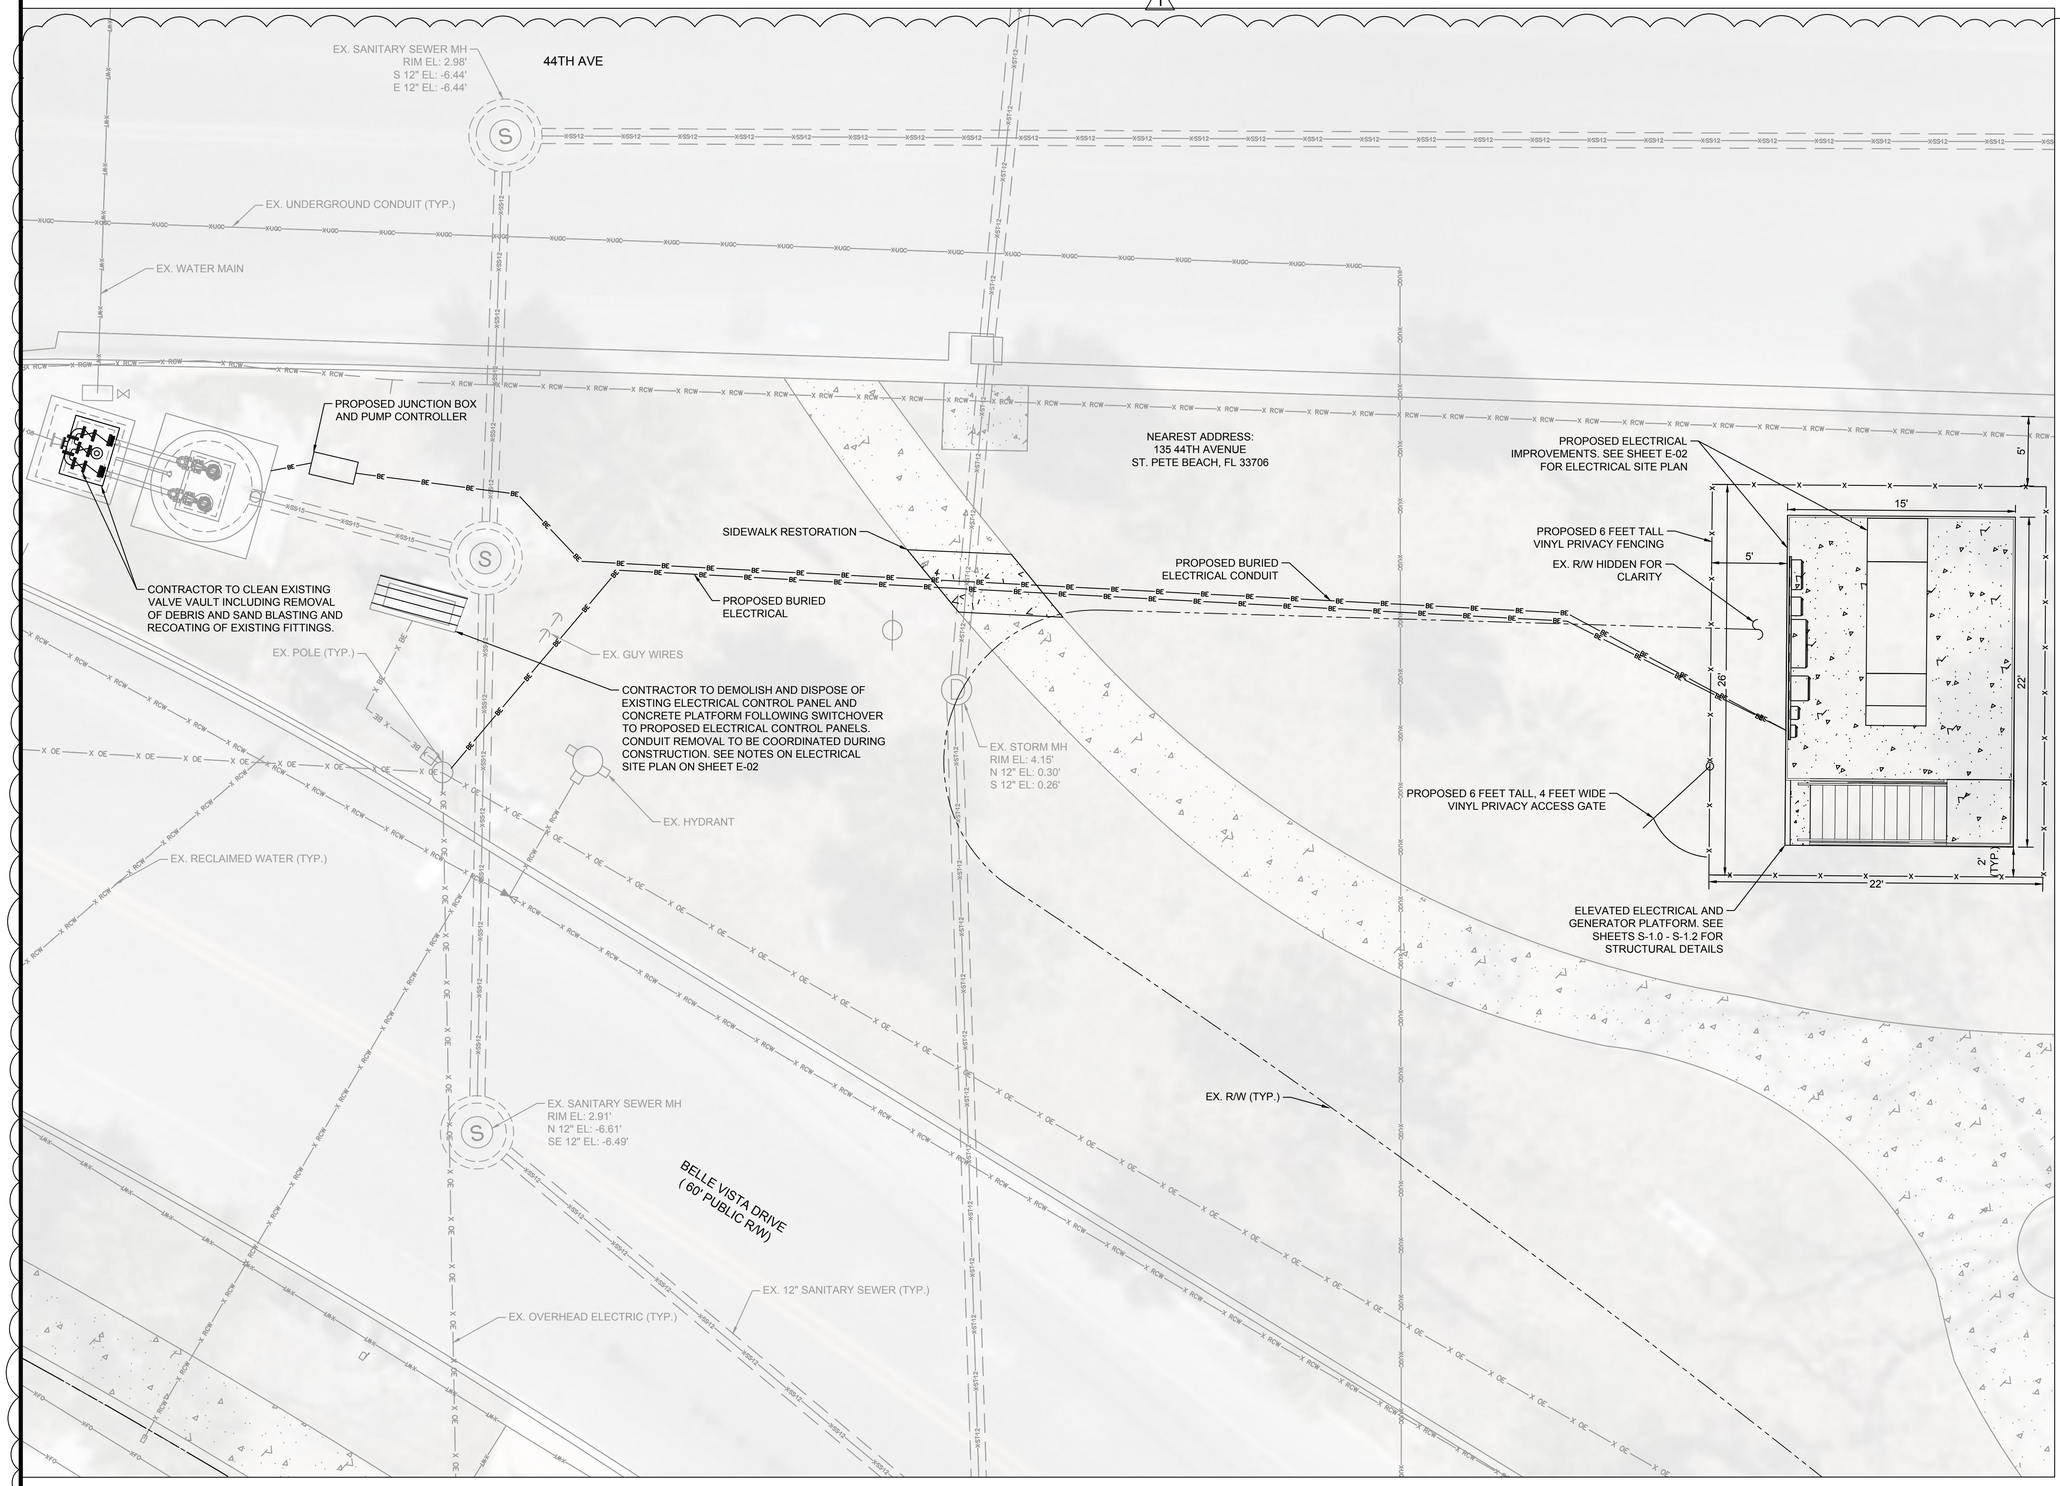
D. **The following sections of the Specifications has been revised in accordance with the responses to the bid questions:**

- **Specification Section 02 – Pay Item Descriptions; Bid Item 7 has been modified. Bid Items 25, 26, 27, and 28 are now included.**

E. **The following Bid Form Items have been revised in accordance with the responses to the bid questions:**

- **The following bid items have been added:**
  - **LS 07 Rehabilitation - Added 6 , 7, 9, 10, 11, 12, 13, 16, 25, 26, 27**
  - **Pump Station 2 Flow Meter Replacement – Added Bid Item 28**
  - **Pump Station 3 Flow Meter Replacement – Added Bid Item 28**

Note- Upon Contractor selection, the City will incorporate all changes into a single Plan Set & Specifications Package and issue Conformed Contract Documents.



2. Updated Bid Form (behind this page)

GENERAL NOTES:

1. CONTRACTOR SHALL FIELD VERIFY EXISTING CONDITIONS PRIOR TO BEGINNING CONSTRUCTION AND ORDERING EQUIPMENT. CONTRACTOR SHALL NOTIFY ENGINEER OF DISCREPANCIES
2. CONTRACTOR SHALL TAKE ALL PRECAUTIONARY MEASURES NECESSARY TO PROTECT EXISTING EQUIPMENT, UTILITIES, STRUCTURES, AND PERSONNEL FROM DAMAGE OR INJURY DURING CONSTRUCTION.
3. CONSTRUCTION SEQUENCE SHALL BE COORDINATED TO AVOID ANY FLOW INTERRUPTIONS.
4. ALL EXISTING MECHANICAL PIPING AND EQUIPMENT REMOVED SHALL BE SALVAGED PER SPECIFICATIONS.
5. CONTRACTOR IS RESPONSIBLE FOR DISPOSAL OF DEMOLISHED MATERIAL. DISPOSAL SHALL BE IN ACCORDANCE WITH ALL LOCAL, STATE, AND FEDERAL REGULATIONS.
6. PRESSURE WASHING AND CLEANING OF EXISTING WET WELL SHALL BE COMPLETED FOLLOWING EQUIPMENT REMOVAL AND BYPASSING OF THE LIFT STATION.
7. BYPASSING WILL BE REQUIRED FOR CONSTRUCTION. CONTRACTOR TO SUBMIT BY PASSING PLAN PRIOR TO BEGINNING CONSTRUCTION.
8. CONTRACTOR TO CLEAR AND GRUB AS NECESSARY FOR PROPOSED IMPROVEMENTS INCLUDING ELEVATED PLATFORM, SITE FENCING, AND PIPING/CONDUIT INSTALLATION
9. CONTRACTOR TO VERIFY SIZES PRIOR TO ORDERING MATERIALS

NOTES:

1. ALL PLANT SPECIFICATIONS IN THE PLANT SCHEDULE SHALL BE CONSIDERED THE MINIMUM ALLOWABLE SPECIFICATIONS. CONTRACTOR SHALL PROCURE PLANT MATERIALS AND UPSIZE AS NECESSARY TO MEET THE MOST STRINGENT SPECIFICATION.
2. LANDSCAPE ARCHITECT RESERVES THE RIGHT TO FIELD ADJUST ALL PLANT MATERIAL.
3. ALL QUANTITIES PROVIDED FOR CONVENIENCE ONLY. CONTRACTOR SHALL CONFIRM ALL QUANTITIES PER PLAN PRIOR TO BIDDING AND CONSTRUCTION.
4. CONTRACTOR SHALL SOD TO LIMITS OF DISTURBANCE, INCLUDING ANY DISTURBANCE WITHIN RIGHT-OF-WAY. ALL SOD TO BE NON-IRRIGATED BAHIA. CONFIRM FINAL SPECIES SELECTION WITH OWNER PRIOR TO INSTALLATION.
5. REFER TO SHEETS L-02 AND L-03 FOR LANDSCAPE NOTES AND DETAILS.

GROUNDWATER / DEWATERING NOTE:
THE PRESENCE OF GROUNDWATER SHOULD BE ANTICIPATED ON THIS PROJECT. CONTRACTOR'S BID SHALL INCLUDE CONSIDERATION FOR THIS ISSUE. WHEN PERFORMING GRADING OPERATIONS DURING PERIODS OF WET WEATHER, PROVIDE ADEQUATE DEWATERING, DRAINAGE AND GROUND WATER MANAGEMENT TO CONTROL MOISTURE OF SOILS.

LANDSCAPE SPECIFICATIONS

1. SCOPE OF WORK

1.1. THE WORK CONSISTS OF: FURNISHING ALL LABOR, MATERIALS, EQUIPMENT, TOOLS, TRANSPORTATION, AND ANY OTHER APPURTENANCES NECESSARY FOR THE COMPLETION OF THIS PROJECT AS SHOWN ON THESE PLANS.

1.2. WORK SHALL INCLUDE MAINTENANCE AND WATERING OF ALL CONTRACT PLANTING AREAS UNTIL CERTIFICATION OF ACCEPTANCE BY THE OWNER.

1.3. WORK SHALL BE COORDINATED WITH OTHER TRADES TO PREVENT CONFLICTS.

2. PROTECTION OF EXISTING AND PROPOSED SITE ELEMENTS

2.1. PROTECT ALL EXISTING SITE ITEMS, ALREADY COMPLETED OR ESTABLISHED AND DESIGNATED TO REMAIN FROM DAMAGE BY THE CONTRACTOR UNLESS OTHERWISE SPECIFIED. ALL DAMAGE RESULTING FROM THE CONTRACTOR'S WORK SHALL BE REPAIRED OR REPLACED TO THE SATISFACTION OF THE OWNER, AT NO COST TO THE OWNER.

2.2. MAINTAIN ALL NECESSARY BMP DEVICES THROUGHOUT THE DURATION OF ALL CONSTRUCTION ACTIVITIES.

2.3. WHERE APPLICABLE, SUBMIT A DETAILED PROJECT SPECIFIC WORK ZONE TRAFFIC CONTROL PLAN IN ACCORDANCE WITH THE APPROPRIATE REGULATORY AGENCY STANDARDS UNLESS THE WORK REQUIRES NOTHING MORE THAN A DIRECT APPLICATION OF FDOT STANDARD PLANS FOR ROAD AND BRIDGE CONSTRUCTION, INDEX 102-600.

2.4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL UTILITIES, WHETHER PUBLIC OR PRIVATE, PRIOR TO CONSTRUCTION ACTIVITIES. THE INFORMATION AND DATA SHOWN WITH RESPECT TO EXISTING UTILITIES IS APPROXIMATE. THE OWNER AND DESIGN PROFESSIONAL SHALL NOT BE RESPONSIBLE FOR THE ACCURACY AND COMPLETENESS OF ANY SUCH INFORMATION OR DATA. THE CONTRACTOR SHALL HAVE FULL RESPONSIBILITY FOR; REVIEWING AND CHECKING ALL SUCH INFORMATION AND DATA; LOCATING ALL UTILITIES PRIOR TO CONSTRUCTION; THE SAFETY AND PROTECTION THEREOF; REPAIRING ANY DAMAGE RESULTING FROM THE WORK. THE COST OF ALL WILL BE CONSIDERED AS HAVING BEEN INCLUDED IN THE CONTRACT PRICE. THE CONTRACTOR SHALL NOTIFY ANY AFFECTED UTILITY COMPANIES OR AGENCIES IN WRITING AT LEAST 48 HOURS PRIOR TO BEGINNING CONSTRUCTION. THE CONTRACTOR SHALL NOTIFY THE LANDSCAPE ARCHITECT IN WRITING WHEN ANY CONFLICT BETWEEN UTILITIES AND THESE PLANS EXIST PRIOR TO PLANTING.

2.5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL UNAUTHORIZED CUTTING OR DAMAGE TO PLANT MATERIAL EXISTING OR OTHERWISE. THIS SHALL INCLUDE COMPACTION AND SPILLING OF ANY DELETERIOUS MATERIALS WITHIN THE DRIP-LINE OF EXISTING TREES TO REMAIN. PLANT MATERIAL KILLED OR DAMAGED THAT IS MISSHAPEN AND/OR UNSIGHTLY SHALL BE REPLACED WITH LIKE SIZE AND KIND TO THE SATISFACTION OF THE OWNER OR REGULATORY AGENCY AT THE COST TO THE CONTRACTOR.

2.6. SEE TREE MITIGATION PLAN AND NOTES, IF APPLICABLE.

3. SUBMITTALS

3.1. SUBMIT MATERIAL SAMPLES LISTED BELOW FOR APPROVAL, ON SITE OR AS DETERMINED BY THE OWNER. UPON APPROVAL, DELIVERY OF MATERIALS MAY COMMENCE.

MATERIAL	SAMPLE SIZE
MULCH	ONE (1) GALLON PLASTIC BAG
SOIL MIXTURE	ONE (1) GALLON PLASTIC BAG
PLANTS	ONE (1) OF EACH VARIETY (OR TAGGED IN NURSERY)

3.2. SUBMIT TESTING RESULTS OF SOIL MIXTURE AS PER SECTION 6 BELOW.

4. PLANT MATERIALS

4.1. ALL PLANT MATERIAL SHALL CONFORM TO THE SPECIFICATIONS INDICATED ON THE DRAWINGS AND SHALL BE IN ACCORDANCE WITH GRADES AND STANDARDS FOR NURSERY PLANTS, LATEST EDITION, PUBLISHED BY THE FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES. ALL PLANTS SHALL BE FLORIDA GRADE NO. 1 OR BETTER AS DETERMINED BY THE FLORIDA DIVISION OF PLANT INDUSTRY. ALL MATERIALS SHALL BE SUBJECT TO APPROVAL BY THE OWNER OR OWNER'S REPRESENTATIVE. NO SUBSTITUTIONS SHALL BE MADE WITHOUT WRITTEN PERMISSION FROM THE LANDSCAPE ARCHITECT AND OWNER.

4.2. ALL TREE SPECIES INSTALLED SHALL BE MATCHED IN SIZE AND SHAPE UNLESS NOTED OTHERWISE.

4.3. PLANTS SHALL BE SUBJECT TO INSPECTION AND APPROVAL AT THE PLACE OF GROWTH, UPON DELIVERY TO THE SITE, DURING PROGRESS OF THE WORK AND/OR AFTER COMPLETION. REJECTED PLANTS SHALL BE REMOVED AND REPLACED IMMEDIATELY.

5. DIGGING AND HANDLING

5.1. PROTECT ROOTS OR ROOT BALLS OF PLANTS AT ALL TIMES FROM SUN, DRYING WINDS, WATER AND FREEZING, AS NECESSARY UNTIL PLANTING. NO PLANT MATERIAL SHALL BE HANDLED BY STEMS.

6. SOIL MIXTURE (PLANTING MEDIUM, PLANTING MIX, TOPSOIL MIX)

6.1. TEST EXISTING SOIL AND AMEND AS NECESSARY IN ACCORDANCE WITH THE GUIDELINES BELOW:

6.2. SOIL MIXTURE (PLANTING MEDIUM FOR PLANT PITS) SHALL CONSIST OF TWO PARTS OF TOPSOIL AND ONE PART SAND, AS DESCRIBED BELOW. SUBMIT SAMPLES AND PH TESTING RESULTS OF SOIL MIXTURE FOR OWNER'S REPRESENTATIVE APPROVAL PRIOR TO PLANT INSTALLATION OPERATIONS COMMENCE.

6.3. TOPSOIL FOR USE IN PREPARING SOIL MIXTURE FOR BACKFILLING PLANT PITS SHALL BE FERTILE, FRIABLE, AND OF A LOAMY CHARACTER; REASONABLY FREE OF SUBSOIL, CLAY LUMPS, BRUSH WEEDS AND OTHER LITTER; FREE OF ROOTS, STUMPS, STONES LARGER THAN 2" IN ANY DIRECTION, AND OTHER EXTRANEOUS OR TOXIC MATTER HARMFUL TO PLANT GROWTH. IT SHALL CONTAIN THREE (3) TO FIVE (5) PERCENT DECOMPOSED ORGANIC MATTER AND HAVE A PH BETWEEN 5.5 AND 7.0.

6.4. SAND SHALL BE COARSE, CLEAN, WELL-DRAINING, NATIVE SAND.

6.5. PLANT TREES IN THE EXISTING NATIVE SOIL ON SITE, UNLESS DETERMINED TO BE UNSUITABLE - AT WHICH POINT THE CONTRACTOR SHALL CONTACT OWNER'S REPRESENTATIVE TO DISCUSS ALTERNATE RECOMMENDATION PRIOR TO PLANTING.

7. WATER

7.1. PROVIDE WATER NECESSARY FOR PLANTING ESTABLISHMENT AND MAINTENANCE. WATER SHALL BE OF SATISFACTORY QUALITY TO SUSTAIN ADEQUATE PLANT GROWTH AND SHALL NOT CONTAIN HARMFUL, NATURAL OR MAN-MADE ELEMENTS DETRIMENTAL TO PLANTS.

7.2. WATERING/IRRIGATION RESTRICTIONS MAY APPLY - REFER TO PROPERTY'S JURISDICTIONAL AUTHORITY.

8. FERTILIZER

8.1. PROVIDE FERTILIZER APPLICATION SCHEDULE TO OWNER, AS APPLICABLE TO SOIL TYPE, PLANT INSTALLATION TYPE, AND SITE'S PROPOSED USE. SUGGESTED FERTILIZER TYPES SHALL BE ORGANIC OR OTHERWISE NATURALLY-DERIVED.

8.2. FERTILIZER RESTRICTIONS MAY APPLY - REFER TO PROPERTY'S JURISDICTIONAL AUTHORITY.

9. MULCH

9.1. MOISTEN MULCH MATERIAL AT THE TIME OF APPLICATION TO PREVENT WIND DISPLACEMENT, AND APPLIED AT A MINIMUM DEPTH OF THREE (3) INCHES. CONTRACTOR SHALL CLEAR MULCH FROM WITHIN A SIX (6) INCH RADIUS AROUND TRUNK / STEM FLARE. MULCH SHALL BE "FLORIMULCH", EUCALYPTUS MULCH, OR SIMILAR SUSTAINABLY HARVESTED MULCH UNLESS SPECIFIED OTHERWISE.

9.2. PROVIDE A THREE (3) INCH MINIMUM LAYER OF SPECIFIED MULCH OVER THE ENTIRE AREA OF EACH PLANTING BED AND TREE RING (SIX (6) FOOT DIAMETER MINIMUM).

10. CONTAINER GROWN STOCK

10.1. CONTAINER GROWN PLANTS SHALL HAVE BEEN GROWN IN IT'S CONTAINER SUFFICIENTLY LONG ENOUGH FOR THE NEW FIBROUS ROOTS TO HAVE DEVELOPED SO THAT THE ROOT MASS WILL RETAIN ITS SHAPE AND HOLD TOGETHER WHEN REMOVED FROM THE CONTAINER.

10.2. INSUFFICIENT OR POORLY STRUCTURED ROOT SYSTEMS ARE NOT ACCEPTABLE AND WILL BE REJECTED.

10.3. ROOTS PLUS GROWER (RPG) PRODUCTS SHALL BE USED WHERE SPECIFIED.

11. MATERIALS LIST

11.1. ALL QUANTITIES ARE PROVIDED FOR CONVENIENCE ONLY. CONTRACTOR SHALL CONFIRM ALL QUANTITIES PER PLAN PRIOR TO BIDDING AND CONSTRUCTION.

12. FINE GRADING

12.1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR FINE GRADING WHICH CONSISTS OF FINAL FINISHED GRADING (INCLUDING ADDITIONAL SOIL MIXTURE AS NEEDED) FOR LAWN AND PLANTING AREAS THAT HAVE BEEN ROUGH GRADED BY OTHERS. FINISH GRADE SHALL ACCOUNT FOR THICKNESS OF SOD AND/OR MULCH DEPTH.

12.2. ALL PLANTING AREAS SHALL BE GRADED AND MAINTAINED FOR POSITIVE DRAINAGE TO SURFACE/SUBSURFACE STORM DRAIN SYSTEMS. AREAS ADJACENT TO BUILDINGS SHALL SLOPE AWAY FROM THE BUILDINGS. REFER TO CIVIL ENGINEER'S PLANS FOR FINAL GRADES, IF APPLICABLE.

13. PLANTING PROCEDURES

13.1. CLEAN WORK AND SURROUNDING AREAS OF ALL RUBBISH OR OBJECTIONABLE MATTER DAILY. REMOVE ALL MORTAR, CEMENT, AND TOXIC MATERIAL FROM THE SURFACE OF ALL PLANT BEDS. DO NOT MIX THESE MATERIALS WITH THE SOIL SHOULD THE CONTRACTOR FIND SUCH SOIL CONDITIONS BENEATH THE SOIL WHICH WILL IN ANY WAY ADVERSELY AFFECT THE PLANT GROWTH, IMMEDIATELY CALL IT TO THE ATTENTION OF THE OWNER'S REPRESENTATIVE.

13.2. LOCATE, MAINTAIN AND PROTECT ALL UTILITIES ABOVE AND BELOW GROUND. CALL SUNSHINE STATE ONE CALL OF FLORIDA, INC. (811) TO LOCATE UTILITIES AT LEAST 48 HOURS PRIOR TO CONSTRUCTION.

13.3. NOTIFY LANDSCAPE ARCHITECT IN WRITING IMMEDIATELY IF CONFLICT(S) EXIST WITH PROPOSED TREE LOCATIONS AND EXISTING OVERHEAD POWER LINES IN ACCORDANCE WITH SETBACK REQUIREMENTS OF FPL'S "RIGHT TREE, RIGHT PLACE" PROGRAM. CONSULT THE UNIVERSITY OF FLORIDA'S "TREES AND POWER LINE" WEBSITE FOR TREE SIZE CATEGORIES.

13.4. NOTIFY LANDSCAPE ARCHITECT IN WRITING IMMEDIATELY IF CONFLICT(S) EXIST WITH PROPOSED TREE LOCATIONS AND EXISTING / PROPOSED LIGHT POLES. TREES INSTALLED IN CONFLICT WITH LIGHT POLES ARE SUBJECT TO RELOCATION AT THE EXPENSE OF THE CONTRACTOR.

13.5. REMOVE ALL EXISTING AND IMPORTED DELETERIOUS MATERIAL AND SUB-BASE FROM ALL LANDSCAPE PLANTING AREAS TO A MINIMUM DEPTH OF 36" OR TO NATIVE SOIL. CONTRACTOR IS RESPONSIBLE TO BACKFILL THESE PLANTING AREAS TO ROUGH FINISHED GRADE AS NEEDED WITH CLEAN SOIL MIXTURE.

13.6. FURNISH NURSERY'S CERTIFICATE OF COMPLIANCE WITH ALL APPLICABLE REQUIREMENTS. COMPLY WITH APPLICABLE FEDERAL, STATE, COUNTY, AND LOCAL REGULATIONS GOVERNING LANDSCAPE MATERIALS AND WORK.

13.7. EXCAVATE ALL PLANTING PITS IN ACCORDANCE WITH LANDSCAPE DETAILS PROVIDED. TEST ALL TREE PITS WITH WATER BEFORE PLANTING TO ASSURE PROPER DRAINAGE PERCOLATION IS AVAILABLE. IF POOR DRAINAGE EXISTS, NOTIFY LANDSCAPE ARCHITECT IMMEDIATELY IN WRITING. NO ALLOWANCE WILL BE MADE FOR LOST PLANTS DUE TO IMPROPER DRAINAGE. CONTRACTOR SHALL ENSURE ELIMINATION OF ALL AIR POCKETS AROUND ROOTS.

13.8. SET TREES AND SHRUBS STRAIGHT AT AN ELEVATION THAT, AFTER SETTLEMENT, THE PLANT CROWN WILL STAND ONE (1) TO TWO (2) INCHES ABOVE GRADE. EACH PLANT SHALL BE SET IN THE CENTER OF THE PIT. PLANTING SOIL MIXTURE SHALL BE BACK FILLED, THOROUGHLY TAMPED AROUND THE BALL, AND SETTLED BY WATER (AFTER TAMPING).

13.9. DO NOT COVER TOP OF BALL WITH SOIL MIXTURE. ALL BURLAP, ROPE, WIRES, BASKETS, ETC., SHALL BE REMOVED FROM UPPER ONE THIRD (1/3) OF ROOT BALLS.

13.10. ALL SUCKER GROWTH AND BROKEN OR BADLY DAMAGED BRANCHES SHALL BE REMOVED WITH A CLEAN CUT IN ACCORDANCE WITH ANSI A-300.

13.11. SHRUBS AND GROUND COVER PLANTS SHALL BE SPACED IN ACCORDANCE WITH THE DRAWINGS, LANDSCAPE DETAILS AND AS INDICATED ON THE PLANT LIST.

13.12. TREE GUYING AND BRACING SHALL BE INSTALLED BY THE CONTRACTOR IN ACCORDANCE WITH THE PLANS TO INSURE STABILITY AND MAINTAIN TREES IN A PLUMB AND UPRIGHT POSITION.

13.13. FAILURE TO FOLLOW THE ABOVE PLANTING PROCEDURE SHALL MAKE THE CORRECTIVE MEASURES THE RESPONSIBILITY OF THE CONTRACTOR.

14. LAWN SODDING

14.1. THE WORK CONSISTS OF LAWN BED PREPARATION, SOIL PREPARATION, AND SODDING NECESSARY TO PRODUCE A TURF GRASS LAWN ACCEPTABLE TO THE OWNER.

14.2. ALL AREAS THAT ARE TO BE SODDED SHALL BE CLEARED OF ANY ROUGH GRASS, WEEDS, AND DEBRIS TO A MINIMUM DEPTH OF THREE (3) INCHES. PROVIDE ONE (1) INCH OF TOPSOIL ACROSS ENTIRE LAWN BED AND MIX THROUGHLY INTO TOP FOUR (4) INCHES OF SOIL TO BRING THE GROUND TO AN EVEN GRADE. THE ENTIRE SURFACE SHALL BE ROLLED WITH A ROLLER WEIGHING NOT MORE THAN ONE-HUNDRED (100) POUNDS PER FOOT OF WIDTH. DURING THE ROLLING, ALL DEPRESSIONS CAUSED BY SETTLEMENT SHALL BE FILLED WITH ADDITIONAL TOPSOIL AND THE SURFACE SHALL BE REGRADED AND ROLLED UNTIL PRESENTING A SMOOTH AND EVEN FINISH TO THE REQUIRED GRADE.

14.3. HAND RAKE LAWN BED UNTIL ALL BUMPS AND DEPRESSIONS ARE REMOVED. WET PREPARED AREA THOROUGHLY.

14.4. SOD ALL AREAS THAT ARE NOT PAVED OR PLANTED AS DESIGNATED ON THE DRAWINGS WITHIN THE CONTRACT LIMITS, UNLESS SPECIFICALLY NOTED OTHERWISE.

14.5. THE SOD SHALL BE CERTIFIED TO MEET FLORIDA STATE PLANT BOARD SPECIFICATIONS, ABSOLUTELY TRUE TO VARIETAL TYPE, AND FREE FROM WEEDS, FUNGUS, INSECTS AND DISEASE OF ANY KIND.

14.6. SOD PANELS SHALL BE LAID TIGHTLY TOGETHER SO AS TO MAKE A SOLID SODDED LAWN AREA. SOD SHALL BE LAID UNIFORMLY AGAINST THE EDGES OF ALL CURBS AND OTHER HARDSCAPE ELEMENTS, PAVED AND PLANTED AREAS.

14.7. IMMEDIATELY FOLLOWING SOD LAYING, ROLL LAWN AREAS WITH A LAWN ROLLER AND THEN THOROUGHLY IRRIGATED.

14.8. IF, IN THE OPINION OF THE OWNER, TOP-DRESSING IS NECESSARY AFTER ROLLING TO FILL THE VOIDS BETWEEN THE SOD PANELS AND TO EVEN OUT INCONSISTENCIES IN THE SOD, CLEAN SAND, AS APPROVED BY THE OWNER'S REPRESENTATIVE, SHALL BE UNIFORMLY SPREAD OVER THE ENTIRE SURFACE OF THE SOD AND THOROUGHLY WATERED IN. FERTILIZE INSTALLED SOD AS ALLOWED BY PROPERTY'S JURISDICTIONAL AUTHORITY.

14.9. DURING DELIVERY, PRIOR TO, AND DURING THE PLANTING OF THE LAWN AREAS, THE SOD PANELS SHALL AT ALL TIMES BE PROTECTED FROM EXCESSIVE DRYING AND UNNECESSARY EXPOSURE OF THE ROOTS TO THE SUN. ALL SOD SHALL BE STACKED SO AS NOT TO BE DAMAGED BY EXCESSIVE HEAT AND MOISTURE.

14.10. WITHIN THE CONTRACT LIMITS, PRODUCE AND MAINTAIN A DENSE, WELL ESTABLISHED LAWN. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE REPAIR AND RE-SODDING OF ALL ERODED, SUNKEN OR BARE SPOTS UNTIL CERTIFICATION OF ACCEPTANCE BY THE OWNER'S REPRESENTATIVE. REPAIRED SODDING SHALL BE ACCOMPLISHED AS IN THE ORIGINAL WORK (INCLUDING REGRADING IF NECESSARY).

15. CLEANUP

15.1. UPON COMPLETION OF ALL PLANTING WORK AND BEFORE FINAL ACCEPTANCE, REMOVE ALL MATERIAL, EQUIPMENT, AND DEBRIS RESULTING FROM HIS WORK. ALL PAVED AREAS SHALL BE CLEANED AND THE SITE LEFT IN A NEAT AND ACCEPTABLE CONDITION AS APPROVED BY THE OWNER'S REPRESENTATIVE.

16. PLANT MATERIAL MAINTENANCE

16.1. ALL PLANT MATERIAL SHALL BE MAINTAINED BY WATERING, CULTIVATING, SPRAYING, AND ALL OTHER OPERATIONS (SUCH AS RE-STAKING OR REPAIRING GUY SUPPORTS) AS NECESSARY TO INSURE HEALTHY AND VIGOROUS GROWING CONDITIONS BY THE CONTRACTOR UPON DELIVERING TO THE SITE AND UNTIL FINAL ACCEPTANCE OF WORK.

17. FINAL INSPECTION AND ACCEPTANCE OF WORK

17.1. ALL PLANT BEDS SHALL BE KEPT FREE OF NOXIOUS WEEDS UNTIL FINAL ACCEPTANCE OF WORK. PRIOR TO FINAL INSPECTION, TREAT ALL PLANTING BEDS WITH AN APPROVED PRE-EMERGENT HERBICIDE PER MANUFACTURER RECOMMENDATIONS. (AS ALLOWED BY JURISDICTIONAL AUTHORITY)

17.2. PROVIDE WATERING/IRRIGATION SCHEDULE FOR ALL PLANT MATERIAL TO OWNER. OBSERVE ALL APPLICABLE WATERING RESTRICTIONS AS SET FORTH BY THE PROPERTY'S JURISDICTIONAL AUTHORITY.

17.3. UPON COMPLETION OF ALL WORK, A FINAL INSPECTION SHALL BE PERFORMED BY THE OWNER AND/OR OWNER'S REPRESENTATIVE. ALL PLANTING, CONSTRUCTION AND ALL OTHER INCIDENTAL WORK PERTAINING TO THIS CONTRACT SHALL BE INSPECTED FOR COMPLIANCE WITH THE CONTRACT DOCUMENTS. ANY ITEMS FOUND TO NOT BE IN COMPLIANCE SHALL BE CORRECTED AT THE COST OF THE CONTRACTOR.

18. WARRANTY

18.1. THE LIFE AND SATISFACTORY CONDITION OF ALL PLANT MATERIAL INSTALLED BY THE LANDSCAPE CONTRACTOR SHALL BE WARRANTED BY THE CONTRACTOR FOR A MINIMUM OF ONE (1) CALENDAR YEAR COMMENCING AT THE TIME OF CERTIFICATION AND ACCEPTANCE OF THE WORK BY THE OWNER AND/OR OWNER'S REPRESENTATIVE.

18.2. ANY PLANT NOT FOUND IN A HEALTHY GROWING CONDITION THROUGHOUT THE WARRANTY PERIOD SHALL BE REMOVED FROM THE SITE AND REPLACED AS SOON AS WEATHER CONDITIONS PERMIT. ALL REPLACEMENTS SHALL BE PLANTS OF THE SAME KIND AND SIZE AS SPECIFIED IN THE PLANT LIST. THEY SHALL BE FURNISHED, PLANTED AND MULCHED AS SPECIFIED AT NO ADDITIONAL COST TO THE OWNER. ANY REPLACED PLANT MATERIAL SHALL BE SUBJECT TO A NEW ONE (1) YEAR WARRANTY.

18.3. IN THE EVENT THE OWNER DOES NOT CONTRACT WITH THE CONTRACTOR FOR LANDSCAPE AND IRRIGATION MAINTENANCE, THE CONTRACTOR SHOULD VISIT THE PROJECT SITE PERIODICALLY DURING THE ONE (1) YEAR WARRANTY PERIOD TO EVALUATE MAINTENANCE PROCEDURES BEING PERFORMED BY THE OWNER. CONTRACTOR SHALL NOTIFY THE OWNER IN WRITING OF MAINTENANCE PROCEDURES OR CONDITIONS WHICH THREATEN VIGOROUS AND HEALTHY PLANT GROWTH.

19. ABBREVIATIONS

B&B -	BALLED AND BURLAPPED
BR -	BARE ROOT
CAL -	CALIPER
CT -	CLEAR TRUNK
DBH -	DIAMETER AT BREAST HEIGHT
FG -	FIELD GROWN
FTG -	FULL TO GROUND
GW -	GREY WOOD
HO -	HARDENED OFF
OA -	OVERALL HEIGHT
RPG -	ROOTS PLUS GROWER

GROUNDWATER / DEWATERING NOTE:
THE PRESENCE OF GROUNDWATER SHOULD BE ANTICIPATED ON THIS PROJECT. CONTRACTOR'S BID SHALL INCLUDE CONSIDERATION FOR THIS ISSUE. WHEN PERFORMING GRADING OPERATIONS DURING PERIODS OF WET WEATHER, PROVIDE ADEQUATE DEWATERING, DRAINAGE AND GROUND WATER MANAGEMENT TO CONTROL MOISTURE OF SOILS.

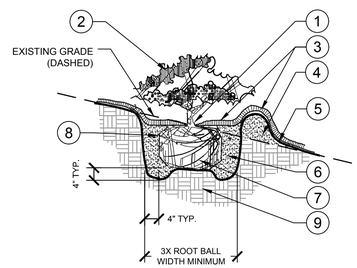
SHEET NUMBER
L-02

1. TOP OF SHRUB ROOTBALLS TO BE PLANTED 1" - 2" HIGH WITH SOIL MOUNDING UP TO THE TOP OF ROOTBALL.
2. PRUNE ALL SHRUBS TO ACHIEVE A UNIFORM MASS/HEIGHT.
3. 3" MULCH LAYER AS SPECIFIED.
4. EXCAVATE ENTIRE BED SPECIFIED FOR GROUNDCOVER BED.
5. FINISHED GRADE (SEE GRADING PLAN).
6. PREPARED PLANTING SOIL AS SPECIFIED. (SEE LANDSCAPE NOTES) NOTE: WHEN GROUND-COVERS AND SHRUBS USED IN MASSES, ENTIRE BED TO BE AMENDED WITH PLANTING SOIL MIX AS SPECIFIED.
7. SCARIFY OF PLANTING PIT SIDES AND BOTTOM.
8. 4" HIGH BERM FIRMLY COMPACTED.
9. UNDISTURBED NATIVE SOIL.
10. FERTILIZER TABLETS (MAX 3" DEEP)

NOTES:



A. CONTRACTOR SHALL ASSURE PERCOLATION OF ALL PLANTING PITS PRIOR TO INSTALLATION.

B. WHEN SHRUBS ARE PRUNED IN MASSES, PRUNE ALL SHRUBS TO ACHIEVE UNIFORM MASS / HEIGHT.

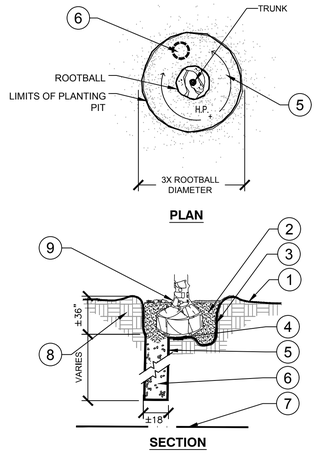
C. ALL SHRUBS AND GROUNDCOVERS SHALL BE PLUMB VERTICALLY, UNLESS OTHERWISE DIRECTED BY OWNERS REPRESENTATIVE.

1 SHRUB/GROUNDCOVER PLANTING

NTS P-LI-03

1. TOP OF SHRUB ROOTBALLS TO BE PLANTED 1" - 2" HIGH WITH SOIL MOUNDING UP TO THE TOP OF ROOTBALL.
2. PRUNE SHRUBS AS DIRECTED BY OWNER'S REPRESENTATIVE.
3. 3" MINIMUM OF MULCH AS SPECIFIED. WHERE SHRUBS ARE PLACED IN MASSES, MULCH SHALL BE SPREAD IN A CONTINUOUS BED.
4. SOIL BERM TO HOLD WATER. TOP OF PLANTING PIT 'BERM' TO BE LEVEL ACROSS PIT. SLOPE DOWNHILL PORTION OF BERM AS REQUIRED TO MEET EXISTING GRADE. MULCH OVER EXPOSED TOPSOIL.
5. FINISHED GRADE (SEE GRADING PLAN)
6. PREPARED PLANTING SOIL AS SPECIFIED. (SEE LANDSCAPE NOTES).
7. SCARIFY SIDES AND BOTTOM OF PLANTING PIT.
8. FERTILIZER TABLETS (MAX 3" DEEP).
9. UNDISTURBED NATIVE SOIL

NOTES:

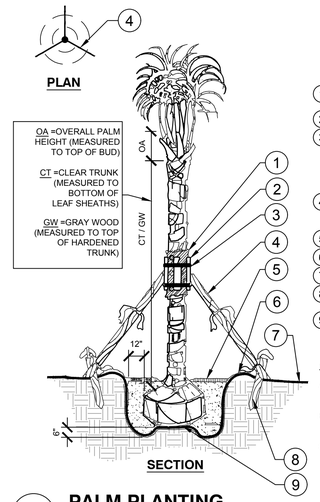


A. CONTRACTOR SHALL ASSURE PERCOLATION OF ALL PLANTING PITS PRIOR TO INSTALLATION.

B. WHEN SHRUBS ARE PRUNED IN MASSES, PRUNE ALL SHRUBS TO ACHIEVE UNIFORM MASS / HEIGHT.

C. ALL SHRUBS AND GROUNDCOVERS SHALL BE PLUMB VERTICALLY, UNLESS OTHERWISE DIRECTED BY OWNERS REPRESENTATIVE.

2 SHRUB/GROUNDCOVER PLANTING ON A SLOPE



NTS P-LI-05

1. FINISH GRADE (SEE GRADING PLANS).
2. BACKFILL WITH PREPARED PLANTING SOIL MIX AS SPECIFIED.
3. FILTER CLOTH, MIRAFI 500X OR BETTER.
4. SLOPE BOTTOM TO DRAIN.
5. AUGURED HOLE Ø ±18" PENETRATE THROUGH OCCLUDING LAYER TO WATER TABLE OR TO A DEPTH OF 7' TO ASSURE PROPER PERCOLATION.
6. BACKFILL WITH 1/2" - 3/4" GRAVEL TO REQUIRED DEPTH THROUGH OCCLUDING LAYER TO ASSURE PROPER PERCOLATION.
7. WATER TABLE. (DEPTH VARIES)
8. UNDISTURBED NATIVE SOIL.
9. SET ROOTBALL ON UNDISTURBED STABLE SUBSOIL SO THAT TOP OF ROOT BALL IS 1" ABOVE FINISHED GRADE.

3 POOR DRAINAGE CONDITIONS

NTS P-LI-09

1. 5 LAYERS OF BURLAP TO PROTECT TRUNK.
2. FIVE 2" X 4" X 18" WOOD BATTENS.
3. SECURE BATTENS WITH 2- 3/4" CARBON STEEL BANDS TO HOLD BATTENS IN PLACE. NO NAILS SHALL BE DRIVEN INTO PALM. HEIGHT OF BATTENS SHALL BE LOCATED IN RELATION TO THE HEIGHT OF THE PALM FOR ADEQUATE BRACING.
4. (3) 2"X4"X8' SUPPORTS. NAIL (DRILL AN NAIL IF NECESSARY) TO BATTENS AND 2" 4" STAKES. STAIN DARK BROWN.
5. 3" SPECIFIED MULCH
6. BERM SOIL TO HOLD WATER.
7. FINISH GRADE
8. 2X4X24" (MIN) P.T. WOOD STAKES (TYP.) NAIL TO SUPPORT POLES.
9. PREPARED PLANTING SOIL AS SPECIFIED. (SEE LANDSCAPE NOTES).

NOTES:

A. FINAL TREE STAKING DETAILS AND PLACEMENT TO BE APPROVED BY OWNER.

B. ALL TREE STAKING IS TO BE WITHIN MULCH BED AREA OUTSIDE TREE PIT.

C. CONTRACTOR SHALL ASSURE PERCOLATION OF ALL PLANTING PITS PRIOR TO INSTALLATION - REFER TO POOR DRAINAGE CONDITION DETAIL.

4 PALM PLANTING

NTS P-LI-11

GROUNDWATER / DEWATERING NOTE:

THE PRESENCE OF GROUNDWATER SHOULD BE ANTICIPATED ON THIS PROJECT. CONTRACTOR'S BID SHALL INCLUDE CONSIDERATION FOR THIS ISSUE. WHEN PERFORMING GRADING OPERATIONS DURING PERIODS OF WET WEATHER, PROVIDE ADEQUATE DEWATERING, DRAINAGE AND GROUND WATER MANAGEMENT TO CONTROL MOISTURE OF SOILS.

IRRIGATION CONTRACTOR IS RESPONSIBLE FOR PERFORMING ALL NECESSARY MODIFICATIONS REQUIRED TO MEET THE SCHEMATIC INTENT OF THESE PLANS PRIOR TO SUBMITTING PROPOSAL. THESE PLANS OUTLINE THE OVERALL LAYOUT OF THE SYSTEM AND IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO ZONE THE SYSTEM ACCORDINGLY BASED ON FLOW AND PRESSURE AVAILABLE. CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING THE FOLLOWING BUT NOT LIMITED TO AVAILABLE FLOW, AVAILABLE PRESSURE, CONNECTION ASSEMBLY, CAPACITY OF THE SYSTEM.

CONTRACTOR TO FIELD LOCATE EXISTING IRRIGATION EQUIPMENT(CONTROLLER, PUMP, ETC.). CONTRACTOR TO TURN ON IRRIGATION SYSTEM AND EVALUATE PERFORMANCE. MODIFICATION TO THE SYSTEM SHALL BE MADE BY THE GENERAL CONTRACTOR. CONTRACTOR RESPONSIBLE FOR PROVIDING THE PROPER WATER TO ALL NEW VEGETATION CONDUCIVE FOR ESTABLISHING/ MAINTAINING THE HEALTH AND VIGOR OF ALL PLANT MATERIAL. COORDINATE ANY REPAIRS/MODIFICATIONS WITH ALL ASSOCIATED PARTIES INVOLVED. CONTRACTOR RESPONSIBLE FOR ENSURING ALL NEW/EXISTING PLANT MATERIAL TO BE PROPERLY IRRIGATED.

VALVE SCHEDULE

NUMBER	MODEL	SIZE	TYPE	GPM	PSI	PSI @ POC	PRECIP
1	HUNTER ICV-G-FS	2"	SHRUB ROTARY	3.35	40.8	54.8	0.36 in/h

GROUNDWATER / DEWATERING NOTE:
THE PRESENCE OF GROUNDWATER SHOULD BE ANTICIPATED ON THIS PROJECT. CONTRACTOR'S BID SHALL INCLUDE CONSIDERATION FOR THIS ISSUE. WHEN PERFORMING GRADING OPERATIONS DURING PERIODS OF WET WEATHER, PROVIDE ADEQUATE DEWATERING, DRAINAGE AND GROUND WATER MANAGEMENT TO CONTROL MOISTURE OF SOILS.

IRRIGATION SPECIFICATIONS

1. SCOPE OF WORK

1.1. THE WORK CONSISTS OF: FURNISHING ALL LABOR, MATERIALS, EQUIPMENT, TOOLS, TRANSPORTATION, AND ANY OTHER APPURTENANCES NECESSARY FOR THE COMPLETION OF THIS PROJECT AS SHOWN ON THESE PLANS.

1.2. INSTALL THE IRRIGATION SYSTEM TO PROVIDE 100% UNIFORM COVERAGE INCLUDING ANY CHANGES MADE IN THE LAYOUT DUE TO FIELD CONDITIONS. ALL FIELD CHANGES SHALL BE IN ACCORDANCE WITH THESE PLANS. ANY SYSTEMS THAT REQUIRE FIELD ADJUSTMENT TO PROVIDE FULL AND UNIFORM COVERAGE SHALL BE MADE PRIOR TO FINAL ACCEPTANCE AT THE DIRECTION OF THE OWNER'S REPRESENTATIVE AT NO ADDITIONAL COST.

1.3. SECURE ANY AND ALL NECESSARY PERMITS FOR THE WORK PRIOR TO COMMENCEMENT OF OPERATIONS ON-SITE. SEND COPIES OF THE PERMIT(S) TO THE OWNER'S REPRESENTATIVE. FOR WORK LOCATED IN THE R.O.W., CONFORM TO THE STANDARDS AND SPECIFICATIONS OF THE AGENCY HAVING JURISDICTION.

1.4. WORK SHALL BE COORDINATED WITH OTHER TRADES TO PREVENT CONFLICTS.

2. PROTECTION OF EXISTING AND PROPOSED SITE ELEMENTS

2.1. ALL EXISTING SITE ITEMS, ALREADY COMPLETED OR ESTABLISHED AND DESIGNATED TO REMAIN SHALL BE PROTECTED FROM DAMAGE BY THE CONTRACTOR UNLESS OTHERWISE SPECIFIED. ALL DAMAGE RESULTING FROM THE CONTRACTOR'S WORK SHALL BE REPAIRED OR REPLACED TO THE SATISFACTION OF THE OWNER, AT NO COST TO THE OWNER.

2.2. MAINTAIN ALL NECESSARY BMP DEVICES THROUGHOUT THE DURATION OF ALL CONSTRUCTION ACTIVITIES.

2.3. WHERE APPLICABLE, SUBMIT A DETAILED PROJECT SPECIFIC WORK ZONE TRAFFIC CONTROL PLAN IN ACCORDANCE WITH THE APPROPRIATE REGULATORY AGENCY STANDARDS UNLESS THE WORK REQUIRES NOTHING MORE THAN A DIRECT APPLICATION OF FDOT STANDARD PLANS FOR ROAD AND BRIDGE CONSTRUCTION, INDEX 102-600.

2.4. LOCATE ALL UTILITIES, WHETHER PUBLIC OR PRIVATE, PRIOR TO CONSTRUCTION ACTIVITIES. THE INFORMATION AND DATA SHOWN WITH RESPECT TO UTILITIES IS APPROXIMATE. THE OWNER AND DESIGN PROFESSIONAL SHALL NOT BE RESPONSIBLE FOR THE ACCURACY AND COMPLETENESS OF ANY SUCH INFORMATION OR DATA. THE CONTRACTOR SHALL HAVE FULL RESPONSIBILITY FOR; REVIEWING AND CHECKING ALL SUCH INFORMATION AND DATA; LOCATING ALL UTILITIES PRIOR TO CONSTRUCTION; THE SAFETY AND PROTECTION THEREOF; AND REPAIRING ANY DAMAGE RESULTING FROM THE WORK. THE COST OF ALL WILL BE CONSIDERED AS HAVING BEEN INCLUDED IN THE CONTRACT PRICE. NOTIFY ANY AFFECTED UTILITY COMPANIES OR AGENCIES IN WRITING AT LEAST 48 HOURS PRIOR TO BEGINNING CONSTRUCTION. NOTIFY THE LANDSCAPE ARCHITECT IN WRITING WHEN ANY CONFLICT BETWEEN UTILITIES AND THESE PLANS EXIST PRIOR TO INSTALLATION.

3. SUBMITTALS

3.1. SUBMIT FULL AND COMPLETE SHOP DRAWINGS OF ALL IRRIGATION EQUIPMENT AS SHOWN ON THESE PLANS TO OWNER'S REPRESENTATIVE FOR APPROVAL PRIOR TO INSTALLATION.

3.2. SUBMIT PRODUCT DATA SHEETS FOR ALL IRRIGATION EQUIPMENT TO BE INSTALLED TO OWNER'S REPRESENTATIVE FOR APPROVAL PRIOR TO INSTALLATION. THE IRRIGATION SYSTEM, AS SHOWN ON THESE PLANS, HAS BEEN DESIGNED AND CALCULATED WITH THE EQUIPMENT AS SPECIFIED. SUBMIT ANY REQUEST FOR PRODUCT SUBSTITUTION(S) IN WRITING. IF APPROVED, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY NECESSARY MODIFICATION(S) AS A RESULT OF PRODUCT SUBSTITUTIONS TO THE IRRIGATION SYSTEM IN THE SHOP DRAWINGS TO MEET THE DESIGN INTENT OF THESE PLANS.

4. EQUIPMENT LIST

4.1. ALL QUANTITIES ARE PROVIDED FOR CONVENIENCE ONLY. CONFIRM ALL QUANTITIES PER PLAN PRIOR TO BIDDING AND CONSTRUCTION.

5. POINT OF CONNECTION

5.1. FIELD VERIFY ALL POINT OF CONNECTION SOURCE INFORMATION INCLUDING STATIC PSI AND GPM AVAILABLE PRIOR TO CONSTRUCTION. NOTIFY OWNER'S REPRESENTATIVE IN WRITING IF DISCREPANCIES BETWEEN THE FLOW AND PRESSURE AS LISTED IN THE CRITICAL ANALYSIS AND THE FIELD CONDITIONS EXIST.

5.2. COORDINATE INSTALLATION OF ANY METERS AND BACKFLOW ASSEMBLIES WITH THE AGENCY HAVING JURISDICTION AND OWNER'S REPRESENTATIVE.

6. MAINLINE INSTALLATION

6.1. INSTALL ALL MAINLINES AND LATERALS UNDER PAVEMENT WITHIN SLEEVES. WHERE VALVE CONTROL LINES PASS THROUGH A SLEEVE WITH OTHER MAIN OR LATERAL LINES, CONTAIN WIRES WITHIN A SEPARATE, SMALLER CONDUIT.

6.2. INSTALL COLOR CODED METAL DETECTABLE MARKING TAPE WHICH CLEARLY NOTES: "CAUTION: IRRIGATION LINE BURIED BELOW" ABOVE THE FULL LENGTH OF THE IRRIGATION MAINLINE.

6.3. WHERE MAINLINE RUNS PARALLEL TO PAVEMENT OR CURBING, OFFSET THE MAINLINE 24" FROM THE EDGE OF PAVEMENT OR CURB.

6.4. PERFORM HYDROSTATIC PRESSURE TESTING AS FOLLOWS:

6.4.1. AFTER FLUSHING, AND THE INSTALLATION OF VALVES CONDUCT THE FOLLOWING TESTS IN THE SEQUENCE LISTED BELOW. FURNISH ALL EQUIPMENT, MATERIALS AND LABOR NECESSARY TO PERFORM THE TESTS. CONDUCT ALL TESTS IN THE PRESENCE OF THE OWNER'S REPRESENTATIVE. NOTIFY THE OWNER'S REPRESENTATIVE FORTY-EIGHT (48) HOURS IN ADVANCE OF TESTING.

6.4.2. PERFORM WATER PRESSURE TESTS ON ALL PRESSURE MAIN LINES BEFORE ANY COUPLINGS, FITTINGS, VALVES AND THE LIKE ARE CONCEALED.

6.4.3. IMMEDIATELY PRIOR TO TESTING, PURGE ALL IRRIGATION LINES OF ALL ENTRAPPED AIR OR DEBRIS BY ADJUSTING CONTROL VALVES AND INSTALLING TEMPORARY CAPS FORCING WATER AND DEBRIS TO BE DISCHARGED FROM A SINGLE OUTLET.

6.4.4. TEST ALL PRESSURE MAIN LINE AT 150 PSI FOR A MINIMUM OF FOUR (4) HOURS WITH AN ALLOWABLE LOSS OF 5 PSI. PRESSURE AND GAUGES SHALL BE READ IN PSI, AND CALIBRATED SUCH THAT ACCURATE DETERMINATION OF POTENTIAL PRESSURE LOSS CAN BE ASCERTAINED.

6.4.5. RE-TEST AS REQUIRED UNTIL THE SYSTEM MEETS THE REQUIREMENTS. REPAIR ANY LEAKS, WHICH OCCUR DURING TEST PERIOD, IMMEDIATELY FOLLOWING THE TEST.

6.4.6. PROVIDE DOCUMENTATION STATING THE WEATHER CONDITIONS, DATE, THE START TIME AND INITIAL WATER PRESSURE READINGS, THE FINISH TIME AND FINAL WATER PRESSURE READINGS AND THE TYPE OF EQUIPMENT USED TO PERFORM THE TEST. THE DOCUMENTATION MUST BE SIGNED BY A WITNESS ACCEPTABLE TO THE OWNER, VERIFYING ALL OF THE ABOVE-MENTIONED CONDITIONS.

6.4.7. SUBMIT A WRITTEN REPORT OF THE PRESSURE TESTING RESULTS WITH THE OTHER ABOVE REQUIRED INFORMATION TO THE OWNER'S REPRESENTATIVE FOR APPROVAL.

7. IRRIGATION VALVES AND WIRING

7.1. LOCATE ALL VALVES, SPLICES WITHIN CONTROL LINES, QUICK COUPLERS, AND HOSE BIBBS WITHIN VALVE BOXES. PROVIDE PURPLE VALVE BOX LIDS FOR SYSTEMS UTILIZING A NON-POTABLE WATER SOURCE.

7.2. NUMBER THE TOP OF ALL VALVE BOX LIDS WITH MINIMUM 1" HEIGHT BLACK LETTERS TO CORRESPOND TO THE VALVE DESIGNATIONS.

7.3. WHEN POSSIBLE, LOCATE ALL VALVES IN PLANTING BEDS A MINIMUM OF 24" FROM BACK OF CURB OR EDGE OF PAVEMENT, UNLESS OTHERWISE NOTED.

7.4. SEPARATE IRRIGATION ZONES FOR HIGH AND LOW WATER USE REQUIREMENTS AND OPERATED ON DIFFERENT WATERING CYCLES. AT NO TIME SHALL MULTIPLE IRRIGATION HEAD TYPES BE LOCATED ON THE SAME VALVE UNLESS NOTED OTHERWISE.

7.5. INSTALL ALL DRIP ZONES WITH A FLUSH VALVE AND AIR RELIEF VALVE. IN THE EVENT THAT A DRIP ZONE HAS MORE THAN ONE HIGH OR LOW POINT, MORE THAN ONE AIR RELIEF VALVE OR FLUSH VALVE WILL BE REQUIRED FOR THAT ZONE.

7.6. FOLLOW MANUFACTURER'S SPECIFICATIONS FOR ALL WIRING FOR CONNECTION OF THE VALVES TO THE CONTROLLER. ALL WIRE RUNS SHALL BE CONTINUOUS WITH SPLICING OCCURRING IN VALVE BOXES ONLY. WIRE CONNECTIONS SHALL BE MADE USING DBR/Y-6 CONNECTIONS OR APPROVED EQUAL.

7.7. INSTALL VALVE CONTROL WIRING IN THE SAME TRENCH AS THE MAINLINE WHERE PRACTICAL.

7.8. FOR NON TWO-WIRE SYSTEMS, RUN TWO (2) SPARE VALVE CONTROL WIRES FROM THE CONTROLLER ALONG THE ENTIRE MAINLINE TO LAST REMOTE CONTROLLED VALVE ON EACH AND EVERY LEG OF MAINLINE.

8. PIPES AND SLEEVING

8.1. DO NOT INSTALL IRRIGATION SYSTEM THROUGH PRESERVED PLANT COMMUNITIES, DRIPLINE OF EXISTING TREES, OR WITHIN WETLANDS UNLESS SPECIFICALLY NOTED OTHERWISE.

8.2. LOCATE ALL IRRIGATION LINES WITHIN LANDSCAPED AREAS WHENEVER POSSIBLE. ALL LINES UNDER PAVEMENT MUST BE SLEEVED.

8.3. SIZE ALL PIPE SLEEVES TWO PIPE SIZES GREATER THAN THE PIPE / CUMULATIVE SUM OF THE PIPES IT CARRIES.

8.4. SLEEVES UNDER EXISTING PAVEMENT MUST BE DIRECTIONAL BORE UNLESS APPROVED BY OWNER IN WRITING.

8.5. SOLVENT CEMENTS SHALL COMPLY WITH ASTM D2564.

9. CONTROLLER AND SENSORS

9.1. COORDINATE WITH OWNER'S REPRESENTATIVE FOR FINAL CONTROLLER AND RAIN SENSOR LOCATIONS. THE CONTROLLER SHALL BE PLACED IN A LOCKING CABINET APPROPRIATE FOR ITS LOCATION. (INDOOR VS. OUTDOOR USE)

9.2. LOCATE THE AUTOMATIC RAIN SENSOR SHUTOFF DEVICE IN AN AREA THAT IS UNOBSTRUCTED BY TREES, ROOF OVERHANGS, OR ANY OTHER OVERHEAD OBJECT. THE SENSOR SHALL NOT BE PLACED WITHIN THE SPRAY ZONE OF ANY SPRINKLER HEAD, INCLUDING OFF-SITE IRRIGATION. CONTRACTOR SHALL LOCATE SENSOR WITHIN CLOSE PROXIMITY TO THE IRRIGATION CONTROLLER.

10. CLEANUP

10.1. UPON COMPLETION OF ALL WORK AND BEFORE FINAL ACCEPTANCE, REMOVE ALL MATERIAL, EQUIPMENT, AND DEBRIS RESULTING FROM HIS WORK. ALL PAVED AREAS SHALL BE CLEANED AND THE SITE LEFT IN A NEAT AND ACCEPTABLE CONDITION AS APPROVED BY THE OWNER'S REPRESENTATIVE.

11. AS-BUILT IRRIGATION PLANS

11.1. PROVIDE "AS-BUILT" DRAWINGS OF THE FINAL INSTALLATION TO OWNER'S REPRESENTATIVE PRIOR TO FINAL ACCEPTANCE OF WORK. INCLUDE THE FOLLOWING ON THE AS-BUILT DRAWINGS AT A MINIMUM:
- CONTROLLER LOCATION
- CONNECTION ASSEMBLY
- MAINLINE ROUTING
- PIPE SLEEVING
- VALVE(S)
- COLORIZED ZONING DIAGRAM

11.2. LOCATE ALL SLEEVES UTILIZED BY THE IRRIGATION CONTRACTOR WHETHER INSTALLED BY THE IRRIGATION CONTRACTOR OR NOT ON THE "AS-BUILT" DRAWINGS. THE DEPTH BELOW FINISH GRADE, TO THE NEAREST FOOT OF EACH END OF THE SLEEVE SHALL BE NOTED AT EACH SLEEVE LOCATION ON THE "AS-BUILT" DRAWINGS.

12. FINAL INSPECTION AND ACCEPTANCE OF WORK

12.1. MINIMIZE IRRIGATION OVERTHROW TO IMPERVIOUS AND NATURAL AREAS THROUGH FIELD ADJUSTMENTS TO INDIVIDUAL HEADS.

12.2. PROGRAM CONTROLLER TO IRRIGATE ALL ZONES WITHIN APPLICABLE WATERING WINDOWS AND PROVIDE WATERING SCHEDULE TO OWNER'S REPRESENTATIVE.

12.3. EQUIPMENT TO BE FURNISHED TO OWNER PRIOR TO ACCEPTANCE OF WORK:

- TWO (2) SETS OF KEYS FOR EACH AUTOMATIC CONTROLLER.
- TWO (2) 48 INCH TEE WRENCHES FOR OPERATING GATE VALVES (WHEN INSTALLED AS PART OF WORK).
- THREE (3) SETS OF SPECIAL TOOLS REQUIRED FOR REMOVING, DISASSEMBLING AND ADJUSTING EACH TYPE OF - SPRINKLER AND VALVE SUPPLIED ON THIS PROJECT.
- FIVE (5) EXTRA SPRINKLER HEADS, NOZZLES, SHRUB ADAPTERS, NOZZLE FILTER SCREENS, FOR EACH TYPE USED ON THE PROJECT.
- TWO (2) QUICK COUPLER KEYS TO MATCH MANUFACTURER TYPE OF QUICK COUPLER.

12.4. UPON COMPLETION OF ALL WORK, A FINAL INSPECTION SHALL BE PERFORMED BY THE OWNER AND/OR OWNER'S REPRESENTATIVE. THE IRRIGATION SYSTEM, CONSTRUCTION AND ALL OTHER INCIDENTAL WORK PERTAINING TO THIS CONTRACT SHALL BE INSPECTED FOR COMPLIANCE WITH THE CONTRACT DOCUMENTS. ANY ITEMS FOUND TO NOT BE IN COMPLIANCE SHALL BE CORRECTED AT NO COST TO THE OWNER.

13. WARRANTY

13.1. THE CONTRACTOR SHALL WARRANTEE ALL WORKMANSHIP AND MATERIALS FOR A PERIOD OF 1 YEAR FOLLOWING THE ACCEPTANCE OF THE WORK.

13.2. ANY PART OF THE IRRIGATION WORK THAT FAILS OR IS DEFECTIVE SHALL BE REPLACED OR RECONSTRUCTED AT NO COST TO THE OWNER INCLUDING BUT NOT LIMITED TO: RESTORING GRADES THAT HAVE SETTLED IN TRENCHES AND EXCAVATIONS RELATED TO THE WORK. RECONSTRUCTION SHALL INCLUDE ANY PLANTINGS, SOIL, MULCH OR OTHER PARTS OF THE CONSTRUCTED LANDSCAPE THAT MAY BE DAMAGED DURING THE REPAIR OR THAT RESULTS FROM SOIL SETTLEMENT.

13.3. THE DATE OF ACCEPTANCE OF THE WORK AND START OF THE GUARANTEE PERIOD SHALL BE DETERMINED BY THE OWNER, UPON THE FINDING THAT THE ENTIRE IRRIGATION SYSTEM IS INSTALLED AS DESIGNED AND SPECIFIED, AND FOUND TO BE OPERATING CORRECTLY, SUPPLYING WATER EVENLY TO ALL PLANTING AND/OR LAWN AREAS.

13.4. NEITHER THE FINAL ACCEPTANCE NOR ANY PROVISION IN THE CONTRACT DOCUMENTS SHALL RELIEVE THE CONTRACTOR OF RESPONSIBILITY FOR FAULTY MATERIALS OR WORKMANSHIP. REMEDY ANY DEFECTS WITHIN A PERIOD OF 7 DAYS (S) FROM THE DATE OF NOTIFICATION OF A DEFECT.

14. ABBREVIATIONS

GPM - GALLONS PER MINUTE
GPH - GALLONS PER HOUR
PSI - POUNDS PER SQUARE INCH

LATERAL PIPE SIZING REQUIREMENTS

MAXIMUM FLOW	MINIMUM PIPE SIZE
10 GPM	3/4"
16 GPM	1"
26 GPM	1-1/4"
35 GPM	1-1/2"
55 GPM	2"
80 GPM	2-1/2"
120 GPM	3"

PIPE SIZES ILLUSTRATED IN THE ABOVE CHART ARE MINIMUM ACCEPTABLE SIZES. PIPE SIZES INDICATED ON PLAN ARE FOR CONVENIENCE ONLY. FIELD SIZE ALL LATERAL PIPING TO KEEP ALL FRICTION LOSS VELOCITIES BELOW 5.0 FPS.

GROUNDWATER / DEWATERING NOTE:
THE PRESENCE OF GROUNDWATER SHOULD BE ANTICIPATED ON THIS PROJECT. CONTRACTOR'S BID SHALL INCLUDE CONSIDERATION FOR THIS ISSUE. WHEN PERFORMING GRADING OPERATIONS DURING PERIODS OF WET WEATHER, PROVIDE ADEQUATE DEWATERING, DRAINAGE AND GROUND WATER MANAGEMENT TO CONTROL MOISTURE OF SOILS.

XFMR	TRANSFORMER

GENERAL ELECTRICAL NOTES

1. THE COMPLETED INSTALLATION SHALL CONFORM TO ALL APPLICABLE FEDERAL, STATE AND LOCAL CODE ORDINANCES AND REGULATIONS. CONTRACTOR SHALL OBTAIN NECESSARY PERMITS AND INSPECTIONS REQUIRED BY THE AUTHORITIES HAVING JURISDICTION. ALL WORK SHALL BE DONE IN A NEAT, WORKMANLIKE, FINISHED AND SAFE MANNER, ACCORDING TO THE LATEST PUBLISHED N.E.C.A. STANDARDS OF INSTALLATION, UNDER COMPETENT SUPERVISION. INSTALL GROUNDING AS REQUIRED BY THE CODE(S).
2. VISIT THE SITE PRIOR TO BIDDING TO BECOME FAMILIAR WITH EXISTING CONDITIONS AND ALL OTHER FACTORS WHICH MAY AFFECT THE EXECUTION OF THIS WORK. INCLUDE ALL RELATED COSTS IN THE INITIAL BID PROPOSAL.
3. ALL MATERIALS SHALL BE NEW AND OF THE BEST QUALITY, MANUFACTURED IN ACCORDANCE WITH NEMA, ANSI, U.L. OR OTHER APPLICABLE STANDARDS. THE USE OF MANUFACTURER'S NAMES, MODELS, AND NUMBERS IS INTENDED TO ESTABLISH STYLE, QUALITY, APPEARANCE, USEFULNESS AND BID PRICE. PROPOSED SUBSTITUTIONS SHALL BE SUBMITTED IN WRITING AND REVIEWED BY THE ENGINEER BEFORE ORDERING.
4. PROTECT ALL ELECTRICAL MATERIAL AND EQUIPMENT INSTALLED AGAINST DAMAGE BY OTHER TRADES, WEATHER CONDITIONS OR ANY OTHER CAUSES. EQUIPMENT FOUND DAMAGED OR IN OTHER THAN NEW CONDITION WILL BE REJECTED AS DEFECTIVE.
5. LEAVE THE SITE CLEAN, REMOVE ALL DEBRIS, EMPTY CARTONS, TOOLS, CONDUIT, WIRE SCRAPS AND ALL MISCELLANEOUS SPARE EQUIPMENT AND MATERIALS USED IN THE WORK DURING CONSTRUCTION. ALL COMPONENTS SHALL BE FREE OF DUST, GRIT AND FOREIGN MATERIALS, LEFT AS NEW BEFORE FINAL ACCEPTANCE OF WORK.
6. ALL NEW EQUIPMENT AND WIRING IS SHOWN FULL TONE. EXISTING EQUIPMENT IS SHOWN IN HALF TONE.
7. CONTRACTOR SHALL FURNISH AND INSTALL A SEPARATE INSULATED GROUND CONDUCTOR IN ALL CONDUITS. ALL GROUND CONDUCTORS SHALL BE #12 AWG UNLESS NOTED OTHERWISE ON THE DRAWINGS.
8. CONTRACTOR SHALL COORDINATE THE EXACT LOCATION OF ALL UNDERGROUND CONDUITS AND DUCT BANKS TO AVOID INTERFERENCES WITH UNDERGROUND PIPING AND UTILITIES.
9. ALL CONDUIT, HANDHOLES, MANHOLES AND OTHER COMPONENTS IN THE BURIED ELECTRICAL SYSTEM SHALL BE LISTED FOR DIRECT BURIAL.
10. ALL CONDUIT PENETRATIONS THROUGH CONCRETE STRUCTURES SHALL BE INSTALLED THROUGH SLEEVED PENETRATIONS WITH MODULAR SEALS.
11. CONTRACTOR SHALL PROVIDE AND INSTALL 1250LB PULL TAPE IN ALL EMPTY CONDUITS.
12. ALL SAFETY SWITCHES AND OTHER DISTRIBUTION AND CONTROL ELECTRICAL EQUIPMENT SHALL BE U.L. LISTED AND RATED FOR HEAVY DUTY SERVICE.
13. ALL FASTENERS AND MOUNTING HARDWARE USED FOR THE INSTALLATION OF ELECTRICAL ITEMS SHALL BE 316 STAINLESS STEEL.
14. ALL ELECTRICAL EQUIPMENT, CONDUIT, WIRING, BOXES, ETC. SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW PRIOR TO ORDERING. THE SUBMITTALS SHALL BE NEATLY GROUPED AND ORGANIZED. PERTINENT INFORMATION SHALL BE HIGHLIGHTED, AND THE SPECIFIC PRODUCT SHALL BE IDENTIFIED. ALL SUBMITTALS SHALL BE COMPLETE, AND PRESENTED IN ONE PACKAGE. THE SUBMITTAL SHALL INCLUDE A COMPLETE LIST OF THE EQUIPMENT AND MATERIALS, INCLUDING THE MANUFACTURER'S NAME, PRODUCT SPECIFICATION, DESCRIPTIVE DATA, TECHNICAL LITERATURE, PERFORMANCE CHARTS, CATALOG CUTS, INSTALLATION INSTRUCTIONS, AND SPARE PART RECOMMENDATIONS FOR EACH DIFFERENT ITEM OF THE EQUIPMENT SPECIFIED.
15. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO ORGANIZE THEIR WORK, SO THAT A COMPLETE ELECTRICAL, INSTRUMENTATION, AND CONTROL SYSTEM FOR THE FACILITY WILL BE PROVIDED, AND WILL BE SUPPORTED BY ACCURATE SHOP AND RECORD DRAWINGS, AND O & M MANUALS.

6. Updated Pay Item Descriptions (behind this page)

SECTION 2 - PAY ITEM DESCRIPTIONS
ADDENDUM #5

2.01 SCOPE

The scope of this section of the Contract Documents is to further define the items included in each Pay Item in the Bid Form section of the Contract Documents. Payment will be made based on the specified items included in the description in this section for each Pay Item.

All contract prices included in the Bid Form section will be full compensation for all shop drawings, working drawings, labor, materials, tools, equipment, and incidentals necessary to complete the construction as shown on the Contract Drawings and/or as specified in the Contract Documents to be performed under this Contract. Actual quantities of each item bid on a unit price basis will be determined upon completion of the construction in the manner set up for each item in this section of the Specifications. Payment for all items listed in the Bid Form will constitute full compensation for all work shown and/or specified to be performed under this Contract.

2.02 ESTIMATED QUANTITIES

The quantities shown are approximate and are given only as a basis of calculation upon which the award of the Contract is to be made. The City does not assume any responsibility for the final quantities, nor shall the Contractor claim misunderstanding because of such estimate of quantities. Final payment will be made only for satisfactorily completed quantity of each item.

2.03 WORK OUTSIDE AUTHORIZED LIMITS

No payment will be made for work constructed outside the authorized limits of work.

2.04 MEASUREMENT STANDARDS

Unless otherwise specified for the particular items involved, all measurements of distance shall be taken horizontally or vertically.

2.05 AREA MEASUREMENTS

In the measurement of items to be paid for on the basis of area of finished work, the lengths and/or widths to be used in the calculations shall be the final dimensions measured along the surface of the completed work within the neat lines shown or designated.

2.06 LUMP SUM ITEMS

Where payment for items is shown to be paid for on a lump sum basis, no separate payment will be made for any item of work required to complete the lump sum items. Lump sum contracts shall be complete, tested and fully operable prior to request for final payment. Contractor may be required to provide a break-down of the lump sum totals.

2.07 PAY ITEM DESCRIPTIONS

Separate payment will be made for the items of work described herein and listed on the Bid Form. Any related work not specifically listed but required for satisfactory completion of the work shall be considered to be included in the scope of the appropriate listed work items.

No separate payment will be made for the incidental items not included in the Pay Item descriptions. The cost to complete such work shall be included in the applicable Pay Item unit cost. Final payments shall not be requested by the Contractor or made by the City until as-built (record) drawings have been submitted and approved by the City. Incidental items include, but are not limited to:

1. Shop Drawings, Working Drawings.
2. Clearing, grubbing and grading except as hereinafter specified.
3. Trench excavation, including necessary pavement removal and rock removal, except as otherwise specified.
4. Dewatering and disposal of surplus water.
5. Structural fill, backfill, and grading.
6. Replacement of unpaved roadways, and shrubbery plots.
7. Foundation and borrow materials, except as hereinafter specified.
8. Testing and placing system in operation.
9. Any material and equipment required to be installed and utilized for the tests.
10. Pipe, structures, pavement replacement, driveways and/or appurtenances included within the limits of lump sum work, unless otherwise shown.
11. Maintaining the existing quality of service during construction.
12. Appurtenant work as required for a complete and operable system.
13. Seeding and hydro mulching.
14. As-built Record Drawings, clean up, and miscellaneous work.

PAY ITEM NO. 1 – MOBILIZATION

Mobilization shall be the preparatory work and operations in mobilizing for beginning work on the project, including, but not limited to, those operations necessary for the movement of personnel, equipment, supplies and incidentals to the project site, and for the establishment of temporary offices, storage buildings, staging areas, maintaining traffic, safety equipment and first aid supplies, sanitary and other facilities, and installation of tree protection measures as required by the Contract Documents and applicable laws and regulations. The costs of submittals, bonds, required insurance, permits and any other preconstruction expense necessary for the start of the work, excluding the cost of construction materials, shall also be included in this item. Demobilization shall be the work of removing temporary facilities from the site, cleanup and restoration. Mobilization/Demobilization shall be limited to a maximum of ten percent (10%) of the total Bid Price.

Payment for mobilization/demobilization will be made on an incremental basis in accordance with the following:

Percent of Original Contract Amount:	Percent Allowable Payment of Mobilization/Demobilization Pay Item Price:
5	25
10	35
25	45
50	50
75	75
100	100

These payments will be subject to the standard retainage provided in the Contract. Payment of the retainage will be made after completion of the work and demobilization.

PAY ITEM NO. 2 – MAINTENANCE OF TRAFFIC

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for all maintenance of traffic, including coordination with the City and FDOT, and all equipment and labor necessary to comply with the FDOT Standard Plans Index 102 Series for Maintenance of Traffic.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 3 – EROSION AND SEDIMENT CONTROL

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for erosion and sediment control.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 4 – BYPASS PUMPING

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for all by-pass pumping. Cost includes all equipment and labor necessary to successfully bypass during construction in compliance with the Contract Documents.

Measurement for periodic payments for this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 5 – PROJECT RECORD DOCUMENTS (AS-BUILT DRAWINGS AND O&M MANUALS)

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for as-built record drawings or any other required certifications to put proposed system in service and operation and maintenance manuals for all proposed equipment. All items are subject to approval by the Engineer.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 6 – CLEANING EXISTING VALVE VAULT INCLUDING REMOVAL OF DEBRIS AND SAND BLASTING AND RECOATING OF EXISTING FITTINGS

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for cleaning of existing valve vault including the removal of any debris and sand blasting and recoating of existing fittings. Sand blasting and recoating existing fittings includes removal, cleaning, surface preparation, exterior coating, and reinstalling the fitting in accordance with the Construction Drawings and Specifications. Payment includes any and all items necessary to complete work and shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM – ELECTRICAL EQUIPMENT RACK

Payment for all work included in this Pay Item shall represent full compensation in accordance with the lump sum price bid for furnishing and installing the listed electrical equipment including stainless steel unistrut rack, electric meter in aluminum enclosure, main disconnect, automatic transfer switch, pump control panel including VFDs as shown, junction box, relocation of existing SCADA panel, conduit, wiring, ground ring, and connection to existing electrical service. For Lift Station 07, the Bid shall include all applicable components above, in addition to a secondary electrical equipment rack that includes pump disconnects, junction boxes, and selector switches as shown in the Contract Documents. This Bid Item shall also include installation of all control panel components, installing pump motor leads, testing of power and control wiring to each submersible pump, and all other materials and equipment necessary for a complete and fully operable system, including testing and start-up, as shown on the Contract Documents.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM	DESCRIPTION	UNITS
7	ELECTRICAL EQUIPMENT RACK INCLUDING PUMP CONTROL PANEL (5 HP - 7.5 HP), METER, MAIN DISCONNECT, AUTOMATIC TRANSFER SWITCH, JUNCTION BOX, AND RELOCATION OF SCADA PANEL	LS
8	ELECTRICAL EQUIPMENT RACK INCLUDING PUMP CONTROL PANEL (12 HP WITH VFD), METER, MAIN DISCONNECT, AUTOMATIC TRANSFER SWITCH, JUNCTION BOX, AND RELOCATION OF SCADA PANEL	LS

PAY ITEM NO. 9 – ELEVATED PLATFORM

Payment for all work included in this Bid Item will be made at the applicable Contract lump sum price for furnishing and installing the elevated platform as shown on the Contract Drawings and as described in the Specifications. This Bid Item shall include the foundation, top concrete slab, columns, beams, stairs, stairs slab, and aluminum railings, placed and installed as shown on the Contract Documents. This Bid Item includes steel reinforcement and all associated work. Payment shall represent full compensation for all labor, materials, and equipment for mixing, placing, forming, finishing, and curing of the concrete, any required excavation, including rock as necessary, bedding, backfill, compaction, dewatering, sheeting, testing, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 10 – BACKUP GENERATOR, ENCLOSURE, AND SUB-BASE FUEL TANK

Payment for all work included in this Bid Item will be made on a lump sum basis and will include the direct cost for furnishing and installing the backup diesel generator, enclosure, and sub-base fuel tank, in accordance with Construction Drawings and Specifications. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 11 – SITE LIGHTING

Payment for all work included in this Bid Item will be made at the applicable Contract lump sum price for furnishing and installing site lighting as shown on the Contract Drawings and as described in the Specifications. This Bid Item shall include the lighting foundation, conduit, grounding wire, aluminum pole with hand hole, and LED site light placed and installed as shown on the Contract Documents. This Bid Item includes concrete reinforcement and all associated work. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 12 – 6 FEET TALL VINYL PRIVACY FENCE

Payment for all work included under this Pay Item will be made at the Contract unit bid per linear foot for the purchase and installation of the 6-feet vinyl privacy site fence in accordance with the Construction Drawings and Specifications. Payment includes any required excavation, including rock as necessary, bedding, backfill, dewatering, sheeting, and any and all other items necessary to complete work. Measurement will be based on the actual number of linear footage of vinyl fence furnished, installed, and approved. Payment shall represent full compensation for all labor, materials, equipment, and incidental items necessary to complete the work.

PAY ITEM NO. 13 – 6 FEET TALL, 4 FEET WIDE VINYL PRIVACY ACCESS GATE

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sim price bid for furnishing and installing of the 6 feet tall, 4 feet wide vinyl privacy access gate in accordance with the Construction Drawings. Payment includes any required excavation, including rock as necessary, bedding, backfill, dewatering, sheeting, and any and all other items necessary to complete work.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 14 – CURB INSTALLATION

Payment for all work included under this Pay Item will be made at the Contract unit price bid per linear foot for furnishing and placing curb as shown on the Drawings and listed in the Bid Form. Measurement will be per actual number of linear feet of curbing installed. Payment shall represent full compensation for all labor, material and equipment for compacting subgrade, forming, furnishing, placing the concrete, and finishing as specified and all incidentals necessary for completion of this Pay Item, in accordance with Specifications.

PAY ITEM NO. 15 – POTABLE WATER SERVICE AND HOSE BIB RELOCATION

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for the proposed connection to existing water main, relocation of existing water service line including but not limited to excavation, including rock, dewatering, sheeting, bedding and backfill, compaction, testing, detectable warning tape, locator wire, and installation of the proposed hose bib assembly and piping, as shown in the Construction Drawings. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor In accordance with the Contract Documents.

PAY ITEM NO. 16 – DEMOLITION

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for, including but not limited to the demolition of landscaping including trees, control panel, asphalt, manhole, curb, air release valve, concrete pad, air release valve cabinet, piping, and site fencing as shown on the contract documents. Payment includes disposal and any required excavation, including rock as necessary, bedding, backfill, dewatering, sheeting, and any and all other items necessary to complete work. Any equipment in working condition shall be salvaged as requested by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM – ELECTRICAL I&C

Payment for all work included in this Pay Item shall represent full compensation in accordance with the lump sum price bid for furnishing and installing the listed pump control panel replacements including removal of the existing panel, installation of pump control panel with generator receptacle, modifications to the existing electrical equipment rack including but not limited to raceways, concrete posts, and concrete pad as necessary for the proposed pump control panel. This Bid Item shall include installation of all control panel components, installing conduit and pump motor leads, testing of power and control wiring to each submersible pump, and all other materials and equipment necessary for complete a complete a fully operable system, including testing and start-up, all as shown on the Contract Documents.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM	DESCRIPTION	UNITS
17	ELECTRICAL I&C (5 HP – 7.5 HP PUMP CONTROL PANEL REPLACEMENT)	LS
18	ELECTRICAL I&C (35 HP PUMP CONTROL PANEL REPLACEMENT, WITH SOFT STARTER)	LS

PAY ITEM NO. 19 – CLEAN WETWELL INCLUDING SAND/DEBRIS PUMP OUT

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for existing wet well cleaning. Existing wet wells shall be cleaned in accordance with the Construction Drawings. Payment includes any and all items necessary to complete work. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 20 – 2" S.S. AIR RELEASE VALVE (ABOVE GROUND)

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price for installation of a 2" stainless steel air release valve including air release valve body, concrete pad, underdrain, piping, valve, and connection to existing force main. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 21 – FORCE MAIN DETECTABLE WARNING TAPE

Payment for all work included in this Pay Item shall be made at the applicable Contract unit price bid per the schedule of prices for furnishing and installing force main detectable warning tape as shown in the Contract Documents and listed on the Bid Form.

Measurement and Payment shall be made for the actual length of detectable warning tape installed, approved, certified, and placed into operation and will represent full compensation for all labor, materials and equipment required to complete these Pay Items, including but not limited to excavation, including rock, dewatering, sheeting, bedding and backfill, compaction, coordination with other utilities that are disturbed during construction, protection of existing facilities and structures, and all other incidentals for complete installation. No additional compensation shall be made for excavation below the bottom of the pipe, rock removal, bedding and backfill material, or

for repair of any trench settlement. No additional compensation shall be made for extensive dewatering.

PAY ITEM NO. 22 – 6 FEET TALL, 12 FEET WIDE VINYL PRIVACY DOUBLE GATE

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sim price bid for the purchase and installation of the 12-feet vinyl double door swinging access gate in accordance with the Construction Drawings and Specifications. Payment includes any required excavation, including rock as necessary, bedding, backfill, dewatering, sheeting, and any and all other items necessary to complete work.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 23 – RECLAIMED WATER SERVICE AND HOSE BIB RELOCATION

Payment for all work included, but is not limited to, under this Pay Item shall represent full compensation in accordance with the lump sum price bid for the proposed connection to existing water main, relocation of existing water service line including but not limited to excavation, including rock, dewatering, sheeting, bedding and backfill, compaction, testing, detectable warning tape, locator wire, and installation of the proposed hose bib assembly and piping, as shown in the Construction Drawings. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor In accordance with the Contract Documents.

PAY ITEM NO. 24 – SHELL RESTORATION

Payment for all work included in these Bid Items will be made at the applicable Contract unit price bid per cubic yard of shell restoration as listed on the Bid Form. Density for backfill compaction shall be 95% per AASHTO T-180 density. Measurement of restoration will be per the actual number of cubic yards installed. Contractor shall match existing shell/rock material. Payment shall represent full compensation for all labor, materials and equipment for compacting subgrade, furnishing and installing the shell/rock, including all incidentals necessary to complete the restoration as shown on the Contract Drawings and included in the Specifications, all ready for approval and acceptance by the City.

PAY ITEM NO. 25 – SIDEWALK REPLACEMENT

Payment for all work included under this Pay Item will be made at the Contract unit price bid per square yard of concrete sidewalk installed as shown in the Contract Drawings and as listed on the Bid Form. Measurement of sidewalk restoration will be per the actual number of square yards replaced. Payment shall represent full compensation for all labor, materials and equipment for

cutting the edges of existing concrete, compacting subgrade, furnishing and installing the concrete and all incidentals necessary to complete the sidewalk restoration as shown on the Contract Drawings and included in the Specifications, all ready for approval and acceptance by the City.

PAY ITEM NO. 26 – LANDSCAPING

Payment for all work included, but not limited to, under this Pay Item shall represent full compensation, in accordance with the lump sum price bid, for all tree and shrub installation in accordance with the Construction Drawings and Specifications. Payment shall represent full compensation for all labor, materials, equipment, and incidental items necessary to complete the work, including any required excavation (including rock as necessary), bedding, backfill, dewatering, sheeting, testing, and any and all other items necessary to complete the work.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

PAY ITEM NO. 27 – IRRIGATION SYSTEM

Payment for all work included under this Pay Item shall represent full compensation in accordance with the lump sum price bid for the irrigation system. Payment shall represent full compensation for all labor, materials and equipment necessary for site preparation, furnishing and installing the irrigation system including but not limited to MP Strip Shrub Rotator (up to 9), MP Shrub Rotator, control valve, main line (up to 20 LF), lateral line (up to 150 LF) and connection to the reclaimed water service, in accordance with the Contract Drawings and Specifications.

Measurement for periodic payments of this lump sum Pay Item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents

PAY ITEM NO. 28 – FLOW METER REPLACEMENT (SIEMENS SITRANS F SERIES)

Payment for all work included, but is not limited to, under this Bid Item shall represent full compensation in accordance with the lump sum price bid for the purchase, installation, demolition, and instrumentation and controls; including coordination with the City's SCADA subcontractor for reinstallation, controls, enclosure, setup, and commissioning of a Siemens Sitrans F Series Flow Meter and appurtenances included in the Siemens Sitrans F Series meter assembly, conduit, wire, and transmitter in accordance with Construction Drawings and Specifications. This bid item shall include instrumentation and controls including coordination with City's SCADA subcontractor for reinstallation, controls setup, and commissioning. Payment shall represent full compensation for all labor, materials, necessary equipment, and incidentals necessary to complete the work, ready for approval and acceptance by the City.

Measurement for periodic payments of this lump sum bid item will be in accordance with the approved Schedule of Values, to be supplied by the Contractor in accordance with the Contract Documents.

ADDENDUM 6

Wastewater Lift Stations Rehabilitation

Issued 5/1/2026

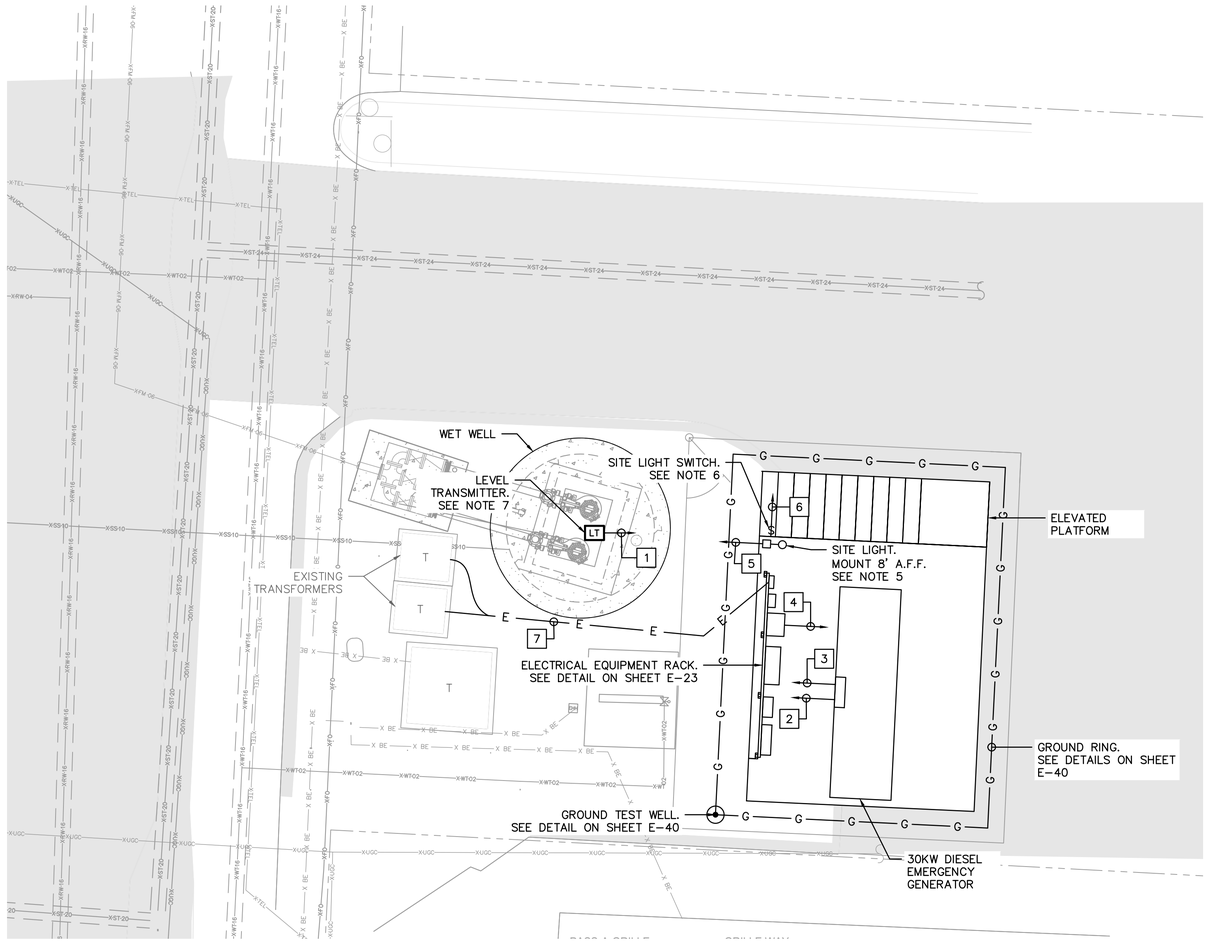
*Sealed bids must be received by **9:00 AM on 05/06/2026** electronically via Bonfire. They will be publicly opened and read at **11:00 AM on 05/06/2026.** All bidders are invited to attend this bid opening. Bids received after the deadline will not be accepted.*

Addendum 6 includes:

1. Questions and Answers
2. Electrical Sheets

1. Questions and Answers

1. Will the Generator & ATS be purchased as a set?
Response: Contractor to source by any means that conforms to Specifications Section 16450 and Contract Drawings.



2. Please verify if LS 4 & 10 has an existing light pole for noted fixture or will one need to be added to quote for these sites. No detail for height, material or mounting design was provided for poles.
Response: Mounting height provided on Contract Drawings. Lift Stations 4, 7, and 10 electrical site plans on the Contract Drawings updated to include pole model and mounting information.

2. Electrical Sheets

I. CONTRACTOR'S BID SUBMITTAL

The company that is submitting a bid declares that it has extensive experience in **Wastewater Lift Stations Rehabilitation.**

The undersigned, as Bidder, hereby declares that the only person or persons interested in the Bid as principal or principals are named herein, and that no person other than herein mentioned has any interest in the Bid or in the Agreement to be entered into; that this Bid or Agreement is made without connection with any other person, company, or parties making a Bid; and that it is in all respects fair and in good faith without collusion or fraud.

The Bidder further declares that they have examined the site of the work and informed themselves fully in regard to all conditions pertaining to the place where the work is to be done; that they have examined the Plans and Specifications for the work and Contract Documents relative thereto, and have read all special provisions furnished prior to the opening of bids; and that they have satisfied themselves relative to the materials to be supplied and work to be performed.

The Bidder proposes and agrees, if the Bid is accepted, to contract with the City of St. Pete Beach, Florida, in the form of an Agreement specified for **"Wastewater Lift Stations Rehabilitation"** in St. Pete Beach, Florida, in full and complete accordance with the shown, noted, described, and reasonably intended requirements of the Plans, Specifications, and Contract Documents, to the full and entire satisfaction of the City of St. Pete Beach, Florida.

The Bidder proposes to furnish all materials, equipment, labor, and perform the work submitted in their bid schedule for the City of St. Pete Beach **" Wastewater Lift Stations Rehabilitation."**

V. PUBLIC ENTITY CRIMINAL AFFIDAVIT

SWORN STATEMENT – PUBLIC ENTITY CRIMES

PURSUANT TO § 287.133 (3)(a), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES
THE FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. This sworn statement is submitted to: City of St. Pete Beach

by: Michael Morgan
(Print individual's name and title)

for: Marolf Enironmental LLC
(Print name of entity submitting sworn statement)

at: 4430 Erie Dr, New Port Richey, FL, 34652
(Business address)

and (if applicable), its Federal Employer Identification Number (FEIN):

59-341-3447
(FEIN)

or, if the entity has no FEIN, include the Social Security Number:

(SSN)

by the individual signing this sworn statement:

(Signature)

2. I understand that a "public entity crime" as defined in § 287.133 (1)(g), Fla. Stat., means a violation of any State or Federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States including, but not limited to, any bid or contract for goods or services, any lease for real property, or any contract for the construction or repair of a public building or public work, involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in § 287.133 (1)(b), Fla. Stat., means a finding of guilt or a conviction of public entity crime with or without an adjudication of guilt in any Federal or State trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in § 287.133 (1)(a), Fla. Stat., means:
   a. A predecessor or successor of a person convicted of a public entity crime or
   b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate. The ownership by one (1) person of shares constituting a controlling interest in another person or a pooling of equipment or income among persons when not for fair market value under the arm's length agreement, shall be a prima facie case that one (1) person controls another person. A person who

knowingly enters into a joint venture with a person who has been convicted of a public crime in Florida during the preceding thirty-six (36) months shall be considered an affiliate.

5. I understand that a "person" as defined in Section 287.133 (1)(e), Fla. Stat., means any natural person or any entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the **statement which I have marked below is true** in relation to the entity submitting this sworn statement (indicate which statement applies).

☑ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity nor any affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

☐ The entity submitting this sworn statement or one (1) or more of its officers, directors, executives, partners, shareholders, employees, members, or agents who are active in the management of the entity or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Office of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list (attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICE FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 ABOVE IS FOR THE PUBLIC ENTITY ONLY AND THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

VI. NON-COLLUSION AFFADAVIT

STATE OF Florida
COUNTY OF Pasco

I state that I Michael Morgan (Name and Title) of Marolf Environmental LLC (Name of Firm), am authorized to make this affidavit on behalf of my firm and its owner, directors and officers. I am the person responsible in my firm for the price(s) and amount(s) of this Response, and the preparation of the Response. I state that:

1. The price(s) and amount(s) of this Response have been arrived at independently and without consultation, communication or agreement with any other Provider, potential provider, Proposal, or potential Proposal.

2. Neither the price(s) nor the amount(s) of this Response, and neither the approximate price(s) nor approximate amount(s) of this Response, have been disclosed to any other firm or person who is a Provider, potential Provider, Proposal, or potential Proposal, and they will not be disclosed before Proposal opening.

3. No attempt has been made or will be made to induce any firm or persons to refrain from submitting a Response for this contract, or to submit a price(s) higher that the prices in this Response, or to submit any intentionally high or noncompetitive price(s) or other form of complementary Response.

4. The Response of my firm is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive Response.

5. Marolf, its affiliates, subsidiaries, officers, director, and employees (Name of Firm) are not currently under investigation, by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to Proposal, on any public contract, except as follows:

I state that I and the named firm understand and acknowledge that the above representations are material and important, and will be relied on by the State of Florida for which this Response is submitted. I understand and my firm understands that any misstatement in this affidavit is, and shall be treated as, fraudulent concealment from the State of Florida of the true facts relating to the submission of responses for this contract.

Notary Public – State of Florida

Denise J. Stemac
(Print, Type, Stamp, or Commissioned Name of Notary Public)

PROJECT NAME: City of Carrabelle Lift Station & Wastewater Improvements

OWNER'S NAME: City of Carrabelle

CONTACT: Charlie Porter | **Phone/Email:** carrabellecharlie@yahoo.com/850-528-0628

PROJECT DESCRIPTION: Multiple scopes of wastewater infrastructure work including: demolition and replacement of existing lift station platform with 8'x8' aluminum platform with concrete bases; installation of aluminum stairs with concrete landing; installation of aluminum hopper stand and pump stands; manhole seam injection grouting (6 manholes); installation of Vulcan Model SS-96 316 Stainless Steel Stato Screen; and associated piping and materials work at the Lanark Lift Station and WWTP.

ORIGINAL CONTRACT AMOUNT: $390,383.95 over one year period

FINAL CONTRACT AMOUNT: $390,383.95 over one year period

NUMBER AND DOLLAR AMOUNT OF CHANGE ORDERS: None on record

ORIGINAL CONTRACT TIME: *Completed within contract period*

ACTUAL TIME TO COMPLETE: *Completed within contract period*

OTHER RELEVANT INFORMATION: Work performed over a year long period. Other work performed for the city over the years. Included installation of aluminum platforms and stairs.

PROJECT NAME: Hernando County Utilities – Burger King Lift Station

OWNER'S NAME: Deeb Construction/Hernando County Utilities

CONTACT: Paul Taylor | **PHONE:** (727) 919-1252 | ptaylor.deeb@yahoo.com

PROJECT DESCRIPTION: Full lift station rehabilitation at 6450 Nature Coast Blvd, Ridge Manor, FL 34602 for Hernando County Utilities. Work included removal of existing piping and installation of new 6" PVC C900 piping, check valves, 8" MJ gate valve with box and brass tag, new HCUD pump bases with base plates, intermediate guide rails, gauge assembly, link seals, and 10" SCH-40 sleeve. Scope also included electric bypass pump with diesel backup, electrical contractor services, data flow RTU, wet well and manhole coatings/liner, and all associated demo and freight. Marolf Environmental served as subcontractor to Deeb Construction & Development (General Contractor).

ORIGINAL CONTRACT AMOUNT: $ 359,163.24

FINAL CONTRACT AMOUNT: $448,954.05

NUMBER AND DOLLAR AMOUNT OF CHANGE ORDERS:2/$89,790.81

ORIGINAL CONTRACT TIME: 140 days from NTP

ACTUAL TIME TO COMPLETE: *Completed within contract period*

OTHER RELEVANT INFORMATION: Project issued under Hernando County Contract No. 23-T00040/AP. County contact: Larry Cooper, (352) 754-4773. Included electric bypass pump with diesel backup

PROJECT NAME: On Top of the World – South Wastewater Treatment Facility (SWWTF) Equalization Basin Construction

OWNER'S NAME: Bay Laurel Center Community Development District (BLCCDD)

CONTACT: Bryan Schmalz, Utility Director | **PHONE:** (352) 414-5454 x4105 | bryan_schmalz@blccdd.com

PROJECT DESCRIPTION: Construction of a 250,000-gallon concrete watertight flow equalization basin connecting to the west side of the existing Wastewater Treatment Plant No. 1 at 8851 SW 90th Street, Ocala, FL 34481. Work included all electrical systems, mechanical equipment, and yard piping. Scope consisted of: two 25 HP surge pumps with SS guide rail system, two 40 HP Heliflow blowers, aluminum tank covers with stainless steel hardware, bypass HDPE pump piping, DR-18 PVC force main, 8" SDR-26 PVC sanitary sewer lines, mag meters, plug and check valves, aluminum knee brackets, chain link fencing, grading, compaction, concrete testing, odor control slab, and demolition of existing facade. Marolf Environmental served as prime contractor.

ORIGINAL CONTRACT AMOUNT: $ 670,200.70

FINAL CONTRACT AMOUNT: $670,200.70

NUMBER AND DOLLAR AMOUNT OF CHANGE ORDERS: None on Record

ORIGINAL CONTRACT TIME: Services to begin immediately upon execution — June 30, 2022

ACTUAL TIME TO COMPLETE: *Completed within contract period*

OTHER RELEVANT INFORMATION: Contract executed June 30, 2022 with Bay Laurel Center CDD, a special purpose government entity. Engineer of record: Kimley-Horn. Included bypass HDPE pump piping

PROJECT NAME: Safety Harbor Club – Wastewater Treatment Facility & Lift Station Rehabilitation (Job #3288)

OWNER'S NAME: Safety Harbor Club, Inc.

CONTACT: Tom Hart | **PHONE:**404-303-1087

PROJECT DESCRIPTION: Full wastewater treatment facility construction and dual lift station rehabilitation at Safety Harbor Club, Upper Captiva Island, FL. WWTF scope included Marolf-manufactured 15,000-gallon extended aeration Class-3 precast concrete WWTP with tertiary filter system, surge pumps, PD blowers, chlorine feed system, aluminum handrail and stairway, aluminum grating, site work, excavation, demo of existing plant, freight via barge to island, startup, and O&M manuals. Lift Station rehab scope covered two lift stations with duplex submersible pumps, SS control panels, bypass pumping, PVC piping, float switches, and electrical wiring. Engineer of record: McDonald Group International, Inc. Marolf Environmental served as prime contractor.

ORIGINAL CONTRACT AMOUNT: $941,132.00

FINAL CONTRACT AMOUNT: $941,132.00

NUMBER AND DOLLAR AMOUNT OF CHANGE ORDERS: None on Record

ORIGINAL CONTRACT TIME: 150 days from mobilization on site (contract dated July 1, 2022)

ACTUAL TIME TO COMPLETE: Nov 27,2022

OTHER RELEVANT INFORMATION: Project located on Upper Captiva Island, materials delivered via barge from Pine Island/St. James City port. Both lift station rehabs included bypass pumping.

EXHIBIT "D"

Conditional Federal/Grant-Funded Contract Addendum

(Place Conditional Federal/Grant-Funded Contract Addendum behind this page)

EXHIBIT "D"
CONDITIONAL FEDERAL/GRANT-FUNDED CONTRACT ADDENDUM

1. Applicability

1.1 This Exhibit applies only if activated under Section 25 of the Agreement or under a Task Order. If not activated, this Exhibit is reserved and has no operative effect.
1.2 If activated, this Exhibit supplements the Agreement and applies to the federally funded or grant-funded Work only. Contractor shall comply with all applicable requirements of the federal award, grant agreement, pass-through entity, program rules, and applicable law.
1.3 The City may provide additional award-specific clauses, certifications, forms, wage determinations, reporting requirements, or flow-down provisions. Contractor shall comply with such requirements as a condition of performing the affected Work and receiving payment from the applicable funding source.

2. Federal Award and Grant Information

Federal/Grant Program: [insert]
Federal Awarding Agency: [insert]
Pass-Through Entity: [insert, if applicable]
Assistance Listing Number: [insert, if applicable]
Federal Award Identification Number: [insert, if applicable]
Award or Disaster Declaration Date: [insert, if applicable]
Project Number: [insert]
Special Award Conditions: [insert or attach]

3. Remedies for Breach

For contracts exceeding the simplified acquisition threshold, Contractor acknowledges that the City may exercise all administrative, contractual, legal, and equitable remedies available under the Contract Documents and applicable law if Contractor violates or breaches contract terms. Remedies may include withholding payment, requiring correction, suspension of Work, termination, procurement from alternate sources, damages, sanctions, and any other appropriate remedy.

4. Termination for Cause and Convenience

For contracts in excess of $10,000, the City may terminate the federally funded or grant-funded Work for cause or convenience as provided in the Agreement. The notice of termination will identify the effective date and the manner of termination. Contractor shall be paid only for authorized Work satisfactorily performed before the effective date of termination, subject to documentation, offsets, allowable cost requirements, and applicable grant rules.

5. Equal Employment Opportunity

Except as otherwise provided under 41 C.F.R. Part 60, if the Work is a federally assisted construction contract as defined in 41 C.F.R. § 60-1.3, Contractor shall comply with the equal opportunity clause in 41 C.F.R. § 60-1.4(b), which is incorporated by reference as if fully set forth

RESERVED

herein, and shall include the required clause in covered subcontracts and purchase orders.

6. Davis-Bacon Act and Copeland Anti-Kickback Act

When required by federal program legislation, all prime construction contracts in excess of $2,000 must include compliance with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3148, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. If Davis-Bacon applies, Contractor shall pay laborers and mechanics at rates not less than the applicable wage determination, pay wages not less than once per week, submit certified payrolls if required, and comply with all applicable labor standards.
If Davis-Bacon applies, Contractor shall also comply with the Copeland "Anti-Kickback" Act, 40 U.S.C. § 3145, as supplemented by 29 C.F.R. Part 3, and shall not induce any person employed in the construction, completion, or repair of public work to give up any part of compensation to which the person is entitled. Contractor shall report suspected or reported violations to the City.

7. Contract Work Hours and Safety Standards Act

Where applicable, for contracts in excess of $100,000 that involve the employment of mechanics or laborers, Contractor shall comply with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. Contractor shall compute wages based on a standard 40-hour workweek and shall compensate covered workers at not less than one and one-half times the basic rate of pay for hours worked in excess of 40 hours in a workweek. No laborer or mechanic shall be required to work under unsanitary, hazardous, or dangerous conditions. These requirements do not apply to purchases of supplies, materials, or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

8. Rights to Inventions

If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a), and the Work involves substitution of parties, assignment, or performance of experimental, developmental, or research work under that funding agreement, Contractor shall comply with 37 C.F.R. Part 401 and any implementing regulations issued by the awarding agency.

9. Clean Air Act and Federal Water Pollution Control Act

For contracts and subgrants exceeding $150,000, Contractor shall comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act, 42 U.S.C. §§ 7401-7671q, and the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251-1387. Contractor shall report each violation to the City, and the City will report violations as required to the federal awarding agency and the appropriate EPA regional office. Contractor shall include these requirements in each covered subcontract exceeding $150,000.

10. Debarment and Suspension

Contractor shall comply with Executive Orders 12549 and 12689 and 2 C.F.R. Part 180. Contractor shall not enter into covered transactions with parties listed on the governmentwide exclusions in the System for Award Management. Contractor shall verify that Contractor, its principals, and its affiliates are not excluded or disqualified and shall include this requirement in lower-tier covered

RESERVED

transactions.

11. Byrd Anti-Lobbying Amendment

For awards exceeding $100,000, Contractor shall comply with the Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352. Contractor shall certify that it has not and will not use federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with obtaining a federal contract, grant, or other covered award. Contractor shall disclose lobbying with non-federal funds as required and shall require each lower tier to make the same certification and disclosure.

12. Procurement of Recovered Materials

Contractor shall comply with 2 C.F.R. § 200.323 and Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, to the extent applicable. Contractor shall procure designated items containing the highest percentage of recovered materials practicable, consistent with competition and performance requirements, when the purchase price exceeds the applicable threshold or the value of the quantity acquired during the preceding fiscal year exceeded the applicable threshold. Contractor shall also procure solid waste management services in a manner that maximizes energy and resource recovery and shall support the City's affirmative procurement program where applicable.

13. Domestic Preferences for Procurements

As appropriate and to the extent consistent with law, Contractor shall comply with 2 C.F.R. § 200.322 by providing a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States, including iron, aluminum, steel, cement, and other manufactured products, when the Work is performed under a federal award.

14. Prohibition on Certain Telecommunications and Video Surveillance Equipment or Services

Contractor shall comply with 2 C.F.R. § 200.216 and shall not obligate or expend federal funds to procure, obtain, extend, renew, or enter into a contract to procure or obtain covered telecommunications equipment or services as a substantial or essential component of any system or as critical technology as part of any system. Contractor shall include this prohibition in applicable subcontracts and purchase orders.

15. Build America, Buy America

If the Work is an infrastructure project funded by a federal financial assistance program subject to the Build America, Buy America Act, Contractor shall comply with all applicable domestic content procurement preference requirements for iron, steel, manufactured products, and construction materials permanently incorporated into the project, unless a waiver applies. Contractor shall provide certifications, documentation, and product information required by the City, funding agency, or pass-through entity.

16. Small and Minority Businesses, Women's Business Enterprises, Veteran-Owned Businesses,

RESERVED

and Labor Surplus Area Firms

Contractor shall take the affirmative steps required by 2 C.F.R. § 200.321 to assure that small businesses, minority businesses, women's business enterprises, veteran-owned businesses, and labor surplus area firms are used when possible, including, as applicable, placing such businesses on solicitation lists, soliciting them when they are potential sources, dividing requirements when economically feasible, establishing delivery schedules that encourage participation, using appropriate assistance organizations, and requiring subcontractors to take the same affirmative steps.

17. Bonding Requirements for Federal Construction or Facility Improvement Contracts

For construction or facility improvement contracts or subcontracts exceeding the simplified acquisition threshold, Contractor shall comply with the bonding requirements in 2 C.F.R. § 200.326 when the federal award requires such bonding, including bid guarantee, performance bond, and payment bond requirements unless the federal agency or pass-through entity determines that the City's bonding policy and requirements adequately protect the federal interest.

18. Access to Records; Retention

Contractor shall provide the City, the federal awarding agency, the pass-through entity, the Comptroller General of the United States, and their authorized representatives access to any documents, papers, records, and other materials that are directly pertinent to the federal or grant-funded Work for the purpose of making audits, examinations, excerpts, and transcriptions. Contractor shall retain records for the period required by 2 C.F.R. Part 200, the award terms, the Agreement, and applicable law, whichever is longer.

19. No Obligation by Federal Government

The federal government is not a party to this Agreement or any Task Order and is not subject to any obligations or liabilities to the City, Contractor, or any other party arising from the Agreement or Work.

20. Program Fraud and False or Fraudulent Statements

Contractor acknowledges that 31 U.S.C. Chapter 38 and other federal laws concerning fraud, false claims, and false statements may apply to Contractor's actions pertaining to federally funded or grant-funded Work. Contractor shall not submit false, fictitious, fraudulent, or misleading claims, certifications, invoices, records, or statements.

21. Additional Award-Specific Terms

If the federal awarding agency, pass-through entity, grant agreement, disaster assistance program, or other funding source requires additional clauses, certifications, forms, reporting, wage determinations, environmental/historic preservation conditions, civil rights provisions, procurement certifications, or other requirements, such requirements are incorporated into the affected Task Order upon written notice by the City. Contractor shall execute additional documents reasonably required by the City to document compliance.

CITY COMMISSION MEETING
CITY OF ST. PETE BEACH
COMMISSION CHAMBERS

Agenda Report

Agenda Title Name: Final Reading of Ordinance 2026-11: Adopting an amendment to the sign ordinance to prohibit stakes, poles, piers, and other sign structures within 50 feet of the mean high or visible water line along the Gulf, specifying exceptions and permit requirements, and detailing standards for type, number, dimensions, density, and illumination of signs, along with removal requirements.

Action Request: Motion to [adopt/adopt with modification/deny/continue to [specify date certain]] Ordinance 2026-11.

Strategic Objective: Community Prosperity

Date: June 23, 2026

Prepared By: Ralf Brookes, City Attorney
Brandon Berry, Senior Planner

Through: Frances Robustelli, City Manager

Summary of Issue: This proposal is a modification of the ordinance approved by the City Commission at the first reading in April 2026. It makes the following major changes:

- Specifies required setbacks for signage on the beach to be 50 feet from the greater of the mean high or visible water line.
- Permits removable A-frame ("sandwich board") signs, only, on the beach outside of the prohibited distance, and sets standards for dimensions, prohibits illumination, specifies setbacks, and requires nightly removal.
- Requires a sign permit, including deed, title history and insurance, and survey depicting location, prior to placement of a sign on the beach.

Funding: N/A

Ordinance 2026-11

AN ORDINANCE OF THE CITY OF ST. PETE BEACH, FLORIDA, AMENDING THE LAND DEVELOPMENT CODE RELATING TO SIGNS BY CREATING SUBSECTION 26.14.(w) TO PROHIBIT SIGNS, POSTS, AND POLES WITHIN FIFTY (50) FEET OF THE MEAN HIGH OR VISIBLE WATER LINE OF THE GULF; REQUIRING A PERMIT FOR INSTALLATION OF SIGNS ON THE BEACH; PROVIDING FOR RECITALS, CODIFICATION, CONFLICTS, SEVERABILITY, CORRECTION OF SCRIVENER'S ERRORS, CONSTRUCTION, PUBLICATION, AND AN EFFECTIVE DATE.

WHEREAS, the City of St. Pete Beach is a barrier-island community whose Gulf waters, beach, dunes, and adjacent public and private beachfront areas are central to the public health, safety, welfare, environment, scenic character, and economic vitality of the City; and

WHEREAS, certain signs have recently been placed in the water, adjacent to the water or within 50 feet of the mean high and 50 feet from the visible water line creating a threat to public safety because rebar, poles, posts and signs in this area can cause injury to persons and impact public safety both during the day but particularly after sunset in the dark, can interfere with emergency operations, beach management activities, impact environment, nesting habitat and can become windborne debris in storm events and create other public safety hazards; and

WHEREAS, the proliferation and number of signs, posts, and poles on the beach, particularly those located at, waterward, or 50 feet from the mean high tide line or 50 feet from the visible water line can obstruct and interfere with public safety, the environment, emergency operations and beach management activities, and in storm events can become windborne debris or create other hazards; and

WHEREAS, amendments to the sign code are necessary to regulate the location and number of post, poles, rebar, stakes and signs on the beach for the public health, safety and welfare

NOW, THEREFORE, THE CITY COMMISSION OF THE CITY OF ST. PETE BEACH, FLORIDA, HEREBY ORDAINS:

SECTION 1. Recitals. The above recitals ("Whereas" clauses) are hereby adopted as legislative findings, purpose, and intent of the City Commission.

SECTION 2. Land Development Code amendment. The Land Development Code of the City of St. Pete Beach is hereby amended to add a new Code subsection **26.14 (w)** as set forth in **Exhibit "A"** attached hereto and incorporated herein by reference.

SECTION 3. Codification. This Ordinance shall be codified in the Land Development Code of the City of St. Pete Beach.

SECTION 4. Conflicts. All ordinances or parts of ordinances in conflict herewith are hereby repealed to the extent of such conflict.

SECTION 5. Severability. The provisions of this Ordinance are declared to be severable, and if any section, sentence, clause, or phrase of this Ordinance shall for any reason be held invalid or unconstitutional, such decision shall not affect the validity of the remaining portions of this Ordinance.

SECTION 6. Scrivener's Error. The City Attorney may correct scrivener's errors found in this Ordinance by filing a corrected copy of this Ordinance with the City Clerk.

SECTION 7. Construction. This Ordinance shall be liberally construed to accomplish its purposes.

SECTION 8. Publication. This Ordinance shall be published in accordance with applicable law.

SECTION 9. Effective Date. This Ordinance shall take effect immediately upon adoption as provided by law.

EMERGENCY READING AND ADOPTION: _____, 2026
PUBLISHED: _____, 2026

CITY COMMISSION, CITY OF ST. PETE BEACH, FLORIDA.

_____
Scott Tate, Mayor

I, Renee Rose, City Clerk of the City of St. Pete Beach, Florida, do hereby certify that the foregoing Ordinance was duly adopted in accordance with applicable law this _____ day of _____, 2026.

_____
Renee Rose, City Clerk

APPROVED AS TO FORM AND LEGAL SUFFICIENCY:

Division 26 – Sign Ordinance

***

Sec. 26.14. - Prohibited signs.

The following signs and sign types are prohibited within the city limits.

***

(w) No temporary, portable, or permanent sign, stake, post, rebar or pole shall be installed, placed or maintained within 50 feet of the mean high water line (MHWL) or within 50 feet of visible water line of the Gulf whichever is greater, unless the sign, stake, post or pole is an official governmental locational sign, stake, post or pole that is posted by, or pursuant to the direction of, the State of Florida or another governmental entity with jurisdiction. Any sign, stake, post or pole in conflict with this prohibition shall be relocated to an allowable location. All other signage placed in other locations on the beach:

(1) shall be a portable A-frame or sandwich board sign that is no more than five (5) feet in height, eight (8) square footage in total sign face area,

(2) shall not contain any illumination of any kind and shall be removed at sunset and not replaced until sunrise each day;

(3) shall be placed at least 300 feet from any other sign, and at no time shall exceed four signs per zoning lot on the beach; and

(4) shall require a permit and submittal of a beach signage permit application that includes the property deed, title history, title insurance, and survey depicting sign location, property boundaries and the mean high water line (MHWL) in addition to the application requirements of section 26.5 of this Code.

This requirement is cumulative of, and not in lieu of, all other applicable provisions of this Code, however to the extent of a conflict, the requirements of this subsection apply.

***

Words stricken through shall be deleted. Words underscored constitute the amendment proposed. The symbol *** constitutes code sections not shown for purposes of brevity.

ABSTRACT

BOUCHARD, S.; MORAN, K.; TIWARI, M.; WOOD, D.; BOLTEN, A.; ELIAZAR, P., and BJORNDAL, K., 1998. Effects of Exposed Pilings on Sea Turtle Nesting Activity at Melbourne Beach, Florida. *Journal of Coastal Research,* 14(4), 1343–1347. Royal Palm Beach (Florida), ISSN 0749-0208.

Beach stabilization and nourishment are critical needs in Florida and along much of the U.S. coast. Because offshore sand resources are diminishing, there is much interest in the installation of beach structures for stabilization and nourishment projects. The STABLER™ Disc System (Shoreline Reclamation Inc., Manasquan, NJ) is an example of one such structure in which a series of cement discs is anchored into the beach by pilings. When functioning properly, the discs are buried by the accretion of sand, and only the pilings are exposed. Before any structure can be installed into Florida beaches, however, its impact on sea turtle nesting should be assessed. This study investigated the effects of exposed pilings on sea turtle nesting activity. Artificial pilings constructed from PVC pipe were installed on Melbourne Beach, Florida, and nesting activity was monitored in areas with and without pilings. Nesting activity decreased significantly in the presence of pilings. However, the installation of structures remains an option on sea turtle nesting beaches because some nesting continued to occur. Further research is needed on the effect of exposed pilings on hatchling orientation.

ADDITIONAL INDEX WORDS: Caretta caretta, Chelonia mydas, *beach nourishment, beach stabilization, erosion, green turtle, loggerhead sea turtle, nesting disturbance.*

INTRODUCTION

Beach erosion is a growing problem threatening coastlines throughout the United States. One study conducted in 1989 designated 536 km of 1283 km of Florida coastline as beach erosion problem areas (CLARK, 1989). Because of continued recreational and development interests along Florida coasts, the proportion of shoreline designated as problem areas will continue to grow. Eroded conditions are made worse because less sand is available offshore to naturally build up beaches (CLARK, 1989). The increasing eroded conditions will have both economic and recreational impacts on coastal areas.

In addition to threatening recreational and economic interests, beach erosion has significant ecological impacts. Among the most seriously impacted organisms are sea turtles that utilize the beach environment for nesting. The beaches of the eastern coast of Florida are some of the most important sea turtle nesting beaches in the world. In addition to leatherback, *Dermochelys coriacea,* and green turtles, *Chelonia mydas,* these beaches support one of the largest loggerhead, *Caretta caretta,* nesting populations in the world (NATIONAL RESEARCH COUNCIL, 1990). All of these species are classified as either threatened or endangered, and preservation and stabilization of their nesting habitat is critical to their future survival.

The peak nesting season for loggerhead sea turtles in Florida occurs during the summer months, June through August (WITHERINGTON, 1986). During this time, females crawl onto the beach, select a nest site, and excavate an egg chamber approximately 50 cm in depth (HENDRICKSON, 1995; DODD, 1988). The female then deposits her clutch of about 115 eggs into this chamber where they incubate for approximately 50–55 days (WITHERINGTON, 1986; HIRTH, 1980).

According to MONTAGUE (1993), beach instability and erosion can diminish sea turtle nesting success in several ways: (1) steep escarpments in the beach can hinder females from emerging onto the beach to nest; (2) removal of sand from the beach and creation of a rocky substrate or a shallow layer of sand can prevent nest excavation to a suitable depth; and (3) the washing out of nests that are incubating in the beach can expose eggs to predation and desiccation. Additionally, beach erosion is a problem because sea turtles are known to have strong nesting site fidelity, continually returning to their natal beaches to nest (BOWEN, 1995; CARR and CARR, 1972). Thus, beaches that have established nesting colonies must be preserved and maintained.

97084 received 11 July 1997; accepted in revision 5 October 1997.

Figure 1. The STABLER™ disc system before it is buried (upper illustration shows three discs between pilings instead of the standard four discs between pilings). The pilings remain above the surface of the beach after the discs are buried (lower illustration). We simulated these exposed pilings in our study.

Because beach erosion threatens both public and private property as well as tourism along the coast, much attention is currently focused on nourishment of beaches with severe erosion problems. The effects of beach nourishment on sea turtle nesting are not completely known, and continued work is needed to fully understand how to nourish and stabilize beaches in a manner more compatible with sea turtle populations (CRAIN *et al.*, 1995). One important aspect to investigate is the effect of structures installed on the beaches for nourishment and stabilization projects. In many locations throughout Florida, structures, such as sea walls, have been installed in attempts to "armor" the beach against erosion. Often these structures prove detrimental to the ability of sea turtles to nest successfully. Therefore, it is important to evaluate what types of structures may be installed in nesting beaches so that impact on sea turtle populations is limited.

We examined one such system in which structures are installed in the beach for stabilization. The STABLER™ Disc System (Shoreline Reclamation Inc., Manasquan, NJ) consists of a series of 318 kg concrete discs (1.22 m wide, 18 cm thick) linked together creating a chain (Figure 1). The discs are arranged edge to edge, forming 90° angles between adjacent discs and 45° angles between disc faces

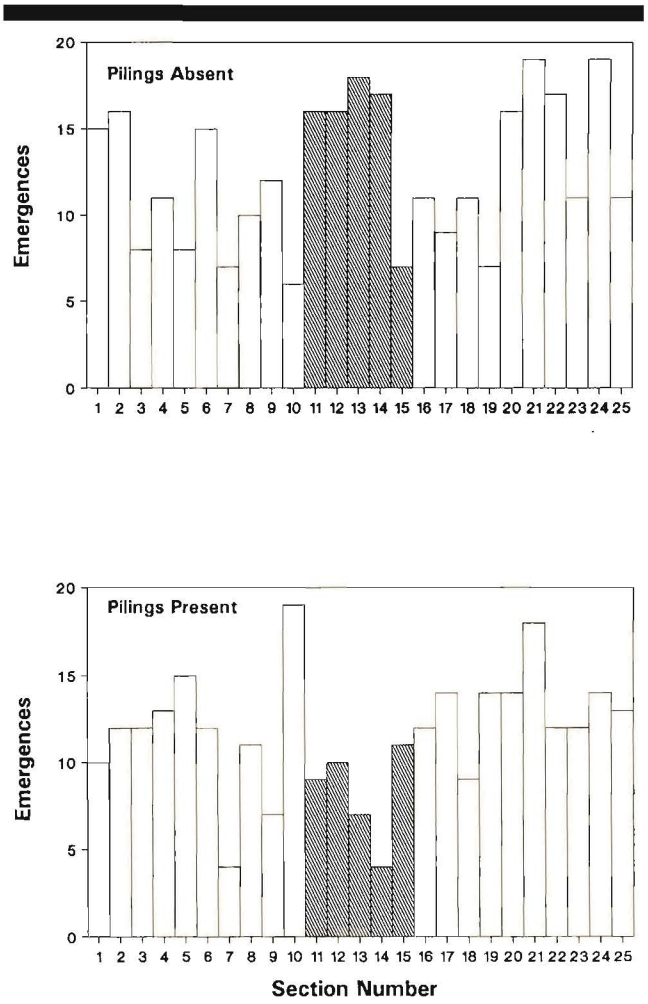

Figure 2. The total number of loggerhead and green turtle emergences in the 1250-m study area at Melbourne Beach, Florida, that occurred on 17 control nights when pilings were absent and on 16 experimental nights when pilings were present. Each section is 50 m and is located in either the northern control region (sections 1–10), the experimental region (11–15), or the southern control region (16–25). The shaded columns highlight the number of emergences in the experimental region. The number of emergences in the experimental region when pilings were present was significantly less than that of the same region when pilings were not present (Mann-Whitney U test, $p = 0.011$). The density of emergences was significantly less in the experimental region than in the control regions when pilings were present (Kruskal-Wallis test, $p = 0.027$).

and the beach. At every fourth disc, the system is attached to a piling that anchors the system during storms. The distance between pilings is 5.2 m (center to center). This chain of discs and pilings is placed parallel to the beach at the mean high water line so that it is struck during storms or periods of unusually high waves. The waves flow over the angled discs, the energy is dissipated, and sand suspended in the water is deposited around the discs. This repeated action builds the level of the beach and eventually covers the discs (Figure 1).

Studies have demonstrated the efficacy of the STABLER™ Disc System to prevent beach erosion (HERRINGTON, 1995). If the system operates correctly, the discs are buried except during periods of very high surf activity. Because sea turtles nest above the mean high water line, the buried discs should not pose a problem to nesting females. However, the pilings always remain approximately 1 m above the beach surface (Figure 1). The objective of this project was to evaluate the effects of exposed pilings on sea turtle nesting activity.

Table 1. *Number of loggerhead and green turtle emergences on control nights (n = 17) when artificial pilings were absent in the experimental region of the study area and on experimental nights (n = 16) when pilings were present. Statistical values, U and p, are from Mann-Whitney U tests comparing treatment means. SD is standard deviation.*

Region	Pilings Absent	Pilings Present	U	p
Northern Control			115.5	0.458
Mean ± SD	6.4 ± 2.9	7.2 ± 3.5		
Median	6.0	8.0		
Range	2–13	2–14		
Experimental			68.0	0.011
Mean ± SD	4.4 ± 2.8	2.6 ± 1.8

Southern Control			124.0	0.664
Mean ± SD	7.7 ± 3.9	8.3 ± 3.8		
Median	8.0	8.5		
Range	1–17	2–17		

METHODS

Field work was conducted from 11 June through 1 August 1996. A study area along Melbourne Beach, Florida, that was visually uniform for 1250 m and typified the beach profile of the region was selected. The study area was divided into a northern control region of 500 m, a central experimental region of 250 m where the artificial pilings (AP) were deployed, and a southern control region of 500 m. The entire 1250-m stretch was divided into 50-m sections for data collection and analyses.

Table 2. *Density (emergences/km/night) of loggerhead and green turtle emergences on control nights (n = 17) when artificial pilings were absent in the experimental region and on experimental nights (n = 16) when pilings were present. Statistical values, H and p, are from Kruskal-Wallis tests comparing the three regions of the study area. SD is standard deviation.*

Pilings	Northern Control Region	Experimental Region	Southern Control Region	H	p
Absent				2.28	0.320
Mean	12.7	17.4	15.4

Range	4–28	0–32	4–34		

The AP were constructed from 25-cm diameter green PVC pipe and stood 1 m high. The AP dimensions were designed to mimic the pilings used in the STABLER™ Disc System. On experimental nights, 49 AP were placed upright along the mean high water line at 5.2-m intervals (center to center). These were deployed at dusk and removed at dawn. On control nights, no pilings were deployed. These two treatments (pilings absent and pilings present) were deployed in a randomized sequence within 2-day blocks. The project was not conducted on Friday and Saturday nights to avoid conflicts during nights of high tourism activities on the beach. Data were not included for nights on which exceptionally high tides resulting from storms overwashed the beach.

Every morning following both experimental and control nights, the 1250-m study area was patrolled to record number of tracks made by sea turtles (loggerheads and green turtles) that had emerged the previous night and crossed the pilings line. Data were collected for each 50-m section. Statistical analyses, including the Mann-Whitney U and Kruskal-Wallis tests, were conducted using SPSS Software version 7.0.

RESULTS

A total of 601 emergences were recorded for 17 control nights and 16 experimental nights (Figure 2). The effect of pilings on sea turtle emergences was evaluated in two ways by comparing the number of emergences between treatments for each region and by comparing the number of emergences between experimental and control regions for each treatment. The mean number of emergences per night for the central experimental region with pilings was significantly less than the same region when pilings were not present (Mann-Whitney U test, $p = 0.011$, Table 1). There was no difference in activity in the northern 500 m control region (Mann-Whitney U test, $p = 0.458$) or the southern 500 m control region ($p = 0.664$).

The emergence activity for each region of the study area was standardized for a 1-km region so that the number of emergences could be compared among the three regions of the beach (Table 2). The numbers of emergences in the three regions of the beach on control nights were not significantly different (Kruskal-Wallis test, $p = 0.320$). The numbers of emergences on the three regions were significantly different on experimental nights (Kruskal-Wallis test, $p = 0.027$). When comparing the three regions of beach on experimental and control nights, there was significantly less nesting activity in the experimental region on nights when pilings were present, and no effect when pilings were not present.

DISCUSSION

The presence of pilings placed along the mean high water line reduced sea turtle nesting activity in that portion of the beach by 41%. This decreased nesting activity, however, should not preclude further consideration of these structures. First, nesting activity was not fully eliminated, as some females continued to nest when pilings were present. Second, the presence of pilings probably displaced nesting females to outside the experimental area and did not prevent the females from nesting successfully. Therefore, when suitable nesting beaches for sea turtles are threatened, the installation of stabilizing structures located near the mean high water line may be a viable option. If exposed structures such as pilings are deployed, factors known to disturb nesting females, such as the presence of people and lights on the beach (WITHERINGTON, 1992; NATIONAL MARINE FISHERIES SERVICE and U.S. FISH AND WILDLIFE SERVICE, 1991) should be minimized to encourage as much nesting as possible.

Before any structures associated with exposed pilings are installed on sea turtle beaches, additional information is needed on the effects of exposed pilings on hatchling orientation. Exposed pilings may have an effect because the presence of silhouettes is known to play a role in hatchling orientation (SALMON *et al.*, 1992). If further research does not indicate significant adverse effects, the installation of structures, such as those associated with the STABLER™ Disc System, may be a possible solution to beach erosion. Preventing beach erosion is essential to protect nests throughout the incubation period and to preserve the beach for future nesting.

ACKNOWLEDGEMENTS

We thank Gary Pieringer and Shoreline Reclamation Inc. (Manasquan, NJ) for providing the funding for this project. We also thank Llewellyn Ehrhart of the University of Central Florida and his students for their cooperation during this study, and the Florida Department of Environmental Protection for issuing us a permit to conduct the study. The manuscript benefitted from the constructive comments of Clay Montague. We are grateful to Ray Carthy for his advice and to all individuals who assisted with deployment of pilings throughout the summer. Laurie Walz drafted the illustrations.

To: Mayor Tate and City Commissioners
From: Frances Robustelli, City Manager
Date: June 15, 2026
Subject: 12-Month Performance Evaluation

Background

At the December 16, 2024, Commission meeting, the City Commission agreed unanimously to an evaluation process for the Charter Officers. The process includes the following:

1. 360 evaluation is conducted anonymously by the City Leadership Team, Charter Officers, a sub-set of the Management Team, those with a direct reporting relationship, and one line-staff representative from each department. The holistic results from the staff evaluation will be included in the evaluation packet submitted as part of the agenda packet. The same evaluation is provided to each Commissioner with the understanding that their evaluation will be publicly available with their individual name provided on the completed evaluation.
2. The Charter Officer prepares a self-evaluation.
3. The Charter Officer prepares goals for the next evaluation cycle.
4. The Charter Officer prepares a compensation request with supporting documentation if applicable.
5. The Charter Officer meets with each Commissioner to discuss the 360 evaluation, self-evaluation and goals.
6. The evaluation packet is prepared for a public meeting that includes all the above documents.
7. The Commission completes the evaluation in a publicly noticed meeting and provides direction if applicable.

360 Evaluation Results

Evaluation Results are attached to this memo. Summary results are provided for staff responses and individual responses are provided for elected officials. 31 people at all levels of the organization were asked to participate, including the Mayor and Commission. We had 20 of the 31 requested participants respond.

Overall, the feedback reflects a high-performing City Manager who has brought stability, accountability, professionalism, fiscal discipline, and operational progress to the city during an unusually challenging period. The main development opportunities are not about lack of capability; they are about sustaining momentum by improving proactive communication, formalizing priorities, strengthening internal equity and morale, and continuing to modernize service delivery and infrastructure planning.

Self-Evaluation

It is an absolute honor to have the privilege to serve the St. Pete Beach community. While there are challenges we face, the benefits of serving alongside a talented team and the endless possibilities for our barrier island make this role the most favorite in my career.

I look forward to working with the City Commission to implement many exciting initiatives and oversee the redevelopment of the city post Helene and Milton. The hurricanes, while devastating, have provided many opportunities for the city to build back better with an eye towards the future of the beach. Our collective vision, establishing ourselves as an employer of choice and exciting opportunities have attracted the best talent to our city, and the service and outcomes have been realized by these investments.

The most important thing to note is that all these accomplishments would not be realized without the vision of the commission and the collective efforts of the city team who work very hard to implement.

Summary of Accomplishments July 2025 through June 2026

1. Passed a comprehensive sign ordinance after years of community outreach and consultant assistance.
2. Completed hearing on Noise Ordinance and subsequently paused all work based on community feedback.
3. Initiated and completed a Finding of Necessity for establishing a Community Redevelopment Area. It is on hold now due to pending ballot measure in November 2026.
4. Implemented a zero-interest state emergency bridge loan to ensure financial security through recovery.
5. Assisted with the recruitment and appointment of a highly skilled and experienced City Clerk.
6. Completed multiple contractual agreements ahead of hurricane season for debris removal, damage assessment, equipment and supplies.
7. Completed contract approval for a construction manager for Fire Station 22, as well as completed the demolition in preparation for construction.
8. Implemented relief ordinances for residents following storm events including landscaping and accessory structure compliance requirements, balcony/stair setbacks, equipment elevation, etc.

9. Adopted a balanced budget and received the Government Finance Officers Association Distinguished Budget Award for the first time in the City's history.
10. Accepted the Annual Comprehensive Financial Report (ACFR) and Independ Audit for Fiscal Year ending 9/30/2024 with no material findings.
11. Approved the Conditional Use Permit for Corey Landings Development that included significant community benefits.
12. Procured new financial and payroll software and completed Go-Live Implementation for both.
13. Negotiated a new PCSO contract at no increased cost and no reduction in service outcomes.
14. Completed a 3-year MOU with the IAFF (firefighters).
15. Construction underway for Wastewater Force Main 1 and is on time and under budget
16. Demolished the Shuffleboard building and issued an RFP for reconstruction.
17. Completed the Substantial Damage Administrative Procedures.
18. Successfully leveraged dozens of volunteers to assist with hurricane recovery in the permitting/building department.
19. Began and made significant progress in televising, cleaning and repair of the city's 18 miles of stormwater pipes and 40+ miles of sewer lines.
20. Completed a comprehensive update of the cities outdated procurement regulations and procedures.
21. Completed a comprehensive ordinance regulating communication and small wireless facilities.
22. Completed approval of a CUP for an open deck dining project in PAG.
23. Continued multiple hurricane repairs on city facilities. Completed roofing projects on all major facilities.
24. Partnered with Tampa Bay Regional Planning Council to create a Bonus Density Valuation Calculator to assist in future development discussions.
25. Completed a comprehensive parking study and implemented new parking rates, generating more revenue from visitors.
26. Facilitated the approval of the waiver of permit fees for seawalls in the city right of way.
27. Partnered with the University of Florida to begin exploration of new revenue generating opportunities for road and stormwater infrastructure.
28. Expended significant staff resources administering an event permit for Country Thunder that ultimately relocated to a Clearwater venue.
29. Consistently provided updates regarding hurricane repair permitting and designed new metrics going forward to ensure expectations and standards are clear to both residents, employees and contractors.
30. Executed agreement with WSP for a community led process to establish level of service and preliminary design for the Don Cesar and Boca Ciega Area Resiliency Capital Improvement projects.
31. CUP approved for redevelopment of a marina project on Blind Pass Road.
32. Recapture of expenses for previously "free" electric charging stations by establishing an electric vehicle charging fee.
33. On-boarded and oriented a New Mayor and Commissioner on city operations.

Goals from two previous review cycles

1. Reach agreement from the Commission regarding portions of the Beach Ordinance to be immediately considered for approval and a process and timeline for completing the remainder of the policy decisions related to the ordinance.
   On-Hold
2. Complete Fee Studies for Wastewater, Reclaimed Water, Storm Water, Development Impact Fees, Parking, and all other City recreational and facility services.
   Partially Complete and In Progress
3. Continue tracking FEMA grant programs and managing necessary documentation to maximize reimbursement to the City for Helen/Milton damage.
   In Progress and will be for several years
4. Complete and submit State appropriation requests for Fire Station 22 and the Wastewater System Bay pipeline. Actively utilize City lobbyists and relationships with all elected representatives to promote the City's case to secure as much funding as possible. **Complete and secured $5M in State appropriation. Awaiting Governor Approval for an additional $1.5M.**
5. Secure staffing to support resident and business recovery efforts that result in decreases in permit and inspection processing timelines. Prepare and communicate metrics to demonstrate outcomes.
   Complete
6. Complete a comprehensive Capital Improvement Plan by June 2025 for consideration and inclusion in the FY 2025-2026 budget process.
   Complete

Goals for June 2025 through July 2026

1. **Implement measures for continuous improvement in communications, internally and externally.**
   a. Increased City Managers' presence at community meetings hosted by district representatives.
   b. Actively participated in the Don Cesar monthly resiliency meetings.
   c. Provided communication with the residents and businesses through print and social media outlets on a regular basis.
   d. Added CM weekly to the city website accessible to all public.
2. **Implement processes and programs that decrease the funding gap for critical infrastructure.**
   a. Significant progress in managing, tracking and applying for grant opportunities.
   b. Multiple fee studies underway and plan to bring multi-year rate strategies to enhance ability to fund critically aging infrastructure.
   c. Actively planning next fiscal years budget to anticipate for potential property tax reform.

3. **Complete major organizational changes and implement key finance/HR systems, and classification and pay plans.**
    a. Implemented annual adoption of the pay plan by commission for greater transparency of establishment of classifications and pay bands.
    b. Utilized vacancies for opportunities to consolidate and reorganize resulting in more efficient and productive teams.
4. **Align strategic planning with budget goals and clear metrics.**
    a. Achieved significant progress in developing goals, objectives and metrics for the 5 strategic initiatives, led and facilitated by internal staff.
    b. Implemented a comprehensive public facing CIP dashboard.
    c. Planning for a survey mechanism to increase touch points with community on key issues.
5. **Maintain actions that promote morale and strong performance.**
    a. Implemented a merit-based pay approach, designed to reward strong performance.
    b. Implemented a performance review system with competencies that align with the city's top 10 team commitments.
    c. Received approval to adjust PTO caps for those employees impacted by hurricane recovery and who were unable to take leave during the most critical time periods to serve the city.
    d. Received approval to add Christmas Eve as a holiday.
    e. Created a broader recognition program designed by the employee committee and funded in the budget.
    f. Made appropriate staffing changes and decisions necessary to instill confidence in accountability and expectations of a high work ethic.
6. **Ensure process improvements support a level of excellent community customer service are realized in permitting and code enforcement.**
    a. New metrics and dashboards are created to track response times and outcomes to ensure continued accountability and transparency.
    b. Building and Permitting team "right sized" for current and projected workload.
    c. Contractor meetings hosted by staff to get feedback in real time regarding pain points in the process. These will be on-going.
    d. Innovation team creating process improvement in workflow with the teams who serve the community.
    e. Single point of contact instituted with required check-in during the project to assist with moving this to completion.
    f. Office hours for permit office extended.

Goals for July 2026 through June 2027

1. Complete the Strategic Plan, make progress and/or implement all portions and report on outcomes on a regular basis.
2. Complete and implement all fee studies in accordance with Commission approval.

3. Provide solutions and a path forward in anticipation of potential property tax reform.
4. Complete a comprehensive asset management plan for all City assets.
5. Complete a 10-year long-term financial forecast to utilize as a planning tool for budgeting and funding of infrastructure.

Contract Amendment Request

I request that my contract be amended to provide for the following:

1. Same annual Cost of Living Adjustment percentage as provided to the general employees each fiscal year as approved by the City Commission.
2. Two-year contract extension. Provides a total contract term of 5 years from original hire date.
3. Limited Post-Election Transition period. Provides a 90-day period post-election non-termination without cause provision. This enables the City Manager to work with any newly elected officials before continued employment decisions are discussed or acted on.

City Manager Performance Evaluation Results Summary

Prepared by: Jody Costello, Human Resources Director
Employee: Frances Robustelli, City Manager
Evaluation Period: July 1, 2025 - June 30, 2026
Respondents: 5 Commission, 15 other participants

Purpose of This Summary

- This document summarizes survey feedback collected during the evaluation process.
- Commission feedback is non-confidential.
- All other participants are confidential.

Overall Performance Summary

Overall, the feedback reflects a high-performing City Manager who has brought stability, accountability, professionalism, fiscal discipline, and operational progress to the City during an unusually challenging period. The main development opportunities are not about lack of capability; they are about sustaining momentum by improving proactive communication, formalizing priorities, strengthening internal equity and morale, and continuing to modernize service delivery and infrastructure planning.

APPENDIX B – Full Survey Comments – City Commission

Question: Please provide your overall comments on the City Manager's performance on leadership of the city.

Mayor: Scott Tate

- While my interactions with City Manager have only started in the preceding few months, I have been impressed with her work ethic, level of commitment, and drive to continuously improve the level of experience residents of the city receive from city staff. It's clear that more work remains to be done, but the spirit of continuous improvement is commendable.

Commissioner, District 1: Karen Marriot

- The city seems to be continuing to function better and better under her leadership.

Commissioner, District 2: Lisa Robinson

- Frances is an effective leader and under her leadership the city continues to make improvements in our processes, communications & transparency. Though I do feel that improvement is still needed in specific departments, that a more honest assessment of our both achievements and failures should be openly discussed and that equal time must be afforded between the community shareholders such as was evident with the Beach Ordinance. I also feel that the City Manager Operational report has turned into more of a City PR/Marketing document than its initial intention as it holds very little context and lots of fluff. I'd prefer a more direct piece that includes context, detailed information including status reports (good & bad) and doesn't take time away from staff's duties in an attempt to fill the report on a weekly basis that could be done on a biweekly or monthly basis. Lastly, better communication on the resolution of reported issues is needed and more accurate information should be provided during Commissioner/CM meetings.

Commissioner, District 3: All Causey

- Frances understands the nuances of city leadership and has transformed our city since her arrival.

Commissioner, District 4: John Maldonado

- Frances effectively manages and fosters teamwork and cooperation across her various departments and staff. One area which I feel she needs to focus on is improving proactive communication between staff and the Elected Officials. She undoubtedly maintains high standards of honesty, integrity and trust. For example, when staff makes decisions which are later viewed as contrary to community input [or lack of input] she quickly remedies the situation in a public forum to regain constituents trust. I.e. Postponing or pulling items from Commission agendas with a brief explanation on why the action was necessary. Mrs. Robustelli holds staff accountable for not meeting expectations and/or producing results. This is evident in recent retirement and termination of employees who have failed to meet expectations. Furthermore, she is action oriented and demands the same from her staff. She engages customers [residents, contractors and businesses] in approachable, accessible, and friendly manner. One observation/Recommendation is for her to leverage the assistant City Manager to limit this access as this could limit her unbiased decision-making. Her strongest character is her outside experience, which she routinely relies on to introduce new ideas, concepts, and best practices. I applaud her willingness to hear my thoughts and ideas from my experience in government. Lastly, she provides clear expectations through effective communications and written guidance.

Question: Provide your overall comments on the City Manager's performance on community relations.

Mayor: Scott Tate

- City Manager and her team are actively working to develop tools to improve reporting of data and key metrics in order to provide a better level of service to City Commission and residents. These initiatives are not, yet, fully implemented, but I believe that the additional transparency and ability for residents to self-service on items such as city projects (CIP) and permitting status - and for staff to track key metrics around our service to the community, will provide a significant benefit to the community once implemented.
-

Commissioner, District 1: Karen Marriot

- Residents' concerns are addressed quickly, and she seems to be very accessible for all community members.

Commissioner, District 2: Lisa Robinson

- Frances' relationship with the local community is positive, accessible and results oriented. Her commitment to the SPB community is further demonstrated by her SPB home purchase. Other than monthly Chamber of Commerce meetings and the partnership with UF on CRA and Parking Assessment, I am unaware of additional cooperative relationships. High level information is provided via quarterly newsletter and frequent Commission Meeting presentations which are timely and informative. The expectation of excellent customer service needs improvement as it needs to be more than just words and requires accountability. Again, equal time must be given to community shareholders as was evident regarding the Beach Ordinance when it excluded resident meetings while allowing for (2) Hotelier meetings.

Commissioner, District 3: All Causey

- Communicates exceptionally at all levels.

Commissioner, District 4: John Maldonado

- Providing high level of public information has improved over the past 12 months through community engagements, social media, and weekly operational reports. She effectively leverages the Commission to encourage citizen feedback and acts on this information. One area that the city in its entirety needs to improve on under her tutelage is quick follow-up and resolution to citizen complaints; and request for service. I have personally expressed my concerns to her on lag time on Clickfix tickets that have been open for excessive amount of time. She has taken this feedback and working on improving pro-active communication between staff and stakeholders. We have also discussed the need to establish a formal "Liaison program " to maintain effective, cooperative relationships with local State representatives, the county, and the business community through Promote St. Pete-Clearwater.

Question: Please provide your overall feedback on the City Manager's performance on financial management of the City.

Mayor: Scott Tate

- City Manager and her team do a very good job of explaining the city's current financial picture, including related strengths and weaknesses. They are also actively providing guidance to the City Commission as we collectively work through the budgeting process for next year. Once the timing is more appropriate, I look forward to her leadership regarding longer-term aspects of

the city's financial plan as we look out 5, 10, 20+ years to ensure long-term fiscal viability.

Commissioner, District 1: Karen Marriot

- I appreciate the long-range financial planning that she has brought to the city.

Commissioner, District 2: Lisa Robinson

- Frances provides thorough financial reporting and implementation of Commission's budgetary goals. As a city that is not yet in "blue skies" financially, some long range goals may need to be secondary to short term planning and policies. Spending and staffing priorities need to be continuously addressed as well as maintaining a sharp focus on funding opportunities.

Commissioner, District 3: All Causey

- She has balanced programs and enhanced stability during the worst of times, two hurricanes within ten days! Great work!

Commissioner, District 4: John Maldonado

- This is an area where the City Manager is performing in an exceptional manner. This is especially critical given the former City Manager's lack of financial management abilities. Her success is largely due to recruiting the right talent and subsequently adopting budget workshops with rigorous guidance to the Commission based on harsh realities of fiscal limitations.

Question: Please list achievements since July 2025 that can be attributed to the City Manager's leadership.

Mayor: Scott Tate

- My tenure with the City Manager has been brief, but I am impressed with her work ethic, integrity, and leadership philosophy. Notable achievements in the past few months include efforts towards the forthcoming launch of a CIP dashboard and permit dashboard. I have also seen an uptick in the quality of community engagement efforts (St. Patty's Day Festival, Spring Festival, Seafood Festival) which have been generally well-received by the community.

Commissioner, District 1: Karen Marriot

- Significant improvements to the permitting process in the building department, improved CIP long-range planning, institution of consistent processes for event in the city, approval of Cory Landings development, development of data-driven methods of evaluating development projects in the city.

Commissioner, District 2: Lisa Robinson

- Stormwater drain cleaning, public CIP dashboard page and continued disaster recovery. Parking study and associated fee report. Nuisance and emergency Sign ordinances. Corey Landings negotiations, TC-2 Town Center Community Forum, UF CRA & Parking-based fee assessment presentations.

Commissioner, District 3: All Causey

- Frances navigated the impossible task of post-hurricane permitting, now emerging in far better shape than ever before. Amazing progress. I'm happy to work with Frances on a daily basis.

Commissioner, District 4: John Maldonado

- Played a HUGE role in the city receiving grants and funding towards CIP, i.e. Fire Station 22; launched "Digital Dashboard" which improves transparency and accountability; led dialogue with Hoteliers and liaised with developers on proposed ordinances and major development at Corey Landing. Proactively worked with internal/external stakeholders on efforts to establish a 1st ever CRG in SPB which is in the development phase; partnered with local colleges and organizations to ensure cost of studies was minimized. Partnered with wildlife organizations to improve Beach Stewardship. Sought expertise and external stakeholders input for Inflow and Infiltration (I&I) issues and provided critical and accurate assessment to Commission on magnitude of problem. Led Parking increase and Density discussions. Most importantly, revamped derailed permit issuance process by streamlining application, tracking, and pro-active engagement with applicants.

Question: Please list challenges outside of the City Manager's control that should be considered when evaluating their performance.

Mayor: Scott Tate

- The City Manager faces challenges of garnering consensus from 5 Commission Members, while also balancing input from multiple constituents (residents,

business owners, visitors), which may often have competing priorities. Balancing these many input points into a cohesive strategy that provides for a better overall "community" experience is important for our city's success, but is a shared challenge.

Commissioner, District 1: Karen Marriot

- Elected officials derailing plans

Commissioner, District 2: Lisa Robinson

- SB180 and other legal restraints, budgetary restraints due to continued Hurricane recovery repair costs and increased inflationary costs.

Commissioner, District 3: All Causey

- Hurricanes, oppositional stakeholders, annual commission turnover, restaffing city hall to put the highest level of customer service in reach. Tax cuts present a challenge.

Commissioner, District 4: John Maldonado

- Senate Bill 180 is amongst the largest challenge to the City Manager's efforts to apply self-governance. Additionally, strong lobbyists in the communications arena, i.e. 5G towers and recent laws impacting City's ability to push back on new installments. Potential litigation relating to private beach ownership and customary use doctrine. Lastly, fiscal limitations imposed by county [TDT], Federal and State legislation and cuts in grants.

Question: Please list performance targets and projects that you believe should be considered by the Elected Officials when developing the City Manager's work plan for the next year.

Mayor: Scott Tate

1. Assisting the Commission in developing a long-range strategic plan for the city's financial future that includes current asset restoration/maintenance and long-term new asset planning opportunities to improve city resiliency.
2. Formal implementation of the permitting dashboard and ongoing significant improvement to the city's permitting systems and processes based on resulting dashboard metrics.

3. Development and improvements to City policies and related enforcement that improve the overall shared community experience that residents, businesses and visitors have with St. Pete Beach.

Commissioner, District 1: Karen Marriot

- Continue to refine processes so that resident interaction with city services is friendly and efficient, continue to improve building department with regards to permitting, continue to foster an environment of community and collaboration throughout the city (employees, residents, and businesses).

Commissioner, District 2: Lisa Robinson

- Infrastructure repairs and maintenance advancements, Grant and alternative funding advancement, improved permitting performance and consistency, equitable community shareholder engagement, resiliency advancements, clear and concise communication on all levels

Commissioner, District 3: All Causey

1. Accomplish one explicitly defined and agreed upon infrastructure objective per commissioner during 2027. This will require building consensus and understanding.
2. Bring the permitting process to a level of 95% excellence and customer service relative to peer cities.
3. Work with each commissioner to raise community engagement by a factor of 2 within each district, finding ways to hear from a wider base of constituents.
4. Ensure our most expensive, most difficult to achieve infrastructure needs are on track to completion after almost 80 years of failed attempts using a system of community education, fee revenues to balance enterprise funds, and an appropriate level of bonding each year to accomplish all identified needs within the next 10-15 years.
5. Don’t let the stormwater needs of our public streets experience any delays — no delays. Build momentum and keep it growing.
6. Work with the commission to develop a 15 year capital improvement strategy to restore and improve all infrastructure to a consensus opinion within each individual district (which means community engagement, education, and getting funding). This may demand a third party to educate and engage the community in order to build consensus.

Commissioner, District 4: John Maldonado

- Strict adherence to height and design in Historic District(s). Needs to ensure Design Gude-Book gets across the finish line. Critically assess "hardship" for vacant lots and adherence to certificate of appropriateness (Sec 28.13) and prevent procedural failures IAW Purpose Powers and Duties of the Historic

Preservation Board as outlined in Article VII and Sec 22-206 and 22-211. Proactive focus on submerged land-leases and small parcels of land "acquired" over time without transfer or convenience, i.e. 12th Ave Dock, alleys in PAG, and lot adjacent to Ercius Park.

Question: Please think about the City Manager's overall contribution to the City. Add any suggestions/comments that would help maintain their strengths and improve their skill.

Mayor: Scott Tate

- Remain focused on St. Pete Beach as an overall "community" when identifying opportunities to improve our city.

Commissioner, District 1: Karen Marriot

- Be more willing to advise elected officials based on her depth and breadth of experience.

Commissioner, District 2: Lisa Robinson

- Continue to strive for excellence, best practices forefront, accessibility to both the City Manager and staff and to provide context and detail.

Commissioner, District 3: All Causey

- Our current commission understands the value of cooperation and provides a unique opportunity to reach new levels of customer service and excellence with your wise leadership. Our city is overdue for renovation in almost every way. You have one of the best brands in the USA, so we must protect it.

Commissioner, District 4: John Maldonado

- Continue to seek development courses and opportunities.

Question: This survey may not have conveyed everything you would like to say about the City Manager. The comments section below allows you to add supplementary information that you wish to express.

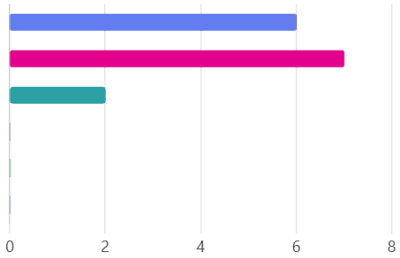
Commissioner, District 1: Karen Marriot

- Frances is a tremendous asset to the city.

Commissioner, District 2: Lisa Robinson

- Frances has proven herself as an effective leader and manager. She has been invaluable navigating through FEMA & FDEM directives, balancing community priorities and continuing to move the city through recovery. I thank her for her efforts and commitment to the community.

Commissioner, District 3: All Causey



- Frances understands the nuances of leadership. We are lucky to have her leading our staff and helping our commission improve our city. I see, “Progress and Service” in our future.

APPENDIX B – FULL SURVEY COMMENTS – City Commission

Note: This appendix contains all survey comments collected through the evaluation process. Identifying details have been removed or generalized to protect anonymity in the other comments. The content reflects the original feedback as closely as possible.

All Other Comments

Question: Please provide your overall comments on the City Manager's performance on leadership of the city.

- Frances is doing an exceptional job as city manager. Since coming on board there have been many positive changes in both policy and staffing changes that have all been to the benefit of the city.
- I believe she does very well at delegating and letting her vision know to staff
- The City Manager is doing a great job.
- I have only been with the city for a short time but came from another neighboring city and our city manager is one of the best ones that I have worked with in over 20 years in city government.
- Frances continues to provide outstanding leadership, fosters a positive work environment, and effectively guides the organization toward achieving its strategic goals while maintaining a strong commitment to employees and the community.
- Very approachable and knowledgeable when I have interacted with her. Her expectation is to get positive results or to make changes for an efficient operation of the city. I applaud her straight froward approach to any challenges the city faces.
- The City Manager demonstrates strong leadership potential and has many of the qualities necessary to be an exceptional leader. She is knowledgeable, dedicated, and committed to serving the organization and community. However, there are opportunities for improvement in prioritization, employee engagement, and recognition. At times, organizational priorities do not appear to align with the operational needs of staff, and greater attention to the concerns and contributions of employees at all levels would help strengthen morale and foster a more inclusive workplace culture. While the leadership team often receives

recognition for accomplishments, lower-level staff who carry much of the day-to-day workload are not always acknowledged to the same degree. Employees would benefit from increased recognition, both verbally and financially. There is also concern that newer hires are receiving higher salaries and more favorable benefits than long-tenured employees, creating a perception of inequity. Greater focus on compensation fairness, longevity recognition, and appreciation for employees' dedication and service would help improve trust, morale, and retention throughout the organization.

- Frances is a highly capable and accomplished leader who consistently demonstrates strong expertise in her role and a deep understanding of organizational operations. She brings significant experience in leading organizational transformation efforts, helping departments navigate change while maintaining focus on service delivery and long-term strategic goals. She is effective at aligning people, processes, and priorities to achieve meaningful results. Through her leadership, she fosters accountability, encourages collaboration, and empowers staff to perform at a high level. Frances has a proven ability to maximize the strengths of her team while driving improvements that benefit the organization as a whole. Her combination of strategic thinking, operational knowledge, and people leadership makes her a valuable asset to the City and an important contributor to its continued growth and success.

- Frances has cultivated a positive organizational culture built on trust, transparency, and mutual respect. Her commitment to professional development, open communication, and employee engagement has strengthened teamwork and morale, creating an environment where staff feel supported, empowered, and motivated to deliver exceptional service to the community.

- Frances is a very effective and dedicated leader of the city.

- Frances is a thoughtful leader and cares about staff.

Question: Provide your overall comments on the City Manager's performance on community relations.

- Again, she is always available for both staff and citizens. She listens and she actions items as they are needed.

- I believe her door is open and is willing to discuss whatever matter with whoever is asking

- City Manager is very professional and very competent .

- The City Manager demonstrates a strong commitment to addressing community concerns and maintaining responsiveness to residents. However, there is a perception among some employees that community needs are often prioritized at the expense of internal operational and staff needs. Additionally, concerns have been raised that issues brought forward by the most vocal residents or those with direct access to leadership tend to receive more immediate attention and resolution than other community concerns. Ensuring a more balanced and equitable approach to prioritizing both resident requests and organizational needs, while applying consistent processes for addressing concerns, would help strengthen trust among employees and promote fairness in service delivery.

- Frances consistently demonstrates innovative leadership by identifying creative solutions to complex challenges and encouraging forward-thinking approaches across the organization. She fosters a collaborative work environment by actively engaging staff, elected officials, residents, and community partners in decision-making processes, ensuring diverse perspectives are considered and valued.

- Frances is very accessible and highly responsive to community input and concerns.

Question: Please provide your overall feedback on the City Manager's performance on financial management of the City.

- I think she has a close eye on the city's finances

- City Manager is done a fine job.

- The City Manager has maintained the City's financial stability and supported organizational operations; however, concerns have been raised regarding compensation practices and the allocation of financial resources. Some employees perceive that executive-level positions are being filled at significantly higher salary levels while longstanding concerns regarding employee pay equity, retention, and recognition remain unresolved. There is also concern that employees with little or no prior experience in a particular role are receiving substantial salary increases or starting salaries that exceed those of experienced, long-tenured employees performing the same or similar work. This has created a perception of inequity and diminished morale among staff. Greater transparency in compensation decisions, a stronger emphasis on internal equity, and recognition of employee experience, longevity, and institutional knowledge would help strengthen trust and confidence in the City's financial stewardship.

- Frances exhibits exceptional fiscal stewardship, carefully balancing the City's operational needs with long-term financial sustainability. Through prudent budgeting, strategic resource allocation, and thoughtful planning, she has consistently demonstrated a commitment to maximizing taxpayer value while maintaining the City's strong financial position.

Question: Please list achievements since July 2025 that can be attributed to the City Manager's leadership.

- Employee morale. Leadership changes. Accountability across all departments.
- Implementation of the new employee review program. All hands meetings to keep staff informed. Top 10 Commitments.
- employee morale is up.
- Support Staff development, Fiscal Responsibility with all Departments, Transparency, Fosters a Positive Work Environment, Outstanding Leadership
- The change made in the Fire Department for the position of Fire Chief. Good job. The city has needed a new leader in that department for a very long time.
- Negotiation of the Cory Landings condition use permit public benefits.
- Launch of new budget processes, platforms/tools, and rebuilt the Finance department, developed a multi-year strategic plan, rolled out performance planning processes, led ongoing coordinated response to FEMA, redesigned entire communication framework for external stakeholders, developed organizational culture and operating model.
- Continued storm recovery efforts and rebuilding the community
  Revamping the budgetary process
  Frances has also been highly effective in building strong relationships with a wide range of stakeholders, including residents, business owners, community organizations, regional partners, and governmental agencies. Her ability to build consensus and foster productive partnerships has strengthened the City's position and advanced key initiatives. She represents the City exceptionally well at the regional level, serving as a respected and credible advocate whose professionalism and collaborative approach have enhanced the City's reputation and influence throughout the region.
-

Question: Please list challenges outside of the City Manager's control that should be considered when evaluating their performance.

- Trying to meet unrealistic expectations from staff, commission, residents.
- If it is out of their control all you can ask is that they do their best. and learn from the experience
- I have no challenges to report.
- Conflicting agendas
- changing of the commission members, SB180, Legislature related to tax cuts and new budgetary restrictions coming from the state.
- Ad valorem exemption impacts

Question: Please list performance targets and projects that you believe should be considered by the Elected Officials when developing the City Manager's work plan for the next year.

- Balanced budget, long term projects completed or at least started.
- rebuild our infrastructure.
- More opportunity for work life balance for City Employees, specifically increased PTO and added sick time.
- If we have one brief sickness or family emergency it can quickly wipe out an entire bank of slow accruing PTO, this causes significant strain on employees because full time staff have little opportunity to take any time off for rest, vacation, or mental health.
- Part time employees can bank their PTO for emergencies because of flexible scheduling so if they get sick, they generally don't have to use PTO, just switch work days. Full time staff don't have that option. This significantly impacts work performance, attitude, and employee morale.
- fiscal stability
- Number one from my perspective is to develop a prioritization framework that helps drive organizational rigor and cohesiveness around goals, objectives, and project portfolio.

- Economic Development - To include advancing initiatives that support local businesses, expand housing options for residents and the workforce, and strengthen the City's tourism economy while balancing the needs of the community.

Question: Please think about the City Manager's overall contribution to the City. Add any suggestions/comments that would help maintain their strengths and improve their skill.

- Continue listening. Keep holding staff accountable.

- Due to her leadership, I feel communication throughout the city is much improved and employee morale is up

1) An updated accurate pay plan for employees based on experience, knowledge, and tenure.

2) EOC Organization Chart explaining roles and responsibilities for all employees since we are all required to sign a “First Responder Acknowledgement Form” even though no one knows what they are to do in an emergency atmosphere.

3) Help getting adequate and clean facilities for all departments. Public Services, City Hall, Recreation are still suffering for hurricane damage, leaking roofs, mold and mildew, terrible quality toilet paper, disgusting carpet, AC systems that break once a week and/or not enough space for the amount of employees we continue to hire.

4) Provide some sort of feedback/ “suggestion box” platform for all employees at all times, so everyone feels heard, not just an anonymous survey every quarter at All Hands meetings.

5) More city employee benefits - we lost our weight/gym room access, fitness/health incentives that could be provided through insurance. Better health insurance in general would be nice (United Healthcare)!

6) What happened to the flexible work schedule?? Best thing for staff morale would be (4)10-hour shifts for ALL employees! Half employees work Monday-Thursday, other half work Tuesday-Friday. You already have code enforcement that don’t work the weekends and are on 10 hour shifts! If you need weekend coverage, it’s Wed-Sat, Thursday-Sunday.

7) We need more PTO hours to help maintain this so called “Work life balance”. Add in sick/comp/personal time back.

- Continue to drive toward improving morale and team culture. When things get busy and the workload is sigificant, helping the collective team be successful is still the most impact area you can improve as it affects city-wide service delivery.

Question: This survey may not have conveyed everything you would like to say about the City Manager. The comments section below allows you to add supplementary information that you wish to express.

- In the little over 4 years that I have been with the city, I can definitely see changes for the better in the way things have been ran. I feel the city of St Pete Beach is headed in the right direction with her leadership.

- N/A

- At times, there appears to be an expectation that the Commission has direct influence over matters that are more appropriately managed by the City Manager. To improve organizational efficiency, the City Manager should reclaim greater decision-making authority within the administrative structure and empower staff and department leaders to carry out their responsibilities without unnecessary involvement from boards, commissioners, and the mayor. Establishing clearer boundaries between governance and administration would help reduce workload demands, decrease the number of meetings required to address routine matters, and alleviate stress on departments. This approach would allow staff to focus more effectively on service delivery and strategic priorities while ensuring that boards and commissions remain focused on policy

- Frances provides tremendous value to the City through her strong leadership, clear vision, and unwavering commitment to organizational improvement. She is a natural galvanizer who brings people together around common goals, builds momentum for important initiatives, and fosters collaboration across departments.

  She leads by example, setting high standards for professionalism, accountability, and service while holding herself and others responsible for delivering results. Frances is effective at driving change and challenging the organization to think differently about how it serves residents and conducts business.

  Her efforts to improve transparency, strengthen community partnerships, and modernize City operations are helping create a more responsive, accountable, and citizen-focused organization. Through her leadership, the City is better positioned to build trust with the community, improve service delivery, and achieve its long-term strategic objectives.

  One of her greatest strengths is her ability to create an environment where employees feel valued, respected, and encouraged to grow professionally. She

invests in her team, recognizes individual strengths, and provides opportunities for learning, development, and advancement. As a result, she has fostered a workplace culture where staff are motivated to continuously improve, contribute new ideas, and reach their full potential. Her commitment to developing people has strengthened the organization and positioned it for continued success.

- The City Manager is performing at a high level despite challenges with the city's finances, infrastructure, and to some extent with personnel. The city is fortunate to have an experienced, accessible, and flexible leader who can be trusted to make the right and often difficult decisions that are in the best interest of the organization.

SECOND AMENDMENT TO CITY MANAGER EMPLOYMENT AGREEMENT CITY OF ST. PETE BEACH, FLORIDA AND FRANCES ROBUSTELLI

THIS SECOND AMENDMENT TO CITY MANAGER EMPLOYMENT AGREEMENT ("Second Amendment") is made and entered into as of _____, 2026 ("Second Amendment Effective Date"), by and between the City of St. Pete Beach, Florida, a Florida municipal corporation ("City"), and Frances Robustelli, an individual ("Employee"). The City and Employee are collectively referred to as the "Parties."

RECITALS

WHEREAS, the Parties entered into that certain City Manager Employment Agreement dated April 9, 2024 ("Agreement"), pursuant to which Employee serves as City Manager of the City; and

WHEREAS, the Parties previously amended the Agreement pursuant to that certain First Addendum to City Manager Employment Agreement dated August 19, 2025 (the "First Amendment"), which amended the Agreement with respect to Employee's base salary and paid time off; and

WHEREAS, Section 3.2 of the Agreement provides that the Term of the Agreement may be extended upon specific action of the City Commission and with a written agreement executed by both Parties; and

WHEREAS, Section 8.1 of the Agreement addresses Employee’s base salary and compensation review; and

WHEREAS, the Parties desire to extend the Term of the Agreement for an additional two years and to provide for cost-of-living adjustments during the remaining years of the Agreement; and

WHEREAS, the Parties further desire, to the maximum extent permitted by applicable law, the City Charter, and the City Code, to provide a limited transition period following a City election before the City Commission may terminate Employee without cause; and

WHEREAS, the Parties desire to enter into this Second Amendment to further amend the Agreement, as previously amended by the First Amendment.

NOW, THEREFORE, in consideration of the mutual covenants contained herein and other good and valuable consideration, the receipt and sufficiency of which are acknowledged, the Parties agree as follows:

1. **RECITALS; DEFINED TERMS**

The foregoing recitals are true and correct and are incorporated into this Second Amendment. Capitalized terms used but not otherwise defined in this Second Amendment have the meanings given to them in the Agreement, as previously amended by the First Amendment.

2. TWO-YEAR EXTENSION OF TERM

Section 3.1 of the Agreement is amended to extend the Term by two additional years. Accordingly, Employee's appointment as City Manager shall continue until the fifth anniversary of the Start Date, unless the Agreement is earlier terminated in accordance with its terms, as previously amended by the First Amendment, as amended by this Second Amendment, and applicable law. Section 3.2 of the Agreement remains in effect, except that all references to the expiration of the Term shall mean the expiration of the extended Term established by this Second Amendment.

3. COST-OF-LIVING ADJUSTMENTS

Section 8.1 of the Agreement is amended to add the following paragraph at the end of that section:

In addition to any compensation adjustment that may be approved by the City Commission following a performance evaluation, Employee shall receive any cost-of-living adjustment ("COLA") granted to the City's general employees during each remaining year of the Term, as extended. The COLA shall be provided at the same time, in the same manner, and in the same percentage or amount as the COLA granted to general employees, and shall be applied to Employee's then-current base salary. A COLA provided under this paragraph shall not preclude the City Commission from separately considering a merit, performance-based, market, or other lawful salary adjustment pursuant to Section 8.1 of the Agreement.

4. LIMITED POST-ELECTION TRANSITION PERIOD

Section 4 of the Agreement is amended to add the following new subsection:

4.9 Limited Post-Election Transition Period. To the maximum extent permitted by applicable law, the City Charter, and the City Code, the City Commission shall not terminate Employee without cause during the ninety (90) calendar days immediately following certification of the official results of any regular City election at which one or more members of the City Commission are elected or reelected. During such ninety (90) day period, Employee shall continue to serve as City Manager and shall have a reasonable opportunity to work with any newly elected or reelected member of the City Commission. This subsection does not limit or restrict the City Commission's authority to terminate Employee for cause as provided in Section 4.5 of the Agreement; to act in response to misconduct, gross misfeasance, malfeasance, gross incompetence, illegal acts, or other conduct identified in Section 4.5; to accept Employee's resignation; to allow the Agreement to expire at the end of its Term; or to take any other action required or authorized by applicable law, the City Charter, or the City Code. If any portion of this subsection is determined by a court of competent jurisdiction to be invalid or unenforceable, that portion shall be deemed modified to the

minimum extent necessary to make it enforceable, and the remaining provisions of this Second Amendment and the Agreement shall remain in full force and effect.

5. NO ADDITIONAL SEVERANCE

Nothing in this Second Amendment increases, supplements, or creates any severance benefit beyond the severance, if any, expressly provided in Section 4 of the Agreement. The Parties intend that all severance provisions in the Agreement, as amended, comply with section 215.425, Florida Statutes, including the limitation that severance pay may not exceed twenty (20) weeks of compensation and the prohibition on severance pay when an employee has been fired for misconduct as defined by applicable law.

6. RATIFICATION; CONFLICTS

Except as expressly amended by this Second Amendment, the Agreement, as previously amended by the First Amendment, remains unchanged and in full force and effect. In the event of a conflict between the terms of this Second Amendment and the terms of the Agreement, as previously amended by the First Amendment, the terms of this Second Amendment shall control. In the event of a conflict between this Second Amendment and applicable law, the City Charter, or the City Code, applicable law, the City Charter, or the City Code shall control.

7. COUNTERPARTS; AUTHORITY

This Second Amendment may be executed in counterparts, each of which shall be deemed an original and all of which together shall constitute one instrument. Each person signing this Second Amendment represents that the person has authority to bind the Party on whose behalf the person signs.

IN WITNESS WHEREOF, the Parties have executed this Second Amendment as of the Second Amendment Effective Date.
